Japan and South Korea, closely linked with the United States, are located geographically where the vital interests of great powers converge. It is imperative that northeast Asia remain stable. We will maintain and even enhance our military strength in this area, improving our air strength and reducing our ground forces, as the South Korean Army continues to modernize and to increase its own capabilities.

In the Middle East and the region of the Indian Ocean we seek permanent peace and stability. The economic health and well-being of the United States, Western Europe and Japan depend upon continued access to oil from the Persian Gulf. In all these situations the primary responsibility for preserving peace and military stability rests with the countries of the region. We shall continue to work with our friends and allies to strength their ability to prevent threats to their interests and ours. In addition, however, we will maintain forces of our own which could be called upon if necessary to support mutual defense efforts.

The Secretary of Defense, at my direction, is improving and will maintain quickly deployable forces—air, land and sea—to defend our interests throughout the world. Arms-control agreements are a major goal as instruments of our national security, but this will be possible only if we maintain appropriate military force levels. Reaching balanced, verifiable agreements with our adversaries can limit the costs of security and reduce the risk of war. But even then, we must—and we will—proceed efficiently with whatever arms programs our security requires.

Mr. TOWER. Mr. President, I think most of us on this side of the aisle were delighted to see the President engage in a little tough talk last Friday. However, in addition to some strong statements, I believe we Americans are likely to be judged by our actions rather than what we say. Our actions should reflect the message that the President, appeared to be trying to convey to the Soviets last Friday.

In fact, if we talk tough and then act meekly, the result is not going to be what we want it to be. Teddy Roosevelt said that we should speak softly but carry a big stick. When we talk tough but carry a small stick, the result may not be what we intend.

On this side of the aisle, we are preparing a foreign policy statement which will be submitted for the RECORD at some point, once it has been acted on by the Republican conference. This statement will reflect Republican views, which I believe will not be inconsistent with what the President said on Friday.

We hope that this signals, on the part of the President, a new toughness toward the Soviet Union that has not been demonstrated in the past year.

Mr. ROBERT C. BYRD. Mr. President, I do not think the President's speech suggests any turn in U.S. policy. I believe it is a reaffirmation of the policy we have espoused all along, and that is a policy that recognizes détente as a two-way street, not as a one-way street. It recognizes détente as something that needs to be reciprocal and comprehensive.

I believe the President is to be complimented on this reaffirmation of our policy, and I congratulate him on his statement.

ORDER OF BUSINESS

Mr. DOLE. Mr. President, is there a period for morning business?

Mr. ROBERT C. BYRD. Mr. President, the Senator from Texas and I have some time we would be glad to yield to the Senator.

Mr. DOLE. Three minutes?

Mr. ROBERT C. BYRD. Yes.

Mr. TOWER. Three minutes.

EMERGENCY AGRICULTURE ACT OF 1978

Mr. DOLE. Mr. President, I was not in the Chamber when the distinguished Senator from Georgia (Mr. TALMADGE), the chairman of the Committee on Agriculture, Nutrition, and Forestry, delivered his statement. I have had an opportunity to look at the statement.

Tomorrow we will be discussing the so-called Talmadge proposal and the so-called Dole proposal, the Flexible Parity Act. It is my hope that between now and tomorrow morning, we can work out some agreement so that both bills can be considered—not only considered in the Senate but also considered by the House; because the Senator from Kansas is fearful that there may have been some developments in the past few days that will interfere, so that the flexible parity bill will pass the Senate and that will be the end of it, that it will never go to conference and will never be considered by the House.

I am hopeful that some agreement can be worked out that will permit not only the Senate to work its will on both proposals but also permit the House of Representatives to have an opportunity to look at both proposals.

As a cosponsor of the Talmadge proposal, I support it. Senator TALMADGE voted for the Dole proposal. So I do not believe there is any great disagreement, and I would hope that there can be some agreement on just what will be in the final version of the bill that may go to the House of Representatives for active consideration.

It seems to this Senator there is a great deal of support for the flexible parity concept. It is market oriented. It does require the farmer to set aside acres. The more acres he sets aside the higher the target price will be, and in some cases it could achieve parity if enough acreage is set aside.

So I would hope that the Senator from Georgia and the Senator from Kansas can work out some agreement that will accommodate the views of us in the Senate and, more important, will accommodate the interests of the American farmer, because if the American farmer suffers much more the real loser will be the American consumer.

It just seems to me that tomorrow is a very important day in the U.S. Senate, and I would hope that we can resolve any differences we may have so that the bill we pass in the Senate will be meaningful and will offer the proper assistance through the marketplace to the American farmer.

I thank my distinguished majority leader for yielding to me.

S. 2764—AMENDMENT OF THE EXPORT-IMPORT ACT

Mr. TOWER. Mr. President, today I am introducing legislation to amend the Export-Import Bank Act of 1945. The Eximbank's primary purpose is to provide official credit assistance to U.S. exporters in order to improve their ability to compete in international markets.

The Eximbank plays a vital role in granting credits in connection with sales of our capital goods abroad. Given this country's current balance of payments, exports are being regarded with greater emphasis, especially as we grow more and more dependent upon foreign sources for oil. Export markets are indispensable factors, particularly when domestic demand for our goods and services is not sufficient to consume the supply which is available.

Much of the growth and development in the value of U.S. exports can be attributed to the value of agricultural commodities which have been sold abroad. Between 1960 and 1976, the value of agricultural exports rose from $4.832 to $22.996 billion, greater than the total value of U.S. exports in 1960. The most noteworthy increase in agricultural exports occurred between 1972 and 1973. The value increased 88 percent, from $9.401 billion to $17.680 billion. During that same year, the value of nonagricultural exports increased only 33 percent.

Mr. President, these statistics clearly demonstrate the increasingly important role of agricultural exports in our Nation's balance of trade. The trade deficit in 1976 was nearly $8 billion. Had not the agricultural sector of our economy made the significant contributions that it did, our deficit no doubt would have been considerably greater, particularly in view of the fact that we imported only $11 billion worth of agricultural commodities and over $110 billion in the nonagricultural category.

I recognize that the Eximbank played a relatively minor role in the financing of these exports. However, the Bank usually chooses to concentrate on the financing of nonagricultural exports, even in view of the fact that the agricultural sector contributes more than 20 percent of the total U.S. exports, and has done so since 1973.

Of the $6 to $10 billion available to the Eximbank for the financing of exports, only $75 million have been earmarked for agricultural commodities. And, those credits were granted only after many Members of the Congress pressured the Eximbank and Treasury Department.

For these reasons, I am introducing an amendment to the Export-Import Bank Act of 1945. In my view, the ratio of the amount of credit which the Bank extends to finance the export of agricultural commodities bears to the total amount of credit granted should at least equal the ratio between the dollar value of exported agricultural commodities and the dollar value of total U.S. exports.

In the event that the Bank determines and reports to the Congress that the demand for these credits is insufficient to meet this standard, or the Secretary of Agriculture determines that the level of exports of agricultural commodities does not require these credits, the Bank shall be relieved of this responsibility.

Continuous excess supplies of agricultural commodities in this country tend to depress prices received by our Nation's producers of food and fiber. To relieve them of these pressures will not only increase the prices they receive in the marketplace, but will increase their contribution to our balance of trade as well. At the same time, we will strengthen the role of the Eximbank in financing exports of U.S. goods and services.

Mr. President, I ask unanimous consent that the bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 2764

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That section 2 of the Export-Import Bank Act of 1945 is amended by adding at the end thereof the following:

"(d) (1) Subject to paragraph (2), for each fiscal year beginning after September 30, 1978, the ratio that the amount of credit which the Bank extends and in which it participates to finance the export of agricultural commodities bears to the total amount of credit which the Bank extends or in which it participates shall not be less than the ratio that the dollar value of exports of agricultural commodities during the immediately preceding fiscal year bears to the dollar value of all exports during such preceding fiscal year.

"(2) Paragraph (1) does not apply to any fiscal year with respect to which—

"(A) the Bank determines and reports to the Congress that the demand for credit to finance exports of agricultural commodities is insufficient to equal or exceed the ratio which would be required; or

"(B) the Secretary of Agriculture determines that the level of exports of agricultural commodities is or will be adequate without credit which the Bank extends or in which it participates.".

NOMINATIONS

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the Senate proceed to the consideration of the following nominations on the Executive Calendar with the understanding that no more than 3 minutes be consumed thereby:

Calendars Nos. 93, 94, 95 on page 2, and then all nominations on page 3 beginning with National Commission on Employment and Unemployment Statistics, going through the calendar on page 4.

The ACTING PRESIDENT pro tempore. Is there objection?

Mr. TOWER. Mr. President, reserving the right to object, and I shall not object, that would be Calendars Nos. 93 through 96 and 98 through 99 and would exclude Calendar No. 97 on page 3. Is that correct?

Mr. ROBERT C. BYRD. And it would exclude Calendar Order No. 96.

Mr. TOWER. The Legal Services Corporation nominees.

Mr. ROBERT C. BYRD. It would exclude all those numbered 97 but it would include nominations placed on the Secretary's desk on page 4.

Mr. TOWER. No objection.

The ACTING PRESIDENT pro tempore. The nominations will be stated.

DEPARTMENT OF AGRICULTURE

The assistant legislative clerk read the nomination of P. R. Smith, of Georgia, to be a member of the Board of Directors of the Commodity Credit Corporation.

The ACTING PRESIDENT pro tempore. Without objection, the nomination is considered and confirmed.

U.S. TAX COURT

The assistant legislative clerk read the nomination of Herbert L. Chabot, of Maryland, to be a judge of the U.S. Tax Court.

The ACTING PRESIDENT pro tempore. Without objection, the nomination is considered and confirmed.

NATIONAL TRANSPORTATION SAFETY BOARD

The assistant legislative clerk read the nomination of Elwood Thomas Driver, of Virginia, to be a member of the National Transportation Safety Board.

The ACTING PRESIDENT pro tempore. Without objection, the nomination is considered and confirmed.

NATIONAL COMMISSION ON EMPLOYMENT AND UNEMPLOYMENT STATISTICS

The assistant legislative clerk read the nominations of Bernard E. Anderson, of Pennsylvania; Glen G. Cain, of Wisconsin; Jack Carlson, of Maryland; Michael Harold Moskow, of Illinois; Rudolph Alphonsus Oswald, of Maryland; Samuel L. Popkin, of California; Mitchell Sviridoff, of New York; and Joan Lawson Wills, of Virginia, to be members of the Na-

tional Commission on Employment and Unemployment Statistics.

The ACTING PRESIDENT pro tempore. Without objection, the nominations are considered and confirmed en bloc.

PUBLIC HEALTH SERVICE

The assistant legislative clerk read the nominations of Thomas C. Chalmers, of New York; Kelly M. West, of Oklahoma; Samuel Richardson Hill, Jr., of Alabama; Doris H. Merritt, of Indiana; Cecil George Sheps, of North Carolina; James Franklin Williams II, of Michigan; and Nicholas Edward Davies, of Georgia, to be members of the Board of Regents, National Library of Medicine, Public Health Service.

The ACTING PRESIDENT pro tempore. Without objection, the nominations are considered and confirmed en bloc.

NOMINATIONS PLACED ON THE SECRETARY'S DESK

The assistant legislative clerk proceeded to read sundry nominations in the Diplomatic and Foreign Service placed on the Secretary's desk.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the nominations be considered en bloc.

The ACTING PRESIDENT pro tempore. Without objection, the nominations are considered and confirmed en bloc.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that it be in order to move en bloc to reconsider the votes by which the nominations were confirmed.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

Mr. ROBERT C. BYRD. I make that motion.

Mr. TOWER. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the President be notified of the confirmation of these nominations.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

(All nominations confirmed today are printed at the end of the Senate proceedings.)

Mr. ROBERT C. BYRD. I thank the Chair, and I thank all Senators.

THE PANAMA CANAL TREATY

The ACTING PRESIDENT pro tempore. Under the previous order, the Senate will now resume consideration of Executive N, 95th Congress, 1st session, Calendar Order No. 2, the Panama Canal Treaty, which the clerk will state.

The assistant legislative clerk read as follows:

Calendar Order No. 2, Executive 6 (95th Cong., 1st sess.), the Panama Canal Treaty.

The Senate continued with the consideration of the treaty.

The ACTING PRESIDENT pro tempore. Under the previous order, the Senator from Kansas (Mr. DOLE) is recognized to call up an amendment.

AMENDMENT NO. 69

Mr. DOLE. Mr. President, I call up amendment No. 69 to article I of the Panama Canal Treaty and ask for its immediate consideration.

The ACTING PRESIDENT pro tempore. The amendment will be stated.

The assistant legislative clerk read as follows:

The Senator from Kansas (Mr. DOLE) proposes amendment numbered 69.

At the end of article I, add the following:

5. For the duration of this Treaty and consistent with the provisions of Article IV, the Republic of Panama and the United States of America agree that, subject to the other provisions of this Treaty, only the military forces, defense sites, or military installations of the Republic of Panama or of the United States of America may be maintained in the national territory of the Republic of Panama.

Mr. DOLE. Mr. President, as everyone perhaps understands we are now in the process of discussing and hopefully responsibly amending the Panama Canal Treaty.

The Panama Canal Treaty extends from the date of ratification until the year 2000 and, as the preceding Neutrality Treaty, contains many important provisions, and some are controversial.

There will be disagreements and there will be efforts by some to clarify through amendments whether we are talking about payment guarantees to Panama, the so-called sea level canal restrictions, transition provisions for Canal Zone, employment provisions and mutual defense arrangements. All these areas are highly controversial.

The Senator from Kansas would point up at the outset that while the first, the so-called Neutrality Treaty, was highly important, it is this treaty, the Panama Canal Treaty, which, in effect, transfers the canal and all property to Panama. This is the big one. This is the one that the American people have been focusing on for many, many months.

And having had the opportunity to visit in Indiana, Kentucky, and Ohio this past weekend I can say that the American people and my own State of Kansas are still very concerned about the action taken by the Senate last Thursday and are seeking leadership, asking questions, and hoping that there are some in this Senate who may have voted for the first treaty who will find it possible based on good faith and conscience to oppose the second treaty.

Mr. President, the Senator from Kansas from the outset has been trying to suggest amendments. As this Senate looks over the history of what happened in the first treaty starting last September and then in October with amendments offered by the Senator from Kansas, which later became the leadership amendments, after the Senator from Kansas released a cable which indicated the Panamanians had one view and President Carter had another view, the Senate will find that following the release of that cable there was a meeting between President Carter and General Torrijos. Following that meeting there was a memorandum of understanding issued, and following that there were amendments offered by this Senator which incorporated the memorandum of understanding. Through the process of trying to put the package together in an effort to secure the necessary votes for passage, these amendments became known as the leadership amendments, and they did in some small way strengthen the Neutrality Treaty. But there were other amendments, responsible amendments, which were rejected time after time after time on this floor, and only when it became apparent in the closing days of the debate during the so-called accommodation time that certain reservations would have to be accepted, not amendments but reservations, was there any yielding by the proponents of these treaties.

So it seems to this Senator that now we are starting chapter 2. We are now on the real treaty, the Panama Canal Treaty, the giveaway portion, which will now be discussed, and this Senator has no way of predicting what the vote may be or how long the debate may last.

But it does seem to this Senator that we should consider this treaty very carefully, and if appropriate amendments could be adopted maybe this treaty could be ratified rather easily. But if the treatment of those who offer amendments on the first treaty discussed and debated by the Senate is any precedent, I assume they will be stonewalling throughout the debate on this particular treaty.

Many colleagues just could not vote for that treaty, the Neutrality Treaty, without some changes, and as many as 41 votes against tabling demonstrated the widespread concern.

It seems to this Senator we still have some responsibilities; we still have the right to add amendments that are in the national interest.

It is not this Senate's duty to worry about the need for a new plebiscite in Panama. At least the Panamanians had a right to vote on the treaty. The American people do that through their elected Senators, and I would suggest the great majority of Americans are wondering what happened when they have a preponderant and dominant view which is opposed to the treaties, and the treaties are approved by a 68-to-32 vote.

There are some who, in an effort to excuse, I guess, those who accepted reservations or weak understandings or whatever have attributed the opposition to the so-called far right; that somehow those who raised any questions about the treaties are involved in some right-wing organization or right-wing effort to destroy the treaty.

Well, the Senator from Kansas would only say that is a rather lame approach to the problem. I would hope we could oppose and try to strengthen these treaties without being characterized as some far-out group or some right-wing Member of the Senate. But those efforts will be made by certain writers who were never disposed to make any changes, who were pro-treaty from the outset, and who saw every change and every effort by those who wanted changes for the better not as an effort to improve but as an effort to destroy.

That is a right of those who have that

bias, who never look beyond that bias, but the Senator from Kansas does not associate efforts to improve the treaty with any right-wing effort by anyone.

So we are in the process now of considering the first amendment, amendment No. 69, and there will be others. The Senator from Kansas, as in the first treaty debate, Neutrality Treaty, offered only two amendments, and I will offer only a few amendments to this treaty.

The Senator from Kansas time after time agreed on time limitations, and I am willing to do that insofar as this treaty is concerned. So it is not my intention to prolong the debate. It is not my intention to abuse my right as a Senator to extend and extend and extend the debate. But I do hope we will have a chance maybe during this debate to have our amendments voted up or down rather than being tabled.

It seems to me if the votes are there for tabling, the votes are there for defeating our amendments on their merits.

So this Senator will be discussing not just amendment No. 69 but an amendment to reduce payment guarantees to Panama; an amendment to allow the United States to keep bargaining options open for construction of a new oceanic canal; and an amendment to extend the transition period for canal operations; and a reservation which would guarantee human rights.

This Senator may not call up all these amendments because other amendments have been offered that cover the same ground. But all of these aspects should be addressed and discussed. This Senator, however, does intend to call up an amendment to eliminate restrictions against America's freedom to build a new canal anywhere we deem it more suitable.

I trust that the leadership would agree either to support my amendment, which is amendment No. 10, or to support some similar amendments, because it occurs to this Senator that this amendment is one in which there is a great deal of interest.

With reference to amendment No. 69, as stated it would add the following language to the end of article I, and that language would be:

> For the duration of the Treaty and consistent with the provisions of article IV, the Republic of Panama and the United States of America agree that, subject to the other provisions of this Treaty, only the military forces, defense sites, or military installations of the Republic of Panama or of the United States of America may be maintained in the national territory of the Republic of Panama.

Mr. President, this amendment has just one purpose in mind, and that is to insure that no foreign military presence other than that of the United States will be established within Panamanian territory between now and the year 2000.

In particular, this amendment is designed to prevent the stationing of Soviet forces or Cuban forces or the forces of any other nation within Panamanian territory, which could clearly run contrary to the interests of the free world in maintaining a peaceful and stable environment surrounding the canal.

It is obvious from the international situation today, in fact one that President Carter has just recently commented on, that the Soviet Union has not abandoned its traditional policies of intervention and destabilization, particularly around the principal water arteries of the world.

Beyond that, the practice of enlisting and arming mercenary troops to create regional havoc appears to be in full swing. The Cuban Government, which has long sought to broaden its influence in Central and South America, would be a willing tool of Soviet intervention on Panamanian soil.

I might suggest that, perhaps, sometime later this year we might reconsider what we did last year with reference to Cuba when all this big rush to normalize relationships with Cuba was in full swing, and I believe now the administration has learned that is not the proper course and, hopefully, under a proper appropriations bill there will be some limiting language on what we may or may not do so far as normalizing relations with Cuba are concerned.

We do not have to look very far. We just look at the outrageous military intervention of the Soviet Union and Cuba within Ethiopia within the past several weeks to recognize what threats the future holds.

I might say again the Senator from Kansas considers this to be a very significant amendment, and I would think that just what has happened in the past few weeks as far as the Russians were concerned and as far as the Cubans are concerned would alert the American people and my colleagues to the real danger, and the need for this kind of an amendment.

If the Cubans can go to Angola, and if the Cubans can go to Ethiopia thousands and thousands of miles away, then I would suggest that Panama must be a very tempting target. I propose we undercut that threat before it ever happens, and now is the time to do it.

The frank reality of the situation is this: Unless this provision is adopted, the Government of Panama will be entirely within its rights under the new Panama Canal Treaty to allow foreign troops to be stationed anywhere in Panama regardless of whatever misgivings or objections the United States may have. Foreign troops could be based not just in remote areas of Panama but even within in the present Canal Zone because we are giving up over 50 percent of that territory.

They could be right on the banks of the canal in some places—right up against remaining American military bases and within close proximity of the canal.

Because the Canal Zone immediately becomes Panamanian territory upon ratification of this treaty, and because the remaining U.S. presence is limited to certain designated areas for military bases and housing, there will be nothing to prevent Panama from doing whatever she likes with large portions of the Canal Zone. She may grant permission to whomever she likes, to move right into the American military base areas transferred to Panama under this treaty, for example. And the sad fact is that we have no legitimate grounds for objecting or blocking such a move.

The Senator from Kansas simply suggests that now is the time to confront this dilemma and seek a simple bilateral agreement that no foreign troops or bases will be maintained anywhere within Panama during the next two decades. An unwillingness to agree on this matter now makes later agreement all the more unlikely. In fact, failure to secure such a mutual agreement now will make future confrontations over this matter all the more likely. For, if we raise an objection or seek to block the stationing of foreign troops in threatening positions, Panama will inevitably charge that we are challenging her sovereignty. We will be accused of interfering in her internal affairs.

JUSTIFICATION FOR AMENDMENT

Mr. President, this is neither an impractical nor an unreasonable assurance to seek from Panama under the terms of this treaty. I think it is both practical and reasonable to ask for this assurance. My colleagues are well aware that the Panamanian Government has already given us a similar assurance under article V of the Neutrality Treaty—that "only the Republic of Panama shall operate the canal and maintain military forces, defense sites and military installations within its national territory" after 1999. Clearly, Panama did not consider such a guarantee to seriously challenge her sovereignty, or she would have never agreed to that provision.

In fact, if anything, the assurance contained within this amendment should enhance Panama's public commitment to national "sovereignty," for it would stand as a clear statement that Panama does not intend to allow others—such as Cuba or the Soviet Union—to intervene within her territory. I do not suspect that the United States, or any other self-respecting government, would hesitate to make such a proclamation, if it were as concerned about sovereignty as the Panamanian Government seems to be.

So this, as I have indicated, is neither an unreasonable nor an impractical demand upon Panama. In fact, it is not a demand at all. By approving this amendment, the Senate will simply be proposing a simple bilateral agreement between our two governments on this point. It will then be up to Panama to decide whether or not she will agree to this proposal.

So it is clearly within our right and our realm of responsibility to propose. and to approve this amendment. I hope the floor managers do not argue otherwise. And I would hope they will permit the Senate to have a direct, up-or-down vote on this amendment, rather than on a motion to lay on the table.

Mr. President, I do not have a large map, but I can display to any Senator who might be interested all the territory we surrender immediately upon ratification.

It is easy to see that well over half that territory which is now within the zone will be turned back to Panama. Unless this amendment is adopted, there is nothing to prevent the Panamanians, a week after ratification, from inviting

in the Cubans or inviting in the Russians; and I just suggest that that if we are really serious about the canal, if those who voted for the first treaty really believe that the canal has any interest insofar as we are concerned, then I ask them to look very carefully at this amendment, because it is offered in good faith. It is offered in an effort to strengthen the Panama Canal Treaty. It is offered as a way to protect and preserve the Panama Canal between now and the year 2000, and it does not take any genius to understand just how close foreign troops can moved to the canal itself without this amendment.

I know we are going to hear all the arguments that they can do that now. But that is not the case now, because they cannot move them within the Canal Zone. Then we will hear the arguments about General Torrijos. We will hear the argument that we cannot have another plebiscite.

I think we have considered those arguments, and I would hope that by now we understand that we have some rights in this country. We have some rights to preserve in the canal because of our interests as well as Panamanian interests, and they may not coincide with General Torrijos' interests, the Cuban interests, or the Russian interests.

I would only say, as I indicated a few moments ago, that if President Carter is so concerned about Russian influence, as he indicated in his strong statement just 2 days ago, then I think he might want to take a look at this amendment. He might want to react favorably to this amendment, because it goes to the very heart of the problem he is now having with the Soviet Union.

Mr. HELMS. Mr. President, will the Senator yield?

Mr. DOLE. I am happy to yield to the Senator from North Carolina.

Mr. HELMS. Mr. President, it is absolutely essential, if commonsense in the ratification of these treaties is to prevail, tnat the amendment of the Senator from Kansas be adopted.

I strongly support the amendment of the distinguished Senator from Kansas. There is absolutely nothing in either of these treaties, anywhere, which prevents the Republic of Panama from inviting foreign troops into her territory—and that is true whether we speak of the period before the year 2000 or the period after the year 2000.

Some Members of the Senate are under the impression that the Neutrality Treaty prevents the introduction of foreign troops after the year 2000. As we know, in the treaty which was approved last Thursday, it provides in article V that—

> After the termination of the Panama Canal Treaty, only the Republic of Panama shall operate the Canal and maintain military forces, defense sites and military installations within its national territory.

This has been interpreted by the proponents of the treaties as meaning that only Panamanian troops may be maintained on Panamanian soil.

But, as the Senator from Kansas has indicated, if we look at it carefully, we note that the language says nothing about "Panamanian" troops. It says that only Panama may maintain military forces. Thus it is quite clear that Panama can maintain military forces of another nation if Panama so chooses. This is not merely the interpretation of the Senator from North Carolina or the Senator from Kansas; this is the official interpretation of the U.S. Department of State.

Mr. President, I direct the attention of my colleagues to an exchange of correspondence between the Panama Canal Subcommittee of the House Merchant Marine Committee and Mr. Douglas J. Bennet, Jr., Assistant Secretary of State for Congressional Affairs, under date of January 30, 1978. This is not some offhand opinion, or a garbled statement appearing in the newspapers. This is premeditated, official correspondence in which the Department of State responds officially to a duly constituted committee of the Congress.

Mr. DOLE. Mr. President, may we have order in the Senate?

The ACTING PRESIDENT pro tempore. The Senate will be in order.

Mr. HELMS. First, the question put to the State Department:

> Does Article V of the Neutrality Treaty after the year 2000 prohibit training of foreign troops in Panama? Temporary military exercises by the United States in Panama? Temporary military exercises by Cuba, or other non-U.S. or non-Panama military Units?

That was the question. Now here is the official answer from the State Department:

> Article V of the Neutrality Treaty would not prohibit Panama from inviting foreign troops, including those of the United States, to Panama for temporary exercises or training. The Treaty does provide that only Panama shall maintain military forces, defense sites and military installations within its territory. Any exercise or training by foreign troops that we judge constitutes a threat to the Canal would be a violation of the Treaty, and as such it would allow the United States to take appropriate countermeasures.

Now, Mr. President, our present debate is about the Panama Canal Treaty. But those Senators who are relying on the Neutrality Treaty to prevent the introduction of foreign troops in Panama are making a grievous mistake. For the State Department is admitting freely that Panama can legally bring in other foreign troops, including troops of Cuba or any other nation that may be hostile to us.

What would be our recourse if thousands of Cuban troops were brought in for alleged "training" or alleged "temporary exercise"? The State Department spells that out. The State Department claims that we have the unilateral right to use force against Panama, if in our judgment—that is, in our unilateral judgment—the introduction of Cuban troops would threaten the neutrality of the canal.

So we see what could happen, Mr. President. We have the makings of a potentially explosive situation, which the Senator is trying to avoid. For if there is nothing to prevent Panama from bringing in Cuban troops after the year 2000, there is obviously nothing that prevents Panama from bringing in Cuban troops before the year 2000. That is why the amendment of the Senator from Kansas is so essential.

The presence of U.S. troops in the U.S. bases in Panama, right next to troops of a foreign nation, troops that might be hostile to ours, would create a tinderbox in international relations. We would have to use force, or withdraw. Would we take action to prevent the introduction of, for example, Cuban troops? Would we blockade Panama? Would we blockade Cuba? The answers are so obvious—and this is in response to what the Senator from Indiana is about to say, I am confident—that I need not spell them out. Indeed, our military rights might even be more of a danger, than a protection.

Mr. President, once we give up the exercise of sovereign rights in the Canal Zone, then we are shut out under international law from taking whatever steps we deem necessary. We might decide that, to protect our rights and to protect the canal, we must use force anyway. But to do so would be illegal, and would fly in the face of all the solemn international obligations that we have undertaken. These treaties, frankly, are putting us in an untenable situation.

The amendment of the distinguished Senator from Kansas would, at least in a small degree, prevent the development of an explosive situation. Of course, Panama could still abrogate the treaties. But the amendment of the Senator from Kansas would set up a situation where Panama could not let a dangerous situation develop by degrees. Her alternatives would be to abrogate the treaties, or to violate them outright. Thus it would prevent the backdoor growth of confrontation. It would be a deterrent to the more drastic actions of abrogation or violation.

Moreover, the Senator's amendment amends article I. It is in effect a restriction on the return of the exercising of sovereignty to Panama. In other words, Panama would legally be prevented from exercising a certain sovereign right, the right to have troops from other nations on her territory, for the next 22 years. This restriction is essential if these treaties are going to work.

I commend the Senator for proposing his amendment.

The ACTING PRESIDENT pro tempore. The Senator from Kansas.

Mr. DOLE. I thank the distinguished Senator from North Carolina. I think he indicates very briefly and very well what the problems could be. I defy anybody who opposes this amendment to tell us what they are going to do if Cuban troops are invited into Panama—I still want some answers—and what they intend to do if Russian troops are invited into Panama.

I think we are getting down to the hard ball of this debate. We have had all the preliminary rounds on neutrality, but now we are down to that part of the treaty that really concerns the American people, and it concerns a number of Senators who voted for the Neutrality Treaty. It is time we started getting

some clear answers to the hard questions, instead of a lot of rhetoric in an effort to console some Senators to get their vote.

I would guess if we asked the American people this question—of course, we do not have the right to ask the American people to pass on these treaties as that only applies to Panama. The Panamanians have a plebiscite. Ours is indirect, through our elected Senators. But I would guess if we asked the question, would the canal be threatened if there were Cuban troops stationed there within a mile of the water, or less, between now and the year 2000, most Americans would at least think there might be some threat to the canal itself and to its neutrality between the day of ratification and the year 2000.

I do not know the answer. I would not know how to respond to someone who would ask me what would be our reaction. I would not know how to respond based on President Carter's recent statement about détente, and his warning to the Russians.

It seems to me, as I have indicated earlier, that if the Cubans are willing to go thousands of miles to interfere in Angola and the Horn of Africa, and who knows where else, the Panama Canal is a fairly attractive target.

Maybe there is some foolproof answer that the treaty proponents have. Maybe it is time that we take a look at what we are about to do and then step back and suggest amendments might be in order.

It does not really answer the question just to have the stonewalling we have had for the past 4 or 5 weeks on every amendment. It does not really satisfy those Americans who are concerned about the canal. As I have indicated before, they do not all belong to some right-wing nut club. They are concerned Americans, they are Democrats, they are Republicans, they are independents, who have an interest in what we do.

I would hope that we have some clear and compelling answers from the treaty proponents.

I pay tribute to those who were able to secure the 68 votes, the leaders of the Republicans and the leaders of the Democrats, the leaders of the pro treaty forces. I am not certain what was accomplished, but they had the votes. It seemed to some of us that we could accomplish more with appropriate amendments, but the leadership operated to table every amendment.

Maybe that is the statesmanlike approach. Maybe we should abandon or abdicate our responsibilities as Senators for 1 week or 2, or 3 or 4 or 5, so that we do not disturb General Torrijos, so that we do not embarrass General Torrjios with another plebiscite. This Senator is convinced that there is a great deal of concern across America—not anti-Panamanian, but sort of a pro-American concern. You know, there is really nothing wrong in talking about the rights of America. It really is not unpatriotic to talk about our rights in the canal.

The Senator from Kansas never understood the great rush by this administration to normalize relations with Communist Cuba, to normalize relations with Communist Vietnam, to give away the Panama Canal without any amendment that might be meaningful. I hope that in the next 2 weeks, or 3 or 4 or 5 weeks, as we debate thoroughly the Panama Canal Treaty, the American people, the thoughtful American people who vote for us and send us to the Senate, will have a chance to be heard. They do not all speak with one voice. There are some differences of opinion. Some do not think we ought to do anything to the treaties, that they ought to be ratified.

I hope that, when we offer responsible amendments—and I believe this is a responsible amendment—unless the questions can be clearly answered by the pro-treaty forces in the Senate, those who are willing to give it to Panama without any amendment, those who are willing to give the canal to Panama without any assurance, at least ought to clarify for the American people, for their own constituents and their own States, the answers to some of these questions that have been asked us time after time.

I hope that an amendment like this could be adopted, could be accepted. I am not optimistic, but I do not really see any real reason for its rejection.

I am happy to yield to the distinguished Senator from Nevada for any comment he might have. I yield the floor.

Mr. LAXALT. I thank the Senator from the good State of Kansas. I rise in support of the amendment. I commend the Senator from Kansas for raising a point that has been raised many, many times over to each of us by thousands and thousands of constituents out in America. They are concerned about the proposed Cuban influence. Time and again, I have been asked the question, "How can the Senators be so naive as to think that if Cuba, at the behest of the Soviets, will travel thousands and thousands of miles away to Africa and is now in the Horn of Africa, if the canal comes under the power of General Torrijos, an admitted friend and associate of Mr. Castro, the Cuban presence very quickly would not be keenly felt within Panama itself?"

In that regard, I think one of the finer statements that has been made during the course of the hearings was made by none other than Adm. Thomas Moorer in testimony before the Committee on Foreign Relations. For a moment, if the good Senator from Kansas will permit me, I should like to read from that testimony so that our colleagues and the American people can see the strong concern of this man who is totally independent, not responsive or responsible to the administration or anybody else. He is an independent, dedicated American. The depth of his concern was expressed in his testimony to the Committee on Foreign Relations:

> As Chairman of the Joint Chiefs of Staff, I became even more sensitive to the strategic value of this U.S. canal as a means of protecting the security of the United States. My job as Chairman involved all of the Armed Forces of the United States—their collective requirements—and I was primarily responsible to the President for their ability to carry out their roles and missions as assigned by the Congress. Any naval commander acting in that role in wartime will immediately perceive that it is vital to U.S. interest to retain complete ownership and control of the Panama Canal.

That is what this second treaty is all about. We are trying to determine, as the Senator from Kansas said, the gut issue: Is this country trying to give up control and ownership of the Panama Canal? We have dealt now with the sequel, the Neutrality Treaty, what happens after we give it away. Admiral Moorer has confirmed, in his statement and his testimony before the Committee on Foreign Relations, the concern of many of us on this side of the aisle as well as the other side of the aisle.

Quoting again from Admiral Moorer:

> In view of the above, I am very much concerned about the proposals to surrender the Panama Canal to a leftist oriented government allied with Cuba. There exists the potential danger for giving this U.S. advantage to a man who might allow or might be persuaded that it was in his best interest to permit Soviet power and influence to prevail by proxy over the canal, in much the same manner as happened in Cuba.
>
> I was convinced as Chairman of the Joint Chiefs of Staff, and I remain convinced today, that if the Soviet Union ever gained even proxy sovereignty and control over the U.S. Canal Zone and canal through Cuba, U.S. security as well as U.S. prosperity would be placed in serious jeopardy.

That is what this is all about. We have contended here that having full control over the ownership and the operation of that canal is vital, not only to Panamanian security and hemispheric security, it is vital to our own security. That is precisely what Admiral Moorer was saying in his statement.

Going further into the statement:

> The United States would be placed in jeopardy because interocean mobility would be threatened. The mobility of allied commercial lifelines of the entire Western Hemisphere would be needlessly jeopardized, and the point is: There is no point in surrendering this vital interest. Also, by relinquishing control of the Canal Zone and the canal, we would force all those nations who depend on our power and leadership to accommodate to the adverse implications of such action on our part. Recent history clearly indicates that the Canal Zone could quickly become the satellite base of an adversary. The advocates of this proposed treaty do not appear to take this factor into account.

That is what this is all about. That is precisely the concern that the Senator from Kansas expressed through this amendment, that between now and 2000, for the next two decades plus, we safeguard against the possibility of having foreign troops placed in Panama on a proxy basis.

Quoting further:

> The Panama Canal is one of the four maritime gateways of the world, together with the Malacca Straits, the Suez Canal, and the Gibraltar Straits.
>
> Anyone who reads Soviet literature concerning maritime affairs soon learns that the Soviets fully understand the strategic importance of the Panama Canal, even if some here in Washington do not. In my view, the prime reason for the burdensome support of Cuba by the Soviet Union is related directly to the interest in the canal as they greatly expand their maritime capabilities in the form of both warships and merchant ships.
>
> We have, in fact, in my view a Torrijos-Castro-Moscow axis.

That is critical to this discussion. This amendment would preclude that type of axis from implementing whatever agreement or understanding they may have to the extent of a visible military presence within Panama. That is precisely what Admiral Moorer says in this. I repeat that statement:

We have in fact, in my view, a Torrijos-Castro-Moscow axis. Castro has sent thousands of troops to Africa aboard Soviet ships. He has been to Moscow where he has been greeted with open arms. Torrijos has been to Havana where he has been decorated by Castro while both extolled the success of their respective revolutions. He has also been to Libya to visit Qadhafi who, next to Castro, is the most active international revolutionary in the world.

When Torrijos overflew Havana on his return from Washington to Panama after the ceremonies last month, he sent the following message to Castro, and I quote:

"On my return trip to my country and flying above the sky of Cuba, I salute you with friendship always. I wish that the Cuban people under your skillful leadership continue its ascendant march toward progress. In Latin America your name is associated with feelings about dignity that have been channeled toward the ending of a shameful period of colonialism."

In addition, I would note that a large Russian commission has recently visited Panama seeking concessions and offering economic assistance.

Mr. Chairman and members of the committee, do not be surprised if this treaty is ratified in its present form, to see a Soviet and/or Cuban presence quickly established in the country of Panama. Such a presence will seriously complicate the exercise of the claimed "right" of the United States to intervene. I can find no such specific right contained in the treaty, however.

It has been stated time and again on this floor that we need not be concerned, that we are breast beating, that we are fighting ghosts sitting out there, that there will be no Cuban presence, be no Soviet presence.

General Torrijos, if the good Senator from Kansas will remember, told us personally that this was no problem. He would not permit it.

Well, if it is no problem, why do we not express it? Why do we not make sure there is no problem by adopting an amendment that will be within the four corners of this treaty, so that at least within the next 22-year period we can all be assured that there will be no Soviet presence there through the Cubans as a proxy?

So I commend the Senator from Kansas. I think that this is an amendment that is as purposeful and substantive as anything we have treated on this Senate floor, in all probability, despite their merits, which have not seemed to mean much around here.

We have the responsibility of advice and consent. So far, it has been all consent and very little advice—that is what I have observed on this floor. But I think that if there is a substantive amendment with merit, this is it. It is absolutely essential that we protect our rights as a country by adopting this kind of amendment.

If we are stonewalled, as we probably will be again, by people against this amendment, I think it will render a great disservice, not only to the Panamanians and the treaty, but to the American people.

So I strongly support the amendment of the Senator from Kansas.

Mr. President, I yield the floor.

Mr. BAYH addressed the Chair.

The ACTING PRESIDENT pro tempore. The Senator from Indiana.

Mr. BAYH. Mr. President, I have not participated often in these debates. I have listened carefully and, as my colleagues recall, I have, when asked, been prepared to supply certain very sensitive information to Members of the Senate, which was made available to the Intelligence Committee, so that my colleagues could best render judgment on the particular question in mind.

Inasmuch as I feel it is important to maintain the objectivity, inasmuch as it is possible to maintain it in the eyes of those who might reach a different conclusion, but as much as I feel it is important to maintain the objectivity of information coming from the Intelligence Committee, I think it is important for me at this moment to say I am not speaking as chairman of the Intelligence Committee, but I am addressing my colleagues as one of 100 Members of the U.S. Senate who feels very strongly about the obligation that we have here.

I have listened previously, and as I listen this morning, somehow or other, the inference slips into the words of those who seem to oppose the treaties and those who, for what would appear to them to be very good intentions, offer amendments, that if a Member of the U.S. Senate dares to disagree, feels that the treaties are important and that the amendments are not necessary, that we are part of some sort of stonewalling cabal, that we are really not sensitive to our responsibilities as Members of the Senate.

If, indeed, that inference has been sensed by others, I think it is most unfortunate. It is sad when Members of the U.S. Senate cannot disagree on the merits of an issue without suddenly being accused of being irresponsible in the fulfillment of their obligations under the advise and consent treaty ratification provision of the Constitution of the United States.

Frankly, I do not think there is sanctity in the treaty wording. I have been prepared to support those amendments which were proposed which I thought went a long way to clarify the rights of the United States, as well as the obligations of the United States under the defense and neutrality provisions of the previous treaty.

But I think it is important for us to understand just what we are talking about here, and I do not want to impugn the motives of my distinguished colleague from Kansas, or others.

But I think on any amendment which goes to really change the understanding of the words that are now there, the proposer or the supporter of those amendments needs to realize the consequences.

I suppose that any one of us, collectively, in the committee sitting around here, could make changes in wording that might look, in retrospect, to be a bit better or more clear.

We have had a good deal of air, both fresh and hot, flowing through and around these treaties since they have been signed, and hindsight is always much clearer focused than foresight.

The fact of the matter is that these treaties have been under consideration and negotiation for 14 years. We have had administrations of both political parties, reaching back almost a generation, trying to resolve differences of opinion between our two countries.

Now, if one is to negotiate a settlement, almost by definition neither side is totally satisfied with the final results.

But the final results look better to both sides than the alternative of no resolution of significant, outstanding differences.

So we are given the language of the treaty which, as far as the Senator from Indiana is concerned, clearly protects the two basic rights that are important to the United States, the two basic circumstances that are important to the United States; that is, the absolute necessity of seeing that the canal remains neutral and accessible and available, not just to our ships and our merchants, but the ships and merchants of the world.

It also guarantees in my judgment, our right to defend that canal against those adversaries who would not want it to remain open.

As I look at this treaty, I recall some of the remarks that have just been made which suggest that some of us, who might look at this particular amendment from a little different perspective or, indeed, the entire treaties from a little different perspective from that of the Senator from Kansas, the Senator from Nevada, or the Senator from North Carolina, might be afraid to embarrass Mr. Torrijos.

I do not see how anybody can direct that particular comment to the Senator from Indiana because if there has been anything that has been the cause of embarrassment to the goverment in Panama, there has been the very frank and open disclosure for the first time of certain facts, certain undertakings, by members of the Torrijos family.

Sure, they are embarrassing, but they are factual and they came out. The Senator from Indiana not only supported that, but was one of those who initiated it.

To suggest, as I mentioned a moment ago, that by having a different perspective of this amendment or the treaties is an abrogation of our responsibilities as Senators, I think is a bit unkind as well as totally inaccurate.

I have been out in my home State over this last weekend. I am glad that my colleague from Kansas was there and having a chance to address the members of the other party at a festive occasion. I am glad they chose one of the best orators to grace their festivity.

I might disagree with them and with my colleague from Kansas, but I like for them to have the best, and they had one of the best in Indiana.

I had a chance, of course, to renew the rather constant communication I have with my State. I must say the Senator from Kansas is accurate, there is a great deal of concern out in Indiana, and I think perhaps in every State, about the Panama Canal treaties.

(Mr. SARBANES assumed the chair.)

Mr. BAYH. I must also say there is a great bit of misunderstanding about the Panama Canal treaties. I sent out a questionnaire at the end of last year, which I think pretty well reflects this. It has been proven by those who are a bit more professional than I in the past few days, but one of the questions I asked was did my constituents support the Panama Canal treaties, and not surprisingly, by almost a 3-to-1 margin, the answer came back "No."

Then I asked a second question, which said, if you believe the treaties gave the United States the right to defend the Panama Canal, would you support the treaties? Whereupon, an additional percentage answered in the affirmative, which just on those two questions showed that a majority of the people of Indiana would support the Panama Canal treaties, if they believed the United States had the right to defend the canal.

We have the right to defend the Panama Canal, yet the treaty opponents have constantly harped away, and drummed away, at the fact that we do not have the right to defend.

Admiral Moorer suggested that suddenly there will be a massive infusion there of Communist troops and ammunitions. The fact of the matter is anybody who bothered to read the fine print of the treaties, particularly to read the amendment that was adopted, presented by both the Republicans and the Democratic leaders—and this is not a matter of dispute where we have all Republicans on one side and all Democrats on the other—has to come to the conclusion that the treaty does indeed give us the right to defend the canal.

As I listened to the testimony read by our distinguished colleague from Nevada about what Admiral Moorer said, I would suggest that maybe the people of the country ought to have a chance to read all of Admiral Moorer's statement that was given before the Armed Services Committee because there can be no question about Admiral Moorer's patriotism and his service to the country as an outstanding naval officer. There certainly can be some rather significant questions raised about whether he knows what he is talking about from a legal standpoint, if one looks at the way he addressed the legal and constitutional question of the treaty that was before us.

But Admiral Moorer seems to suggest that being for or against this treaty divides us into camps in which we are either for or against the continued use of the canal. I would like to suggest that certainly is inaccurate. I have not had a chance to discuss this particular point with all of the other 67 Senators who voted "yes" the other day, but I would doubt if a single one of them was prepared to endorse any proposition that would lessen our ability to use the canal or that would signal that the canal was less significant to the United States, from a standpoint of national policy.

Now I think it is important to look at this amendment, not only from the standpoint of the language of the treaty which the Senator from Kansas attempts to clarify, but I think it is important also to look at it in terms of what the situation is now without a treaty.

All this talk by Admiral Moorer about the Torrijos-Castro-Russian axis somehow or other totally ignores the fact that the Panamanian Government does not even recognize this and does not recognize either Moscow or the People's Republic of China. The Panamanians do not have relations with the Soviet Union and the Panamanians, interestingly enough, still recognize Taiwan as the mainland government of China. It is rather unusual now to suggest that suddenly they are going to have the Kremlin send in large numbers of surrogate armed forces wearing Cuban uniforms.

I think if we are going to address ourselves to what is going to happen between the time of signing the treaty or the ratification of the treaty and the year 2000, as far as the absence of foreign troops adjacent to the canal in Panama is concerned, maybe we ought to ask ourselves what the present status is. What is the present status under the 1903 treaty? I have not heard Admiral Moorer discuss this concern. Under the present status the Panamanian Government could invite the Russians and the Cubans to come in. The fact of the matter is they have a legal right to do that now under the 1903 treaty. They have not done it.

We are told by our distinguished colleague from North Carolina, as well as the Senator from Kansas, and others, that the fact that the Cubans have gotten on Russian ships and airplanes and gone to Ethiopia and Angola is good reason to believe they are going to go to Panama. Quite the contrary, in my judgment. The fact that they do go to Ethiopia and they do go to Angola is predicated on the understanding, in my judgment, that they know that those places are not just that important to the United States and they are not going to have to deal with the United States.

If they look at the record, not just to rhetoric of what happens when you get to fooling around in Uncle Sam's backyard, they are not going to sleep very easily if they are thinking about undertaking any such misadventures.

What happened when they put Russian missiles in Cuba? In did not take very long for John Kennedy and the U.S. Navy to get them out of there. We had no hesitancy in sending large numbers of troops into the Dominican Republic. There was no treaty. We sent military forces into Guatemala. There was no treaty.

The fact of the matter is, when you are in the Caribbean, you are in the U.S. backyard, and if you are inclined to do the United States ill you better stay out of there because if you come in there and it begins to look as if this is going to jeopardize the security of the United States and the safety of the people of America, Uncle Sam has unequivocally undertaken to do what is necessary to get those foreign powers removed.

We have not been bashful. And frankly, we have not looked for a whole lot of treaties and international precedent to rely on. And I suggest to anybody who thinks otherwise that once this treaty is ratified or is not ratified, we are going to take whatever steps are necessary adjacent to that canal in order to protect it.

I must say that contrary to the interpretation of my distinguished colleague, my friend from Kansas and I come to a different conclusion. Certainly, I do not impugn his motives at all but, as I see it, we do not have a treaty right to act if the Panamanian government now invites Russian or Cuban troops in there. The Senator from North Carolina talks about the thousands of Cuban troops. Well, that is sort of ridiculous, but suppose the Panamanian Government did undertake this. While we do not have any treaty right to intervene now, I think we would. The 1903 treaty does not give us that right, but, in my judgment, if this treaty is ratified we would not only have a right but we would have a responsibility to act. There is no question about what the prohibition is after the year 2000.

But let us suggest that Mr. Torrijos or someone who comes after him might be so naive and such a poor student of history as to not understand what the United States is going to do and thus they invite the Russians to have a training activity or the Cubans to set up a training camp within a mile, within the very sight of the canal, as our colleagues suggest might happen.

Well, in the very document that our colleague from North Carolina used to try to prove his point, and which he was quoting the State Department's response, it seems to me he answered the question. He should have allayed his own fears because in that very document it says that would happen. The United States would unilaterally decide on two basic points: one, whether the neutrality of the Canal Zone was being threatened by the presence of those troops, and; two, whether our right to defend the canal was going to be put in jeopardy by the presence of those troops, and that at any time the presence of those troops ran contrary to both the obligation of neutrality and the obligation and the right to defend the United States would act. And I suggest anyone who feels otherwise perhaps should get out the history book and look not at what we have said in the past but what we have in fact done in the past.

Mr. CHURCH. Mr. President, will the Senator yield?

Mr. BAYH. I am glad to yield.

Mr. CHURCH. I commend the Senator for his well-reasoned argument. I wish that we could conduct this debate without resort to fantasies. It is easy enough to concoct dismal versions of the future and to base one's arguments upon worst case situations.

But reasonable men and women must ask themselves the question, what likelihood is there, between now and the end of the century, that the Government of Panama will provoke a confrontation with the United States by inviting foreign troops onto Panamanian soil?

The answer to that question is that

the chances are practically nil, given the fact that Panama has had such an option under the existing treaty and never, in three-quarters of a century, has seen fit to invite foreign troops onto Panamanian soil.

So if the past is any measurement of the future, and I know of no better way to gage the future than from the past, there simply is no reason to fear that the Panamanian Government is going to do anything so foolish as invite foreign troops into Panama.

Having said that, will not the Senator agree that the best way we can assure ourselves that nothing so fanciful will ever occur is to ratify this treaty? That would preserve the good feeling which now exists between the two governments and, indeed, the two peoples. For then we would have followed through with a commitment we gave to Panama 14 years ago, the last time bloody riots occurred in the isthmus, that we would honor the Panamanian right to recover jurisdiction over their own soil.

It seems to me that security for the canal cannot be perceived through midnight fantasies, or nightmare visions of the future, but rather through preserving the existing friendship between Panama and the United States which, for the past 75 years, has worked to keep foreign troops off Panamanian soil.

Will not the Senator agree that, from the standpoint of the canal's security, it is the preservation of the friendship between our two countries that forms the best basis for preventing foreign intrusion in Panama between now and the end of the century?

Mr. BAYH. I think the Senator stresses a good point that the better the relationships between our two countries the less likelihood this is apt to happen, and should there be a change in the regime, which of course is another of the nightmares and it is a very real possibility, I suppose, that there could be a change of regime, but whether it is the present regime or a new regime, they cannot be totally oblivious of the United States' resolve to undertake whatever steps necessary to protect what we consider our national interest with or without every dot and every title of an international precedent to give us the right to do what we did. The Senator will recall—my friend from Idaho is one of the experts in foreign affairs in this country—the steps that we took at the time we were concerned about what was going on in the Dominican Republic. We really did not take a lot of time to prepare the legal groundwork for that. As I recall, we acted and then it became an Organization of American States undertaking, which had a broader effect, but we were not so concerned about the legal niceties at the time this all started. And one would assume we will continue to do what is in our national interest. That is a cold fact of international relations.

Mr. CHURCH. Of course, I agree that in an emergency any nation does what it finds necessary to preserve its vital interests. The United States has done that in the past and will again in the future if it should become necessary.

But the point I stress is that we enjoy today a friendly relationship with Panama and her people, and nothing is more important to the future than the preservation of that good feeling.

The members of our Chiefs of Staff and a number of our retired generals and admirals familiar with the situation on the isthmus all stress that the security of the canal depends, more than on any other factor, on the cooperation, the friendship, and the good will of the people of Panama.

Mr. BAYH. The Senator is absolutely correct and I wish to suggest and ask his thoughts on this. I happen to have the opportunity to chair that subcommittee of appropriations on transportation which handles the Panama Canal budget and, as he knows, the last couple of years we have had a deficit and the taxpayers of America have theoretically been supporting some of the Panama Canal operation, and the Governor of the Canal Zone has pointed out in testimony before our committee that we are going to have to increase tolls in the future anyhow. The question is by what amount will we increase them. But the one ingredient of this treaty that I think has not been stressed as much as I think it should be stressed, along the lines of the reasoning of my colleague from Idaho, is that under the new treaty the Panamanians will have an incentive to keep the canal open.

Mr. CHURCH. Yes, even more so than they had in the past.

Mr. BAYH. Even more so than they have now. As the Senator points out, this thrust of concern as far as defense goes has been commented on by General Brown or Admiral Holloway, and I assume even Admiral Moorer. They could not really believe the Russians or the Cubans are going to be able to mobilize divisions to come in and take over the canal.

What we are concerned about is the sabotage, one bomb in the bottom of a ship that is triggered by some nationalist sitting on a hill with an electronic device, and the canal is useless no matter what the language of the legal documents say.

Mr. CHURCH. The Senator is quite right. The nature of the threat most to be concerned about is sabotage, harassment, and guerrilla warfare.

Again and again, our best informed military spokesmen pointed out that if we want a secure canal, an open canal, a usable canal, an operating passageway between the seas, then the best assurance for getting it is in partnership with a friendly Panamanian people.

Indeed, they went further and stressed that without the support of the Panamanian people, if the military were forced to keep the canal open in a hostile environment, it could require as many as 100,000 American troops, at an expense that would make the costs associated with these treaties pale in comparison.

Mr. BAYH. Will the Senator permit me to interject here a rather succinct observation? Secretary of Defense Brown in committee hearings on this point said:

> The canal was built for shipping, not slogans. We seek to guarantee transit of vessels, not theoretical claims of title. These goals we have sought, as I said at the beginning, are practical. The issues before you are practical ones. Our negotiations have obtained instruments which, more certainly than thousands of forces and their armaments on the spot, will assure those practical objectives for generations to come.

In other words, what we want to do is to try to keep the canal open without having to prove we can fight, but leave that as a last alternative which, of course, will always be there.

Mr. CHURCH. Absolutely. The question is extremely apt and makes the point most forcefully.

I would just like to say one other thing, with the Senator's indulgence. I wish we would be mindful that this debate is being carried in Panama from gavel to gavel, translated simultaneously into Spanish.

Everything we say on this floor is being broadcast not only to the American people through public radio, but also to the people of Panama as well.

I, for one, wish them to know in Panama that there are Americans who appreciate the long, the faithful friendship that Panamanian people have shown toward the United States for the past 75 years.

I, for one, want them to know that there are Americans, and I believe them to be in the great majority, who appreciate the fact that Panama stood by us as an ally of the United States in both world wars of this century. Indeed, if my information is correct, the Panamanian Government, following Pearl Harbor, actually declared war against Japan before the Congress of the United States did.

When I hear some of the deprecating arguments directed toward Panama and the Panamanians, I think we ought to remind ourselves of that long period of friendship between this small country, Panama, and the United States of America.

It is to preserve the basis for that friendship that we have this treaty now before us. To do right by the people of Panama will enable us to preserve that close and friendly tie in the future.

Mr. President, nothing could be more injurious to such an objective than to adopt the amendment offered by the Senator from Kansas. It suggests that we have no memory; that 75 years of fidelity mean nothing to us.

The Senator from Kansas says, "Oh, but look, the Russians are in Ethiopia." Well, Mr. President, whatever that may have to do with Panama, it is at least useful to remember that the Russians did not enter Ethiopia until after the Ethiopian Government invited us out. It was only after a complete breakdown in our friendly relations with Ethiopia, that the Russians moved in.

I do not want to see the close ties, the friendship between the United States and Panama jeopardized, because that is what has kept hostile forces out of the isthmus all these years. It is a relationship to be preserved, and it is the basis

for keeping foreign troops away from the canal in the future.

I must say it is a matter far more important than the size of our Armed Forces or the numbers of weapons that we concentrate on the isthmus to protect the canal if the attitude of the Panamanian people were to turn against us, an environment of hostility and violence were to replace the present peaceful relationship that exists between our two countries.

Again I commend the Senator from Indiana for the splendid argument he has made against this amendment, and I hope the Senate will see fit to reject it.

It is my intention, as soon as the Senator from Kansas has had an opportunity to complete his remarks, to move to table the amendment.

Mr. DOLE addressed the Chair.

Mr. BAYH. Who has the floor, Mr. President?

The PRESIDING OFFICER (Mr. NUNN). The Senator from Indiana has the floor.

Mr. BAYH. Mr. President, if the Senator from Kansas has no objection I would just like to finish my remarks and then I will yield the floor. I am nearly finished. Of course, he is the principal proponent of this amendment.

Before the Senator from Idaho leaves, I would like to share one other thought with him to see if the Senator from Indiana shares similar concerns with him.

He stresses, quite understandably, the importance of a good relationship between the United States and Panama. I wonder if we are not dealing with a much broader perspective here.

I recall, back in the time when the Nixon administration had started intensifying the negotiation process, having lunch with a mutual friend of ours who is now the Secretary General of the Organization of American States, Alejandro Orfila.

At that time, Ambassador Orfila was the ambassador to the United States from Argentina. To those who have not had the chance to meet him, I say he is one of the most personable human beings I have ever met, and he is a very good friend of the United States. While he was ambassador from Argentina, he did yeoman service in trying to convey to both Argentina and the United States the importance of mutual friendship.

My reason for wanting to have lunch and to discuss certain problems with Ambassador Orfila was based on my feeling that at that particular point we were in the process of losing about 55,000 American boys in Vietnam, we were concerned about what was going to happen along the DMZ in Korea, we were concerned then as we are now about the prospects for peace in the Middle East, we were concerned about our ability to respond to the Warsaw Pact in Europe, and it seemed to me we were having a great deal of concern about every other part of the world except that in which the United States is located.

It has been a good long time since we have had anything approaching a "good neighbor" policy so far as our neighbors in this hemisphere are concerned, although, from a practical standpoint, the Western Hemisphere is the most important part of the world to us, because that is where we are.

I asked Ambassador Orfila what he would think about undertaking steps to improve our relations with our neighbors in the Western Hemisphere.

As I recall, his general response was as follows: "First of all," he said, "you have to recognize that we are not all alike. We are different. We have leftwingers and rightwingers, and some of them are not talking with one another and are in the process of fighting one another. The second point is that there is only one thing upon which all of the nations of the southern part of the Western Hemisphere can agree and that is that they are extremely unhappy with the United States because of the present relationship with the governing and running of the Panama Canal. They all look at that as the last vestige of gunboat diplomacy, of colonialism."

The ambassador said then—and that has been, really, a number of years ago—"If you really want to develop relationships in this part of the world, you have to deal with the Panama Canal situation, because it affects your relationships not only with Panama, but with every other Latin American nation."

I say to our colleague from Idaho that I get just a little tired of hearing some of the speeches here that tend to divide us into two groups, those who are really concerned about Communists and those who are not really concerned about Communists. It seems to me that some of the strongest anti-Communists we have here, in expressing their support or lack thereof for the treaties, do not understand that the continued existence of the relationship that now exists in Panama gives the Communist subversives in this hemisphere the best ammunition we can give them.

It seems to me that one thing this treaty does is take away that opportunity of every guerrilla band in the hemisphere, in any country, of pointing to the Panama Canal as a vestige of American colonialism, and that we can, by ratifying these treaties, turn this around. We are guaranteeing our right to defend it, and that it will stay neutral, but at the same time saying to Latin America and all the developing nations of the world that the United States is willing to let a small, developing nation run its own affairs as long as it is not inconsistent with neutrality and open access to the canal.

It seems to me that that is something we had better consider here, because our inability to ratify these treaties will have consequences much beyond the immediate relationship between ourselves and Panama, in my judgment.

Does the Senator from Idaho care to comment? He does not necessarily have to, but he has looked at world affairs, as a ranking member of the Foreign Relations Committee, soon to be the chairman, from a much broader perspective than the Senator from Indiana has had an opportunity to do.

Mr. CHURCH. I thank the Senator. I concur wholly in what he is saying. The old 1903 treaty under which we have governed the Panama Canal Zone and administered it as an American colony, even though it bisects this small country and, in effect, cuts it in two, has been a bone in the throat of Latin America for three-quarters of a century. I can think of nothing that would be more conducive to improving our relations with all of our neighbors south of the border than ratifying this treaty, which puts an end to that old resentment. The Senator is absolutely right when he says it is a resentment not confined alone to Panama, but one that has rankled all of Latin America.

Today, it rankles more than ever, because in 1903, the remnants of empire still existed in this hemisphere—though the Latin American wars for liberation had emancipated much of South and Central America before that time—still and all, there were colonies in the Western Hemisphere in 1903. Since then, they have nearly disappeared, along with the colonial empires elsewhere. Today, in their places, are independent governments. Even in the Caribbean, the small islands have achieved their independence. And so the Panama Canal Zone, to South Americans, appears to be the last vestige of colonial control.

We received some very eloquent testimony on this point during the hearings, and it usually came as a result of some member of the committee asking a witness to explain why it was that leftist elements, the Communist elements in Panama, such as they are, and in other countries in Central America, were the most adamant in opposition to the treaties, the most strident. It always seemed to me to be ironic that the leftist elements, the pro-Communist elements in Central America, are the most extreme in their opposition, the most vocal and militant of all against these treaties, while it is the rightwing in this country which takes that position. There is a strange dichotomy here.

In any event, when such questions were put to witnesses before the Foreign Relations Committee, the answers typically took the following form—and I will quote two witnesses to exemplify those answers. One was Gen. Maxwell Taylor, who was a former Chairman of the Joint Chiefs of Staff, as the able Senator from Indiana will remember. He had this to say:

> The Soviet Union always intriguing for leadership in the have-not world has taken as a primary objective the undermining of our Latin American relations, particularly those with our trade partners.
>
> It will always assure to Panama a large allocation of troublemakers to complicate our problems. Turbulence there is always good news to Moscow—so also are American blunders. In this connection, let us hope that we do not give the Kremlin chiefs the occasion to rejoice which our rejection of these treaties would undoubtedly afford.

Then let me quote from our Secretary of Defense, Secretary Brown, who, in a similar vein, said:

> I cannot speak for Mr. Castro, but if I were Castro and I wanted to do the most that I could to increase the influence of Cuba in the Caribbean and in Central and Latin America, and decrease and harm the United States psychology, politically and diplomatically, I would do all I could to see the treaties rejected.

I find it strange to hear such amendments as the one now pending urged upon us in terms of dealing with the Communist threat. The most effective means for dealing with the Communist threat, now and in the future, would be to reject such amendments and get on with the ratification of this treaty. I thank the Senator very much.

Mr. BAYH. I thank my colleague. I appreciate his observations. I might just make one or two concluding remarks before yielding the floor.

Let me direct attention once again to the specific matter before us, the amendment of the Senator from Kansas, which I think, of course, is designed to accomplish a worthy purpose, but it just so happens that the Senator from Indiana feels that that purpose is pretty well inculcated in the treaty as amended earlier.

I would call to the Senate's attention that the specific wording of the leadership amendment talks in terms of the right of the United States to defend the canal against any—and let me emphasize "any"—threat to the regime of neutrality, and, consequently, shall have the right to act against any aggression or threat directed against the canal or against the peaceful transit of vessels through the canal.

I do not see how anyone can reasonably interpret those words—"shall have the right to act against" anything that threatens neutrality or shall have the right to act against any forces, any aggression or threat, which would impede the transit of vehicles—any other way than to say that if the presence of invited troops into Panama does, in fact, create a threat to neutrality, does, indeed, raise a question of our right to defend, that at that particular instance the United States shall act in such a way as to guarantee neutrality and exercise its right and solemn obligation to defend that canal to open access.

It is my concern that this amendment, if, indeed, it is designed to create any other interpretation, is going to cause a great deal of problems as far as finally getting a treaty. I would urge my colleagues to oppose it.

Frankly, I want a treaty. That is not because I am unhappy with the situation as it exists now. In fact, I must say I find myself in a great deal of sympathy with the statement of the present Chief of Naval Operations, Adm. James Holloway, when he said:

> As I said, my initial position is I would like to see the United States stay in Panama in perpetuity, both to defend and operate the canal, and having the Panamanians want us there. That is not the real life situation that prevails. The Panamanians don't want us there.

Given that situation, it seems to me that a treaty which legally protects legitimate United States and world rights to use the canal, and gives the United States the right to defend the canal, is better than the alternative of the status quo. The status quo, as most conversant military leaders are quick to point out, will not remain the status quo very long. Although I have had some constituents talk to me in terms of the cost of implementing the treaty, the present status quo costs are not going to remain the same status quo costs very long. In my judgment, the obligations and the costs are much more in the national interest of the United States than the costs and repercussions of no treaty.

When I think in terms of having to send—and I use the figures of the military experts, not my figures—100,000 American sons to Panama as a consequence of us having no treaty, then I say, heaven help us from this shortsighted approach to efficiency. Let us have a treaty. Let us be sure that it is adhered to and enforced, and then let us get on with the business of the Senate.

The PRESIDING OFFICER. The Senator from Kansas.

Mr. DOLE. Mr. President, I want to respond to the arguments of the distinguished Senator from Idaho, but I think first I would like to ask the Senator from Indiana one question.

Let us just assume the worst, as now described by the treaty proponents, that the treaties are ratified and next year or 2 years from now Cuban troops are moved in to what now is the Panama Canal Zone area, or let us say within a mile of the canal itself. Would the Senator consider this a threat to the security of the canal?

Mr. BAYH. Yes, I think it would be the same threat as would now exist without a treaty. We would have to respond the same way whether we had the treaty or did not have the treaty, because Cuban troop access would be the same. We do not have that right now. We have a greater right, it seems to me, under this treaty, to respond to those troops than under the 1903 treaty.

Mr. DOLE. We have a 5-mile corridor on either side of the canal which gives a little more protection. As the Senator knows, they could come right to the water's edge with foreign troops, if they so decided. I agree with the Senator, that it would be a threat to the security of the canal. I am just trying to avoid that possibility with this provision. We might avoid a confrontation later on.

If it is preferred to have the confrontation, and I am not suggesting that the Senator from Indiana is saying that, my point is that the amendment is not offered as a killer amendment or as a far-out effort to destroy the treaty. I think we can cite examples. It could happen or maybe it would not happen. Maybe the Senator from Idaho feels that it would not happen. I appreciate the Senator's response to the question.

Mr. BAYH. Of course, the Senator was speaking and I did not want to interrupt him. I think what the Senator from Idaho was pointing out was that there have been troops sent to Angola and Ethiopia, and other places. Nobody has ever tried that with the Panama Canal. I think that is basically because they realize, first of all, the Panamanians do not want to do that, and I do not see why they should want to change. Second, and equally important, I think they have seen that when someone tries to play that kind of international game in our own backyard, they end up getting a bloody nose. Anyone who tries it after the treaty is ratified will find the same thing happening to them in the future.

I share the concern of the Senator from Kansas, but I think that is pretty well handled under the treaty provisions, particularly under the amendment of the leadership which has been adopted by the Senate.

Mr. DOLE. I thank my friend from Indiana.

Ethiopia was cited as a good example. I think it is a good example. We probably could not have perceived 8 years ago that an ally such as Ethiopia today would be in some adversary role and would invite the Cubans and Soviets into their country. I assume if we had a canal there we would be in big trouble.

Much the same can be said for Panama. I want to say, in response to the statement that this broadcast is being heard in Panama, we understand that. We certainly appreciate the efforts of the Panamanian people. I do not know of anybody on this floor who may be hostile to the Panamanian people. But it seems to us that we have a responsibility to the American people as well as the Panamanian people. The Senator from Kansas finds more and more concern and more and more discontent among the American people—not Republicans or Democrats or Independents, but people I have talked with about our failure in the Senate to address some of the real problems.

I might also suggest that if, in fact, this amendment somehow is hostile, though I do not view it that way, to the Panamanian people, it does not disrupt the traditional harmony that has been spoken about. In fact, the Panamanian people would probably welcome an assurance that Cuban and Soviet forces would not be stationed in their country.

This Senator does not have any inside information on how the Panamanian people feel about this amendment. We understand the blanket condemnation that Torrijos has over any amendments. We understand that that is the strategy adopted by the pro-party forces, to accept no amendments unless it is absolutely necessary to secure enough votes for passage and then, of course, take only reservations or understandings.

(Senator BENTSEN assumed the chair.)

Mr. DOLE. To suggest, as has been suggested on this floor, that those of us who have another view, that those of us who have an amendment will not even be permitted to add one word to change the text of these treaties in any way—not even adding one word, as the Senator from Idaho indicated a couple of weeks ago—then it causes us some concern. We wonder what we are really doing here. What do we accomplish by debating amendments, offering amendments, and having them tabled or otherwise disposed of, and then finally, on the last day or two of debate, when they are a vote or two short, certain accommodations are made, certain reservations are agreed to?

It seems to this Senator that we are now getting into the important treaty. This is the giveaway. This is the one the American people do not understand.

They just cannot understand why it is not in our interest to maintain some control and to maintain and operate the Panama Canal.

They cannot understand why some of us who have raised our concerns have them shot down as rapidly as they are raised. They cannot understand why their views are totally ignored.

This is an American proposition we are discussing in the Senate. We are not standing in Panama. We are not dealing with a dictator. We are in a free country. We are expressing our views and offering our amendments in the hope that some might be adopted; in the hope that we might improve the treaties for the American people, at least allay some of their fears and improve the treaties for the Panamanian people and, perhaps, allay some of their fears.

We understand the strategy of the pro-treaty forces. I commend the pro-treaty forces and the leadership of the pro-treaty forces: the minority leader, the majority leader, the distinguished Senator from Idaho, the distinguished Senator from Maryland, and others who have been able to secure enough votes for passage of the first treaty.

I might say to my distinguished friend from Indiana, with reference to embarrassing General Torrijos, I share his views. Certainly, I think he has done his share. I might add that it was done after a great deal of pressure was exerted by some of us who wanted to resolve the question of drugs, I say to the credit of the Senator from Indiana. As far as this Senator is concerned, those were resolved and they were never mentioned after the date we had our closed session and the report was reached by the Intelligence Committee. I think that, in itself, was an outstanding service performed by the Senator from Indiana, the Senator from Arizona, and others.

Mr. BAYH. Will the Senator yield?

Mr. DOLE. Yes, I yield.

Mr. BAYH. Let me say briefly that I appreciate the thoughts of the Senator from Kansas. Although we do not agree on the merits of this amendment and perhaps on the treaty finally, I appreciated the thoughtful approach which he took to this drug problem, which was a matter of concern to all of us.

Although I think, perhaps, the product of it, the report, caused some embarrassment, let me say, in behalf of the committee, that the purpose of that report was not to embarrass General Torrijos or anyone else, but just to get the facts out and if the facts were embarrassing to certain people, that is the way it had to be. We felt our responsibility was not to try to cover up anything, but to give information to the Members of the Senate so they could make the interpretation they thought best on the given issues.

Mr. DOLE. I appreciate that concern. I think the facts were laid on the table as much as they could be laid on the table so the American people could make a judgment. I think they made a judgment. I think the American people decided that, insofar as the drug allegations were concerned, they probably did not deserve consideration and they were forgotten.

As far as this Senator knows, after the cooperation we had from the Senate Intelligence Committee, and, as far as I knew, everything was revealed that could be revealed, that question was laid aside, as it should have been, and we went back to the merits of the treaties themselves.

I say that not only to commend the Senator from Indiana, but to indicate that there are those of us who raised questions who try to be responsible. We are not representing any faction, we are not representing any anti-Panamanian group. We are certainly not trying to scuttle the treaties. But it does seem to us that we should have some input and some impact and, if you will, some consideration of the amendments we offer.

In fact, any movement by foreign troops into any area which is now the zone or whatever is a threat to our security after the treaties are ratified; if the treaty proponents all see it that way, then maybe that might explain why the amendment offered by the Senator from Kansas is not necessary. But it seems to this Senator that one way to avoid that possible confrontation is to adopt the amendment, which simply says, and I repeat it:

At the end of article I, add the following:

5. For the duration of this Treaty and consistent with the provisions of Article IV, the Republic of Panama and the United States of America agree that, subject to the other provisions of this Treaty, only the military forces, defense sites, or military installations of the Republic of Panama or of the United States of America may be maintained in the national territory of the Republic of Panama.

That is consistent with what happens after the year 2000, because our troops will be in the area between now and the year 2000. But during this period of time between the date of ratification and the year 2000, our troops will be phased out and the bases will be phased out.

There is nothing that the Senator from Kansas can find in any of the treaty language that would indicate that Panamanian leaders—General Torrijos or someone else like General Torrijos—that would prevent them from inviting in troops of any foreign countries and putting them in the bases we have surrended. We are giving them the right to occupy those very bases that the American taxpayers handed over to the country of Panama.

The Senator from Kansas also suggests that he considers this to be one of four or five critical amendments to this treaty.

As I have indicated before, this Senator has entered into time limitations, made no effort to extend the debate. But it seems to me that this particular amendment deserves a great deal of consideration.

There was, at least, some inference in the dialog between the Senator from Idaho and the Senator from Indiana that, without trying to characterize their comments, those of us who offered amendments or tried to change the treaties maybe did not fully understand the ramifications or the implications of that.

Perhaps some of us feel the same about some of the arguments on the other side.

Frankly, it is very difficult to explain to the American people, whether it is in Indiana, whether it is in Kansas, whether it is in West Virginia, whether it is in Kentucky, whether it is in Ohio, or wherever it may be, it is hard to explain to the American man and woman—and they are not rightwing, not leftwing, they are American taxpayers that are concerned about the Panama Canal—it is hard for them to understand why amendments are offered and never accepted, why President Carter will not accept any changes in the treaty, why we are bound by some promise, whether contained in a letter to Torrijos or not, not to make any changes in the treaties.

It is hard for them to understand. It was even the subject of some ridicule, I understand, last Thursday night on the Johnny Carson Show, who made some reference to the goats that had been turned loose in the Capitol area—100 goats.

I think Johnny Carson said that before they noticed it, 15 of those goats entered the Senate Chamber and voted for the Panama Canal Treaty.

Now, the American people understand what we are doing here. They also understand what we are not doing here. What we are not doing here is considering seriously the amendments offered by some who want to improve the treaties.

If I had some clear and convincing and compelling argument that the amendment would somehow forever destroy our relations with Panama, or the Panamanian people, that would be one thing, or if I had some assurance from some in this Chamber who last year helped defeat my amendment, but tried to keep us rushing the normalization of relations with Cuba.

Their judgment was not too good, as I look back on it. They were opposing the Senator from Kansas on trying to put any restrictions on our relations with Cuba. They finally worked out some little language that did not mean anything.

What happened in the interim? Twenty thousand Cuban troops ended up in Africa. Even President Carter had to stand back a few steps and say, "Well, maybe we shouldn't be in too much hurry to normalize relations."

I suggest that sometime someone in opposition might be right. That could happen.

It happened with reference to the Cuban amendment on the appropriations bill last year, which was successfully shot down by many of those who now support the treaties. It was characterized by some meddlesome, interfering in foreign policy.

Maybe somebody on that side, the protreaty side, has some inside information from Castro. Maybe there has been some assurance paid during a personal visit to Cuba about whether or not he has any designs on Panama.

That is the question that this Senator wants answered. What happens if, in fact, Cuban troops do go into Panama in 1 year, 3 years, or 5 years, and we have a confrontation? Does that help the people of Panama? Does that

help preserve the neutrality of the canal? Does that keep the canal open for American ships and other ships?

I think we have a right to raise those questions without being, literally, accused of looking under a rock, of always looking at the dark side, because the Senator from Kansas would just remind Senators again about the Cuban situation. Almost a year ago in this Chamber there was a big rush by some to defend Cuba, to defend their intentions, and it was said that we did not understand. We were not on the Foreign Relations Committee, so we did not understand.

The American people are not on the Foreign Relations Committee and they do not understand. The American people are not Senators and they do not understand.

But they do understand that something is happening to the Panama Canal and they do not like it. They do not like the fact that their Senators can stand up and offer amendments and not even be seriously considered.

So we have a problem, those of us who have amendments. We have a decision to make, those of us who have amendments. Should we go through the exercise of offering our amendments only to have them tabled? Is that the way we ought to react? Is that responsibility in the Senate on either side? Because, certainly, this Senator knows, and any other Senator knows, that there are enough votes to table any amendment, and maybe a day or two before the final vote, if the head count shows they are one or two short, maybe a few reservations will be adopted, we will have the accommodation and the visits to the White House, the phone calls, the minority leader and majority leader winding up undecided, and then we will vote.

Or should we, on the other hand, adopt the view that one way to protect the rights of the American people is to offer so many amendments that we will have a vote until maybe May or June?

So if the American people can fully understand what is happening, is there interest in reaching some time arrangement now just because the pressure is on, just because we have been threatened with no Easter recess?

Who cares? Is that such a strong incentive, that those of us in the Senate must give in or lose 4 days' vacation when we are talking about the future of the Panama Canal, which is vital to America's military interests and her economic interests?

Perhaps the protreaty Senators and the protreaty forces and the protreaty press are right, they are in the minority in this body—in this body, not out on Main Street, not out on Main Street that this Senator can find, but they are in the majority in this body. Maybe we should accept their decision.

Maybe we should suggest, as has been suggested, that everybody is going to live in peace and harmony, if we do not upset General Torrijos he will not upset the present relationship with reference to the canal.

Well, if he gets the canal, he will be in power for a long time. This is a big bonanza. This is the big bonanza for Torrijos.

If he is in any danger now of losing power, he will be shored up forever if this treaty is passed without amendment.

How many billions of dollars will this mean to Torrijos? How many dollars does this mean to Torrijos if this treaty is passed? A great many. If we talk about replacement value, or even if we talk about book value, it is millions and millions and millions of dollars.

We are going to be stuck with a bill for maintenance and operation and repairs and we are going to turn over one base after another to Torrijos.

Maybe that is all right in the present day, modern day concerns for Latin America and the people of Panama. Maybe we should not quarrel about value of the canal itself. One billion dollars, $10 billion, $50 billion. Who cares?

Well, the American people care, for one. But their views are not being heard. Their views, for the most part, are being ignored.

But if, in fact, we are going to make the transfer—and this is the transfer, this is it—then what is so wrong with trying to add some amendments that strengthen the treaties? What is so wrong with saying, "I am going to stand up for America," without somebody looking down his nose and suggesting that we are some rightwing nut?

If that is the case, there are a lot of them across the landscape. There are a lot of people saying, "Why doesn't somebody stand up for our rights as taxpayers, why doesn't somebody stand up for our rights and our interest as Americans?"

They are not suggesting we are some big, powerful Nation that cannot deal with the country of Panama. But I think they are suggesting that there should be some safeguards in the treaty.

All we are suggesting in this amendment is what is going to be carried on after the year 2000, when our troops are gone and only Panamanian forces shall have any rights. It seems consistent.

Why do we invite foreign troops to the water's edge? Why the invitation of Cuba to the water's edge? This map cannot be seen, but once the treaties are ratified, not a year from now or 10 years from now, Cuban troops can move right up to the water's edge.

I know we are going to hear that that is not going to happen. Neither were they going to send any more troops to Africa last year, but they have sent 20,000 to Africa. That was not going to happen, either.

Frankly, I do not know what is going to happen, but it seems to this Senator that we should at least try to have a little insurance; we should try to preserve and protect the interests we have. It is not enough to say that we do not have the authority now to keep foreign troops out of Panama.

There was some change in the 1936 treaty. But the point the Senator from Kansas makes is that this new treaty will enable foreign troops to move up within the Canal Zone area—as I have indicated, to the water's edge—and that has not been a threat under the present treaty. There is a 5-mile buffer zone on each side of the canal. That offers some protection. Besides, we now have a number of bases that we are going to surrender when the treaties are ratified.

I suppose the main reason for a new treaty agreement is to address modern-day concerns, which this certainly is. The commitments we give Panama under this new treaty make it more important to obtain this guarantee in return. Panama certainly gains more under the new treaty, and we should be able to expect the same. It seems to me that it is not impractical, it is not unreasonable, to ask for this commitment, since Panama gives us a similar commitment, under the new Neutrality Treaty, for the period after the year 1999.

There is also this argument: "Don't worry about it, because we're going to have our military troops there. They are going to be there until the year 2000." It seems to me that if we were to rely on this argument, we would be inviting trouble. I think the argument underestimates the Soviet-Cuban determination, to which President Carter alluded in the past few days. He is very concerned about it. He sent a tough warning. Such an argument invites inevitable conflict over the sovereignty issue.

If Panama does approve the stationing of Cuban forces on the banks of the canal, which is within their right, once this treaty is ratified, and we use our military presence to prevent it, then we really will have a wide open conflict. At that point, Panama justly can argue that we are infringing on her sovereign rights. There is no doubt in this Senator's mind that world opinion would be with her. We leave ourselves open to justified criticism.

Can you imagine the hue and cry in Latin America? I think many Latin American countries may share a different view from that which has been expressed publicly, because they are concerned about communism, too, but imagine the hue and cry around the world if Cuban troops are invited in and we tell them to get out. I wonder what the outcome would be.

All the Senator from Kansas seeks to do by this amendment is to avoid the potential for this confrontation. Why not have some understanding and argument now on this point? Why wait until it is too late? Why not face up to the problem now, rather than to say, as the Senator from Idaho says, "Don't worry about it; you're conjuring up dark issues, problems, looking under a rock"? I would rather face up to it now than face up to it later. It seems to me that it is more of a challenge to Panama's sovereignty to use force later, if we have to use force later, than to reach some peaceful bilateral agreement now.

I wonder what would happen to those who now argue against this amendment if, in fact, Cuban forces were there, say 2 years from now and there was a show of force. I wonder if they would all stand together and say, "There is not an attack upon the sovereignty of Panama." Or would they be on the other side, saying, "We're interfering with their rights, their sovereign rights"?

So I think the time has come to ask the hard questions and not to accept the evasive, generalized answers. This is a very important issue. It is one that concerns a great many Americans.

Whether we are right or wrong in our approach, we are making a record. We are making a record that someone 6 years or 10 years or 6 months from now may be reviewing for some guidance as to what our policy may be. But now we are told that we cannot do this because it interferes with the sovereign rights of Panama. I suppose the question is, What happens if we do not do this and the Cubans are invited in? Then, what about the sovereign rights of Panama? Then, what will be the world reaction if those who kill this amendment raise their voices?

Mr. SCOTT. Mr. President, will the Senator yield?

Mr. DOLE. I will yield.

First, Mr. President, I wish to withdraw amendment No. 69.

The PRESIDING OFFICER. The amendment is withdrawn.

Mr. DOLE. Until such time as we can reach a time agreement on the amendment. I do not want to have it tabled while I am out to lunch.

I am happy to yield to the distinguished Senator.

Mr. SARBANES. Mr. President, will the Senator yield on that point?

Mr. DOLE. I yield.

Mr. SARBANES. I assure the Senator that no one is going to move to table his amendment while he is out to lunch. We would be happy to try to work with him to reach a time agreement on his amendment.

There has been no such conduct in the course of the almost 6 weeks we have been on these treaties, and I do not expect there to be any such conduct. I want the Senator to appreciate very clearly that there is no intention of doing anything of that sort.

Mr. DOLE. The Senator from Indiana indicated about 30 minutes ago that he intended to move to table the amendment when the Senator from Kansas finished. The Senator from Kansas is not the only one concerned about this amendment.

Mr. SARBANES. If that is the case, we will try to adjust to others who are concerned. I was not here when the Senator from Idaho spoke, but I am certain that when he said that, he had no intention of doing it when the Senator from Kansas was out to lunch.

Mr. DOLE. I do not have lunch, but——

Mr. SARBANES. The Senator is entitled to have lunch. I am not suggesting that he is not entitled to have lunch. We are not waiting for the Senator to go to lunch, to move to table his amendment.

Mr. DOLE. I will take my amendment with me; then I know it will not be tabled.

I yield the floor to the Senator from Virginia.

Mr. SCOTT. Mr. President, I appreciate the distinguished Senator from Kansas yielding. Of course, I support his amendment.

When I was in the Chamber about 30 minutes ago, I was interested in a colloquy between the distinguished Senator from Indiana (Mr. BAYH) and the Senator from Idaho (Mr. CHURCH) in connection with the Dole amendment. The distinguished Senator from Indiana was referring to a conversation he had had with a former ambassador from Argentina, and he was speaking of how the Argentinians felt with regard to this treaty.

I have been to Argentina twice within the past year, and I have spoken with the President of Argentina. I have spoken with the Foreign Minister, with the Defense Minister, and with other officials of Argentina.

And they have informed me that Argentina does not make very much use of the Panama Canal, being on the east coast, being down near the horn; that they use it very little; that they feel that this decision is something between the United States and Panama. It is something that they do not, from a commercial point of view, have any great interest in. And yet, they have their strong, extremely strong feelings that this might be an area for Communist domination and this is something that I heard over and over again, in speaking with the officials of Argentina.

So, I would say that my personal experience has been entirely different from the experience of the distinguished Senator from Indiana.

Now I did not have an opportunity to respond at the time that the Senator from Indiana and the Senator from Idaho were discussing this problem. I did ask at one time that the Senator from Kansas (Mr. DOLE) yield to me so that I could make this statement, but he felt he had not been able to present his point of view and he preferred to go ahead when he had an opportunity and make the statement that he has just made.

I would say, that as far as Argentina is concerned, and I doubt that few Members of the Senate have talked with as many officials from Argentina as the Senator from Virginia has within the past year, because on two trips to that country, even within the past 6 months, I have gotten the definite impression that Argentina, from a commercial point of view, feels that this is a matter to be decided between the United States and Panama, but there is great concern about Communist infiltration and in fact Communist control of this vital artery that is important to us, from not only a commercial but a military point of view.

Mr. President, I appreciate the Senator from Kansas yielding. I yield the floor.

The PRESIDING OFFICER. Who seeks recognition?

Mr. SCOTT. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk called the roll.

Mr. LAXALT. I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

The Senator from Nevada is recognized.

Mr. LAXALT. Mr. President, I rise once again in support of the amendment of the Senator from Kansas, and during the course of the hearings——

The PRESIDING OFFICER. The amendment is no longer before this body.

Mr. LAXALT. The amendment is now withdrawn?

The PRESIDING OFFICER. That is correct.

Mr. LAXALT. It is going to be resubmitted, if I understand the Senator from Kansas correctly, and I would want at this time to continue speaking to the amendment because it will be before the Senate.

The PRESIDING OFFICER. The Senator from Nevada.

Mr. LAXALT. Before us, as I indicated in my previous comments, and I think in various methods, and we have certainly had our fair share of comment as to the Neutrality Treaty and now to the Canal Treaty, that this probably makes as much and more sense than any.

We have had continuing discussions here on the floor about whether amendments would be an affront to the Panamanian dignity, as to whether any amendments would require a plebiscite, and those arguments and those contentions have been uniformly and roundly rebuffed here on the floor of the Senate, both during the course of the debate and certainly by virtue of the votes that have been taken.

We have had continuing concern here about the security of the canal, and I do not know of anybody in this body who does not have that as a principal goal. There is not a single Senator that I know of who does not honestly feel that we should take whatever steps are required to insure the continued safety and security of that canal, because I think that almost beyond question everybody recognizes that it has had great value commercially. It continues to have great value commercially, not only to Panama but to the hemispheric countries that are involved, our allies there and certainly to the United States.

It certainly has, I think, from the objective view of the experts that we have had militarily, great strategic military values. That being the case, it would seem to me that we should take whatever steps are required to insure that it is properly protected and defended.

Now there were amendments offered attempting to solve that problem and cure that difficulty. They were not adopted as amendments. We had a continuing debate here as to whether or not an amendment would require a plebiscite. I think it is rather clear from the estimation of all concerned, not only here in the Senate but in Panama, that an amendment which materially changes the terms of the treaty would require a plebiscite. That has been a problem for us because it has been uniformly felt here, and certainly the voters recognize this, that to have a plebiscite is wrong. This would submit General Torrijos to another vote of confidence, in his judgment, in connection with these treaties.

I fail to understand that because we have attempted during the course of the debates to poo poo the significance of the fact that Panama is a dictatorship

and has been for 10 years and that we are turning over a vital strategic facility to the Panamanian dictator. All we want is for the Panamanian people to be heard and yet we have been told time and time again that "No, that is wrong;" that we cannot permit the plebiscite, because somehow, to have the Panamanian people heard once again, that might result in the rejection of General Torrijos.

Well, as far as I am concerned, I would rather think that is probably one of the better reasons we should have a plebiscite.

We must bear in mind that when the plebiscite was conducted last year on these treaties there was a rather strong opposition there. It has been stated once again time and again here on the floor that they were resoundly passed.

Well, the fact is that those treaties passed about 2 to 1. The fact is that apparently at least one-third of the Panamanians who voted at that election find objection to the treaty, for whatever reason. Many of them, as we know, who worked with us in the canal zone feel the treaties are bad. They resort to the same type of argument that millions of Americans resort to: there is no justification whatsoever for us to give away the canal. None. And certainly there is no justification, not only to give away the canal, but thereafter to have to pay the Panamanians in excess of $50 million a year for the next 22 years. That to them makes absolutely no sense.

I might say this: In the meetings we had down there I was greatly impressed by the sincerity and strength of their opposition. These are not only Americans working there; these are Panamanians who are citizens of Panama who work within that zone, and who know from a firsthand knowledge what that canal means, how important it is to shipping, how important the whole area is militarily.

More important than that they know Torrijos. They know the kind of government he has. They know it has been a dictatorship. They know that human rights have been constantly violated.

They have indicated to us, many of us who opposed these treaties, "Please keep the debates on as long as possible because we have never had it so good in Panama under Torrijos. As long as these debates continue, as long as their passage remains in doubt, we are in better shape in terms of our own human rights."

So we have a situation here in Panama, it seems to me, where the situation cries for a plebiscite. I think the American people would like to know how the Panamanians feel. I think the American people would like to be heard on these treaties.

It has been suggested often that, perhaps, these treaties should be subjected to a nationwide referendum. It is appealing at first blush. I would rather think if these treaties were submitted to a nationwide referendum the American citizens would vote them down resoundingly because the American citizens have different perceptions and a clarity of thought concerning these treaties that I think we presently do not have here in the U.S. Senate.

Be that as it may, it is my feeling that if an amendment is worthwhile it should be adopted.

General Torrijos during the last 5 weeks of debate in this Chamber has had a power of veto over us as Senators here, a power of veto because time after time when we presented amendments on this floor that should have been seriously considered, should have been adopted, they have not been because General Torrijos, with his silent hand hanging over the Senate Chamber, has killed that particular amendment.

In my judgment, that is a sad state of affairs because we, as Senators here, have a prime constitutional responsibility, and that is in the matter of treaties of this kind to advise and consent.

As I indicated earlier, all we have been doing here for days on end into 200 hours of debate here on the Senate floor is consenting, consenting, and consenting with very little advice.

It seems to me if these votes continue, if we run into what appears to be a clear stone wall every time so that we cannot pass an amendment, it is going to be an affront to our constitutional responsibilities.

We must remember that under the terms of the Constitution the President only has the power to negotiate. We heard here in these halls during those last few critical hours before we took the vote the other day Senator after Senator was told, "You cannot do this to our President. It is going to hurt our President if you vote down these treaties. It is going to impair him in the conduct of his foreign relations."

I submit, Mr. President, that if the President of the United States is in difficulty presently in the conduct of foreign relations it is not the fault of the Senate. It is certainly not the fault of the U.S. Senate. I, for one, as a Senator from Nevada do not take on any bit of the blame in that respect because I feel we have to undertake our constitutional responsibilities seriously.

The only power that he has, the only power that any President has, in this country under the terms of our Constitution is to negotiate with a foreign country like Panama. That is all. Once he has completed his negotiations through his people, under the constitutional process it properly comes to us in the Senate, as representatives of the people.

You must consider that that constitutional responsibility, as indicated in the original debates, is not to be taken lightly by us.

They insisted not that a majority of us here as Senators would be able to ratify a treaty, no. Two-thirds of us must ratify it. That is the kind of serious responsibility we have. That indicates very clearly in the minds of the framers of the Constitution that checks and balances in this Chamber are going to be effected by us in the Senate—by us.

Yet we have not been permitted to exercise our constitutional responsibilities because we have been given treaties here which are sacrosanct, they are beyond amendment.

Last week we indulged in an exercise here in order to curry favor and get the few votes necessary for passage in taking amendments that were in the name of reservations and understandings, and we suddenly have three or four votes that were not there before.

If we would have had the same treatment in connection with the reservations and understandings that we had on the amendments, I would say we would not be on this floor today because that Neutrality Treaty would have been voted down.

So we have indulged, I think, in great part in an exercise in hypocrisy from the standpoint that the reservations and understandings in the view of the lawyers we have had looking at this are not binding on Panama.

Their own constitution provides that when the terms of a treaty are changed, as they were by the reservations and understandings, they must go back to a plebiscite. That has been keenly ducked here, keenly, because now it has been stated, apparently to the satisfaction of several Senators, that if the same material that was voted down, the same subject matter that was voted down, in an amendment was taken in a reservation or understanding suddenly that is binding on Panama and does not require a plebiscite. That is unbelievable doubletalk—unbelievable doubletalk because the legal effect is the same.

I submit to my colleagues, because I know this troubles a number of them, that the best thing they can do in the next several days before we take the vote on the main treaty here—and we are only two votes short of killing these treaties—I submit to those who are genuinely undecided, to take a look at the legal opinions presently on record here because they indicate, perhaps not with certainty but they indicate, that there is a great doubt as to whether or not a reservation or an understanding that materially changes the terms of the treaty may be binding on Panama.

If it develops that that is not the case, I think what we have done here may be very counterproductive.

Mr. BARTLETT. Mr. President, will the Senator yield?

Mr. LAXALT. Yes, the Senator yields for the purpose of a question.

Mr. BARTLETT. I certainly agree with what the Senator said that the approval of the treaty by Panama which was submitted to us was changed in a very substantial way, which was agreed to by the majority leader as far as his first amendment was concerned, one of the leadership amendments, in a short dialog with the Senator from Oklahoma.

So when we acted with amendments, reservations, and understandings we did change in a substantive way the treaty we received and, in doing so, we turned it down.

Then we are in the process now of considering the resubmission of the two treaties back to the Panamanians. If these are both ratified, as one has already been, as the Senator said, this would have to be subject to approval by a plebiscite voted in order to be approved by Panama.

But if there is not a plebiscite, then is that not itself tantamount to turning down our resubmission? In other words, if they do not approve it, are they not disapproving it by not having a plebiscite, in the Senator's opinion?

Mr. LAXALT. I think that is the effect of it.

I have been wholly unable to comprehend here why we are so deathly afraid of submitting changes in the treaty to the Panamanian people. We have had great concern, and rightly so, for hours and hours and hours that we must keep in mind the dignity and the feelings of the Panamanians.

Yet here we are, we are on the verge, or we were on the verge the other day, of passing a treaty, a Neutrality Treaty, provisions of which were clearly outside of the terms of the plebiscite, clearly, and indicated here on the floor by Senator after Senator that this is binding on the Panamanians. Yet we are not going to submit those material changes affecting them individually and as a country to them for a vote.

What kind of hypocrisy is that? I agree completely with the Senator from Oklahoma.

Mr. BARTLETT. Mr. President, will the Senator yield further?

Mr. LAXALT. Certainly.

Mr. BARTLETT. I agree with the Senator's choice of words because I think it is hypocrisy for the Senators, the Members of this body, to want to make and actually make substantive changes and then not want that to be considered as our resubmission of the treaty to the Panamanians.

For one thing, it appears to me—and I would ask the Senator's thoughts on this—that as far as the Neutrality Treaty is concerned, we do not know, really, even assuming that the other treaty is ratified, we would not know where we stood with the Neutrality Treaty, because we have made substantive changes, and if the Panamanians do not have a plebiscite, then where are we? In a sense, we could say that they turned it down because they have not accepted our version of the treaty on resubmission.

Mr. LAXALT. The Senator has stated the issue clearly and well. That is, where are we? I do not know where we are. The Senator from Oklahoma does not know where we are. There is not a Senator on this floor who can state with certainty that he knows where we are, because we have an unanswered question of resubmission hanging over those amendments adopted the other day. Nobody knows.

Mr. BARTLETT. How would we know whether they have accepted the amendments, the reservations, and the understandings that have been added?

Mr. SARBANES. Mr. President, will the Senator yield?

Mr. BARTLETT. I do not have the floor.

The PRESIDING OFFICER. The floor is held by the Senator from Nevada.

Mr. LAXALT. I am happy to yield to the Senator from Maryland for an observation or a question, without losing my right to the floor.

Mr. SARBANES. Did I correctly understand the Senator to say he does not know where we are?

Mr. LAXALT. That was my observation in response to a similar statement by the Senator from Oklahoma.

Mr. SARBANES. I appreciate the Senator's observation. It seems to me that one of the things you are trying to do is to make the decisions for both the United States and Panama. I assume it is up to the Panamanians to determine where they are, and up to us to determine where we are.

Mr. BARTLETT. Will the Senator yield to me for a comment?

Mr. SARBANES. It is not my time, but if the Senator from Nevada wishes to yield, it will be fine with me.

Mr. BARTLETT. Will the Senator from Nevada yield for a comment?

Mr. LAXALT. Yes, I do.

Mr. BARTLETT. That argument was made last week, and to me it is a very ridiculous argument. The first thing of paramount importance to us in negotiating or ratifying a treaty, as we are doing, is to know whether or not both sides agree to the same provisions. Do they agree with the changes we have made? We do not know that. But it is of paramount importance to us that we do know where we stand, that we know whether or not they agree with our changes or if they do not agree with them. Do they agree to them?

Mr. SARBANES. Will the Senator yield?

Mr. BARTLETT. The Senate has made some very substantial changes. I think it is of paramount importance that we do know what route they take in either ratifying or not ratifying the treaty, under constitutional provisions which require a plebiscite on matters dealing with the Panama Canal.

Mr. SARBANES. I suggest to the Senator from Oklahoma that we have been trying to make some judgments in terms of what we think is necessary so far as American interests are concerned and not how Panama will respond to what we have tried to do here on the floor of the Senate in considering the permanent Neutrality Treaty. I assume we will do the same in considering the Panama Canal Treaty, which is to make the judgments that we think are necessary to protect American interests.

I find the argument interesting that the Senator from Kansas raises if his amendment is rejected; he assumes it is being rejected for some reason other than the substance of the amendment. I would like to suggest to the proponents of amendments that maybe one reason why they are being rejected is that they are deficient in one respect or another, substantively deficient. I would like to suggest to the Senator from Oklahoma and the Senators from Kansas and Nevada, who are now on the floor, that I take all the amendments they bring forward with a great deal of seriousness, and that we have to reject them on the basis of their own substantive merits.

Mr. LAXALT. Will the Senator yield for an observation?

Mr. SARBANES. Surely; it is the Senator's time.

Mr. LAXALT. If that be the standard, that the amendments that were voted down to the Neutrality Treaty were voted down on the basis of substance, how do we take those same amendments and adopt them as reservations or understandings, if they did not have substance to begin with?

Mr. SARBANES. Of course, if the Senator will yield, I do not agree that that is precisely what happened, and I think a careful reading of both the proposals made as amendments by the opponents of the treaties and the proposals subsequently adopted will reveal that that is not the case.

Mr. LAXALT. Will the Senator yield so that I may make a point?

Mr. SARBANES. Surely.

Mr. LAXALT. We discussed here the language, you and I and Senator CHURCH and several other Senators, that for us to think of military intervention unilaterally by the United States was unheard of. I heard you and Senator CHURCH, time after time, state that this would be an affront to Panamanian dignity.

Mr. SARBANES. That what would be an affront?

Mr. LAXALT. Unilateral military intervention on the part of the United States.

Mr. SARBANES. If I may respond to the Senator, I do not think he ever heard me talk in those terms. I have stated on the floor of the Senate that the term "intervention" is a term which carries with it such an overlay of meaning in all Latin American countries that we ought to cease and desist from using it in our own discussion of this issue. I would hope that the Senator, with some appreciation for Latin American history, would understand the thrust of that point.

In fact, I have underscored that the United States can take any action that is necessary in order to maintain the regime of neutrality which is called for by the Neutrality Treaty.

Mr. LAXALT. But the Senator must admit that time after time, when we unsuccessfully offered amendments to clearly specify the right, that we had the right to unilaterally intervene militarily we were eminently unsuccessful: those amendments were voted down. Yet that was the thrust of the so-called DeConcini amendment, and I think that met—for the reasons that the Senator from Maryland states, because the word "intervention" was used, that met with profound disapproval in Panama. If the press accounts are true, as recited in the Washington Post on Saturday and Sunday, there was no celebration in Panama after the vote here on Thursday. There was no celebration.

Mr. SARBANES. May I correct the Senator? The Senator just stated that the word "intervention" was used. That is not true.

Mr. LAXALT. That was essentially the thrust of the amendment.

Mr SARBANES. No, that is not the statement the Senator made. He did not

say "in effect"; he said it was used, and it was not used.

Mr. LAXALT. I suggest that the Senator read the amendment.

Mr. SARBANES. To keep this debate on some rational ground, I think we ought not to misstate what has taken place.

If the Senator will yield further at that point—Mr. President, is there an amendment pending at the desk?

The PRESIDING OFFICER. There is no amendment pending.

Mr. SARBANES. Then, if the Senator will yield further, I have been fascinated by some of the discussion that has taken place on this floor today, and I have listened to it quite carefully, both the comments of the Senator from Nevada and the comments of the Senator from Kansas (Mr. DOLE). Both are, of course, very skillful, and I have found it intriguing to listen to their assertion that someone has to stand up for America, and then the assertion that that is being done by the opponents of these treaties, and that the proponents of the treaties are not standing up for America.

I want to underscore, speaking for one proponent—and I think I fairly reflect the views of my colleagues—that we support these treaties because we see these treaties as protecting American interests and American rights; as being the most wise, sensible, and prudent way to stand up for America. And I would suggest that some of those who are so quick to use this rhetoric ought to stop for a moment and think seriously about American interests and American rights, and how we protect them.

The fact of the matter is that these treaties give to the United States a legal and a moral basis on which to use our strength to protect our interests should that prove necessary. Second, it opens up the prospect of developing a new relationship with Panama.

Someone said earlier, an opponent of the treaties, "Well, people are terribly worried about what the Panamanians think." The fact of the matter is that if we are concerned about American interests including the relationship between America and Panama, a part of that relationship involves, of course, what the people of Panama think in terms of the relationship they are going to have with the United States.

Mr. LAXALT. Will the Senator yield for an observation?

Mr. SARBANES. Surely.

Mr. LAXALT. Unless I misunderstood the thrust of our discussions here, the feelings of the Panamanians and their reactions toward us in the years to come is vital. We have been told time and time again that we cannot effectively operate the Panama Canal in the future in a hostile Panamanian environment.

It seems to me that how they feel, how they react to what we are doing here, is absolutely critical to what we are trying to achieve. If we get to the point, if I may pursue this for a moment, and I think we are close to that point, dangerously close to it, of adopting a treaty or treaties here which are unacceptable to most of the American people, if that be the case—and it is arguable—and also, by virtue of the device of reservations and understandings we also undermine the Panamanian leadership, we literally have the worst of all worlds. I suspect we are perilously close to that kind of result.

I think all we have to do is to read the exchange of letters demanded by Senator GRIFFIN from General Torrijos to President Carter and back to see that there may be an essential misunderstanding concerning the effect of what we are doing here.

General Torrijos still feels that we have not materially changed that treaty. I submit that, by virtue of the device of reservations and understandings, we have. I submit that that may well be the perception of General Torrijos, who has apparently put a blanket and a gag on top of all his people to preclude them from even talking to the press until we process these amendments, and also the Panamanian people.

I submit to the Senator from Maryland that we cannot have it both ways around here. If the thrust hour after hour after hour from the proponents is the fact that we must work out an agreement satisfactory to the Panamanians so that we do not operate that canal in a hostile atmosphere, if we do away with that standard and subordinate that standard to what we perceive to be right to get these treaties passed, we will, in effect, have the worst of both worlds.

Mr. SARBANES. Will the Senator yield?

Mr. LAXALT. If I may, I promised the Senator from Oklahoma I would yield first to him. Thereafter, I would be happy to yield to the Senator from Maryland.

Mr. BARTLETT. I thank the distinguished Senator from Nevada. I certainly agree with his statement. I think what we are doing here is trying to have it both ways. This is where the hypocrisy lies.

The Senator from Maryland said a few minutes ago that our job here is to look after the rights and the interests of the citizens of the United States and then, I think tying it into the same sentence, said it is up to the Panamanians to do their thing for themselves, that we should not try to tell them what to do or we should not try to become involved with their responsibilities.

Then he said we should expect out of this treaty to have a new era of relations with the Panamanians, better relations, I assume he meant. This would be my hope, too.

How can we expect to improve our relations if we are not at all certain that we agree on the treaty, if we have different opinions of the neutrality treaty, apparently? We are in the process and may resubmit to them two treaties, one of which, at least, will be substantially changed. Is it not looking after American interests on the one hand to insist that both the Panamanians and the Americans have the same understanding of the meaning of the treaties? Certainly, I think this is of paramount importance. It is a matter of looking after our own interests to know what they think of our submission.

I think it is very important, too, that if we expect to improve our relations with them, that there not be a difference of opinion of where we are.

Third, we should know where we are, precisely, unequivocally, without any reservations. Today, we do not. We do not know whether the Panamanians are going to have a plebiscite; whether they are going to follow their constitution, or not. We do not know officially how the citizens of Panama feel about the changes which have been made. We do not know what may happen in the future if they take no action and we assume that they agree with us. We do not know what a subsequent administration might do as far as the constitutionality of the approval of the treaty in Panama.

What we are doing is setting up a pig in a poke, not only for our citizens but for the Panamanians for now and in the future.

I think it is of the utmost responsibility on our part as Members of the Senate to know where we stand, to know what kind of an agreement we have, and that we know what the thinking of those on the other side of that agreement is.

Mr. SARBANES. Will the Senator yield?

Mr. LAXALT. I am happy to yield to the Senator from Maryland.

Mr. SARBANES. First, Mr. President, I want to say I am touched, though not quite yet moved, with the concern, as to whether the will of the Panamanian people is being reflected, in the statements of the two Senators with which I am engaged in this colloquy. They comment that the proponents want it both ways. Of course, they do not want it any way at all. They have rejected what has taken place on the floor of the Senate.

At some point I think we are going to have to recognize that we are proceeding on the premise that there are two separate, independent, sovereign countries, the United States and Panama, which are negotiating a treaty between themselves. I know it is difficult, as shown by the amendment the Senator from Kansas offered and then withdrew, for some to reflect this attitude.

Any agreement, and a treaty especially, requires, of course, the concurrence of the other side. One does not come along and lay down the terms. They try to negotiate arrangements which are mutually beneficial to both parties to the treaty. That is what we have tried to do here. We have gained some rights for the United States which I think are very important.

The amendment which was withdrawn would have required agreement from Panama to something we have from no other country in the world. It would have imposed upon them, or it would have sought to impose upon them, a condition that we do not need, because we are in a position to fully protect our interests, and a condition which is counter to what a self-respecting nation would agree too. We do not have that kind of an arrangement with any other country in the world. Yet we do have

arrangements with Panama which, in contrast to our arrangements with other countries are quite far reaching in terms of our ability to protect American interests.

As we discuss back and forth, we must recognize that an agreement must be made between two parties; it is negotiated to be mutually advantageous. Our responsibility is to see how our interests are provided for as we make our judgment with respect to the treaties. We have very extensive and extended rights under these treaties.

The Senate has taken the action we deemed necessary before giving our advice and consent to the previous treaty. We now have Members who would like to go beyond that and determine for Panama the position of the Panamanians. Of course, that is not for us to do.

As we proceed forward with the Panama Canal Treaty, having approved the Neutrality Treaty by the very wide margin of 68 to 32, which is bettter than 2 to 1, and which is the margin a treaty requires in the Senate, I think we need to be sensitive to what treaties are: agreements between two parties; voluntary agreement between two parties.

Lasting treaties do not constitute the imposition of the will of one party upon the other. They are mutually arrived-at understandings which are important to the interests of both countries.

With American interests protected as well as they are in these treaties, it seems to me that what we should do is to move ahead now to approve the second treaty and begin the development of a new basis and a new relationship with Panama.

I thank the Senator for yielding.

Mr. LAXALT. I thank the Senator from Maryland.

Getting back to the basic contention I was making in connection with the Dole amendment, which has now been withdrawn but which will be momentarily, I hope, recalled for consideration, I think the point we have to remember here is the fact that these treaties as presented to this Senate, from the standpoint of correction by amendment, have been almost infallible, untouchable.

(Mr. CULVER assumed the chair.)

Mr. LAXALT. The silent hand of General Torrijos hovers over this Chamber. As was indicated the other day, he literally has the power of veto and has had during the whole course of these debates upon what we can constructively pass as an amendment.

No one can convince me that the handful of negotiators who worked on these treaties have all the answers. I cannot believe that. If that were the case, we should not even be considering this at all; let it be handled by way of executive agreement. Why let us take a look at all?

Yet, that has been the essence of the discussion here. Every amendment that we have seen fit to offer here has been fought, has been argued against on the basis that it has no substance, has no merit; and yet, after they were voted down, they eventually were adopted as reservations and understandings—the very same amendments, in essence, that we offered here.

Why? Because that enabled the proponents of these treaties to pick up the two or three votes that they had to have to pass that first Neutrality Treaty. I submit that if that device had not been indulged in here, the Neutrality Treaty, last Thursday, would have been voted down. I suggested that the proponents of this treaty would not have been able to secure those two additional votes. Those two additional votes would be ours. And today, we would not be on the Senate floor because the Panama Canal treaties, and properly so, would have been voted down.

We have been asked here, in a few short weeks, to take an instrument in the form of these proposed treaties and say to ourselves, they are absolutely all right; they cover all the bases; they are perfect. There is no room whatsoever to clean them up and to protect them. That has been essentially the thrust of our discussion. Yet 14 years was spent in negotiations on the part of the executive and his people—14 years. Here we are expected, in a period of 5 or 6 short weeks, to arrive at sensible decisions without realistically being able to exercise the rights of correction by way of amendment.

I yield to the Senator from Iowa.

Mr. CLARK. I should like the Senator to yield for a question. I have heard the distinguished Senator from Nevada say, on several occasions now, that Torrijos looks over our shoulder and really has a veto on what goes in and out. I can only speak for myself, but I think I have looked at every amendment as carefully as I could, every reservation, every understanding. I voted my conscience on those. Why would the Senator feel that, somehow, I voted differently from my conscience on any given amendment simply because of the things he talks about?

Mr. LAXALT. I say to the Senator, I would not begin to suggest anything of the kind. All I can say is that I have spent 150 hours-plus on this floor. All I can say is that time after time, I have been told that we cannot amend lest it result in another plebiscite and that would be harmful to General Torrijos.

All I can say is that the political stance, at least here, has been, except aside from conscience, that that should be a conclusive factor in whether or not we vote one way or another on the amendments. That is why I think the silent hand of General Torrijos hovers over this Senate Chamber. I personally do not like it a bit.

Mr. CLARK. I must say that it does not hover over my head. I vote on the amendments as I see fit and the understandings and the reservations. I think that, to say that someone voted a particular way because of this or that, one would have to look into the conscience and the intentions of an individual Member. I do not think that is possible.

I voted, finally, against even the so-called DeConcini reservation because I felt that way, not because it might somehow cause us to have another plebiscite. It may well be that one could argue that if there were a good amendment which was a very insignificant one and that would cause all kinds of problems to do that, there may be Members who would argue that it was not worth the effort. But I must say, I have not seen any of those amendments yet.

It seems to me that each of us here has the responsibility to vote on each amendment based on the merits of that amendment. I do not know; the Senator may have individual cases or groups of Members who voted other than their consciences on these amendments or reservations, but I, for one, certainly am not prepared to say that I did that because of Torrijos' hand hovering over me or for any other reason.

There is nothing perfect about this negotiated treaty. There is never going to be anything perfect about any other negotiated treaty. But the terms of the amendments that have been offered so far, including the one that Senator DOLE has withdrawn and I think is about to reoffer, are not right on the merits as far as I am concerned. That is what I am going to vote on.

Mr. LAXALT. May I make an observation to the Senator from Idaho?

Mr. CLARK. It seems to me that the implication that some of us are going to do otherwise is at least questionable.

I do yield.

Mr. LAXALT. All I can say to the good Senator from Iowa is this: We have presented amendment after amendment, and a majority of the Senators in this Chamber have voted against all of them. That, to me, is not circumstance. That indicates to me that there has been a consensus developed by the proponents that no treaty amendment is going to be acceptable. That is more than mere coincidence.

I do not question the good faith of the Senator from Iowa: far from it. I have worked with him and I know that he votes these particular amendments as a matter of conviction and perhaps even as a matter of conscience. All I can say is that it has been quite a coincidence to be on this floor and see meritorious amendment after meritorious amendment voted down. I could say that there are over 50 Senators in this Chamber who voted against every one of the amendments. Yet the essence of some of those amendments finally was adopted by way of reservations and understandings.

Mr. CLARK. Which amendments and reservations were adopted? I would not say the DeConcini reservation is identical, but what other reservations?

Mr. LAXALT. I think the DeConcini reservation is a clear example of what I am talking about. We talked in this Chamber to guarantee the rights of military bases, talked at length for hours here. We were told this was an unacceptable amendment. We were told this was an affront to Panamanian dignity, that we could not guarantee this kind of provision within the terms of the treaty because the Panamanians would resent it, and secondly, that it was unnecessary.

Mr. CLARK. If I understood his language, and I think I did, the Senator said there were several. I voted against the DeConcini reservation, I might say. But what are the other amendments that are identical or, in essence, the same?

Mr. LAXALT. The Nunn reservation was basically the same as the amendment. The DeConcini is the cleanest and clearest one of all.

All we were attempting to do by way of the device of amendments was to secure our situation militarily. The Nunn reservation was essentially in the form of an amendment. The DeConcini clearly was.

As I say, we were told that we could not do this; it was unnecessary. Yet, when the DeConcini vote was needed, suddenly, that same wording to the same general effect was adopted by way of reservation.

I know the Senator from Iowa voted against it. But the fact is, that same reservation was voted in as a reservation, but not as an amendment. That meant to me that there were two ways of going here and the proponents had the best of both worlds. They have it both ways. They can stonewall us on amendments, as they effectively did, but all they have to do is offer it as a reservation or understanding and suddenly it becomes blessed and pure and perfect and we take it. That is what happened both with the Nunn and DeConcini matters.

I think that this is a sad state of events and I reaffirm that the silent hand of General Torrijos hovers over this Chamber. I, for one, resent it.

Let me refer, if I may, to another matter.

This relates to the canal treaty. This relates to our military situation between now and 2000 when the other treaty takes over. This relates to our having a positive assurance that no other country, other than Panama and the United States, will be permitted to have any military presence within Panama during that period of time.

Now, how in the world could there possibly be an objection to that? How could there be when we have written into the DeConcini amendment that we unilaterally can interfere with the affairs of Panama even if they do not operate the canal effectively?

What kind of sense does that make?

I think this is going to be a litmus test, frankly, as to whether General Torrijos' hand still hovers over this Chamber, because if this is voted down it will be, pure and simply, because of that consideration.

We have an additional fact which we have to take into consideration here, that General Torrijos is admittedly a friend and confidant of Fidel Castro.

The friendly association, by itself, does not mean much. But the fact is that they have worked together closely in matters political, they have worked together in other matters. The fact is that Cuba, at the behest of the Soviet, saw fit to send thousands of troops, over the bitter objection of America at the time the Senator from Kansas—I remember sitting on this floor—said that unless we take a firm position against Cuba, they will be sending troops to Africa.

We did not take that position, they went to Africa, not only into Angola, but now involved in the Ethiopian dispute.

So are we not naive in thinking the Cubans are friends of ours, or not doing the handiwork of the Soviet?

I am not so naive. I do not think people are so naive.

All we want to make sure through the Dole amendment is the fact that if these treaties do pass, we have absolutely guaranteed that there be no Cuban or Soviet presence within Panama.

That, to me, accomplishes several things. First of all, it assures us that we are going to have a military presence and control over the security of that canal, No. 1. It should reassure the Panamanian people. It is to their best interests we not have a confrontation.

Where are we going to be in the next 22 years if General Torrijos, as he is now permitted to do, decides he is going to permit the Cubans to come in? Are we as Americans going to tolerate that? No way.

Then we are left with the prospect of a confrontation, an unpleasant confrontation. This obviates that. So, it seems to me that it serves the best interests of the Panamanian people, certainly the best interests of the United States, that we build into this treaty by this amendment an absolute guarantee that we do not have that kind of problem.

The Cubans have no business in Panama with a military presence. Absolutely none, because if they are there, they will be doing the handiwork of the Soviet.

Tom Moore, the former chairman of the Joint Chiefs of Staff, came to this Congress and said, "Listen, the action is Soviet. That canal is vital strategically to the future of this country militarily."

It involves hemispheric security, the security of this country, and the future of the young people of this country is at stake, because if we sacrifice that canal, which is a choke point, in time we will trade it off to the Soviet.

In the opinion of a lot of us, we just get rid of a middle man in Panama; or let us give it to the Soviet, it is only a matter of time before, effectively, they will control the operation and control that canal. This amendment would forestall that at least for 22 years and make clear that no one other than Panama or the United States would be permitted to have any kind of military presence.

I think it is absolutely essential that this be built in as a safeguard to these treaties.

I commend the Senator from Kansas for offering this as an amendment. He offered several other amendments which were worthwhile in the Neutrality Treaty. He met with the same success we did on the various other amendments.

It is going to be interesting to the Senator from Nevada to observe this vote because if it has been indicated that the silent hand of Torrijos does not hover over this Chamber, this amendment should be adopted. By the same token, if we continue to get 35, 36, or 37 votes here, it is going to mean that as we move to this second treaty we will have the same old ball game, stonewall after stonewall after stonewall. Then the Senator from Kansas (Mr. DOLE), if some proponent does not beat him to it, can offer the same amendment by way of reservation or understanding, so that it will become all good, all perfect, and it will pass.

Mr. DOLE. Will the Senator yield?

Mr. LAXALT. Certainly.

Mr. DOLE. As the Senator knows, we went through that exercise a few times last week in an effort to secure enough votes for passage of the Neutrality Treaty. I would guess we will have the same exercise, if I am any judge of what might happen around here.

But it seems to this Senator that, as I have said, and I do not want to delay the vote on the amendment which I will call up again in a few moments, there probably are all kinds of arguments against the amendment. But the basic one is, though nobody will admit to it, we do not want to change any language at all because that might upset Mr. Torrijos. That is what it is. That is the strategy on the protreaty forces. That is their strategy and they have to live with it. It is what they have told us in no uncertain terms. We cannot add one word to these treaties because it might mean another plebiscite.

I have not checked the voting record of the Senator from Iowa or anyone else, but I doubt he supported any amendments. Apparently, he is of the view we do not need to change the treaties, that they are perfect in their present form.

I suggest that perhaps if some Senator should stand up and offer the word "America" in the treaty, it would be turned down by the pro-treaty forces. I doubt we could add the word "America" to these treaties successfully because that might change the text of the treaty and that might mean another plebiscite.

Somehow, we are told that would be an affront to General Torrijos. Well, I am not certain what may be the final outcome, but it seems to me we are back about where we started.

I cannot really believe the Panamanian people will be so upset about that amendment. After all, it is offered for their protection as well as ours.

I have tried to point out on the map that foreign troops could be invited to the water's edge, and I stopped to think about the role the Cubans played in Angola, the role they are playing in Ethiopia It seems to me Panama is a very attractive target for the Cubans and the Soviets in their efforts to expand communism.

Again, it is not enough to stand up as a pro-treaty Senator and say, "Well, those of you who are for these amendments are somehow always scrounging up these awful amendments, always looking on the dark side, always looking under a rock," because it has not been a year, not even a year has passed since this body watered down an amendment I offered to an appropriations bill to sort of slow down our normalization with Cuba. Since that time, the number of Cuban troops in Africa has gone up from 5,000 to about 20,000.

I do not know whether the Senator from Nevada or the Senator from Kansas have the answers, but I am not so certain any other Senators have the answers, either.

Why is it we always must accept their view? Does the presence on the Foreign

Relations Committee give some view that the rest of us are unable to comprehend or understand?

I do not know how many Americans really know what the Foreign Relations Committee is, or how many members are on it, or who the members are. I am not certain how many Americans know how many Senators there are, or who the Senators are. But I know most Americans know about the Panama Canal and they are not so enamored about some of the arguments made in this about what might be, we have to get along with everybody, including Cuba.

It just seems to me that probably we will lose, as we have in the past. The automatic votes will come from the pro-treaty forces, rejecting every argument, rejecting every amendment, and only when it is necessary to secure enough votes for passage will the other side respond at all. I guess that is the way legislation works, not just in this case but in many other cases. That gives some Members some leverage.

I would guess the reservations, though not particularly meaningful, may help the treaties in some respects, so maybe we should be thankful for that.

But if we were told at the outset that we could not offer any amendment, that we should not expect any amendment to be adopted, then perhaps we have wasted a lot of time, 4 or 5 weeks, unless we have exposed the workings of the Senate to the American people. Perhaps they understand what some of us are up against in this body. We are up against a majority. Some of that majority has voted for some amendments and against some amendments; but consistently there have been 40 or 50 votes or 50 or 60 votes that automatically were cast to table or dispose of every amendment.

So the American people, we hope, have learned just how difficult it is, because they are asking me, "Why don't you do something? You're my Senator. Why don't you do something? Why don't you stop of the giveaway of the Panama Canal?"

If they are listening, they know that we do not have the votes. We may have the arguments on our side, we may have the merit on our side, but we do not have the votes. That is why we cannot do anything, I say to the American people who may be listening. Do not focus the blame on the 32 of us who have tried.

Mr. CURTIS. Mr. President, will the distinguished Senator from Kansas yield?

Mr. DOLE. I yield to the Senator from Nebraska.

Mr. CURTIS. Mr. President, I call the attention of the distinguished Senator from Kansas to a very peculiar situation we had in reference to the ratification of the first treaty.

The distinguished Senator from Michigan, in a very scholarly presentation, pointed out that a long list of authorities agree that if we amend the treaty, it is, in effect, a new treaty and would have to be accepted by the other country; and in this case, the Constitution of Panama calls for a plebiscite.

The Secretary of State, Mr. Vance, concurred with those authorities, that that was the case, that if the treaty were amended, it would have to go back for a new plebiscite. Then, at a later time, he said, "Yes, while that is true, it is not true if the leadership offers an amendment."

Is there any justification for that? If an amendment changes a treaty so that the other country is entitled to take a look at it and go through their processes, how does the situation change on the basis of who offers the amendment? What principle in international law says that an amendment offered by the distinguished Senator from Kansas changes a treaty but if it is offered by the Senator from West Virginia, it does not? Can the Senator from Kansas explain that?

Mr. DOLE. I would like to explain it to the Senator from Nebraska, but I never have really understood it myself.

Mr. CURTIS. We have gone a long way when we reach the point where a correct interpretation of a law is based upon who introduced it. Is that not right?

Mr. DOLE. That seems to be what is happening--and on whose vote may be needed and whose vote may be possible.

Perhaps in the 4 or 5 weeks we have remaining, we will have an opportunity to inform the American people who may be listening—not just in the Chamber, but listening to their radios—that this is how it really is.

Mr. CURTIS. In the light of the differences in translation of the two languages and in the light of some of the vagueness that has been pointed out on the Senate floor and in light of the apparent desire of a substantial number of Senators for amendments, does the Senator think it would be an affront to the Republic of Panama to suggest, "Let's go back and sit down and try it over again"? Would that be an affront to any country?

Mr. DOLE. The Senator from Kansas does not believe it would be; but we are told that repeatedly, that that, somehow, would be a big deterioration in our relationship with the Panamanian people.

Mr. CURTIS. A treaty is a contract. Does not clarity and exactness help both sides to a contract, if they know what it is?

Mr. DOLE. That is the normal understanding the Senator from Kansas has. That is why you negotiate.

I do not quarrel with our negotiators, but apparently the Senate does not have any role to play in this particular treaty. We can either take it or take it.

Mr. CURTIS. Well, they have played a role, I have noticed. I am not pointing my finger at any Senator who is unable to be here to listen to the debates. There are too many committees, too many subcommittees; there is much going on. But the fact remains that the attendance at the debates of those who voted against the first treaty has been much, much higher than those who supported the treaty.

We have been faced with this: The Senator has been earnestly presenting an amendment, such as the Senator from Kansas has done; and then when the bell rings, they come in, and the amendment is voted down. There have not been many instances in which we have even had a chance to vote on the amendment on its merits, have there?

Mr. DOLE. No. In fact, except for the leadership amendments, which were cosponsored by approximately 70 Senators, I do not know of any other amendment on which we had an up or down vote. There may have been some; but certainly none of the amendments that the Senator from Kansas had were voted on as to their merits.

Mr. CURTIS. Is it not an accepted principle of parliamentary procedure that a motion to table says, in effect, "Let's not consider this at all; let's just get rid of it and not consider it at all"?

Is that not correct?

Mr. DOLE. That is right.

Mr. CURTIS. Was that the way the amendments were treated in connection with the other treaty, for the greater part?

Mr. DOLE. There may be exceptions. The record would reflect that. But I do not know of any, except for the two leadership amendments, on which we had an opportunity to have a vote up or down. Every one was tabled, and the votes were automatic.

There are seven Senators on the floor now. There will be seven on the floor 2 hours from now, and seven tomorrow.

I agree with the Senator from Nebraska that many other things are happening. But I think the strategy is clear: Just to table every amendment, not upset Torrijos, not have another plebiscite, not worry about the American people. Their judgment really does not matter.

Mr. CURTIS. Does the Senator agree with me that the best legislative performance on the part of the Senate would be to consider an amendment offered in good faith, have it debated on both sides, and have the listeners to that debate decide it on its merits? Would the Senator approve of such a procedure?

Mr. DOLE. In looking around, yes, I think I would be glad to accept that. I would be 6 to 1 or 5 to 2.

Mr. CURTIS. I thank my distinguished friend for yielding.

Mr. DOLE. I thank my friend from Nebraska.

Mr. President, I indicate to the Senator from Iowa (Mr. CLARK) that the Senator from Kansas will call up amendment No. 69 in just a few moments, unless others would like to be heard. I will yield the floor.

Mr. HATCH. Mr. President, will the distinguished Senator yield ?

Mr. DOLE. I yield the floor.

Mr. HATCH. Mr. President, I have been intrigued by and interested in this amendment, as I have been with respect to a variety of other amendments as we have debated the Neutrality Treaty and now are in the debate on the Panama Canal Treaty.

I believe the distinguished Senator from Kansas has done us all a favor in pointing out that the Panama Canal Treaty is ambiguous and does not protect the United States of America as it should.

His amendment reads:

For the duration of this Treaty and consistent with the provisions of Article IV, the

Republic of Panama and the United States of America agree that, subject to the other provisions of this Treaty, only the military forces, defense sites, or military installations of the Republic of Panama or of the United States of America may be maintained in the national territory of the Republic of Panama.

I rise to speak in favor of this amendment because I think it should be acceptable to Mr. Torrijos as well as to every Senator on the floor of the Senate.

One of the developments that disturbed me about the debates on the Neutrality Treaty was the sudden rush to enact reservations and understandings toward the end of the debate on the Neutrality Treaty, as though we were really protecting the United States of America and as though these were really amendments to the treaty when they were not. They were amendments to the resolution of ratification which was the Neutrality Treaty which is a far cry from amending either one of these treaties, the Neutrality Treaty, or, as is the case today, the Panama Canal Treaty.

I do not think many people realize the relationship between international law and Panamanian domestic law.

Under Panama's old constitution, title I, article 4, it is stated:

The Republic of Panama respects the rules of international law.

Under the new constitution of Panama, title I, article 4, it says:

The Republic of Panama respects the universally recognized rules of international law, . . .

And then adds:

. . . which are not prejudicial to the national interests.

Which is an extremely convenient qualification to allow the dictatorship of Panama to do just about anything it wants to do with regard to these treaties.

The 1946 constitution, as amended in 1956, specifically provided that Panama would recognize the principles of international law. The Torrijos constitution of 1972, provides that Panama would respect the rules of international law only insofar as those rules "are not prejudicial to the Panamanian national interest."

That is a marked departure from the old constitution and a marked departure from an international rule of law or constitution which may be beneficial and reliable to others who are dealing with the Panamanian Government, such as we are here. It is interesting to note that Torrijos chose not to use the narrow words "inconsistent with Panamanian domestic law," but used the broad terms "prejudicial to the national interest."

This constitutional change vitiates the State Department's claim that Panama, as a matter of international law, bound by reservations, understandings, and declarations exchanged with the instruments of ratification. In other words, it is really a charade, which allows Torrijos to disregard valid, reasonable, and decent protective changes or clarifications for the benefit of the United States of America. And when we talk about the resolution of ratification, in connection with declarations, understandings, and reservations, we see they really do not mean very much under Panamanian domestic law and can be ignored at will by Mr. Torrijos and anyone else, for that matter. In other words, the way to have the treaties become binding on Panama and upon the United States is, of course, through the amendment process. If we do not like something, if the treaties are amendable because they are ambiguous or they do not state clearly that which they should state clearly, then the way to do it is to amend the body of the treaty and not wait until we get the resolution of ratification and amend that with reservations, understandings, or declarations which probably are not worth the paper they are written on. In other words, we are not protecting this country if we do not amend out the ambiguities.

In the exercise we went through on the Neutrality Treaty with some amendments of great import which would have protected the United States of America, many of which could hardly be said to be offensive to Panama, the only amendments which were acceptable were the two supposed leadership amendments which were supported by three-quarters of the Senate leadership.

Although Panama would under international law be bound by those documents, if as a matter of domestic law Panama refuses to recognize the U.S. claim under international law because it was "prejudicial to the national interest" the U.S. claim as a practical matter would be rendered academic unless we do it in the form of amendments which would then require a plebiscite in Panama or at least under international law would be binding if the dictator said they did not need a plebiscite.

This would also seem to apply to the leadership amendments that were passed in the last treaty. In that case Panama would have to go a step further and declare its authority to "blue pencil part of the treaty text because the leadership amendments were part of the treaty text. The only way they could do that is to come right up front and say that they did not accept that.

Let us look at a couple other changes of the Panamanian Constitution; changes which are important here. Consider, for instance, Torrijos' ability to pack the Supreme Court of Panama. Under the old constitution, article 165:

The Supreme Court of Justices shall consist of nine magistrates.

That is what it says.

Under the new constitution, article 185 of the Torrijos constitution, it says:

The Supreme Court of Justices shall be composed of the number of magistrates determined by law.

This constitutional change potentially allows Torrijos to pack the supreme court. If Torrijos as a matter of political convenience wanted any reservations, understandings, or declarations not submitted to a plebiscite declared unconstitutional and if the sitting court refused to strike those documents, Torrijos could pack the court and assure that they would be declared unconstitutional.

This theory could also apply to the leadership amendments as well in the prior treaty to which a resolution of ratification has been voted. In that case the Supreme Court would also have to declare its right to "blue pencil" part of the treaty text.

On another constitutional change on the national plebiscite for treaties affecting the Canal Zone, the old constitution had no comparable provision. However, the new constitution, article 274. talks about transitory provisions, and it says this:

Treaties which may be signed by the executive organ with respect to the Panama Canal, its adjacent zone, and the protection of the said canal, and for the construction of the new canal at sea level or of a third set of locks, shall be submitted to a national plebiscite.

The term "treaty" is the operative word in determining the validity under Panamanian domestic law of reservations, understandings, declarations, and even amendments which have not been submitted to the populous for a plebiscite. There have been no treaties concerning the Canal Zone since the promulgation of the new constitution other than these. Therefore, article 274 has never been the subject of judicial interpretation of the Panamanian Supreme Court which could be packed at any time if Torrijos dislikes a particular decision.

I the court were to define the term "treaty" as including all of the operative associated documents exchanged at the time of ratification, then it could strike any attached documents not submitted to the plebiscite or it could also strike the entire treaty if part of it were constitutionally defective under Panamanian law. In the case of Filos against Republic of Panama the Supreme Court struck an entire treaty because the procedures used in ratification were defective under Panamanian law as defined by the Panamanian Supreme Court. Panamanian law is so vague in this area that Torrijos, as a practicial matter, can do whatever he wants to.

In order to make its views known or to qualify its consent to ratification of a treaty, the Senate has basically four options.

No. 1, the Senate may advise and consent to ratification but makes its views known in the committee reports. This has no legal effect and is not binding on the parties other than to serve as legislative history.

No. 2, the Senate may include in its resolution language expressing its understanding or interpretation.

Now, let me repeat that.

The Senate may include in its resolution language expressing its understanding or interpretation. The purpose of an "understanding" is to achieve clarification or even modification of the treaty provision without entering a reservation. Under existing practice the President would communicate such understandings to the other parties. The legal effect of such understandings is not always certain. If, for example, the language does not substantively affect the terms of international obligations of the treaty, such language would have no legal effect.

Whether the understanding does or does not substantively affect the terms of the treaty is a matter that is ultimately resolved by the parties. Moreover, if the understanding is communicated to the other party and accepted, the treaty need not be reopened. The inherent danger of understandings is that they are not always certain or, should I say, it is not always certain whether the parties, because of the failure of communication, had a meeting of the minds. For this reason, an understanding may engender doubt or controversy as to whether the parties agreed to the same terms.

An understanding then may not require renegotiation, if the parties deem it insubstantial. Such understandings are always vulnerable to subsequent reinterpretation and disagreement. Thus, an understanding is not normally used where one of the parties to the treaty seeks a major clarification or modification to the material, as we are doing here, and as Senator DOLE is doing here.

Further confusion can result from an understanding if one of the parties accepts the treaty without expressly consenting to the understanding or to the understandings, which I think will be the case here. Because the only way the Panamanians can accept, it seems to me, would be to have another national plebiscite with regard to the understandings, which they claim they will not have to do because understandings are just what we think about the treaties and not what they think about the treaties.

No. 3, the Senate might include in its resolution language expressing its "reservation." A reservation usually, but not always, requires renegotiation. In only one instance—a treaty with Canada to divide the waters of Niagara River—has the legal effect of the reservation been seriously debated. In consenting to ratification of the treaty, the Senate resolved that the United States reserves the right to provide for redevelopment of its share of the waters by an act of Congress, and no such redevelopment should be undertaken unless specifically authorized by an act of Congress. Both the United States and Canada treated this reservation like other reservations.

The President asked Canada to accept it and Canada—though somewhat mystified by it—did accept it. Renegotiation, therefore, in that case, was not necessary. But the precedent shows that unless the other party does accept it and does so through the legal structure of its own constitution, then renegotiation is necessary.

Normally, reservation language involves some change in the international obligations of the treaty and may affect its terms in such a significant manner as to require the Executive to communicate the terms of reservation to other parties to the treaty, thus enabling them to take such action as they feel appropriate, including reservations of their own, renegotiation, or even refusal to proceed with the treaty.

In effect, the inclusion of the reservation tells the President that the Senate gives its consent on the condition that changes be made or certain conditions be met.

The Senate could, for example, include a reservation that required the passage of implementing legislation by both Houses before the President had authority to ratify. The Senate may even, as was the case in the Versailles Treaty, reserve special powers to interpret or terminate the treaty as a condition for ratification by the President.

The fourth point. Finally, the Senate may amend the terms of the treaty itself. In this instance, there will be no question but that the treaty would need to be renegotiated. A distinction should be made between a "reservation" and an "amendment." A reservation limits only the obligation of the United States under the treaty—although a reservation may, in fact, be of such significance as to lead other parties to file similar reservations or refuse to proceed with ratification.

An amendment, on the other hand, changes the obligations for all the parties of the agreement. It is therefore the only certain guarantee that the Senate has if it wishes to bind all the parties to a certain obligation. Certainly, reservations, understandings, and declarations do not give this country a guarantee that the Senate's wishes will be undertaken by, in this case, the country of Panama. It should also be noted that the Senate has not used the amendment process in the post-World War II years.

So, in summary, as a practical matter, if the Senate uses language of understanding, the implication is that the contractual relationship between the parties is merely being clarified. If the Senate attaches a reservation to its resolution of advice and consent, the inference is that the contractual relationship is being changed so far as the international obligations of the United States are concerned. But if the Senate adds an amendment, it is clear that the Senate requires a change of the contractual relationship between all the parties. In other words, it is a straight forward way of letting them know what the American people really believe and what we really feel. It is the way of saying, "Look, Mr. Torrijos; look, our Panamanian friends, these treaties need some corrections. They need some amendments and some changes. The ambiguities are intolerable to us and we improve the treaty so that you know where you stand and we know where we stand, and together maybe we could stand together forevermore."

It would be in the interest of both countries if we could bring about that wonderful state of Nirvana. Those who will not allow any amendments seem to think it is going to occur just because we enter into these treaties with Mr. Torrijos.

If you applied these considerations to the Panama Canal treaties and in particular to the uncertainties that have arisen in connection with the rights of the United States to defend the canal and to acquire preferential treatment through the transit of warships, and, of course, with regard to the Panama Canal Treaty itself and some of the ambiguities there, the only option available to the Senate that would bind all of the parties is the amendment process and that is why the distinguished Senator from Kansas has such a desire to get these decent and worthwhile amendments, clarifying amendments into the treaty, for the benefit of both countries—I would have to say for the benefit primarily of this country. Because, after all, that is what we have been elected to do as Senators. We have been asked to, it seems to me, protect this country and certainly all of us with any sensitivity have a desire to protect it in a way that is not offensive to the Panamanians but if offensive, at least honestly, so they know where we stand.

That is why I think these amendments, many of them, have been substantively valid. In fact, I cannot think of one that has not been substantively valid in the whole amendment process with the other treaty. This is the first one brought up on the Panama Canal Treaty, and I find it to be eminently fair and eminently worthwhile in the light of the ambiguities in the treaty.

One of the things that really bothers me is that there has been, and I do not think anyone can deny it or at least seriously deny it, a flat rejection of good amendments in the interest of making Mr. Torrijos happy and making sure that these treaties go through, good or bad. If we were not sworn to protect the interests of the United States in these matters and do our best to make sure that the interests of the United States are protected, I might not be nearly as excited as I am about the stonewalling which has taken place in this particular situation.

Let me go back to some of the Panamanian court decisions, just to show how Panamanian law operates, and maybe help all of us to realize that this treaty is in need of amendment.

The jurisdictional mandates for the Supreme Court of Panama under the 1946 constitution as amended in 1959 and the Torrijos constitution of 1972 are strikingly similar. The 1972 constitution is modeled after the 1946 constitution as amended. Torrijos expanded the jurisdiction of the Court somewhat in most areas by giving them greater jurisdiction over the subject matter of documents in controversy but denied the Court's jurisdiction to review the constitutionality of constitutional amendments. For purposes of this memorandum the Court's jurisdiction over treaties is, if changed at all, somewhat broader under the Torrijos constitution.

During the 1960's there were three court cases dealing with the Panamanian treaty ratification process. There have been no cases under the Torrijos constitution. The differences in the language of the two constitutions are so minor as to give no weight to theories that the decisions of the 1960's have been vitiated by the new constitution. There is no reason to expect that the doctrine of stare decisis would not be in operation.

The treaty cases of the 1960's affirmed the concept that the Panamanian Supreme Court has no jurisdiction over the substance of the treaties but may deal with the constitutionality of the proce-

dures used in the Panamanian ratification process.

An example of this was the Supreme Court's decision that the "Geneva Convention of August 12, 1949" was unconstitutional because the Panamanian Government failed to use the proper procedures in ratifying the treaty. Article 133 of the 1946 national constitution required that the National Assembly approve treaties. As part of that process the entire document had to be printed in the official Gazette. In the case of the Geneva Convention in controversy the entire document was not printed properly in the Gazette. The Supreme Court described the law as "truncated and therefore incomplete". The Panamanian Supreme Court held—

If the promulgation of the laws exists as a constitutional prerequisite so that their texts, through the publication in the official Gazette, can be accessible to those that must observe it, then it must be concluded that the observance of the acts omitted in the laws enacting them cannot be made compulsory, insofar as their text is unknown because of not having been published as part of that law. . . .

This dicta could have serious implications on the constitutionality of any reservations, understandings, declarations or even amendments not submitted to a national plebiscite.

If the Carter-Torrijos understanding was not published as part of the text of the neutrality treaty, there are serious doubts cast on its constitutionality. Dr. Quintero and Dr. Linares, professors of law in Panama, both agree that there was insufficient publication of the leadership amendments under Panamanian constitutional law. Both professors point out that there was no publication of these documents prior to the Panamanian plebiscite. Although the two treaties and various notes attached to them were published and available to the public the package of materials did not include the Carter-Torrijos understanding. The mere fact that Carter and Torrijos entered into the understanding prior to the plebiscite does not mean that the understanding was sufficiently published in Panama to meet Panamanian constitutional requirements.

Pedreschi, a leading Panamanian constitutional scholar in citing examples where the Panamanian Supreme Court has jurisdiction over a treaty states:

Consider, for example, a public treaty entered into by the President of the Republic, and a situation in which he states that the treaty is finalized and in effect only with his signature, with that of the appropriate minister being unnecessary, and, even more serious with the approval of the National Assembly being unnecessary. Could not a treaty such as the one given in this example, which can allegedly be finalized with the signature of the President of the Republic, be brought before the Court on constitutional grounds? A treaty entered into in clear violation of the Constitution can be brought before the Court on these grounds.

The Predreschi article predated the new transitory provisions of the Panamanian Constitution created by General Torrijos in 1972. Those provisions require that treaties dealing with the Canal Zone be submitted to a national plebiscite and it is only logical to conclude that Carlos Bolivar Predreschi would have included the national plebiscite within the framework of his article had it existed at the time of publication.

There are no precedents to indicate whether the Panamanian Supreme Court could strike understandings, reservations, declarations, or amendments including the leadership amendment leaving the balance of the text in force. Since there appears to be no restrictions in this regard and the Panamanian Supreme Court has broad discretion in their decisionmaking, there would seem to be nothing to prohibit them from rendering such a decision. This analysis, incidentally, is concurred in by Eduardo Abbot, a Chilean lawyer, working as a Hispanic law expert for the Library of Congress.

I bring these considerations up again because I think our assignment, for the people, is to provide good amendments to the treaties if they do not do for the the United States that which should be done.

Not too long ago I brought out some of the problems with these treaties which I think ought to be reconsidered at this time, the amendment of the Senator from Kansas (Mr. DOLE) does seem to alleviate one of the problems, and I wish to commend him in that regard.

Consider, if you will, that there may be a potential ambiguity under articles XX and XXII of the revised charter of the Organization of American States, which is binding on the United States in connection with the U.S. defense rights under these treaties.

Article XX provides that:

The territory of a state is inviolable; it may not be the object, even temporarily, of military occupation or of other measures of force taken by another state, directly or indirectly, on any grounds whatever.

Article XXII then goes on to provide that:

Measures adopted for the maintenance of peace and security in accordance with existing treaties do not constitute a violation of this principle.

Again, that is why the amendment of the distinguished Senator from Kansas is very appropriate here. I might add that the defense rights of the United States are presently exercisable under the 1903 treaty, an "existing treaty" under article XXII. Do these defense rights continue under article XXII, in light of the fact that these treaties terminate the "existing treaty" of 1903? That is a real question, and it is something we have to consider.

Former Secretary of Defense William P. Clements has recently revealed that the former administration had obtained consent for a security clause that clearly protected American defense rights in the Canal Zone.

The clause, which was approved by the National Security Council, the Department of State, the Pentagon, and General Torrijos, and not in the resolution of ratification of the Neutrality Treaty, unambiguously gave the United States the unilateral authority to defend the canal, even without the approval of Panama. Why was this clause, which had been approved, replaced by the ambiguous terminology of the Neutrality Treaty and agreement? One has to ask why.

I see in the Dole amendment here an attempt at least to clarify and straighten out some of the ambiguities from which we have been suffering.

The treaties, both of these treaties, purport to extend many guarantees to the United States. It is questionable whether such guarantees are meaningful, however, if they are simply paper guarantees. In other words, all sail and no anchor.

The prior treaty provides, for example, that American warships shall enjoy expeditious transit, and the joint statement indicates that they shall even go to the head of the line. But how does the United States enforce this guarantee if the Panamanians control all of the facilities of the canal and its ports, if Panamanians are in charge and refuse or fail to cooperate? How can the United States be assured of expeditious transit if the United States does not own or even operate the canal? Likewise, the treaty provides that only the Republic of Panama may maintain military forces in Panama after the year 2000. But how does the United States exercise its right to defend the canal and its ability to maintain the regime of neutrality if all of the military installations are owned and occupied by Panama?

What would be the cost in terms of manpower, material, and money? Would U.S. troops occupy Panamanian soil to keep the canal operational? Would they have the ability to operate the canal, or would the United States be required to keep a permanent corps of canal pilots and other trained specialists who could be sent to Panama to keep the canal operating in times of emergency?

Except for the Joint Chiefs of Staff, who are politically answerable to the administration, most American military leaders warn that loss of the canal would jeopardize our national security.

Exhaustive analysis by the Congressional Research Service of the Library of Congress concerning the importance of the canal in terms of our strategic mobility and logistic support indicates that the canal will be even more vital to our defense needs in the year 2000 than it is right now.

In examining the role of the canal in facilitating the shipment of munitions to an Asian military operation the study shows, for example, that we have only one munitions port on the west coast, and that this port is capable of loading only 4,000 tons per day. Since, based on past experience, the requirement could easily be 10,000 tons daily, at least 6,000 tons would have to come from the east coast, where most munitions are manufactured and from which most transit the canal.

Adm. James Holloway, Chief of Naval Operations, and Adm. Thomas Moorer, former Chief of the Joint Chiefs of Staff from 1970 to 1974, have pointed out that the present Canal Zone serves as a base of naval and air operations 3,000 miles south of the United States.

Moreover, the Canal Zone is the only refueling center south of California in the Pacific. When the United States no longer has use of the bases and ports and facilities of the Canal Zone after the year 2000, will not the loss of these strategic sources adversely affect our ability to control and defend the vast area of land and sea?

I could go on and on because there are many, many aspects of these treaties which really disregard American interests.

I might mention that recently General Sumner, representing the Inter-American Defense Board, an independent international organization established by the Rio Treaty, testified before the Armed Services Committee that there was a widespread anxiety in Latin America about the economic consequences of these treaties. General Sumner based this observation on his personal discussions with heads of state and high-level defense officers in 17 Latin American countries.

What I am saying is that I think if we really have the interests of the United States at heart and the interests of Panama, we ought to amend these treaties to get the ambiguities out, to resolve the problems now, even if it does mean another plebiscite, so that both countries can go into an era of friendship and unity.

I commend the distinguished Senator from Kansas for his effort to bring forth substantive and decent amendments for the protection of this country, and I think indirectly for the protection of Panama, because I think he is doing our country and Panama both a great service. It will not do either country any good because we fail to do our job as Senators now in the interest of pleasing Mr. Torrijos if we ultimately wind up having to go into Panama to reinforce our rights in the interests of the United States.

So is it not better for us, if we can, to clarify and to make these treaties the very best we possibly can on the assumption that 67 Senators will vote for them, even though that is an assumption which should not be made lightly at this time?

In closing, I extend my congratulations to the distinguished Senator from Kansas (Mr. DOLE) and wish to indicate that I certainly intend to vote for his amendment. I hope all other Senators will vote for it also.

Mr. DOLE. Will the Senator yield?

Mr. HATCH. I am delighted to yield.

Mr. DOLE. I thank my colleague from Utah for his remarks. It is probable that anything we do here will be rejected. There is great precedent for that in the first Neutrality Treaty debate.

Mr. HATCH. That would include many amendments that the Senator from Kansas proposed.

Mr. DOLE. That is correct. They never had the chance to see the light of day.

I am certainly not going to change any minds. Maybe this treaty will be adopted by the same vote, by the same Senators. But I think we do have an obligation to try to explain the process to those who may have an interest, who may be listening via radio. It seemed to me in this past weekend the American people just cannot understand why amendments which have merit are offered and rejected summarily, or tabled, whatever. Therefore, as the distinguished Senator from Utah indicated, we can predict what will happen, but I am not certain we can predict what the reaction might be outside this Chamber. It seems to me there is a lot of frustration with the American people. As I have said, they have asked me, "Why do you not do something?" Maybe they will find out, if they listen carefully, why we cannot accomplish what we would like to accomplish.

I appreciate the Senator's assistance. I believe the amendment does have merit and I would hope that we might have an up-or-down vote in the next few moments.

Mr. HATCH. Will the Senator yield?

Mr. DOLE. I yield.

Mr. HATCH. I feel we ought to have up-or-down votes. I personally feel that these moves to table are not as understood by the people as they might be. Basically, if there is a motion to table and an amendment is tabled, that is the end of it. There is no vote up or down. The American people should know that the vote would basically have been the same, up or down, so why not have a vote up or down?

Mr. DOLE. I think we might be able to agree on a vote very soon, if we could have an up-or-down vote.

Mr. HATCH. That is correct. I think it would be a more straightforward procedure. It would let the people in this country know a lot more about how the Senate operates if we vote up or down, and they would know exactly what we are voting on in each case. I do not think it would encroach upon any Senator's rights.

(Mr. RIEGLE assumed the chair.)

Mr. HATCH. But let us at least vote on them, up or down, so the American people will have less difficulty understanding them. I think the motion to table is strictly another way of obfuscating what is really going on here and not letting the American people know that, in essence, the treaty proponents are stonewalling every possible improvement to these treaties, rather than biting the bullet and facing those problems squarely.

I might just mention in that regard, under article IV of the agreement in implementation of article IV of the Panama Canal Treaty, the United States agrees to "emplace no type of nuclear armament on Panamanian territory."

We agree to bind ourselves in that regard, because Panama is a signatory to the Latin American Denuclearization Treaty. Such an important restriction serves no purpose other than to weaken our southern defense and improve the nuclear strategy of our enemies.

On the other hand, why did our negotiators not retain language which keeps powers unfriendly to the United States out of Panama, which includes powers with nuclear weapons? That is essentially what the Senator from Kansas is trying to do. I think that is one of the great defects in these treaties, which we could clear up with some very simple language so that both sides, once and for all, know exactly what is going on here, and above all, so the American people and the Panamanian people know what is going on in clear, unmistakable language.

That is what is wrong with these treaties. They are not in clear, unmistakable language. The Panamanians interpret these treaties to mean something that we do not agree with and we have interpreted them to mean something they do not agree with. The time to resolve those difficulties, so we do not have these internal difficulties for the rest of our countries' existences, is now, right here, with amendments like that the distinguished Senator from Kansas is undertaking to make. I think it is only fair and honest to do so.

I compliment him again. I have agreed with every amendment he has brought forward. Personally, I think there has been a great deal of time and effort regarding the amendments that he has brought forth, not the least of which is this amendment here today.

Mr. DOLE. I thank the Senator.

Mr. THURMOND. Mr. President, I rise in support of the Dole amendment. Under the treaty of 1903, we have the Canal Zone, including the canal, and we have it in perpetuity. Now, if we are going to turn back that Canal Zone to Panama, cannot we, at least, have an agreement—and that is all this amendment does—that military forces, defense sites, or military installations will not be placed in the Republic of Panama except by Panama and the United States during the 22 years of the Panama Canal Treaty? Is that not reasonable? Why would anybody object to that?

Mr. President, as we all know, the danger in the world today is from the Soviet Union. There is no use beating around the bush. We might as well face it. The Soviet Union has as its goal to spread communism throughout the world. The Soviet Union is now spreading communism throughout the world. They are in Africa, they are in Europe, and they are down in the Caribbean now, in Cuba. Knowing that, and knowing that they are a threat to the freedom of the people of the world, including the United States, why can we not put something in this treaty that will say to Mr. Torrijos, "There will not be any military installations, there will not be any defense forces, there will not be any military sites there except of your country or ours?"

How can anybody object to that, Mr. President? I cannot imagine any Senator in this body opposing such an amendment. If we wish to retain our freedom, we have to stand up against these expansionistic powers such as the Soviets. We have to be prepared. To be prepared, we have to help keep out the enemy from places like Panama, which are so vital to the economic and the military well-being of the world.

There is no question about the importance of this canal. It is one of the vital waterways in the world. It is extremely important, not only from an economic standpoint, but from a military standpoint.

Mr. President, if ships have to go around the Horn, for instance, it takes

3 or 4 weeks longer; they have to travel thousands of miles farther. That can be the difference between victory and defeat if we have a war.

I just cannot see any value to the argument that the Dole amendment should be defeated.

Mr. President, presently, we can keep foreign troops away from the canal because the zone is under U.S. control. Now, if a dispute arises, Panama can invite in Soviet Union or Cuban advisers and they could accelerate military training or activity as a leverage on the United States.

If foreign troops are not allowed after 2000, why not before 2000? That is 22 years off. In 22 years, a lot can happen. Look at the progress the Soviet Union has made in the past 22 years. I say it just does not make sense to me to leave this matter to the chance. The joint operation of the canal would be smoother and safer if foreign troops are prohibited before the year 2000 and that is what the Dole amendment does.

Mr. President, again I say, if anybody wants to be sure that there will not be foreign troops there then let us pass the Dole amendment. Then, insofar as Panama and the United States are concerned, there will not be foreign troops there and this reduces the threat of a confrontation.

We know that the treaty does not prohibit foreign troops between the time of ratification and the year 2000. We can change that by adopting the Dole amendment. I hope the Dole amendment will be passed.

Senator ALLEN addressed the Chair.

The PRESIDING OFFICER. The Senator from Alabama (Mr. ALLEN).

Mr. ALLEN. Mr. President, the Dole amendment is a good amendment, a strengthening amendment, to the treaty. It should be approved by the Senate. That does not mean, of course, that the amendment will be approved. If the record of the treaty proponents on the consideration of the neutrality treaty is any criterion for the policy of the record that they will amass on this treaty, no amendments will be agreed to.

I want to express my appreciation, though, to the distinguished Senator from Idaho (Mr. CHURCH), who, in all candor, said, with respect to the Neutrality Treaty, that if we amended the treaty in any particular, it would defeat the treaty. While I do not agree with the distinguished Senator from Idaho that that is correct, I do appreciate his frankness and his candor in opposing all amendments on his theory that such amendments, no matter how small they might be—just a change of a few words—would defeat the treaty.

On the other hand, I have argued that no matter how many times we amended one of these treaties, the treaty would be accepted by the Panamanians, because Torrijos is a one-man government in Panama and all he would have to do would be to approve the treaty, exchange notes of ratification with the President, and who would there be to say that he had not properly or that the Government of Panama had not properly approved the treaty?

Some have said—as a matter of fact, I heard the distinguished majority leader on one of the television programs, just yesterday, say that he had kept an open mind and that he was going to keep an open mind with respect to amendments presented to the treaties.

Well, his open mind with respect to the Neutrality Treaty did not admit of support by him or acceptance by the proponents of the treaties of any amendment other than the leadership amendment, or amendments, if we group the two separate amendments in the form in which they were offered.

So keeping an open mind does not necessarily mean that approval is going to be given to a good amendment because, if the past record is any indication of what the record is going to be with respect to these amendments, the proponents of the treaties will, with their monolithic large majority here in the Senate, order the defeat of all the amendments.

Just what does the Dole amendment do? It supplies a missing provision, a provision that is missing from the Panama Canal Treaty which we now have under consideration, because the Neutrality Treaty, which we approved last Thursday, was a very close vote. It was close even though the vote was 68 to 32 because two more votes in opposition would have defeated the treaty.

But that treaty makes this provision:

> After the termination of the Panama Canal Treaty, only the Republic of Panama shall operate the canal and maintain military forces, defense sites and military installations within its national territory.

In other words, after the United States is required under the Panama Canal Treaty to withdraw all of its troops from the Panama Canal Zone by the year 2000, Panama pledges to go it alone with respect to the defense of the canal. They pledge in the Neutrality Treaty which has been approved that they will not call in the forces of any other nation into Panama, even though the support forces of the United States have been withdrawn. They pledge to go it alone.

Now, we sought amendments which would have permitted a military presence in the Panama Canal Zone after the year 2000 if the President thought it was necessary for the defense of the canal and if we were in a state of war. A number of other provisions that we sought were turned down. But no such provision is made in the treaty we now have before us, that Panama cannot call in troops from another nation into Panama.

So we see the anomalous situation that where the United States and Panama until the year 2000 have the joint defense of the canal, there is no necessity whatsoever for bringing in foreign troops because one would certainly think that the United States and Panama could defend the canal, we find the anomalous situation that Panama is not prohibited from inviting in foreign troops during this 22-year period.

Now, we do not want a confrontation by our troops with the troops of any other nation that Panama might decide to call into Panama.

Under the present conditions, it was argued here on the floor, some sort of concession, that Panama in the neutrality treaty was agreeing not to bring in outside troops, whereas now they can bring them up, as was stated, up to the Panama Canal Zone fence, we find that under the Panama Canal Treaty they can bring in foreign troops not up to the fence, 5 miles from the canal, they can bring them in right up to the canal itself under the provisions of the Panama Canal Treaty. No prohibition against it whatsoever.

The Dole amendment would supply this missing provision and, in effect, make the same provision that applies from the year 2000 on, that Panama cannot bring in any other troops, though under the reservation they are permitted to negotiate with the United States for retention of our troops there. Of course, they could have done that without reservation, for that matter. But under the neutrality treaty they cannot bring any foreign troops into Panama, whereas under the Panama Canal Treaty they can, even though the United States is charged with the primary responsibility, along with Panama, of course, of defending the canal up to the year 2000.

If we have some, I believe, 9,000 troops there in the Canal Zone at this time, it does not seem to be very difficult for Castro to raise an army of 15,000 to go to Africa, I assume he could raise a much larger army just to cross the Caribbean and go into Panama, and this provision of the Panama Canal Treaty that does not forbid Panama to bring in outside troops should be done away with. The Dole amendment would supply that necessary prohibition.

So there is no need, if we are interested in defending the canal with the American presence there to the year 2000, the Panamanian presence there up to the year 2,000, there is no reason to believe that the two nations could not together defend the canal, especially when Panama says they can go it alone without the United States starting in the year 2000.

Mr. President, I believe the distinguished Senator from Kansas has started out with, certainly, one of the most meritorious amendments that will be offered. The others, of course, have to do with the prohibition on the United States for negotiating with another nation for another canal. That certainly ought to be eliminated because of the danger, and the certainty, for that matter, that the American taxpayer is going to have to not only give the canal to Panama, but is going to have to pay hundreds of millions of dollars to get him to take it. That needs to be straightened out.

But, certainly, the omission from the Panama Canal Treaty of the provision that is in the Neutrality Treaty, this same provision that Mr. DOLE seeks to put into the Panama Canal Treaty, is already in the Neutrality Treaty. So if it is in one, why should it not be in both?

The only difference being that before the year 2000 American troops are there, along with Panamanians, whereas after 2000 it would just be the Panamanians alone, but they are not authorized under

the Neutrality Treaty to bring in foreign troops after 2000.

Mr. DOLE says the same provision should apply as soon as this treaty goes into effect. Who can argue with the logic of that contention?

Mr. President, it is duty and responsibility—yes, it is the constitutional duty and responsibility—of the U.S. Senate to shape this treaty before we advise the President to ratify the treaty. We do not ratify the treaty in the Senate. That term is loosely used. We do not ratify it. We give our advice and consent or our advice and nonassent to the President in order to enable him to proceed with the ratification process.

The PRESIDING OFFICER. Will the Senator suspend?

The Senate is not in order. The Chair asks that the Senate be in order, so that the Senate can be heard.

Mr. ALLEN. I thank the Chair.

We have the duty in the Senate—it is our constitutional duty—to shape this treaty in such a way that we can conscientiously recommend—that is, give our advice—to the President that he proceed with the ratification process. So we do him no service, we do our country no service, and we do the Senate no service if we say that the Senate should not and must not amend these treaties, no matter how good the amendments are.

We read a lot in the press about Mr. Torrijos being dissatisfied with the reservation that was put on in the Senate. Well, let us not be fooled by Mr. Torrijos. He is laughing up his sleeve at us in the Senate right now.

I understand that this proceeding in the Senate is being translated into Spanish, for rebroadcast in Panama. I do not know whether in Spanish they have an expression that means the same as "laughing up his sleeve." I believe that is what Mr. Torrijos is doing, by making believe this reservation is such a heavy burden on them and he does not know whether to accept it or not. Wait until the U.S. Senate gives its approval to this treaty, and you will really hear a tremendous guffaw from Panama. It will be so loud that it will be heard in the Senate Chamber.

This is typical of his attitude: After the President and the dictator agreed to a so-called memorandum explaining what they are supposed to have understood the original Neutrality Treaty to mean with respect to unilateral intervention by the United States, and they were supposed to have had a meeting of the minds on it—the President and Torrijos—as soon as Torrijos got back to Panama, he laughed and said that he had not signed anything up here in Washington, that he had not even signed an autograph. He gave his interpretation of what the memorandum meant, and it was that we did not have the unilateral right to intervene in Panama for the defense of the canal. We had the duty to intervene when he called on us, when he pressed the button. He has not recanted on that until this good day.

Of course, we know that the memorandum, word for word, became the leadership amendments. That different constructon that Dictator Torrijos had as to the amendment, of necessity, would transfer over to being a different construction from what we have, with respect to our right to intervene.

They will want to get the best of the gringos. I note that one of the ministers there talked about our right to go to the head of the line. He said that, under the treaty, the gringos had to wait our turn. That is the expression they use in talking to us.

So if Mr. Torrijos, by expressing displeasure and reservations, which he does not have to submit to the people, can so upset the Members of the Senate into refusing to agree to any amendments, no matter how good, you can rest assured that he is going to have the last laugh on the United States.

It certainly seems a fair statement to say that Mr. Torrijos has had as much influence or more in shaping these treaties than has any Member of the U.S. Senate. He showed his power when the Foreign Relations Committee added the leadership amendment as a separate article or articles. The State Department expressed the view to the committee that that would not be pleasing to the Panamanians, and the committee backed up and reconsidered what they had done and put in the form of the leadership amendment, in the form of two amendments, to the existing articles.

Now we find that same spirit emanating from Panama. We do not even know whether they are going to take the first reservations on the first treaty. So what is our attitude going to be on amendments? Is it going to be to amend the treaty in ways that will strengthen our right to defend the canal, or is it to be one of bowing to the will of the Panamanian dictator? We know he expressed the view that there should be no amendments. I express the view that there should be amendments—amendments to protect the interests of the people of the United States, the taxpayers of the United States. If any amendment will do that, I do not care whether Mr. Torrijos objects or not, and I do not care whether it has to go back to another plebiscite. It should go back to another plebiscite, for that matter, if we are to be sure we have a compact with the Panamanian people rather than with a dictator who might not be dictator at the time these treaties are finally put into force.

So, Mr. President, we are engaged now in the most important phase of the Panama Canal treaties debate. What we have done up to now—that is, approve, with one vote to spare, the Neutrality Treaty, last Thursday—does not really get to the basic thrust of what we are considering here in the Senate. There were 68 votes cast for the Neutrality Treaty. At the time a score and a half of us were seeking to get the Panama Canal Treaty considered first, I stated with some degree of assurance that if the Panama Canal Treaty were considered first and approved by the Senate I would say that 90 or more Senators would have voted for a defense treaty or a neutrality treaty, by whatever name you might care to refer to it, not 68 Senators, but at least 90 Senators. Why would that be? By taking the Neutrality Treaty first, it of necessity is just one part of a package surrounding the central theme and thrust of these treaties giving the Panama Canal away.

That is the main question we are deciding, not whether we are going to defend it in the year 2000. Everybody knows we are going to defend it in the year 2000. So the proponents of these treaties would have gotten 90, 95, possibly 99 votes.

Mr. SARBANES. Mr. President, will the Senator yield?

Mr. ALLEN. I yield for a question, yes.

Mr. SARBANES. Is it safe to assume that the Senator refrained from saying 100 because we would not have gotten his vote in that instance?

Mr. ALLEN. I was pledged against both treaties from the start, I say to the distinguished Senator from Maryland.

Mr. SARBANES. I thank the Senator.

Mr. ALLEN. Yes; I made that statement. I believe the Senate might possibly have gotten 99 because I could not have broken my pledge. I do not know, but I assume the Senator has the same feelings about a pledge. I am sure that he does.

Mr. President, that is what we have decided up to now, that we are going to defend the canal down around the year 2000. Upward of 99 Senators would have voted for that if that had been the second vote and not the first vote.

So to say that the Panama Canal Treaty has been approved is hardly accurate.

As a matter of fact, Mr. President, if this treaty we have before us is defeated, that completely wipes out all of the action we have taken up to now. It wipes it out, every bit. There will not be a vestige left. It will all be gone. That is the reason that I felt it was unwise to go with the Neutrality Treaty first because we still have the basic question to answer, are we going to give the Panama Canal away? We have not decided up to now.

We have decided on what I feel is an inadequate defense of the canal after the year 2000. But certainly we have not decided to give the canal away.

So, Mr. President, I hope that the same rule will not obtain here in the Senate with respect to amendments but that we will consider these amendments on their merits.

I believe the amendment offered by the distinguished Senator from Kansas (Mr. DOLE) is a great amendment. It merely provides that Panama cannot call foreign troops from Cuba or Russia or anywhere else into Panama during these 22 years. If Panama is willing at the year 2000 and beyond not to call in foreign troops, why should they want foreign troops to come in while the United States is still there? They are not needed. And the only service they would perform would be to provide a confrontation for American troops and possibly the takeover of the Panamanian army.

So the Dole amendment is necessary to put the same prohibition on Panama or the same right. I guess worded one way it would be a right. It is the right of Panama to be the only one to have

troops there after the year 2000. That is in the Neutrality Treaty. But it is a limitation, also, in that they cannot bring in other troops. It is a right and a limitation at one and the same time. It would be a limitation with respect to the Dole amendment in that during these 22 years they could not bring in outside troops. If more troops are needed I assume the United States would furnish them. What is the use of calling on Cuba or Russia or any other nation? That is all the Dole amendment does.

It is a sound provision. It is a provision that would avoid any confrontation by U.S. troops in Panama with foreign troops, and the Dole amendment would prevent so far as the canal's own area is concerned something that is now prevented under the present treaty, that is, bringing foreign troops into the Canal Zone where the canal is and 5 miles on each side. So without the Dole amendment Panama would be able to bring troops into the Panama Canal Zone where they are not now permitted. So the amendment cries out for adoption to protect the best interests of the people of the United States. Why should the proponents of the treaties object to a strengthening amendment, an amendment that will keep our troops in Panama from possibly being subjected to a confrontation with troops of a foreign nation?

That is the best way, Mr. President, that we could see hostilities down in Panama. Talk about we do not want to send our boys. The President said in the fireside address we do not want to see our boys sent down there to fight for the canal. This offers the best possibility that I can see, if we do not have the Dole amendment or something similar to it, the best chance of our boys having to fight in Panama for the very simple reason that if Panama brings in foreign troops into Panama there could not keep from being a confrontation between our troops and the troops of that foreign power.

I believe the Dole amendment is very sound. I hope that it will be approved by the Senate.

I yield the floor.

Mr. CHURCH. Mr. President, I remember an old film a few years back called "The Russians Are Coming." If I were to characterize the arguments made for this amendment I might do so in that form: "Beware, beware, the Russians are coming."

Well now, since 1903 we have not required the Panamanians to explicitly promise us not to let the Russians into Panama. Since 1903, we have not called upon the Panamanians to guarantee in writing that they would not permit foreign troops on their soil. For 75 years, the Panamanians have been good friends and neighbors. Would Senators think of asking a good neighbor to give a written promise not to let the Mafia in his house? I am afraid that would quickly put an end to the warm feeling between the two households.

I have no brief for General Torrijos. I have no liking for dictators. But I recall it was only a few weeks ago that General Torrijos said he did not want Communist sharks swimming in Panamanian waters.

Let alone envisioning the possibility that he would invite in Russian troops or Cuban troops, he does not even maintain formal relationships with the Soviet Union, which is more than you can say for the United States.

So why this insult, riveting into the text of this treaty an amendment that can only be calculated to inflame even further the sensitivities of the Panamanian people?

Well, of course, there is no good reason for doing it. The Panamanians, under many different governments, have never invited foreign troops onto their soil. It is a very unusual thing for any people to do.

The provisions of this treaty guarantee that our troops may remain in the Panama Canal Zone for purposes of defending the canal for the remainder of the century, and thereafter Panama promises not to let any foreign troops within its territory. Obviously, the vital interests of our country in preserving the canal as a safe and peaceful waterway are secured by the terms of the present treaty.

This amendment is not only unneeded, but it is mischievous in the friction it would bring to our relations with Panama, in the event it were adopted.

For that reason, Mr. President, I now move to lay the amendment on the table, and I call for the yeas and nays.

Mr. DOLE. Mr. President, will the Senator yield? I took the amendment with me when I went to lunch.

Mr. CHURCH. Very well. I withhold my motion.

(Mr. MELCHER assumed the chair.)

Mr. DOLE. Is there any possibility of any agreement on not moving to table but to have an up or down vote? The Senator has plenty of votes to spare.

Mr. CHURCH. I will say to the Senator that, insofar as up or down votes on this particular amendment are concerned, I would prefer to move to table. As the Senator knows, in our previous debate on the Neutrality Treaty this was not the invariable habit of the leadership, and I anticipate other amendments will be offered, where the vote will occur on the merits. I think in this particular case it is best to move to table, and that is my intention. But, first, I invite the Senator from Kansas to make any further remarks he may wish.

Mr. DOLE. Again, let the Senator from Kansas state that I do not want to delay the Senate. But it seems to me this is a matter of some substance, and it would be very much appreciated if we could have our amendments defeated on their merits, rather than some procedural motion to table that is not fully understood.

It seems to me there are a number of Americans who will wonder what we are doing here. We argue amendments sometimes for 2 or 3 days, and somebody stands up and moves to table the amendment, in other words, not consider it at all, and I just happen to believe that this amendment is an amendment of some substance.

I share the view expressed by the distinguished Senator from Alabama, and I do not share the arguments just made against the amendment.

We are saying that after the year 2000 there will be no troops in Panama, but Panamanian troops. It seems to me to be consistent with that policy, and also when we stop to consider we are going to relinquish a great amount of territory as soon as we ratify these treaties.

You cannot see the map, but you are going to, in effect, invite the Cuban troops to the water's edge. They can dip their fingers in the canal if they wish; for that there is no prohibition. We are going to give up bases, and there is no prohibition to prevent Torrijos from inviting Castro in to occupy the bases as we leave.

That is hard for the American people to understand. I certainly do not question the motives of any Senator, nor do I question the strategy because the votes are there. The protreaty forces have the votes. But I must say I share the views expressed by the distinguished Senator from Alabama (Mr. ALLEN). I am not so really concerned about what General Torrijos may think because if he gets this treaty approved by the Senate, he has it made. He will be in as long as he wants to be in. He does not have to stand for election every 6 years. He is not going to take the heat on why you voted for or against the Panama Canal treaties, because he is a dictator. He does not have any elections. Once we set him up with billions and billions of dollars worth of our property, he is on pretty sound ground; he is in easy street.

I do not know why there is this great anguish and concern about upsetting General Torrijos, particularly with an amendment like this which, I think, really helps the Panamanian people. It just says that between now and the year 2000, foreign troops cannot come into Panama. Our troops will be there, but as soon as this is ratified, the Panama Canal Zone is going to be shrunk drastically. In some cases, I would guess that the buffer between what was left of the zone and the water itself is less than a hundred yards, and I assume that is all part of the record. It is no secret, and this was furnished by the Panama Canal Company. I just cannot understand the opposition to this amendment unless it is that same old tired argument we have heard for 4 weeks: "We do not want another plebiscite. We do not want to amend the treaty. We cannot accept one word of change in the treaty."

I assume if you have the votes that is the strategy to adopt. But I must say again that when people ask me why I am not doing something in the Senate to strengthen the treaties, I am somewhat at a loss to explain.

It is not enough for some Americans—they do not understand that we are being stonewalled. They do not understand that the majority will not listen to amendments. I think maybe we just should use whatever time is left between now and the final vote on the Panama Canal Treaty to explain the so-called big giveaway, the bonanza to Torrijos. At least the American people ought to understand there were some Senators offering responsible amendments who could not

even get a vote up or down on their amendment.

I am about convinced there probably will not be any vote on this amendment, maybe no vote on Wednesday or Thursday or Friday. If we are asked to stand here and debate responsible amendments for 3 or 4 or 5 hours and then we are told, "Well, you cannot have a vote on it, we are going to table that amendment because it concerns us," then why do we want to relinquish the right to explain to the American people that we are unable, through parliamentary procedure and the debating process, to impress upon those who are alined with the pro-treaty forces of the seriousness of the amendment?

Now if it were frivolous or irresponsible, or offered in a series of 10 or 20 or 30 or 40 or 50 amendments, then the Senator from Kansas might agree, but this Senator has offered relatively few amendments.

As far as I am concerned, they were carefully drawn, they were carefully thought out, they were offered in the right spirit. And now we are told that "Well, we don't want to rock the boat; we don't want to rock the canal." I am convinced that the only thing we can do is spend our time talking to the American people, if we cannot impress upon our colleagues that we also have a point of view and that at least we would expect the courtesy of an up or down vote. So I just say at this point, if we cannot have an up or down vote, there will be no further votes today and there will be no further votes on Wednesday, and there will be no further votes on Thursday. I think the time has come, if we are going to lose, that we should have the right to have our efforts laid away, if those are the correct words, on their merits and not by some procedure that the American people fail to understand. The people listening to this debate do not understand what a motion to table is. They wonder what happened to our amendment. Well, it was tabled.

What do you mean it was tabled? What does that mean?

Well, it means they have more votes than I have. They do not want to face the music, and so they put it away. They laid it on the table. It was a nice quiet burial and they had more pallbearers than we had. So I think we have reached the point, and I think some of my colleagues agree, where hopefully we have enough to talk today and Wednesday and Thursday and Friday, so that if we are going to have any impact for the American people we should help them understand the process.

It seems to me that the process is frustrating, if we simply offer our amendment and then after 2 or 3 hours, or whatever, we agree that you can table our amendment. If that is the case, why offer the amendment in the first place?

The Senator from Kansas has agreed, on every amendment he has offered, to time limits. I agreed with the Senator from Maryland for 15 minutes one day on an amendment, a very serious amendment, about the military presence after the year 2000. I had 10 minutes, the Senator from Maryland had 5, and I did not quarrel with that.

Why is it that he cannot——

Mr. SARBANES. Will the Senator yield on that point?

Mr. DOLE. Yes.

Mr. SARBANES. Is it not a fact that the amendment referred to by the Senator from Kansas had been debated or the substance of that amendment had been debated at some length before the amendment was offered?

Mr. DOLE. I am just saying that I agreed.

Mr. SARBANES. Just like the pending agreement——

Is there an amendment pending now?

Mr. DOLE. No, not now.

The PRESIDING OFFICER. No, there is no amendment pending before the Senate at this time.

Mr. SARBANES. Of course, today, beginning at 11:15, when the Senator from Kansas offered his amendment until now, which is 4:15, that is 5 hours, most of our time has been devoted to talking about his amendment, in one way or another.

Although, I must say, on occasion the discussion has been much broader than the substance of the amendment, both when the amendment was pending and when the amendment was not pending. So that is 5 hours today that have been spent related to the Senator's amendment.

The previous occasion that he referred to concerning an amendment with a short time limitation, I regret that a great deal of time prior to that time limitation has been spent discussing the Senator's proposal. I do not think the Senator would quarrel with that.

Mr. DOLE. In fact, I would not quarrel with it. I have tried to point out that I have accommodated the wishes of the protreaty forces because I understand that there are other things to do in this body besides the Panama Canal Treaties. But it would seem by the same token, that maybe they can understand our point of view. I have no illusion that my amendment is going to be adopted, but I would like somebody to understand that it was defeated or rejected, instead of some mysterious act of laying it on the table. That does not make a great deal of sense to many people who are not familiar with parliamentary procedure.

What is so wrong with voting on the merits? You have as many votes for that as you have to table. Why is it that we cannot have a vote on the merits? Is it easier for some to vote to table than it is to vote against the amendment? Is that the strategy?

Apparently, it is the strategy.

Mr. SARBANES. Is the Senator asking a question?

Mr. DOLE. I am, more or less.

Mr. SARBANES. I was not quite sure whether he was asking me a direct question or making a rhetorical question. It is a little hard to differentiate between those two on occasions.

Mr. DOLE. Right.

Mr. SARBANES. Well, the Senator knows, as every other Senator knows, the motion to table is a standard parliamentary procedure in this body. We have not asked the Senator or the people on his side to relinquish any standard parliamentary procedure for dealing with matters on the floor of the Senate. It seems to me the request he is making is unreasonable. It is clear that a motion to table, in effect, kills the Senator's amendment. I do not think there is any problem in understanding that. I understand the Senator's point, though, he is going to go on forever, unless the vote is taken under the terms on which he wants it taken. That seems to me to be an unreasonable request for him to put to the proponents of the treaties.

Now the Senator may choose to follow that course. I suggest to the Senator that it is reasonable to take an appropriate amount of time to discuss amendments and then vote with respect to them, either up or down or by tabling motions. Now if the Senator wants to go on and on if it is not done in his particular way, that is of course the Senator's prerogative. Under the rules of the Senate, he may choose to proceed in that manner, but it seems to me that we ought to be able to move ahead on this matter, giving it proper consideration and then conclude so that we are then able to go on and deal with other pressing issues that are before the country.

Mr. DOLE. Well, I do not want to quarrel with that. Again, the Senator from Kansas is not trying to lead any extended debate or filibuster because in every instance I have agreed on time limits on my amendment, but I think we have an amendment here that this Senator considers to be very important.

If the Senator will look at the map of the territory we are giving Panama, and if only the American people could look at the map, I think they would understand this to be an important amendment. There are lots of things I would rather do than stand here and debate this amendment. There are lots of other things I would rather do than see it tabled. If the Senator has the votes to kill it, why not just kill it outright? Why the indirect method?

I guess there were a very few occasions in all those amendments we considered in the past several weeks where they pumped up-and-down votes on the Scott amendment and the so-called leadership amendments, and maybe an isolated one or two other than that.

Mr. CHURCH. There are five up-or-down votes, for the Senator's information.

Mr. DOLE. Well, let us have——

Mr. CHURCH. We are sure we will. We will have 8 or 10 before this debate is over, but to suggest that there is something conspiratorial in making a motion to table comes as a surprise to me.

Mr. DOLE. I am not suggesting it is conspiratorial.

Mr. CHURCH. Since the Senate normally uses the motion to table in connection with all of its legislative work.

Nor do I think it is such a great mystery to the people of the United States what a motion to table means. It means what it says: Lay the amendment on the table; to put it aside, and that

is one way of disposing of an amendment.

As a matter of fact, it has the added advantage of bringing debate to an end. The extent of this debate, which has now gone—we are in the sixth week of this debate. The most important alliance the United States ever entered, the NATO alliance, was debated for only 11 days in the Senate. Here we are in the sixth week on the Panama Canal Treaties, and I must say that every aspect of the treaty has been gone over and over and over and over again. If this debate were confined to new arguments it would soon be over.

Mr. DOLE. I might ask the Senator on that——

Mr. CHURCH. I must say to the Senator, this lecture to which we are being subjected about the impropriety of motions to table is not at all reflective of the normal procedures of the Senate, as the Senator well knows.

Mr. DOLE. Well, I would only say that we have had a number of lectures in this body and some I have listened to and some I have avoided. So I am not trying to lecture the Senate.

Mr. SARBANES. Will the Senator yield for a question at this point?

Mr. DOLE. Well, I want to ask the Senator from Idaho a question.

Mr. SARBANES. Just on the lectures.

Mr. DOLE. Right.

Mr. SARBANES. I was not clear whether you had listened to or avoided your own lectures, in particular the one that we just received.

Mr. DOLE. Well, you do not have to listen to what you say yourself because it depends on what you are talking about.

Mr. SARBANES. I thank the Senator for yielding. I think if we do not keep some sense of humor as we move things along here we may not survive. Now, the Senator and all of us know that a motion to table is a standard parliamentary procedure. The Senator makes great use of this at times. I do not mind him engaging in some rhetoric, for purposes of the airways with respect to it, but to then go on from that to assert the position that he intends to go on and on and on forever, with respect to this matter, unless the proponents relinquish standard techniques for considering matters on the floor of the Senate seems to me to be a short, narrowly unreasonable suggestion from the Senator from Kansas, and I must say not of the sort that he is usually given to making.

So I am somewhat taken by surprise with his approach to this matter, and I would hope that we would be able to proceed reasonably with respect to these items or to a determinative end of this matter and finally vote on the Panama Canal Treaty, and go on to all of the other business that faces the country.

Mr. DOLE. I appreciate the Senator's concern about the other business of the country and the Senator's concern about the treaty.

I will say again that this Senator has not engaged in any extended debate in this particular instance. I have had the pleasure, in years past, once for a period of 7 weeks, of engaging in debate with the distinguished Senator from Idaho on the famous Cooper-Church amendment. I was on one side and he was on the other. We were here for 7 weeks. I was so confused after 7 weeks, I finally ended up voting for the Cooper-Church amendment. [Laughter.]

The point is that we understood that we were really in extended debate, and that was very extended. I think it was an exercise. I agreed with the distinguished Senator from Idaho. I may agree with him on something else next year or this year or sometime.

The point is that now we are discussing what I consider to be the key amendment to the Panama Canal Treaty. I do not want to appear to be arbitrary or to be an obstructionist in any way, but it is a matter of some concern to me that we have an up or down vote. I will not discuss that now because there is no amendment pending. I will call it up later this week. Maybe I should bring it up again on Wednesday or Thursday.

I wanted to see if the distinguished Senator from Idaho and the distinguished Senator from Maryland had the same view of the treaty in its present form as the Senator from Indiana (Mr. BAYH) expressed this morning. If the treaties are approved and ratified, if everything happens according to the plan of the pro-treaty forces, and let us just say the worst possible thing happens and Cuban troops go into Panama 5 years from now, is that a threat to the security of the canal, so far as the distinguished floor leader's pro-treaty forces are concerned? Would that bring about a response from the United States?

Mr. SARBANES. Will the Senator yield?

Mr. DOLE. Yes.

Mr. SARBANES. If the United States would so view it. That would be our judgment to make. We would take a look at it and we would make a determination.

Mr. DOLE. Just the mere presence of Cuban troops would not be a threat?

Mr. SARBANES. That would be our judgment to make. Cuba might be a different place at that point, for all I know. There might be a wholly changed situation.

All I am saying is that if anything takes place which creates the possibility of endangering the regime of neutrality, the United States is entitled to act to prevent that from happening. We make the judgment.

Mr. DOLE. The point that worries the Senator from Kansas is the very thing we are discussing. If there is some assurance that we are already protected without the amendment, if the amendment does do serious damage to our relation with Panama, I might accept that argument.

Mr. SARBANES. Will the Senator yield at that point?

Mr. DOLE. Yes.

Mr. SARBANES. We maintain American military presence in Panama over the next 22 years. It is a significant presence in terms of the facilities and installations retained by us first of all, as it were, completely under our operation, and, second, other facilities and installations shared jointly with the Panamanians.

Furthermore, there is projected under the treaties a program for working cooperatively with the Panamanian military with respect to protecting and defending the canal. So we will have a presence—a real presence—until the end of the century. As to the further condition which the Senator is now seeking, we do not have with any country where we have an American presence or arrangement such a condition. The Senator is asking the country to foreswear control over its own territory. Even at the moment, even with the treaty of 1903, Panama has the right, if they choose to do it—and they have never chosen to do it—to have foreign troops on Panamanian soil. They have never done that over the course of our long-standing relationship.

We will continue to have an American military presence for the next 22 years, as long a term, I might point out to the Senator from Kansas, as we have anywhere else in the world. This was, of course, an important matter which was negotiated between the parties in the course of arriving at these treaties.

I do not know what the situation is of which the Senator is so fearful. We are on the ground and in a position to handle any situation which comes along.

Mr. DOLE. Earlier I referred to Ethiopia and the fact that I was glad there was no canal there. They too had been traditional friends and allies, up until a few years ago.

Mr. SARBANES. If the Senator will yield, the post-2000 treaty, when there will not be an American military presence in Panama any longer, precludes foreign troops. In the period up to the year 2000, when there will continue to be an American military presence in Panama, with all of the sites and facilities our people judge they need, does not carry that prohibition with it because it is judged that it is not needed; second, we do not have it anywhere else, with any other country, where we ask them to do that. Our presence is there. They have agreed to that. We have judged that having our presence there is adequate to defending and protecting the situation.

I think the American presence there which we will keep through this treaty, and the arrangement under the treaty, is more than adequate for us to be in a position to protect and defend the canal.

Mr. DOLE. If we rely on that argument, I believe we invite trouble. It underestimates Soviet intentions. Maybe the Senator from Kansas is wrong and the Senator from Maryland is correct, but I think we at least have to think about the Soviet-Cuban determination. It seems to me we might be inviting conflict over the sovereignty issue if, in fact, they were invited into the area, which is now protected by a 5-mile cordon on either side of the canal. It will be very much reduced. They could almost be at the water's edge.

That is the reason I posed the question: When do we concern ourselves with sovereignty? Is it when somebody is

there, or do we hope it never happens? Do we raise it now in a friendly atmosphere in the debate on the treaty by offering some amendment? Let me again indicate in response to an earlier statement by the Senator from Idaho that, as far as this Senator is concerned, there is no anti-Panamanian feeling. That is not the reason that amendments are offered.

I just believe that, rather than discuss this amendment any more today, since it appears that, once it is offered, it will be tabled, the Senator from Kansas will yield the floor. Perhaps some other amendment can be brought up and disposed of, so we shall not delay the process. Perhaps in the interim of the time the distinguished Senator from Wyoming is discussing his amendment, we can work out an agreement on a vote on this amendment.

I yield the floor.

Mr. WALLOP. Mr. President, I intend to call up an amendment. I share the frustration of the Senator from Kansas concerning the constant tabling motions on amendments of a serious nature which do more by way of protecting people from the consequences of their vote than they do by way of trying to end debate. I have no doubt that, if the Senator from Kansas could get an up or down vote on his amendment, he would end debate immediately and bring it to a vote of the Senate. I tried, a few minutes ago, to arrange for an up or down vote on this amendment and a time limitation and it was rejected summarily, even before treaty proponents had read the amendment. I am beginning to suspect that it is the word "amendment," not the words of the amendment, that is troubling the sponsors of this treaty.

It is with a feeling of some sense of sadness that I see in the proponents the unwillingness to have the highly visible nature of an up or down vote. I do, really, honestly believe that the word, "amendment," troubles them more than the words of any amendment that has been offered.

I think the Senator from Idaho would agree that there have been a number of amendments which I have voted to table along with them because I thought they were not in the interest of constructing a treaty. Nevertheless, and knowing full well that the motion will be made to table this, I send an amendment to the desk and ask that it be stated.

UP AMENDMENT NO. 13

The PRESIDING OFFICER. The amendment will be stated.

The second assistant legislative clerk read as follows:

The Senator from Wyoming (Mr. WALLOP) proposes an unprinted amendment numbered 13.

Mr. WALLOP. I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

At the end of Article 1, add the following:

"5. Notwithstanding the provisions of the first paragraph of this Article, if the Republic of Panama abrogates any provision of this Treaty or of the Treaty Concerning the Permanent Neutrality and Operation of the Panama Canal, all of the provisions of both treaties shall terminate, and the provisions of any treaty, convention, agreement, memorandum of understanding, or exchange of notes terminated or superseded under the first paragraph of this Article shall reenter into force.".

Mr. WALLOP. Mr. President, this amendment is designed to deal with the contingencies that would take place should the treaty be abrogated. It is not an item that has been brought up or considered by the Senate. The Senator from Idaho has correctly characterized some of this debate as being stated, restated and restated over the same issues. To my knowledge, this is not an issue which has been brought to the attention of the Senate. Simply stated, it would provide that, if the treaty is abrogated, we would return to the status quo.

There is, I think, great public concern in America over what happens if these new treaties between the United States and Panama are abrogated or, in layman's terms, broken. It is unclear what action the United States could legally and morally take should that event occur. I think it is the obligation of everyone to clarify what would happen if these treaties are broken. I bring it up because, in my trip to Panama, not only Panamanians but Zonians and American businessman in Panama and other places, consistently told me that they expected this to be but the first of perhaps three treaties between now and the year 2000; people on all sides of the issues—those who supported it and those who opposed it. If that is the case, then the country that we are dealing with and ourselves and bystanders with varying degrees of interest are not dealing in good faith for the future through the year 2000.

If that is the case as well, and there is not even the dignity of an extended negotiation for a new treaty and they are simply broken, then the American people ought to know and the world ought to know to what standard we would revert. The standard that I propose is recognizable, and it should be, by both parties and it should have standing in the world's mind. The world should understand what the situation would be should that take place. My amendment will make it clear what will happen if Panama abrogates the treaty: Then all other agreements and treaties we had with the Panamanians reenter into force. We return, in fact, to the status quo of pre-1977 treaty standards.

Article I, paragraph 1, of the Panama Canal Treaty terminates and supersedes all major agreements we have with the Republic of Panama. It states:

ARTICLE I

ABROGATION OF PRIOR TREATIES AND ESTABLISHMENT OF A NEW RELATIONSHIP

1. Upon its entry into force, this Treaty terminates and supersedes:

(a) The Isthmian Canal Convention between the United States of America and the Republic of Panama, signed at Washington, November 18, 1903;

(b) The Treaty of Friendship and Cooperation signed at Washington, March 2, 1936, and the Treaty of Mutual Understanding and Cooperation and the related Memorandum of Understanding Reached, signed at Panama, January 25, 1955, between the United States of America and the Republic of Panama;

(c) All other treaties, conventions, agreements and exchanges of notes between the United States of America and the Republic of Panama, concerning the Panama Canal which were in force prior to the entry into force of this Treaty; and

(d) Provisions concerning the Panama Canal which appear in other treaties, conventions, agreements and exchanges of notes between the United States of America and the Republic of Panama which were in force prior to the entry into force of this Treaty.

So, should there be an abrogation, we would know to what standard we would return. My amendment does not alter any of the treaty's terms. In fact, if the Panamanians live up to the terms of the new treaty, then my amendment will lie unused in those dusty files to which unused international agreements are rightfully consigned.

This amendment assures one thing: That whatever treaties the United States agrees to, will indeed govern the relationship between the United States and Panama. They will not prove to be mere way-stations on the road to abrogation and early ejection of American forces from the canal. It provides strong second-thought medicine to any Panamanian leader who might contemplate abusing any treaty provision governing the canal. The amendment does this by providing a simple legal basis for remaining in or returning to military positions in the zone in the event Panama breaks the treaty.

The administration's primary argument for these treaties is that the Panamanians' ill feelings toward the United States make necessary our gradual surrender of the canal to them. As they gradually assume control, so goes the argument, the Panamanians' feelings toward us will improve; a sort of prolonged and gigantic valium that we are administering to the relations between this country and Panama.

The theory also goes that taking this great tranquilizer, they will consequently work with us to keep the canal open, neutral, and secure.

It is reasonable that it should be so, and so it may well be. But unfortunately, Mr. President, the approval of treaties like these could just as well be followed by other developments. The Torrijos regime, or another more inclined toward our enemies—and Torrijos, despite claims to the contrary on this floor, is a mortal man and could die, be replaced, retire, or we could have another individual more inclined toward our enemies who could be emboldened by what he considers a show of weakness in Panama, or elsewhere in the world—to use the grant of sovereign rights to harass Americans, to find pretexts for abrogating the treaties, ordering American forces to leave, and to invite armed personnel from hostile countries to assist them. If the treaties are not amended as I suggest, we would then have no choice but to sit helpless or to act militarily without basis in law—that is to say, to commit aggression, something which is not and has not been the habit of this country.

Every nation has the sovereign right to enter into treaties and to render them inapplicable in the territory over which it exercises sovereignty. It follows that this right is limited to—and does not extend beyond—any nation's sovereign reach. No nation can make or unmake treaties except on behalf of areas where it has the sovereign right to make and unmake other laws. Today the Republic of Panama does not exercise sovereign rights over the Canal Zone. Since 1903, Panama has agreed that the United States should exercise all such rights in the zone. Today under the unique status established in 1903, the Republic of Panama can neither make nor break treaties binding the Canal Zone for the same reason that it cannot effect ordinary legislation there.

Should the treaty presently before us be ratified, the Republic of Panama would assume plenary sovereign rights over the zone. Panama would then be in the new position of making and unmaking all laws—including treaties—on behalf of the former zone on its own authority alone. Panama could then abrogate the 1978 treaties by fiat. It could not exercise the sovereign right to abrogate the treaty of 1903 because that regards a zone over which Panama exercises no sovereign right.

The treaty of 1903, and its subsequent modifications, like all other treaties which transfer sovereign rights in perpetuity, belongs to a well-defined category in international law. Consider how such treaties differ from ones which provide either for payment or for the performance of certain acts. In these cases, unilateral abrogation might constitute the international equivalent of theft or breach of contract. But sovereign rights are a different matter, the very stuff of which nations and national interests are composed.

Mr. President, this amendment provides us with a legal and a moral foothold in the case of unilateral abrogation by Panama. I would point out, if it is their intent to abide by the terms of the treaties, and other more evil influences on the world's stage do not orchestrate or instigate an abrogation, no one will ever know of this amendment, no sovereignty subject to it, no national loss of face be compelled by it. I hope that if the treaties are ratified the promised new relationship with Panama will be estimated and neither Panama's present or subsequent leaders will ever consider abrogation. But should such unfortunate events ever occur, the United States, no, the world's commerce is provided with no contingency plans under this treaty as drafted. Our commerce, South America's commerce, and the world's commerce, all need the assurances of the contingency provided by my admendment.

The world's economic structure depends, in large measure, on the stability of this canal over the years to come, especially in light of energy crises and the existing facts that the trip around the horn not only makes some commercial routes impractical, some commerce impossible, but all more expensive and all longer to take place.

We need assurances. We need a contingency in the world.

We know, Panama knows, and the world knows what the present structure is. It is no mystery. It is something everybody could rely on, that we go back.

The amendment is, in fact, simple reassurance to ourselves and to Panama.

Mr. President, I ask that this body adopt the amendment. I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second?

There is not a sufficient second.

Mr. WALLOP. Mr. President, I suggested the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The second assistant legislative clerk proceeded to call the roll.

Mr. WALLOP. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. WALLOP. Mr. President, I call on the Senate for adoption of my amendment. I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from Wyoming. The yeas and nays have been ordered and the clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. DURKIN addressed the Chair.

SEVERAL SENATORS. Vote! Vote!

Mr. DURKIN addressed the Chair.

Mr. DURKIN. Mr. President, I move to table.

Mr. WALLOP. Mr. President, the rollcall is underway.

Mr. DURKIN. A point of order. The rollcall has not been answered.

Mr. WALLOP. The rollcall is underway.

The PRESIDING OFFICER. There had not been a response.

Does the Senator from New Hampshire seek the floor?

Mr. DURKIN. I do, Mr. President.

Mr. WALLOP. Mr. President, a point of order. A rollcall was underway. Mr. ABOUREZK's name had been called.

Mr. DURKIN. No one had responded.

The PRESIDING OFFICER. The Chair already has ruled that the rollcall had not been responded to by any Member of the Senate. Therefore, the rollcall had not started.

The Senator from New Hampshire.

Mr. CURTIS. A parliamentary inquiry, Mr. President.

The PRESIDING OFFICER. The Senator from Nebraska will state the parliamentary inquiry.

Mr. CURTIS. Suppose the Senator whose name was called would appear at this time and state that he wants to answer? Would that mean the rollcall was in progress or not?

The PRESIDING OFFICER. No, it would not.

Mr. DURKIN. Mr. President, I move to table, and I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

The PRESIDING OFFICER. The question is on agreeing to the motion to table the amendment of the Senator from Wyoming. On this question the yeas and nays have been ordered, and the clerk will call the roll.

The legislative clerk called the roll.

Mr. CRANSTON. I announce that the Senator from Alaska (Mr. GRAVEL), the Senator from Colorado (Mr. HASKELL), the Senator from Maine (Mr. HATHAWAY), the Senator from Kentucky (Mr. HUDDLESTON), the Senator from Maine (Mr. MUSKIE), the Senator from Alabama (Mr. SPARKMAN), and the Senator from Mississippi (Mr. STENNIS) are necessarily absent.

Mr. STEVENS. I announce that the Senator from Tennessee (Mr. BAKER), the Senator from Arizona (Mr. GOLDWATER), the Senator from Michigan (Mr. GRIFFIN), the Senator from Illinois (Mr. PERCY), and the Senator from Pennsylvania (Mr. SCHWEIKER) are necessarily absent.

I also announce that the Senator from Maryland (Mr. MATHIAS) is absent to attend the funeral of a former Senator.

The result was announced—yeas 50, nays 37, as follows:

[Rollcall Vote No. 67 Ex.]

YEAS—50

Abourezk	Hart	Metzenbaum
Anderson	Hayakawa	Morgan
Bayh	Heinz	Moynihan
Bentsen	Hodges	Nelson
Biden	Hollings	Pearson
Bumpers	Humphrey	Pell
Byrd, Robert C.	Inouye	Proxmire
Case	Jackson	Ribicoff
Chafee	Javits	Riegle
Church	Johnston	Sarbanes
Clark	Kennedy	Sasser
Cranston	Leahy	Stafford
Culver	Long	Stevenson
Danforth	Magnuson	Stone
Durkin	Matsunaga	Weicker
Eagleton	McGovern	Williams
Glenn	McIntyre	

NAYS—37

Allen	Ford	Packwood
Bartlett	Garn	Randolph
Bellmon	Hansen	Roth
Brooke	Hatch	Schmitt
Burdick	Hatfield,	Scott
Byrd,	Mark O.	Stevens
Harry F., Jr.	Hatfield,	Talmadge
Cannon	Paul G.	Thurmond
Chiles	Helms	Tower
Curtis	Laxalt	Wallop
DeConcini	Lugar	Young
Dole	McClure	Zorinsky
Domenici	Melcher	
Eastland	Nunn	

NOT VOTING—13

Baker	Hathaway	Schweiker
Goldwater	Huddleston	Sparkman
Gravel	Mathias	Stennis
Griffin	Muskie	
Haskell	Percy	

So the motion to table Mr. WALLOP's amendment (No. 13) was agreed to.

Mr. CHURCH. Mr. President, I move to reconsider the vote by which the motion to lay on the table was agreed to.

Mr. SARBANES. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. WALLOP addressed the Chair.

The PRESIDING OFFICER (Mr. MOYNIHAN). The Senator from Wyoming.

Mr. WALLOP. Mr. President, when I

called up that amendment, I said I fully expected it to be tabled.

The PRESIDING OFFICER. If the Senator will suspend, the Senate is not in order. Senators will kindly take their seats. The Senator from Wyoming is addressing the Chamber.

The Senator from Wyoming.

Mr. WALLOP. Mr. President, when I called up that amendment I said that I was certain that it would be tabled, and I was not disappointed in that. But, Mr. President, I also said that one of the things that the proponents of this treaty are unwilling to do is to look at any amendment on the face of it. We have as pure an example of that unbridled use of power as you could imagine on this amendment. They did not raise one argument against it. There was not one word spoken against that amendment, not one. They walked in. They refused the up and down vote, had to bend the rules to achieve that and they moved to table without a single word in argument.

Mr. ROBERT C. BYRD. Mr. President, will the Senator yield?

Mr. WALLOP. I yield.

Mr. ROBERT C. BYRD. How were the rules bent to achieve that?

Mr. WALLOP. Mr. President, if I may respond to the majority leader, the rollcall had begun.

Mr. ROBERT C. BYRD. Had there been a response?

Mr. WALLOP. There had not.

Mr. ROBERT C. BYRD. Then the rules were not bent.

Mr. WALLOP. The second name had been called and the response was about to be given when that took place.

Regardless of that point, no one is interested in what these amendments say. The proponents are not interested in any logical argument that can be brought up about anything. They are more frightened of the word "amendment" than the words in any amendment.

I think this is a good explanation to the American people of what is happening right here. The most interesting part of this situation is that it was an unprinted amendment, it was uncirculated, it was not read by the clerk in its entirety, and the proponents of the treaty did not even ask to see it. All they did was to call for the tabling of this amendment without raising one single argument.

Mr. BROOKE. Mr. President, will the Senator yield?

Mr. WALLOP. I doubt if anyone over there had the foggiest notion of what it said until after the tabling motion. It is typical of the way this thing is being run and it is not in behalf of the American people. It is in behalf of a power play. They are not interested in logic. They are not interested in the future of the country. They are simply interested in tabling anything.

Mr. BROOKE. Mr. President, will the Senator yield?

Mr. WALLOP. I yield to the Senator from Massachusetts.

Mr. ALLEN. Mr. President, let us have order.

The PRESIDING OFFICER. The Senate will be in order. The Senator from Wyoming has yielded to the Senator from Massachusetts.

The Senator from Massachusetts.

Mr. BROOKE. Mr. President, I thank my distinguished colleague from Wyoming for yielding.

Mr. President, I am very sensitive to what the Senator from Wyoming has said. Not only am I sensitive, but I am sympathetic to what he said. I think he makes a very strong point. I ultimately voted for the Neutrality Treaty, but I have consistently voted against every motion to table amendments, understandings, or reservations to that treaty, and I will continue to do so regarding the pending treaty. On this particular amendment I would vote no if an up-or-down vote were permitted.

I think both the administration and the proponents of these treaties are making a big mistake in not allowing any substantive amendments to be voted up or down by this body.

The only argument they have given is that if we in any way alter these treaties they will have to go back for a plebiscite in Panama. Mr. President, that is not our business. That is the Panamanians' business. I do not think we ought to have these treaties, which are important to the American people, important to our country, be voted favorably upon without amendment because of the threat of a plebiscite in Panama any more than I think we ought to have these treaties acted favorably upon because of a fear of violence in Panama or elsewhere. These should not be criteria by which we make our judgments pro or con on this matter.

If ever this Nation begins to make its policy, our foreign policy, based on the fear of violence anyplace around the world, we are traveling a very, very dangerous road, and we may encourage that perception by the way we argue substantive amendments and act upon them.

Obviously, the votes were here to defeat the proposal of the Senator from Wyoming. He knew that, he said that. But at least he was entitled to an up-or-down vote. And although I would have voted against his amendment I still believe he deserved an up-or-down vote.

He ought not to be subjected to a motion to table. The Senator from Kansas (Mr. DOLE) has an amendment that he believes in, and has been talking about it for many hours today. But he refused to have it brought up because he knew it would be subjected to a motion to table.

I think it is not in the best interests of the proponents of these treaties to continue this practice and procedure of filing motions to table every amendment that comes on the floor. Some of them may be frivolous, to be sure. But some of them are substantive and meaningful amendments that would strengthen the treaties in the best interests of the United States, and even assure the proponents of the passage of these treaties.

I make this statement very seriously, very somberly, and very soberly, and I make it in the best interests of this country because I think we are making a big mistake if we think that the only people concerned about the Panama Canal treaties are a group of extreme conservatives in this Nation.

There is a large segment of the American people who are seriously concerned about it, who maybe do not have all the facts about it, and who may perceive that they are being denied facts about it if we continue to proceed as we did on the Neutrality Treaty; namely, tabling substantive amendments that come up for consideration.

So I again say to the administration and I say most respectfully to the leadership and to the floor manager of this bill, for whom I have great respect, that at least in one Senator's opinion—and I think in other as well—this is not the proper procedure to follow. It is self-defeating, and you may rue the day that you make decisions or continue this practice and this procedure.

At least give these amendments an opportunity to be heard and to be voted upon without a motion to table. So I just want to say to my distinguished colleague from Wyoming I know why he is incensed, and he is justifiably incensed, and that his feeling about this is shared by others of us in this Senate who may have even voted on the other side of the first treaty, but who conceivably might vote on the other side of this treaty.

Mr. MATSUNAGA. Mr. President, will the Senator from Wyoming yield for a question?

Mr. WALLOP. I will in a minute as soon as I respond to the kind remarks of my friend from Massachusetts.

My point is that I expected a motion to table. I did not want it. I had asked for an up or down vote. I had even sought to make a time arrangement to achieve that. But more than that I think the amendment was entitled at least to the dignity of a response.

I think there may be arguments against it, but they were never brought up and nobody ever made any kind of a move whatsoever to argue against it but merely to table it, and I do not think it is in the interest of America, in the interest of the proponents or the opponents to willy-nilly dismiss out of hand any arguments that may have been made.

I do not say mine were the most compelling in the world. I took some time with them, and I thought the amendment out, and I did not put it on the table in a frivolous manner. I was serious about it because I do not think there is any provision for this country, in the event that Panama were to abrogate the treaty, and I brought up my amendment with all due seriousness.

So, Mr. President, I do thank the Senator from Massachusetts.

I yield now to the Senator from Idaho and then to my friend from Wyoming, and then from Alaska.

Mr. CHURCH. Mr. President, I want to say to my good friend from Wyoming I appreciate fully his irritation, and I want to say further to him that it was not my intention to ignore his argument. As a matter of fact, I believe that, at all times I have been on the floor, I have responded to the arguments made on behalf of all amendments. I have tried to state the case against them for the treaty proponents.

I also want to say that I did not regard the Senator's amendment as frivo-

lous. It just happened that I was called into the majority leader's office at the time the Senator was making his case for the amendment. I had anticipated that I would come back in time to respond.

The Senator's amendment was an unprinted amendment. I wanted to look at it first and to hear the Senator's argument.

While I was in the majority leader's office the bells rang signifying a vote. I came back onto the floor and discovered that the Senator had called for a rollcall vote, when the Senator from New Hampshire (Mr. DURKIN) temporarily occupied my chair. Mr. DURKIN jumped to his feet, made the motion to table, which was entirely within his rights. But that was not the way I had thought the matter would go.

I came back onto the floor, and discovered we were already voting on the motion to table.

So I want the Senator to know he has my apologies. It had been my intention to respond. He is quite right, he was entitled to a response. I would be willing to give it to him now, even after the event, but I am sorry that circumstances were such that I was not on the floor at the moment that the vote was called so that I could have responded in a timely manner to the Senator.

Mr. WALLOP. I thank the Senator from Idaho. I hope that at some time should something very similar to this occur that a motion to table would not be made because it is entitled to a full airing as an idea.

Mr. CHURCH. May I just add one other thing? It has not been the monolithic rule of those of us managing the treaty to move to table every amendment. When we had the last treaty up for consideration, a number of times we did vote up or down; I believe five or six times we voted that way. I am sure we will be voting up or down during the debate on this treaty as well. But, in any event, whether we vote on the merits or vote on a motion to table, the Senator was entitled to a response. His amendment was seriously intended, and had I been on the floor he would have received that courtesy.

Mr. BROOKE. Mr. President, will the Senator from Idaho yield for just a question? If the Senator from Wyoming will yield I would ask the Senator from Idaho to yield.

The PRESIDING OFFICER. The Senator from Wyoming has the floor.

Mr. WALLOP. I yield for the purpose that a question might be directed to the Senator from Idaho.

Mr. BROOKE. The distinguished Senator from Idaho is the floor manager of the treaty. Could the Senator tell me whether they have changed the strategy and that so far as the second treaty is concerned that there is not going to be an accepted procedure or strategy to enter a motion to table every amendment that is offered on the floor?

Mr. CHURCH. The Senator is correct; but there has been no change in strategy. As we had votes up or down on a number of amendments during our consideration of the Neutrality Treaty, so I anticipate we will have votes up or down on some amendments during our consideration of the Panama Canal Treaty.

Mr. BROOKE. But the only meaningful amendments, as I recall, to the Neutrality Treaty on which we had up or down votes, really, were the two so-called leadership amendments, where the Senator knew that he had sufficient votes to pass them. Those were the only meaningful amendments that I recall.

Mr. CHURCH. Well, I am sure that the Senator——

Mr. BROOKE. After they had been accepted, obviously, by the administration.

Mr. CHURCH. I am sure the Senator would not object if I referred to the RECORD, and pointed out that, in addition to the up or down votes on the leadership amendments, we also had an up or down vote on amendment No. 2, offered by the Senator from Virginia (Mr. SCOTT); we had an up or down vote on amendment No. 3, offered by the Senator from Utah (Mr. HATCH); and we had an up or down vote on amendment No. 47, offered by the Senator from Alabama (Mr. ALLEN).

Mr. BROOKE. And will the Senator, for contrast, state the number of amendments that we had motions to table on?

Mr. CHURCH. In most cases, amendments were handled by motions to table, but there were at least five exceptions to that rule, as the record shows.

Mr. BROOKE. Is it the Senator's intention to permit up or down votes on amendments to this second treaty?

Mr. CHURCH. Yes; there has been no change in the strategy, and there is no intent on the part of the Senator from Idaho to insist on motions to table in every case.

Mr. BROOKE. Will the Senator from Idaho enlighten the Senator from Massachusetts and the Senate, really, as to what basis will be used to make the decision as to whether up or down votes or votes on motions to table will be permitted?

Mr. CHURCH. Well, I think the decision will be made on a case-by-case basis, on the merits of the amendments and also on the propriety for considering the subject matter in the form of a reservation rather than changing the actual text of the treaty.

Mr. BROOKE. What was the basis the Senator used for not permitting an up or down vote on the Dole amendment?

Mr. CHURCH. Well, I would say to the Senator that I thought that the Dole amendment should be rejected on its merits, but in addition to that, if it is the disposition of the Senate to impose an explicit obligation upon Panama to refrain from permitting foreign troops on Panamanian soil while American troops are there, in addition to its promise not to permit foreign troops on Panamanian soil after American troops leave, then I believe that ought to be done in the form of a reservation, not in the form of an amendment to the text of the treaty.

Mr. BROOKE. That is the reason?

Mr. CHURCH. That was the reason why I felt the best way to proceed with the Dole amendment would be with a motion to table.

Mr. BROOKE. I thank the Senator.

Mr. WALLOP. Mr. President, I would say to the proponents of the treaty that Senator STEVENS and I will offer a very similar amendment to the last article of the treaty, and I hope that a point of order on the basis that it had been a subject considered by the Senate will not be raised against it, because I do not think that the issue was fully aired; certainly, no arguments were made against it.

Mr. CHURCH. I would be happy to oblige the Senator in that respect. He now understands the circumstances of the peremptory vote on his amendment?

Mr. WALLOP. Yes, I do. I appreciate the Senator's courtesy, and I yield to my colleague from Wyoming (Mr. HANSEN).

Mr. HANSEN. Mr. President, I shall not be long. I do want to say, though, that I think we have had some very scholarly efforts made by a number of Senators to help explain and make sure that all of us may understand what the issues are—and they are very intricate indeed—as we consider the two treaties before us, one of which has already been ratified by the Senate.

The PRESIDING OFFICER. The Senate is not in order. Senators will please take seats. The Senator from Wyoming is addressing the Senate, and is entitled to be heard.

Mr. HANSEN. But I do want to pay particular tribute to the Senator from Michigan (Mr. GRIFFIN) and to the Senator from Alaska (Mr. STEVENS). I think that the research that preceded their offering amendments on the floor was very scholarly, very much in depth, and certainly would have presented the sort of issues to the Senate that, by any measure, by any rational consideration, deserved an up or down vote.

Now, it is my recollection that Senator GRIFFIN's amendment was tabled, and I think the same fate befell the amendment of Senator STEVENS. I believe that the people of the United States had a right to expect that Senators would be called upon to vote up or down on issues of the importance that I attach to those two amendments. It seems unfortunate indeed that, as we undertake the extensive and exhaustive deliberations on these treaties, we think it is not worthwhile to have each of us declare and go on record as to whether we favor or reject a particular amendment, as is done when we vote up or down on a motion to lay on the table rather than voting up or down on the issues. I do not believe we are encouraging the American people to believe we are as open and forthright in the consideration of these treaties as they would hope that we might be. I deplore the fact that we have pretty well established a technique for disposing of any amendment that is not looked upon with favor by the leadership—and when I say that, I include both the Republican and Democratic leadership, because as we all know, Senator BAKER has been going along, and I am not criticizing him, with the Democratic leadership in trying to get these treaties ratified.

I believe we would do a far better job

than we have done so far if we would vote up or down on these issues, and I am sorry that my colleague from Wyoming was not afforded the satisfaction of having Senators record their feelings on the merits of the amendment that he proposed, instead of having it handled in the peremptory fashion that was attached to it.

I am encouraged by what one of the prime sponsors of the treaty, the Senator from Idaho (Mr. CHURCH), has said about his willingness to permit up or down votes on substantive issues. I hope we will see that carried out in practice.

I thank my colleague from Wyoming.

Several Senators addressed the Chair.

Mr. WALLOP. Mr. President, I will yield in a moment, after I make one further comment, to thank my colleague from Wyoming (Mr. HANSEN) for his contribution.

The PRESIDING OFFICER. Will Senators wishing to converse please retire to the cloakrooms? The Senate is not in order. The Senate will please come to order.

The Senator from Wyoming may proceed.

Mr. WALLOP. I thank the Chair. While the argument that I advanced may not have been the most compelling argument in the world, it was infinitely more compelling than any argument that was raised against it.

I yield to the Senator from North Dakota.

Mr. YOUNG. Mr. President, a most unusual thing happened to me last Saturday. The State commanders of the American Legion, the VFW, and the DAV called to thank me personally for my vote on Thursday against the Panama Canal Treaty. Charges have been made that only the real conservative organizations are opposing these treaties. You could not get much better representative of the thinking of good responsible thinking, I do not believe, than these three national veterans' organizations. This is the first time in 33 years that I have been in the Senate that those three leaders have called to thank me for a vote. This is the most unusual thing that has ever happened to me.

Mr. SCOTT. Mr. President, I have listened to the comments that have been made by a number of Senators, including the concern of the Senator from Massachusetts about the motions to table the great bulk of the amendments that have been offered, and I would say that is also true of the understandings and other efforts to change the treaties somewhat.

It is my understanding that only under Panamanian law, only the amendments, the contents of the treaty are considered to be binding on the Panamanian Government.

I am concerned that when these various amendments come up, the floor manager of the bill indicates that if we adopt an amendment, that Mr. Torrijos, the dictator of Panama, will not accept it and perhaps it will mean that the treaty will be vitiated; that it will not become a reality.

Well, now, you know, Mr. President, when I hear about the concern of General Torrijos it reminds me of the Uncle Remus story, the story of Brer Rabbit and the fox, and I believe that every Member of the Senate is familiar with this statement and whether the fox was going to drown the rabbit, the fox was going to burn the rabbit up, and the fox was going to do great harm and kill Brer Rabbit, and in many ways Brer Rabbit, each time, said, "Well, go ahead and do that but please don't throw me in the briar patch."

And Brer Rabbit finally was thrown in the briar patch. He was not drowned. He was not burned. No harm came to him.

And he said, "I was born and reared in the briar patch."

I have a hunch that General Torrijos, after final action is taken on these treaties and we have acceded to his demands that we not have any amendments to the treaty, he will be glad that he has the title, the sovereignty, the control that he can do with this canal as he damn well pleases, and that is against the best interests of this United States.

I feel that we should amend or should reject these treaties.

Mr. LAXALT. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. What is the will of the Senate?

Mr. LAXALT. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The Senator from Maryland.

Mr. SARBANES. I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. SARBANES. Mr. President, is there an amendment pending at the desk?

The PRESIDING OFFICER. There is no amendment pending at the desk.

Mr. SARBANES. To article I.

The PRESIDING OFFICER. The Senator from Maryland has the floor.

Mr. ALLEN. I have an amendment.

Mr. SARBANES. Do I understand that the Senator from Alabama wishes to call up an amendment?

Mr. ALLEN. I have an amendment at the desk. I wrote it out just a moment ago. I ask that the clerk read my amendment.

The PRESIDING OFFICER. Is there a suggestion that we should call up his amendment?

Mr. ALLEN. I do not particularly care to call it up at this moment unless we have an understanding as to whether there will be a motion to table prior to being given an opportunity to discuss the amendment.

I wonder if we might inquire of the distinguished majority leader if other votes tonight are anticipated?

Mr. ROBERT C. BYRD. Mr. President, I would hope that we could get Mr. DOLE to call up his amendment—it has been discussed throughout the major portion of today—and possibly get a vote in relation thereto.

Does the distinguished Senator——

Mr. ALLEN. I have no objection. I merely did not wish to pass to the next article.

I have an amendment more or less in reserve to call up, if it is planned to go to the next article but I agree with the distinguished majority leader, as regards Senator DOLE, inasmuch as we have discussed his amendment some 4 or 5 hours should, if he wishes, call up his amendment.

I am not trying to come in ahead of the distinguished Senator from Kansas.

Mr. HANSEN. Will the distinguished Senator from Alabama yield for an observation?

The PRESIDING OFFICER. The Senator from Maryland has the floor.

Mr. SARBANES. I yield to the Senator from Wyoming for a question, without losing my right to the floor.

Mr. HANSEN. I am surely not privileged or licensed to speak for the Senator from Kansas (Mr. DOLE), but I would say that I hope Senators might understand the manner in which most amendments offered by those of us who oppose the treaty have been handled so far does not encourage Senators to call them up and press for a vote, and if we could have a vote on the merits, as has been pointed out by my distinguished colleague from Wyoming, it would certainly help.

I do not know at all what the distinguished Senator from Kansas (Mr. DOLE) may have in mind, as far as his amendment goes, but it seems to me that when a person works hard, is diligent and tries to understand the issue and tries to become better informed, as indeed Senator DOLE and others have, it is a little discouraging to have few people, if any, on the floor and then to have practically nothing spoken in rebuttal, as was indeed the case with my colleagues from Wyoming, to have someone get recognition of the Chair and move to table.

Now, obviously, most Senators who are away from the floor and who come in and ask what the issue is and are told that the prevailing side simply has moved to table, that is about all the information that the typical Senator has and Senator DOLE might have, and I do not know at all that he did, but he might have had the feeling that if he were to push further this evening for consideration on his amendment, the best that he can hope for would be to have someone move that it be tabled, and most Senators would come in and support that tabling motion, having little, if any, idea what the amendment was.

I could certainly understand why Senator DOLE might have chosen—maybe he did, maybe he did not, I do not know if he did—to put his amendment down. I can well understand why.

I thank my colleague from Maryland for yielding.

(Mr. HODGES assumed the chair.)

Mr. SARBANES. Mr. President, let me just respond to that because I think it is important to do so.

The proponents of the treaties have on occasion moved to table amendments and on other occasions amendments have gone to a straight up or down vote.

Now the motion to table is a standard and respectable parliamentary procedure. Senator DOLE has himself used it

on a number of occasions in this body, which I have been a witness to.

Mr. ROBERT C. BYRD. Mr. President, will the Senator allow me to interrupt him?

Mr. President, before the distinguished Senator from Washington leaves, we have heard a great deal today about this business if it does go to a vote up or down, look what is going on in the Senate here; look what the leadership is doing; we are being deprived of a vote up or down, the American people, when they catch on as to what is going on, and all that business.

Now, if you want to vote up and down on the Dole amendment, I ask unanimous consent that we vote in 5 minutes. Five minutes from now. Up or down.

Mr. CURTIS. Mr. President, reserving the right to object——

Mr. ROBERT C. BYRD. I want to call your hand up. Let us just vote up or down.

Mr. CURTIS. Reserving the right to object, tomorrow there are two important agriculture bills to be voted upon. It is my information that the distinguished Senator from Kansas, who is the ranking minority member on the Committee on Agriculture, and the distinguished chairman of the committee, Senator TALMADGE, are now in conference arranging for the presentation of that important legislation tomorrow. I do not think that due to the fact that this legislation is scheduled for tomorrow and it is important, that Senator DOLE should be sent for and told in this great deliberating body of unlimited debate, if he is a good boy, he can have a vote in 5 minutes.

The PRESIDING OFFICER. Is there objection?

Mr. HANSEN. Mr. President, reserving the right to object, and I shall not object, I am perfectly willing. I should have to say this: If we vote within 5 minutes on the Dole amendment, that is a lot better than we expected. I do not object.

The PRESIDING OFFICER. Is there objection?

Mr. ALLEN. I object in Mr. DOLE's absence.

The PRESIDING OFFICER. The objection is heard.

Mr. ALLEN. Besides, there is no amendment pending.

Mr. ROBERT C. BYRD. I can call up an amendment, precisely like it, of my own and move to lay it on the table, for that matter.

I have heard this all day long, the same old ritual, the same old record playing: "We cannot have an up or down vote."

We had some up or down votes on some amendments on the first treaty. The distinguished Senator from Idaho has said we will have some up or down votes on amendments to this treaty. That is a parliamentary technique that has been used since parliamentary bodies began.

Those who vote for a motion to table are voting against the amendment. I voted for the motion to table. I voted because I am against the amendment.

I know what these amendments will do. They will open the treaties to renegotiation. That allows the other party then to come in and ask for a quid pro quo. So let us have a vote up or down on the amendment.

Get in touch with Mr. DOLE. Let us get a vote.

Mr. THURMOND. Mr. President, will the Senator yield?

Mr. ROBERT C. BYRD. Let me offer a further suggestion. I wonder if the opponents to the treaty would agree to a vote up or down on the Resolution of Ratification by no later than, say, 6 o'clock this coming Thursday, provided we have up or down votes on all amendments in the meantime? I should like to offer the opponents that opportunity, to vote up or down on the treaty.

We have debated this. We are in our 6th week now of debating this treaty, because it was debated along with the other treaty, before we voted on the resolution of ratification.

There has been ample debate and the reason there are only five or six Senators on the floor, as someone has said, is that they have heard these arguments over and over. They have heard the same old argument so many times that they do not need to be on the floor to know what has been said. So let us have a vote. Let us get this thing behind us and get on with other business.

I ask the opponents if they are willing to have a showdown vote up or down—to vote up or down—on the treaty no later than 6 o'clock this coming Thursday. Then we will go out for the legislative holiday and we will come back and we will be ready to start on other matters. But if we are not going to have an agreement, let us just inform our colleagues here and now—here and now—that the legislative holiday is going to be cut in half. If we do not get an agreement, we shall just be out on Good Friday and Good Saturday and Good Sunday, and Monday and Tuesday. and come back on Wednesday.

Of course, there will be votes, because any Senator can call up any amendment. He does not have to call up his own. He can call up someone else's.

For that matter, I can put in amendments of my own, call them up, and move to lay them on the table.

I implore my friends who are opposing this treaty to consider the suggestions I have made: get an agreement to vote up or down on the treaty by no later than 6 o'clock p.m. this coming Thursday, and get it all behind us after 6 weeks of debate. In the meantime, vote up or down on all the amendments.

Mr. THURMOND. Mr. President, will the Senator yield?

Mr. ROBERT C. BYRD. Yes.

Mr. SARBANES. Mr. President, I have the floor. I yield to the Senator from South Carolina for a response without losing my right to the floor.

Mr. THURMOND. Mr. President, I just want to call to the attention of the distinguished majority leader that the able Senator from Kansas was here most of the day and he would have consented to a rollcall vote up or down, but the proponents of the treaties never did consent. He wanted an up-or-down vote. They would not give him an up-or-down vote. He was here and wanted it. Now he has gone, working on an Agriculture Committee matter which is very important, because the farmers cannot survive unless we do something. He is doing his duty there.

I am sure he will agree to an up-or-down vote as soon as he comes back. If we can get him back here, I am sure he will agree.

I thought I ought to call that to the attention of the distinguished majority leader.

Mr. SARBANES. I would hope so, and I think I ought to add to the record, for the information of the Senator from South Carolina and others, that the Senator from Kansas, in effect, said that unless he got an up-or-down vote, he did not intend to let his amendment go to a vote. That if a motion to table were in prospect he would then go on for days. Under those circumstances, his attitude obviously affected the perspective with which one viewed his position, understandably so.

I see the Senator from Kansas has now come back into the Chamber and I think that, perhaps, we may be able to go to an up-or-down vote in a few minutes on his amendment.

I yield to the Senator from Kansas without losing my right to the floor.

Mr. DOLE. I do not know what has been said. I have been meeting with Senator TALMADGE on tomorrow's legislation.

The Senator from Kansas is willing to agree to vote almost immediately on an up-or-down vote.

Mr. ROBERT C. BYRD. Will the Senator yield?

Mr. SARBANES. I yield.

Mr. ROBERT C. BYRD. I say to the distinguished Senator from Kansas that I have just proposed that there be a vote on the amendment of the Senator from Kansas, up or down, within 5 minutes.

Mr. DOLE. Could I have about 2 minutes of the 5?

Mr. ROBERT C. BYRD. With the time to be equally divided in accordance with the usual form.

The PRESIDING OFFICER. Is there objection?

Without objection, it is so ordered.

Mr. DOLE. Mr. President, I shall make my statement very quickly, since there are probably more Senators in the Chamber now.

The PRESIDING OFFICER. Will the Senator call up his amendment?

AMENDMENT NO. 69

Mr. DOLE. I call up amendment No. 69 to article I.

The PRESIDING OFFICER. The amendment will be stated.

The assistant legislative clerk read as follows:

The Senator from Kansas (Mr. DOLE) proposes an amendment numbered 69.

At the end of article I, add the following:

5. For the duration of this Treaty and consistent with the provisions of Article IV, the Republic of Panama and the United States of America agree that, subject to the other provisions of this Treaty, only the military forces, defense sites, or military installations of the Republic of Panama or of the United States of America may be maintained in the national territory of the Republic of Panama.

Mr. DOLE. Let me say this very quickly, and I should like to reserve 30

seconds of the 2½ minutes: This amendment has one purpose in mind. That is to insure that no foreign military presence other than that of the United States will be established within Panamanian territory between now and the year 2000.

We have argued this amendment and debated the amendment at some length. It seems to me that that is in our interest and is in the interest of Panama. It is going to happen after the year 2000. That is already in the Neutrality Treaty.

It is not a hostile amendment, it is not a killer amendment. It is an amendment offered in good faith to strengthen the treaty.

I reserve the remainder of my time.

The PRESIDING OFFICER. Who yields time?

Mr. ROBERT C. BYRD. Mr. President, I ask for the yeas and nays on the amendment.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

The PRESIDING OFFICER. Who yields time?

Mr. CHURCH. Mr. President, I said earlier in the debate that if you have a good neighbor, you do not ask that neighbor to protect the neighborhood by promising you in writing not to let the Mafia use his house. For 75 years, Panama has been a good neighbor. Never have they let foreign troops on their soil. One of the chief reasons they want this treaty is in the hope that, one day, only Panamanian troops will occupy Panamanian soil. It is highly unlikely that they will change their attitude between now and the end of the century. But if they do, American troops will be present to protect American interests.

This is a very unwise amendment. It should be rejected in the interest of preserving our friendship with the Panamanians, which is the best security we have for the canal and our interest in it in the future.

Mr. JAVITS. Mr. President, if the Senator has any time, I would like to say I shall be against it and vote "no," because it relates to the whole Republic of Panama. After all, what this is all about is that Panama is seeking to recapture its dignity. If we are there and we have not the ability and the presence to keep foreign troops out, it is a pretty sick day for us. I think this negates the whole reason for which the Panamanian people are seeking this treaty. It is to give them national standing and respectability. I hope very much that the Senate rejects the amendment.

Mr. DOLE. I yield the remainder of my time to the Senator from Alabama.

Mr. ALLEN. I thank the distinguished Senator from Kansas for yielding to me.

Mr. President, the Neutrality Treaty that was agreed to last Thursday provides that Panama shall not permit any foreign troops to be on Panamanian soil.

If that is going to be the rule from 2000 on, why should it not be the rule between now and 2000, especially since the United States will have troops there until the year 2000 and the United States will not have troops there beyond the year 2000?

There is less necessity to have troops between now and 2000 with the American troops being there than there is to have troops, foreign troops, there after the year 2000.

If they do not need them after 2000, why do they need them before the year 2000 with the United States there to defend the canal?

I hope the amendment will be agreed to.

The PRESIDING OFFICER. Who yields time?

Mr. MOYNIHAN addressed the Chair.

The PRESIDING OFFICER. The Senator from New York is recognized for 30 seconds.

Mr. MOYNIHAN. Mr. President, I cannot conceive that anybody would responsibly suggest this amendment is not profoundly altering our agreement with Panama and would be altogether unacceptable by Panama.

Is there no man in this Chamber on the other side with any experience in foreign affairs, of any confidence for foreign affairs, of any sensibility about what is required of a great nation in its dealing with small nations?

Mr. President, this amendment is a monstrosity. It suggests a fearful nation and a declining one, and I will have nothing to do with it because we are neither. We are great and powerful and an indispensable nation to the liberties of the world and we will not stand here and cringe in front of the fears of uninformed men.

The PRESIDING OFFICER. The Senator's time has expired.

The Senator from Kansas has 30 seconds.

Mr. DOLE. Mr. President, I agree with the distinguished Senator from New York. We should not look to uninformed men. I therefore, suggest we vote for the amendment.

I yield back the remainder of my time.

Mr. MELCHER addressed the Chair.

The PRESIDING OFFICER. All time has been yielded back.

The Senator from Montana.

Mr. MELCHER. Mr. President, I ask unanimous consent for 2 additional minutes for myself because I was in the Chair during much of the time when this was debated and could not enter into the debate. I ask unanimous consent for 2 additional minutes.

Mr. ROBERT C. BYRD. Mr. President, there should be an equal amount, may I say respectfully to the Senator, 2 minutes for Mr. MELCHER and 2 minutes for Mr. CHURCH.

The PRESIDING OFFICER. Is there objection to 2 minutes for Mr. MELCHER and 2 minutes for Mr. CHURCH?

Without objection, it is so ordered.

Mr. MELCHER. Mr. President, I am going to vote for this amendment. I am not going to vote for this amendment to abuse Panama on any basis, nor that we are cringing in this country for wanting the amendment.

I am going to vote for it because in discussions with the Panamanian Government leaders a few weeks ago and with General Torrijos, this is exactly what the treaty meant, that there would not be any other troops between now and the year 2000, other than American and Panamanian troops in Panama.

The canal is strategic. It is important to us. That is why we can adopt this amendment because it agrees with what General Torrijos and the Panamanian Government officials have told us, that there will not be any other troops of any other foreign country in Panama between now and 2000.

That is all the Dole amendment declares. It carrys out that purpose.

For that reason, I will vote with Mr. DOLE for the amendment.

Mr. SARBANES addressed the Chair.

The PRESIDING OFFICER. The Senator from Maryland (Mr. SARBANES).

Mr. SARBANES. Mr. President, since the 1903 treaty has been in effect, Panama has had the right to invite foreign troops into the Republic of Panama. It has not done so. It has not done so and we have had a close relationship between the United States and the Republic of Panama.

There is no expectation that Panama wishes to do so between now and the end of the century; a time period when we will have a continued American military presence in Panama. At some point there must be an understanding of the decent sensibilities of other people——

Now, we do not ask for this kind of condition in any agreements we have with any other country where we have an American military presence. We do not come in, and with respect to their sovereignty and their independence to make their own decision, say not only, "Let us in," but, "sign on the dotted line no one else will come in." That is understood and it is carried out that way. Why is there in this Chamber this desire to rub the faces of people into it.

The 1903 treaty does not preclude the presence of foreign troops in Panama and they have not been there. Now we seek to make explicit something that has always been understood, and the implication of making it explicit is to take away from a people their own right to make decisions just like other people.

We do not ask the same thing out of Spain, or out of Britain where we have American bases, or out of the other NATO countries, out of Germany.

Mr. DOLE. We do not have a canal there, either.

Mr. SARBANES. We do not ask them to make the same representations to us. Yet, we want to come along and impore this here. We have our presence there. We can protect our interests.

The PRESIDING OFFICER. The Senator's time has expired. The Senator from Montana has approximately 1 minute.

Mr. MELCHER. Mr. President, I want to state that, of course, this treaty is a different kind of agreement than other treaties with other countries. This is a treaty dealing with the Panama Canal. which is strategic to us, as it is for all of the rest of the countries of the world that use it in commerce.

We do not have a similar agreement with Spain or with Great Britain or other countries because it is a different set of circumstances and the treaties with them involve an entirely different subject and different circumstances.

This treaty with Panama involves the canal. We have a vital stake in it. We have a great responsibility for it. That is why there are different circumstances involved with this treaty and our agreeing to it than there are with other treaties with other countries throughout the world. The amendment is pertinent and carries out the mutual concept we have with Panama.

Mr. WALLOP. Will the Senator yield the remainder of his time?

The PRESIDING OFFICER. The Senator has 5 seconds.

Mr. WALLOP. I would just ask, how many Cubans defended Ethiopia since 1903?

The PRESIDING OFFICER. All time has expired. The question is on agreeing to the amendment of the Senator from Kansas. The yeas and nays have been ordered and the clerk will call the roll.

The assistant legislative clerk called the roll.

Mr. ZORINSKY (after having voted in the affirmative). On this vote I have a pair with the Senator from Maine (Mr. HATHAWAY). If he were present and voting, he would vote "nay." If I were permitted to vote, I would vote "yea." I therefore withdraw my vote.

Mr. FORD (after having voted in the affirmative). On this vote I have a pair with the Senator from Colorado (Mr. HASKELL). If he were present and voting, he would vote "nay." If I were permitted to vote, I would vote "yea." I therefore withdraw my vote.

Mr. CRANSTON. I announce that the Senator from Alaska (Mr. GRAVEL), the Senator from Colorado (Mr. HASKELL), the Senator from Maine (Mr. HATHAWAY), the Senator from Kentucky (Mr. HUDDLESTON), the Senator from Massachusetts (Mr. KENNEDY), the Senator from South Dakota (Mr. MCGOVERN), the Senator from Maine (Mr. MUSKIE), and the Senator from Alabama (Mr. SPARKMAN) are necessarily absent.

Mr. STEVENS. I announce that the Senator from Arizona (Mr. GOLDWATER), the Senator from Michigan (Mr. GRIFFIN), the Senator from Kansas (Mr. PEARSON), the Senator from Illinois (Mr. PERCY), and the Senator from Pennsylvania (Mr. SCHWEIKER) are necessarily absent.

I also announce that the Senator from Maryland (Mr. MATHIAS), is absent to attend the funeral of a former Senator.

The result was announced—yeas 39, nays 45, as follows:

[Rollcall Vote No. 68 Ex.]

YEAS—39

Allen	Garn	Packwood
Bartlett	Hansen	Randolph
Bellmon	Hatch	Roth
Bentsen	Hatfield, Paul G.	Schmitt
Brooke	Hayakawa	Scott
Burdick	Helms	Stennis
Byrd, Harry F., Jr.	Johnston	Stevens
Cannon	Laxalt	Stone
Curtis	Long	Talmadge
DeConcini	Lugar	Thurmond
Dole	McClure	Tower
Domenici	Melcher	Wallop
Eastland	Nunn	Young

NAYS—45

Abourezk	Eagleton	Metzenbaum
Anderson	Glenn	Morgan
Baker	Hart	Moynihan
Bayh	Hatfield, Mark O.	Nelson
Biden	Heinz	Pell
Bumpers	Hodges	Proxmire
Byrd, Robert C.	Hollings	Ribicoff
Case	Humphrey	Riegle
Chafee	Inouye	Sarbanes
Chiles	Jackson	Sasser
Church	Javits	Stafford
Clark	Leahy	Stevenson
Cranston	Magnuson	Weicker
Culver	Matsunaga	Williams
Danforth	McIntyre	
Durkin		

PRESENT AND GIVING A LIVE PAIR, AS PREVIOUSLY RECORDED—2

Zorinsky, for.
Ford, for.

NOT VOTING—14

Goldwater	Huddleston	Pearson
Gravel	Kennedy	Percy
Griffin	Mathias	Schweiker
Haskell	McGovern	Sparkman
Hathaway	Muskie	

So Mr. DOLE's amendment (No. 69) was rejected.

Mr. CRANSTON. Mr. President, I move to reconsider the vote by which the amendment was rejected.

Mr. JAVITS. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. MOYNIHAN, Mr. ROBERT C. BYRD, and Mr. THURMOND addressed the Chair.

The PRESIDING OFFICER. The Senator from New York.

Mr. MOYNIHAN. Mr. President, I thank the Chair, and I would like to take a moment, because perhaps there were just a few Senators here, to respond——

Mr. LEAHY. May we have order?

The PRESIDING OFFICER. The Senator from New York will cease until there is order in the Senate.

The Senate will be in order. Members will cease conversation. The Senate will please come to order.

The Senator from New York.

Mr. MOYNIHAN. Mr. President, as has been observed, we are now in the sixth week of debate on these treaties. By comparison the North Atlantic Treaty occupied 12 days of the Senate's time. And we begin to enter into a period where standards are collapsing.

The distinguished Senator from Wyoming this afternoon submitted an amendment to this treaty which was so devoid of intellectual content or even rhetorical merit as to literally silence the supporters of these treaties. He rose and said, in the aftermath of the defeat of the amendments, that not one word of argument had been presented against it. Did he ever stop to consider that the proponents of the treaty might have been showing mercy, that they might have wished to spare him any elaboration on the proposition that a Member of the U.S. Senate has stood up and proposed that the United States in certain circumstances would claim rights under nonexistent treaties?

Article I of the treaty before us abolishes the 1903 treaty and the 1936 treaty with Panama.

Having been abolished, the treaties ceased to exist. And in the name of heaven to what recourse can you claim somehow, now there is subsequent revival and resurrection in consequence of your own annoyance? It will not work.

Mr. HATCH. Mr. President, will the Senator yield?

Mr. MOYNIHAN. The Senator will not yield for the moment.

Mr. President, a moment ago I left the floor. I called Medford, Mass., and I spoke to what is perhaps the leading international legal scholar in America, possibly the world, today, Dr. Leo Gross. Dr. Gross did his work in Vienna, who was for a long time an official of the League of Nations, who taught at the Fletcher School of International Law and Diplomacy at Harvard University for a distinguished generation of diplomats after the Second World War, and I read to Dr. Gross this amendment of the Senator from Wyoming. Dr. Gross by definition, having given his life to the study of international law, does not have many laughs; there are not many chuckles in the day of a professor of international law. Leo Gross was reduced to laughter. He finally stopped and said:

> Nothing is beyond the imagination of a Senator, I suppose, but such a proposal would be meaningless unless accepted by the other side. You cannot claim rights under a nonexistent treaty.

Are we going to ask the world to look down upon us as persons who have no standards of argument, of the logic of a sentence, of the empirical basis of an assertion of fact?

Here is the United States of America that launched the Marshall plan, what Winston Churchill called the most generous and selfless act in the history of mankind, and this same U.S. Senate, which approved the Marshall plan, is going to spend some time trying to get $10,000 out of the Panamanians in the unlikely event that by 1993 the account may be in surplus.

We are going to ask the American Republic to be reduced to the circumstance of meanness and trivia.

Mr. President, there is a reputation of this Senate involved.

I thank the Chair.

Several Senators addressed the Chair.

Mr. HANSEN. Mr. President, my good friend, the distinguished Senator from New York has spoken about my colleague from Wyoming (Mr. WALLOP), and I regret that Mr. WALLOP is not on the floor at the time. I know that from what my colleague from New York says apparently the amendment that was offered by my colleague from Wyoming (Mr. WALLOP) caused him to evidence some humor.

All I can say is that if the junior Senator from New York's friends were to observe what goes on on this floor, as some of us have, I am sure he would become almost hysterical in his humor because if the amendment offered by my distinguished colleague would evoke that much humor and mirth, I can hardly imagine how funny, how ridiculously funny, would be the antics of the full Senate if he were to watch us all the time.

I would hope that my colleague from Wyoming might be permitted to be recognized when he comes onto the floor. I think he has gone to his office, and I

know that my good friend, Mr. MOYNIHAN, would want very much to afford him the opportunity of responding to the remarks which I do not think were intended to be critical, but I must say I am a little surprised that he would seemingly imply that there was so little merit in them.

I thought the amendment offered by my colleague did have merit, and I would hope that when he comes to the floor, as I understand he shortly will be doing, that he might be recognized and afforded as much time as my friend from New York.

The PRESIDING OFFICER (Mr. MATSUNAGA). The Senator from New York.

Mr. MOYNIHAN. Just briefly to state, of course, I should await the Senator from Wyoming's return. Clearly I did not intend by speaking to his amendment in his absence to do him any discourtesy. I was trying to make a general point about relevance in our debate.

I should be happy to talk with him. He is, of course, the most careful of persons. It is simply I fear that having strayed into international law he has got a principle wrong. I shall be happy to explain that to the best of my limited ability when he does return.

Several Senators addressed the Chair.

Mr. HANSEN. Mr. President, I would be happy to yield to my friend from Alabama.

The PRESIDING OFFICER. The Senator from Wyoming has the floor.

Mr. ALLEN. Is it not correct that some 36 Senators voted along with the Senator from Wyoming for this amendment? As the distinguished Senator from New York criticizes and makes light of the, as I gather it, mentality of the distinguished Senator from Wyoming, does he not also level the same indictment at 36 other Members of the Senate?

Mr. MOYNIHAN. May the Senator from New York respond?

Mr. HANSEN. I would be happy to yield.

Mr. MOYNIHAN. The Senator from Alabama, if he would do me the justice to listen to me, would know that no scintilla of suggestion was made by me with respect to mentality of those who voted for this treaty.

Mr. ALLEN. I thought he compared them with 5-year-olds who are not generally compared to a U.S. Senator.

Mr. MOYNIHAN. I compared it to the psychology, not mentality. There is a difference in my view.

Mr. ALLEN. I see.

Mr. MOYNIHAN. I said that to suggest that one could unilaterally impose upon another nation such a condition is to suggest that which is absurd, and it opens the Senate to the charge of absurdity.

Mr. HATCH. Mr. President, will the Senator yield?

Mr. ALLEN. I thank the Senator for a clarification of his remarks.

Mr. CHAFEE. I would like to just say the Senator from New York was long on humor but I do not think he was long on accomplishing the goals. He stirred some people. A lot of laughs over there, great chuckles, but I do not think he is advancing his cause one bit.

I thank the Chair.

The PRESIDING OFFICER. Will the Senator from Wyoming yield the floor?

Mr. HANSEN. I yield to the Senator from Utah.

Mr. ROBERT C. BYRD. Mr. President, will the Senator allow me, yield to me? I simply want to state there will be no more rollcall votes today, Mr. President.

Mr. HATCH. Let me just say this: I thank the distinguished Senator from Wyoming for yielding. There are very few people in the Chamber whom I enjoy as much as I do the distinguished Senator from New York. As a matter of fact, I think he has in many cases shown a brilliant intellect, a very brilliant mind, a very facile way of speaking. But before I came over here I had to admit we just had in essence 41 votes on the Dole amendment, which he did not call a name, but at least he indicated that anybody who would vote for it or at least present it did not know much about foreign policy. That may be so. It may be that the distinguished Senator from New York knows more about foreign policy than anybody else in the United States of America.

Mr. DOLE. He does.

Mr. HATCH. I will say this, in fact I will be willing to say, that it is a distinct possibility that he does.

When he was at the United Nations I enjoyed every ounce of his service at the United Nations, and I appreciated it very much.

But I think it may be one thing to criticize a colleague on the floor of the Senate who advances, as I know Senator WALLOP had done, sincerely and in a dedicated fashion an amendment in which he believes. To call it inane, childish, and stupid and every other word in the book that was used, and then rely upon an international lawyer from New Bedford, I guess it was—was it New Bedford?

Mr. MOYNIHAN. Leo Gross.

Mr. HATCH (continuing). Who said it would be meaningless, this amendment, unless accepted by the other side.

Now, I think if the distinguished Senator from New York would stop and think about that, any Senator in the U.S. Senate can offer an amendment which, if this treaty is abrogated, assuming it is enacted, would reinstate the 1903 treaty, and if they do agree it would be acceptable and he has a right to do so.

Mr. MOYNIHAN. Will the Senator yield for a question?

Mr. HATCH. Yes.

Mr. MOYNIHAN. Would the Senator restate the proposition?

Mr. HATCH. As I understand it, you stated that Leo Gross described that it would be meaningless unless accepted by the other side, meaning we can offer that amendment, and if it is accepted it would not be meaningless, which is exactly what Senator WALLOP wanted to do, because he knows as well as the distinguished Senator from New York that if you would offer an amendment on this floor, the only way it is going to be accepted down there is by plebiscite or unless the dictator says he will accept it, which will then not be valid if he is succeeded by another dictator who does not recognize the amendment.

All I am saying is this: Again, and I will preface my remarks with my regard for the distinguished Senator from New York who, I think, is very witty at times, but I personally felt he was not very witty today. It is the first time when he has evidenced humor that I have not found it to be humorous, and the reason I have not is because I think it has been demeaning to an awfully fine, distinguished, decent man on the floor of the Senate named MALCOLM WALLOP who, I think, offered a very sincere and dedicated amendment, in which 36 Senators concurred.

I think it is demeaning to the 36 Senators.

I will say this much more: I think the distinguished Senator from New York is entitled to express his opinions with regard to how meaningless that amendment may be. My only request is that he do so with greater courtesy, that he show courtesy, dignity, and respect, as I think Senator WALLOP has shown to every man in the Senate Chamber.

I think if the distinguished Senator from New York would do that he would have even more power and more visible acceptance and, I think, expression, which would be acceptable to other Senators on the floor of the Senate.

What I would like to just add, in conclusion, is that I hope this does not affect the relationship I have with the distinguished Senator from New York because I like him so much. But I do not think, however brilliant a man may be, and I think we have an awful lot of brilliant people here on the floor of the Senate, that that man or any other Senator has the right, the privilege, or even the capacity, in a very real sense, to be rude.

My interpretation may be faulty, but if I interpreted it right I felt the distinguished Senator from New York was rude to a fellow. If I am wrong I certainly apologize, but that was my personal interpretation of it. I think he made light of and had a humorous time at the expense of a very dignified and fine colleague, who would not do the same to him.

I would say that from my observation of these treaties and these debates, I have seen a great lack of understanding of international law by many Senators on the floor of the Senate, including perhaps even the distinguished Senator from New York, and including myself. We are all going to have to study a little bit harder. It would be wonderful if Leo Gross had found the price to run for office and become a U.S. Senator, so that he could enlighten all of us on the floor of the Senate. But I would imagine even if the famed Leo Gross were here on the floor of the Senate enlightening all of us, he would find arguments against some of his opinions, because no man is so great that his opinions and theories cannot be questioned.

Mr. MOYNIHAN. Will the Senator yield, so that I might respond?

Mr. HATCH. If the distinguished Senator from New York will allow me to finish——

Mr. MOYNIHAN. Yes, when you conclude.

Mr. HATCH. I promised to yield to the distinguished Senator from Alabama, and then I will yield to you.

The PRESIDING OFFICER. The Senator from Wyoming still has the floor. It is up to the Senator from Wyoming to whom he yields.

Mr. HATCH. May I finish?

Mr. HANSEN. I continue to yield to the distinguished Senator from Utah.

Mr. HATCH. I would say again, without a desire to cause offense to any of my colleagues, and especially my friend and brilliant colleague from New York, that I do not know a man on the floor of the Senate who is more sincere or more dedicated, who works harder, who does more good, who literally has pleased more people, or who has any more talents than my friend and colleague from Wyoming who has been so severely criticised on the floor of the Senate today, whether rightly or wrongly; I believe wrongly.

On the other hand, I think it is the right of any Senator to ridicule or find fault with any argument made on the floor of the Senate. I just think it should be done with dignity and courtesy. I suppose we will all be guilty of breaching this from time to time, but when I look at some of the programs that have been offered by this administration, including these treaties, with all their frailties and faults and problems, and, I would add, breaches of international law, to have anybody on the proponents' side of these treaties stand up and ridicule, if you will, a sincere, dedicated Senator who is opposed to the treaties is almost laughable, when you consider all of the matters and all of the ramifications involved here

In closing, I would just like to say that I personally was basically offended for my colleague. Since he is not here, I felt constrained to stand up and express my viewpoint that if you put two international lawyers together, just like two psychiatrists, you are going to find a variance of opinions, no matter how brilliant they are. I would suspect that if you put two U.S. Senators together on opposite sides of this issue, you would see some awful differences of opinion.

We have been fighting together for a long time on these particular treaties. In the opinion of some of us, these treaties are of immense importance. Maybe the time should be shortened, and I personally will work to try to do that, as will other Senators opposing these treaties.

On the other hand, I would hope we would have mutual respect between the two opposing sides, so that we can continue to work together, and so that whatever the result, we will all feel at least that there has been fairness on each side.

Mr. MOYNIHAN. Mr. President, will the Senator from Wyoming yield to me, so that I may reply?

Mr. HANSEN. I yield to the Senator from New York.

Mr. MOYNIHAN. I thank my friend from Wyoming.

Mr. President, most explicitly, what I should have thought was very clear, there was no personal aspersion intended in what I said. I spoke to the nature of the proposition. I hope the Senator from Utah knows I would be incapable of being rude to the Senator from Wyoming, a fellow Member of our freshman class.

Mr. HATCH. I would have hoped that that was the case.

Mr. MOYNIHAN. I thank the Senator for making that clear.

But having said that, perhaps one should speak to those who are trying to defeat this treaty by offering a succession of nongermane or irrelevant or illogical or unimaginable propositions put to a vote in the Senate, some of which have the quality of intimidating Senators who are really for the treaty, but do not want to seem to be against the seeming logic of this or that proposition. If you do not support this treaty, say so. But, gentlemen, we are not negotiating the treaty. We are advising the President and counseling as to whether or not he should ratify it.

We are not negotiating. We cannot unilaterally amend it so as to change its meaning. That is not a constitutional function of this body.

The opponents of the treaty ought to stand up and say why they do not think the treaty, as negotiated, is a good one, and then proceed to vote against it. They ought not to present to us as solidly judged matters which are wholly ultra vires.

I put to you that this is something so large that the proponents of this treaty are going to feel free to comment on the irrelevancies the opponents present to us, if indeed they continue to do so. I feel we have no other recourse, because we feel very much that these treaties should be considered on their merits, and neither this Chamber, this country, nor the world should be distracted by inane and impossible proposals. I do not think that serves the opponents' purpose, and I do not think it serves the Nation's purpose. But I hasten to say that I meant no discourtesy of any kind to the junior Senator from Wyoming.

Mr. HANSEN. Mr. President, I propose to make a very brief statement, and then yield to the Senator from Alabama; at that point I shall yield the floor.

The Senator from New York said "Let us be specific. I would just like to ask him if the different adjectives he used applied specifically to the amendment offered by the Senator from Wyoming (Mr. WALLOP).

Mr. MOYNIHAN. Which adjectives?

Mr. HANSEN. Well, you used several a few moments ago. Frivolous—maybe that was not one of them, but you used several.

Mr. MOYNIHAN. I would say illogical.

Mr. HANSEN. Now, you are speaking about the amendment offered by Mr. WALLOP?

Mr. MOYNIHAN. Yes, that particular one.

Mr. HANSEN. And how do you characterize his amendment?

Mr. MOYNIHAN. Illogical, and incapable of implementation on the face of it. Not something that we could do.

Mr. HANSEN. The reason why I wanted to be specific on that point, Mr. President, is just this: My colleague, I think very wisely, will not be here this evening, because it would be awfully easy, when tempers may flare just a little, to come to the floor and say things that any of us might regret. So I think my colleague very wise, since he was absent from the floor when the distinguished Senator from New York, Mr. WALLOP's friend and mine also, spoke, since he was not here I think it best that he has concluded, as he has, that he will not come here to speak tonight.

I would hope that he might be recognized sometime tomorrow, if he cares to be, in order to explain the reasons which compelled him to offer the amendment. I have no doubt at all but what he will do that.

I just repeat again I do not think he intended in any way to offer an amendment that was frivolous, or which was poorly thought out, or which had little merit. I think he has been very diligent in this whole matter. I greatly respect and admire him for it.

Having said that, I yield to the Senator from Alabama and yield the floor.

The PRESIDING OFFICER. The Senator from Wyoming is reminded that under the rules he may not yield to another but the Chair will recognize another if the Senator yields the floor.

Mr. HANSEN. Mr. President, I yield the floor.

Mr. ALLEN. Mr. President——

The PRESIDING OFFICER. The Senator from Alabama.

Mr. ALLEN. I thank the Chair.

We all recognize the supremacy of the distinguished junior Senator from New York in the area of foreign relations. We recognize his great expertise in that area, as much as he served as U.S. Ambassador to the United Nations and gained much favorable attention there through his fine work in the interests of the people of the United States.

I wish that he would have made these comments while the amendment was pending. Possibly if he had pointed out these various criticisms that he voiced after the amendment was defeated, the distinguished Senator from Wyoming might possibly have adjusted his amendment to meet the distinguished Senator's suggestions.

Another thing I would like to comment on with respect too the comments of the distinguished Senator from New York is he points out that the Senate is not writing this treaty; that we are just advising with the President; that it is up to the executive to write the treaty and we advise.

We are not supposed to just take it as it is or not take it as it is. It is part of our function to shape this treaty, as I see it. Of course, we have been prevented from shaping the treaty by the leadership. But it is well within the con-

cept of giving advice to advise the President, "Yes, this treaty is all right, with this amendment, with that amendment and with another amendment."

The Senator says it cannot be amended unilaterally. Of course that is true. It would take the assent of the other party. That is what we want. We want to see Panama give its assent to such amendments as the Senate might adopt through Panama's constitutional processes, which they say would require a plebiscite if any substantial amendment is adopted.

Mr. STEVENS. Will the Senator yield?

Mr. ALLEN. That seems to be the position of the leadership. I yield for a question.

Mr. STEVENS. The Senator from New York implies that we have no business in trying to change this treaty on the floor of the Senate. I wonder if we would have the constitutional prerogative that we have to review this treaty article by article and consider amendments if all we were required to do is either rubber stamp or reject the treaty negotiated by the executive branch.

Mr. ALLEN. I think that is an excellent point. We do consider it article by article. Right now we are on article I.

Mr. STEVENS. If the Senator will yield again, I am sure my friend from Alabama heard the statement I made the other night concerning the fact that Panama had, in fact, declared unconstitutional the Geneva Convention of 1949 that it had ratified because it had failed to comply with its own domestic procedures when it ratified that document. Its own supreme court declared that the treaty was not binding upon Panama.

I wonder if the Senator has a feeling about how we would get the Panamanians to agree to a reservation, understanding, or declaration that we might attach to it if, under their domestic law, they choose to ignore it, as they did the Geneva Convention on the Red Cross.

Mr. ALLEN. I think unquestionably with the Panamanian Government, if they saw fit not to submit any amendment to a plebiscite, we would not raise that point. It has been pointed out here on the floor by myself and others that the ratification of the treaty could not be attacked collaterally, that is, as to whether Panama took the necessary steps as provided by its constitutional procedures.

I do appreciate the remarks of the distinguished Senator from Alaska and the great point that he made, of why are we considering this treaty article by article unless there is some thought that we might want to possibly offer a strengthening amendment.

Mr. LEAHY. Will the Senator yield for 2 minutes without losing his right to the floor?

Mr. ALLEN. Yes; I yield under those conditions.

The PRESIDING OFFICER. Without objection, the Senator from Vermont is recognized for 2 minutes.

(Mr. LEAHY's remarks at this point are printed later in today's RECORD.)

Mr. THURMOND. Will the Senator from Alabama yield?

Mr. ALLEN. I have one further comment and then I will yield to the distinguished Senator.

Mr. President, the Wallop amendment and the dim view the distinguished Senator from New York took of it, and the jocularity it produced in the humorless professor from Harvard, reminds me somewhat of the incident related in the Bible when Paul was appearing before Festus, the ruler in that day. Paul made his speech there before Festus, and Festus said, "Thy great learning has driven thee mad."

I do not feel that the great learning of the distinguished Senator from New York has driven him mad, but if we substitute the words "impetuous, wreckless and intolerant" of the views and workmanship of the distinguished Senator from Wyoming (Mr. WALLOP), I feel that that might well be viewed by some as a correct statement.

Now I do yield to the distinguished Senator from South Carolina.

The PRESIDING OFFICER. The Senator from South Carolina.

THE ADMINISTRATION'S FAILURE TO REDUCE VETERANS' UNEMPLOYMENT

Mr. THURMOND. Mr. President, the Department of Labor's failure to be of meaningful assistance in resolving the coal strike is surpassed only by its record of total ineffectiveness and apparent apathy in carrying out its commitments in the area of veterans' employment. If our country's coal miners receive the same consideration from the Department of Labor as have our disabled and Vietnam-era veterans, our Nation's energy sources will soon be reduced to canned heat and stove wood. Tragically, unemployed veterans have no Taft-Hartley Act to invoke. Signs of improvement over at the Labor Department can be seen, however. Labor Department participation involving the proposed coal agreement actually involved union officials and representatives from the coal mining industry and took place here in Washington, not off in some exotic place like San Juan, Puerto Rico, where Deputy Assistant Secretary of Labor for Veterans' Employment Roland Mora recently convened certain members of the Veterans' Employment Service to consider veterans' unemployment. The Puerto Rico meeting occurred while the American Legion Economics Commission had assembled here in Washington, as part of that organization's annual conference, to work on ways to reduce unemployment among veterans. Government departments are certainly not bound, nor should they be pressured to court organizations comprised of members of the constituency whom they serve.

However, operations of such departments should not be conducted to appear to be in contravention of mutually desirable goals and policies of such organizations and departments. Nor should the operation of government give the appearance of being aloof from those whom it is responsible for serving. Unemployed veterans are not consoled by images of Proteus rising from the sea; they need jobs. If the Department of Labor and Deputy Secretary Mora start doing their jobs and fulfilling their commitments, the level of unemployment among veterans could substantially diminish.

The Carter administration's efforts of fulfilling its promises to unemployed veterans have not been the best. They have not even been good. An analysis of the several initiatives undertaken by the administration and the Department of Labor reveals the operation of several motifs frequently employed in Renaissance drama—a preference for form over substance, an affinity for appearance over reality, and frequent incongruities between public utterances and apparent private intent. Although the manner in which these programs have been implemented has often approached the dimensions of farce, the consequences for the veterans whom they were designed to benefit have been tragic.

In January of last year amidst rampant unemployment of Vietnam-era veterans, the administration announced with considerable fanfare the development of three new employment programs for veterans as part of the President's economic stimulus plan. It was also announced that these initiatives were targeted to assist unemployed disabled and young Vietnam-era veterans in particular. The first program, estimated to cost approximately $33 million and known as the disabled veterans outreach program (DVOP), provided for the hiring of up to 2,000 disabled veterans in 100 of the Nation's largest cities. Under the DVOP program veterans would be trained in placement techniques for unemployed disabled veterans. Although the announced plan of hiring 2,000 veterans essentially has been realized, the goal of placing 40,000 disabled veterans under the program apparently has not. Guidelines issued by the Department of Labor went to great lengths in emphasizing that the primary responsibility of DVOP staffers was to perform intensive outreach. In other words, DVOP personnel were supposed to work extensively in the field in an effort to identify job opportunities for disabled veterans. Complaints persist, however, that many DVOP personnel are not permitted to reach out beyond their own desks. Many are performing clerical and administrative tasks unrelated to job opportunities for disabled veterans. To date, no data has been made available by the Department of Labor concerning the output of the DVOP program. Additionally, no meaningful action has been taken by the Department to assure that the purposes for which the DVOP program was designed are being carried out. This inaction persists in spite of continuing and flagrant program violations of which the Department has been made aware.

A second veterans' employment initiative announced by the administration last January was the intended placement of 145,000 veterans in public service jobs under titles II and VI of the Comprehensive Employment and Training Act

(CETA). This goal would amount to hiring veterans for approximately 35 percent of all newly created public service jobs under CETA. To be eligible for placement under this program, however, veterans have to meet the stringent CETA program requirements, such as 15 previous weeks of unemployment and certain maximum income requirements. The rigidity of the program requirements has made meeting the 35 percent quota impossible. One expert in veterans' employment programs estimated that between 75 to 90 percent of veteran applicants are ineligible under the program's disadvantaged criteria. An August New York Times article quotes Michael Waggener, director of Swords and Plowshares, the largest community veterans organization in San Francisco, as saying the CETA jobs program for veterans was mere "lip service, peanuts, a band-aid." Veterans organizations have repeatedly insisted that veteran participation in the CETA program would significantly increase if they were permitted membership on the CETA planning councils, which consist of community-based organizations. The Department of Labor has agreed that such participation would be beneficial. To date, however, nothing has been done by the Department to effect such participation.

The final program announced by the administration to curb unemployment among Vietnam-era veterans was the $140 million initiative entitled "Help Through Industrial Retraining and Employment" (HIRE). This program was headed by business executive G. William Miller, President Carter's recently confirmed choice for Chairman of the Federal Reserve Board. The National Alliance of Businessmen, a private organization, was chosen to promote the program along with the Department of Labor. The announced goal under HIRE was to encourage business to employ approximately 100,000 veterans. Six months after the program's inception, the sponsors had been successful in landing 60 jobs. An article in the January 30 edition of the Philadelphia Inquirer indicates that a GAO study, completed in January of this year and yet to be released, has found that a total of 136 veterans have been employed under the program. The article states further that Department of Labor officials, reacting to the GAO findings, allege that more veterans have, in fact, been employed under the HIRE program but that program records were about a month behind at the time of the GAO study. The article, nevertheless, cites Department spokesmen as indicating that the total number of veterans employed during 1977 was still under 200. The fact that the Department of Labor experienced delay in keeping a current tally, amounting to a number fewer than 200, of job placements under the HIRE program is perhaps indicative of the threshold at which veterans' programs encounter difficulty within that Department.

In his January 12 Washington Post column, Jack Anderson refers to HIRE as a flop. That would appear to be an apt description of a program which has fallen so dismally short of announced goals. Moreover, recent reports indicate that the flip side of the HIRE program will involve turning over $100 million in HIRE funds to the field to be administered by CETA prime sponsors. Such an initiative would also appear ill-fated. Veteran participation in CETA has always been low. It is, therefore, likely that attempting to employ veterans in significant numbers using unobligated HIRE money under the CETA program may also be doomed to flop, or worse still—flip-flop.

Another indication of the administration's lack of commitment in resolving unemployment problems of veterans is the manner in which the Department of Labor has used the recently created office of the Deputy Assistant Secretary of Labor for Veterans' Employment. This position was authorized under the provisions of the Veterans' Education and Employment Assistance Act of 1976 (P.L. 94–502). The principal role of the DASVE, as envisioned by the Congress, was to advise the Secretary of Labor with respect to the formulation and implementation of all departmental policies and procedures involving veterans' employment. The administration left this vital position unfilled for 7 months. Finally, on August 5, 1977, the Senate confirmed the President's nominee for th DASVE, Roland Mora, a native of California of Apache and Spanish ancestry and a former marine officer with an outstanding service record. Although Deputy Secretary Mora had no prior experience in veterans' employment matters, he did enter his office having the benefit of an experienced staff in the Veterans' Employment Service of whom, under the law, he was the head. From a management viewpoint, therefore, upon assuming office Mr. Mora had the capability of fulfilling his statutory responsibilities of developing and influencing policy affecting veterans' employment and could rely upon the office of the Director, Veterans' Employment Service to assist him in carrying out the ministerial functions of his office. At Mr. Mora's confirmation hearing before the Senate Veterans' Affairs Committee on June 17, 1977, Undersecretary of Labor Robert J. Brown assured the Senate Veterans' Affairs Committee that the position of the Director of the Veterans' Employment Service would not be abolished. Upon assuming office, however, Deputy Secretary Mora took affirmative steps in concert with his superiors to eliminate the position of Director, Veterans' Employment Service. The decision to eliminate this position was made ostensibly for the purpose of granting Deputy Secretary Mora direct line authority over his regional directors and for facilitating management of the Employment Service, in general. Presumably, these objectives have been achieved from an aerial command post, considering Deputy Secretary Mora's penchant for travel. According to Jack Anderson's January 12 column in the Washington Post, Mr. Mora took six trips during one 6-week period last summer and was on the road again when reporters tried to get his comments on the HIRE program.

Mr. President, all of the shortcomings of the administration's veterans' employment programs cannot be attributed to a single person. It is clear, however, that at a time when veterans need solutions to their employment needs, Mr. Mora, and the Department of Labor in which he works have become a major part of their problems. In the meantime unemployment continues to be a major obstacle in the assimilation of hundreds of thousands of veterans to positions of meaningful responsibility and productivity within the civilian sector. Fourth quarter employment statistics furnished by the Department of Labor indicate that unemployment among black and other minority veterans in the group 20–24 is a shocking 30.8 percent, compared to 17 percent among their nonveteran counterparts. Moreover, in addition to the nearly half million unemployed Vietnam-era veterans, there are also approximately 750,000 older jobless veterans of earlier wars, many of whom have been displaced in the job market because of automation, obsolete skills, and older worker problems.

As disturbing as these statistics are, however, they cannot, in any real sense, describe the despair of those who are denied the dignity of working to earn their livelihoods because they cannot avail themselves of employment rights to which they are entitled under the law. Meanwhile, letters to the Department of Labor from Members of Congress and veterans organizations expressing concern over specific problems in veterans' employment programs are not responded to or are answered months after they are received by the Department. Phone calls are not returned; advice goes unheeded.

Veterans' employment programs are overburdened with mere garish symbols of concern; they need to be refurbished with genuine action. If the Department of Labor cannot, or will not, accomplish this objective, then perhaps now is the time for responsibility for veterans' employment programs to be assumed by the Veterans' Administration. A proposal (H.R. 11043) calling for such a transfer has already been introduced in the House by Congressman TEAGUE and is a measure which is being reviewed and studied with keen interest.

Mr. President, for the benefit of my colleagues, I request unanimous consent that newspaper articles from the New York Times of August 11, 1977; the Philadelphia Inquirer of January 30, 1978; and the Washington Post of January 12, 1978 and March 6, 1978, be printed in the RECORD at this point.

Mr. ROBERT C. BYRD. Reserving the right to object, and I will not object, may I ask the distinguished Senator from Alabama if he is going to continue to yield for morning business purposes? If he is, perhaps we ought to have a period of morning business.

Mr. ALLEN. As soon as the distinguished Senator finishes, I will yield the floor.

Mr. ROBERT C. BYRD. I have no objection.

There being no objection, the articles were ordered to be printed in the RECORD, as follows:

[From the New York Times, Aug. 11, 1977]

JOBS PLAN FOR VIETNAM VETERANS GETS A SLOW START

(By Wayne King)

ATLANTA.—President Carter's program to provide jobs for 200,000 unemployed Vietnam veterans, announced last January, has been very slow getting off the ground and appears to have had little effect on the high rate of joblessness among veterans.

Beyond bureaucratic sluggishness, the joint public-private program has been troubled by slow industry response, inflexible regulations that bar some veterans from employment under existing programs and, perhaps most significantly, a defeatist, and even hostile attitude on the part of a large number of veterans.

The program to create jobs for unemployed Vietnam veterans was announced by Mr. Carter as one of the first priorities of his new Administration. The $1.3 billion program focuses on Government jobs but also emphasizes private industry training and employment for about 450,000 Vietnam-era veterans.

President Carter's program calls for 35 percent of new public service jobs funded by the existing Comprehensive Employment Training Act to go to veterans, and efforts are under way to inform veterans of the jobs.

PRIVATE HIRING SLOW

Inquiries at the state and local level around the country reveal that while some Government hiring is taking place, private sector employment is moving slowly, if at all. Employment officials have had great difficulty in getting in touch with veterans to inform them of job opportunities; some have been reluctant to relocate; and large numbers have simply given up the job hunt. Others seem to regard a job as their right, paid for in hardship and blood, and refuse to make any personal adjustment, such as doffing dirty blue jeans or showing up for interviews, to get and hold a job.

Generally, veterans' groups describe the job program as a "Band-Aid" or "window dressing," although state officials seem generally optimistic that coming months will show employment gains.

It is clear, however, that there is no efficient and reliable method of actually counting the unemployed veterans, particularly since many have simply stopped looking for work and thus are not listed as being unemployed.

In Louisiana, for example, the State Employment Agency reported in January that there were 10,370 unemployed Vietnam veterans in the state. By April, however, the figure had been cut almost in half to 5,479, apparently a dramatic drop. However, the state had simply eliminated the names of unemployed veterans not actively seeking jobs. Some unemployed veterans have not been in touch with the employment office for up to a year.

Even after the purging, the unemployment rate for Vietnam veterans in depressed Louisiana was 10.6 percent compared to 7.4 percent for the general population. Employment officials agree that the veterans' figure is actually much higher.

JOBS ALLOTTED FOR DISABLED

So far, the only Carter program fully under way in New Orleans, the area with the highest unemployment level in the state, is the Disabled Veterans Outreach Program, which began in April. The state has allotted 29 jobs for disabled Vietnam-era veterans.

Evans St. Romain Sr., district coordinator for veterans' placement in the Louisiana Office of Employment Security, discussed the elusiveness of the unemployed veteran. In an initial attempt under the Disabled Veterans Program, he said, the employment office sent job letters to 40 veterans receiving disability checks; there were seven responses. And of those seven, Mr. Romain said, "We did not see one sitting down in a chair to talk about a job or a training opening."

Mr. Romain said that the Vietnam veteran was demanding, sometimes caustic, and did not want to start in an entry-level job. Some show up for job interviews wearing cut-off blue jeans, "with wild hair and smelling bad when they walk in," he said.

One employer called to complain about an applicant sent over by the employment office. The employment worker replied that the applicant was qualified for the job. The employer said, "Yeah, but he's drunk."

Thaddeum Patin, 33, national supervisor for the Disabled American Veterans, said, "Three years ago there were more veterans than jobs; now we have the employers but we don't have the veterans. The biggest problem is getting the veteran to come in and register."

VETERANS CALLED INSECURE

James A. Dunnigan, 26, formerly an artillery officer in the Marine Corps and now an outreach program interviewer with the Louisiana Office of Employment Security, said that some of his clients were so insecure or defiant they would not show up for interviews or arrived slovenly and unwashed.

They are not interested in the jobs promised them by the Carter program because "they just don't give a damn about that pie in the sky," he said, "These people are the embodiment of the national guilt; the whole thing is straight out of Catch-22."

In Illinois, there has been a statistical drop in veterans' unemployment, and state officials project a figure of only 3.5 percent by mid-1978. However, Herman Roth, program director of Jobs for Vets, operated by state veterans' organizations, discounted the figures, noting that many veterans have simply "dropped out."

"They have developed a defeatist attitude," he said, "When World War II was over, a veteran would walk into a bar and everybody would buy him a drink. When the Korean War ended, he had to buy his own drink When the Vietnam War was over, he had to buy everybody else in the house a drink."

Daniel Lambert, Maine adjutant of the American Legion, said, "if anything, things have gotten worse for the Vietnam veterans in the employment field. The Vietnam veteran has been passed by and we now have more stress on the hiring of minorities, women and so forth."

He said that one veteran who had applied for an unspecified state job was told in a letter, "While we have not hired you, please be advised that we have hired four minority workers and three women."

In California, employment officials complain that it is nearly impossible to meet the 35 percent hiring guideline of the Comprehensive Employment Training Act. Juan Lopez, manager of the Alameda County C.E.T.A. Office, said that requirements such as 15 previous weeks of unemployment, a specified maximum income and so forth made it all but impossible to meet the quota.

Michael Waggener, director of Swords into Ploughshares, the biggest community veterans organization in San Francisco, said that the Carter program was just "lip service, peanuts, a Band-Aid."

"In the last two months, we sent 50 to 60 veterans over for C.E.T.A. jobs and only two or three have been hired. The problem seems to be that even though these guys are vets and need decent jobs, other eligibility restrictions, like having to be unemployed for 15 weeks, keeps them from being hired."

[From the Washington Post, Jan. 12 ,1978]

ANATOMY OF A FLOP

(By Jack Anderson)

A year ago, Labor Secretary Ray Marshall used the White House doorstep to announce the launching of a new government program to be known as Hire. It envisioned a cooperative venture with private industry to find jobs for the returned Vietnam veterans, at a cost to the taxpayers of $140 million. Both the veterans and the taxpayers have been shortchanged.

At the outset, nearly half-a-million war vets were out of work. Their unemployment rate has nearly doubled in the past year. Of the proclaimed $140 million effort, less than $10 million has actually been spent to help them. President Carter's budget cutters have now recommended that the Labor Department find more worthwhile use for the unspent funds.

Sources close to Carter have acknowledged that the Hire program was nothing more than political gimmickry. The President's advisers were groping for something to counter-balance public distaste for the President's controversial decision to grant amnesty to Vietnam draft evaders.

Compounding the problem was the penchant for travel demonstrated by the man who was supposed to be running the program in Washington. Roland Mora, the deputy assistant secretary for veterans employment, took six trips during one six-week period last summer. When we tried to get his comment, he again was on the road.

Footnote: A Mora aide told us they were running a "Mr. Inside, Mr. Outside" program, with the boss as Mr. Outside. The spokesman insisted the program is not dead despite the recommendation of the budget experts. A spokesman for the National Alliance of Businessmen, chosen to promote the hiring, also contended that "Hire is not a failure." He said 60 percent of the job placement goal has been attained.

[From the Philadelphia Inquirer, Jan. 30, 1978]

FOR VIETNAM VETERANS, MORE PLANS THAN JOBS

(By Saul Friedman)

WASHINGTON.—A $140 million federal program started in June to encourage business to hire about 100,000 unemployed Vietnam era veterans has so far gotten jobs for only about 60.

Appeals to thousands of American firms to take part in the program, called HIRE (Help Through Industrial Retraining and Employment), have uncovered only 47 businesses willing to sign up.

Those 47 businesses have pledged to hire 9,000 unemployed, most of them Vietnam veterans. The cost to the government will be about $1,600 per trainee. But because the program has been so slow getting started, only about $8.8 million of the $140 million has been committed for the promised jobs.

These were among the findings of a General Accounting Office (GAO) audit of the program, which was headed by business executive G. William Miller, President Carter's choice to be chairman of the Federal Reserve Board.

The GAO study, which has been sent to the Department of Labor for its comments, is to be released in a few weeks. But Rep. John Conyers (D., Mich.), who asked for the study, disclosed the GAO's basic findings and expressed concern that HIRE was "headed for failure."

A Labor Department expert on the program conceded its record so far "is dismal."

But he added, "It's not as dismal as it seems and we hope the record will get much better in 1978."

The program was announced by the President in January 1977 as part of his economic stimulus package. It was designed to provide jobs in private industry to disabled Vietnam veterans, non-disabled Vietnam veterans, unemployed youth and long-term job seekers, in that order. The primary goal was to put about 100,000 Vietnam veterans to work in a year.

Congress authorized the program and allocated $140 million for it under the Comprehensive Employment Training Act. It began operation in June under the joint auspices of the Labor Department and the National Alliance of Businessmen, a private organization.

Under the program, the government promised to reimburse employers up to 50 percent of the cost of training new employes. In exchange, the employer had to pledge to hire at least 100 workers.

Employers, including large corporations, balked at having to hire that many. To make the program more attractive, especially to smaller businesses, the requirement was lowered to a minimum of 15 new employees.

Under Miller's leadership, letters were sent to 100 major corporations and more than 4,000 businesses asking them to participate in the HIRE program.

The GAO study, which was done earlier this month, found that a total of only 136 unemployed had been put to work under the program—52 long-term jobless, 27 young people and 57 Vietnam war veterans.

A Labor Department source explained that its records were about a month behind when the GAO study had been made and more recent reports show that others have been hired under the program.

Even so, the source acknowledged, the total figure at the end of 1977 was still under 200 and included only about 60 Vietnam war veterans.

By December, only 25 employers had signed up for the program. An additional 22 are about to sign, the source said.

The Labor Department expert cited a number of possible reasons for the program's showing so far. Among them: A sluggish economy, a lack of business confidence, the reluctance of smaller businesses to commit themselves to hiring 15 new workers, a lack of publicity and promotion and the preference among large corporations for the purely "voluntary" programs of the National Alliance of Businessmen (NAB).

[From the Washington Post, March 6, 1978]

VETERANS' EMPLOYMENT

Officials in the Labor Department appear determined to breath new life into HIRE (Help through Industry Retraining and Employment), the program designed to assist Vietnam-era veterans who lack jobs. The $140-million program, announced with a splurge of publicity in January 1977 by the Carter administration, is now called a dismal failure even by officials within the department. According to their figures, the program has produced jobs for less than 200 veterans; 100,000 jobs was the program's goal. A General Accounting Office report on HIRE is scheduled to be released soon, and presumably the details of failure will be amply reported.

While waiting to learn what went wrong last year, the department still has this year to deal with, and the large numbers of jobless Vietnam veterans who need help. At the moment, a draft of new guidelines for HIRE is being considered by the department. Among other useful provisions, it would ensure that HIRE be a veterans-only program, and not one that includes the long-term unemployed or the unemployed young. Among the latter, it is true, are people who need help, but if the administration intended HIRE as a veterans' program, and Congress agreed, then it should be just that. As Rep. Lester Wolff (D–N.Y.) has pointed out, to include others in HIRE serves "to dilute the program's potential impact on the unemployment problems of our veterans.".

A second needed revision involves the number of workers that an employer would be required to hire in order to qualify for federal reimbursement for the cost of training the new workers. When the program began, the number was 100. Almost immediately, that was seen as unrealistic; how often do many companies, even major corporations, hire 100 workers in one sweep? Last November, the requirement was lowered to 15. Now the department thinks that may be too high, and is considering no minimum at all. According to the National Alliance of Businessmen, the group that is participating in the HIRE program, a no-minimum provision is likely to be the most workable.

As the Labor Department ponders its course of action, some improvement in the employment figures for veterans has been recorded. How much more improvement might have occurred had HIRE been more carefully conceived and run can only be guessed. It is regrettable, for example, that the department avoided any effective consultation with the business community on the requirement of the 100-worker minimum. It is too bad, also, that funds were not set aside for local veterans' groups that could have been been enlisted in providing support services—from counseling the unemployed veterans to publicizing the fact that help was available. The new guidelines propose that approximately $14 million be given for this purpose.

Whatever breakdowns and flaws led to HIRE's poor showing to date, at least a salvage operation is under way. The department, after an unfortunate delay, established a bureau that deals only with veterans' unemployment; its director, Roland Mora, a disabled ex-Marine, is new to government, but he is aware that large numbers of jobless vets lack an advocate within the department. Whether Mr. Mora and his staff can fill this role—or be allowed to fill it—will be clear in a few months, but for now it is obvious that the department needs someone to take the lead. As for the NAB, it deserves a measure of credit for its concerns about the veterans. In addition to being involved with HIRE, it also has its Jobs for Veterans program. The latter, according to recent NAB figures, has found work for some 35,000 veterans.

For HIRE to succeed, the department, first, must adopt new guidelines that would at least correct the mistakes of last year; second, give more authority to its office of veterans' employment; and third, be more open to taking the advice of the business community. In other words, the program needs to be pulled together. The money is already committed and available. Not to use it well would be to add still another burden on the unemployed veterans, a group that already has more burdens than it needs.

ADDITIONAL COSPONSOR—S. 623

Mr. THURMOND. Mr. President, I ask unanimous consent to add the Senator from Colorado (Mr. HART) to my bill S. 623, to amend title 10, United States Code, to make certain changes in the retired serviceman's family protection plan and the survivor benefit plan as authorized by chapter 73 of that title and for other purposes.

The PRESIDING OFFICER. As in legislative session, without objection, it is so ordered.

A NATIONAL COMMISSION FOR THE REVIEW OF ANTITRUST LAWS AND PROCEDURES

Mr. THURMOND. Mr. President, I ask unanimous consent to have printed in the RECORD a letter from the Honorable John W. Lindsay to me, which explains itself.

The PRESIDING OFFICER. Without objection, as in legislative session, it is so ordered.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

Re in reply, please refer to No. 100.

DEAR SENATOR STROM THURMOND: At the last meeting of the South Carolina Insurance Commission, the Commission unanimously adopted the enclosed Resolution pertaining to an Executive Order by President Carter dated December 1, 1977, to establish a National Commission for the Review of Anti-Trust Laws and Procedures. We believe that it is not only desirable but essential that the considerable body of experience and competence of State insurance regulatory officials be represented on this Commission. We take no exception to the review of the various industry exemptions under the Federal Anti-Trust Laws.

For your information, the National Association of Insurance Commissioners (NAIC) has established a new governmental liaison sub-committee. The general purpose of this new sub-committee is to provide each Congressional Delegation with information and assistance for the constituents of each Senator and Representative and advice on insurance matters of inter-state impact.

There are a number of activities at the Federal level relating to the business of insurance and we would be pleased to provide you with an informed judgment whether or not the Federal proposals serve the best interests of the citizens of South Carolina. For example, we are not convinced that a Federal no-fault automobile insurance law, as set out in House Bill H.R. 6601 and Senate Bill 1381 would be best for the citizens of South Carolina.

Putting it another way, we are not convinced that the cost benefit ratio of no-fault insurance would be meaningful. Finally, if you think it necessary, we would be delighted to come to Washington to brief your Administrative Assistant or a designated member of your staff about insurance matters that would affect the Palmetto State. I know there are tremendous demands on your time, but I would be glad to meet with you personally if you prefer that alternative. In any event, you may be assured that anything that this office can do to enhance our long standing, pleasant and effective working relationship will be accomplished at your request.

With kindest personal regards, I am

Sincerely yours,

JOHN W. LINDSAY,
Chief Insurance Commissioner.

Enclosure.

Whereas it has come to the attention of the National Association of Insurance Commissioners (NAIC), that there is to be appointed by the President of the United States a "National Commission for the Review of Antitrust Laws and Procedures" pursuant to an executive order dated December 1, 1977, and

Whereas the scope of the National Commission's activities is to encompass a review of the several industry exceptions to the federal antitrust laws, and

Whereas the McCarran-Ferguson Act (15 U.S.C. 1011 et seq.) is one of the current exceptions to the federal antitrust laws that is to be reviewed by the National Commission, and

Whereas the McCarran Act embodies the policy that state insurance regulation be continued in the best interests of the insurance consuming public, and

Whereas the interests of the public are now represented by the members of the NAIC in their capacity as the chief insurance regulatory officials of the several states, and

Whereas it is necessary for any meaningful review of the McCarran Act that the insurance regulatory community be represented on the National Commission.

Now therefore be it resolved that the NAIC forthwith advise the President of the United States and other appropriate federal officials in the most urgent terms of the absolute need for inclusion of an NAIC representative on the National Commission, and

Be it further resolved that the officers of the NAIC be authorized to select a list of qualified insurance commissioners for submission to the President of the United States from which Presidential selection of one insurance commissioner is recommended.

IT WORRIES US

Mr. THURMOND. Mr. President, I ask unanimous consent that an article entitled "It Worries Us," which appeared in the March 4, 1978, issue of the Gaffney Ledger be printed in the RECORD following these remarks.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

IT WORRIES US

It worries us that it doesn't seem to worry official Washington that the Soviet Union continues to build and prepare for nuclear war.

It worries us that, in denying that they asked the United States to join in an attack on China in 1969, the Russians do not deny they themselves planned such an attack. It seems to have been common knowledge in China that one was planned.

It worries us that Russia is testing killer satellites now used for spying. We got fooled when we thought the Russians would not develop this type satellite. We do not have one under development, according to the State Department.

It worries us that Russian planes and pilots are "protecting" Cuba while Cuban pilots fight in Africa. Fifteen years ago the U.S. would have been outraged and would have ordered Russia out. Not now. Russia figured we would look the other way, and we did.

It worries us that the Soviet Union, with Cuba's help, is seeking to control the horn of Africa so it can cut off oil supplies to Europe and the U.S. as need be. Russia already controls Yemen and wants Ethopia and Somalia on the opposite side of the horn.

It worries us that the Soviets are now working on a civil defense program which will allow a 90 percent survival rate of its population in the event of a nuclear attack. We have next to no program.

It worries us that the Soviet Union is becoming more and more solidly entrenched in the Arab camp where the oil barons now have a stranglehold on the U.S. economy.

It worries us that, with the passing of each month, the superiority we once held in arms over the Russians comes close to reversing the trend.

It worries us that the Russians are continuing space efforts which would lead to control of space explorations for military purposes. We not only seem not to know what they are doing in space, but seem not to care.

It worries us that the Soviet Union is making all this careful preparation for nuclear war if they indeed plan no such action.

It worries us that, once they feel they have achieved the upper hand and can risk an attack on this nation, they might just resort to such an attack or, at least, to blackmail.

Most of all, it worries us that our government seems not worried at all. That they have placed their trust in the word of the Soviet leaders, even though that word has proved very undependable in the past. Deeds, not words, speak of the intentions of the Soviets.

It worries us, not that our government is gambling on the word of and the agreements with the Soviets, but it worries us that they could be wrong.

Do these things not worry you?

If they do, let your officials in Washington know about it.

THE PANAMA CANAL TREATY

The Senate resumed the consideration of the treaty.

The PRESIDING OFFICER. The Senator from Alabama.

Mr. THURMOND. I want to thank the distinguished Senator from Alabama for yielding the floor to me.

Mr. STEVENS. Mr. President——

The PRESIDING OFFICER. The Senator from Alabama has the floor.

Will the Senator from Alabama yield the floor?

Mr. ALLEN. I do yield the floor.

Mr. STEVENS. Mr. President——

The PRESIDING OFFICER. The Senator from New York receives recognition.

Mr. MOYNIHAN. I thank the Chair.

Mr. President, perhaps it is best simply to conclude this little exchange tonight by saying that I believe it is the view of at least some of us, and more perhaps than just a few who are proponents to this treaty that the President has the right to have it discussed at a level of realistic and candid assertion of what is being proposed, and for what purpose.

The effort to bring it down by prolonging the process of the deliberation is really not becoming of this Chamber and certainly would be resisted by those who wish to see the President's work unaccomplished. It is not just his work. It is the work of the last four Presidents. We have certainly a responsibility to take seriously our duties to advise and consent and to do it with equal expedition and reference to real ideas and hard facts, as the President's negotiators who have brought this treaty to us.

In no sense do I suggest, as I fear the Senator from Alabama may have misunderstood me to suggest that I had any great learning in this matter. I went out of my way to consult one of the Nation's recognized authorities to make sure that what seemed on the surface to be inane—I repeat that word—as an idea was indeed just that: at least in the judgment of one person that was indeed the case.

And it is one thing to identify it inappropriate and irrelevant and to so state, and another thing to be intolerant of alternate views. I would suggest, if anything, there has been an excess of tolerance in this debate, as day after day we have gone on with great patience listening to some persons who obviously feel stronger, and at much greater length than would be the normal distribution of time on the Senate floor, but it is within our right, and we somewhat take our responsibilities to declare that to identify as irrelevant and inappropriate and on the face of matters not to be taken seriously those things which we feel to be of that order.

I thank the Chair.

Mr. STEVENS. Mr. President.

The PRESIDING OFFICER. The Senator from Alaska.

Mr. STEVENS. Mr. President, I have great respect for the Senator from New York, in the field of foreign affairs, but I have little regard for the comments he just made concerning the attitude of those of us who have walked the narrow road trying to make the treaties acceptable to the people of the United States. There are people who are, I think, blindly proponents of these treaties. There are others who are blindly opponents of these treaties and there are some of us who have worked very diligently to try to change them so that they might be agreeable to the majority of the people of this Nation.

I think I am one of those who has tried and has done a great deal of work to try and change it and it just so happens that prior to the time my good friend from Wyoming offered his amendment, we had drawn an amendment to accomplish the same thing, which I shall hope I will share with the Senator from Wyoming (Mr. WALLOP), to article XIV because our research shows us that Panama does in fact have a way to ignore the reservations, declarations, and understandings that under our law we might attach to these treaties. Reservations, declarations, and understandings which might seduce some people to support the treaties may well be ignored in Panama, unless there is an amendent placed in the body of the treaty which says, in effect, that if they ignore the will of the U.S. Senate, as expressed in a reservation and understanding, or a declaration, then the treaties which were superseded by this treaty would come back into force and effect.

There is no way I know for us to invade the domestic law of Panama and to make a reservation, a declaration, or an understanding binding upon Panama. Unless the treaty has a mechanism to in effect make the treaty void, if Panama ignores these declarations, understandings, or reservations then Panama would have no reason to recognize the reservations, declarations, and understandings passed by the U.S. Senate.

Now I think——

Mr. ROBERT C. BYRD. Mr. President——

Mr. STEVENS. I see my good friend from West Virginia rising and I have no greater respect for any man in this Senate than my good friend from West Virginia.

I think I spent a lot of time on this and I think I have been involved in the practice of law long enough to understand the treaty and its implications as well as anyone else here.

You may disagree with me, but I would not like to have my amendment referred to as being inane and inept, and like those offered by people who are merely trying to delay the process of the Senate. Mr. President, as I said in my question to my good friend from Alabama, if we do not have a role in trying to shape this treaty so it is acceptable to the people of the United States, what

are we doing here? Why do we go through article after article? Why do we have the process of amendment? Why do we not just have a reservation process?

I yield to my good friend, if he wants to comment on——

Mr. MOYNIHAN. Mr. President, may I respond for just a minute?

It would be typical to say to the Senator from Alaska, and he surely would know that it was very clear that with respect to the Neutrality Treaty there were improvements made and there were reservations registered and some of the most important were unanimously accepted or nearly so because they did make good sense.

But the Senator from Alaska—he does not have to agree with me, obviously, but there is no way that one nation can unilaterally declare that if something else happens, a nonexistent treaty will come into effect.

May I suggest to the Senator that what you probably are thinking—I wonder if this is what you are thinking because this is not my thinking. You can say that if the treaties were abrogated cr some portion of them, then you could put the others or other parties on notice about how the United States will conduct its affairs.

Mr. STEVENS. I say to my friend from New York that he misses the point of the amendment, and the point is, that unless Panama, following their own constitutional processes of their domestic law, accepts the constitutional processes of our domestic law, these new treaties will not become effective. If our amendment is adopted the problem can be overcome. Having not become effective, the treaties in and of themselves revoke and repeal these old treaties. What we are saying is we want to put in this treaty a provision which puts Panama on notice that if following their domestic law they use devices to circumvent the will of the United States, as expressed in these reservations, declarations, or understandings, then the treaties are void, as far as we are concerned, and the other treaties are still in effect.

Now, I say to my good friend that is a good provision and it is a good tactic. Unless it is followed in some way by the Senators who say to the people of the United States that they are voting for this treaty, or they voted for the last treaty because of an understanding or a reservation or declaration that was attached to the resolution of ratification, then one of us has been misled.

Mr. MOYNIHAN. Will the Senator yield?

Mr. STEVENS. Just let me finish that one point.

There is a mechanism for putting these people on notice down there that they cannot do what they have done in the past.

And I point out that they under their constitution now can pack their courts. Just remember what happened in the United States when the President of the United States tried to do that.

Well, General Torrijos just gave himself the authority to do that with a new constitution in Panama. He can pack the court and he can keep sending so many questions to that supreme court until he puts enough people on there to get the court to do what he wants them to do. He is in fact a dictator.

Now if my friend says that we have no way in the ratification process to assure that the meaning that the Senate attaches to a treaty will not be accepted under the domestic constitutional law processes of Panama and that it will not be binding on them before we agree, the treaty will in fact be binding, then I disagree with him on that, and I think that many constitutional lawyers would disagree with my friend from New York.

Mr. MOYNIHAN. Let me urge the Senator to let me intervene here and be very explicit.

I think his proposal is not a good proposal, but it is, in fact, a perfectly logical one and perfectly appropriate to debate in this Senate.

If we provide a provision in this treaty whereby the treaty, in effect, does not come into effect—I do not know how the time sequence would work here, but if, in effect, the cancellation of the previous treaties would be void by the terms of this treaty—then we can envision the previous treaties being in effect.

Is that right?

Mr. STEVENS. My point is, under our domestic law, the treaties with their reservations, understandings and declarations would be binding upon us, and under our interpretation of international law, if they accept the resolution of ratification, any other nation would be bound by that.

But we know by looking at their own internal domestic law, that is not the situation with this country, and we are put on notice with the way they rejected the Geneva Convention of 1949. The Panamanian Supreme Court stated that because they had not, in fact, published the text of that treaty properly and in its entirety, they had not complied with their own domestic law, and having not complied with their own domestic law in terms of the ratification procedure, the Convention was not binding upon Panama.

Mr. MOYNIHAN. Did the Senator hear me say that I think he may have a point here?

Mr. STEVENS. I know I have a point here. I have been arguing it a couple of weeks now. It sounds like my good friend from New York says those of us who want the treaties to be changed and improved before voting for them—and mind you, some of us said we would vote for them if they were changed in a specific way, the last one was not changed and I voted against it, the question of whether this one is changed is very material, as far as I am concerned—are abstructionists.

I shall vote against it unless it is changed to protect what I consider to be the national security, economic interests, of the United States.

Now, one of the things I think is in the interest of the United States is the question of whether Panama can accept this treaty. I am sure the Senator has read his paper from New York. I spent last weekend reading some of the items in the New York paper about General Torrijos' comments. He is going to wait, as he said to the President in the letter, until he sees all the reservations and they will determine later whether they will be bound.

That is very good.

All I am saying is that we should not give him a check that is binding upon us, when it is one he can ignore, one that is not binding on him at all.

Mr. MOYNIHAN. If the Senator can work that out and if that is the type of thing that ought seriously to be considered, and should be, and, certainly, would be welcomed by me, I am not in any means a principal in this debate, but that is a tenable proposition.

Mr. STEVENS. That is what the Senator from Wyoming's proposition was.

Mr. MOYNIHAN. Then I must respectfully disagree. In no way could that provision be binding on anybody else. No international court, no international lawyer, no other country would think it did. That is what I am talking about.

Mr. STEVENS. No. My friend is not understanding either one of us. All we say is that unless this treaty will be binding on Panama, with all the attachments kept on it, under their law, then it should not be binding on us under our law.

That is a simple proposition of, I think, international law.

But the difficulty is as my friend refuses to see the difference, in dealing with a dictatorship under a democratic process.

We are dealing with a country that is ruled by a dictatorship. He has the power to pack the court. He changed the Constitution. He now has the power to ignore the reservations we approved last week in the neutrality treaty.

Under those circumstances, I would say that there is no way for us to tell the American people that what we have done, if we have passed a resolution with reservations, understandings or declarations attached to it, is binding upon Panama unless we look at their own law, their own Constitution, which incidentally says in title I, article 4, that Panama is bound by international law only so far as it does not "prejudice" the "national interests" of Panama.

Mr. MELCHER. Will the Senator yield?

Mr. STEVENS. I am happy to.

Mr. MELCHER. I think there is even a more pertinent point in the Constitution of Panama.

Their Constitution clearly and emphatically states that the ratification process for any treaty dealing with the canal is only by plebiscite where a majority of people voting in that plebiscite agree with the treaty.

I think there is one thing we should keep in mind about our own Constitution, referring to the ratification of treaties.

Prior to the time we brought up the first treaty considered here, dealing with Panama, the Neutrality Treaty, I reviewed those few words in our own Constitution referring to the ratification of a treaty.

Our process is for the Senate to advise and consent, and there are very few words on it. Our process requires that the Senate advise and consent, and I do

not want any of us to lose sight of the word "advise."

We interpret that to mean a review of a proposed treaty by the Senate, article by article, open for amendments.

We in the Senate do not negotiate the treaty, as the Senator from New York has reminded us. No. But we do advise and consent, and no treaty is ratified by the United States without the Senate's two-thirds vote to advise and consent.

The process of these amendments is, indeed, the process of advising. If that should be construed or interpreted or understood by some in regard to these treaties as "negotiation," I think that would be an error on the part of the proponents of these treaties.

If we find in our process of considering these amendments, that amendment is needed and we adopt an amendment as part of our "advise," as part of our procedure of advising and consenting, we are clearly within our own Constitution. And that, indeed, I believe is not only a constitutional requirement, but I believe it is a grave responsibility on each and every one of us as Senators.

I cannot take these amendments lightly. I believe they should be considered and voted on their merits as our process of advising.

Mr. MOYNIHAN. If the Senator would hear me one last moment, there are some amendments, particularly the one the Senator from Alaska was trying to discuss, that obviously had to be taken seriously. It was a very serious proposition on the face of it. It appears to be something that could be done.

There are other amendments which we have heard presented and debated here, which, on the face of it, could not be done and should not distract this body and should not be seen as the appropriate subject for serious debate, but rather, dilatory, irrelevant. and not adding to the substance of our debate at all.

Obviously, there is a large area in between. But some of the extremes have been extreme, and it is to those extremes that I pointed, and nothing more.

I could not get the Senator from Alaska to quite hear me, but I was trying to say to him that I thought he had what is the making of a serious idea. Whether it would do or not, I could not quite follow. But it should be considered, and obviously will be. And that is the end of my thoughts on this subject tonight.

Mr. ROBERT C. BYRD addressed the Chair.

The PRESIDING OFFICER (Mr. HODGES). The Senator from West Virginia (Mr. ROBERT C. BYRD).

ROUTINE MORNING BUSINESS

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that there now be a period for the transaction of routine morning business, as in legislative session, the period not to extend beyond 30 minutes, with statements therein limited to 10 minutes each.

The PRESIDING OFFICER. Without objection, it is so ordered.

NEW YORK CITY AND ITS CONTRACTORS: IS THE YANKEE RIPOFF TYPICAL OF NEW YORK CITY CONTRACTS?

Mr. PROXMIRE. Mr. President, the New York City comptroller, Harrison Goldin, has called the New York City lease of Yankee Stadium "a disgraceful deal for the city," and it looks as if he is right.

The Senate has a particular interest in this contract because before June 30 when it expires we must decide whether to extend, modify or end the $2.3 billion seasonal loan the Federal Government made in 1975 to New York City. The nature of this Yankee contract suggests that while the majority of New Yorkers and their city leadership have made some commendable progress in the past 3 years, some people up there either because they are greedy, inept or corrupt are ripping off the majority and any Federal help will just prolong the ripoff and make it that much tougher to crack down.

THE GIVEAWAY CONTRACT

The Yankee contract looks like a transparent giveaway. Here is why: In 1977, the Yanks won the world series and had a terrific year at the box office. They grossed $9.3 million in admissions and $4.3 million from concessions. The city should have received nearly a million in rent. Instead it will get less than $150,000 and the Yankees have told the city it will cut even lower.

In 1976 it was even worse. The Yanks won the American League title, grossed more than $7 million. The city should have gotten more than $800,000 in rent, instead the city actually owes the Yankees $10,000. In other words, the city is paying the Yankees to occupy this stadium.

The joker is that the contract permits the Yankees to charge off certain maintenance costs against rents.

Now here is a contract that excluded the city from any participation in the most lucrative part of the Yankees financial operations, that is TV revenue. On its face it looks like a generous gift to the Yankees by the city. The city gets a graduated percentage of the gross at the gate and a percentage of concessions that ranged from 5 to 10 percent. But with the fine print in the maintenance deduction clause the contract becomes ridiculous, a transparent way for the Yankee owners to avoid paying any significanct rent to a city which has just poured $48 million into renovating the Yankee Stadium.

It is true that the million dollars or so a year that the city is losing on this deal would not make any real difference in keeping New York from bankruptcy, but the point is that if the city permits knuckleheaded ripoffs like this contract with a contractor as visible as the New York Yankees, what faith can we have that New York City is conducting its business with its thousands of other contractors in a way that gives it full value for the dollars it spends.

WHY CONGRESS MUST BE TOUGH

The Yankee contract illustrates again why Congress will be doing neither the Federal taxpayer nor New York City any favor by a soft, easy, permissive attitude toward further Federal assistance for New York City.

It also suggests that the city should not only pursue Mayor Koch's line of further reducing payrolls, it should also take a long, hard look at sweetheart contracts.

Look who is getting away with this ripoff. Here is the most successful and one of the richest franchises in baseball, an enterprise that is more conspicuously covered by TV, radio, newspapers than any activity outside of the White House.

We are dealing with a team that is not only argued about, debated, deplored, and enjoyed in offices, factories, bars, kitchens, and commuter trains in Harlem and Wall Street, Brooklyn and the Bronx, but in Oshkosh and Paducah.

YANKEE SUPREMACY REINFORCED

You do not have to be a Boston Red Sox or Milwaukee Brewer fan to recognize certain facts of life. And fact one is that the imperial, proud Yankees are the super team of 1978. Consider Seattle is a 2,000 to 1 shot to win the American League pennant this year. The Brewers are 100 to 1. The Yankees are actually a 5 to 7 favorite. Here is the super team of the twenties and thirties and fourties and fifties—the epitomy of success. There was even a popular book and movie entitled "The Year the Yankees Lost the Pennant." It was that rare for the Yankees not to crush the rest of us. And today they are once again dripping with success, not only with millionaire pitching aces and power hitting outfielders, but with millionaire relievers and pinch hitters.

Maybe this country would stand for seeing the richest man in town rob an orphan's piggybank and do it on network TV in prime time without outrage. But to be a party through New York City's dim-witted contract to making the Yankees richer still so the Yankees can pay the huge salaries to take the best players away from the rest of us, that no red-blooded baseball fan outside New York itself will ever permit.

Come on New York City—when you get less for leasing a stadium into which you have just poured $48 million than the bat boy earns, you really can't expect the taxpayer in Wisconsin, Kansas, Kentucky, and the rest of the country to give you a multibillion-dollar guarantee.

Mr. President, the one saving grace of this situation is that the New York Times conspicuously—on the Sunday front page reported this perverse contract and spelled out its giveaway nature in detail. And Harrison Goldin, the New York City comptroller has—as I said—denounced this giveaway and called for renegotiation of the contract.

So it is true there are responsible forces in New York protesting and fighting to correct this kind of giveaway. It will be interesting to watch what progress the city makes in renegotiating this contract over the next few weeks.

I ask unanimous consent that the article in the New York Times by Murray Schumach be printed in the RECORD at this point.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

YANKEES' REVENUES RISE, BUT RENT TO CITY FALLS BELOW EXPECTATIONS

(By Murray Schumach)

In the process of winning the baseball championship last year, the New York Yankees grossed—after taxes—$9.3 million in admissions at the Yankee Stadium and took in $4.8 million more through concessions.

Theoretically, the city should have received nearly a million dollars in rent. Actually, it will receive less than $150,000, and the Yankees have advised the city it plans to cut this even lower.

The situation in 1976 was even more unbalanced. The Yankees, in winning the American League title that year, grossed more than $7 million. The latest figures show that the city, instead of collecting more than $800,000 in rent, owes the Yankees about $10,000 for that year.

THE PRICE OF STAYING

All of this is legal. It is in keeping with the terms of the book-length 1972 lease between the city and the Yankees that permits the baseball club to charge off substantial "maintenance" costs against rent and specifically excludes the city from a share of the television money paid to the Yankees.

These were some highlights of a study by The New York Times of the arrangements worked out between the city and the Yankees, whereby the city rebuilt the stadium as the price for keeping the Yankees—who had been threatening to move—in the city.

In an interview, Comptroller Harrison J. Goldin called the lease "a disgraceful deal for the city." He has started an audit of the Yankees finances and intends to press for a renegotiation of the city's contract with the Yankees that expires at the end of 2002.

"If the Yankees can renegotiate contracts with their baseball stars," he says, "then they can renegotiate the lease with the city."

George F. Steinbrenner, the owner of the Yankees, said:

"Our lease is 10 times tougher than the Mets. I didn't negotiate the lease. It was transferred to us when we bought the team from CBS. A lease is a lease. It's a pact, it's an agreement."

He said he would be willing to "sit down and talk" with Mr. Goldin, but did not see what there was to renegotiate. As to maintenance costs, he said he knew nothing about that phase of Yankee operations. He said that the Yankees, by becoming such a strong attraction in the last two years had made a lot of money for the city."

Former Mayor John V. Lindsay, who persuaded the city to rebuild the stadium and was in office when the lease was drawn up, said:

"If the Yankees had left it would have been a disaster for the city and particularly for the Bronx. If inflation and delays in rebuilding the stadium boosted the costs of rebuilding the stadium that's regrettable. I think it was the right thing. Brooklyn never recovered when the Dodgers left the city."

For that matter, Mr. Goldin, like nearly all critics of the city's agreement with the Yankees, believes it was a good idea to keep the Yankees here, but insists that the cost was much too high.

FINDINGS OF STUDY

Other findings of the study by The Times were:

Information from engineers that when Mr. Lindsay first estimated the cost of rebuilding Yankee Stadium at $24 million, it was not based on solid engineering data. This is denied by Mr. Lindsay. The latest figure for the overall project is $95.6 million, of which $46.8 million was to rebuild the stadium.

A single clause in the bulky contract cost the city its veto power over phases of reconstruction it considered unnecessary.

The promise to carry out an urban renewal program around the stadium was not kept by the city and the neighborhood has continued to deteriorate—although probably not nearly as much as it would have if the Yankees had left the city.

The private construction of garages that was not part of the original idea—and ran to $26 million—has not brought a penny to the city in a leaseback arrangement.

Whatever disagreement there may be about what happened since the contract, it seems certain that the idea began with Mike Burke, then president of the Yankees owned at the time by CBS Inc.

LINDSAY GIVEN 3 ALTERNATIVES

"I invited John Lindsay to a game at the stadium," recalled Mr. Burke, who is now president of Madison Square Garden. "We had supper at my quarters at the stadium. While we were having some wine in a corner I rehearsed for him the age and sad state of disrepair of the stadium. I told him we had to find some alternative, that we couldn't carry on as we were. Chunks of concrete were beginning to fall.

"I told him there were three alternatives—to rehabilitate the stadium, to move to Shea and share with the Mets or to leave the city, most likely to go to New Jersey. I said my preference was to stay where we were. He said he would help us stay at the stadium. I decided John Lindsay would be as good as his word. I opted to stay in the city."

Built into the contract between the city and the Yankees were provisions for rent for the city that looked good. The city was to get a graduated percentage of the gross at the gate and a percentage of the concession revenue that ranged from 5 to 10 percent.

However, also in the contract was the provision for deductions of maintenance costs from the rent. For the banner year of 1977, the maintenance costs, from figures at the Comptroller's office, were $839,106. For the year before, the maintenance costs reached $798,562.

With the latest figures from the Yankees came a note from David Weidler, treasurer-comptroller of the Yankees, saying:

"Please be advised that presently there are discussions going on with NYC which will further increase the maintenance credits for 1977."

Then there is the dispute about the $24 million estimate by Mr. Lindsay of the cost of the stadium rejuvenation. Men in the engineering firm that did the stadium work say that their data indicated this figure was much too low.

"That $24-million figure was pulled out of the air," says one engineer, then connected with the firm of Praeger, Kavanagh and Waterbury, which did the engineering work. The engineer, who asked not to be named, added: "Mike Burke felt that the city should pay the same amount to keep the Yankees as it paid for Shea for the Mets. And that was $24 million."

Mr. Lindsay insists his estimate was based on a careful study of engineering data. Former Mayor Abraham D. Beame, who was then Comptroller, said that the engineering data showed the cost would probably double $24 million.

A clear connection between the $24 million estimate and the Shea Stadium cost was indicated by Mr. Lindsay in his first public statement on the subject on March 2, 1971, when he said:

"The city is prepared to commit, with the approval of the Board of Estimate and the City Council, municipal resources substantially similar to those invested in Shea Stadium, the city-owned home of the baseball Mets and the football Jets. That sum was $24 million in capital funds."

OBSCURE CLAUSE

When the work of reconstructing the stadium got under way, according to one of the engineers, "changes were made all along the way."

"It was a process of reviews by the Yankees," he said. "The city worried about the rising cost. But the Yankees would insist, and they'd have their way."

This was mainly because of the obscure clause toward the end of the lease, which said:

"To alter and improve the stadium during the period of renovation so as to be equivalent in all respects with the best features of the new stadia at Pittsburgh, Philadelphia and Cincinnati."

One of those who was present during the reconstruction, when the Yankees were playing at Shea during 1974 and 1975, said:

"Each time someone from the city would object to something that would raise costs too much, the Yankee people would point to this trick clause and say that what the Yankees wanted was in Pittsburgh or Philadelphia or Cincinnati and that was that."

One item that swelled the overall total by $26 million was the construction of two garages near the stadium by the Kinney System. The garages were turned over to the city which put them at the disposal of Kinney on a leaseback arrangement from which Kinney is supposed to recoup its investment, with some proceeds to the city.

"The city has not yet received a penny from the garages," said Mr. Goldin.

Kinney has the right to deduct the costs of operation and repairs. At the end of 35 years the garages revert to the city.

A top city engineer who worked on the Yankee project from the beginning said:

"They fooled me when they put in two parking garages. I had found a big lot not too far from the courthouse near the stadium that could have been paved and used for parking. But the Yankees vetoed this."

Many thousands of baseball fans park their cars in empty lots not too far from the stadium and walk to and from night baseball games.

Despite the reconstruction the football Giants, who used to use Yankee Stadium, deserted the city for a new home in the Meadowlands complex in New Jersey. This was done before the argument began about whether the reconstructed stadium was suitable for football. The engineers say it is. All that is necessary, they say, is to make the bullpen level with the rest of the field.

FISCAL CRISIS KILLED RENEWAL

One of the most significant agreements in the city's deal with the Yankees was never kept. The city reneged on its promise to renovate the neighborhood as part of the stadium. The city's explanation is that this part of the plan was killed by the fiscal crisis.

The importance of this part of the plan was stressed in 1974, two years after the Yankee lease was worked out. On July 22 of that year Roger Starr, then head of the city's Housing and Development Administration, in a detailed document to John E. Zuccotti, then chairman of the City Planning Commission, wrote:

"Although the area designated for urban renewal includes the Yankee Stadium, the objective of renewal (is) to improve the environs of the stadium."

This is probably the only phase of the Yankee Stadium project that came in well under the original estimate.

Mr. MOYNIHAN. Mr. President, will the Senator yield?

Mr. PROXMIRE. I yield to the Senator from New York.

Mr. MOYNIHAN. I thank the Senator from Wisconsin, the distinguished chairman of the Committee on Banking, Housing, and Urban Affairs, in whom the hopes and dreams of 8 million New Yorkers necessarily reside, owing to the circumstance of insolvency.

What the chairman says sounds right to me. I think he probably is right in what he has just said. I know of no grounds on which I would dissent. I do not know that much about these contracts.

However, I would like to say—and gently make the point—that because those entrusted to the governance of New York City in the past were irresponsible—and they were; there was irresponsible behavior in many cases, and maybe this was one—I do not in the least propose that it is not really the U.S. Senate, in its responsibility, to respond to the present circumstance, to the President's proposal for fiscal reorganization of the city through the means of long-term loan guarantees. They are not very long-term—about 15 years.

The chairman knows my feelings in that regard, and I simply would not want to agree with him on the one point without reminding him of the other.

Mr. PROXMIRE. I thank the distinguished Senator.

PUBLIC SUPPORT FOR WOMEN IN COMBAT

Mr. PROXMIRE. Mr. President, in a recent editorial the Christian Science Monitor joined the New York Times, the Washington Post, and other newspapers around the country in endorsing expanded use of women in the military—including combat.

The editorial points out that with an estimated 25 percent drop in eligible males by the 1990's, Defense officials predict that without increased use of women the military will either have to return to the draft or raise further the already soaring pay scales for the volunteer services.

The services have already taken the first steps to open up more opportunities for women who are interested in a military career. Now the services are seeking relief from legal restrictions that currently keep women from serving on board Navy ships and from flying combat aircraft, and I hope that the Congress will act soon to give the services the freedom they need in assigning their personnel.

Mr. President, I ask unanimous consent that the Christian Science Monitor editorial of March 16, 1978, be printed in the RECORD.

There being no objection, the editorial was ordered to be printed in the RECORD, as follows:

[From the Christian Science Monitor, Mar. 16, 1978]

WHY NOT WOMEN IN COMBAT?

"The Marine Corps needs a few good women." A recruitment slogan for tomorrow? Perhaps. The U.S. Defense Department, facing an estimated 15 percent drop in the number of 18-year-old males available for military service in the 1980s, is actively seeking to increase the number of women in service and to open up new job opportunities to lure them into uniform. To this end, defense officials have asked Congress to lift the ban on women in combat, and legislation will be introduced this spring to overturn laws that prohibit women from serving aboard ships or on aircraft having combat missions.

The issue of women in combat is certain to stir strong emotional responses in and out of Congress and no doubt will require considerable debate if Americans are eventually to alter their traditional views on the subject. But with many women making strides toward shedding the unfair stereotype of the "weaker sex," assuming new work and leadership roles on an equal footing with their male counterparts, and enjoying greater personal independence, the time seems right to face the issue and give women the opportunity to choose combat positions if they so desire.

Part of the difficulty is in defining "combat" in modern terms. Numerous combat-related jobs—such as piloting aircraft and navigating ships—require primarily mental abilities. And the relative ease with which female cadets at West Point have adjusted to the rigors of combat training there would tend to indicate that even in battlefield situations women have the necessary physical capabilities.

The Soviet Union, Israel, and other countries have used women in combat situations, and in the United States, Army nurses, although classified as noncombatants, have served under fire for more than a hundred years. Although not assigned to infantry, armor, and artillery units, American women already work as truck drivers, communication specialists, helicopter pilots and repairers, and in other positions that submit them to combat conditions. The some 108,000 women in the U.S. military reprsent about 5 percent of the total force; Pentagon officials would like to see the number increased to 7.1 percent. The Army thus far has made wider use of females. The Navy and the Air Force would be the greatest beneficiaries of the moves to relax combat restrictions.

With defense officials estimating a 25 percent drop in the number of eligible males by the 1990s, the alternatives to women in combat-related jobs are not good. Officials predict either a return to the draft or further hikes in the already soaring pay scales for the volunteer services. Why not give women a chance?

A CLARIFICATION OF THE GENOCIDE TREATY

Mr. PROXMIRE. Mr. President, I would like to take this time to clarify an important area of dispute over the Genocide Convention, a treaty which declares intentional acts to destroy, in whole or in part, a national, ethnical, racial, or religious group a crime under international law.

Article 3 of the treaty declares that "direct and public incitement to commit genocide" is punishable according to the provisions of the treaty. This clause has been assailed by opponents of the treaty as an infringement on freedom of speech and the press as guaranteed under the first amendment to the Constitution.

This argument overlooks American judicial history of the last 70 years. In the case of Schenck against United States, the Supreme Court ruled that freedom of speech is not absolute. In that case, it was determined that there are limitations on freedom of speech when that speech posed a "clear and present" danger.

The 1969 case of Brandenburg against Ohio draws a clearer distinction between protected and prohibited speech. The Supreme Court held that protection of free speech was guaranteed "except where such advocacy is directed to inciting or producing imminent lawless action and is likely to incite or produce such action." Incitement to commit genocide falls within this excepting clause.

One would also expect that if this clause were unconstitutional, the American Civil Liberties Union would strenuously object. In fact, the ACLU supports the treaty.

We should not allow obstruction of the treaty on the basis of erroneous legal reasoning. I urge the immediate ratification of the Genocide Treaty.

MESSAGES FROM THE HOUSE

At 1:47 p.m., a message from the House of Representatives delivered by Mr. Hackney, one of its reading clerks, announced that the House has passed the following bill, in which it requests the concurrence of the Senate:

H.R. 50. An act to translate into practical reality the right of all Americans who are able, willing, and seeking to work to full opportunity for useful paid employment at fair rates of compensation; to assert the responsibility of the Federal Government to use all practicable programs and policies to promote full employment, production, and real income, balanced growth, adequate productivity growth, proper attention to national priorities, and reasonable price stability; to require the President each year to set forth explicit short-term and medium-term economic goals; to achieve a better integration of general and structural economic policies; and to improve the coordination of economic policymaking within the Federal Government.

At 4:15 p.m., a message from the House of Representatives delivered by Mr. Berry, one of its reading clerks, announced that, pursuant to the provisions of section 161(a), title I, Public Law 93–618, and upon recommendation of the chairman of the Committee on Ways and Means, the Speaker has selected Mr. VANIK, Mr. MIKVA, Mr. FISHER, Mr. CONABLE, and Mr. STEIGER to be accredited by the President as official advisers to the U.S. delegations to international conferences, meetings, and negotiation sessions relating to the trade agreements during the second session of the 95th Congress.

The message also announced that, pursuant to the provisions of Public Law 95–45, the Speaker has appointed Mr. HAMILTON, chairman, Mr. PICKLE, Mr. BOWEN, Mr. VAN DEERLIN, Mr. DE LA GARZA, Mr. FISHER, Mr. DERWINSKI, Mr. MCCLORY, Mr. COUGHLIN, and Mr. BUTLER as members of the delegation to attend the Conference of the Interparliamentary Union, held in Lisbon, Portugal, from March 22 to April 2, 1978.

The message further announced that, pursuant to section 194 of title 14 of the United States Code, the chairman of the Committee on Merchant Marine and Fisheries has appointed Mr. BIAGGI, Mr. DE LA GARZA, and Mr. TREEN; Mr. MURPHY

of New York, ex officio, to serve as members of the Board of Visitors to the U.S. Coast Guard Academy for the year 1978.

COMMUNICATIONS

The PRESIDING OFFICER laid before the Senate the following communications, together with accompanying reports, documents, and papers, which were referred as indicated:

EC-3127. A communication from the Secretary of Agriculture, transmitting a draft of proposed legislation to authorize the establishment of an international emergency wheat reserve, and for other related purposes; to the Committee on Agriculture, Nutrition, and Forestry.

EC-3128. A communication from the Acting Director, Office of Management and Budget, Executive Office of the President, reporting, pursuant to law, that the appropriation to the Department of Health, Education, and Welfare, Health Care Financing Administration, for "limitation on administrative expenses" for the fiscal year 1978, has been reapportioned on a basis which indicates the necessity for a supplemental estimate of appropriation; to the Committee on Appropriations.

EC-3129. A communication from the Chairman, Federal Deposit Insurance Corporation, transmitting, pursuant to law, a report of the Office of Consumer Affairs and Civil Rights; to the Committee on Commerce, Science, and Transportation.

EC-3130. A communication from the Secretary of Transportation, transmitting, pursuant to law, a report on the Highway Safety Improvement Programs; to the Committee on Commerce, Science, and Transportation.

EC-3131. A communication from the Administrator, General Services Administration, transmitting, pursuant to law, a report of a building project survey for Lansing, Michigan; to the Committee on Environment and Public Works.

EC-3132. A communication from the Secretary of Energy, transmitting a draft of proposed legislation to amend the Atomic Energy Act of 1954, as amended, to improve the nuclear siting and licensing process, and for other purposes; to the Committee on Environment and Public Works.

EC-3133. A secret communication from the Chairman, Interagency Group, United States Arms Control and Disarmament Agency, transmitting, pursuant to law, errata sheets for insertion in the FY 1979 ACIS; to the Committee on Foreign Relations.

EC-3134. A secret communication from the Director, United States Arms Control and Disarmament Agency, transmitting, pursuant to law, the FY 1979 Arms Control Impact Statements; to the Committee on Foreign Relations.

EC-3135. A communication from the Assistant Legal Adviser for Treaty Affairs, Department of State, transmitting, pursuant to law, international agreements other than treaties entered into by the United States within sixty days thereof; to the Committee on Foreign Relations.

EC-3136. A communication from the Comptroller General of the United States, transmitting, pursuant to law, a report entitled "The Critical Role of Government in International Air Transport," March 17, 1978; to the Committee on Government Affairs.

EC-3137. A communication from the Comptroller General of the United States, transmitting, pursuant to law, a report entitled "Information and Referral for People Needing Human Services—A Complex System that Should be Improved," March 20, 1978; to the Committee on Governmental Affairs.

EC-3138. A communication from the Comptroller General of the United States, transmitting, pursuant to law, a report entitled "Consistent and Uniform Treatment of Inflation Needed in Program Cost Estimates Provided to the Congress," March 20, 1978; to the Committee on Governmental Affairs.

EC-3139. A communication from the Chairman, Council of the District of Columbia, transmitting, pursuant to law, an act adopted by the Council on February 21, 1978, which would amend the District of Columbia Police and Firemen's Salary Act of 1958 to increase salaries, and for other purposes (Act 2-156); to the Committee on Governmental Affairs.

EC-3140. A communication from the Records Officer, Finance Group, United States Postal Service, transmitting, pursuant to law, proposals for ten systems of records; to the Committee on Governmental Affairs.

EC-3141. A communication from the Administrator, General Services Administration, transmitting, the annual report on the major programs and activities of the General Services Administration for 1977; to the Committee on Governmental Affairs.

EC-3142. A communication from the Secretary of Health, Education, and Welfare, transmitting a draft of proposed legislation to revise and reform the Federal law applicable to drugs for human use and to establish a National Center for Clinical Pharmacology within the Department of Health, Education, and Welfare; to the Committee on Human Resources.

EC-3143. A communication from the Secretary of the Interior, transmitting pursuant to law, a report on activities under the Freedom of Information Act during calendar year 1977; to the Committee on the Judiciary.

EC-3144. A communication from the Commissioner, Immigration and Naturalization Service, Department of Justice, transmitting, pursuant to law, orders entered in cases in which the authority contained in section 212(d)(3) of the Immigration and Nationality Act was exercised in behalf of such aliens; to the Committee on the Judiciary.

REPORTS OF COMMITTEES

The following reports of committees were submitted:

By Mr. PELL, from the Committee on Human Resources, with amendments and an amendment to the title:

S. 2452. A bill to authorize funds for the Hubert H. Humphrey Institute of Public Affairs (Rept. No. 95-706).

Mr. ROBERT C. BYRD (for Mr. MUSKIE), from the Committee on the Budget, without amendment:

S. Res. 415. A resolution waiving section 402(a) of the Congressional Budget Act of 1974 with respect to the consideration of H. R. 6782 (Rept. No. 95-707).

S. Res. 418. A resolution waiving section 402(a) of the Congressional Budget Act of 1974 with respect to the consideration of S. 2481 (Rept. No. 95-708).

EXECUTIVE REPORTS OF COMMITTEES

The following executive reports of committees were submitted:

By Mr. RIBICOFF, from the Committee on Governmental Affairs:

James T. McIntyre, Jr., of Georgia, to be Director of the Office of Management and Budget (Ex. Rept. 95-16).

(The nomination from the Committee on Governmental Affairs was reported with the recommendation that it be confirmed, subject to the nominee's commitment to respond to requests to appear and testify before any duly constituted committee of the Senate.)

INTRODUCTION OF BILLS AND JOINT RESOLUTIONS

The following bills and joint resolutions were introduced, read the first time and, by unanimous consent, the second time, and referred as indicated:

By Mr. TOWER (for himself and Mr. DOLE):

S. 2764. A bill to amend the Export-Import Bank Act to preclude discrimination by the Bank against the financing of agricultural exports; to the Committee on Banking, Housing, and Urban Affairs.

By Mr. EASTLAND:

S. 2765. A bill to eliminate the right to a jury trial in certain tax actions against the United States; to the Committee on the Judiciary.

By Mr. CURTIS:

S. 2766. A bill for the relief of Philip W. Morgan of Britton, South Dakota; to the Committee on Governmental Affairs.

By Mr. CANNON (for himself, Mr. PEARSON, and Mr. MAGNUSON) (by request):

S. 2767. A bill to amend section 204 of the Marine Protection, Research, and Sanctuaries Act of 1972 to extend the authorization for appropriations for fiscal years 1979 and 1980; to the Committee on Commerce, Science, and Transportation.

S. 2768. A bill to amend section 8 of the National Advisory Committee on Oceans and Atmosphere Act of 1977 to extend the authorization of appropriations; to the Committee on Commerce, Science, and Transportation.

S. 2769. A bill to amend section 304 of the Marine Protection, Research, and Sanctuaries Act of 1972, as amended, to extend the authorization for appropriations for fiscal years 1979 and 1980; to the Committee on Commerce, Science, and Transportation.

By Mr. RIEGLE:

S. 2770. A bill to amend the Elementary and Secondary Education Act of 1965 to insure educational equity, and for other purposes; to the Committee on Human Resources.

By Mr. STEVENS (for himself, Mr. KENNEDY, Mr. MAGNUSON, and Mr. HOLLINGS):

S.J. Res. 124. A joint resolution to authorize the President to issue a proclamation designating the week beginning on April 16 through April 22, 1978, as "National Oceans Week." Considered and passed.

STATEMENTS ON INTRODUCED BILLS AND JOINT RESOLUTIONS

By Mr. TOWER (for himself and Mr. DOLE):

S. 2764. A bill to amend the Export-Import Bank Act to preclude discrimination by the Bank against the financing of agricultural exports; to the Committee on Banking, Housing, and Urban Affairs.

(The remarks of Mr. TOWER when he introduced the bill appear earlier in today's proceedings.)

By Mr. CANNON (for himself, Mr. PEARSON, and Mr. MAGNUSON) (by request):

S. 2767. A bill to amend section 204 of the Marine Protection, Research, and Sanctuaries Act of 1972 to extend the authorization for appropriations for fiscal years 1979 and 1980; to the Committee on Commerce, Science, and Transportation.

● Mr. CANNON. Mr. President, I introduce today, at the request of the

Department of Commerce, and on behalf of myself and my colleagues, Mr. MAGNUSON and Mr. PEARSON, a bill to amend section 204 of the Marine Protection, Research, and Sanctuaries Act of 1972 to extend the authorizations for appropriations for fiscal years 1979 and 1980.

I ask unanimous consent that the letter of transmittal and statement of purpose be printed in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

Hon. WALTER F. MONDALE,
President of the Senate,
Washington, D.C.

DEAR MR. PRESIDENT: Enclosed are six copies of a draft bill "to amend section 204 of the Marine Protection, Research, and Sanctuaries Act of 1972, as amended, to extend the authorization for appropriations for fiscal years 1979 and 1980" together with a statement of purpose and need in support thereof.

The Department has determined that this proposed legislation does not constitute a major proposal requiring preparation of an Economic Impact Statement under Executive Orders 11821 and 11949, and OMB Circular A–107.

We have been advised by the Office of Management and Budget that there would be no objection from the standpoint of the Administration's program to the submission of this legislation to the Congress, and that its enactment would be in accord with the program of the President.

Sincerely,

JUANITA M. KREPS.

Enclosures.

STATEMENT OF PURPOSE AND NEED

Section 204 of the Marine Protection, Research, and Sanctuaries Act of 1972 (P.L. 92–532) authorizes funds to be appropriated to support research activities carried out pursuant to Title II (sections 201, 202, and 203) of the Act. These sections provide for: (201) initiation of a program of monitoring and research regarding the effects of dumping of waste materials into ocean waters; (202) research into the long-range effects of pollution, overfishing, and other man-induced changes to ocean ecosystems; and (203) promotion of programs of research on alternatives to ocean dumping. Funding under Section 204 is authorized through fiscal year 1978 in the amount of $6,500,000.

Funding will be required in FY 79 and FY 80 to support NOAA activities in response to Sections 201 and 202. No funds will be required for Section 203 because that mandate is expected to be transferred from NOAA to EPA pursuant to legislation now under consideration by the Congress.

With the phase-out of ocean dumping research by the Marine Ecosystems Analysis (MESA) New York Bight Project in FY 1981, the NOS-managed Ocean Dumping Program will be taking up the slack. The present (FY 1978) effort under section 201 includes studies of 3 dumpsites at a cost of $1.87 million. In FY 1979 work will intensify on 2 of these sites, a fourth dumpsite will be added, and a complementary program of research on dumped materials will be initiated. Additional funding required in FY 1979 will bring the total Section 201 allocation to $3,345 million. In 1980 the program would include continued studies at dumpsites, monitoring of deepwater dumpsite (DWD) 106, and support of the complementary research program.

For research on long-range effects of pollutants under Section 202, NOAA will require $2.560 million in FY 1979. This includes $0.4 million for establishing a program management and coordination group and for developing a program management plan. An additional $1.5 million is required for support of long-range effects research within NOAA and in other Federal agencies, and private research organizations and universities. A research program, to be funded at a level of $.660 million, will be initiated in the Gulf of Mexico for understanding and predicting environmental threats, such as industrial pollution, and lower than normal oxygen concentrations. For FY 80, funding for Section 202 would continue support of these tasks.●

By Mr. CANNON (for himself, Mr. PEARSON, and Mr. MAGNUSON) (by request):

S. 2768. A bill to amend section 8 of the National Advisory Committee on Oceans and Atmosphere Act of 1977 to extend the authorization of appropriations; to the Committee on Commerce, Science, and Transportation.

● Mr. CANNON. Mr. President, I introduce today, at the request of the Department of Commerce, and on behalf of myself and my colleagues (Mr. MAGNUSON and Mr. PEARSON), a bill to amend section 8 of the National Advisory Committee on Oceans and Atmosphere Act of 1977 to extend the authorization of appropriations.

I ask unanimous consent that the letter of transmittal and statement of purpose be printed in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

THE SECRETARY OF COMMERCE,
Washington, D.C., February 28, 1978.

Hon. WALTER F. MONDALE,
President of the Senate,
Washington, D.C.

DEAR MR. PRESIDENT: Enclosed are six copies of a draft bill "to amend section 8 of the National Advisory Committee on Oceans and Atmosphere Act of 1977 to extend the authorization of appropriations" together with a statement of purpose and need in support thereof.

The Department has determined that this proposed legislation does not constitute a major proposal requiring preparation of an Economic Impact Statement under Executive Orders 11821 and 11949, and OMB Circular A–107.

We have been advised by the Office of Management and Budget that there would be no objection from the standpoint of the Administration's program to the submission of this legislation to the Congress, and that its enactment would be in accord with the program of the President.

Sincerely,

JUANITA M. KREPS.

Enclosures.

STATEMENT OF PURPOSE AND NEED

This legislation, which the Department is proposing on behalf of the National Advisory Committee on Oceans and Atmosphere (NACOA), would provide for a two year extension of the authorization for appropriations for NACOA.

NACOA was originally established by Public Law 92–125 of August 16, 1971, to consist of 25 non-federal members having an interest and expertise in oceanic and atmospheric affairs. Public Law 95–63 of July 5, 1977, repealed the Act of August 16, 1971, and established a new committee of 18 members. NACOA is now mandated to (1) undertake a continuing review, on a selective basis, of national ocean policy, coastal zone management, and the status of the marine and atmospheric science and service programs of the United States; and (2) advise the Secretary of Commerce with respect to the carrying out of the programs administered by the National Oceanic and Atmospheric Administration. NACOA submits an annual report to the President and to the Congress and submits such other reports as from time to time be requested by the President or the Congress.

NACOA has been recognized as a Federal advisory committee that provides effective and timely advice both to the Executive Branch and to the Congress. Enactment of this proposed legislation would provide authorizations for fiscal year 1979 at the level ($484,000) included in the President's program, and for fiscal year 1980 for such sums as may be necessary.

The proposed amendments would provide for a postponement by one year of the termination of the appointments of the members of NACOA. Section 3(b)(1) of the Act provides that of the original appointees, six shall be appointed for a term of one year, six for a term of two years, and six for a term of three years. Section 3(b)(2) provides that the terms of office for members first appointed after enactment shall begin July 1, 1977. The effect of these provisions is that six of the original members would have to be replaced on July 1, 1978. Since the members were only appointed on January 24, 1978, the suggested amendments are necessary to insure that the members who were appointed for the one-year term will have an opportunity to contribute significantly by serving until July 1, 1979 instead of July 1, 1978.●

By Mr. CANNON (for himself, Mr. PEARSON, and Mr. MAGNUSON) (by request):

S. 2769. A bill to amend section 304 of the Marine Protection, Research, and Sanctuaries Act of 1972, as amended, to extend the authorization for appropriations for fiscal years 1979 and 1980; to the Committee on Commerce, Science, and Transportation.

● Mr. CANNON. Mr. President, I introduce today, at the request of the Department of Commerce, and on behalf of myself and my colleagues, Mr. PEARSON and Mr. MAGNUSON, a bill to amend section 304 of the Marine Protection, Research, and Sanctuaries Act of 1972, as amended, to extend the authorization for appropriations for fiscal years 1979 and 1980.

I ask unanimous consent that the letter of transmittal and statement of purpose be printed in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

THE SECRETARY OF COMMERCE,
Washington, D.C. March 2, 1978.

Hon. WALTER F. MONDALE,
President of the Senate,
Washington, D.C.

DEAR MR. PRESIDENT: Enclosed are six copies of a draft bill: "to amend section 304 of the Marine Protection, Research, and Sanctuaries Act of 1972, as amended, to extend the authorization for appropriations for fiscal years 1979 and 1980" together with a statement of purpose and need in support thereof.

The Department has determined that this proposed legislation does not constitute a major proposal requiring preparation of an Economic Impact Sttatement under Executive Orders 11821 and 11949, and OMB Circular A–107.

We have been advised by the Office of Management and Budget that there would be no objection from the standpoint of the Administration's program to the submission of this legislation to the Congress, and that its enactment would be in accord with the program of the President.

Sincerely,

JUANITA M. KREPS.

Enclosures.

STATEMENT OF PURPOSE AND NEED

Section 304 of the Marine Protection, Research, and Sanctuaries Act of 1972, as amended, authorized to be appropriated funds to be used by the Secretary of Commerce to acquire, develop and manage marine sanctuaries. This bill will extend the appropriations authorization for section 304 of the Act at a level of $500,000 for fiscal year 1979 and such sums as may be necessary for fiscal year 1980. The President's message to Congress on the environment dated May 23, 1977, directed the Secretary of Commerce to examine all marine areas where development activities such as outer continental shelf oil and gas leasing, deepwater port construction or deep sea mining appear imminent and to identify areas for potential marine sanctuary designations. The President's message emphasizes the role of the marine sanctuaries program in protecting our marine resources. Previously P.L. 94–62 extended the appropriations authorization or Title III through fiscal year 1976 at a $6.2 million level and at a $1.55 million level for the transitional quarter. P.L. 94–326 authorized $500,000 for fiscal year 1977. P.L. 94–153 authorized $500,000 for fiscal year 1978.●

By Mr. RIEGLE:

S. 2770. A bill to amend the Elementary and Secondary Education Act of 1965 to insure educational equity, and for other purposes; to the Committee on Human Resources.

WOMEN'S EDUCATIONAL EQUITY ACT AMENDMENTS OF 1978

● Mr. RIEGLE. Mr. President, today I am pleased to introduce legislation to revise and expand the Women's Educational Equity Act. The Women's Educational Equity Act (WEEA) should be viewed along with title IX of the Education Amendments of 1972 as the primary tools available to the Federal Government to combat sex bias and stereotyping in education in this country today. My bill will have the effect of reemphasizing the importance of women's educational equity by first, removing the current program from the Special Projects Act, and second, expanding its purposes to include assisting educational agencies, schools, and colleges in complying with title IX.

This bill, in particular, will create a "two-tier" funding structure, which will provide funds for national level development and demonstration projects, and local educational level implementation projects. Seventy-five percent of the funds available to assist title IX compliance and educational equity are reserved for local education agencies. Eighty million dollars has been authorized for fiscal year 1980 and each of the 3 succeeding fiscal years. Several other technical amendments have also been incorporated in order that we might insure clarity.

Mr. President, I ask unanimous consent that a portion of the testimony of the National Coalition for Women and Girls in Education, before the Subcommittee on Elementary, Secondary and Vocational Education of the House Education and Labor Committee on Thursday, July 14, 1977, and the text of this bill be printed in the RECORD.

There being no objection, the bill and material were ordered to be printed in the RECORD, as follows:

S. 2770

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the Women's Educational Equity Act Amendments of 1978.

SEC. 2. The Elementary and Secondary Education Act of 1965 is hereby amended by adding, in place of section 408, the following:

WOMEN'S EDUCATIONAL EQUITY

SEC. 408. (a)(1) The Congress hereby finds and declares that educational programs in the United States, as presently conducted, are frequently inequitable as such programs relate to women and frequently limit the full participation of all individuals in American society.

(2) It is the purpose of this section to provide educational equity for women in the United States and to provide financial assistance to enable educational agencies and institutions to meet the requirements of title IX of the Education Amendments of 1972.

(b) As used in this section, the term "Council" means the National Advisory Council on Women's Educational Programs.

(c)(1) The Commissioner is authorized to make grants to, and enter into contracts with, public agencies, private nonprofit agencies, organizations, and institutions, and individuals, including student and community groups, for activities designed to achieve the purpose of this section at all levels of education, including preschool, elementary and secondary education, higher education, and adult education. These activities may include—

(A) demonstration, developmental, and dissemination activities of national, statewide, or general significance, including—

(i) the development and evaluation of curricula, textbooks, and other educational materials related to educational equity;

(ii) model preservice and inservice training programs for educational personnel with special emphasis on programs and activities designed to provide educational equity;

(iii) research and development activities designed to advance educational equity;

(iv) guidance and counseling activities, including the development of nondiscriminatory tests, designed to insure educational equity;

(v) educational activities to increase opportunities for adult women, including continuing educational activities and programs for underemployed and unemployed women; and

(vi) the expansion and improvement of educational programs and activities for women in vocational education, career education, physical education, and educational administration; and

(B) assistance to eligible entities to pay a portion of the costs of the establishment and operation, for a period of not to exceed two years, of special programs and projects of local significance to provide equal opportunities for both sexes, including activities listed in subparagraph (A), activities incident to achieving compliance with title IX of the Education Amendments of 1972 and other special activities designed to achieve the purposes of this paragraph. Not less than 75 per centum of funds used to support activities covered by this paragraph shall be used for awards to local educational agencies.

(2) For each fiscal year, the Commission shall use $15,000,000 from the funds available under this section to support activities described in subparagraph (A) of paragraph (1). Any funds in excess of $15,000,000 available under this section shall be used to support activities described in subparagraph (B) of paragraph (1).

(3) A grant may be made and a contract may be entered into under this section only upon application to the Commissioner, at such time, in such form, and containing or accompanied by such information as the Commissioner may prescribe. Each such application shall—

(A) provide that the program or activity for which assistance is sought will be administered by or under the supervision of the applicant.

(B) describe a program for carrying out one or more of the purposes set forth in this subsection which holds promise of making a substantial contribution toward attaining such purposes; and

(C) set forth policies and procedures which insure adequate evaluation of the activities intended to be carried out under the application;

(4) Nothing in this section shall be construed as prohibiting men and boys from participating in any programs or activities assisted under this section.

(d) In addition to the authority of the Commissioner under subsection (c), the Commissioner shall carry out a program of small grants (as part of the grant program administered under subsection (c)(1)(A)), not to exceed $25,000, each, in order to support innovative approaches to achieving the purposes of this section; and for that purpose the Commissioner is authorized to make grants to public and private nonprofit agencies and to individuals.

(e) The Commissioner shall establish criteria and priorities for awards under this section to insure that available funds are used for those purposes that most effectively will achieve the purposes of this section. Those criteria and priorities shall be promulgated in accordance with section 431 of the General Education Provisions Act.

(f)(1) There is established in the Office of Education a National Advisory Council on Women's Educational Programs. The Council shall be composed of—

(A) seventeen individuals, some of whom shall be students, and who shall be appointed by the President, by and with the advice and consent of the Senate, from among individuals, broadly representative of the general public who, by virtue of their knowledge or experience, are versed in the role and status of women in American society;

(B) the staff Director of the Civil Rights Commission;

(C) the Director of the Women's Bureau of the Department of Labor; and

(D) the Director of the Women's Action Program of the Department of Health, Education, and Welfare.

The Council shall elect its own Chairperson from among the members indicated in subparagraph (A).

(2) The term of office of each member of the Council appointed under subparagraph (A) of paragraph (1) shall be three years, except that—

(A) the members first appointed under such clause shall serve as designated by the President, six for a term of one year, five for a term of two years, and six for a term of three years; and

(B) any member appointed to fill a vacancy occurring prior to the expiration of the term for which his or her predecessor was appointed shall be appointed for the remainder of such term.

(3) The Council shall—

(A) advise the Secretary, Assistant Secretary, and the Commissioner on matters relating to equal educational opportunities for women and policy matters relating to the administration of this section;

(B) make recommendations to the Commissioner with respect to the allocation of any funds pursuant to this section, including criteria developed to insure an appropriate geographical distribution of approved programs and projects throughout the Nation;

(C) recommend criteria for the establishment of program priorities;

(D) make such reports as the Council determines appropriate to the President and

the Congress on the activities of the Council; and

(E) disseminate information concerning the activities of the Council under this section.

(4) The provisions of part D of the General Education Provisions Act shall apply with respect to the Council established under this subsection.

(g) The Commissioner is directed, at the end of each fiscal year, to submit to the President and the Congress and to the Council a report setting forth the programs and activities assisted under this section, and to provide for the distribution of this report to all interested groups and individuals, including the Congress, from funds authorized under this section. After receiving the report from the Commissioner, the Council shall evaluate the programs and projects, assisted under this section and include such evaluation in its annual report.

(h) For the purposes of carrying out this section there are authorized to be appropriated $80,000,000 for fiscal year 1980 and each of the three succeeding fiscal years."

TESTIMONY OF THE NATIONAL COALITION FOR WOMEN AND GIRLS IN EDUCATION

Mr. Chairman and members of the Subcommittee, we represent organizations active in the National Coalition for Women and Girls in Education. The coalition is a broad-based network of over 50 national organizations committed to equal opportunity for girls and women in our schools and colleges.

We are pleased to testify in support of a new and expanded authorization for the Women's Educational Equity Act. Now that Congress has made equal education opportunity a matter of law, the Act is essential to efforts throughout the education system to find a means to that end.

INEQUITIES PERSIST, DESPITE LAWS FOR EQUAL OPPORTUNITY

Title IX of the Education Amendments of 1972 has opened the door; five years later, full equality for students and employees is still a long way down the road. Title IX has not been enforced. Fewer than one-fourth of all Title IX complaints brought against public education systems since the law passed have been investigated and closed.* And HEW, which took three long years to even write a regulation spelling out what institutions need to do to end different treatment of the sexes, has taken virtually no action on Title IX independent of citizen complaints.

Thus even minimal compliance with basic principles of equal opportunity has been left to the good will and initiative of institutions which often find change of any kind difficult. Some schools and colleges have taken up the challenge and mobilized their own communities to identify and end discrimination based on sex. At the other extreme is the Southern school superintendent who told the American Friends Service Committee his school district would comply "on the last minute of the last day." Most institutions probably fall somewhere in between, taking the simplest and most obvious steps to reduce discrimination while avoiding tackling the more difficult and complex changes needed to make full equality a reality.

A look at education today makes it clear that we are still a long way from that equality. Textbooks, which are not covered by the regulation on Title IX, continue to reflect pervasive and blatant sex bias, from elementary school readers to medical school texts. As our children learn science, spelling, reading and math, they are still absorbing subtler messages reinforcing old ideas about the inferiority of women and the home as woman's only rightful place.

*Source: an unpublished study by the Project on Equal Education Rights.

Many textbooks in use in the classroom today still portray boys and men as active, independent, adventurous and successful, while girls are consistently portrayed as passive, dependent, and prone to failure. And, despite today's reality that every young woman must be prepared to support herself and possibly her family for some years of her adult life, young people are still reading textbooks that suggest just one employment option for adult women—that of full-time homemaker in their own homes. For example, a University of California study of widely used textbooks counted pictures of men in some 150 occupational roles, while almost every woman illustrated was a full-time housewife.

According to another study, this one made by a group of women in Princeton, New Jersey, "witch" is one of only 26 adult occupations shown for women while men are found in 147 jobs that vary from building contractor to explorer, from shoemaker to zookeeper. And if we take out mother, queeen, and witch, we're down to 23 occupational roles for women, most of them the traditional ones of teacher, school nurse, secretary and cleaning woman.

Last October, a report of the National Institute of Education on "The Development of Career Awareness in Young Children" confirmed that children do develop ideas about careers at an early age, and that they almost always develop limited, stereotypic ideas about appropriate careers for men and women that persist through early adulthood when they begin to make their own choices about work and careers.

This Subcommittee has heard extensive testimony about the dramatic differences in vocational training for young men and women today, so there is no need to repeat the sorry results of a long history of sex segregation in job training. You should know, however, that the most recent vocational education statistics show little progress. Over forty percent of female "vocational" education students are still, in 1975, learning homemaking skills for use in their own home, not skills for a paying job. And the percentage of young women in vocational education who were learning technical, trade and industrial skills—which lead to higher-paying jobs—is still tiny: only 6%—one percentage point higher than in 1972. A UCLA study last fall of college freshmen showed wide discrepancies between the number of young men and women who planned careers in traditionally male and female fields—in teaching, business, engineering, health, and so on.

In athletics, Title IX clearly has had an impact in reducing blatant inequities. According to recent figures from the National Federation of State High School Associations, more than four times as many girls are competing this year on high school sports teams as did in 1970. However, reports also make it clear that the progress so far stops far short of equality. Girls still have many fewer teams and sports to choose from, and their teams receive less funding, less equipment, poorer facilities, fewer opportunities for coaching and practice, and little or no publicity. From West Virginia, which ties with Kentucky for the lowest proportion of its high school teams for girls, a high school student recently wrote:

"A lot of girls here are very athletic and would like to participate in sport programs, if only we had any. I've talked to the principal and he said they didn't have enough room or money to give us any sports. He also said that if I liked sports to go watch the boys."

In employment, laws against sex discrimination seem to have made barely a dent on an overall pattern of women dominating lower paid teaching and service jobs, and a virtual male monopoly on school and college administration. In elementary schools, where for example, over 80% of the teachers are women, fewer than 20% of the principalships are held by women, and the proportion of women principals has been steadily declining for decades. And women have almost been eliminated from the ranks of public secondary school principals. The latest data show women holding less than 3% of junior high and less than 2% of senior high principalships. That's a drop from 12% and 6%, respectively, in 1950.

In higher education, opportunities for women continue to be much more restricted than in elementary and secondary education. Only 5% of postsecondary institutions are headed by women, and most of those are in small women's or church-related colleges. A recent report by the College and University Personnel Association, for example, finds women both underrepresented and underpaid in top administrative positions in higher education. Of just over 1,000 institutions surveyed, women held 16% of the administrative positions and earned only 80% of the salaries of men with the same job title at the same kind of institution. And, in 1976, women held only 9.6% of the full professorships at our institutions of higher education, a slight drop from the previous year. Only 17% of associate professorships were held by women in 1976, up a mere 0.3% from 1975.

THE EDUCATION SYSTEM NEEDS HELP TO MAKE FULL EQUALITY A REALITY

Obviously, laws are not enough. The laws against sex discrimination are poorly enforced, often ignored—and they are powerless to change many of the most important barriers to equality.

Laws alone will not effectively end covert discrimination in the behind-closed-doors selection of school principals and tenured faculty. Laws alone will not stop counselors from advising students to follow the career paths established by tradition for their sex. Laws alone will not prevent teachers from encouraging boys in math and science and girls in music and art. Nor can they change a school superintendent's firm conviction that his schools are doing well to prepare every girl for a lifetime of unpaid domesticity in her own home.

So many things are needed before words in a statute are translated to truly open opportunities regardless of sex that we can only begin to list them here today. Among the essentials which do not now exist or which are not widely available are:

Programs to build community and parent support and involvement vital to the effort to achieve equality in the schools;

Programs to inform students of their rights to equality regardless of sex, and to encourage them to take advantage of those new rights to the fullest;

Practical advice for teachers and administrators on how to make the transition from old discriminatory programs to brand new equitable ones. This is a most desperate need where the sexes have traditionally been segregated, such as physical education and vocational training;

Guidance for teachers and curriculum development specialists in changing the curriculum at all levels of education to reflect new information and research about women and the idea that girls as well as boys need strong and varied role models of their own sex in their formative years;

Models for encouraging girls—and boys—women and men—to explore occupational training in fields once considered closed to members of their sex, and for giving them the support they need as often lonely pioneers in training for those fields;

techniques for challenging the informal but powerful barriers that keep women out of influential administrative and other lead-

ership positions throughout the education system;

training for education personnel of all kinds on the subtleties of sex discrimination and how to avoid them in their own work;

basic information for everyone with a stake in education about what the laws against sex discrimination mean for their schools, and what they can do to make sure these laws are implemented;

better information for educators, public policy-makers, and the public assessing the nation's progress in combating sex discrimination in education.

In short, equal opportunity will only come about when communities, schools and college campuses can get help in three areas:

in ending sex discrimination now built into educational practice, and its long-term lingering effects;

in developing new programs to address the special needs of people of both sexes who want to explore new opportunities which are unfamiliar to many people of their own sex;

in defining their own equal opportunity goals in the context of solid information about progress nationwide in achieving an end to inequity.

CURRENT EFFORTS TO HELP ARE EXTREMELY LIMITED

Considering the enormous challenge these needs represent, present public and private efforts to meet those needs are meager. A small number of national organizations have, either on their own, or with the help of a small amount of seed money from foundations or public sources, undertaken projects of their own to encourage efforts to achieve equality in the schools. They range from a project of the American Association of School Administrators to support more women administrators to a six-state campaign of the American Friends Service Committee to check Title IX compliance in Southern schools. In addition, local community and education groups in some communities have taken a leading role in pressing for and helping promote equity for the sexes in their schools—holding workshops for parents and teachers, organizing non-traditional career awareness activities for young people, calling on school boards to make equality for the sexes an educational priority, and so on.

In HEW, funds to support equity for both sexes in education come primarily from two sources. First, Title IV of the 1964 Civil Rights Act, thanks to a 1972 amendment, is providing limited but essential technical assistance and training to school districts seeking to comply with Title IX. These funds are restricted to technical assistance and training, and they are restricted to assistance for public elementary and secondary schools. Title IV projects have been among the very few resources for basic compliance information and assistance for public school personnel.

Second is the subject of our testimony today: the Women's Educational Equity Act. Enacted in 1974 with the broadest of mandates to "provide educational equity for women in the United States," the program is now going into its second year.

Analysis of the slate of grants awarded in the first funding cycle shows that projects supported by this program have addressed problems of equity for women at all levels of education—preschool, elementary, secondary, higher and adult education. In the first year, priority was given to grant applications in three areas:

the development of training packages, mostly for teachers;

the implementation of training programs for educational administrators and other personnel; and

the development of model programs that broaden the career options of women.

In addition, small grants, limited to $15,000, were authorized for the support of innovative approaches to achieving educational equity.

Most of the small projects funded involved the development of instructional materials and guides, although some projects addressed the special needs of women offenders, women returning to educational programs after long absences, and women and girls choosing nontraditional careers. While we withhold final judgment until we have an opportunity to review the results of the first year's efforts, we are optimistic about the potential for accomplishment by the recipients of these small grants.

Although it is much too early to assess the effectiveness of the 67 grants and handful of contracts that have been funded in the first funding cycle, it is already unmistakably clear that the program, as presently constituted, has not and is not likely to address most of the urgent needs reflected in its ambitious mandate:

Because funds have been so limited ($7.27 million this fiscal year), the Office of Education has wisely chosen to restrict the program to development and demonstration projects which have a potential for national impact. That means that no funds are available to help support the costs for, or offer incentives to, institutions that want to take difficult or complex steps to open up new opportunities for students or employees.

Development and demonstration funds available last year primarily went for the development of general training materials and training programs for elementary and secondary school staff. Little attention has gone to badly needed development and demonstration projects in many other areas where resources are urgently needed: in community and student involvement in the process of achieving educational equity, in the implementation of nonsexist physical education and athletics programs, in broadening courses to include material about women or supplementing sexist textbooks, and so on.

In addition, the program has not effectively tackled the tremendous dissemination job needed to get information and materials that do exist into the hands of the many different groups that are demanding them—community and women's groups, parents, students, teachers, administrators, and so on. The WEEA program has recently let a contract to explore the creation of a "communications network" on sexism in education, but the choice of a research and testing firm with limited experience either with school-based change or the community groups concerned about the problems to plan the clearinghouse suggests that a broad range of alternative dissemination strategies for reaching the many different audiences will still be needed.

While different program priorities could channel existing funds in somewhat different directions, shifts in the way the program is administered could only make a miniscule difference in the programs's ability to meet these needs. (I would like to submit for the record the suggestions of 22 organizations of changes they believe could and should be made.)

Under current legislative constraints, the need for information, for materials, for models and practical ideas, and for help in supporting the costs of changing from old practices to new, open opportunities, will remain largely unmet—however the Office of Education allocates its Women's Equity funds. These needs simply cannot be seriously addressed with program funds at current levels. Last year, despite the fact that it was the program's first year and information about it was scanty, the Womens' Educational Equity program received about 20 applications for each grant made. Out of some $105 million requested, only $4.7 million in grants was awarded. And while these figures themselves suggest a great demand and high expectations for the program, it is clear that the potential demand for the broad range of activities envisioned by the original act is enormous. If the agency had not restricted most of the funds to "capacity building" projects in three priority areas, the application rate would certainly have been a great deal higher * * * ●

ADDITIONAL COSPONSORS

S. 310

At the request of Mr. MATSUNAGA, the Senator from Mississippi (Mr. EASTLAND) was added as a cosponsor of S. 310, providing for the reimbursement of licensed practical nursing services under the medicare and medicaid programs.

S. 927

At the request of Mr. DOLE, the Senator from Arizona (Mr. DECONCINI) and the Senator from New Mexico (Mr. DOMENICI) were added as cosponsors of S. 927, the Minority Business Development and Assistance Act of 1977.

S. 993

At the request of Mr. PACKWOOD, the Senator from Oklahoma (Mr. BARTLETT) was added as a cosponsor of S. 993, the Alien Employment Act.

S. 2416

At the request of Mr. JAVITS, the Senator from New Mexico (Mr. DOMENICI) and the Senator from South Carolina (Mr. THURMOND) were added as cosponsors of S. 2416, the Nurse Training Amendments of 1978.

S. 2487

At the request of Mr. CLARK, the Senator from Florida (Mr. STONE) and the Senator from Kentucky (Mr. FORD) were added as cosponsors of S. 2487, a bill to amend the Public Health Service Act to provide for greater emphasis on rural health care needs in health planning.

S. 2685

At the request of Mr. HAYAKAWA, the Senator from Utah (Mr. GARN) and the Senator from Minnesota (Mr. ANDERSON) were added as cosponsors of S. 2685, the Youth Employment Incentive and Social Bonus Act of 1978.

S. 2691

At the request of Mr. WILLIAMS, the Senator from Vermont (Mr. LEAHY) was added as a cosponsor of S. 2691, a bill to provide for the furnishing of congregate housing services under the United States Housing Act of 1937.

S. 2716

At the request of Mr. NELSON, the Sentor from Massachusetts (Mr. BROOKE) was added as a cosponsor of S. 2716, the Interstate Land Sales Full Disclosure Act Amendments of 1978.

S. 2757

At the request of Mr. MAGNUSON, the Senator from Hawaii (Mr. MATSUNAGA) was added as a cosponsor of S. 2575, the National Agricultural Land Policy Act.

S. CON. RES. 72

At the request of Mr. CASE, the Senator from Maryland (Mr. MATHIAS), the Senator from New Jersey (Mr. WILLIAMS), the Senator from Colorado (Mr. HART), the Senator from Colorado (Mr. HASKELL) and the Senator from Pennsylvania (Mr. SCHWEIKER) were added as cosponsors of Senate Concurrent Resolution 72, regarding efforts to counter international terrorism.

SENATE RESOLUTION 419—SUBMISSION OF A RESOLUTION RELATING TO THE KIDNAPPING OF ALDO MORO

Mr. DECONCINI (for himself, Mr. BROOKE, Mr. LEAHY, Mr. KENNEDY, and Mr. DOMENICI) submitted the following resolution, which was referred to the Committee on Foreign Relations:

S. RES. 419

Whereas the growing threat of international terrorism has manifested itself again in the kidnapping of Aldo Moro, former Prime Minister of Italy and head of the Christian Democratic Party, by the Red Brigade in Italy;

Whereas the Red Brigade in Italy has been responsible for a campaign of terror over the last year in which it has inflicted widespread loss of life and injury on dozens of prominent Italian citizens—officials, Members of Parliament, judges, journalists, educators and others;

Whereas such acts of terrorism continue to threaten the safety and well being of citizens of not only Italy but of all nations and cause a direct threat to the very foundations of democratic government; and

Whereas the Government of Italy deserves our support in the difficult position in which it finds itself as a result of this kidnapping: Now, therefore, be it

Resolved, That the Senate voices its shock and condemnation of this new abhorrent act of terrorism by the Red Brigade in Italy.

SEC. 2. It is the sense of the Senate that the Government of Italy deserves the solid support of the United States and of all democratic and freedom-loving peoples in its efforts to deal with this tragic crisis and to preserve the democratic society and institutions in Italy which are so important to Italy's role in the western alliance.

SEC. 3. It is further the sense of the Senate that the President should instruct the Permanent United States Representative to the United Nations to press for consideration of the subject of terrorism in all appropriate forums and to sponsor proposals aimed at finding solutions to this very urgent problem.

SEC. 4. The Secretary of the Senate is directed to forward a copy of this resolution to the President and the Ambassador of the Government of Italy to the United States.

● Mr. DECONCINI. Mr. President, on behalf of my colleagues, Senators BROOKE, KENNEDY, LEAHY and DOMENICI, I submit a resolution reflecting the sentiment of this body and the American people as a whole to the recent kidnaping of Aldo Moro and the assassination of his five bodyguards. An identical resolution was introduced late last week in the House, and will come to a vote either today or tomorrow.

This blatant and brutal act of terrorism, Mr. President, should make all civilized mankind shudder. Violence can never be condoned; but senseless, brutal violence like this simply has no justification, no redeeming dimension, and serves no purpose except to remind us that too many mentally unstable individuals inhabit the nether world of extremist politics. The so-called Red Brigade which claims "credit" for this despicable act promotes no political cause, certainly no cause that sane and humane men and women, regardless of their philosophy, would associate with. They are nothing more than a group of malcontents who camouflage their criminality in political words.

Aldo Moro is the former premier of Italy, and is president of the Italian Christian Democratic Party. He is among the most respected political figures, not only of Italy, but in the world today. His record of service and devotion to the Italian people is matched only by his dedication to the principles of world peace. It is sad, indeed, that this fine man should now be held by men and women incapable of any but the crassest sentiments.

The American people cannot stand idly as this tragic drama unfolds without expressing their own sense of outrage at the atrocity. Equally important, the American people should express their hopes and their prayers that Mr. Moro will be returned safely. For in this act of savagery, we see an ugly symbol of our times. It is, fortunately, only a small facet of our civilization, but one that we must nonetheless fear and, eventually, extirprate.

I ask my colleagues to assist in bringing this matter to the immediate attention of the Senate.●

AMENDMENTS SUBMITTED FOR PRINTING

EMERGENCY AGRICULTURAL ACT OF 1978

AMENDMENT NO. 1735

(Ordered to be printed and to lie on the table.)

Mr. MCGOVERN submitted an amendment intended to be proposed by him to the bill (H.R. 6782) to permit marketing orders to include provisions concerning marketing promotion, including paid advertisement, of raisins and distribution among handlers of the pro rata costs of such promotion.

AMENDMENT NO. 1736

(Ordered to be printed and to lie on the table.)

Mr. HANSEN submitted an amendment intended to be proposed by him to the bill (H.R. 6782), supra.

AMENDMENT NO. 1737

(Ordered to be printed and to lie on the table.)

Mr. STEVENSON (for himself and Mrs. HUMPHREY) submitted an amendment intended to be proposed by them, jointly, to the bill (H.R. 6782), supra.

AMENDMENT NO. 1738

(Ordered to be printed and to lie on the table.)

Mr. EAGLETON (for himself and Mr. BELLMON) submitted an amendment intended to be proposed by them, jointly, to the bill (H.R. 6782), supra.

● Mr. EAGLETON. Mr. President, This amendment does two very important things. First, it legislates the price objectives included in the Senate report on this bill. That is, it provides that the Secretary of Agriculture shall take actions, including the crop acreage diversions stipulated in H.R. 6782, so as to achieve a season average price of not less than $3.50 per bushel of wheat, $2.50 per bushel of corn, $6 per bushel of soybeans, and 60 cents per pound of cotton.

Second, the amendment stipulates that the Secretary of Agriculture may take other actions that he deems necessary and appropriate in order to achieve these price objectives.

I think this amendment is important for a number of reasons. First, the Department witnesses testified that a crop acreage diversion of almost 50 percent more than the 31 million acres stipulated in the bill would be needed in order to achieve the price objectives spelled out in the report. If the price objectives are in fact the Congress goal, then we should spell them out in the legislation, since a 3-million acre diversion will not, according to the Department of Agriculture, come close to achieving the prices the Congress believes it is mandating.

Second, the amendment is important because it will permit the Secretary of Agriculture to take actions in addition to diversion of 31 million acres, in order to achieve the price objectives. This could include, but of course, would not be limited to: Increase grain reserves, increase in loan rate, increase set-aside, and so forth.

I strongly urge adoption of this amendment. Trying to achieve price objectives of the bill exclusively through set-asides could jeopardize both U.S. food stocks as well as the export position of U.S. grains.●

AMENDMENT NO. 1739

(Ordered to be printed and to lie on the table.)

Mr. EAGLETON (for himself and Mr. BELLMON) submitted an amendment intended to be proposed by them, jointly, to the bill (H.R. 6782), supra.

● Mr. EAGLETON, Mr. President, this amendment would strike the mandatory set-aside provision pertaining to soybeans. The basic objective of the soybean section is to achieve market prices of $6 per bushel. I do not believe that this section is needed, since the market for soybeans is already strong, and is likely to get even stronger as a result of recent market news.

Testimony from the American Soybean Association indicated that soybean growers are opposed to this section of the

bill, for the reasons set forth in the following exchange from the hearing:

AMERICAN SOYBEAN ASSOCIATION

Senator EAGLETON. The American Soybean Association, Mr. Groot and gentlemen.

STATEMENT OF MERLYN GROOT

Mr. GROOT. I am Merlyn Groot, vice president of the American Soybean Association from Manson, Iowa. Our association has had a limited amount of time to study the provisions of the Senate bill 2690, as now incorporated in H.R. 6872.

Senator EAGLETON. We all share in that. We had limited amount of time to study it, too.

Mr. GROOT. As chairman of our Government Relations Committee, we have reviewed with all of our soybean farmers from the Northern and Southern States the provisions of the bill which apply to soybeans.

Based on these discussions, we hope provisions applicable to soybeans would be deleted from the legislation for the following reasons: Over the years, soybean farmers have been relatively fortunate.

We have received parity prices in recent years without government set-asides and/or controls.

We produce 65 percent of the world supply of soybeans, and one half or more of our production is now exported each year.

We find ourselves in a peculiar situation, however, this year. Early forecasts suggest there will be another record soybean crop in the United States. Some experts have been predicting price levels below $5 per bushel.

CURRENT MARKET PRICE FOR SOYBEANS

Senator EAGLETON. What is the current market price for soybeans?

Mr. GROOT. When I left home yesterday, I believe it was approximately the $5.90 per bushel level. However, they fluctuated quite a wide range yesterday. I understand they may have closed at that level. This was our elevator prices.

I understand at one time they were up substantially during the period of trading, however, and did approach $7.

Senator EAGLETON. When did they approach $7.

Mr. GROOT. Yesterday, as I understand it, in my conversations with Mr. Johnson of my committee, he said that the board of trade had reached the $7 level for March futures during the trading yesterday.

Dr. KLING. Mr. Chairman, Just to clarify the situation, I think Mr. Groot is talking about a farm price when he mentioned $5.90. That is an elevator price for Iowa.

Of course, the price at the Chicago Board of Trade is higher and has been as high as about $6.80 in the last week or two.

Senator EAGLETON. The farm prices are what, $5.80, did you say?

Mr. GROOT. It had been as high as about $6.25 to $6.30 in our area.

However, we are affected by the shortage of railroad cars and prices will vary some between elevators because of the availability or shortage of transportation.

Senator EAGLETON. But at $6.20, a soybean grower can make a profit, can he not?

Mr. GROOT. Based on the figures we have available for the cost of production, this should exceed the cost of production, on the average, in our area. There are variations.

At present, however, our largest competitor, Brazil is projected to have a reduced harvest. Domestic and foreign use of soybeans and soybean products has accelerated to record high levels.

Chicago futures prices for soybeans have been climbing and are now approaching $7 per bushel. This reflects again the conversation I had yesterday with members of my committee.

Without commenting or prejudicing the entire bill, we believe our customers of U.S. soybeans might find it hard to understand if the world supply of soybeans was jeopardized at the same time that a set-aside program was put into effect by the world's major supplier.

Further, we understand yield and acreage data for soybeans are not available, which would be required to administer the provisions for soybeans in the bill.

For these reasons, we believe on balance, that the past history regarding soybeans has been kind to us without government controls or set-asides and that the best long-term interests of soybean farmers and the United States will be served by deleting soybeans from the provisions of this bill.

Thank you, Mr. Chairman. This concludes my brief statement.

Senator EAGLETON. Thus, it is your policy that the provision for 3 million acres that this bill anticipates being set aside for soybeans, in your opinion, should be deleted from the bill?

Mr. GROOT. We feel on balance that it could be removed. As we understand it, the price goal in the legislation is $6 per bushel. Recently and at the present time, the market has been at about that level.

Also, we do not comment concerning the other provisions of the bill that apply to wheat or corn or cotton.

But in the corn belt and in the cotton producing areas, it is my judgment that provisions that would increase participation in the program, might have an indirect reflection in reduction of soybean acres because of the increased participation in the program for these two crops.

Senator EAGLETON. There was a motion to strike soybeans from the bill in the Senate Agriculture Committee. It received a tie vote, and thus the amendment to strike failed.

Our jurisdiction here in this committee is limited to dollar amounts to be appropriated, and does not include the substantive parts of the legislation.

We wanted your comments. But that tie vote in the committee indicates to me that on the floor there will probably be an amendment to strike the soybean section as well.

Thank you very much, gentlemen.

Mr. GROOT. Thank you.

Basically, the soybean producers believe that with current soybean prices above $6, there is no need for the legislation of a set-aside for soybeans. Furthermore, they believe that customers of U.S. soybeans might find it hard to understand a set-aside if the world supply of soybeans was jeopardized at the same time that a set-aside is put into effect by the world's major supplier.●

PANAMA CANAL TREATIES, EX. N, 95–1

AMENDMENT NO. 86

(Ordered to be printed and to lie on the table.)

Mr. ALLEN submitted an amendment intended to be proposed by him to the Panama Canal Treaty, Ex. N, 95–1.

NOTICES OF HEARINGS

SUBCOMMITTEE ON SEPARATION OF POWERS

(The following notice of hearing was inadvertently ommitted from the RECORD of Friday, March 17, 1978.)

● Mr. ALLEN. Mr. President, I wish to announce that on Tuesday, March 21, 1978, at 10:30 a.m., the Subcommittee on Separation of Powers of the Committee on the Judiciary will hold a meeting for consideration of an action on the staff draft of the subcommittee report on the congressional power to dispose of public property in the Isthmus of Panama. The subcommittee will meet in room 1418, Dirksen Senate Office Building.●

SELECT COMMITTEE ON ETHICS

● Mr. STEVENSON. Mr. President, I announced on March 7, 1978 the executive hearings schedule for the Select Committee on Ethics concerning alleged attempts by representatives of the Republic of Korea improperly to influence Members and employees of the U.S. Senate. I now announce an additional hearing to be held on Thursday, March 23, 1978 from 9:30 to 12:30 and from 2 to 5:30. This executive session will be held in S–210, the Capitol.●

HEARING POSTPONEMENT

● Mr. NELSON. Mr. President, the hearing of the Senate Small Business Committee originally scheduled for 9 a.m. on March 22 in the committee's hearing room, 424 Russell Building, has been postponed. A date will be announced shortly when the hearing will be convened.●

POSTPONED HEARING

● Mr. NELSON. Mr. President, the hearing of the Select Committee on Small Business, originally scheduled for 10 a.m. on March 22, 1978 in the committee's hearing room, 424 Russell Building, has been rescheduled for April 3, 1978 at 10 a.m. in the same hearing room. The subject of the hearing will be title I, S. 807 and S. 2733. Senator MCINTYRE will chair the hearing. Further information can be obtained from the committee offices.●

CHANGE IN HEARING

● Mr. GLENN. Mr. President, I wish to announce a change in the hearings scheduled for March 22 and 23, by the Subcommittee on Energy, Nuclear Proliferation and Federal Services on the issue of nuclear terrorism in conjunction with S. 2236, the Omnibus Antiterrorism Act of 1977. The hearings will be held by the full Governmental Affairs Committee and will begin with an executive session at 9:30 a.m. in room 4221 Dirksen Building, and will be open to the public at 10 a.m.●

ADDITIONAL STATEMENTS

THE RIGHT KIND OF TAX REFORM

● Mr. BIDEN. Mr. President, everyone is talking these days about the need for tax reform and tax simplification. No one who looks at my record will ever accuse me of being opposed to either. I am concerned recently, however, that more of the talk about reform centers around those tax provisions that many low- and middle-income families rely upon to help them meet some of the basic costs of living and bringing up a family. These reforms become tax increases for wide numbers of our taxpayers who are already shouldering a heavy tax burden.

It is these same people who pay heavy Federal income and payroll taxes; who pay heavy State income taxes; and pay ever-increasing local and school district property taxes. In fact, the property tax burden is getting to be one of the heaviest. We do not directly control State or local taxes here in Washington. However, when we propose tax reductions or tax reforms, we should consider the load imposed by other taxing authorities.

It is for this reason that I am disturbed by the recent talk about eliminating deductions of substantial importance to the average taxpayer, thus increasing his overall tax burden. This is not my idea of tax reform. I believe a primary goal of tax reform is to assure that every citizen pays a fair share of the cost of government. The people I am worried about already do. The first goal of tax reform should be to reach the person or company that deliberately shelters income from taxation in order to avoid paying an equitable share. For this reason, my attention was captured by a headline in the New York Times on Sunday, February 5, 1978 that read: "The Art World Turns to Original Prints as Tax Shelters." This article, by Grace Glueck, told about an ingenious new tax shelter being put together recently in an effort to overcome the obstacles to sheltering money from taxes included in the Tax Reform Act of 1976.

While some apparently felt that this will be of benefit to artists and promote new creative efforts, the Art Dealers Association of America is quoted as calling them "schemes" that involve the use of art work "solely as a device to avoid paying taxes." This is the kind of effort that tax reformers must guard against. Even if some side benefits accrue to the art world from a scheme like this, they are seldom large enough to be worth the tax money lost, that must be made up by other taxpayers. I believe this article well describes the kind of tax avoidance that should be the prime target of tax reforms. It is these schemes that should be attacked first, not the provisions of tax law providing tax relief to millions of American taxpayers.

Mr. President, I believe this article is most instructive and I submit it for the RECORD.

The article is as follows:

THE ART WORLD TURNS TO ORIGINAL PRINTS AS TAX SHELTERS

(By Grace Glueck)

The flower etching by the well-known artist Lowell Nesbitt was beautiful, the affluent investor thought. And the plate from which it had been made, plus the rights to everything produced from the plate, was for sale for $234,000, with only $44,000 cash on the line.

The investor was told he could profit from the sale of prints, posters and other items made from the plate. But even more attractive was the income tax write-off. Because the plate was a "depreciable property" with a "useful life" of seven years or more, he'd get an investment tax credit for the first year of his ownership, and could deduct for the plate's depreciation over a long period. The write-off in the first two years alone would be $64,000. He plunked down the initial payment and signed a 10-year note for the rest. And so he was in the business of producing artists' prints.

The transaction is typical of a trendy but controversial new development in the art world—the use of original-print editions as tax shelters. With changes in the 1976 tax law discouraging shelters in such fields as motion pictures, agriculture, oil wells and equipment leasing, a number—200 to 300 as a "guesstimate"—have already turned to the lucrative field of art.

OTHER USES INVOLVED

Beginning with a year-end rush that started last fall, promoters have been busy packaging deals in which the "master" matrix—metal plate, stone, woodblock, transparency, screen or other material from which the artist makes his print or photograph—is exploited for maximum production.

After a run of limited-edition graphics, the matrix, or plate, may be used to make posters, post cards, greeting cards, wallpaper, table mats, ceramic plates, T-shirts and other ancillary products, depending on the tastes of the participants. More than a dozen "names" are involved in the deals including, besides Mr. Nesbitt, James Rosenquist, Richard Lindner, Arman, Allan D'Arcangelo, Pierre Alechinsky, Karel Appel and the German movie actress Elke Sommer, who is also a painter and printmaker.

But many established print publishers and dealers look askance at the shelter proposals. In fact, the Art Dealers Association of America, a trade group of leading gallery owners, has recently issued a statement condemning them. Referring to the shelters as "schemes," the statement maintains that they are not "genuine and realistic" business ventures but involve the use of art-works "solely as a device to avoid paying taxes."

"FORM OF DEFERRAL"

Nevertheless, promoters of the shelters hold that besides their profit-making potential (a required feature if the Internal Revenue Service is to regard them as genuine business investments), they attract new money and marketing expertise to the art world. "If done right, it's a very good idea," says Rubin Gorewitz, an accountant who specializes in art-world clients, and is serving as consultant on a package that includes some big-name artists as well as lesser-knowns. "It stimulates the art market."

Mr. Gorewitz goes on to assert: "The Government doesn't lose anyway, since the shelters are a form of tax deferral. The investor eventually pays taxes on the income he earns from the venture. If it isn't profitable, then he has to eventually pay back the taxes deferred on the stated original value of the plate. It's a cheap way for the Government to subsidize art."

At present, there may be between 10 and 20 shelter packagers—lawyers, accountants and businessmen who are reluctant to publicize their projects lest they be construed by the Securities and Exchange Commission, which has broad oversight in the investing field, as subject to its regulatory provisions.

LITTLE CASH DOWN

While details of the deals differ, depending on the promoter, the standard plan is for an affluent taxpayer to buy a plate, along with its reproduction rights, at a price determined by appraisal. (The deals do not pay unless a taxpayer is in at least the 50 percent bracket, because under that level the tax savings do not warrant the risk of the investment.)

The taxpayer gives the promoter a relatively small cash payment, and the balance of the purchase price, up to 80 percent or more, is paid with a "nonrecourse" note—that is, one for which the taxpayer cannot be held personally liable unless sales are made. The note is paid off through sales of the plate's products as they occur.

In the case of the Lowell Nesbitt flower etching, a breakdown of the $44,000 cash-on-the-line payment made by the investor would go this way: The promoter would take approximately 25 percent, or $11,000 for printing and advertising; another $11,000 for payment to accountants, lawyers, salesmen and "finders" who recruit investors. Approximately 60 percent or $13,200 of the remaining $22,000, would go to the artist, with the other 40 percent, or $8,800, as profit for the promoter.

The investor would make his profits, theoretically, in the sale of a large poster edition and then from other works produced with the plate, reinvesting a certain percentage, as in any business, for production costs. He would also take tax deferrals each year on the depreciation of the plate, even though he had only "paid" its full price with a nonrecourse promissory note.

Many artists and print dealers, however, are concerned about the possible uses to which the plate may be put over a nine-year life, which gives maximum tax deductibility.

Most of the shelter plans call for an initial run of, say, 175 to 300 limited-edition prints, each signed by the artist. But the "ancillary products," it is feared, may cheapen the artist's image.

FLOOD CALLED POSSIBLE

Some promoters, however, say that the artists they are working with retain "esthetic discretion." "If something is in bad taste, they can complain," Ron English, an investment consultant now promoting shelters, said. "After all, when Alexander Calder painted the sides of a Braniff plane, did it cheapen his image?"

As ancillary products of one Lowell Nesbitt plate, Mr. English intends to produce 10,000 posters and "limited edition" ceramic plates—in runs of, say, 12,500—which he says sell well in the Middle West for $65 to $70 apiece.

But for Mr. Nesbitt, as for some other artists, the benefits of the shelter plans outweigh concern about what is produced from them. Asserting that the deals in which he is involved have allowed him to do print series "that I never would have done otherwise, with complete artistic freedom," the artist adds: "I don't care if they eventually use the plate to make paper napkins. At that stage, no one will know who really did it, anyway. Listen, *eat* off Mona Lisa plates that I bought somewhere."

Another concern of those who dislike the shelter plans is that the market may be flooded with prints. Sylvan Cole Jr., a member of the dealers' association and head of Associated American Artists, one of the country's largest print galleries, says that the tax shelters will "create huge print editions, sold at inflated prices." "They may glut the market and drive prices down drastically," he added.

Though some artists spurn the shelter proposals that would involve them in the market because of the plans' blatant commerciality, others have turned to a different kind of shelter arrangement that will, they hope, end up placing their work in museums. As detailed by at least one entrepreneur, the plan involves the commissioning of top-drawer artists with established market prices to do print editions.

The prints are sold, at "wholesale" prices, to taxpayers who hold them for several years, then donate them to museums at an "appreciated" value, which amounts to the price the print would bring on the retail market. Because donors of art to nonprofit institutions are allowed deductions at full market value, the donated print becomes a tax write-off.

OPINIONS VARY

Will the shelters really work, in terms of profits, for the artist and the investor? Jerald Ordover, a lawyer for many art-world clients, replies with a cautious "yes," adding: "If the deal is legitimate, with fair valuations on the plate and the prints, the artists not abused and the prints well handled."

But another accountant, who preferred to remain anonymous, took a dim view of the returns for the investor: "You buy a plate for, say, $200,000, and in no way are you going to make that money back by the time the artist and promoters get theirs."

Another key question raised by the dealers' association and others is whether the new shelter will pass muster by the Internal Revenue Service. The association thinks they will not. It cites appraisals it has examined as "highly problematic" and "grossly inflated," and urges artists and the public not to participate in the projects.

A spokesman for the I.R.S. in Washington said that the tax examiners, in assessing all the shelter deals, would be interested in such questions as "the proximate value of the nonrecourse notes to the property purchased, whether there is geneuine profit motive, and the relationship of the taxpayer's actual income to the deductions he claims."

He added: "When claimed tax benefits are based on exaggerated appraisals or misallocations of costs or what we believe to be doubtful legal theories, then we'll raise the issues on audit and carry them to litigation if necessary." ●

COMPETITIVE PRACTICE IN THE COMMUNICATIONS INDUSTRY

● Mr. MARK O. HATFIELD. Mr. President, the Oregon congressional delegation has been made aware of a large number of public and private organizations that have taken formal positions expressing concern that Congress should expeditiously review and determine the national telecommunications policy. They are also concerned that any policy not have an adverse impact on either the cost or quality of basic residential and basic long distance services.

I wish to make known the concerns expressed by my constituents and I submit for the RECORD the list of organizations which has been brought to my attention.

The list is as follows:

Albany AARP Chapter No. 668.
Albany Chamber of Commerce.
American Business Women's Association.
Arlington Chamber of Commerce.
Arlington Senior Citizens.
Astoria—AARP.
Astoria Chamber of Commerce.
Baker County Chamber of Commerce.
Bend AARP Chapter No. 438.
Bend Chamber of Commerce.
City of Arlington.
City of Carlton.
City of Heppner.
City of Klamath Falls.
City of Medford.
City of Pendleton.
City of Warrenton.
Clackamas County Senior Citizens Council.
Commercial Club of Portland.
Condon Senior Citizens.
Corvallis Chamber of Commerce.
Dallas Senior Center.
Extacada Chamber of Commerce.
Eugene Chamber of Commerce.
Eugene Communications Workers of America Local No. 9206.
Grants Pass & Josephine County Chamber of Commerce.
Heppner-Moro County Chamber of Commerce.
Holcomb-Outlook-Park Place Neighborhood Association.
Junction City Chamber of Commerce.
Klamath Falls Board of Commissioners.
Klamath Falls Quota Club.
Lake Oswego Kiwanis.
Lane County Farm Bureau
Lane County Labor Council.
Lents Citizens for Youth Commission.
Madras Chamber of Commerce.
Marion County Pomona Grange No. 4.
Medford Chamber of Commerce.
Medford C.W.A. Local No. 9208.
Metro East Jaycees.
Milwaukee Jaycees.
Mt. Angel Chamber of Commerce.
Mt. Angel Development Corporation.
Multi-purpose Dallas Senior Advisory Council.
National Governors Conference.
National Retired Teachers' Association, Tillamook County Chapter.
Newport Chamber of Commerce.
Oak-Grove Lodge Jaycees.
Oregon AFL–CIO.
Oregon Architectural Barriers Council, Inc.
Oregon Building Congress.

Scandinavian Benevolent Society.
Seaside Chamber of Commerce.
Senior Citizen Council of Benton County, Inc.
Stayton Chamber of Commerce.
Stayton Grange No. 340.
The Dallas Chamber of Commerce.
Toledo Chamber of Commerce.
Umatilla County Board of Commissioners.
Warrenton Chamber of Commerce.
Western Governors Conference.
Winston-Dillard Chamber of Commerce.●

PACKAGING THE WILDERNESS

● Mr. CHURCH. Mr. President, on February 24, President Carter signed into law one of the most important pieces of public land legislation to be enacted in recent years. That bill, the Endangered American Wilderness Act of 1978, contains an area in Idaho with which many of my colleagues are now familiar: the Gospel-Hump Area located near the town of Grangeville in Idaho County.

For years, the Gospel-Hump roadless area had been the center of a maelstrom of controversy. Idaho conservationists wanted to see the magnificent alpine uplands of the region protected from development. So, they proposed a formal, congressionally mandated study of the feasibility of including Gospel-Hump in the National Wilderness Preservation System. Local timber companies in Idaho County, on the other hand, had long planned on cutting trees on the lower elevations of the area. Dependent almost entirely on the national forests surrounding them, these companies had built their mills and designed their operations on the assumption that part of the Gospel-Hump region of the Nezperce National Forest would be opened for logging. Both the environmentalists and the loggers had strongly held ideas about the best and most appropriate use of this roadless area. On the surface, at least, their positions seemed to be irreconcilable.

Mr. President, so often public land issues are choked with emotion. The interests wishing to develop the land feel they have very little in common with those who advocate it in its natural condition. Calm discussions degenerate into shouting matches. Consequently, neither side listens to the other and nothing gets accomplished.

Gospel-Hump, tied up in Forest Service redtape for years, looked to be but another stalemate in the roadless area war. When, in March of 1977, the Chief of the Forest Service rejected long-awaited plans for parts of Gospel-Hump, because they had been prepared in a piecemeal manner, both sides began again to gird for battle.

However, some of the business leaders in Grangeville desperately wanted a solution rather than another stalemate. Because Gospel-Hump contained 30 percent of the sawlogs within the entire Nezperce National Forest, they felt they could not risk the consequences of a lockout.

In late March, last year, they asked me to help arrange a meeting between designated members of the natural resources task force of the Grangeville Chamber of Commerce and representatives of the Idaho environmental groups seeking wilderness status for Gospel-Hump.

I set up and attended the first meeting between the two groups in April, where I told both sides that if they could reach a common agreement on a management plan for Gospel-Hump, then I would introduce their proposal, hold congressional hearings to ascertain the views of the public at large, and then endeavor to move the legislation through Congress.

At that first meeting, it became apparent that the two groups had much more in common than they first imagined. Both had a deep-felt respect for the land and its resources. The conservationists, recognizing the importance of the local sawmills to the economy of Idaho County, readily agreed that 45,000 acres of commercial forestland in Gospel-Hump should be made immediately available for logging and exempt from further wilderness consideration. They also agreed that the existing roads up into the summits were important for accessibility, and thus should remain open.

During the subsequent meetings they held on their own, over the next several months, the two groups fleshed out an agreement. On July 13, they announced a joint plan for the management of the area. While neither side got everything it wanted, the agreement has led to the creation of a splendid new upland wilderness, along with the release for multiple-use management of 137,000 acres of good timberland.

Mr. President, the story of Gospel-Hump is starting to be told all over the West. Perhaps the precedent established in Idaho County can be used in other instances where roadless areas are tied up in seemingly endless administrative appeals and litigation. In any case, whether or not this approach can work in other areas, it was successful in Idaho County.

Recently, there appeared in the Lewiston Morning Tribune, a fine summary of the precedent of Gospel-Hump, written by A. Smith, the well-known columnist. I submit this article to be printed in the RECORD.

The article is as follows:

[From the Lewiston (Idaho) Morning Tribune, Mar. 5, 1978]

PACKAGING THE WILDERNESS

(By A. Robert Smith)

WASHINGTON.—When the House began hearings a year ago on the Endangered Wilderness bill, a young troubadour appeared before the Interior Committee, strummed his guitar and sang these words:

"There are times I fear I lose myself. I don't know where I am.

"I got caught up in trouble and the strain.

"With my back against the stone wall, my finger in the dam.

"I'm losing strength and going down again.

"Then I take a look around me, my eyes can't find the sun.

"There's nothing wild around as far as I can see.

"Then my heart turns to Alaska and freedom on the run.

"I can hear her spirit calling me . . .

"To the mountain, I go rest there.

"To the river, I will be strong.

"To the forest, I'll find peace there.

"To the wild country, I belong."

John Denver brought the house down, of course, and afterward I told him that was the most effective testimony I had heard before a congressional committee in years.

He said he had just written that tune when in Colorado, and he hoped to record it.

When the recording was issued last fall, it seemed to me to have lost something along the way—too much orchestration, too many violins that were less effective than one guitar. I suspect this arrangement was considered necessary for the song, "To the Wild Country," to sell.

Something of the same thing happened to the Endangered Wilderness bill. It began as 22 new areas adding some 2 million acres to the national wilderness system. When President Carter signed it last week, it had been trimmed to 1.3 million acres.

Its arrangers, chiefly Sens. Frank Church, D-Idaho, and Mark Hatfield, R-Ore., and Reps. Morris Udall, D-Ariz., and Jim Weaver, D-Ore., had packaged it to sell—and sell it they did.

It may be only 65 percent of the acreage the environmentalists asked and John Denver sang for but it is the largest expansion of the wilderness system since its establishment nearly 15 years ago.

The most significant feature of this bill may be not the extent of the expansion but the unprecedented language covering the Gospel-Hump Wildernes in Idaho, which is intended to serve the needs of those who want preservation of this scenic area and those with an immediate need for timber to survive.

The bill sets aside 206,000 acres of high alpine forestland in the Nez Perce National Forest as wilderness, but it designates another 120,000 acres of the most valuable commercial timberland for logging.

All of this is roadless and therefore would have been subject to the current roadless area review (RARE II) procedure being conducted by the Forest Service over some 65 million acres. By the end of this year the agency is supposed to recommend which roadless tracts be retained as wilderness, which can be logged and which may require more land-use review.

The significance of the Gospel-Hump agreement is that it short-circuited this long bureaucratic process. The first timber sales in that area are expected by this summer, rather than several years hence. This expedited decision-making is expected to prevent the closing of at least one sawmill at Grangeville, Idaho.

More to the point, the Gospel-Hump compromise, worked out in a series of face-to-face meetings between local industry and environmentalists with the encouragement of Senator Church, has relieved the uncertainty and anxiety on both sides in this one area.

Church believes that this practical solution might usefully be emulated through the national forest system, wherever mill towns face log shortages because the roadless areas are off-limits to logging.

Instead of trying to scuttle one another's interests. Church advises negotiated settlements at the grass roots. Congress would be only too glad to ratify such solutions, as it did for Gospel-Hump.

The interesting lesson of the Grangeville meetings is that while the adversaries came together with considerable apprehension, they discovered that once acquainted they weren't really so hard to deal with across the table. Environmentalists found that lumbermen personally like and want wilderness, and lumbermen found that environmentalists don't want mills to close for lack of timber.

In the corridors of power in Washington, D.C., this humane view of social conflict is too frequently lost as each side maneuvers to block the other.

"Oh, I know sometimes I worry, of worldly ways and means.

"And I see the future killing me.

"On a misbegotten highway of prophecies and dreams.

"A road to nowhere and eternity.

"And I know it's just changes, yes, and mankind marching on.

"I know we can't live in yesterday.

"But compared to what we're losing and what it means to me.

"I'd give my life and throw the rest away."

The message of the Gospel-Hump achievement is that neither side need be losers, that the preservation of wilderness and the preservation of mill towns are both attainable.

Once that has been realized, we can go to the forest for peace and for jobs and to the wild country where we all belong.●

AUTOMATIC MARKET ENTRY

● Mr. CANNON. Mr. President, the Senate will shortly begin its consideration of S. 2493, the Air Transportation Regulatory Reform Act of 1978. During 1977 and so far this year, we have seen dramatic shifts among those initially opposing this legislation. Air carriers and their employees are beginning to realize that this legislation contemplates a well-reasoned, balanced approach to lessening the strict regulatory structure imposed on the air transportation system through provisions for pricing and entry flexibility to achieve a more competitive environment.

An essential part of the reform bill is the provision for automatic market entry. The provision as written in the Senate bill is a modest program allowing existing air carriers to add a limited amount of new routes to their system without seeking prior governmental approval. As important as the actual entry the provision allows for, is the threat of meaningful entry which it creates. A crucial element of a market-oriented environment is the balance struck between the services offered in the marketplace and the price demanded for those services. Preventing potential competitors from offering their services in a given market is no competition at all, therefore, there is little incentive for the incumbent to provide efficient, reasonably priced services. Any business is more likely to provide the public with the best service at the best possible price if it knows that other competitors are not effectively held at bay from entering that market by cumbersome Government regulations.

I would like to submit for the RECORD an editorial which appeared in the Washington Post on Tuesday, March 14, which describes, within the context of the House Aviation Subcommittee markup sessions, the vital need for an automatic market entry provision in air transportation regulatory reform legislation.

The articles to be printed in the RECORD follow:

AIRLINE DEREGULATION

The House Aviation subcommittee will make another attempt this week to work out some sort of compromise on a key part of the airline deregulation bill. Last week, after seven hours of wrangling, the committee voted to drop out of the bill a section that would make it easier for airlines to enter new markets. That section is central to the whole deregulation effort and ought to be restored in one form or another before the bill is sent on its way to the House floor.

The version of this so-called market-entry provision that has been approved by the Senate Commerce Committee would permit each airline to add to its routes, within limits, without getting approval from the Civil Aeronautics Board. An airline that thought it could make money by flying on a route it does not now serve could simply go ahead and begin service. Many airlines are deeply opposed to the provision because they believe the increased competition it would create on lucrative routes would be harmful in the long run.

The House Committee had been expected to approve a watered-down version of this entry provision. Under the compromise that had been worked out, the whole matter would have been turned over to the CAB and its ultimate decision would have been subject to a congressional veto. But opponents of deregulation were able to defeat even that weaker version.

Some sort of new mechanism to open up competition on existing airline routes is essential if a deregulation bill is to have much impact. The approach taken by the Senate committee, and supported by the Carter administration, is the one that makes the most sense It introduces the airlines to the world of free enterprise on a gradual basis and with sufficient protection to enable them to adjust to a kind of competition from which they have been shielded in the past. That approach would be far preferable to passing the buck to the CAB as the compromise provided. But either would be better than doing nothing. The committee ought to choose between them at its next meeting.●

A PALESTINIAN HOMELAND

● Mr. ABOUREZK. Mr. President, in view of the serious threat to a constructive Middle East peace settlement posed by the Israeli invasion of Lebanon, the remarks of the Syrian Ambassador to the United States printed in the New York Times on March 17, 1978 are deserving of special scrutiny, because they address the crux of the problem; viz, the moral need for a Palestinian Arab homeland. So I ask that they be printed in the RECORD.

The material is as follows:

CARTER, THE PALESTINIANS AND ISRAEL

(By Sabah Kabbani)

WASHINGTON.—The 16th of March occupies a special place in Middle East developments. Just a year ago, President Carter told a Clinton, Mass., audience that the Palestinians have a right to a homeland.

The Arab world found in Mr. Carter's statement the first, long-overdue public acknowledgement by an American President that the Palestinian people have a right to a homeland like any other people, that the denial of such a right for 30 years never caused it to vanish, and that the Palestinian people are not simply refugees whose problems can be solved through charity and resettlement outside Palestine. Moreover, the Clinton pronouncement indicated that an American Administration had finally focused in the core of the Middle East problem and had begun to approach it clearly and publicly, in a manner consistent with the concept of openness which Mr. Carter promised during his campaign.

Not surprisingly the positive reaction of the world community (including the European Community, which followed suit by issuing a similar statement) was not shared by the Israelis.

They expressed displeasure at Mr. Carter's new vocabulary, which they had vigorously tried to suppress for the past three decades. Israeli efforts had focused on getting Americans to accept their contention that the Palestine issue was not the core of the Middle East problem and that, in the words of former Premier Golda Meir, the 3.5 million Palestinians "did not exist."

The President of the United States called for an idea which, after all, is based on the same United Nations resolution which established a state for the Israelis. He resurrected a basic concept which 30 years of propaganda had sought to obliterate. And he did so without pressure of intimidation; cetrainly the Palestinians had no influence in the intricate game of Ameircan domestic politics.

The Clinton statement was made in the context of an affirmation of American support for Israel and concern for its security. It appeared in an overall framework which did not necessarily coincide with the Arab posture, and it was defined as one of the three conditions inecessary for a settlement of the Middle East problem. Nevertheless, the Israelis and their supporters realized how serious a deviation Mr. Carter's words represented.

Pressure on Mr. Carter mounted; Administration statements about the issue began to vacillate, and Mr. Carter's efforts to reconvene the Geneva conference before the end of 1977 were sidetracked.

President Sadat's trip to Jerusalem, based on the unfounded expectation that he could find a shortcut to peace, extinguished any hope that the Geneva conference would be reconvened. Israeli intransigence demonstrated what Syrian President Hafez Assad warned of—that going to Jerusalem was not the right way to achieve peace. Thirty years of experience have shown that Israel wants land, not peace.

Now Prime Minister Begin is willing to abandon 10 years of painful diplomatic efforts based on United Nations Resolution 242 through a new interpretation that it does not apply to the West Bank, even though in 1970 he resigned from the Israeli Government because it had accepted this resolution, which he knew required withdrawal from this area, Arthur Goldberg and later George Ball, as ambassadors to the United Nations, conveyed an Israeli promise of withdrawal from the West Bank to the Jordanians in accordance with Resolution 242.

This all sounds ironically reminiscent of an Israeli refrain. They have often resorted to asking how any agreement they might sign with an Arab country could be guaranteed beyond a change in leadership. Strangely enough, it is Mr. Begin who has now announced in plain terms that he had nothing to do with the previous Israeli Government's acceptance of Resolution 242 even though the majority of the international community considers it the basis for any settlement in the Middle East.

Additionally, Mr. Begin and his supporters in the United States have found in the aircraft package the Administration is offering to Israel, Saudi Arabia and Egypt a golden opportunity to plunge into a long debate, hiding from them main issues behind the fig leaf which Israel calls "security."

Israel's security cannot be maintained by occupying other people's territories or by denying the rights of he Palestinian people.

How can Israel's supporters now claim that the return of only 5 percent of the occupied Sinai Pennisula in 1975 was a security risk requiring 90 sophisticated F–15s and F–16s, while denying Egypt 50 basically outmoded F–5s?

Security seems to be a one-way street for the Israelis, although the entire world has become aware that the Arabs are the ones who in fact need it, with their lands in the 11th year of occupation and 3.5 million Palestinians still homeless.

Granting Israel its requested $13 billion in military aid and equipment is not conducive to peace., Billions of United States dollars given Israel in the past have only helped it to cling more tightly to the very policies which prevent peace; occupation and denial of the rights of the Palestinian people.

The guerrilla attack north of Tel Aviv only a few days before the anniversary of the Clinton declaration underscores the necessity of implementing the idea which was voiced in it. The Palestinians are resorting to violence because they are desperate and still deprived of a homeland. Until they have one, conflict between those deprived of a homeland and those who have usurped it is inevitable. The implementation of the principle which President Carter announced on the 16th of March last year, together with the United Nations resolutions which address the problem of Palestine, can bring the bloody and tragic cycle to a halt.

If resorting to violence is to be used as the pretext to deny the Palestinians the right to establish their state, Israel herself should never have come into being and should not have as her Prime Minister Menachem Begin, the former leader of the Irgun, a notorious Jewish terrorist group which carried out the massacre of 250 defenseless Palestinians in the village of Deir Yassin on April 9, 1948—five weeks before Israel was established.

The brutal new invasion of Lebanon, which is in progress at this writing, is further evidence that Israel's appetite for territory has not yet been satiated. Israel is repeating a pattern that it has pursued since its foundation, occupying more Arab land under the pretext of needing a "security zone." This is how Israel has expanded to seven times its original size when recognized by the United States in 1948. The coveted waters of the Litani River have long been part of Israeli dreams of expansion into Lebanon.

Israel's allegation that the current invasion is to eliminate Palestinian fighters is belied by its bombardment of residential areas and killing of hundreds of civilians. It is also belied by history, which has taught that the determination to resist an occupier mounts as he encroaches deeper on one's territory. In the words of Columbia University professor Edward Said, "People do not disappear under oppression; they sometimes grow, and they acquire a certain wise resilience in the process."

Together with the world community, the United States must assume its responsibilities as a major power and permanent member of the Security Council, as well as principal supplier of the arms and aircraft Israel has used to launch its invasions. Unless the United States acts immediately to bring Israel back to its international border with Lebanon, a new occupied territory will have been created, along with the West Bank, the Sinai, the Gaza Strip and the Golan Heights, Israel is creating another "fact" by occupying Lebanese territory, and in the process creating more Arab refugees and ultimately new settlements and new obstacles to peace.

The most urgent task now is not to salvage the illusory Egyptian-Israeli "peace efforts"

but to salvage peace itself. And peace begins with creating a homeland and a state for the Palestinians, not with a reprise of Israel's 1948 campaign to annihilate them.

In these critical hours, President Carter's Clinton, Mass., declaration must be translated into reality.●

THREE NEW JERSEY TOWNS SOLVE PROBLEMS WITH HOUSING

● Mr. WILLIAMS. Mr. President, a recent article in the Washington Post described how cooperation among three New Jersey communities—Morristown, Boonton, and Dover—combined with assistance from the Department of Housing and Urban Development, have made a real difference in the quality of housing for the residents of these towns. The successful experience of the three communities in pooling their resources to upgrade housing conditions shows the creativity and imagination that can, and should, exist on the local level. One HUD official called the intercommunity arrangements that these towns have established, "unique and promising." I agree, and in order to share with my distinguished colleagues the success of Morristown, Boonton, and Dover in seeking out new ways to improve housing for their people, I submit for the RECORD the article "Three New Jersey Towns Solve Problems With Housing."

The article is as follows:

THREE NEW JERSEY TOWNS SOLVE PROBLEMS WITH HOUSING

(By Lee Mitgang)

MORRISTOWN, N.J.—Three north central New Jersey towns may be showing how regional cooperation can relieve the economic problems of the nation's thousands of small, suburban public housing authorities.

More than two-thirds of the nation's 2,807 local housing authorities serve smaller suburban communities. One of the earliest discoveries these smaller towns have made is that economically speaking, smallness is no virtue in running public housing.

Two years ago, Morristown's tinier suburban neighbors, Boonton and Dover, saw their combined 131 units of public housing badly deteriorating because the cost of maintenance was prohibitive. With limited resources, they couldn't hire their own maintenance staff and had to rely on costly, outside private maintenance firms.

The elderly residents complained that repairs often took weeks.

Morristown, meanwhile, had 10 full-time persons on its maintenance staff, but lacked other social and occupancy services that it wanted to provide residents of its 400 units of public housing.

The solution in hindsight, was obvious—cooperation, pooling of resources and skills among the three small housing authorities. It is an answer the U.S. Department of Housing and Urban Development has urged on all small housing authorities for at least the past two years.

But in practice, there were huge obstacles, the largest being that suburban authorities across the country tend to guard jealously their local autonomy.

"The process of getting local housing commissioners to sit down and talk was very time consuming and difficult," says Garland Allen, who is monitoring the progress of the Morristown-Boonton-Dover venture for the HUD.

It took a $285,000 HUD contract and heavy involvement by state housing officials to overcome local fears that cooperation with outside authorities would mean being engulfed by a regional bureaucratic Frankenstein.

"You need a catalyst to get public housing authorities to cooperate because they have to give up some autonomy. But what I see in New Jersey is unique and promising," says Allen.

"What we're hoping is that when the demonstration project is over, we'll be able to document it so it will be duplicated elsewhere," says Martha Lamar, who is monitoring the program for the state.

Under the scheme, the local housing authorities retained much of their original autonomy, but they jointly hired full-time professionals to handle occupancy and social service problems, and are pooling a full-time maintenance staff.

Karen Taggart, who works for the Dover housing authority, says maintenance costs have gone down 66 to 70 percent as a result. Residents are happier because the maintenance crew is on 24 hour call and response time now is measured in days rather than weeks.

Phyllis Lemkau-Welch, the occupancy expert now employed by the three authorities, says she has made a thorough assessment of the residents' abilities to pay rent. Most pay 25 percent of their gross adjusted income—usually consisting of pensions, Social Security or other governmental benefits.

While her assessments frequently meant that some residents who weren't paying their fair share now are forced to, she says. "The average person doesn't mind if he or she knows his neighbor also is."

And by pooling resources and hiring social worker Kathy Marek, the three authorities are providing residents with social services that seemed too expensive before the regional venture.●

"LABOR REFORM"—A SECTION-BY-SECTION ANALYSIS

● Mr. HELMS. Mr. President, on March 16 my good friend and distinguished colleague from Maine, Senator HATHAWAY, inserted into the RECORD what he termed "an outline of the basic provisions" of the so-called labor reform bill. The purpose of the insertion was, according to the able Senator, to assist his colleagues who are receiving a number of inquiries about the bill, as well as expressions of opinion both for and against the bill, S. 2467.

Frankly, Mr. President, while Senator HATHAWAY's outline presents a very favorable analysis of S. 2467, it ignores the many weaknesses and dangers in the bill. And because I believe, as does the distinguished Senator from Maine, that our colleagues ought to have as much information as possible in order to answer the concerns being expressed by their constituents, it is only fitting that they should have the benefit of an analysis that is not reluctant to point up some of the difficulties associated with disguising pushbutton unionism as labor reform.

Therefore, Mr. President, I submit for the RECORD a section-by-section analysis of both S. 2467 and the House labor reform bill, H.R. 8410, be printed in the RECORD at the conclusion of my remarks.

The analysis is as follows:

SECTION-BY-SECTION COMPARISON OF H.R. 8410 AS PASSED BY THE HOUSE OF REPRESENTATIVES ON OCTOBER 7, 1977 AND S. 2467 AS REPORTED BY THE SENATE HUMAN RESOURCES COMMITTEE ON JANUARY 31, 1978

H.R. 8410—TEXT	S. 2467—TEXT	ANALYSIS
ENACTING CLAUSE		
Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That (a) this Act may be cited as the "Labor Reform Act of 1977".	*Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,* That (a) this Act may be cited as the "Labor Reform Act of 1978".	Both bills designate the Act as the current year's "Labor" or "Labor Law" Reform Act.
(b) Except as otherwise specifically provided, whenever in this Act an amendment or repeal is expressed in terms of an amendment to, or repeal of a section or other provision, the reference shall be considered to be made to a section or other provision of the National Labor Relations Act.	(b) Except as otherwise specifically provided, whenever in this Act an amendment or repeal is expressed in terms of an amendment to, or repeal of, a section or other provision, the reference shall be considered to be made to a section or other provision of the National Labor Relations Act.	Sec. 1(b) specifies that the Act concerns changes in the National Labor Relations Act, (NLRA), which governs the labor-management relations of most of the nation's private sector employers and unions.
EXPANSION OF NLRB		
Sec. 2. (a) Section 3(a) of the National Labor Relations Act is amended to read as follows:	Sec. 2. (a) Section 3(a) of the National Labor Relations Act is amended to read as follows:	Both bills seek to deal with the Board's caseload problem by expanding the Board from 5 to 7 members and lengthening terms of office to 7 years.
"Sec. 3. (a) The National Labor Relations Board (hereinafter called the 'Board') created by this Act prior to its amendment by the Labor-Management Relations Act, 1947, and by the Labor Reform Act of 1977, is hereby continued as an agency of the United States, except that the Board shall	"Sec. 3. (a) The National Labor Relations Board (hereinafter called the 'Board') created by this Act prior to its amendment by the Labor-Management Relations Act, 1947, and by the Labor Law Reform Act of 1978, is hereby continued as an agency of the United States, except that the Board	This approach, which erroneously focuses on the number of decisionmakers rather than the decisionmaking process, has been criticized by former NLRB Chairman McCulloch as an "oversimplified, mathematical approach, not carefully tooled to the reali-

SECTION-BY-SECTION COMPARISON OF H.R. 8410 AS PASSED BY THE HOUSE OF REPRESENTATIVES ON OCTOBER 7, 1977 AND S. 2467 AS REPORTED BY THE SENATE HUMAN RESOURCES COMMITTEE ON JANUARY 31, 1978—Continued

H.R. 8410—TEXT	S. 2467—TEXT	ANALYSIS
	EXPANSION OF NLRB	
consist of seven instead of five members, appointed by the President by and with the advice and consent of the Senate. Of the two additional members so provided for, one shall be appointed for a term of five years and the other for a term of six years. Their successors, and the successors of the other members, shall be appointed for terms of seven years each excepting that any individual chosen to fill a vacancy shall be appointed only for the unexpired term of the member whom that individual shall succeed. The President shall designate one member to serve as Chairman of the Board. No more than a simple majority of the members of the Board shall be members of the same political party. Any member of the Board may be removed by the President, upon notice and hearing, for neglect of duty or malfeasance in office, but for no other cause.".	shall consist of seven instead of five members, appointed by the President by and with the advice and consent of the Senate. Of the two additional members so provided for, one shall be appointed for a term of five years and the other for a term of six years. Their successors, and the successors of the other members, shall be appointed for terms of seven years each, excepting that any individual chosen to fill a vacancy shall be appointed only for the unexpired term of the member whom that individual shall succeed. The President shall designate one member to serve as Chairman of the Board. No more than a simple majority of the members of the Board shall be members of the same political party. Any member of the Board may be removed by the President, upon notice and hearing, for neglect of duty or malfeasance in office, but for no other cause.".	ties of the Board's operations." Since the bills do not provide for appellate court-type panelization, each decision issued by a three-member panel—no matter how routine—will still have to be cleared for issuance by all of the nonparticipating Board members. Instead of two non-participating members, however, now clearance from four will be required. The result will be a lengthening rather than a shortening of case processing time.
	SUMMARY AFFIRMANCE OF ALJ DECISIONS	
(b)(1) The third sentence of section 3(b) is amended by striking "three" and substituting "four". (2) Section 3(b) is further amended by inserting after the third sentence the following new sentence: "The Board shall within ninety days after the date of enactment of the Labor Reform Act of 1977 establish a procedure, upon conditions stated in the rule, pursuant to which a group designated pursuant to the first sentence of this subsection may, in appropriate cases, upon motion of the prevailing party in a decision of an administrative law judge after a hearing under section 10(b), summarily affirm such decision. A motion for summary affirmance shall be filed within ten days after the decision of the administrative law judge, any response shall be filed within twenty days thereafter, and the motion and response shall then be presented for decision to a group designated pursuant to the first sentence of this subsection.".	(b)(1) The third sentence of section 3(b) is amended by striking "there" and substituting "four". (2) Section 3(b) is further amended by inserting after the third sentence the following new sentence: "The Board shall within ninety days after the date of enactment of the Labor Law Reform Act of 1978 establish a procedure, upon conditions stated in the rule, pursuant to which a group specifically designated pursuant to the first sentence of this subsection to decide summary judgment cases may, where appropriate upon the motion of a prevailing party in a decision of an Administrative Law Judge issued after a hearing under subsection (b) of section 10, summarily affirm such decision. A motion for summary affirmance shall be filed within ten days after the decision of the Administrative Law Judge, any exceptions to that decision and any response to that motion shall be filed within twenty days thereafter, and the motion and response shall then be presented for decision.".	Sec. 2(b)(2). Both bills require the Board to issue a rule granting the winning party before an Administrative Law Judge (ALJ) ten days in which to request the Board to "summarily affirm" the ALJ's decision. The losing party is given 20 additional days to oppose the request or file exceptions. The procedure would impair, rather than improve, current Board practice. Existing regulations already require filing of exceptions to ALJ decisions within 30 days. The Board already utilizes a summary affirmance type procedure through three-member panel "short-form" adoptions of ALJ decisions. Most importantly, the procedure expands the scope of Board review and requires the prevailing party to establish that ALJ decisions are appropriate for affirmance in their entirety.
	LAW CLERKS FOR ALJ'S	
(No comparable provision)	Sec. 3. The second and third sentences of section 4(a) are amended to read as follows: "The Board shall appoint an executive secretary, and such attorneys, examiners, law clerks to Administrative Law Judges, and regional directors, and such other employees as it may from time to time find necessary for the proper performance of its duties. The Board may not employ any attorneys for the purpose of reviewing transcripts of hearings or preparing drafts of opinions except that any attorney employed for assignment as a legal assistant to any Board member may for such Board member, and any law clerk assigned to an Administrative Law Judge may for such judge, review such transcripts and prepare such drafts."	Sec. 3. authorizes the Board to employ full-time law clerks for ALJs. The function of AJLs is to serve as experts in both fact-finding, including determining the credibility of witnesses, and application of the law. It is essential that ALJs maintain sole responsibility for performing both of these functions. The limited assistance provided by law clerks could be secured less expensively by appointment of additional ALJs, if necessary, without incurring the risk that law clerks would tend to intrude improperly into the decisional process, as Board counsel have come to do in many cases at the Board level.
	ADMINISTRATIVE RULES GOVERNING ELECTIONS	
Sec. 3. Section 6 is amended to read as follows: "Sec. 6. (a) The Board is authorized to make, amend, and rescind (in the manner prescribed by subchapter II of chapter 5 of title 5, United States Code) such rules and regulations as may be necessary to carry out the provisions of this Act. "(b)(1) The Board shall within twelve months after the date of enactment of the Labor Reform Act of 1977 issue regulations to implement the provisions of section 9(c)(6) including rules—	Sec. 4. Section 6 is amended to read as follows: "Sec. 6(a) The Board is authorized to make, amend, and rescind (in the manner prescribed by subchapter II of chapter 5 of title 5, United States Code) such rules and regulations as may be necessary to carry out the provisions of this Act. "(b)(1) The Board shall within twelve months after the date of enactment of the Labor Law Reform Act of 1978 issue regulations to implement the provisions of section 9 including rules—	Both bills revise the wording but not the substance of the Board's *general* rulemaking power. They also require the Board to issue rules in certain areas because codification of the Board's precedents would "simplify the law, better guide the parties, and permit the prompt handling of petitions for representation elections." Codification will not simplify the law or expedite representation proceedings. The "delay" in Board election cases lies not in identifying the controlling principles, but in determining how those principles should be applied to the facts of a particular case. Rather than reducing case processing time, the rulemaking requirements will generate additional opportunities for litigation.

SECTION-BY-SECTION COMPARISON OF H.R. 8410 AS PASSED BY THE HOUSE OF REPRESENTATIVES ON OCTOBER 7, 1977 AND S. 2467 AS REPORTED BY THE SENATE HUMAN RESOURCES COMMITTEE ON JANUARY 31, 1978—Continued

H.R. 8410—TEXT	S. 2467—TEXT	ANALYSIS
	EQUAL ACCESS	
"(A) which shall, subject to reasonable conditions, including due regard for the needs of the employer to maintain the continuity of production assure that if an employer or employer representative addresses the employees on its premises or during working time on issues relating to representation by a labor organization during a period of time that employees are seeking representation by a labor organization, the employees shall be assured an equal opportunity to obtain in an equivalent manner information concerning such issues from such labor organization, and, with due regard for the rights declared in section 7, the right of such labor organization to conduct meetings without undue interference, and the right of the employees to the privacy of their homes, provide also that the employees are assured an equal opportunity overall to obtain such information from the employer and such labor organization: *Provided*, That the rule shall apply to elections conducted pursuant to sections 9(c)(1) and 9(e);	"(A) which shall, subject to reasonable conditions, including due regard for the needs of the employer to maintain the continuity of production, provide that if an employer or agent of the employer addresses the employees on its premises or during working time on issues relating to representation by a labor organization during a period of time that employees are seeking (i) representation by a labor organization, (ii) to decertify or deauthorize a labor organization as their representative defined in subsection (a) of section 9, or (iii) to rescind an agreement made pursuant to the first proviso to subsection (a)(3) of section 8, the employees shall be assured an equal opportunity to obtain in an equivalent manner information concerning such issues from such labor organization, and, with due regard for the rights declared in section 7, the right of such labor organization to conduct membership meetings without undue interference, and the right of the employees to the privacy of their homes, provide also in the circumstances described in clause (i), (ii), or (iii) that the employees are assured an equal opportunity overall to obtain such information from the employer and such labor organization. To obtain an opportunity to present information relating to representation pursuant to this paragraph, a labor organization shall notify the employer, in writing, that employees of that employer had demonstrated an interest in representation by that labor organization and from the time of receipt of such notice the labor organization is to be entitled to an equal opportunity to present such information in an equivalent manner;	Both bills direct the Board to issue rules giving non-employee union organizers the right to campaign on company property even before a petition is filed whenever the employer "addresses" company employees on "its premises or during working time" on issues relating to union representation. A similar right is given to employers to utilize union halls for such purposes. The House legislative history on the scope of equal access is ambiguous but the Senate report indicates that, in general, management addresses to assembled employees on company time or property will trigger a corresponding right for union officials. Employer campaigning short of captive audience speeches—systematic supervisory conversations with individual employees, for example—would entitle union organizers to access only to nonworking areas such as cafeterias, lounges and parking lots during nonworking hours, but not to production areas. The equal access requirement would not be activated by casual employee-supervisory encounters or by employee questions during the course of regularly scheduled meetings to discuss issues of general concern to employees. Under S. 2467, to become eligible for equal access privileges, a union must notify the employer that "a significant minority" of its employees are interested in representation by that union. The required showing of interest is intended to be 10% of the unit or three employees, whichever is greater. Under current law employee union organizers already may solicit on company premises during nonworking hours and distribute union literature in nonworking areas. Non-employee union organizers may campaign on company premises in the absence of reasonable alternative means of communication. More importantly, however, organizers have the right to communicate freely with employees on an individual basis, may visit with employees in their homes, and may make unlimited promises of benefits to be derived from union representation. Since similar conduct on the part of the employers constitutes unfair labor practices, most employer campaigning has been restricted to speeches to employees on company property. Equal access will impair this right and force employers to pay employees for time spent listening to union propaganda. The NLRB General Counsel conservatively estimates that equal access will double the number of cases in which union file election objections which will result in more than 1000 addition litigated cases to be handled by the agency.
	VOTER ELIGIBILITY RULES	
"(B) to facilitate agreements concerning the eligibility of voters; and	"(B) to facilitate the resolution of disputes concerning the eligibility of voters; and	Both bills contain similar language requiring rules to resolve disputes concerning the eligibility of voters. Such rules would merely confirm existing practice as the Board has always placed a high priority on the negotiation of election agreements.
	VOTE AND IMPOUND RULES	
"(C) to govern the holding of elections in cases in which an appeal has not been decided prior to the date of the election.	"(C) to govern the holding of elections in cases in which an appeal has not been decided prior to the date of the election.	Both bills mandate rules which would permit the conducting of representation elections before pre-election issues such as appropriateness of the bargaining unit and eligibility of voters had been resolved. Such rules seriously undermine the fairness of Board elections. (See comment under Expedited Elections.)

SECTION-BY-SECTION COMPARISON OF H.R. 8410 AS PASSED BY THE HOUSE OF REPRESENTATIVES ON OCTOBER 7, 1977 AND S. 2467 AS REPORTED BY THE SENATE HUMAN RESOURCES COMMITTEE ON JANUARY 31, 1978—Continued

BARGAINING UNIT RULES

H.R. 8410—TEXT	S. 2467—TEXT	ANALYSIS
"(2) The Board shall, to the fullest extent practicable, exercise its authority under subsection (a) of this section to promulgate rules declaring certain units to be appropriate for the purposes of collective bargaining.	"(2) The Board shall, to the fullest extent practicable, exercise its authority under subsection (a) of this section to promulgate rules declaring certain units to be appropriate for the purposes of collective bargaining.	Both bills require that the Board, "to the fullest extent practicable," issue rules declaring certain bargaining units to be appropriate for purposes of collective bargaining. Unit rules are well established in more than 40 years of Board precedents. Codification of these precedents will increase litigation as parties seek interpretations of the rules instead of the precedents. The problem lies in the application of rules or precedents to particular fact situations.
JUDICIAL REVIEW OF ADMINISTRATIVE RULES		
"(3) A rule or regulation issued by the Board with respect to the subject matter set forth in paragraph (1) or (2) of this subsection shall be judicially reviewable only in a proceeding under section 10 of this Act and only on the grounds that the Board prejudicially violated the requirements of subchapter II of chapter 5 of title 5, United States Code, or that a rule or regulation of the Board is arbitrary or capricious, contrary to a specific prohibition of this Act, or of the Constitution. The failure of the Board to comply with the time requirements set forth in paragraph (1) of this subsection, or to institute a rulemaking proceeding with respect to the subject matter set forth in paragraph (2) of this subsection, within a reasonable period of time after a request for such a rulemaking procedure has been filed with the Board pursuant to section 553(e) of title 5, United States Code, to complete such a procedure within a reasonable period after its institution, may be reviewed upon the petition of any aggrieved party in the court of appeals of the judicial circuit in which the petitioner resides or has its principal office, or in the United States Court of Appeals for the District of Columbia Circuit. The court of appeals shall have jurisdiction to grant appropriate relief.	"(3) A rule or regulation issued by the Board with respect to the subject matter set forth in paragraph (1) or (2) of this subsection shall be judicially reviewable in accordance with the provisions of section 706(2) (A) through (D) of title 5, United States Code, only in a proceeding under section 10 of this Act. The failure of the Board to comply with the time requirements set forth in paragraph (1) of this subsection, or to institute a rulemaking proceeding with respect to the subject matter set forth in paragraph (2) of this subsection, within a reasonable period of time after a request for such a rulemaking procedure has been filed with the Board pursuant to section 553(e) of title 5, United States Code, to complete such a procedure within a reasonable period after its institution, may be reviewed upon the petition of any aggrieved party in the court of appeals of the judicial circuit in which the petitioner resides or has its principal office, or in the United States Court of Appeals for the District of Columbia Circuit. The court of appeals shall have jurisdiction to grant appropriate relief.	Neither bill provides for direct court review of election rules. Instead, both provide for review only within the context of an unfair labor practice proceeding, presumably generated by an employer's refusal to bargain. S. 2467 defines the scope of review through specific reference to applicable provisions of the Administrative Procedure Act (APA) while the APA provisions are paraphrased in H.R. 8410. If the Board fails or refuses to promulgate rules within specified time periods, an aggrieved party may petition for appropriate relief in the court of appeals for the District of Columbia or in any circuit in which the petitioner resides or has its principal office. With respect to both the availability and scope of review, S. 2467 essentially confirms current practice. However, as noted, review is available only within the framework of an unfair labor practice proceeding usually generated by an employer's refusal to bargain on the basis that the rule is improper. What this section grants in terms of judicial review, however, is effectively nullified for many parties by a subsequent provision (discussed below) which establishes financially burdensome "make whole" remedies for such refusals to bargain. Accordingly, by strewing the only avenue of review with financial roadblocks, both bills render Board-promulgated election rules virtually unreviewable.
"(4)(a) Notwithstanding any other provision of this Act, simultaneously with promulgation or repromulgation of any rule or regulation, the National Labor Relations Board promulgating or repromulgating the rule or regulation shall transmit a copy thereof to the Secretary of the Senate and the Clerk of the House of Representatives. Except as provided in paragraph (2), the rule or regulation shall not become effective, if— "(1) within ninety calendar days of continuous session of Congress after the date of promulgation, both Houses of Congress adopt a concurrent resolution, the matter after the resolving clause of which is as follows: "That Congress disapproves the rule or regulation promulgated by the National Labor Relations Board dealing with matter of , which rule or regulation was transmitted to Congress on , the blank spaces therein being appropriately filled; or "(2) within sixty calendar days of continuous session of Congress after the date of promulgation, one House of Congress adopts such a concurrent resolution and transmits such resolution to the other House, and such resolution is not disapproved by such other House within thirty calendar days of continuous session of Congress after such transmittal. "(b) If at the end of sixty calendar days of continuous session of Congress after the date of promulgation of a rule or regulation, no committee of either House of Congress has reported or been discharged from further consideration of a concurrent resolution disapproving the rule or regulation and neither House has adopted such a resolution, the rule or regulation may go into effect immediately. If, within such	(No comparable provision)	H.R. 8410 contains a procedure for Congressional veto of Board adopted election rules which is cumbersome and impractical. This provision is not found in S. 2467.

SECTION-BY-SECTION COMPARISON OF H.R. 8410 AS PASSED BY THE HOUSE OF REPRESENTATIVES ON OCTOBER 7, 1977 AND S. 2467 AS REPORTED BY THE SENATE HUMAN RESOURCES COMMITTEE ON JANUARY 31, 1978—Continued

JUDICIAL REVIEW OF ADMINISTRATIVE RULES—Continued

H.R. 8410—TEXT	S. 2467	ANALYSIS
sixty calendar days, such a committee has reported or been discharged from further consideration of such a resolution, or either House has adopted such a resolution, the rule or regulation may go into effect not sooner than ninety calendar days of continuous session of Congress after its promulgation unless disapproved as provided in paragraph (1)(A). "(c) Congressional inaction on, or rejection of, a resolution of disapproval under this subsection shall not be deemed an expression of approval of the rule involved. "(C) For the purposes of subparagraphs (A) and (B) of this paragraph— "(i) continuity of session is broken only by an adjournment of Congress sine die; and "(ii) the days on which either House is not in session because of an adjournment of more than three days to a day certain are excluded in the computation of thirty, sixty, and ninety calender days of continuous session of Congress."		
	GUARDS	
SEC. 4. Section 9(b)(3) is amended by striking ", or is affiliated directly or indirectly with an organization which admits to memberships, employees other than guards." and substituting "nonguard employees of the same employer at the same location, or if such organization is directly affiliated with any national or international labor organization which represents nonguard employees of the same employer at the same location".	SEC. 5. Section 9(b)(3) is amended by striking out "such organization admits to membership, or is affiliated directly or indirectly with an organization which admits to membership, employees other than guards" and inserting in lieu thereof by a hyphen and the following: "(A) in the case of a unit involving guards regularly assigned to work on the premises of two or more employers (whether or not individual guards move between the premises of such employers), such organization admits to membership, or is affiliated, directly or indirectly, with an organization which admits to membership, employees other than guards, and "(B) in any other case, such organization admits to membership nonguard employees at the same location, or if such organization is directly affiliated with any national or international labor organization which represents nonguard employees at the same location".	A proviso to Section 9(b) of the NLRA currently provides that any union which represents nonguard employees may not be certified as a representative of guards. This restriction is designed to preclude the possibility that during the course of a labor dispute the responsibilities of security guards to protect their employer's property can be fulfilled only at the expense of sacrificing their loyalties as union members. Section 4 of H.R. 8410 would delete this provision. Instead, it would only prohibit the same union from representing both guards and non-guards of the same employer at the same location. S. 2467 maintains the current restriction whenever the guards sought to be represented are "regularly assigned to work on the premises of two or more employers"—primarily guards employed by contract guard or armored car companies. In-house guards on the other hand may be represented by any union whatsoever so long as that union does not itself represent—and is not directly affiliated with a national or international union which represents—nonguard employees at the same location. S. 2467 is an improvement but still fails to satisfy the sound reasons for the current provisions.
	EXPEDITED ELECTIONS	
Sec. 5. Section 9(c) is amended by adding at the end thereof the following new paragraph: "(6)(A) Notwithstanding any other provisions of section 9, whenever a petition shall have been filed and served on the employer, or a labor organization pursuant to subsection (C)(1)(A) or (e)(1) of this section 9, or the individual or the labor organization that is the representative defined in subsection (a) of this section, in accordance with such regulations as may be prescribed by the Board, by an employee or group of employees or any individual or labor organization acting in their behalf alleging that their employer declines to recognize their representative as the representative defined in subsection (a) in a unit appropriate for the purposes of collective bargaining under a rule established by the Board pursuant to section 6 or a decision in the applicable industry, that a majority of the employees in that unit have designated that individual or labor	Sec. 6. Section 9(c) is amended by adding at the end thereof the following new paragraph: "(6)(A) Notwithstanding any other provisions of section 9, whenever a petition has been filed and served on the employer, or the individual or the labor organization that is the representative defined in subsection (a) of this section, in accordance with such regulations as may be prescribed by the Board, by an employee or group of employees or any individual or labor organization acting in their behalf— "(i) asserting that their employer declines to recognize their representative as the representative defined in subsection (a) in a unit appropriate for the purposes of collective bargaining under a rule established by the Board pursuant to section 6, that a majority of the employees in that unit have designated that individual or labor organization as their representative defined in subsection (a), and that no individual or labor organization is currently certified or	Both bills adopt a new three-tier approach to representation, decertification, and deauthorization elections but do not change procedures applicable to elections requested by employers. S. 2467 allows the Board 13 days from the filing and serving of the petition to direct an election and 21–30 days within which to conduct it if a majority of employees support the petitions and the unit is covered by a Board rule. H.R. 8410 requires such elections (and also those in which the unit is appropriate under a "decision in the applicable industry") to be run within 25 days of service of the petition. If majority support is not demonstrated, the election must be held within 45 days under S. 2467 and 50 days under H.R. 8410. If issues of "exceptional novelty or complexity" are involved, 75 days are allowed. Earlier, but not later, election dates may be agreed upon by the parties. Both bills also provide that (1) in computing the time limits, days in which a majority

SECTION-BY-SECTION COMPARISON OF H.R. 8410 AS PASSED BY THE HOUSE OF REPRESENTATIVES ON OCTOBER 7, 1977 AND S. 2467 AS REPORTED BY THE SENATE HUMAN RESOURCES COMMITTEE ON JANUARY 31, 1978—Continued

EXPEDITED ELECTIONS—continued

H.R. 8410—TEXT	S. 2467—TEXT	ANALYSIS
organization as their representative defined in subsection (a), and that no individual or labor organization is currently certified or recognized as the exclusive representative of any of the employees in the bargaining unit defined in the petition, or that a majority of employees in a unit currently certified or recognized designate that they no longer desire representation, or that a majority of the employees covered by an agreement made pursuant to section 8(a)(3) designate that such authority be rescinded, the Board shall investigate such petition. If the Board finds that the unit there specified is a unit covered by an agreement pursuant to section 8(a)(3), or is a unit where the certified or currently recognized representative is no longer desired or is a unit appropriate for the purposes of collective bargaining under a rule established by the Board pursuant to section 6 or a decision in the applicable industry, and if the Board has reasonable cause to believe that a question of representation affecting commerce exists and that the other conditions specified in this subsection have been met, the Board shall within seventeen days after the filing and serving of the petition direct an election by secret ballot not more than twenty-five days after a petition is filed and served under this subparagraph and shall so notify the representative named in the petition and the employer. (ii) Asserting that a majority of the employees in a unit appropriate for the purposes of collective bargaining do not wish to be represented by the individual or labor organization which has been certified or is being currently recognized by their employer as the representative defined in subsection (a), or do not wish to be covered by an agreement between their employer and a labor organization made pursuant to subsection (a)(3) of section 8, the Board shall investigate such petition. If the Board has reasonable cause to believe that a question of representation affecting commerce, or a question covering an agreement made pursuant to subsection (a)(3) of section 8, exists and that the other conditions specified in this subsection have been met, the Board shall within seventeen days after the filing and serving of the petition direct an election by secret ballot which shall take place within eight days after such election is directed by the Board, and in no event more than twenty-five days after a petition is filed and served under this subparagraph, and the Board shall so notify the representative named in the petition and the employer.	recognized as the exclusive representative of any of the employees in the bargaining unit defined in the petition; or "(ii) asserting that a majority of the employees in a unit appropriate for the purposes of collective bargaining do not wish to be represented by the individual or labor organization which has been certified or is being currently recognized by their employer as the representative defined in subsection (a), or do not wish to be covered by an agreement between their employer and a labor organization made pursuant to the first proviso to subsection (a)(3) of section 8, the Board shall investigate such petition. If the Board finds with respect to a petition filed under clause (i) that the unit there specified is a unit appropriate for the purposes of collective bargaining under a rule established by the Board pursuant to section 6, and if the Board has reasonable cause to believe that a question of representation affecting commerce exists and that the other conditions specified in this subsection have been met, the Board shall within thirteen days after the filing and serving of the petition direct an election by secret ballot to take place not less than twenty-one days nor more than thirty days after a petition is filed and served under this subparagraph (unless another date prior to such twenty-first day is agreed to by the employer and the representative named in the petition) and shall so notify the representative named in the petition, the employer and any other appropriate party. If the Board has reasonable cause to believe with respect to a petition filed under clause (ii) that a question of representation affecting commerce, or a question concerning an agreement made pursuant to the first proviso to subsection (a)(3) of section 8, exists and that the other conditions specified in this subsection have been met, the Board shall within thirteen days after filing and serving of the petition direct an election by secret ballot to take place not less than twenty-one days nor more than thirty days after a petition is filed and served under this subparagraph (unless another date prior to such twenty-first day is agreed to by the employer and the representative named in the petition), and shall so notify the representative named in the petition, the employer and any other appropriate party.	of the employees are on vacation shall not be included; (2) elections shall be conducted as scheduled even though all pre-election questions relating to such issues as the appropriateness of the bargaining unit and voter eligibility have not been resolved; (3) elections may be set aside only on the basis of conduct which violates an election rules or constitutes an unfair labor practice; and (4) elections shall not be set aside on the basis that they were improperly run pursuant to the expedited schedule rather than the appropriate 45- or 75-day schedule. "(B) In any proceeding under this subsection in which the Board directs an election by secret ballot, and which is not governed by subparagraph (A) of this paragraph, the Board shall direct the election on a date not more than fifty days after the filing and serving of the petition and shall inform the representative named in the petition, the employer, and all other interested parties of the election date not less than fifteen days prior to the election except that, where the Board determines that the proceeding presents issues of exceptional novelty or complexity, the Board may direct the election on a date not more than seventy-five days after the filing and serving of said petition. In computing the time limits stated in this paragraph the days of the week during which a majority	"(B) In any proceeding under this subsection in which the Board directs an election by secret ballot, and which is not governed by subparagraph (A) of this paragraph, the Board shall direct the election on a date not more than forty-five days after the filing and serving of the petition and shall inform the representative named in the petition, the employer, and all other interested parties of the election date not less than eight days prior to the election except that, where the Board determines that the proceeding presents issues of exceptional novelty or complexity, the Board may direct the election on a date not more than seventy-five days after the filing and serving of said petition. In computing the time limits stated in this paragraph the days of the week during which a majority	In fiscal 1977, 77% of the 14,399 election cases filed with the Board were conducted by agreement with the parties without formal hearings or contested decisions. Elections were held within a median time of 37 and 44 after filing of the petition. Even in contested cases the median time was only 75 days. The proposed expedited procedures will greatly reduce election agreements as the union incentive, i.e. quick elections, will be provided by statute and the employer incentive, i.e. acceptable resolution of pre-election issues, will be disregarded when elections are held without determining such issues. The result will be extensive post-election proceedings which will delay commencement of bargaining far more than existing pre-election delays.

SECTION-BY-SECTION COMPARISON OF H.R. 8410 AS PASSED BY THE HOUSE OF REPRESENTATIVES ON OCTOBER 7, 1977 AND S. 2467 AS REPORTED BY THE SENATE HUMAN RESOURCES COMMITTEE ON JANUARY 31, 1978—Continued

EXPEDITED ELECTIONS—continued

H.R. 8410—TEXT	S. 2467—TEXT	ANALYSIS
of the employees involved in the election are on vacation shall not be included. "(C) After an election conducted pursuant to subparagraph (A) or (B) of this paragraph is completed, the Board shall, unless under a rule adopted pursuant to subsection (b)(1)(D) of section 6, the ballots have been impounded, promptly serve the parties with a tally of the ballots.	of the employees involved in the election are on vacation shall not be included. "(C) After an election conducted pursuant to subparagraph (A) or (B) of this paragraph is completed, the Board shall, unles under a rule adopted pursuant to subsection (b)(1)(C) of section 6, the ballots have been impounded, promptly serve the parties with a tally of the ballots.	Other weaknesses in the bills are that: 1. Hinging election dates on union authorization cards will probably make the validity of such cards a litigable issue, leading to delays and needless litigation. 2. Union organizers will be able to control the timing of elections. 3. Voting and impounding ballots prior to determining issues that should have been decided before the election forces employees to vote without knowing such important points as, for example, the bargaining unit for which they are voting or the eligibility of certain voters.
	FREE SPEECH PROVISION	
"(D)(i) Any party to the election conducted pursuant to subparagraphs (A) and (B) of this paragraph may, within five days after such election, object to the election on the ground that conduct contrary to a rule relating to election declared by the Board pursuant to its authority under section 6 or conduct contrary to a rule of decision declared by the Board in a proceeding under section 10 did affect the result of the election. "(ii) With regard to challenged ballots, the Board shall, where such ballots are sufficient in number to affect the outcome of the election, investigate the challenges and serve a report upon the parties on challenges: *Provided*, That nothing contained herein shall preclude resolution of the eligibility questions raised by such challenges in a subsequent unit clarification proceeding. "(iii) The Board shall move expeditiously to resolve any issues raised by the objections or regarding eligibility and to certify the results of the election: *Provided*, That an objection that an election was conducted under subparagraph (A) instead of subparagraph (B) shall not be a basis for setting the election aside.".	"(D)(i) Any party to an election conducted pursuant to subparagraph (A) or (B) of this paragraph may, within five days after such election, object to the election on the ground that conduct contrary to a rule relating to the election declared by the Board pursuant to its authority under section 6 or conduct contrary to a rule of decision declared by the Board in a proceeding under section 10 did affect the result of the election. Except for the purposes of issuing and enforcing rules applicable to campaigning during the forty-eight hours prior to the holding of an election, the limitations stated in subsection (c) of section 8 on the Board's authority to utilize evidence in determining that an unfair labor practice has been committed shall also be applicable in determining that an election be set aside. "(ii) Whenever challenged ballots are sufficient in number to affect the outcome of the election, the Board shall investigate the challenges and serve a report on challenges upon the parties. Nothing contained herein shall preclude resolution in a subsequent unit clarification proceeding, of the unresolved eligibility questions raised by such challenges. "(iii) The Board shall move expeditiously to resolve any issues raised by the objections or regarding eligibility and certify the results of the election. An objection that an election was conducted under subparagraph (A) instead of subparagraph (B) shall not be a basis for setting the election aside.".	S. 2467 makes the free speech limitations in Section 8(c) of the NLRA applicable throughout election campaigns with the exception of the 48-hour period immediately preceding the election. The provision has little or no practical effect as the Board no longer sets aside elections on the basis of misrepresentations. *Shopping Kart Food Markets*, 228 NLRB 190 (1977).
	JUDICIAL REVIEW OF BOARD CERTIFICATIONS	
Sec. 6. Section 9(d) is amended by inserting immediately before the period at the end thereof a comma and the following: "except that no such certification prejudicially violated the procedural requirements of this Act or of subchapter II of chapter 5, United States Code, or acted arbitrarily or capriciously, or contrary to a specific prohibition of this Act or of the Constitution, or made findings with respect to questions of fact which are not supported by substantial evidence on the record considered as a whole.".	Sec. 7. Section 9(d) is amended by inserting immediately after the word "thereupon" the following: "after review in accordance with section 706(2) (A) through (E) of title 5, United States Code".	Both bills invoke a "substantial evidence" test, which assures that a reviewing court may consider whether the evidence supports the findings of fact relied on by the Board in reaching its decision as to a certification. S. 2467 does so by incorporating specifically provisions of the Administrative Procedure Act that are generally applicable to court review of agency proceedings, while H.R. 8410 paraphrases these provisions. As with the judicial review of Board promulgated election rules, review of Board certifications is available only within the framework of an unfair labor practice proceeding usually generated by an employer's refusal to bargain on the basis that the certification is improper. However, as discussed below, this avenue of review is precluded for many employers by virtue of a financially burdensome "make whole" remedy imposed on employers who engage in such refusals to bargain.

SECTION-BY-SECTION COMPARISON OF H.R. 8410 AS PASSED BY THE HOUSE OF REPRESENTATIVES ON OCTOBER 7, 1977 AND S. 2467 AS REPORTED BY THE SENATE HUMAN RESOURCES COMMITTEE ON JANUARY 31, 1978—Continued

H.R. 8410—TEXT	S. 2467—TEXT	ANALYSIS
WILLFUL VIOLATIONS		
Sec. 7. The first sentence of subsection (10)(b) is amended to read as follows: "(b) Whenever— "(1) it is charged that any person has engaged in or is engaging in any such unfair labor practice, or "(2) it is charged that any person has engaged in or is engaging in a willful violation of— "(A) any final order of the Board entered pursuant to subsection (c) of this section and which is not and has not been the subject of a proceeding under subsection (e) or (f) of this section, or "(B) any final order of a court of appeals of the United States entered in a proceeding under subsection (e) or (f) of this section, prohibiting interference with, restraint or coercion of employees in the exercise of the rights guaranteed in section 7 or discrimination against employees to encourage or discourage membership in a labor organization, and that said violation occurred within three years of the entry of the order violated, the Board, or any agent or agency designated by the Board for such purposes, is authorized to issue and cause to be served upon such person a complaint stating the charges. Such complaint shall contain a notice of hearing before the Board or member thereof, or before a designated agent or agency, at a place therein fixed, not less than five days after the serving of such complaint. No complaint shall be issued based upon any unfair labor practice or willful violation of a final order occurring more than six months prior to the filing of the charge with the Board and the service of a copy thereof upon the person against whom such charge is made, unless the person aggrieved thereby was prevented from filing such charge by reason of service in the Armed Forces, in which event the six-month period shall be computed from the day of his discharge.".	Sec. 8. The first sentence of subsection (10)(b) is amended to read as follows: "(b) Whenever— "(1) it is charged that any person has engaged in or is engaging in any such unfair labor practice, or "(2) it is charged that any person has engaged in or is engaging in a willful violation of— "(A) any final order of the Board entered pursuant to subsection (c) of this section and which is not and has not been the subject of a proceeding under subsection (e) or (f) of this of this section, or "(B) any final order of a court of appeals of the United States entered in a proceeding under subsection (e) or (f) of this section, prohibiting interference with, restraint or coercion of employees in the exercise of the rights guaranteed in section 7 or discrimination against employees to encourage or discourage membership in a labor organization, and that said violation occurred within three years of the entry of the order violated, the Board, or any agent or agency designated by the Board for such purposes, is authorized to issue and cause to be served upon such person a complaint stating the charges. Such complaint shall contain a notice of hearing before the Board or member thereof, or before a designated agent or agency, at a place therein fixed, not less than five days after the serving of such complaint. No complaint shall be issued based upon an unfair labor practice or willful violation of a final order occurring more than six months prior to the filing of the charge with the Board and the service of a copy thereof upon the person against whom such charge is made, unless the person aggrieved thereby was prevented from filing such charge by reason of service in the Armed Forces, in which event the six-month period shall be computed from the day of his discharge.".	Section 7 of H.R. 8410 and section 8 of S. 2467 are identical. Both would amend § 10(b) of the NLRA to provide for institution of complaint proceedings against "any person" charged with willful noncompliance with the terms of an existing Board order or a court decree enforcing a Board order. The sanctions which are found in the following section transform the NLRA from a remedial to a punitive statute for the first time in the Board's history. The new remedies focus on punishing employers rather than protecting employees.
REMEDIES: CONTRACT DEBARMENT		
Sec. 8. Section 10(c) is amended by— (1) inserting "(1)" after "(c)"; (2) striking out the fifth sentence of paragraph (1) (as redesignated by this section) and inserting in lieu thereof the following: "If upon the preponderance of the testimony taken the Board shall not be of the opinion that the person named in the complaint has engaged in or is engaging in any such unfair labor practice, or has willfully violated or is willfully violating a final order as specified in subsection (b) of this section, then the Board shall state its findings of fact and shall issue an order dismissing the said complaint.". (3) by adding at the end thereof the following new paragraphs:	Sec. 9. Section 10(c) is amended by— (1) inserting "(1)" after "(c)"; (2) striking out the fifth sentence of paragraph (1) (as redesignated by this section) and inserting in lieu thereof the following: "If upon the preponderance of the testimony taken the Board shall not be of the opinion that the person named in the complaint has engaged in or is engaging in any such unfair labor practice, or has willfully violated or is willfully violating a final order as specified in subsection (b) of this section, then the Board shall state its findings of fact and shall issue an order dismissing the said complaint."; (3) by adding in the final sentence of paragraph (1) after the word "report" the following: "containing findings of fact (including the basis on which conflicts in the evidence are resolved) and conclusions of law and in cases of unusual complexity and novelty such further discussion of the facts or law as is necessary."; and (4) by adding at the end thereof the following new paragraphs:	Findings of willful violations must be supported by "the preponderance of the testimony" under both bills. Both bills provide for federal contract debarment against "willful violators" of the Act for up to three years. Debarment does not compensate persons aggrieved and is therefore clearly punitive in nature. It applies only to government contractors and can cause a significant loss of jobs for employees supposed to be protected by the Act. The mandatory nature of the remedy may cause due process problems and the procedures proposed could result in "de facto" debarment through contract passovers as has occurred under OFCCP.
"(2) If upon the preponderance of testimony taken the Board shall be of the opinion that the allegation in the complaint that a person has willfully violated or is willfully violating a final order as specified in subsection (b) of this section has been sustained, then the Board shall state its findings of fact and shall issue and cause to be served on such person an order	"(2) If upon the preponderance of testimony taken the Board shall be of the opinion that the allegation in the complaint that a person has willfully violated or is willfully violating a final order as specified in subsection (b) of this section has been sustained, then the Board shall state its findings of fact and shall issue and cause to be served on such person an	A complaint of willful violation is tried before an ALJ as any other unfair labor practice proceeding. If a willful violation is found, the Board would issue an order certifying the identity of the willful violator to the Secretary of Labor. Unless the Secretary determines that the national interest requires otherwise, the identity of the violator would be certified to the

certifying the identification of that person to the Secretary of Labor. Notwithstanding any other law, unless the Secretary determines that because of unusual circumstances the national interest requires otherwise, the Secretary shall certify the identity of such person to the Comptroller General. The Comptroller General shall distribute a list to all agencies of the United States containing the names of persons certified by the Secretary of Labor pursuant to this subsection. Unless the agency of the United States concerned, after notice and opportunity for hearing to all interested parties, certifies to the Secretary of Labor that there is no other source of material or services furnished by the person affected by the Board order, no contracts shall be awarded to such person for a reasonable, definitely stated period of time commensurate with the seriousness of the violation, as determined by the Secretary of Labor, but such period shall not exceed three years. A debarment may be removed or the period may be reduced by the Secretary of Labor upon the submission of an application, supported by documentary evidence, setting forth appropriate grounds for the granting of relief, including without limitation compliance with the final order found to have been willfully violated, bona fide change of ownership or management, a fraud or misrepresentation of the charging party: *Provided*, That this subparagraph shall restrict the award of contracts solely to the products or service performed at the particular facility or facilities where the willful violation occurs or of the business entity legally responsible for the willful violation or to the local, intermediate, national or international labor organization legally responsible for the willful violation.	order certifying the identity of that person to the Secretary of Labor. Notwithstanding any other law, unless the Secretary of Labor determines that because of unusual circumstances the national interest requires otherwise, the Secretary shall certify the identity of such person to the Comptroller General. The Comptroller General shall distribute a list to all agencies of the United States containing the names of persons certified by the Secretary of Labor pursuant to this subsection. Notwithstanding any other law, no contracts shall be awarded to such person during the three-year period immediately following the date of the Secretary's certification, unless the Secretary, in his discretion and for reasons stated in a written explanation determines that setting a lesser period of debarment would better effectuate the purposes of the Act, or unless the agency of the United States concerned, after notice and opportunity for hearing to all interested parties, certifies to the Secretary of Labor that there is no other source for the material or services furnished by the person affected by the Board order: *Provided*, That debarment orders shall specify affirmative action to be taken to protect the affected employees' section 7 rights, and the Board shall recommend removal of the debarment or reduction of the debarment period to the Secretary if it is satisfied that the affirmative action requirements of the order have been effectuated, or if it is satisfied, for other reasons, that such relief will effectuate the purposes of the Act: *Provided further*, That this subparagraph shall restrict the award of contracts solely to the business entity legally responsible for the willful violation or to the local, intermediate, national, or international labor organization legally responsible for the willful violation.	Comptroller General who would notify all federal agencies not to contract with the offending employer. The bills permit only limited flexibility in imposing the debarment. Under H.R. 8410, debarment would not be allowed if there were no alternative source for required services or materials. Additionally, the debarment could be removed earlier if the unfair labor practice or practices had been remedied. Under S. 2467 Secretary of Labor would be empowered to determine that a lesser period of debarment would better effectuate the purposes of the Act. It also provides that the Board's order shall specify the steps the debarred party may take to dissipate the effects of the violations. Once an employer is debarred, the Board may recommend to the Secretary that the debarment be removed or reduced if it is satisfied that the affirmative action requirements of the order have been effectuated or if it determines that such relief would further the purposes of the NLRA. (Under H.R. 8410 the Board has no formal role in the reduction or removal of debarment orders.) The scope of debarment is broader under S. 2467 than under H.R. 8410. The Senate bill debarment applies to the "business entity" legally responsible for the willful violation while the House bill limits debarment to the "facility or facilities" where the willful violation occurred. The Senate Report indicates that in most cases parent-subsidiary relationships will be honored in defining business entities, but is silent on the legal effect of separate facilities. Presumably, Senate refusal to incorporate the House language constitutes a tactic rejection of any distinction predicated upon separate facilities of the same corporate entity.

REMEDIES: MULTIPLE BACK PAY; MAKE WHOLE

"(3) In a case in which the Board determines that any person has engaged in an unfair labor practice within the meaning of subsection (a)(1), (a)(3), (b)(1), or (b)(2) of section 8 which deprives an employee of employment while employees in a bargaining unit which includes that employee are seeking representation by a labor organization or during the period after a labor organization has first been recognized as a representative defined in subsection (a) of section 9 in such unit until the first collective bargaining contract is entered into between the employer and the representative, the measure of backpay for the period until a valid offer of reinstatement is made shall be double the employee's wage rate at the time of the unfair labor practice less the wages the employee has earned during that period. In a case in which the Board determines that an unlawful refusal to bargain prior to the entry into the first collective-bargaining contract between the employer and the representative selected or designated by a majority of the employees in the bargaining unit has taken place, the Board may award to the employees in that unit compensation for the delay in bargaining caused by the unfair labor practice which shall be measured by the difference between (i) the wages and other benefits received by such employees during the period of delay, and (ii) the wages and fringe benefits such employees were receiving at the time of the unfair labor practice multiplied by the percentage change in wages and other benefits stated	"(3)(A) In a case in which the Board determines that an unlawful refusal to bargain prior to the entry into the first collective-bargaining contract between the employer and the representative selected or designated by a majority of the employees in the bargaining unit has taken place, the Board may enter an order pursuant to paragraph (1) of this subsection which includes an award to the employees in that unit of compensation for the delay in bargaining caused by the unfair labor practice in an amount equal to the difference per hour during the period of delay between (i) the wages and other benefits such employees were receiving at the time of the unfair labor practice increased by a percentage equal to the change in wages and other benefits stated in the Bureau of Labor Statistics' average wage and benefits settlements, quarterly report of major collective-bargaining settlements, for the quarter in which the delay began and (ii) the wages and other benefits actually received by such employees during that period. If the Secretary of Labor certifies to the Board that the Bureau has, subsequent to the effective date of the Labor Law Reform Act of 1978, instituted regular issuance of a statistical compilation of bargaining settlements which the Secretary determines would better effectuate the purposes of this subsection than the compilation specified herein, the Board shall, in administering this subsection, use the compilation certified by the Secretary. "(B) In a case in which the Board determines that any person has unlawfully dis-	For violations of certain employee rights, a remedy of double back-pay (one-and-a-half times back pay under S. 2467) is imposed. Under H.R. 8410, the double back pay penalty would apply to employers found in violation of § 8(a)(1) of the Act, which deals with interference with union activity, and of § 8(a)(3), which prohibits discrimination against employees because of such activity. It also would apply to unions found to have engaged in conduct violative of § 8(b)(1), which bars labor organizations from restraining or coercing employees, and of § 8(b)(2), which prohibits unions from causing an employer to discriminate against an employee. A mitigation provision would deduct wages actually earned by the aggrieved party. Under S. 2467, employees unable to work as a result of the unlawful conduct mentioned in H.R. 8410 may receive a 150 percent backpay remedy if the violations occur: (1) when the employees are seeking to certify a union; (2) when the employees are seeking to decertify a union; (3) when the employees are seeking to rescind a union security agreement; and (4) prior to execution of an initial collective bargaining agreement. Under H.R. 8410 affected employees receive double backpay but the remedy is not available when discharges occur prior to decertification or deauthorization elections. Under S. 2467, the awarding of additional backpay is discretionary rather than mandatory. Under H.R. 8410 the employee is entitled to double backpay "until a

SECTION-BY-SECTION COMPARISON OF H.R. 8410 AS PASSED BY THE HOUSE OF REPRESENTATIVES ON OCTOBER 7, 1977 AND S. 2467 AS REPORTED BY THE SENATE HUMAN RESOURCES COMMITTEE ON JANUARY 31, 1978—Continued

REMEDIES: MULTIPLE BACK PAY; MAKE WHOLE—continued

H.R. 8410—TEXT	S. 2467—TEXT	ANALYSIS
in the Bureau of Labor Statistics' average wage and benefit settlements, quarterly report of major collective-bargaining settlements, for the quarter in which the delay began. If the Secretary of Labor certifies to the Board that the Bureau has, subsequent to the effective date of the Labor Reform Act of 1977, instituted regular issuance of a statistical compilation of bargaining settlements which the Secretary determines would better effectuate the purposes of this subsection that the compilation specified herein, the Board shall, in administering this subsection, use the compilation certified by the Secretary.".	criminated against employees to encourage or discourage membership in a labor organization, or has unlawfully interfered with, restrained or coerced employees in the exercise of the rights guaranteed by section 7, during a period (i) in which employees in a bargaining unit which includes that employee are seeking representation by a labor organization, (ii) after a labor organization has first been designated or selected as a representative defined in subsection (a) of section 9 in such unit until the first collective-bargaining agreement is entered into between the employer and the representative, or (iii) in which employees currently represented by an individual or labor organization which has been certified or is being recognized by their employer or currently covered by an agreement made pursuant to the first proviso to subsection (a)(3) of section 8 in a bargaining unit which includes that employee are seeking to deauthorize or decertify that representative or rescind that agreement is alleged, the Board may enter an order pursuant to paragraph (1) of this section which includes an award of backpay in an amount equal to one and one-half the employee's wage rate at the time of the unfair labor practice for the time lost by reason of the unfair labor practice less the wages the employee has earned during that period.	valid offer of reinstatement is made," whereas under S. 2467 additional backpay is awarded "for the time lost by reason of the unfair labor practice." S. 2467 makes no change in H.R. 8410 mitigation requirements. Both bills provide a "make whole" remedy for unlawful refusals to bargain. For refusal to bargain prior to the entry of a first agreement, affected employees may receive "damages," measure by the difference between the wages and other benefits received by the employees during the period of delay and the wages and other benefits they were receiving at the time of the unlawful refusal multiplied by a factor which represents the percentage change in such wages and benefits under collective bargaining contracts for employers with over 5000 employees, as determined by the Bureau of Labor Statistics. The Senate Report makes clear that this remedy is intended to be imposed against employers who are merely engaging in technical refusals to bargain for purposes of securing court review of Board-promulgated election rules or certifications. The provision thus totally undermines the statutorily-mandated procedure for acquiring court review of Board determinations in representation proceedings.
	AUTOMATIC COURT ENFORCEMENT OF BOARD ORDERS	
Sec. 9. (a) The third sentence of subsection 10(e) is amended by inserting immediately before the period at the end thereof a comma and the following: "nor shall any objection be considered by the court unless a petition for review pursuant to subsection (f) of this section has been timely filed by the party stating the objection".	Sec. 10. (a) The third sentence of subsection 10(c) is amended by inserting immediately before the period at the end thereof a comma, and the following: "nor shall any objection be considered by the court unless a petition for review pursuant to subsection (f) of this section has been timely filed by the party stating the objection".	Both bills provide for self-enforcing Board orders unless an aggrieved party files a petition for review in a federal court of appeals within 30 days after issuance of the Board's order.
(b) The fourth sentence of section 10(e) is amended to read as follows: "The findings of the Board with respect to questions of fact if supported by substantial evidence on the record considered as a whole shall be conclusive: *Provided*, That no finding of the Board that a representative is the exclusive representative of the employees in a unit for purposes of collective bargaining shall be accepted by the court unless such representative has been certified by the Board after a secret ballot election conducted in accordance with subsection (c) of section 9 or has been determined to be a representative defined in subsection (a) of section 9 by the Board in an order entered pursuant to subsection (c) of this section: *Provided further*, That no such order shall be entered where the employer has not engaged in conduct, unlawful under this Act, which undermines a free and fair election under subsection (c) of section 9: *Provided further*, That any representative designated or selected prior to the effective date of this Act shall remain such representative under this provision unless such designation or selection is withdrawn by the employees in the unit appropriate for the purposes of collective bargaining in an election under subsection (c) of section 9: *Provided further*, That where the employer agrees to recognize an individual or labor organization as a representative defined in subsection (a) of section 9 on the basis of proof of majority support other than a Board certification and such support is in fact demonstrated, the individual or labor organization so chosen shall be considered to be a representative for purposes of subsection (a) of section 9.	(No comparable provision)	H.R. 8410 also includes a provision that would permit a union to be recognized for collective bargaining purposes without the employees' assent through a secret ballot election if (1) the employer had engaged in unlawful conduct "which undermines a free and fair election;" (2) prior to enactment the union previously was established as a bargaining representative my means other than an election; or (3) the employer agreed to some means of determining the union's majority status other than an election, e.g., a third party card check. S. 2467 contains no comparable provision.

SECTION-BY-SECTION COMPARISON OF H.R. 8410 AS PASSED BY THE HOUSE OF REPRESENTATIVES ON OCTOBER 7, 1977 AND S. 2467 AS REPORTED BY THE SENATE HUMAN RESOURCES COMMITTEE ON JANUARY 31, 1978—Continued

H.R. 8410—TEXT	S. 2467—TEXT	ANALYSIS
(c) That first sentence of subsection 10(f) is amended by— (1) inserting "within thirty days" after "by filing," and (2) inserting before the period at the end thereof the following: "except that, if a petition for review has been timely filed, any other party to that Board proceeding, aggrieved by the order, may, within fifteen days of service on it of said petition, file a further petition for review."	(b) The first sentence of subsection 10(f) is amended by— (1) inserting "within thirty days" after "by filing," and (2) inserting before the period at the end thereof the following: "except that, if a petition for review has been timely filed, any other party to that Board proceeding, aggrieved by the order, may, within fifteen days of service on it of said petition, file a further petition for review".	
	MANDATORY COURT INJUNCTIONS	
Sec. 10. The first sentence of section 10(1) is amended to read as follows: "(1) Whenever it is charged that any person has engaged in an unfair labor practice within the meaning of— "(1) subsection (a)(3) or (b)(2) of section 8 which deprives an employee of employment while employees in a bargaining unit which includes that employee are seeking representation by a labor organization or during the period after a labor organization has first been recognized as a representative defined in subsection (a) of section 9 in such unit until the first collective-bargaining contract is entered into between the employer and the representative, or "(2) subsection 4(A), (B), or (C) of section 8(b) or section 8(e) or section 8(b)(7), the preliminary investigation of such charge shall be made forthwith and given priority over all other cases except cases of like character in the office where it is filed or to which it is referred.".	Sec. 11. The first sentence of section 10(1) is amended to read as follows: "(1) Whenever it is charged that any person has engaged in any unfair labor practice within the meaning of— "(1) subsection (a)(3) or (b)(2) of section 8 which deprives an employee of employment during a period (i) in which employees in a bargaining unit which includes that employee are seeking representation by a labor organization, (ii) after a labor organization has first been recognized as a representative defined in subsection (a) of section 9 in such unit until the first collective-bargaining contract is entered into between the employer and the representative, or (iii) in which employees currently represented by an individual or labor organization which has been certified or is being recognized by their employer or currently covered by an agreement made pursuant to the first proviso to subsection (a)(3) of section 8 in a bargaining unit which includes such employees are seeking to deauthorize or decertify that representative or rescind that agreement, or "(2) paragraph 4 (A), (B), or (C) of section 8(b), paragraph (7) of section 8(b) or section 8(e), preliminary investigation of such charge shall be made forthwith and given priority over all other cases except cases of like character in the office where it is filed or to which it is referred.".	Section 10 of H.R. 8410 would make it mandatory for the Board to seek injunctions to compel reinstatement of any employees alleged to have been discharged discriminatorily during a union organizing campaign or the period of bargaining for an initial contract, where the Board's preliminary investigation indicated reasonable cause to believe the allegation is valid. Section 11 of S. 2467 differs somewhat in that the injunctive relief would be sought by the Board whenever a complaint was issued based upon a discharge occurring during any of the four periods in which the 150 percent backpay remedy was applicable. Discretionary authority to seek injunctive relief in any unfair labor practice case is now available under Sec. 10(j). Mandatory injunctions in discharge cases as proposed would often *cause* irreparable harm to employers and current employees by forcing the temporary reinstatement of persons who are unfit—by reason of incompetence, unsafe working habits, dishonesty or proclivity to violence—to be working in the plant. Also such injunctions would generate additional litigation because most discharges would have to be tried in two forums—once before the district court and once before the Board. In an analysis of the impact of the mandatory injunction provision in H.R. 8410—which, as noted, is narrower in scope than the comparable provision in S. 2467—General Counsel Irving has concluded that the settlement rate will drop considerably because charged employers (1) will be reluctant to execute any settlement providing for reinstatement before the election, and (2) will be anxious to take advantage of federal discovery privileges. As a result Irving predicts that in FY 1979 alone more than 3,479 8(a)(3)-type 10(1) petitions would be filed in federal courts, and the Board would require the services of 232 additional professional employees.
Sec. 11. Section 10(m) is amended by inserting "under circumstances not subject to section 10(1)," after "section 8,".	Sec. 11(b). Section 10(m) is amended by inserting "under circumstances not subject to section 10(1)," under "section 8.".	This section would amend the NLRA to conform to the changes proposed in the previous section of each bill.
	INDIVIDUALS WITH RELIGIOUS CONVICTIONS	ANALYSIS
(No comparable provision)	Sec. 12. Section 19 is amended to read as follows: "Sec. 19. Any employee who is a member of and adheres to established and traditional tenets or teachings of a bona fide religion, body or sect which has historically held conscientious objections to joining or financially supporting labor organizations shall not be required to join or financially support any labor organization as a condition of employment; except that such employee may be required in a contract betwen such employees' employer and a labor organization in lieu of periodic dues and initiation fees, to pay sums equal to such dues and initiation fees to a fund maintained by the employer for the sole purpose of paying individuals for their services as neutral arbitrators under the contract or to a nonreligious charitable fund exempt from taxation under section 501(c)(3) of the Internal Revenue Code, chosen by	Section 12 of S. 2467 would permit any employee with religious conscientious objections to membership in or financial support of labor organizations to refrain from joining or supporting them as a condition of continued employment. Instead, the employee could be contractually required to contribute sums equal to the required union dues and initiation fees into a special employer fund maintained for compensating arbitrators for their services under the contract or into another nonreligious charitable fund.

	such employee from a list of at least three such funds, designated in such contract or if the contract fails to designate such funds, then to any such fund chosen by the employee.".	
	STRANGER PICKETING	
Sec. 12. Section 10 of the National Labor Relations Act, as amended, is amended by adding at the end thereof the following new subsection: "(n) Where there exists an agreement between an employer and a labor organization, whether express or implied, not to strike, picket or lockout, the Board, if it finds that the public interest would be served thereby, shall have the power to petition any district court of the United States (including the District Court of the United States for the District of Columbia) within any district where either or both of the parties reside or transact business, for such temporary injunctive relief or restraining order as is necessary to prevent any person not authorized by a representative of employees of the employer being struck or picketed within the meaning of subsection (a) of section 9 from engaging in, or inducing or encouraging any employee of the employer to engage in, conduct in breach of such agreement, irrespective of the nature of the dispute underlying such strike, picket or lockout, and such court shall have jurisdiction to grant to such party or the Board such temporary injunctive relief or restraining order as it deems just and proper.".	Sec. 13. Section 301 of the Labor Management Relations Act of 1947 is amended by adding at the end thereof the following new subsection: "(f)(1) Where there is in effect a collective-bargaining contract between an employer and a labor organization which is the representative of employees under section 9 (a) of this Act, the courts of the United States shall, notwithstanding the limitations stated in the Act entitled "An Act to amend the Judicial Code and to define and limit the jurisdiction of courts sitting in equity, and for other purposes", approved March 23, 1932 (29 U.S.C. 101–115), but subject to the limitations stated herein, have the authority in a civil action brought by that employer to restrain (A) a concerted refusal in breach of that contract to cross a picket line not maintained by a labor organization in connection with a labor dispute; or (B) a concerted refusal to work in a breach of that contract (and concerted activity in furtherance thereof) that is neither initiated, authorized, nor ratified by the labor organization, where a refusal to cross a picket line maintained by a labor organization in connection with a labor dispute is not involved. "(2)(A) In an action under paragraph (1) of this subsection no restraining order may issue unless the employer has, in addition to the other requirements for obtaining relief, proved at a hearing held after the labor organizations concerned have been given notice and an opportunity to oppose the granting of relief, that the concerted activity specified above has occurred or is occurring. "(B) In an action under paragraph (1)(A) of this subsection, if the picket line is maintained by a labor organization in connection with a labor dispute, no restraining order shall be granted pursuant to this subsection. "(C) In an action under paragraph (1)(B) of this subsection, if the labor organization does not oppose the granting of relief under this subsection on the ground that the concerted activity in question has been initiated, authorized, or ratified, it shall be conclusively established for the action in question and related actions that the activitiy was not so initiated, authorized, or ratified. If the labor organization has initiated, or authorizes or ratifies the concerted activity, no restraining order shall be granted pursuant to this subsection.".	These provisions of the bills vary widely. S. 2467 would provide injunctive relief against certain strikes and picketing in breach of no-strike agreements. Employers could seek injunctive relief against (1) sympathy strikes in support of a picket line "not maintained by a labor organization in connection with a labor dispute," and (2) wildcat strikes—i.e., those that are neither initiated, authorized nor ratified by the contracting labor organization. If the quoted language is strictly construed so as not to encompass dissent union members protesting local issues, this provision could provide much-needed relief. Unlike H.R. 8410, the bill also provides that the contracting employer—not just the Board—is authorized to seek court relief. Sympathy strikes in support of a picket line "maintained by a labor organization in connection with a labor dispute," and strikes called in violation of a no-strike agreement which are sanctioned by the contracting labor organization could not be enjoined. Moreover, if a contracting labor organization chooses not to oppose the issuance of injunctive relief on the grounds that it has approved the picketing, the unauthorized nature of the strike is thereby "conclusively established" not only for the action in question, but also for all "related actions." (H.R. 8410 would provide no relief against sympathy picketing). If construed literaly, the bill could be interpreted as overruling *Boys Markets, Inc. v. Retail Clerks Union*, 398 U.S. 235 (1970), which held that employers can secure injunctive relief in federal courts against any strike which is called in violation of a no-strike provision so long as the underlying dispute is arbitrable. S. 2467 appears to preclude any injunctive relief against authorized strikes and picketing. Since most strikes enjoinable under *Boys Markets* are fully authorized, they would not be encompassed by the prohibitions in the new legislation. S. 2467 also provides that merely by refusing to oppose the issuance of an injunction on the basis that the strike or picketing has been authorized, a labor organization may totally insulate itself from financial liability in any subsequent suit arising out of the unlawful conduct.
	EFFECTIVE DATE	
Sec. 13. Except as otherwise specifically provided in this Act, the amendments made by this Act shall take effect sixty days after the date of enactment of his Act.	Sec. 14. Except as otherwise specifically provided in this Act, the amendments made by this Act shall take effect sixty days after the date of enactment of this Act.	Both bills provide that the proposed amendments would be effective 60 days after enactment.●

COMMUNITY EDUCATION

● Mr. CHURCH. Mr. President, I am pleased to join Mr. WILLIAMS, chairman of the Senate Human Resources Committee, in sponsoring the Community Schools and Comprehensive Education Act of 1978.

Community education brings the community into the schools by allowing these public facilities to be used by the community after normal school hours. Young and old assist in developing programs that meet specific needs as identified by the people themselves. Such programs could include recreational and sports activities, participation in self-government and community improvement, arts and crafts, counseling, and even health services. Community education programs in Idaho have included such efforts as providing tax assistance with the help of IRS specialists and assisting victims of the Teton Dam disaster which struck the Rexburg area in 1976.

Several years ago, when I introduced the initial legislation to create a nation-

wide, federally supported community education program, I foresaw the effectiveness and popularity these programs would bring to this country. Since that time, community schools have emerged in every State of the country with State and local support. Many States have provided for community education specialists within their Departments of Education. I was very pleased to learn that my State of Idaho recently appointed a full time community education specialist, Mr. Michael Murphy.

Senator Williams' bill, S. 2711, recognizes the growth of community education and provides for a new title X "Community Schools" under the Elementary and Secondary Education Act. A separate title will allow States to develop a comprehensive community education program within their State educational systems and provide additional support for local educational agencies. S. 2711 encourages the coordination of the community schools with other service programs including CETA, Headstart, Public Health Services, and the Older Americans Act.

As chairman of the Senate Committee on Aging, I have witnessed the successful teamwork among community schools, senior centers, and our older Americans. Such cooperation with aging programs—as well as child services, health services and employment programs—builds bridges of communication and interests throughout the community.

Mr. President, community education works. I am proud to join Senator WILLIAMS and Senator PELL, chairman of the Subcommittee on Education, in sponsoring this most worthwhile legislation. I am hopeful that the Congress will act favorably upon this legislation and allow a growing movement to spread throughout every community in our country.●

NATIONAL ENERGY PLAN OPTIONS UNDER ASSUMPTIONS OF NATIONAL SECURITY THREAT

● Mr. DURKIN. Mr. President, it is important that every fresh view of our Nation's energy crisis be presented to Congress as it continues to deliberate proposed Federal solutions. Representative JEFFORDS, who represents my next door neighbors in Vermont, recently requested that the Library of Congress assess the extent to which the national energy plan reflects the urgency of our situation. I found the resulting report very interesting reading and commend it to my distinguished colleagues.

The study asks the question whether the policies set forth last April 20—when we declared the "moral equivalent of war" on our energy problems—are consistent with what would have occurred if we were fighting a real war. It concludes that certain features of the national energy plan could be strengthened. I was particularly interested in its conclusion that "a massive industrial and energy production effort will be needed even to achieve the plan's own quantitative goals" and pointing to resources like small-scale hydroelectric installations at existing dams as having great potential.

There is much in this study that should be scrutinized closely. For example, it suggests that rationing should be playing a larger role than at present—something I have my own very serious doubts about at the present time especially in light of the inadequate emphases on alternative means of transportation. Nonetheless, the study offers an original approach to analyzing the energy policies we are considering which deserves to be aired. Representative JEFFORDS deserves our congratulations in suggesting that it be done.

I submit for the RECORD the study and the letter.

The material is as follows:

HOUSE OF REPRESENTATIVES,
Washington, D.C., September 14, 1977.

Hon. GILBERT GUDE,
Director, Congressional Research Service, Library of Congress, Washington, D.C.

DEAR GIL: The President has stated that the energy crisis is our greatest challenge, terming it the "moral equivalent of war."

I am concerned that the present energy legislation, in regard to its treatment of alternative, or renewable, energy technologies, does not reflect the urgency of our situation. I would request that a paper be done, specifically by Ms. Frances Gulick, of the Environmental and Natural Resource Division, addressing what specific measures, both administrative and legislative, would have to be taken in order to promote these technologies under the assumption of a national energy emergency, i.e., wartime conditions. Preliminary discussions with Ms. Gulick have already occurred.

Thank you very much for your help in this matter.

With best personal regards,
Sincerely,

JAMES M. JEFFORDS.

THE NATIONAL ENERGY PLAN OPTIONS UNDER ASSUMPTIONS OF NATIONAL SECURITY THREAT

ABSTRACT

Purpose and scope

In presenting his national energy program the President based his case for that set of extraordinary measures on a perception of a serious threat to national and free world security. That threat would mature to crisis in the mid-1980s, as projected by the President, when world suppliers of oil would be unable or unwilling to provide enough oil to meet world needs and prevent economic chaos. In this analysis, the dependence of the U.S. and the free world on imported oil places free world economic, political and military health at grave near-term risk, requiring an accelerated program to reduce oil import dependence and a shift to other fuels, all with the equivalent of wartime urgency, vigor and scale.

During the ensuing months of executive and congressional action, many commentators have noted that neither the concrete elements of the President's plan nor the nature and pace of congressional action have been consistent with a credibly projected near-term national security crisis.

In response to a congressional request, this paper explores the types of programs and rationales that would be consistent with a credible, near-term national security threat of the nature described above, based upon analogous or comparable war-related mobilizations in the past. This analysis does not assess the relative merits of the President's projection of national security threat of crisis dimensions against other less drastic interpretations but accepts that projection and the need for wartime emergency measures as assumptions for this paper.

The leading executive role

A serious threat to national security always calls for a leading Federal role. In previous instances, the Executive branch has taken the responsibility for getting done whatever was necessary. Congress has provided support, funds, oversight, and sometimes legislative authority after the fact.

In an energy crisis that threatens the national security, the Executive branch could be expected to assume and exercise major authorities dealing with both the supply and the use of fuels and energy. Tasks which the Executive branch has assumed in the past in situations of real emergency include:

Defining the nature of the threat to security.

Setting production targets and mobilizing the U.S. industrial base for expanding the domestic supply of fuels and energy, munitions and industrial products needed to meet the emergency.

Placing large orders for the goods and services required to carry out direct Federal operations.

Setting priorities for use of critical materials and restricting their use by industry.

Enlisting and mobilizing public and private participation and support.

Maintaining the strength of the international collective security system.

Industrial mobilization for national goals

In earlier instances of national security emergency, large scale direct Federal procurement of goods and services in pursuit of industrial production goals aligned with national security objectives provided the primary Federal management tool by which such national goals could be both established and achieved.

Although the Federal Government set the production goals, the speed with which the targets were achieved depended on a close partnership between the Federal Government and private industry. This involved an exercise of Federal regulatory authority to allocate scarce materials, coupled with restrictions as required to limit non-priority uses, which was put at the service of the U.S. private industrial production sector, and close mutual exchange of information.

A similar partnership is possible now to fulfill the quantitative goals set in the National Energy Plan, accelerating the production of equipment and facilities using renewable and other fuels alternative to oil, through large scale Federal purchases for its own use of such items as the following:

Synthetic fuels, including oil from shale and coal, fuel from waste and gasoline substitutes.

Electric or other non-gasoline using vehicles.

Solar heating and cooling, photovoltaic and wind energy conversion systems.

Industrial facilities for waste recycling, cogeneration of heat, environmental protection, hydro-electric turbines and generators, fluidized bed combustors and other equipment permitting retrofit for the use of fuels other than oil.

Since the Federal Government owns, annually procures and maintains hundreds of thousands of buildings and vehicles for its own public services, accelerated procurement for replacing and retrofitting existing federally-owned capital stock could be sufficient to underwrite and accelerate an expanding private industrial production capability in equipment using fuels other than oil.

The public market for such equipment may be enlarged by enlistment of State and local government purchases for which Federal fiscal or other assistance may be provided.

Federal intervention is limited in time

During World War II and the Korean War, substantial Federal intervention and redirection of private industrial production to meet national security production goals was accepted in large measure because it was con-

ceived of as essentially temporary, "for the duration". There was general agreement on the wartime goals—defense of democracy, defeat of its foes—but there was also general agreement that, with victory, national production would revert to private hands, its output again determined by civilian consumption choices and needs.

Clearly, a direct analogy cannot be drawn with the present situation. "Victory" will not be "won" by 1985: Under the most optimistic scenario proposed, achievement of the Plan's 1985 energy goals would still leave the U.S. depending on annual imports of about 6 million barrels of oil a day. However, the accelerated Federal procurement program explored in this paper as an option would not be needed after 1985. It is expected that by then private sector demand could and would take over the process of expanding the volume and scope of the Nation's conversion to the use of fuels other than oil.

The congressional role

Historically, legislative measures enacted during periods of national security or wartime emergencies have served primarily to support presidential initiatives and decisions with such additional tax and other authorizations and appropriations as were considered necessary. Any or all of the executive measures outlined in the preceding section could be launched by the President under authorities and congressional consent procedures in laws still in force.

However, Congress is by no means prevented from taking much stronger initiatives independently or supplementing Executive initiatives in dealing with situations involvng risk to national security. Congress retains and may wish to exercise the option to assume a much stronger leading role in the design and rationale of new national policies intended to reduce U.S. dependence on imported oil, and independently promote the Federal procurement and other oil import saving programs which could realize in time this national security goal.

I.—THE NATIONAL ENERGY PLAN IN NATIONAL SECURITY TERMS

The President has defined the energy problem facing this country as one of grave and near term danger to national security. He set U.S. energy demands in a world context, as an approaching crisis of the mid-1980s when world suppliers of oil would not be able or willing to export all the oil needed by the U.S. and the free world. The resulting international tensions, competition for imports of oil, and slow down in the free world's economy would threaten "national catastrophe." The crisis point sometime in the 1980s, according to the President's perspective, is not self-imposed but will be determined by world events and trends which are now largely outside of domestic control.

The President's assessment

In a nationwide address April 18, 1977, the President described the approaching dangers in very strong terms.[1]

Tonight I want to have an unpleasant talk with you about a problem that is unprecedented in our history. With the exception of preventing war, this is the greatest challenge that our country will face during our lifetime.

The energy crisis has not yet overwhelmed us, but it will if we do not act quickly. . . .

The oil and natural gas that we rely on for 75 percent of our energy are simply running out. . .

Our Nation's economic and political independence is becoming increasingly vulnerable. Unless profound changes are made to lower oil consumption, we now believe that early in the 1980's the world will be demanding more oil than it can produce. . . .

We will constantly live in fear of embargoes. We could endanger our freedom as a sovereign nation to act in foreign affairs. Within 10 years, we would not be able to import enough oil from any country, at any acceptable price. . . .

Inflation will soar; production will go down; people will lose their jobs. Intense competition for oil will build up among nations and also among the different regions within our own country. This has already started.

If we fail to act soon, we will face an economic, social, and political crisis that will threaten our free institutions.

Seven months later, the President warned again of the encroaching threat to national security, if the rising dependence on foreign oil is not reversed soon.[2]

If this trend continues, the excessive reliance on foreign oil could make the very security of our Nation increasingly dependent on uncertain energy supplies. Our national security depends on more than just our Armed Forces; it also rests on the strength of our economy, on our national will, and on the ability of the United States to carry out our foreign policy as a free and independent nation. America overseas is only as strong as America at home.

The Secretary of Defense said recently, "The present deficiency of assured energy sources is the single surest threat . . . to our security and to that of our allies."

STATEMENT BY THE SECRETARY OF DEFENSE

The Secretary of Defense elaborated this concern in his testimony before the House Ad Hoc Committee on Energy on May 4, 1977: [3]

I do not believe my present responsibilities as Secretary of Defense make me aware of the very substantial impact, in fact, the crucial nature, of the energy shortage and of the need for a U.S. program to redress it. In fact, there is no more serious threat to the long-term security of the United States and to its allies than that which stems from the growing deficiency of secure and assured energy resources. . . .

The threat to national security, the economy and our way of life which arises from the energy crisis is not yet fully recognized by all. Some refuse to accept the fact that the energy crisis is real, and that its solution will require the development of a national policy and purpose commanding the dedication of the Nation, its resources, and its people over many years. Ultimately, the only alternative is disaster.

We are all familiar with the continuing risk of oil supply interruptions and upward pressures on prices from politically motivated embargoes such as experienced 4 years ago. Much less attention has been given to the potential for a much more serious interruption of oil supply by hostile forces in time of war. In the event of some future confrontation, the Soviet Union might be able to restrict access of the Western World to its essential oil supplies to a degree of severity and duration greater than any embargo by the oil producers. The U.S.S.R. might attempt to deny access to the oil of the Persian Gulf by direct attack on the facilities of the major oil-loading ports, which lie near Soviet territory. Simultaneous action to interdict on the high seas tanker movement of oil from other exporting nations could vastly exacerbate the oil supply situation for the United States and its allies.

The military, political, and economic risks of oil interruption are very real, and are steadily increasing as dependence on imported oil continues to grow. . . .

There is a third and greater energy threat to the Nation which has until recently received all too little popular attention, but which, as the President has said, should be the foremost consideration in development of national energy policy. This third threat is neither military nor political. It is, quite simply, resource depletion. A finite world supply of oil and gas will soon repeat the cycle so long evident in the United States. Growth in producible reserves will slow, halt and then go into decline as the remaining proven undiscovered resources grow smaller and the rate of discovery diminishes in the face of steadily increasing demand. The annual expansion in worldwide production which has been the foundation of 20th century world economic growth will level off and begin to decline.

Arguments that much greater hydrocarbon reserves remain to be discovered miss the point. A growing consumption rate assures that even if so they too will be quickly consumed. . . .

I believe there is comparatively little time for the United States to respond to the President's call and move toward reducing its dependence on imported oil. Failure to do so will impose increasing risks to our national security in the next few years and lead inexorably to the collapse of the world oil supply/demand balance in the next decade. Should that occur the effects on the security and economic viability of this Nation and the free world will be catastrophic.

II—PRIMARY FEDERAL TASKS IN A NATIONAL SECURITY RESPONSE

Almost by definition and by law and precedent,[4] any program designed to cope with a serious threat to national security serves to legitimate a leading Federal role. This role involves several complementary activities:

Primary executive responsibility

Previous experience has featured an Executive branch with primary responsibility for shaping and launching the Nation's response, particularly to:

Identify the nature of the threat and design the response.

Set quantitative targets for industrial goods, manpower, production of additional munitions, fuels and other resources needed to offset or at least forestall the threat.

Direct large scale procurement of the goods and services needed.

Determine and award priority access to critical materials to serve production targets aligned with national security goals, and restrict nonpriority uses when required.

Enlist and mobilize broad participation and support from State and local governments and the private sector as a whole.

Maintain the strength of the international collective security system.

The supporting congressional role

The role of Congress in national security emergencies has been primarily one of authorizing and supporting executive initiatives, particularly to:

Authorize, where needed, the exercise of existing contingency emergency powers.

Enact additional tax, loan guarantees and investment write offs designed to accelerate industrial plant conversion and to offset wartime risks.

Appropriate additional funds as required to pay for federally procured goods and services or other programs to meet the goals.

Supplement executive policy and program initiatives with congressional proposals developed independently if executive programs appear to be inadequate.

The wartime experiences, including the pre-war periods of preparation, from which these generalized precedents have been drawn are not directly comparable, even with each other: World War II involved much more widespread controls and more complete mobilization and conversion to war production of the national industrial base than did the Korean or the Vietnam wars.

In all instances, however, large-scale, direct Federal procurement of goods and services, in pursuit of production goals aligned with national security objectives, provided

Footnotes at end of article.

the primary Federal management tool by which such national production goals could be both established and achieved.

III—NATIONAL ENERGY PRINCIPLES IN THE CONTEXT OF A NATIONAL SECURITY RESPONSE

The President presented ten fundamental principles as the underlying rationale for the National Energy Plan and the framework within which present and future policies must be formulated.[5]

The 10 principles

In summary, the ten principles are:

(1) The energy problem can be effectively addressed only by a government that accepts responsibility for dealing with it comprehensively and by a public that understands its seriousness and is ready to make necessary sacrifices.

(2) Healthy economic growth must continue.

(3) National policies for the protection of the environment must be maintained.

(4) The United States must reduce its vulnerability to potentially devastating supply interruptions.

(5) The program must be fair. The United States must solve its energy problems in a manner that is equitable to all regions, sectors and income groups.

(6) The cornerstone of National Energy Policy is that the growth of energy demand must be restrained through conservation and improved energy efficiency.

(7) Energy prices should generally reflect the true replacement cost of energy.

(8) Both energy producers and consumers are entitled to reasonable certainty as to government policy.

(9) Resources in plentiful supply must be used more widely and the Nation must begin the process of moderating its use of those in short supply.

(10) The use of nonconventional sources of energy—such as solar, wind, biomass, geothermal—must be vigorously expanded.

There has been very little public disagreement with these principles. Although the Plan's goals and accompanying programs and policies have been assessed in depth in a wide range of official and unofficial studies,[6] the principles themselves have received relatively little analysis and attention.

It may be useful to review the underlying rationale reflected in the principles to determine whether they reflect the national security dimensions and urgency of the energy problem which the President and the Secretary of Defense have publicly described.

The first, sixth, and seventh of the principles laid down in the National Energy Plan arguably do not:

The Federal role

The National Energy Plan describes the Federal role as follows:

The first principle is that the energy problem can be effectively addressed only by a Government that accepts responsibility for dealing with it comprehensively, and by a public that understands its seriousness and is ready to make necessary sacrifices. The declining availability of oil and natural gas will affect virtually all energy prices and consumption patterns in the United States, for the various energy supplies are all part of an integrated energy market. Therefore, in this democratic society, a solution can be found only in comprehensive government policy-making informed by public comment and supported by public understanding and action.

The Federal Government can pass laws and encourage action. State and local governments can play active roles. But this society can function at its best only when citizens voluntarily work together toward a commonly accepted goal. Washington can and must lead, but the Nation's real energy policy will be made in every city, town and village in the country.

Comment

The fact that "declining availability of oil and natural gas will affect virtually all energy prices and patterns of consumption in the United States" may not be considered a self evident reason for "comprehensive Government policy making." A substantial congressional and public constituency has argued the opposite case, namely that to remove current Government price and other regulatory-controls on oil and natural gas would enable the economy as a whole to adjust to a new "integrated energy market" with consumption patterns much more efficiently geared to the realities of declining oil and natural gas supplies, as prices rise to meet near term replacement costs measured by or against the price of imported oil.

If, however, the rationale can be persuasively recast so as to reflect the threat to national and free world security, as the energy problem is elsewhere defined by the President, the assertion of a Federal policy making role would presumably be far less objectionable to the public.

The rationale could be rephrased along these lines:

The first principle is that the energy problem can be effectively addressed only by a Government that accepts responsibility for dealing with it comprehensively, and by a public that understands its seriousness, and is ready to make necessary sacrifices.

The declining availability of oil and the increasing dependence of the U.S. and the free world on oil imports whose availability in volume sufficient to meet world demand cannot be assured presents an unacceptable risk to national and free world security. Therefore, a solution should be found in comprehensive Executive and Congressional leadership, informed by public comment and supported by public and private understanding and action.

The role of conservation and production

Further possible incongruity between the problem and the principles as defined is revealed in the sixth principle of the plan which sets forth the rationale for a dominant conservation role:

The sixth principle, and the cornerstone of National Energy Policy, is that the growth of energy demand must be restrained through conservation and improved energy efficiency. Conservation and improvement in energy efficiency is the most practical course of action for the United States and for the nations of the world. Conservation is cheaper than production of new energy supplies, and is the most effective means for protection of the environment.

Comment

As stated, this principle—as well as the complementary ninth and tenth principles calling for switching from oil to use of plentiful fuels and renewable resources—fails adequately to suggest the massive production effort on the other side of the demand-supply equation, which must be accomplished within a very short period of time.[7] To do this will require large scale replacement of existing petroleum-fueled capital stock with new equipment using other fuels, or large scale construction of synthetic oil production capacity using domestic raw materials or some combination of these. This in turn would require very substantial production efforts which, under the national security emergency thesis, would need to be accelerated to virtually war-time production rates.

Production of insulation is already insufficient to meet current demand. The manufacture heat pumps and co-generation facilities requires expanded production capacity that will need fuels and energy. When the fuel switching goals are added, the volume of production of new and improved energy-using equipment contemplated is formidable: fluidized bed combustors, scrubbers and other facilities to prevent environmental damage, a wide variety of solar collecting and solar using hardware, recycling equipment, solid waste conversion plants, methane and methanol and ethane and ethanol production systems, electric cars, batteries and recharging units. Production of these kinds of industrial equipment must be in addition to the massive production effort implied in the Plan's fuel balance tables to increase domestic supplies of nuclear energy, from 1976 levels of 1.0 MMb/doe to 3.8 MMb/doe; coal, from 7.9 MMb/doe to 14.6 MMb/doe; and domestic oil, from 9.7 MMb/d to 10.6 MMb/d.

To repeat, reduction of oil import dependence will not take place as a result of belt tightening alone; a major production effort will be required to produce the products which use non-petroleum based fuels alternative to oil and use all fuels more efficiently.

The language used in the Plan's statement of this principle, comparing the costs of conservation to production of new energy supplies,[8] suggests a failure to identify the fact that the financial problems confronted by energy users, on whose individual decisions the Plan heavily relies, are very different from those of oil and natural gas producers.

Oil and natural gas producers have traditionally financed new investment out of current cash flows, rather than through borrowing. Few energy end-users, small or large, residential or industrial, enjoy such luxury. Most must borrow at commercial rates.

Furthermore, oil and gas producers have a guaranteed market for their products for a long time to come, and can reasonably expect that profits will not diminish in the near future. Industrial energy users called upon to switch from oil and gas to alternative fuels when there may still be ten or more years of economical and productive use in existing boiler or generating plant risk losing competitive markets for their products if the full cost of the added capital plant replacement is passed on to the consumer, or taking a substantial cut in profits if it is not. Even greater risks face the individual householder whose available cash and credit may already be stretched to the limit.

The continued sluggishness in the U.S. and free world economies discourages bold private investments now for a future post-petroleum age.

The sixth principle could be enlarged to reflect the reality that a massive industrial and energy production effort will be needed even to achieve the Plan's own quantitative goals[9] and that Federal procurement of industrial goods enabling large scale conversion to fuels other than oil may be needed to meet the goals within the time frame of 1985. That principle might be restated:

The cornerstone of National Energy Policy is that the nation's dependence on imported oil must be reduced through accelerated programs to achieve conservation and improved efficiencies of energy use concurrent with a major energy and industrial production effort to permit the necessary switching to fuels other than conventional oil and natural gas, without damage to the environment. Federal procurement contracts should be used to accelerate and expand the capital plant production and conversion efforts needed in the private sector to meet the Plan's quantitative goals.

Energy pricing concepts

Similarly, the seventh principle, which sets the basic framework for the Plan's energy pricing policies, appears to suggest that the size and pace of national production and

Footnotes at end of article.

conversion efforts designed to deal with threats to national security should be left primarily to individual and collective market choice:

The seventh principle underlying the National Energy Plan is that energy prices should generally reflect the true replacement cost of energy. Energy prices should move toward a level that reflects the true value of energy in order for market signals to work in harmony with conservation policy. When the cost of expensive foreign oil is averaged with cheaper domestic oil, consumers overuse oil. Government policy that promotes overuse by artificially holding down prices misleads consumers into believing that they can continue to obtain additional quantities of oil at less than its replacement cost.

Artificially low prices for particular energy sources also distort interfuel competition. The artificially low price of natural gas, for example, has encouraged its use by industry and electric utilities, which could use coal, and has made gas unavailable for new households, which could make better use of its premium qualities.

Neither Government policy nor market incentives can create additional oil or gas in the ground. But from a long-term perspective, prices are an important influence on production and use. As long as energy consumers are enticed into believing that they can continue to pay yesterday's prices for tomorrow's energy, they will continue to use more energy than the nation can really afford, U.S. resources will be rapidly exhausted, and continued overuse will make the inevitable transition more sudden and difficult.

Although producers need incentives for exploration and new development, pricing policies should not give them windfall profits unrelated to their economic contribution. If producers were to receive tomorrow's prices for yesterday's discoveries, there would be an inequitable transfer of income from the American people to the oil and gas producers, and producers' profits would be excessive.

Comment

This pricing approach does not appear consistent with the President's placement of the national energy problem in the context of grave impending danger to U.S. and free world security, and with the fact that the presidentially projected period of time to prepare for and surmount, or at least forestall, the threat is limited.

It is generally accepted that in times of national emergency or threat to security, government intervention in the market to preempt and redirect resources to meet the emergency or danger is justified.

Under these circumstances, existing pricing concepts are likely to be superseded by other pricing arrangements adapted to the particular emergency. In some instances, this may involve strict price controls over either the whole economy or, on a more selective basis, over materials and products in short supply, in order to control inflation. Emergencies are also likely to involve expanded government procurement of necessary equipment, materials or services in which the negotiated price may, for example, include a premium to offset financial risk or be calculated on a cost-plus-fixed-fee basis.

Additional subsidies or other incentives have also been made available for emergency situations, such as war risk insurance, extraordinary grants or loans for construction of new or expanded industrial plants including, where necessary, construction of plants to produce capital equipment in support of an expanded industrial base.

Footnotes at end of article.

Nor has government intervention designed specifically to distort market pricing in the public interest been limited to emergency conditions. For fifty years, the U.S. followed a de facto national energy policy that deliberately chose to subsidize private producers to produce oil and natural gas, with the objective of providing expanding energy supplies at the lowest possible cost consistent with reliability of supply. The policy served the United States' domestic social goals for many years. It enhanced personal mobility and economic choice to an extent that would otherwise have been unattainable in an area as vast as this continent and, through the second hand car market, enabled a qualitative "redistribution of wealth" which has been envied even in more centrally planned economies.

The Federal Government may decide that subsidies on an equivalent or greater scale may be required if the use of unconventional sources of energy is, as intended by the Plan, to be "vigorously expanded." [10]

If revised and expanded to include a pricing option which discriminates in favor of renewable and recycled fuels so as to rapidly expand their availability and use, the rationale for future energy and investment pricing principles might be phrased along these lines:

The pricing and investment principles underlying the National Energy Plan include the concept that the prices for oil and natural gas, as for their more abundant but non-renewable substitutes of coal and uranium, should generally reflect the replacement cost of imported oil.

The subsidies provided for investment in equipment to manufacture or use renewable and recycled fuels, however, should generally reflect within five years the full replacement cost of capital needed for these tasks. This should apply to individual users who made such investments and to industrial users and producers of such equipment alike.

Energy users of renewable and other fuels alternative to oil ought to be given incentives equivalent in scope and value to those which were given to producers to explore and develop oil.

With or without generous tax and other business subsidies reflecting privately assumed risks of war-time proportions, large scale Federal procurement may be needed to underwrite an expanded private industrial production capability and to guarantee a continuing market for the new fuel conservation and fuel conversion equipment and facilities needed to make the transition to a less oil dependent age.

During World War II and the Korean war, substantial Federal intervention and redirection of private industrial production to meet national security production goals was accepted in large measure because it was conceived of as essentially temporary, "for the duration". There was general agreement on the wartime goals—defense of democracy, defeat of its foes—but there was also general agreement that, with victory, national production would revert to private hands, its output again determined by civilian consumption choices and needs.

Clearly, a direct analogy cannot be drawn with the present situation. "Victory" will not be "won" by 1985: achievement of the Plan's 1985 energy goals would still leave the U.S depending on annual imports of about 6 million barrels of oil a day even if these goals could be met—and most analysts conclude that they cannot. (See Annex I.) However, the accelerated Federal procurement program explored in this paper as an option would not be needed after 1985. Under the assumptions stated in this paper, accelerated replacement of federally-owned oil-using capital stock would have been largely achieved by 1985, and thus Federal procurement contracts could then revert to normal annual replacement levels.

The program could be designed such that by then demand in the private sector could and would be expected to drive the process of expanding the volume and scope of the Nation's conversion to the use of fuels other than oil.

IV—A NATIONAL SECURITY ORIENTATION FOR THE NATIONAL ENERGY PLAN

What specific executive and legislative measures could be undertaken more rapidly to convert the Nation's stock of capital plant and equipment by 1985 and to mobilize its industrial productive capacity to meet the national security dangers addressed by the National Energy Plan?

Executive measures

The President and his advisors have already undertaken the first two of the tasks historically assumed by the Executive in situations presenting foreseeable dangers to national security, and many of the rest can be undertaken within the framework of the annual Federal budgets and under existing powers.

Define the nature of the threat to security: The President has identified the nature of the threat and designed a response, in the form of the National Energy Plan, and the proposed National Energy Act.

Set quantitative targets: The President has set quantitative targets, to be accomplished over a period of about eight years, intended to meet three "overriding" energy objectives:

As an immediate objective that will become even more important in the future, to reduce dependence on foreign oil and vulnerability to supply interruptions;

In the medium term, to keep US. [oil] imports sufficiently low to weather the period when world oil production approaches its capacity limitations; and

In the long term, to have renewable and essentially inexhaustible sources of energy for sustained economic growth.[11]

Among the specific quantitative goals identified in the Plan are the following intended to be achieved by 1985: [12]

Establish a Strategic Petroleum Reserve of one billion barrels;

Reduce gasoline consumption by 10 percent below the 1976 level (6.3 million b/d as compared with the 1976 consumption rate of 7 million b/d);

Increase coal production from 1976 output of about 600 million tons to more than one billion tons annually, anticipating substitution of coal for oil or natural gas equivalent to 2.2 million b/doe for industrial uses and 1.1 million b/doe for utilities; [13]

Insulate 90 percent of the approximately 74 million existing residential units and all new buildings;

Install solar energy in more than two and a half million homes;

Limit U.S. oil imports to 5.8 million b/d by 1985.

Place orders for large scale Federal procurement of goods and services: Except for purchases for the Strategic Petroleum Reserves, Federal procurement has not yet been employed on any significant scale to underwrite the capital plant conversion and production efforts required to achieve the quantitative goals of the Plan.

The opportunities and authorities for an accelerated exercise of this power exist, however, and could, for example, be used in the following ways:

Synthetic Fuels: Long-term Federal contracts for procurement of oil from shale or other synthetic fuels for Department of Defense uses and stockpiling in the Strategic Petroleum Reserves could be negotiated on a cost basis. Pilot tests using synthetic fuels

from coal, shale oil and tar sands have already been conducted under DOD-ERDA financing. DOD consumption of petroleum was 173 million barrels in 1976, about 450,000 barrels per day.

"Gasahol": Federal multiyear contracts for purchase of various forms of nonpetroleum substitutes for gasoline and a Federal commitment to use such substitutes for a least 10 percent of gasoline consumed in federally owned vehicles could be used to guarantee a private sector industrial production capability for these fuels. This would amount to annual purchases of 1.6 million gallons of gasoline substitutes, at 1976 consumption levels.

Electric or Other Non-Gasoline Using Vehicles: As of mid-1976, the Federal Government owned 425,226 motor vehicles, operated at an annual cost of $664.5 million (including depreciation) and using the equivalent of 16 million barrels of oil a year.[14] Excluding buses and ambulances, the Federal Government acquired 19,155 vehicles and disposed of 14,014 in 1976. P.L. 94–163, the Electric and Hybrid Vehicle Research Act, mandates Federal purchase or lease of 2,500 electric or hybrid vehicles by mid-1978 and an additional 5,000 by April, 1981, subject to certain conditions. It also calls for introduction of electric and hybrid vehicles into Federal fleets, including the U.S. Postal Service, GSA, DOD and other agencies "as soon as possible." Incremental costs, as required, including differential operating costs may be underwritten by the ERDA budget. Accelerated and additional purchases would be possible through the annual Federal budget authorization and appropriation process.

Photovoltaic electric power generating panels, also federally procured, could be installed at Federal facilities or at gasoline stations serving Federal fleets, as supplementary battery recharging services for electric vehicles.

Solar Heating and Cooling and Photovoltaic Energy Systems: Programs included in the National Energy Act as tentatively agreed to by both House and Senate conferees call for installation of solar heating and cooling in about 3,000 Federal buildings in 3 years, at a cost of $100 million, and installation of up to 30 megawatts of photovoltaic energy systems, at a cost of $98 million over 3 years. Both Federal purchase programs were intended to accelerate the commercialization of solar energy and, in the case of photovoltaics, to "temporarily create through government procurement a large enough market for solar cells so that mass production techniques will be instituted in their manufacture thus driving down the cost of the cells and consequently simulating a higher private demand for the solar cells." [15]

Since the Federal Government owns over 400,000 buildings, additional Federal procurement could be used to purchase and install such equipment in many thousands more buildings to expand more rapidly the industrial production capacity of the private sector and to standardize prices and performance criteria for these products. If final action on the National Energy Act is delayed, Federal procurement can be authorized and funded through the annual Federal departmental authorization and appropriations process.

Other Federal Procurement Orders: Federal procurement contracts could also be employed to enlarge and underwrite the market for waste recycling, cogeneration systems, wind energy conversion systems, environmental protection equipment, fluidized bed combustion devices and other equipment needed to convert Federal industrial and electric power generating plants from the use of oil and gas to coal, installing them in all facilities now operated by the Federal Government, including the Department of Defense, ERDA laboratories and the major Federal power administrations—Bonneville, Alaska, Southwestern and Southeastern.

In a report, "Estimate of National Hydroelectric Power Potential at Existing Dams", published July 20, 1977, the U.S. Army Corps of Engineers concluded that the development of all hydropower potential at existing dams could generate 160 billion Kwh of electricity and save 727,000 barrels of oil per day. Only 5,500 of the 49,500 dams in the U.S. are owned and operated by the Federal Government. Under a national security rationale, the Federal Government could elect the option of assuming the full capital cost of developing the maximum potential in all other dams as well, whether publicly or privately owned, in order to accelerate the availability of this additional supply.

Determine priority access to critical materials and restrict uses when required by national security: Under the Defense Materials System and the Defense Priorities System, the Department of Commerce and the General Services Administration have authority, delegated by the President, to allocate scarce material for production of items deemed essential for national security. This is done under procedures first adopted in World War II, subsequently authorized under the Defense Production Act of 1950, as amended, recently extended through September 30, 1979 by P.L. 95–37.

These authorities have been invoked for production of equipment needed for the Alaska Pipeline and could be invoked, if needed, for expanded production of capital goods and equipment using renewable and other fuels alternative to oil, such as those suggested in the previous section.

The President also has authority under Section 232 of the Trade Expansion Act of 1962, as amended, to limit imports of any commodity upon a finding that such limitation is required to prevent impairment of national security.

In a recent decision involving imposition of oil import fees, the Supreme Court ruled that the President's authority to limit imports for national security reasons included the authority to do so by means of license fees and was not limited to the use of quantitative methods such as quotas.[16]

The President's power to redirect energy uses by quantitative limitation is augmented by powers enacted in EPCA (P.L. 94–163, Section 457) which authorize him to impose direct controls on refinery operations to adjust the proportions of residual fuel oil, gasoline or any other refined petroleum product if he determines such adjustment is necessary to provide for public health, safety and welfare and the national defense.

Enlist and mobilize broad public and private sector participation and support: During World War II and the Korean War a significant component of the high level of popular support for the national defense effort derived from the enlistment of private sector participation in the production planning process, as well as in the production effort.

Although production goals and priorities were set by the Executive Branch, the pace of production was determined by private industry. The planning procedures and accelerated production pace depended on close consultation and continuing detailed exchange of information on materials requirements and progress of the industrial production efforts at all levels and stages. This close mutual involvement in the planning process helped to produce a sense of national partnership that tended to transcend contractual relationships.

Large scale Federal procurement in support of quantitative energy goals could also help to mobilize popular participation and support for a national energy plan cast in national security terms. Negotiations on the terms and scheduling of substantial contracts for the production of synthetic fuels and equipment using non-petroleum based fuels provide both the ends and the means for direct enlistment of the private sector in broader participation in planning for and achieving these national energy goals.

A national industrial production program geared to the achievement of accepted energy goals provides a valid base for national or local campaigns to sell energy production or fuel conversion bonds and stamps to mobilize both extra capital and popular support.

The public market represented by Federal procurement could be substantially broadened by Presidential enlistment of State governors and county and municipal executives in a similar expanded procurement effort to convert State and local capital plant and equipment in publicly-owned and financed facilities and services to renewable and other fuels other than oil.

The overall size and mix of a public market for synthetic fuels, vehicles fueled by alternatives to oil, solar equipment, waste conversion and recycling plants, efficient coal using combustors and environment protection devices, district heating and cogenerating facilities depends on projected demand. Contracts to meet this demand will require consultation and mutual cooperation between the Federal Government and State and local governments, between the public purchaser and the private producers.

Large scale Federal procurement orders can provide a clear and unambiguous evidence of Federal commitment to the declared national security energy goals. The planning, contract negotiation and production processes themselves could be a means, once more, by which a nation and its citizens can be convinced of the seriousness of the threat to national security created by our present dependence on imported oil and, having been convinced, mobilized in its defense.

Maintain the strength of the international collective security system: A threat to national security is by definition a danger that, if not resolved or forestalled, threatens either war or sufficiently massive political or economic disruption that our antagonists need not resort to war to achieve their aims.

It is the latter danger which the President foresees as facing the U.S. and its industrial allies and seeks to forestall sufficiently to "weather the period when world oil production approaches its capacity limitation; and in the long term to have renewable and essentially inexhaustible sources of energy for sustained economic growth." [17]

The United States presently depends on oil for 47 percent of its total energy needs and is now importing nearly half of all oil consumed in this country. Other industrial democracies are still more vulnerable to supply interruptions: Western Europe depends on oil for 63 percent of its total domestic energy consumption, and imports 97 percent of that oil. Japan is 80 percent dependent on oil and imports all of it.

The volume of physical capital stock of oil-fueled vehicles, heating and cooling systems, industrial boilers and generating plants which these proportions represent is gigantic. Much of this stock—for Europe and Japan as well as the U.S.—still has ten years or more of usefulness. Much of this capital stock must be replaced much earlier by equipment and facilities using fuels other than oil if the security goal of reduced dependence on imported oil is to be achieved by the mid-eighties.

Footnotes at end of article.

The collective security arrangements which have served to prevent the outbreak of global war have been successful because they were backed by and negotiated from a position of military, industrial and economic strength. A critical element of that strength was the prompt supply of military and industrial goods and equipment transferred in large volume, by aid and trade, to the members of the North Atlantic Alliance by the United States, acting as the "arsenal for democracy."

As the President and the Secretary of Defense pointed out in their testimony, our continued and increasing dependence on imported oil is weakening that industrial and economic strength and is making our military defense increasingly vulnerable as well, placing the whole post-war structure of international security at risk.

Achievement of the U.S. energy goals stated by President Carter would undoubtedly play a major role in reducing U.S. vulnerability to interruptions in oil import supply but these goals may still leave U.S. allies exposed to unacceptable risks. U.S. security interests may require further expansion of U.S. industrial production capacity and delivery of an additional substantial volume of equipment using non-petroleum based fuels to enable substantial replacement of our allies' oil-using capital stock earlier than would otherwise occur.

Federal procurement and delivery of such items can be done within the framework of existing collective security agreements and assistance programs. There is also historical precedent for assistance to NATO allies to increase their industrial capacity for equipment essential to collective security and free world strength. During the 1950's, U.S. assistance was provided for a Joint Military Production Program financing additional production capacity based in Europe for designated equipment. A similar joint program could be undertaken to accelerate production and use of equipment and facilities using fuels alternatives to oil.

Legislative measures

Historically, legislative measures enacted during periods of national security or wartime emergencies have served primarily to support presidential initiatives and decisions with such additional tax and other authorizations and appropriations as were considered necessary. Any or all of the executive measures outlined in the preceding section could be launched by the President under authorities enacted in laws still in force. Legislative measures could be limited to no more than those required to fulfill such procedures as may be needed to authorize the exercise of some emergency powers,[18] to enact additional tax and other fiscal measures to raise revenues, and to appropriate funds as required to pay for federally procured goods and services or other programs administered by Executive Departments to meet national energy goals.

However, Congress has the major option of taking much stronger initiatives independently or supplementing Executive initiatives in dealing with situations involving risk to national security.

The energy record of the 93rd and 94th Congress and during the first session of the 95th provide concrete evidence that the legislative measures Congress may choose to enact by no means constitute passive endorsement of the energy initiatives of three Presidents who have urged early approval of their proposals.

Congress retains and may wish to exercise the option to assume a much stronger leading role in the design and rationale of new national policies intended to reduce U.S. dependence on imported oil, and independently to promote Federal procurement and other oil import saving programs which could advance this national security goal.

[18] For example, although the President is ordered under EPCA to design and issue regulations for a contingency plan for gasoline rationing, additional formal congressional concurrence is needed before the President may order such a plan to be put into effect (P.L. 94–163, Section 201(c)).

Federal procurement opportunities for increasing private sector industrial production capacity for selected oil-saving products

OIL SAVING PRODUCT	POTENTIAL FEDERAL MARKET	POTENTIAL OIL SAVINGS
Synthetic oil —Oil shale —From coal	Annual Department of Defense use=c. 180 million barrels of petroleum (est. FY 1978)	Up to 500,000 bo/day or 180 million barrels of oil (bo) per year.
Electric or other nongasoline using vehicles	Federal fleet (worldwide in 1976) = 425,000 vehicles. Annual new vehicle purchases=c. 20,000 vehicles.	Depends on degree of replacement of existing fleet: e.g. at 50% replacement=8 million bo per year or c. 22,000 bo/day.
"Gasahol" —Ethanol —Methanol	Annual gasoline use by Federal fleet=16 million barrels of oil equivalent per year.	Depends on degree of substitution for fuel in remaining gasoline-using cars: e.g. at 20%=1.6 million bo per year.
Photovoltaic and wind energy conversion systems Solar hot water and heating	400,000 federally owned buildings. In 1977, Federal buildings and facilities used: 36.6 million MGW hours of electricity and 22 million barrels of fuel oil.	Depends on degree of substitution: e.g. photovoltaic devices and solar hot water heaters could be installed in all 400,000 federally owned buildings.
Products which enable oil savings in industrial plants and utilities which burn oil= —Fluidized bed combustors —Environmental protection equipment —Cogeneration, district heating equipment —Waste-to-fuel equipment	[Not available at time of writing. DOD has about 55 large boiler plants in United States which could be converted to coal.]	Not available at time of writing.
Incremental hydroelectric power: —Turbines and generators	Federal Government owns only 5,500 of the 49,500 dams in the United States. If Federal procurement were employed to develop all the hydro potential of these 49,500 dams, additional power generated is estimated at about 60 billion Kwh of electricity=727,000 bo/day.	

ANNEX L—NATIONAL ENERGY PLAN: OVERVIEW OF THE PRESIDENT'S PROPOSALS—ISSUE BRIEF NO. 1B77060

(By Frances A. Gulick, Environment and Natural Resources Policy Division)

[Excerpts]

PRELIMINARY ASSESSMENTS OF THE IMPACT OF THE PLAN ON THE OIL IMPORT SAVINGS GOAL

Four congressional agencies—the Congressional Budget Office (CBO), the Congressional Research Service (CRS), the General Accounting Office (GAO), and the Office of Technology Assessment (OTA)—have completed preliminary assessments of the President's proposed National Energy Plan, in response to requests from Committees and Members engaged in marking up the Administration's omnibus bills, H.R. 6831 and S. 1469. All of these are agreed, with minor differences, that the direct and indirect price and other economic impacts of the Plan itself would not produce results very different from what might take place without the Plan, with oil product price increases of between 7 to 12 cents a gallon believed likely (not counting the impact of the Administration's proposed gasoline tax, a measure dropped in the House).

All of these assessments, however, also conclude that the Plan, even if enacted as proposed, could not produce the quantitative oil savings effects targeted in the Plan's goals because of shortfalls which would occur in virtually all other quantitative goals.

Congressional Budget Office

The CBO report, issued May 31, 1977, concluded that anticipated oil savings will reach only 3.6 million barrels a day, rather than the Administration's estimated 4.5 mb/d. About 0.6 of the 0.9 mb/d discrepancy, according to CBO calculations, results from lower estimates of coal conversion potential. The remaining 0.3 mb/d discrepancy is due to differing estimates of impact of home insulation and solar equipment tax credits.

The Congressional Research Service

Although no specific quantitative shortfall is provided, the initial CRS assessment, issued June 1, 1977, concluded that the Plan's estimated import savings are "optimistic and not likely to be achieved," although impacts probably will be higher than 7 mb/d, CRS analysists do not expect imports to exceed a ceiling of 12 mb/d, even without the Plan, because of other constraints.

A subsequent CRS report on "The Carter Coal Conversion Program," issued June 10, 1977, concluded that the 5.1 percent per year growth rate of energy input to industry forecast by the Plan from 1977 to 1985 is far too high. Based on historical performance of the U.S. economy since 1960, the rate would be closer to 3.1 percent, even subtracting recession-caused decreases, and would be further decreased by the effects of the Plan, as the Administration has since conceded Furthermore, costs assumed in the Administration's calculations—estimated at $6.4 million for a 25 megawatt boiler plus $1.9 million for a scrubber—differ markedly from a number of other industry estimates, such as those presented in testimony to the Texas Industrial Commission in January 1977 (about $10 million without scrubber) and estimates made by the American Boiler Manufacturers Association (that scrubbing investment for a 25 megawatt boiler would be about $5 million rather than $1.9 million). The CRS report concludes:

"In sum, the Plan claims an increased coal use in industry of about 200 million tons in 1985. The concerns raised in this paper call into question some 140 million of these tons, 120 million tons of which result from an improbably high estimate of rate of growth of energy demand and the rest of the result of unreasonably low Plan estimates of the cost of coal-burning equipment."

General Accounting Office

In a preliminary review of the Plan released on June 8, 1977, the GAO strongly criticized the Administration for proposing a Plan which could not meet its own goals, and concluded that further shortfalls would occur:

"We generally agree with these goals and believe that they can form the basis for developing a national energy policy between now and 1985. On the basis of our prior work, we believe that there is a serious energy problem and that the goals proposed by the National Energy Plan provide a useful way to address this problem. One fact that has not been widely recognized, however, is that the Administration did not design its Energy Plan to achieve the stated goals without unspecified voluntary actions or further mandatory actions not specifically identified except by example. Based on the Administration's own estimates, with a few exceptions, the plan will fall short of the goals—even if the Plan is fully implemented."

The GAO cited the following goals and administration estimates as evidence for this internal Plan discrepancy:

Administration's proposed energy goals for 1985

Reduce total energy growth to below 2 percent a year.

Reduce oil imports below 6 million barrels/day.

Insulate 90 percent of all buildings.

Use solar energy in 2.5 million homes.

Administration's estimate of what the plan can accomplish through 1985

Reduction to 2.2 percent.

Reduction to 7 million barrels/day.

Insulate approximately 60 percent.

Use solar energy in 1.3 million homes.

The report concluded:

"We believe that it is somewhat incongruous to ask the Congress to establish a set of National Energy Goals, and then propose a National Energy Plan that is not expected to achieve them. . . .

"Since under the best of circumstances, plans designed to meet goals often fall short, we believe that the plan should be redesigned to provide a reasonable opportunity of achieving the stated goals."

In its final version, issued July 25, 1977, the GAO concluded that the Administration's estimates for domestic energy supplies were overstated by a total of 3.9 mb/doe (of which coal shortfalls account for 2.3 mb/doe; natural gas, 1.0 mb/doe; and nuclear power, 0.6 mb/doe.) Consequently, the GAO believes oil imports would more likely be about 10.3 mb/d in 1985.

In a subsequent letter report issued October 14, the GAO released additional analysis of anticipated domestic oil production, concluding that crude oil production in the U.S. is more likely to be in the range of 8 to 9 mb/doe, rather than 10.6 mb/doe as the Administration has estimated: "This means that oil imports are more likely to be in the range 12–13 mb/d instead of the 6 mb/d which is the Administration's goal."

Office of Technology Assessment

OTA (in prepublication draft analysis released June 24, 1977, and a final report issued August 1977) also has concluded that although the Plan is a major move in the right direction, the levels of supply projected by the Plan represent the upper limits of capacity and supplies of all fuels are likely to fall below the Plan's goals.

Two assessments of the degree of shortfall are contained in the report, one by a Task Force on Energy Supply, which attributes the shortage to a wide variety of probable logistical and regulatory delays, another by the OTA staff using 1950–1976 historical trends in energy supply and demand. The Task Force concluded that shortfalls of between 5.0 to 6.0 mb/doe would occur with shortage in oil and natural gas totalling between 2.0 and 3.0 mb/doe, as much as 2.4 mb/doe in coal, and 0.6 mb/doe in nuclear energy. These would be offset, however, by reduced coal demand about 2.4 mb/doe lower than the Administration estimates, leaving a net shortfall of 3.6 mb/doe. The OTA staff concluded that the gap between U.S. energy demand and domestic supply would widen to 16.5 mb/doe if the historical trends in demand (averaging 3% per year) do not change and if aggregate domestic energy production does not increase faster than historic trends indicate it will. The OTA staff report stated:

"The 'historic trends' analysis suggests that international shortages and price rationing are inevitable if United States oil import demands are not reduced. The basic question appears not to be whether the economy can continue to grow under more stringent conservation policies but whether conservation measures can take hold fast enough to head off the crippling impact of abrupt oil shortages in 1985."

Other assessments

Dr. Hans Landsberg, economist and senior fellow at Resources for the Future, in a mid-May review of the Plan's fuel balances (Plan, p. 96) also pointed out that these projections revealed projected results significantly at variance with the Plan's quantitative goals: Energy demand, according to the figures provided in the fuel balance tables, would grow at an average annual rate of 2.5 percent not 2 percent. He considered coal conversion and nuclear power additions to be overestimated due to foreseeable logistical difficulties, by as much as 3 mb/doe and concluded that the nation will need, in the absence of drastic mandatory conservation and conversion measures, "3.5 to 4 million barrels per day of oil above and beyond the target, or total 1985 oil import volume of 10.5 to 11 million barrels—if we are lucky, that is."

Another study, representing the "independent and individual evaluations" of some of the members of the faculty and staff of the University of Texas at Austin, issued May 11, 1977, places the oil import gap at 4.2 mb/d by 1985, primarily because production of oil, natural gas, and nuclear energy will be less than the Plan's balance sheet projections because of constraints (mainly price, according to these analysts) built into the Plan. Oil imports are likely to be as high as 11.8 mb/d by 1985 unless more serious production efforts are undertaken.

The International Economic Policy Association (Washington, D.C.) also issued a preliminary appraisal in June 1977, with special emphasis on the international economic implications of "America's Oil and Energy Goals." Pointing out even if the Plan does achieve the goal (of 7 mb/d oil imports in 1985), the cost to the United States in that year would still be $37.1 billion (at a reference price of $14.52 per barrel, and in 1976 dollars). If imports do not drop to that level and reach 11.4 mb/d, the cost to the United States would rise to $60.9 billion for the year 1985 (also expressed in 1976 dollars and a $14.52 reference price).

Administration's IEA statement

Energy Secretary James Schlesinger openly conceded shortfalls in the Plan in his statement to the governing board of the 19-member International Energy Agency (IEA) in Paris on Oct. 5, 1977:

"What we miss this year we are going back for next year. Indeed, we chose in January and the following months to gauge just about what we thought we could get through, recognizing that what we were proposing was a moderate program, [although] extraordinarily hold in relation to prior accomplishments in Washington, D.C. The goals were quite modest in terms of the gravity of the problem."

At the same meeting, the members of the IEA agreed to limit their combined oil im-

ports to 26 mb/d by 1985. This will require all members other than the United States to hold imports at no more than current levels, and the United States to achieve a reduction in oil imports by 1985 to 5.8 mb/d, a renewed U.S. commitment which Secretary Schlesinger acknowledged other IEA members view with "understandable" skepticism.

REMARKS OF SENATOR CLARK ON GRAIN SHIPMENT TO VIETNAM

● Mr. LEAHY. Mr. President, I call the attention of my colleagues to a statement by Senator CLARK a few days ago on the occasion of the dedication of a shipload of grain bound for use by hungry people in Vietnam. The grain was the result of private donations by people from all across the Nation, who also contributed funds to pay for the shipping. Senator CLARK felt that this act of American generosity is symbolic of the willingness of Americans to reach to help others in need, no matter who or where they are.

Mr. President, I submit Senator CLARK's remarks for the RECORD.

The remarks follow:

KEYNOTE ADDRESS BY SENATOR DICK CLARK

Thank you very much, I am very delighted to be included here today to join with you in dedicating this cargo of food for hungry people. I very much appreciate your invitation to join with you in the celebration of the purpose of this event—and I want to tell you something of what it means to me—and to many other Americans.

We celebrate first the event itself—grain for hungry people! It will supplement meals in schools and hospitals for some quarter million people for a year, a tremendous help! It will provide help that is badly needed by a people battered first by war, then by a winter of extreme cold, a summer of drought, and then, last year, two devastating typhoons, one in July and one in September. This grain will replace but a tiny fraction of the losses from those storms, but it will help many of those who need help most and at a time when the need is greatest.

Beyond that, we are celebrating the meaning of this event—the willingness of the American people to be generous!

I can think of no human activity of higher purpose than an effort by the people of one nation to reach out half way around the world to help the hungry people of another nation who differ in culture, in ideology, and some of whom, in the recent past, we fought against. To send food to hungry people we were previously at war with is not new for Americans. We did the same after World War I and World War II. I think our capacity of Americans for helping others is a continuing tribute to our people.

The wounds of war are always difficult to heal. In the very act of making war a nation calls forth almost incredible human dedication. Minds and emotions are caught in these conflicts, and that extends far beyond the battlefield.

Because the Vietnam war was, in one sense, an ideological war its bitterness did not end with the beginning of peace. Perhaps it is always that way with ideological wars, and perhaps that is something of a measure of the futility of such wars. For all these reasons, and others, the wounds of this war are deep. Only time can heal them—time and spiritual leadership from those dedicated to peace and reconstruction. This most divisive war in our history must be put behind us—not forgotten—but reconciled.

So it is that this grain becomes a symbol, important even beyond the value of the food dedicated here today. It is a symbol that says to the world that the American people understand the needs of those who are hungry, and who need help. It is a symbol that the Vietnam war is over—that the American people have put that war behind them and that we are willing to work together with that nation, and all nations of the world for peace and the peaceful pursuits of commerce and development.

One cannot help but be impressed by the basic generosity of Americans. American farmers and American citizens made this effort—not our Government. Against that background, the American response to the need in Vietnam is all the more dramatic. Farmers from Mid-western states contributed wheat. People from the entire U.S. contributed funds to buy more wheat to fill the ship. It is to them we pay our respects and celebrate this event. Church denominations contributed large amounts of money, and large numbers of other groups joined in as well—some 50 national organizations are endorsing this project. $700,000 had to be raised for ocean freight.

It was. Over $7 million have been raised by voluntary agencies for Vietnam since the war's end. The funds have come from individuals all over the country, press reports from now indicate that most Americans support the U.S. Government's making food and medicine available to Vietnam. And, they report that a very large majority of farmers favor making surplus grain available for use by hungry people in Vietnam.

So, we are also celebrating the symbolic importance of this cargo and the help it can give in healing the wounds of war—wounds both here and abroad, but, it offers still another symbol. It is a symbol of our willingness to get on with the business of life. Food is life. I want to talk about that for just a moment.

Four years ago, the eyes of the global community were focused on the World Food Conference being held in Rome. I was a delegate to that conference. It was a time of crisis. A long drought gripped Africa, the Indian subcontinent, many parts of Asia, and part of the Caribbean. Television was bringing the human dimensions of that disaster into our living rooms—and into the lives of millions of Americans. We were stunned and shocked by the magnitude of human suffering we saw. We were puzzled by the fact that on this planet where we enjoy such abundance, and which has the capacity to feed all its people, that millions should die from hunger and malnutrition.

The World Food Conference was held to organize and mobilize a global attack on hunger and poverty. It was recognized by all of us in Rome that the resources to overcome hunger were within our capacity to achieve.

Since the Rome Conference, we have had two years of good weather pretty generally around the world. Cereal stocks have been increasing steadily. Indeed, American farmers face a huge surplus of wheat and other food grains, and a surplus of feed grains as well. We are once again focusing our farm policy on the "surplus problem" in an attempt to protect large numbers of farmers from economic disaster.

The sobering fact is that except for the improvement in world food production caused by good weather—unusually good weather—little real progress has taken place toward achieving the objectives of the World Food Conference. There has been no real shift in priorities toward food and nutrition around the world—the shift which must be developed if the world food system is to direct food to those most in need of it, and if developing countries are to produce more of the food they need. The poor cannot afford to buy food—no matter how much food there is in surplus. Our stake in international development is vital.

The conditions of global social and economic injustice—poverty, disease, hunger, and illiteracy—are indeed a real threat to our own security. They are also a threat to our own morality.

Our people just cannot escape the impact of the following human statistics: of 4 billion people in the world:

Some 700 million adults are unable to read or write. That is 18 percent of the world's people—almost 1 in 5.

Of 1.5 billion people—over one-third are without effective health care.

More than 500 million people, 1 out of every 4, are suffering from severe hunger and malnutrition.

Approximately 800 million—20 percent—are so poor that they cannot expect any improvement in their conditions for the rest of the decade.

These are our people—human beings! And yet this is a world which, in 1977, spent nearly $300 billion on arms, while allocating

only $17 billion to solve pressing development needs.

This set of circumstances breeds instability, conflict and chaos. Furthermore, they are morally indefensible.

As the United States approaches its third century, economic relationships among the Western industrialized nations remain a vitally important element of our foreign policy. The growing economic linkages between the U.S. and the non-market economies add a second dimension to our global policy concerns, but our greatest challenge—perhaps our most difficult international issue of future decades—is our approach to the need for new international economic policies for the developing world. These are the challenges flowing from the so-called "North-South Dialogue". They are not well understood, but they are of growing importance to us. To us as a nation—and as human beings.

This dialogue poses an economic and social imperative for the developing world. But beyond that, I think there are ways we can and should support development and deal with world hunger.

We know more about the transfer of technology, and more about which technologies are appropriate to transfer. High yielding varieties, for example, must be specifically suited to each local area. Norman Borlaug has worked for years in Mexico on this problem, and progress has been made around the world.

Not only is the potential for increasing production around the world very great, but it is within reach of current technology. And, we appreciate the importance of proposing assistance on a scale local farmers can understand and use. It must be our goal to help the poorest farmers increase their yield—to feed themselves and those around them—in their local areas.

In addition, we now have a functioning network of international financial institutions to provide capital for agricultural development. These institutions increasingly believe agricultural development is a very high priority investment—a major policy shift for them. The World Bank, the Inter-American Development Bank, the Asian Development Bank, the African Development Bank, are examples. There are others. There is not enough capital, but the amount has increased significantly. And, there are many other international institutions which are working to transfer agricultural technology, including the U.N.'s food and agricultural organization, and major American and European foundations, among others.

And, it is an especially hopeful sign that some of the governments of low income countries are showing a new determination to develop rural areas, with emphasis on food production. Where the governments do not have such priorities, problems are worse.

I am optimistic because every country—Vietnam included—has the potential to feed its own people. In the meantime, they need our food aid—shipments of food like this one—starving people cannot exist on promises of development, no matter how real.

If we can deal with problems of international poverty and hunger, why are we not doing better than we are?

I think that two national attitudes are important deterrents to the change in national priorities that was envisioned in Rome in 1974. The first is a kind of conviction that very little can be done to combat a problem so pervasive, so longstanding, and so complex as international hunger. And, the second is the feeling that the bad crops of the early 1970's were exceptional and that recent good crops are normal—the feeling that there is no hunger problem any more.

In some ways, the second misconception is hardest to deal with. We did overproduce in this country, and in other countries during the last three years. And, in 1974 we probably did underestimate the world's capacity to produce over the long term. Americans and others who must deal with today's surplusses have difficulty believing that there are still hungry people in the world. But the problem of world hunger will be even more severe during the next drought because there will be more people. I repeat, it's not the world's total food supply that is the present problem. it is poverty—the inability to buy it.

It takes a great and continuing effort to focus the nation's attention and the attention of the world on such problems in the absence of a major and visible crisis. We must work to provide that effort. The Churches of our country have done more than anyone to address this problem.

The second misconception comes from a kind of new economic realism. The nation is in a process of re-evaluation—of facing limits. We no longer believe that we can have everything we want.

It is a commonplace among politicians and political pundits that many of our social programs of the 1960's were too ambitious. They raised unreasonable expectations. And, it is certainly a haunting reality that we cannot have all the energy we want, or at least all the petroleum we want, at low prices. The energy crisis (and the international financial crises energy costs are causing), is not only diverting the nation's attention from its poor and hungry—it has shaken our national conviction that we can deal with such problems.

Such questioning is healthy. Realism in terms of resources and resource use is long overdue. Realism in terms of international politics is a fine thing. But realism should not be confused with pessimism. Neither an over optimistic view of world conditions, nor an over-pessimistic view of what we can do should be permitted to force us to retreat from our important interests in international development and the problems of the world's poor people.

This shipment of grain is a statement to the world that this nation is not retreating from problems—that we will not retreat from our responsibilities. It is a statement that we are confident of our ability to help, and that we are reaching out to heal and mend and build.

It is partly because I can see progress like this that I am optimistic about the future. Because I am optimistic I would like to conclude with a quote from Senator Humphrey's statement on the International Development and Cooperation Act which he finished shortly before his death.

Hubert Humphrey believed:

"It is possible to make changes. We have demonstrated that there are few if any physical or technological barriers that this country is uncapable of overcoming, provided that we are willing to make the national commitment to do so."

or again—

"We are a young country with our future before us. Our people are builders. They are restless. They are energetic. They are idealists who want to put their ideals to the test. It is an exciting time. The frontiers of science and technology are constantly being pushed forward. But it is in the political, economic and social fields where mankind's ingenuity and inventiveness must now be directed."

Today, we are celebrating a demonstration of the willingness and ingenuity Hubert Humphrey was talking about. It is a joining together of the people of this country to deal with one international social problem. It is a restatement of his conviction that the poor people of the world can be helped—and that it is our best interest to help them. It is the right thing to do. And, it is a statement of our conviction that neither the complexity of the task nor the passing considerations of national or international politics should deter us from that responsibility. Thank you very much.●

VIOLENCE AND HUMAN RIGHTS D'ALOG IN SOUTH AFRICAN PARLIAMENT

Mr. CLARK. Mr. President, I would like to print in the RECORD a brief dialog from a recent debate in the South African parliament discussing violence and human rights. The eloquent remarks by Alex Boraine and the climate of debate in that legislature provide an opportunity for us to better understand the difficulties of change in South African society.

The material follows:

Dr. A. L. BORAINE. Mr. Speaker, the hon. member for Balberton has made a number of proposals and has asked a number of questions. Let me say immediately, in answer to his one question, which he says he has not received an answer to, that this party, as a party or as individuals, has never sought to meet with any leaders, Black, White or Brown, in an attempt to work against this Government in an unparliamentary way. That is the first reply, and I hope that hon. member will not ask that question again because we say this quite emphatically.

Secondly, the hon. member was very distressed about certain so-called facts from the book of Amnesty International. I have not read that book and know nothing about it, so I am certainly not going to defend it. All I can say is that if we are going to talk about facts—and the hon. member for Pretoria Central sought to distinguish between fact and fiction concerning Steve Biko—we must ascertain what the facts are. The facts are very few and very clear. Steve Biko is dead and that is a fact, not a fiction. He is dead from brain injuries. Thirdly, he is dead from brain injuries received whilst under the supervision of the security police. Fourthly, the fact is that the injuries were received whilst he was being detained under section 6 of the Terrorism Act. The fifth and final fact, to which I want to refer, is that he is, together with many others, dead in detention. Those are the facts, and no matter how much covering up is done, nothing can stand against those facts [Interjections.]

I now want to go on to talk about certain other aspects of the climate of violence which is so apparent in South Africa, and not only in South Africa but also in many parts of the world today. This is a frightening and sobering fact. It is a world-wide phenomenon, that is true, but we must address ourselves particularly to this phenomenon as it manifests itself in our society. The Sunday Express of 15 January listed 1,600 crimes of violence committed against known critics of the Government since 1964 and indicated that since that time, despite the large number of crimes committed, only two men were prosecuted. When the hon. the Minister of Police was asked to comment, he said then what he repeated in the House this afternoon—

What do you expect me to do about it? I am not a policeman.

I want to remind the hon. the Minister that he is in charge. He is the Minister of Police. So I must ask again, Who else must I ask but the hon. the Minister of Police? What is happening in this country where crime after crime can be committed and no one is ever charged or brought to book?

The MINISTER OF DEFENCE. That is a wicked statement.

Dr. A. L. BORAINE. Of course it is scandalous! [Interjections.] What is scandalous, however, is not what I have said, but the fact of what has happened. That is what is scandalous.

The MINISTER OF JUSTICE. That vicious insinuation is typical of you.

Dr. A. L. BORAINE. No, I am not making any insinuations. I am asking a question on

the basis of facts. The crimes of violence I refer to are not minor. They include attempted murder, bomb attacks, assaults, arson, the burning of churches and private homes, the destruction of cars, harassment and death threats. The victims include archbishops, priests, ministers, student leaders, journalists, members of Parliament, university lecturers, teachers, lawyers, and ordinary citizens.

An Hon. MEMBER. What is your point?

Dr. A. L. BORAINE. The point I am making is that violence is endemic to South Africa. Wherever that violence is committed—whether one talks in terms of left wing or right wing, whether one talks in terms of White or Black, whether one talks in terms of institutional violence or not—violence feeds upon violence and if there is one thing this country has to do with a great deal of urgency it is to tackle the whole question of the growth of violence and violent crimes in South Africa. [Interjections.]

The MINISTER OF ECONOMIC AFFAIRS. And the instigators of violence.

Dr. A. L. BORAINE. Yes, I agree, the instigators too.

Mr. H. E. J. VAN RENSBURG. Start with yourself in that case.

Dr. A. L. BORAINE. Mr. Speaker, I assume then that we are at one on this. I assume we are totally committed to every effort being made to withstand the growth of violence in South Africa. [Interjections.] Unfortunately, when one refers to a serious situation such as this, one hears the kind of comment I have just heard on my left, namely that some of us are responsible for the violence. Mr. Speaker, I reject that with the contempt it deserves.

The MINISTER OF DEFENCE. Just be careful that your little wings don't melt!

Dr. A. L. BORAINE. Sir, sitting opposite that hon. Minister, I have to be very, very careful indeed. There was a time when he said he was after my blood. But I am still waiting.

The MINISTER OF DEFENCE. We have known your sort for 300 years.

Dr. A. L. BORAINE. Yes, I am not scared of you.

Sir, the kinds of crimes I have referred to are now becoming almost a daily occurrence.

Mr. P. T. C. DU PLESSIS. Your uncle's name is Lenin.

Dr. A. L. BORAINE: One of the worst features of that was the recent deaths, whether of Rick Turner or of Dr. and Mrs. Smit, and the injuries sustained by Mr. Mtshali. Everywhere violence is on the increase in South Africa and unless we address ourselves to this major problem we are going to find ourselves engulfed by it. There are two approaches to this. On the one hand we can say that, in order to withstand the growing violence, what we have to do is to increase our Police Force and the arsenal of weapons and to improve our techniques. It is self-evident that even if we were to be the best in expertise, we cannot quell violence and crimes of violence by that method alone. What we have to do is to ask the hard question: What are some of the root causes of the violence that is taking place in our country right now?

Mr. P. T. C. DU PLESSIS: Boraine!

Dr. A. L. BORAINE: Mr. Speaker, the new hon. Minister of Bantu Administration and Development is on record as having stated certain aims with reference to his new job. I congratulate the hon. the Minister on his new job and wish him well in it. He has a very difficult task. I want to ask him whether he is serious when he says that among his aims are self-determination, human rights and majority rule. This is what I have seen quoted in the newspapers. I simply wish to ask him whether that is right.

The MINISTER OF BANTU ADMINISTRATION AND DEVELOPMENT AND OF INFORMATION: Yes, in the context of what I said.

Dr. A. L. BORAINE: Yes, I understand the context. I want to ask the hon. the Minister about that now, particularly in respect of human rights. I think there is a direct link between those who believe and perceive themselves to be oppressed or to have basic human rights denied them and the temptation to take the law into their own hands.

Mr. P. H. J. KRIJNAUW: You speak up for them.

Dr. A. L. BORAINE: I say that one can then meet force with force; one can meet violence with violence. If I read the statement of the hon. the Minister carefully and correctly, I believe that what he is saying is that one cannot do that, that one is not going to succeed in doing that. What we therefore really have to apply our minds to is to decide whether or not, at this moment in time in South Africa, men and women, Black and White, have access to basic, fundamental human rights. If the answer is "no", whether in respect of White or Black, we are in dire peril because history makes it abundantly clear that wherever people perceive themselves to be oppressed, whilst they may be held back by repressive measures, in the final analysis the rise of expectations, over which no one has any control, will cause them to use every means at their disposal to throw off what they see as oppression in order to attain the basic and fundamental human rights that I am talking about. Mr. Speaker, it therefore seems to me that if there is one thing that that side of the House and this side of the House should be in agreement on, it is to discover what these basic human rights are and to test whether in this society these human rights are available for all our people. Unless we do that, we can never expect any of our people to be responsible, to accept their duty as citizens and to adhere lovally to the country in which they find themselves and to which they belong.

Mr. T. LANGLEY: List them.

Dr. A. L. BORAINE: I should like to list just a few, Mr. Speaker, and to ask the hon. the Minister whether he agrees with me that these are very basic and fundamental human rights—these are not the possession of all our peoples—and whether or not he will agree with me that we should bend our minds, our wills and our energies to make sure that they are guaranteed. I shall list a few but I do so against the background of the fact that South Africa is not a signatory to the United Nations Declaration of Human Rights. It seems to me that one of the best ways in which we can answer the conflict and the problems which we face is to make what I can call a declaration of intent or a human rights manifesto which South Africa can stand on. We could then say both to the outside world and to those who live within the country, and particularly the latter: This is where we stand; now let us get there as soon as possible.

What are these? Obviously this is an enormous area but I focus on only six.

Mr. D. J. L. NEL: Come to the point.

Dr. A. L. BORAINE: The first one is for the benefit of the hon. member for Pretoria Central—unfortunately he has not availed himself of this right: Everyone has the right to work, to free choice of employment and protection against unemployment. We are faced with the spectre of large scale unemployment within our land. I understand that new statistics have become available only today from the Department of Statistics. These indicate that well over 600,000 Blacks are unemployed. I have not checked those figures but the hon. the Minister of Labour should know better than I whether they are correct. Certainly, this indicates that there are hundreds and thousands of people unemployed in South Africa today who are not even registered as unemployed. Therefore we have this enormous problem.

An HON. MEMBER: What about Britain?

Dr. A. L. BORAINE: Whether or not that is the case in Britain, has nothing to do with it. That is a stupid question. The fact of the matter is that unemployment is a very real problem and that people should have the right to work and the right to be protected when they are unemployed. There are laws on our Statute Books and it is true that there is a commission looking at some of them now. I want to suggest and propose that wherever laws exist in South Africa that make it difficult to defend this human right, the right to work and to be employed and the right of protection when one is unemployed, those Statutes ought to be repealed without delay. One will therefore have a declaration of intent on the one hand and a movement towards action on the other. Does the hon. the Minister think that unreasonable?

The MINISTER OF BANTU ADMINISTRATION AND DEVELOPMENT AND OF INFORMATION: I am listening.

Dr. A. L. BORAINE: The second basic human right is the following: everyone has the right to minimal housing. This does not mean a luxury penthouse or a grand house with many rooms.

I am talking about minimal standards. A major grievance for decades, among Blacks in this country, has been the denial, over many years, of home ownership. The desire and right to own or rent property, however humble, I submit is a fundamental right. The destruction of squatter camps, the wholesale movement of people and the denial of freehold compound the problems and only throw petrol on smouldering resentment in our major townships.

Everyone has the right to free elementary education which is a third very basic right. At the very heart of the conflict in South Africa, however, we find this incredible dilemma of Blacks who believe they are getting less than what is a basic human right. With the whole search for a new name, perhaps for a new character, there might well be new priorities—I hope there will be—but one of the finest things the Government could do now, with its new Ministers, is to say that education is education and belongs together and that one should group education under one heading instead of trying to look to one group and then to another. Make no mistake, whether they are right or wrong, the young Blacks in our townships today, who form the tinderbox, are going to say that as long as there is a separate department they are being discriminated against. I believe that the hon. Minister and Ministers have a remarkable opportunity to move South Africa forward towards human rights for all by doing just that.

Fourthly, everyone has the right to basic health care. If one looks at what is happening in many of our major centres, some of the health care that has been brought into being in recent years is quite remarkable. When one looks at our rural areas, however, at the people who are not in our homelands—and there are millions of Blacks who are not in homelands or in urban areas—and when one sees the hardship there, one cries out aloud for the basic human right of health care which involves an understanding of the land, a caring for the . . . [Interjections.] It means helping people in their feeding habits, family planning and building up a health care programme which would be available to all our people. Is there something wrong with that? Surely that is a basic human right?

A fifth basic human right is that all are equal before the law and are entitled, without any discrimination, to the equal protection of the law. I submit that it follows that no one, on that basis, should be subjected to arbitrary arrest, detention without trial or banning.

Last of all, everyone has the right to participate in the government of his own country. This point has been made before. The hon. the Prime Minister went to great

lengths to say just how this is being made possible for everyone within his own group. Someone suggested that we live in a fairyland, but the harsh reality, whether we like it or not, is that in South Africa we are interdependent. It is not only a case of Whites being dependent on Whites or English-speaking people on Afrikaans-speaking people, but Blacks on Whites as well. The time has come for us to accept that harsh reality and begin to change and move into this real life situation instead of imagining that we can arrange our lives in small compartments forever.

Therefore, in conclusion, the central question is how we are to achieve this basic human right of enabling all people to participate in a government of their own land and in the decisions which affect their own lives and destiny whilst maintaining basic human rights for Black and White alike. The irony is that the Government by withholding certain basic human rights in order to maintain them for the survival of the Whites, is putting in jeopardy the very future of all Whites in South Africa. I do not believe the final question regarding participation which I would like to raise now can be answered in this Parliament alone. If there is any sterility, then it is in continually debating among ourselves as though in this day and age we can make the decisions which affect the destiny and the lives of hundreds of thousands and millions of people outside. That is why our nation calls for a constitutional commission. That is why we have asked for the commission and that is why we stubbornly go on asking for a national convention.

Why should people be so surprised that we call for this? Was it not true that in 1909 when there was enormous anger, bitterness and fear in this country between White and White—the legacy of the Anglo-Boer War—an opportunity arose, through the wisdom of some people at least for people to come together, for divisiveness to be set aside and for unity to emerge? With hindsight we can say that they should have included all the peoples of this land. However, we can learn from that and we can say that unless we do this together and negotiate together, we perish together.●

THE READINESS OF OUR MILITARY FORCES

● Mr. HARRY F. BYRD, JR. Mr. President, I recently came across a very thoughful letter which appeared in the Washington Action Reporter, a publication of the Veterans of Foreign Wars.

This letter from a former marine sergeant raises serious issues with regard to the vitality and the overall readiness of our military forces.

Although the letter specifically addresses problems in the Marine Corps, many of the concerns expressed apply equally to the other services.

The concerns raised in the letter are not unknown to the Congress, but I do not believe there has yet been sufficient attention to them.

While some of the problems pointed to in the letter may be overstated, they are problems that few would deny exist in our Armed Forces.

I submit for the RECORD the abovementioned letter.

The letter follows:

I am writing to you in an attempt to bring to your attention a problem of grave national concern, the deplorable state of the U.S. military. On Sept. 17, 1976, I ended a two-year enlistment in the U.S. Marine Corps. During my enlistment I gained first hand knowledge not only of what the Corps should be, but also of what it actually is. Unfortunately, I have been forced to conclude that Washington is not aware of the magnitude of the problem. As a citizen I feel an obligation to report this to you so you, along with your constituents, may initiate necessary corrective action.

It is important to note that I am speaking in reference to the Marine Corps. My exposure to the other branches was minimal. However, I feel it is fair to assume that these problems are common to all branches. Members of the other branches I have spoken with have reinforced this conclusion. It is also important to note that I was an excellent Marine. I was promoted meritoriously four times within a 20-month period. I represented my regiment during the summer of 1975 as "The Marine of the Quarter." By the end of my enlistment I had over four months in grade as a sergeant. I believe in the Marine Corps and am proud to be a Marine. I am writing to you because I feel the Corps is still salvageable if it undergoes extensive changes immediately. A unit is only as good at its men. As it stands today, the Marine Corps is not capable of defeating a semi-disciplined, semi-dedicated, enemy unit in conventional warfare. Because of a breakdown in discipline and a jumbling of priorities the Marine Corps is no longer an effective fighting force.

Discipline is the most essential factor in the construction of any fighting unit. Modern technology, advanced weaponry, and the most sophisticated combat tactics cannot be utilized to a recognizable potential if the fighting unit is not disciplined. The discipline the Marine Corps has always been known for is decaying.

Civilian pressure on the military, as well as current military trends, are to blame. Washington can solve many of the military problems because they, under the pressure of civilians totally oblivious to the operational structure of the military, initiated many of the problems. The civilian population has to stop interjecting into every aspect of the military. Washington should tell the military when, where, and why to fight, but not how. When training and warfare were run by the military, wars were won. Since it has been run by Washington we have lost. A civilian does not understand nor truly appreciate the necessity of absolute discipline. He does not understand how lives are saved by tough, realistic training. A Marine Corps saying sums it up: "The more you sweat in peace, the less you bleed in war."

The military has been under constant pressure to tone down its training. One prime example of this is the Lynn McClure incident in San Diego early in 1976. Lynn McClure should never have been allowed into the Marine Corps. However, once he got to boot camp it became the unfortunate responsibility of his drill instructors to make him as ready for combat as possible. He had to learn to fight if he was to survive in combat. When he refused to fight in pugil stick training his drill instructors used a time-tested method of pushing one into fighting back: they put more men on him so he would have to fight to stop the pain. Unfortunately, one of the recruits dealt McClure a lethal blow. The chances of this happening were infinitesimally small. But it did happen, so the public assumed there was something wrong with Marine training. They felt Marine training was inhumane and animalistic. To a degree it was. What they failed to realize is that there is no such thing as a fair fight or a gentleman's war. There is no socially acceptable way of thoroughly destroying another man's life. Only the meanest, most violent, will survive. What resulted were Congressional investigations and changes in training policies. The 16-hour day was shortened so recruits wouldn't have to endure such "stress." Will the congressmen and civilians who initiated this go into the combat zone, relieve the Marine, and endure the "stress" of combat for him? Special platoons were eliminated. Now those who could not adapt in a regular training environment are simply turned loose into the regular Marine Corps without correction. I had the unfortunate task of trying to convince these "children" who had just come from the Recruit Depot that their job was a serious one; to fight and win wars. Most of the nonrated Marines took the training as a joke.

I do not advocate a military state. I am fully aware of potential problems without regulation of the military. But the pendulum has swung the other way. It makes no sense to have a military that is incapable of accomplishing its mission. The operation of the military must be returned to the professionals who are the experts in military training and welfare.

With the public pressuring the military to be more "humanistic," changes in military attitude, as well as practice, have occurred. The military is attempting to be less rugged and more understanding of the problems of the individual. Instead of emphasizing combat efficiency, the Corps is desperately trying to make the Marine more comfortable with shorter days and luxurious living quarters. This practice must be terminated if we want to maintain a fighting force. The military is simply too soft.

Discipline is decaying because of a number of controllable factors. The caliber of man recruited is one of the big problems. Fortunately this is slowly coming to the surface. We must demand a mature young man with some degree of morality or dedication. The Marine Corps, as a rule, takes what it can get. I have been told the unqualified are no longer eligible for enlistment. However, I still see them constantly turning up in the Corps. Somewhere there exists an inconsistency in recruiting practice. The Marine Corps doesn't need geniuses. The Marine Corps also doesn't need crooks. Unfortunately a significant percentage of Marines are exactly that; social misfits given the choice of enlisting or going to jail. It is difficult to establish a sense of unit comradeship when mutual trust and respect cannot exist.

The noncommissioned officer is a mere figurehead. True delegation of authority stands in theory only. The commanding officer is the only person with any authority. Any enforcement of order attempted by the NCO is usually stifled by legal technicalities. The Uniform Code of Military Justice illegalized any physical disciplining. It's ironic to note that most school teachers can physically discipline students, yet a Marine NCO faces court martial if he touches one of his men without permission. The assumption that everyone acts rationally is naive. Reason cannot always be the sole tool for dealing with people. Eventually one must speak the language understood. There is little the NCO can do to enforce his orders short of reporting it to the CO. An NCO cannot punish his troops without punishing himself. Any additional duty must be NCO-supervised. If a Marine is not ready for an inspection the NCO may order him to spend the night on base working on his gear. The NCO must also stay with the man until he is done. Eventually, troops are intentionally disobedient in an effort to deprive the NCO of his free time. The NCO must then decide if the discipline of his men or his free time is more important. The average Marine knows the NCO has no authority with the exception of referring to the CO. He also realizes that NCOs are pressured not to put men on report and are told to "use their leadership ability." As a result, the nonrated subordinate usually does not do what he is told or does it barely within the legal confines of the order. In practice, because of this, few NCOs actually enforce their orders.

Punishment as regulated by the UCMJ is by no means strict enough to deter military crimes. I have known men who have intentionally placed themselves in a status of un-

authorized absence knowing that the worst punishment they would receive is a $90-fine. Article 15 of the UCMJ, Commanding Officers Non Judicial Punishment, was established to handle minor offenses while the three levels of court martial were designed to deal with progressively more severe crimes. Seldom does a crime go beyond the NJP level regardless of how severe. While courts martial do exist, they are relatively few in comparison to the number of offenses committed. The one deterrent the military leader had, the type of discharge, is losing its effectiveness. In the first place, it has been my experience that some civilian employers pay little or no attention to military history. Secondly, it is almost impossible to receive a punitive discharge. Of the five types of discharge, honorable, general, undesirable, bad conduct, and dishonorable, the UD, BCD and DD are legally considered punitive discharges. A Marine must be convicted by a court martial, which is considered a felony, to be awarded a punitive discharge without his consent. In other words, if a Marine cannot be convicted by a court martial, regardless of how poor the Marine's performance is, he must receive an honorable or general discharge. In either case he is entitled to all the benefits of other veterans who served honorably. This is a flagrant miscarriage of justice. The military has been using lately what it refers to as an expeditious discharge. This is a general discharge that, when certain specific requirements are satisfied, a problem Marine can be quickly discharged for the convenience of the government. Initially, I thought this would be a good idea. I was proven wrong. Many Marines competed with each other to see who could get into the most trouble and be out of the Marine Corps the fastest (with full benefits, of course). In essence, they were rewarded for their crimes. I know how hard it is to get a less than honorable discharge. It has to be intentionally worked at. I know the caliber of man who gets a less than honorable discharge. It turns my stomach to see these people categorized with and given the same benefits as those men who gave all they had for their country. As long as men are treated like children and not held responsible for their actions they will act like children.

Racial problems are approaching epidemic proportions. It can't get more tense. At the time of my separation, enlisted Marines were discussing and preparing for what they felt was the inevitable race war. In boot camp there was little if any racial problem. This was because everyone was treated equally. That is not the case in the Fleet Marine Force. Minorities are given preferential treatment. Through the use of a computer, minorities receive special consideration for selection of desired military occupational specialties. I saw good Marines lose out on a deserved promotion because their gutless superiors felt it wouldn't look good to promote all whites. There are even separate, more lenient grooming standards for minorities. I may sound very bigoted. I knew no prejudice until I entered the military. I am not prejudiced; if I were I would have no reservations about publicly stating so. However, I refuse to pretend circumstances don't exist that do. As long as a distinction between the races is made, the military will have a race problem.

I have no intentions of implying the Marine Corps is a totally negative, incompetent organization. To the contrary, it has the potential for actually being the finest fighting force in the world. Ideologically it is sound. If Marine theory and doctrine were actually applied, we would be trained for and capable of accomplishing difficult missions. Although much of the combat training is unrealistic, the actual physical training is excellent. The infantry Marine is physically capable of moving around the clock for many days, often with little or no food or water. Generally speaking, Marine officers are a very impressive group of men. The corps is very selective of its officers and those who make it are disciplined, dedicated men. If the Corps could be as selective of all its men, half of its problems would be solved. I am convinced the officers are doing the best they can with what they have, but their hands are figuratively tied. This is not enough. Action must be taken to correct discrepancies.

I intend my criticism to be constructive. While by no means all-encompassing, I have specific suggestions based on my experience to reform a few of the problems of the military:

(1) Return sovereignty to the military. After initial reforms are made, Washington should adopt a hands-off policy and let those qualified make military decisions.

(2) Treat troops like men. Individuals must be held accountable for their actions. Training should be toughened and more realistic. Realism should not be compromised solely for the purpose of safety or because of potential danger.

(3) Demand a higher quality enlistee. If necessary, drop total forces or start the draft. Do not compromise with plush recruiting promises. A million incompetent men are not that much more effective than 100,000 well trained elite troops.

(4) Return authority to the NCO. He knows the individual better than any other leader.

(5) Increase degree of punishment for violation of military law. Revise the manual for court martial accordingly.

(6) Amend discharge procedures. Eliminate the expeditious discharge as it stands today. Expedite court martial proceedings.

The job of the Marine is a thankless job. Traditionally, the only thing that kept him going was pride. Without that pride the Marine, in time gives up. There isn't much pride in the service. The troops are not blind. They realize they are not elite. Ironically, most Marines, all of whom have endured the pressure and intensity of boot camp, wish the regular Marine Corps were like boot. At least at that point they were disciplined and had pride.

Those who pretend the military is in a better state than I have suggested are either ignorant of the situation or lying. That is why it is important for you to get a view from a man on the bottom. There is little I can do to change the situation. You are the one our country has given the authority and responsibility to undertake a task of this magnitude. Fifty-thousand men are dead today because Washington insisted on running the military its own way. How many of those who died were unit leaders killed by their own undisciplined, gutless men? How do we justify this to the families and friends of these men? Nothing can change the past, but those who shirk their responsibilities today will be as responsible for the inevitable deaths of tomorrow as the one who pulls the trigger.

PARTICIPATION RATE AND INCOME DISTRIBUTION OF SCHOOL AND COLLEGE STUDENTS

● Mr. MOYNIHAN. Mr. President, much good data has recently become available from the Bureau of the Census concerning the participation rate and income distribution of school and college students in public and private institutions. These numbers are of sufficiently general interest as to warrant inclusion in the RECORD, and I insert them for their reproduction there.

The first table—drawn from the recently published series P–20, No. 319, Current Population Report—shows the college enrollment rates of dependent family members 18 to 24 years old by family income and sex. It is particularly useful because, unlike many time series tables produced on this subject, the incomes are cast in 1967 dollars and thus immunized against the effect of inflation.

It is noteworthy that for both sexes at all income levels, the college-going rate was almost precisely the same in 1976 as it had been a decade earlier: About 39 percent in both years, notwithstanding a brief surge in the late sixties and a subsequent decline around 1974.

When one examines male and female participation rates separately, however, a very interesting trend is apparent: men began the decade at 43 percent and finished it at 35 percent, while women display exactly the obverse, 35 percent in 1967, 43 percent in 1976. This country witnessed many events in 1972, but I submit that none portends greater long-term consequences for the society than the movement of women to higher college participation rates than men.

Some further developments of general interest are revealed by the income figures: While very low-income (below $5,000) persons have modestly improved their college-going rate during this period—evidence of the constructive effect of mounting Federal assistance for needy students—they are still far less apt to attend college than their more prosperous age mates. The ratio approaches 1 to 3.

Yet the only significant long-term decline in college-going rates is to be observed among those with incomes above $10,000, a fall-off from 52 to 48 percent for persons with family incomes between $10,000 and $15,000, and a more dramatic decline—from 68 to 58 percent—among those above $15,000.

The second table is table A–1 from the same census report. It deals with the percentages of various age groups to be found enrolled in school or college. It is worth focusing for a moment on the 18- to 24-year-old population, not only because the data confirm the aforementioned shift in male and female participation rates, but also because of a dramatic improvement in the rate of school and college attendance within the black population in these age groups. Most remarkably, in the 18- and 19-year-old population, blacks are now more apt to be found in school or college than are whites. While the white 18- to 19-year-old participation rate declined slightly from 48 percent in 1966 to 45 percent a decade later, for blacks in this age group the rate improved dramatically—from 38 to 50 percent. While one hesitates before inferring causation—the weak labor market for black teenagers surely contributes to their elevated school participation rates—if one believes that over the long run education is a source of social and economic advancement there is at least some reason for satisfaction. Among the 20 to 22 year age group, the white school participation rate remains somewhat ahead of the corresponding

rate for blacks, but whereas the former has held virtually constant for a decade, the latter shows striking improvement from 12 to 28 percent.

The next five tables are unpublished data compiled at my request by the Census Bureau on the basis of the survey of income and education conducted in 1976. This congressionally-mandated survey is the most authoritative source of reasonably contemporary information on the interaction of family incomes and student educational status. In view of the high level of congressional interest in tax credits for tuition expenses, and in additional need-based aid for college students, it seemed to me of the utmost importance that we have the best available data on key pertinent factual matters.

The tables submitted herewith represent just a small fraction of the special census compilations carried out at my invitation by Mr. Gordon Green of the Bureau's Income Branch with the approval of Manual Plotkin, a distinguished public servant presently serving as Director of the Census Bureau. This is characteristic of the timely, responsive, nonpartisan and meticulously accurate survey and statistical work we have come to expect of the Census Bureau, and I am particularly pleased that the Bureau's own analysts have found this material of sufficient intrinsic worth to social scientists and policymakers that they are planning to publish it (in somewhat different form) as a special study.

The five tables are identical in format. The first is for the Nation as a whole, while the next four display regions of the country. They show the number of students in various levels and types of schools and colleges by family income. The family income figures are broken down into much finer gradations than the $15,000 and above figures used in the current population survey. This is particularly helpful to those seeking information on middle-income students.

Four points are noteworthy:

First. College (postsecondary) students divide by family income rather neatly into recognizable thirds: those below $15,000, those between $15,000 and $25,000, and those over $25,000. Although there is a somewhat heavier concentration of lower-income students to be found in public institutions, the difference between public and private is not alarming. Indeed, it is reassuring to find that 26 percent of private college students come from families earning less than $15,000, despite the fact that the cost of attending a private institution now averages about $3,800 per annum. This suggests, among other things, that our need-based aid programs are having some effect.

Second. Attendance at private elementary and secondary schools is not a high income phenomenon, as is often alleged by opponents of tax credits designed to offer modest financial succor to the families of students enrolled in nonpublic schools. Fifty-four percent of private school students come from families earning less than $20,000; 82 percent from families below $30,000; just 8 percent from families above $40,000. Indeed, it is interesting to note that approximately 386,000 private school youngsters are below the Federal "poverty line."

Third. The regional data show patterns that, on the whole, are predictable. Private school and college students are naturally much in evidence in the northeast, where they constitute 20 percent of all students, but they are also present in significant numbers in the north central and southern regions—2.3 million and 2.1 million, respectively. They comprise the smallest fraction (9.5 percent) in the west, but even there the private sector accounts for 1 million students.

Fourth. The family income distributions are fairly similar across the Nation, with the conspicuous exception of the South, where 32 percent of all students (combining elementary, secondary and post-secondary) come from families earning less than $10,000. Of college students in the South 19 percent come from such families as compared with 11 percent in the Northeast.

These data lend themselves to analysis for a variety of purposes. It is in everyone's interest that they be in the public domain, and I am therefore pleased to submit them for inclusion in the RECORD.

The material is as follows:

TABLE A.—COLLEGE ENROLLMENT RATES OF DEPENDENT FAMILY MEMBERS 18 TO 24 YR OLD, BY FAMILY INCOME AND SEX, OCTOBER 1967 TO OCTOBER 1976

[In 1967 dollars]

Sex and family income	Percent enrolled

DOMESTIC VIOLENCE PREVENTION AND SERVICES ACT

● Mr. JAVITS. Mr. President, I am pleased to join with my distinguished colleague from California, Senator CRANSTON, as a cosponsor of S. 2759, the Domestic Violence Prevention and Services Act, which will begin to provide necessary Federal support to State and local programs and activities to prevent domestic violence and to assist the victims of such violence.

Until recently the problem of domestic violence in the United States has been largely hidden or ignored, its proportions unknown, its victims faceless and mute. We have begun to recognize, however, that domestic violence in the United States is not only widespread, but wreaks terrible damage to individuals, families, and to society as a whole.

Mr. President, the Domestic Violence Prevention and Services Act has been developed after thorough hearings by the Subcommittee on Child and Human Development of the Human Resources Committee, of which I am the ranking minority member. This legislation is a careful expansion and reorganization of the issues addressed in an earlier bill, S. 1728, the Domestic Violence Prevention and Treatment Act of 1977, introduced by my colleague from Minnesota, Senator ANDERSON, which I was pleased also to cosponsor.

Domestic violence is not restricted to any one sector of our society, but affects the whole spectrum of American social and economic life. Previous efforts to combat this pervasive problem have been minimal or largely inadequate in relation to its vast dimension. State social service programs provide funds for shelters and supportive services to victims of domestic violence through titles IVB and XX of the Social Security Act, yet these efforts are sporadic and underdeveloped.

In my own State of New York, private nonprofit organizations such as the Coalition for Abused Women, and the Victims Information Bureau of Suffolk, have begun innovative programs for comprehensive crisis intervention, advocacy and counseling for victims of domestic violence. The New York State Department of Social Services has established a task force to develop programs for victims of domestic violence. These local and State efforts can and must be encouraged, expanded and improved by appropriate Federal help.

The time is at hand for a concerted program of Federal assistance to encourage and support such State and local prevention and treatment services. This bill, introduced by Senator CRANSTON, will establish a first, yet nonetheless comprehensive, Federal effort to assist States and localities to help thousands of people affected directly or indirectly by the tragic consequences of domestic violence.

The bill establishes within the Department of HEW a National Center on Domestic Violence to coordinate Federal prevention and research efforts, and to act as a clearinghouse for information and technical assistance for domestic violence prevention and treatment programs throughout the United States. Building upon the concepts and experience of the Child Abuse Prevention and Treatment Act, Public Law 93–247, this bill will assist the States to direct protection and treatment services toward both actual and potential victims of domestic violence, regardless of age. Perhaps most importantly, the structure of this bill's State and private grant mechanism enables support to be targeted primarily to local public and private nonprofit programs which most closely serve the needs of domestic violence victims in local communities.●

CITIZEN PARTICIPATION IN DISARMAMENT POLICY

● Mr. CLARK. Mr. President, recently I had the opportunity to take part in a meeting in Washington with representatives of citizen organizations from throughout the country concerned about the forthcoming United Nations special session on disarmament. These 150 persons met to prepare their response to President Carter's call for citizen participation in the formulation of U.S. policy in the special session.

In my view, the five working groups of this conference have produced a series of stimulating and provocative ideas and have made a contribution to the search for ways of achieving security both for our Nation and for individuals.

As a result of this conference, the group forwarded a series of proposals to President Carter and his assistants, to the State Department, and to the Arms Control and Disarmament Agency.

Mr. President, I submit a summary of these proposals to be printed in the RECORD at this point.

The summary follows:

SUMMARY

The five working groups of the conference developed proposals in these areas:

(1) Nuclear disarmament.

(2) Conventional weapons disarmament.
(3) Transfer of research and resources to meet human need.
(4) Alternative security, peacekeeping and peacemaking.
(5) Creating public support for disarmament.

The group on nuclear disarmament recommended:

Because military technology tends to outpace the work of arms-control negotiators, we propose that the United States undertake the following initiatives in order to reverse the momentum of the arms race and to improve the negotiating climate:

1. Halt, for a specified period of time, the testing, production, and deployment of nuclear weapons.

2. Seek vigorously to achieve a comprehensive test ban (CTB) by the opening of the U.N. Special Session on Disarmament. If there is no CTB by that time, halt all U.S. nuclear explosive tests.

3. Halt, for a specified period of time, the testing, production, and deployment of strategic nuclear delivery systems.

4. Halt, permanently, the production of fissionable material for weapons.

The United States should invite the Soviet Union to take reciprocal actions.

We further urge that the United States:

1. Announce that we will destroy a specific number of nuclear weapons as a first step toward President Carter's stated goal of total nuclear disarmament and request other nations to join with us in this process.

2. Pledge not to use or threaten to use nuclear weapons against non-nuclear weapons states.

3. Pledge no-first-use of nuclear weapons (not agreed to by the entire group).

The group on conventional disarmament recommended:

I. Conventional Arms Transfers. In addition to announcing its willingness to help convene multilateral negotiations on the conventional arms trade. the United States should agree to impose a 25 per cent across-the-board reduction in military exports.

II. Arms-Making Technologies. The United States should propose international agreements to prevent the proliferation of conventional arms-making technology, and, as a positive step toward such restraints, agree to ban any further arms co-production or licensing agreements abroad (except those associated with arms standardization efforts in NATO).

III. Nuclear-Capable Delivery Systems. To help promote support for an agreement, the United States should impose a voluntary embargo on sales of such systems to all nations which have failed to sign the Nuclear Non-Proliferation Treaty.

IV. Repression Technology. The United States should agree to ban the sale of repression gear to any martial law regimes or governments with a record of serious human rights violations.

V. Other Initiatives. The United States should be prepared to take the following positive initiatives, and announce them at the U.N. Special Session on Disarmament:

The destruction of some amount of U.S. chemical weapon stockpiles; Renunciation of use of napalm and fuel air explosives, and a halt to the development and production of controlled fireball munitions, bomblet-filled "Improved Conventional Munitions," and wide-area conventional mass destruction weapons approaching or exceeding low-yield nuclear weapons in destructive capacity;

Press NATO to cancel or postpone maneuvers scheduled to take place in Puerto Rico in mid-May (around the time of the U.N. Special Session), in view of the already strong public opposition in Puerto Rico to U.S. Navy shelling of the island of Vieques;

Removal of nuclear-missile-carying submarines from the Indian Ocean and Mediterranean Sea; and

State its willingness to enter into an agreement with other nations to reduce its defense budget by 10 per cent as a first step toward further reduction of military budgets.

The workshop on transfer of resources recommended:

The U.S. should initiate a cap on its role in the arms race and a rollback in military spending through transfer of resources to human needs and services. Such an approach, modelled on the Mitchell-McGovern transfer amendment, would link specific military cuts to increased spending in such categories as community development, environmental protection, employment, health and nutrition, and energy. This transfer of resources should be accomplished by an economic conversion planning mechanism which would guarantee employment security for affected workers and outline specific alternative uses for idled facilities. The conversion planning principles embodied in the current McGovern-Mathias bill provide an appropriate model for such a mechanism.

A reversal of the arms race within the U.S., accompanied by a specific plan for economic conversion and alternative uses, would reduce arms shipments and permit productive civilian development at home and abroad.

The workshop on alternative security recommended:

The U.S. should advocate the establishment of U.N. regional arms control commissions to analyze arms control problems of the region, promote regional agreements on arms production and trade, develop machinery for the peaceful settlement of disputes, and negotiate for the non-interference of outside powers.

On negotiating machinery, the U.S. should welcome a greater role for Third World nations and should encourage a rotating chairmanship of the CCD among appropriate powers. Every effort should be made to bring France and China into negotiations. Powers engaged in SALT talks and other negotiations outside the U.N. should report regularly to the U.N. Provision should be made for the implementation of SSOD decisions.

We urge the Administration to take the following steps:

The President to announce forthwith his intention to participate in the Special Session; and on that occasion to assure the world of our determination to make full use of the U.N., and to help strengthen its authority by a general policy of compliance with its decisions.

In order to encourage productive negotiations, the President should indicate American awareness of the legitimate security concerns of other nations, including those of the U.S.S.R.

The President should also announce his support for national institutions for the study and dissemination of information on peace and conflict resolution.

The U.S. should also support an agreement by which a portion of funds saved through arms reductions would be made available for the support of international conflicts, including:

(a) the training of reserve U.N. peacekeeping contingents;

(b) the expansion and improvement of international mediation and arbitration, including U.N. panels of appropriate experts; and

(c) the strengthening of the International Court of Justice, regional courts, and the international legal system.

This should not preclude use of such savings for economic and social development, which should be supported.

The group on public opinion stressed:

(1) The major concerns of public education programs much focus on public apathy, fear of the U.S.S.R., and pockets of "unconverted citizenry."

(2) We must be careful of our terminology, perhaps using words alternative to "disarmament."

(3) We must link disarmament to economic concerns of everyday life and other immediate human needs.

(4) We should emphasize the positive dimensions of disarmament, not just the negative aspects of militarism.

(5) Much stronger linkages among NGOs on key strategy issues (SSD, neutron bomb campaign, etc.).

Our specific proposals directed at the U.S. government include the following:

(1) We urge the U.S. to continue to support efforts to convene a second SSD within three or four years to assess progress in disarmament.

(2) We urge the U.S. to agree to a reformation of the CCD that abandons the co-chairmanship format so as to more greatly democratize the commission. We also urge a direct linkage between the CCD and the U.N.

(3) We urge the leaders of the NATO meeting in May to take no actions concerning new weapons systems that might harm the disarmament initiatives inspired by the SSD. We recognize the need for the U.S. to work with its allies in taking affirmative action toward arms control and disarmament.

(4) We urge the State Department to make discretionary funds available to the Public Affairs Office of ACDA to be used for radio and TV publicity concerning the SSD both prior to and during the SSD.

(5) Recognizing widespread public frustration and skepticism about disarmament negotiations, we urge that the U.S. support the introduction of the concept/principle of national or independent initiatives in the Declaration on Disarmament at the SSD and that the U.S., in addition, urge specific initiatives other states can take which would facilitate the conclusion of a treaty to reverse the arms race without appreciably lessening national security.

(6) We urge the U.S. suggest August 6th as World Disarmament Day annually.

(7) We urge maximum NGO official representation at the SSD.

(8) We pledge as NGOs to support serious disarmament moves by the U.S. government and to rally public support for significant disarmament moves.

The Conference, in submitting these suggestions to President Carter, concluded:

We would very much appreciate your reactions to the views expressed. The Coalition for a New Foreign and Military Policy would be happy to forward your views on these issues to Consultation participants.

We hope that these public views will help you to prepare a very positive role for the United States at the United Nations Special Session.●

HART SENATE OFFICE BUILDING COSTS

● Mr. BELLMON. Mr. President, one of the more difficult issues we, as a body, will confront this year is the question of the major cost overruns and delays on the new Hart Senate Office Building, now under construction adjacent to the Dirksen Senate Office Building.

I am greatly concerned over this latest cost overrun to $122,000,000, with a 2-year delay. Neither of these facts was revealed to me or to most of my colleagues until the past few weeks.

As the ranking Republican of the Senate Office Building Commission, I believe we must review the entire concept, and see what can be done to bring the building in at or near the $85,000,000 now appropriated.

At its most recent meeting, the Senate Office Building Commission adopted a resolution proposed by the Senator from New Mexico (Mr. DOMENICI). This resolution directed the Architect of the Capitol to develop information on how costs can be pared down. I know that he will take this charge seriously, making every effort to find ways to hold down the cost, even if that requires the elimination of some aspects of the new structure. We owe that to the taxpayers. So does the Architect.

As another part of the resolution, the Commission directed the General Accounting Office to make a study of the factors involved in the cost overruns, a study that should help to guide the entire Senate.

Mr. President, I ask that a copy of the Building Commission letter to GAO be printed in the RECORD.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

SENATE OFFICE BUILDING COMMISSION,
February 28, 1978.

HON. ELMER B. STAATS,
Comptroller General of the United States, Washington, D.C.

DEAR MR. STAATS: The Senate Office Building Commission, at its meeting of this date, unanimously adopted the following motion:

(1) The Architect of the Capitol is directed to provide at least one alternative plan for completing the Hart Senate Office Building at or near the $85,000,000 presently appropriated.

(2) The General Accounting Office is directed to review the costs of the Hart Senate Office Building: the factors in the delay, whether the Architect's timetable and the "fast-track" (phased construction) proposal was realistic and properly carried out, whether the asociate architect's delay resulted in increased fees to the architect, and whether the procedures utilized by the Architect of the Capitol were standard ones that adequately protected the interest of the taxpayers.

Accordingly, because of the urgency of this matter, you are hereby requested to commence a review of this project, and report thereon, at the earliest possible date in order that the Commission may complete its deliberations relating to the possible additional cost of construction of the Hart Senate Office Building prior to the scheduling of Appropriations Committee hearings.

Sincerely,

JOHN SPARKMAN,
Chairman.
HENRY BELLMON,
Ranking Minority Member.●

JUVENILE JUSTICE COMMENDATION PRESENTED TO SENATOR BAYH

● Mr. DECONCINI. Mr. President, as a member of the Judiciary Committee, I had the opportunity to serve on the House-Senate conference committee considering the Juvenile Justice Act Amendments of 1977, which passed this body unanimously last year, and was signed into law by President Carter on October 3, 1977. I welcomed the opportunity to work with my distinguished colleague the senior Senator from Indiana, BIRCH BAYH, who for 7 years served as chairman of the Juvenile Delinquency Subcommittee and authored the Juvenile Justice and Delinquency Prevention Act of 1974.

It gives me great pleasure to inform this body that Senator BAYH was recently presented a commendation by the Association for Children With Learning Disabilities, headquartered in my own State of Arizona—

For his many years of leadership concerned with the welfare of the youth of this country resulting in landmark legislation, the Juvenile Justice and Delinquency Prevention Act.

Although Senator BAYH was unable to accept the Association for Children With Learning Disabilities commendation in person, he said in a message to conference participants:

I would like to thank the Board of Directors and members of ACLD for this honor on behalf of everyone in both public and private life who worked to make the Juvenile Justice and Delinquency Act a reality. Now we have a mechanism for strong federal leadership in the fight against juvenile delinquency and learning disabilities. I welcome the continued support of the ACLD and other organizations to help guarantee that we are successful in providing adequate independent programs to divert tens of thousands of children and young people from the juvenile justice system.

Founded in 1963, the Association for Children With Learning Disabilities is the country's leading nongovernmental agency in the learning disabilities field. More than 10,000 prominent psychologists, school teachers and administrators, juvenile court judges, State and local government leaders, representatives of youth service agencies and others comprise the membership.

The Juvenile Justice and Delinquency Prevention Act of 1974 authorizes a new set of programs of delinquency prevention, from the juvenile justice system and community-based alternatives to traditional incarceration, all of which are designed to stem the incidence of juvenile crime and the extremely high incidence of recidivism among juveniles.

Its purpose is to improve the quality of juvenile justice in the United States—not to provide a Federal solution, but rather to encourage local initiatives and to provide some of the resources necessary local member leaders to do the job.

All too frequently, when a child gets into trouble, he or she receives little support from parents and the community. Many status offenders become criminal offenders because they have in effect been abandoned, either psychologically and emotionally, or in actual fact by their families and other community institutions which normally provide them the supporting stabilizing influence in a youngster's life.

The 1974 act reflected the consensus of most professionals in the juvenile delinquency field, as well as other concerned citizens, that far too many juveniles are locked up. Many of the youths detained and incarcerated—particularly those whose conduct would not be illegal if they were adults—require, at most, temporary placement and guidance—not jail.

The Juvenile Justice Amendments of 1977, which extended the 1974 act for 3 years, contained an amendment I sponsored to fund special emphasis and treatment programs relating to learning disabilities and juvenile delinquency. Further, the act provides that persons with special experience in learning disabilities are eligible for membership on the Presidentially appointed National Advisory Committee. In addition, the act provides for participation on the State advisory groups by youth workers involved with alternative youth programs, as well as persons with special experience dealing with the problems of school violence and vandalism and learning disabilities.

Presently, the ACLD has a grant under the Juvenile Justice Act from the Office of Juvenile Justice and Delinquency Prevention, Department of Justice. This grant was issued to study the correlation between learning disabilities and juvenile delinquency at grant sites in Phoenix, Ariz.; Indianapolis, Ind., and Baltimore, Md.

Mr. President, I hope that you and my colleagues will join me in heartily congratulating Senator BAYH on his receipt of the ACLD commendation for his leadership in the area of juvenile justice.●

CHARTER FOR THE SOLAR ENERGY RESEARCH INSTITUTE

● Mr. HART. Mr. President, the Solar Energy Research Institute (SERI) was created by an amendment offered by the late Senator Humphrey to the Solar Heating and Cooling Demonstration Act of 1974. It is the most important symbol of the Nation's commitment to the early realization of this important energy alternative.

After 2 years of highly competitive bidding, Golden, Colo., was selected last year by the Energy Research and Development Administration (ERDA) as the site of the national SERI facility. Additionally, ERDA stated at this time its intention to establish four regional solar centers which would work with SERI to encourage the widespread use of solar energy.

In the year since ERDA's announcement, there has been significant confusion regarding the management relationship and respective program responsibilities of SERI and its associated regional solar centers. The inability of Congress and ERDA's successor agency, the Department of Energy (DOE), to resolve these issues has retarded the growth of SERI and the regional centers, and, more importantly, the effectiveness of the Federal solar effort.

Mr. President, I am pleased to announce today that the Department of Energy has devised a charter which will establish a rational and efficient working relationship between SERI and the regional solar centers. SERI will be

DOE's lead institution in research, development, and demonstration of the various solar technologies. Additionally, SERI will be responsible for national commercialization efforts, including market analysis and the assessment of institutional barriers to the introduction of solar technologies on a national and international basis.

The regional solar centers will be DOE's lead institutions in the commercialization of solar technologies in their respective regions. With the concurrence of SERI, the regional solar centers will also undertake solar research and development projects which address regional needs and are not duplicative of research conducted by SERI.

Mr. President, I am confident that this charter will permit SERI and the regional solar centers to get on with the important business of developing solar energy, and I am hopeful that the Congress will support them in this task.

Mr. President, I submit the charter defining the responsibilities of SERI and the regional solar centers to be printed in the RECORD.

A copy of the charter follows:

CHARTER

To amplify upon the assigned responsibilities for the National SERI and the Regional Solar Centers, the charter for their missions is as follows:

NATIONAL SERI

As its primary mission, National SERI shall function as the DOE's lead institution with regard to solar research, development and demonstration activities. In this capacity, National SERI will be responsible for undertaking the principal responsibility for the management and performance of assigned solar R&D programs and projects; planning support to Energy Technology in the development of national solar energy policies, program plans and strategies; and the major role for international solar technology programs. SERI shall also maintain capability for market analysis and assessment of institutional barriers to the introduction of solar technology on a national and international basis.

In keeping with their national RD&D responsibilities, it is incumbent that National SERI assure: (a) that duplicative activities are identified for resolution by the Assistant Secretaries and the Oversight Committee of the R&D Council the Secretary has established; and (b) that local or regional R&D carried out by the regional solar centers is consistent with national planning. In so doing, these activities should "pass through" SERI prior to Headquarters approval for management review of mission compatibility and correlation with national R&D strategies, etc.

In carrying out its assigned responsibilities, and within the framework of DoE policies and programs, National SERI may interact with foreign governmental and non-governmental entities, Executive Branch departments and agencies, regional, State and local governmental enties, the private sector, and the university community.

REGIONAL SOLAR CENTERS

In carrying out their primary mission, the regional solar centers shall be responsible, within their respective regions, as DoE's lead institutions related to the regional commercialization of solar technologies and conservation integral to solar applications. Assignments to carry out these missions will be under the cognizance of the Assistant Secretary for Conservation and Solar Applications. In addition, the regional solar centers can undertake solar R&D projects in support of DoE; such projects should pass to the regional solar centers through SERI.

In carrying out their assigned responsibilities, and within DoE's policies, the regional centers may interact with Executive Branch departments and agencies, regional, State and local governmental entities, the private sector and the university community.●

MINORITY BUSINESS DEVELOPMENT AND ASSISTANCE ACT OF 1977

● Mr. DOLE. Mr. President, today I ask unanimous consent that the Senator from Arizona, Mr. DECONCINI and the Senator from New Mexico, Mr. DOMENICI, be added as cosponsors to my legislation S. 927. S. 927 would establish a minority Business Development and Assistance Administration in the Department of Commerce for the purpose of improving Federal assistance to minority business enterprises.

These additional cosponsors are an indication of the interest in Congress to begin solving the problems in present minority business programs. At this time I also wish to announce that I have again asked the Senate Governmental Affairs Committee to hold hearings on S. 927. These hearings will be the first step toward passage of this much needed legislation.

The PRESIDING OFFICER. Without objection, it is so ordered.

THE APPROACH HAS WORKED

Mr. DOLE. The last few years have witnessed a tremendous increase in the amount of Federal money specifically earmarked for minority business. In 1969 when the Office of Minority Business Enterprise was created by Executive order, total Federal expenditures for minority business development, including both grants and procurement contracts, was $212 million a year. By fiscal year 1975, this figure had jumped to over $1.2 billion. The number of minority-owned firms increased 19 percent between 1969 and 1972 alone.

This expansion in minority business operations occurred partially because of a growing Government interest in minority business, but it could not and would not have occurred without the efforts of minority entrepreneurs across the country. The growing number of minority businessmen and women who are qualified and able to compete for Government contracts have made the increase in contract business inevitable.

This is the process which OMBE was designed to promote. The underlying rationale of OMBE's effort is that minority businessmen can compete equally when given an equal opportunity. One of the most important steps this country can take to insure equal opportunity for its hispanic, black and other minority citizens is to involve them in the mainstream of our free entreprise system. The Federal Government has a duty to not only remove the barriers that restrict minority business development, but also provide a little added help—a few additional opportunities—to encourage minority business expansion.

Since 1969, OMBE has been providing this added assistance. While the results have been encouraging, shortcomings have also been confronted. The present status of OMBE creates special problems which only legislation can solve. S. 927 provides those solutions.

PRIME ADVANTAGE OF S. 927

The Minority Business Development and Assistance Act retains the operational structure of OMBE but mandates its existence by law. Until now OMBE has existed on the basis of a Presidential Executive order. That order could be revoked at any time without any congressional opportunity to disapprove. If a President decided to change the focus of Fedreal minority business programs, those individuals relying on OMBE could be left deserted. Also, a statutory basis gives a firmer operational base for making long range plans.

Yet adoption of S. 927 would not necessitate any disruptive reorganization of the program. The needed services to the minority business community would not be interfered with during any transition stage.

S. 927 does make some improvements in the operating authority of the Minority Business Development and Assistance Administration as compared to OMBE. The MBDAA could provide essential legal services to its clients which OMBE cannot. The new Assistant Secretary of Commerce for Minority Business Development and Assistance would have the clear-cut authority to make grants for technical and management assistance to clients. Also, the MBDAA, unlike OMBE, can provide tuition to socially or economically disadvantaged individuals in connection with training for establishment and operation of new and existing businesses.

In the past few years, OMBE has been forced to operate with a budget that has not kept pace with increasing costs. My bill authorizes $100 million for each fiscal year. This figure is nearly twice OMBE's present budget.

S. 927: MINORITY BUSINESS OPPORTUNITY

This bill is neither complex nor extravagant. It provides basic programs aimed at expanding minority business opportunities. The key as far as the Government is concerned is opportunities. The rest is up to minority businessmen. Opportunity to begin on an equal footing with other businessmen is all that the Government can give. The ultimate fate of each new business depends primarily on the owner of that business. It depends on whether he can offer a product or service that the community wants, whether he can do what is necessary to compete profitably in a free market.

A large amount of controversy has surrounded recent Government efforts to guarantee a portion of Government contracts to minority business. When programs such as the MBDAA are finally successful, guarantees to minority busi-

nessmen will no longer be necessary. While that day will not come soon, I share the conviction of all successful minority businessmen that it will surely come. Adoption of S. 927 will hasten the arrival of the self-sufficiency of the minority business community.

The ultimate is not Government guarantees of anything. A Government program big enough to guarantee success would be so big that it would necessarily restrict the freedoms of the businessmen it "helps." A Government big enough to provide everything must also take back nearly everything in taxes to pay for what it is doing. Minority businessmen are often the ones most hurt by tax increases in the workers' compensation program, the social security system, the energy system, and every other tax increase adopted by this Congress.

We must remember that there are few things the Government can do that private initiative cannot do better. Yet I do better. Yet I do not want to give the impression that there is no proper problem-solving role for the Federal Government. The Government must be responsive to the people and special problems of groups in our society. But Government must not direct people's lives but rather give them the opportunity to achieve their own goals and make their own decisions. The important issues are not the quantity of Federal programs but the quality of those programs.

I believe that S. 927 is the right kind of program. It opens doors, but does not dictate which pathway to follow. It provides opportunity, but does not prescribe a course of action. It does not assure success or even partial success. But neither does it limit in any way the potential available to an industrious business man of woman. It relies on people and our free enterprise system, not Government, for answers. With this type of Government assistance, I am certain that potential minority businessmen will continue on the path charted by those who have been successful in the past.

I submit the letter written to Senator RIBICOFF and the text of S. 927 for the RECORD.

The letter and bill are as follows:

U.S. SENATE,
Washington, D.C., March 16, 1978.

HON. ABRAHAM A. RIBICOFF,
Chairman, Senate Governmental Affairs Committee, Dirksen Senate Office Building, Washington, D.C.

DEAR ABE: On March 7, 1977, I introduced S. 927 to improve the functioning of the Office of Minority Business Enterprise. At that time, I requested that the Governmental Affairs Committee begin consideration of S. 927.

Because of the continued interest expressed, I wish to renew my request for hearings on S. 927 and want to offer my assistance to the Committee in any way that I can to help in conducting these hearings.

S. 927 would make needed improvements in the structure of OMBE without disturbing those aspects of the organization which have proven successful. OMBE now exists at the discretion of the President. My legislation would make this organization responsible to Congress and Congress responsible for its work. S. 927 would also eliminate some internal weaknesses in the structure of OMBE which have hampered it in the past.

While I realize the schedule of the Committee is heavy, I believe that the problems of the minority business community are of such a serious nature that Congressional action must be taken this session. Therefore, I respectfully request that the Governmental Affairs Committee or the Subcommittee on Intergovernmental Relations convene hearings on S. 927 at your earliest convenience.

Sincerely yours,

BOB DOLE,
U.S. Senator.

S. 927

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Minority Business Development and Assistance Act of 1977".

FINDINGS AND PURPOSES

SEC. 2. (a) The Congress finds and declares that—

(1) social and economic justice is best achieved through the American private enterprise system;

(2) socially and economically disadvantaged individuals have not developed their potential because they are unable to participate fully in the American free enterprise system;

(3) the strength of the American free enterprise system lies in allowing all Americans an opportunity to participate freely and fully in such system; and

(4) The Nation can no longer afford the economic and human waste that occurs when Americans fail to realize their potential.

(b) The purpose of this Act is to create a Minority Business Development and Development and Assistance Administration in the Department of Commerce to promote a strategy of minority business development and expanded ownership, including complete provision of technical and management assistance; within the Administration whenever feasible pursuant to the finds of subsection (a).

DEFINITIONS

SEC. 3. For purposes of this Act the term—

(1) "Administration" means the Minority Business Development and Assistance Administration;

(2) "Assistant Secretary" means the Assistant Secretary of Commerce for Minority Business Development and Assistance;

(3) "Council" means the Advisory Council for Minority Enterprise;

(4) "minority business enterprise" means any business association owned or controlled by one or more members of any cultural, racial, or economic minority of the United States, including but not limited to Blacks, Spanish-speaking Americans, Asian Americans, American Indians, Eskimos, and Aleuts;

(5) "Secretary" means the Secretary of Commerce; and

(6) "State" means a State of the United States. and the District of Columbia, the Commonwealth of Puerto Rico. and any other territory or possession of the United States.

ESTABLISHMENT

SEC. 4. (a) A Minority Business Development and Assistance Administration is established within the Department of Commerce. The Administration is headed by an Assistant Secretary of Commerce for Minority Business Development and Assistance.

(b)(1) The Assistant Secretary of Commerce for Minority Business Development and Assistance shall be appointed by the President, by and with the advice and consent of the Senate, and shall receive compensation at the rate prescribed by law for Assistant Secretaries of Commerce.

(2) The functions of the Secretary under this Act shall be administered through the Administration.

(c) Section 5315 of title 5, United States Code, is amended by striking "(6)." after "(12) Assistant Secretaries of Commerce" and by inserting in lieu thereof "(7), one of whom shall be an Assistant Secretary of Commerce for Minority Business Development and Assistance.".

FUNCTIONS

SEC. 6. (a) The Secretary shall—

(1) establish goals for other Federal departments and agencies which may affect the establishment, preservation, and strengthening of minority business enterprises, and evaluate the compliance of such departments and agencies with such goals;

(2) promote the mobilization of activities and resources of State and local governments, businesses and trade associations, universities, foundations, professional organizations, and volunteer and other groups towards the growth of minority business enterprises;

(3) facilitate the coordination of the efforts of minority business enterprises with those of Federal departments and agencies;

(4) establish a center for the development, collection, summarization, and dissemination of information that will be useful to persons and organizations throughout the nation in undertaking or promoting the establishment and successful operation of minority business enterprises;

(5) review all proposed training and technical assistance activities with respect to minority business enterprises conducted by Federal departments and agencies in order to attain consistency and eliminate duplication in such activities;

(6) convene meetings of employees of such Federal departments and agencies to facilitate the coordination of the efforts of Federal departments and agencies under this Act;

(7) convene business leaders, educators, and other representatives of the private sector engaged in assisting the development of minority business enterprise in order to propose, evaluate, and coordinate governmental and private activities in furtherance of the purposes of this Act; and

(8) design methods for identifying and locating individuals who may participate in the owniership of minority business enterprises and for educating such individuals in various forms of such ownership.

(b)(1) The provisions of Executive Order 11625, October 13, 1971 (36 Fed. Reg. 19967) relating to the functions of the Secretary under this Act are void.

(2) There are transferred to the Secretary, and the Secretary shall perform, such other functions as the Director of the Office of Management and Budget determines relate primarily to the functions of the Secretary under this Act.

TECHNICAL AND MANAGEMENT ASSISTANCE

SEC. 7. The Secretary is authorized to extend financial assistance to, and negotiate and make any contract with, any person or any department or agency of the United States or of any State or with any political subdivision of any State for purposes of—

(1) providing management and technical assistance to minority business enterprise, including but not limited to—

(A) assistance for planning and research, including feasibility studies and market research;

(B) identifying and developing new business opportunities; and

(C) providing services useful to minority business enterprises, including business counseling, management training, and legal services, and emphasizing—

(i) the development of such services using the resources of the business and academic communities; and

(ii) the provision of such services in sufficient scope and duration to develop entrepreneurial and managerial self-sufficiency;

(2) developing community support for minority business enterprises by—

(A) establishing and strengthening business service agencies, including trade or professional associations and cooperatives;

(B) encouraging the making of contracts and subcontracts with any minority business enterprise, including providing incentives and other assistance to any person who assists in the training of minority businessmen; and

(C) furnishing economic feasibility information and other services to any financial organization in connection with applications for financial assistance submitted by any minority business enterprise or in connection with the creation of such enterprise;

(3) conducting pilot or demonstration projects designed to overcome the special problems of minority business enterprises or otherwise to further the purposes of this Act; and

(4) providing tuition and other assistance to any socially or economically disadvantaged individual for the development of skills relating to any aspect of business management.

RESPONSIBILITIES OF FEDERAL DEPARTMENTS AND AGENCIES

SEC. 8. (a) The head of each Federal department or agency, or a representative designated by him, shall—

(1) when requested by the Secretary, and to the extent permitted by law, furnish information and assistance, including an evaluation of such department or agency's compliance with the published goals of the Administration, for carrying out the purposes of this Act; and

(2) keep the Secretary informed of all proposed budgets, plans, and programs of such department or agency affecting minority business enterprise.

(b) The head of each Federal department or agency shall, when requested by the Secretary, designate an Under Secretary or other senior official of such department or agency to have primary and continuing responsibility for the participation and cooperation of such department or agency in matters concerning minority business enterprise and activities as required by this Act.

ADVISORY COUNCIL FOR MINORITY ENTERPRISE

SEC. 9. (a)(1) There is established the Advisory Council for Minority Enterprise.

(2) The Council shall consist of 10 members appointed by the President, by and with the advice and consent of the Senate, from among representatives from minority business enterprises and other members of minority groups knowledgeable in the field of minority business enterprises.

(3) The members of the Council shall be appointed within 30 days after the effective date of this Act.

(4) The President shall select a Chairman from among the members of the Council.

(5) A majority of the members of the Council shall constitute a quorum for the transaction of business, but a lesser number may conduct hearings. A vacancy in the membership of the Council shall not affect the authority of the remaining members to execute the functions of the council and shall be filled in the same manner as the original appointment.

(6)(A) The terms of members of the Council shall be 2 years.

(B) A vacancy caused by the death, resignation, or removal of a member before the expiration of the term for which he was appointed shall be filled only for the remainder of such unexpired term. Upon the expiration of his term of office a member of the Council shall continue to serve until his successor is appointed and shall have qualified.

(b) The Council shall advise the Secretary when so directed on—

(1) economic and social developments which affect minority business enterprise;

(2) plans, programs and activities in the public and private sector which relate to minority business enterprise; and

(3) any other problems and matters relating to minority business enterprises and any measures by which to better achieve the purposes of this Act.

(c) A member of the Council, while attending meetings of the Council or otherwise engaged in the business of the Council, shall be entitled to receive compensation at a rate fixed by the Secretary, but not to exceed the rate specified at the time of such service for grade GS–18 in section 5332 of title 5, United States Code, including travel-time, and while so serving on the business of the Council away from home or regular place of business, he may be allowed travel expenses, including per diem in lieu of subsistence, as authorized by section 5703 of title 5, United States Code, for a person employed intermittently in the Government service.

(d) The Secretary shall—

(1) provide the Council with whatever administrative support is necessary, including the use of any gift or bequest accepted by the Department of Commerce pursuant to law; and

(2) call meetings of the Council.

(e) The Council shall cease to exist two years after the date of the appointment of a majority of the Council members. Before the Council ceases to exist, if the Secretary determines in writing that the Council has continuing usefulness, the Council shall continue for a period of two years from the date of expiration.

ANNUAL REPORT

SEC. 9. The Secretary shall prepare and submit as a part of the annual report of the Department of Commerce a report of his activities under this Act.

AUTHORIZATION OF APPROPRIATIONS

SEC. 10. There are authorized to be appropriated in each fiscal year the sum of $100,000,000, and such other sums as may be necessary to carry out the provisions of this Act.

MERIT SELECTION FOR FEDERAL JUDGES

● Mr. DECONCINI. Mr. President, recently one of our distinguished former colleagues, Senator Joseph Tydings, presented a speech on the advisability of merit selection for Federal judges. Senator Tydings' work while chairman of the Subcommittee on Improvements in Judicial Machinery from 1965 to 1970, together with his years of excellent service in the U.S. Senate, has shown him to be a dedicated public servant and an outstanding legal scholar. Senator Tydings' speech contains a legal expertise that is invaluable to all of us and can help provide us with greater insight into the complex contemporary issue of merit selection. Therefore, Mr. President, I submit a copy of Senator Tydings' statement be printed in the RECORD.

The speech is as follows:

MERIT SELECTION COMMISSIONS FOR FEDERAL JUDGES A PRACTICAL APPROACH

Merit selection of judges is a concept which I have supported since my days as a member of the Niles Commission to provide a Missouri plan in Maryland. I was able to include merit selection of all D.C. Superior Court judges as a part of the D.C. Court Reorganization Plan which I authored. I chaired President Carter's task force on judicial machinery during the transition period, which recommended the inception of merit selection plans for the Federal Judiciary. And, I have been most fortunate to participate in the first national steps toward merit selection of federal jurists in my capacity as chairman of the Presidential commission which selects the panel nominees for federal judges for the District and U.S. Circuit Court of the District of Columbia.

I might add that President Carter was receptive to merit selection since he had instituted a similar plan for the Georgia state judiciary while Governor. Moreover, Attorney General Bell was a member of our transition task force on judicial machinery, and his proclivity for merit selection was very evident during his confirmation hearings before the U.S. Senate.

As I am sure you all know, merit selection of judges began formally with the adoption of a plan by the State of Missouri in 1940. For obvious political reasons, Missouri's sister states were slow to follow, and it wasn't until the late 60's that the "Missouri Plan" began to catch on. Today there are state judiciary merit selection plans of varying degrees of effectiveness in 28 states, including, of course, our own state, as well as the District of Columbia, Guam, and Puerto Rico.

In the federal arena, there has been less enthusiasm for merit selection. Nomination of U.S. District judges is the traditional sole preserve of the U.S. Senate. It was not until 1974 that the first plan was instituted—that one by Florida Senators Richard Stone and Lawton Chiles. Since then, Senators from 13 other states have established formal procedures for merit selection of U.S. District Court judges. All of these plans have been voluntarily established by the participating senators of the several states.

As of the date of President Carter's Executive Order establishing Merit Selection Panels, senators no longer have jurisdiction and control in the selection of Circuit Court judges. President Carter appointed 13 commissions around the country—one commission for each of eight of the circuits as well as the District of Columbia: two commissions each for the fifth and ninth circuits. The Commission in the District of Columbia is the only such panel which also selects a panel of nominees for the U.S. District Court.

There was little senatorial opposition to the creation of the Circuit Court merit selection commissions since patronage in Circuit Court appointments has never been the sole prerogative of U.S. Senators.

District Court judges, however, are viewed with a highly proprietary prospective. Senators traditionally have had domain over District Court benches in their states, and the federal judgeship is the most prestigious office a senator can offer a loyal supporter. It is considered the ultimate patronage plum.

The present patronage or "green bag" system works rather simply:

(1) The senator or senators from the state involved, if of the President's party, suggest his candidate or candidates for the bench to the attorney general and the President. (If the state has no senator of the President's party, the suggestions come from the congressional delegation or other political allies of the President.)

(2) The Department of Justice does a limited amount of screening for competence, and the FBI conducts a background check.

(3) The 12-member ABA Committee on the Federal Judiciary investigates and reports on the qualifications of the nominee in confidence to the Attorney General.

(4) In most instances, the Attorney General then submits the senatorial nominee to the Senate for confirmation.

(5) The Senate Judiciary Committee holds a hearing if the senators from the nominee's state have returned their blue slips indicating approval. The power of any senator from a nominee's state to kill a judicial nomination lies in his discretionary return of the blue slip. As long as Jim Eastland is Chairman, the Senate Judiciary Committee will not hold hearings until the slip is returned by his senators.

The present system, for the most part, has worked well over the years, producing a sound judiciary with some balance of input from the legislative and executive branches. It has produced, however, a number of totally unfit Federal judges.

The merit selection procedure response is fundamentally sounder from the standpoint of judicial excellence, as well as practical politics.

The pending omnibus judgeship bill, S. 11, will create more than 100 new Federal judgeships. Unless an individual senator has been an active practitioner of the law, personally knowledgeable with respect to the capabilities of competing nominees, he and his staff will have to devote a tremendous amount of time to screening qualified candidates and evaluating them. Moreover, the train of "political IOU collectors," campaign contributors, etc., will start to appear at the senator's door in ever increasing numbers reminding him of services rendered in past campaigns, etc. For every person nominated, a senator makes one friend and countless enemies.

A senator with a Merit Selection Panel need not absent himself entirely from the process. He may make the final recommendation to the President from a list of five names given to him by his panel. There is no logical reason why he and his staff should screen every application or make himself available to the continuing political pressures; this work can be done with far greater efficacy and much greater objectivity by a Merit Selection Panel.

I would like to report to you some of the real advantages in merit selection, as I have seen them "in action".

Aggressive recruitment of outstanding talent to the Federal bench is a very real advantage.

When our commission began work on selecting the nominees to fill the vacancies left by the retirement of Judges Sirica and Corcoran, we not only advertised in the local legal periodicals, but the Chairman wrote a personal letter soliciting nominations to every law firm with more than three lawyers, to every law school, bar association, consumer groups, civic organizations, community groups, etc. We received about ninety nominations. To every prospective nominee we mailed a rather detailed questionnaire which we prepared. Over sixty persons returned our questionnaire, and the responses in some cases ran to over forty pages. From this group, we began our investigations, committee meetings and full day commission meetings to select twelve candidates for a personal interview. On the basis of all our deliberations, including the personal interviews, we selected seven nominees to send to the President. Two people on that final list were total strangers to me. I had never heard of them prior to our work. Moreover, they both told members of the panel that they nearly hadn't applied because, in their words, they had no "political" connections. The fact is that they are both exceptionally well qualified in my judgment, and would make superb judges.

Merit selection thus opens the door to persons who should be considered, but generally aren't in the present system because they lack political ties or legal "clout".

Merit selection as it is publicized gives greater confidence to the general public in the integrity of the judicial process. The openness and objectivity of this selection process, judgment on merit alone, goes a long way towards strengthening citizen support of our judicial system.

A senator operating, as I once did, within the limitations of the traditional selection process, is never able to totally dispel the aura of patronage and party loyalty. A senator cannot have the entree into as many areas of the community as a well-chosen merit plan. Moreover, a senator would benefit from just knowing about these talented people. If they are not ultimately selected for the bench, they certainly could serve in some other capacity.

Another major attraction of merit selection is the diversity it will bring to the bench without a loss in quality. A well-balanced merit selection committee reflecting the citizenry of a state will make certain that all qualified lawyers are considered.

(1) Seven of our eleven member commission are lawyers, five with extensive trial experience. Among them are myself, a securities lawyer, a criminal lawyer, a labor lawyer, professor at Georgetown Law School, a former solicitor general and Dean of Harvard Law School, and a Jack—or in this case—a Jacqueline of all trades. Among the lay members are a vice president of a university, the Executive Director of the Urban League, the assistant superintendent of schools in Maryland and the founding partner of a respected securities brokerage firm.

(2) The male/female ratio is six to five.

(3) Six members of the panel are black, while five are white.

Such diversity on the panels will put an end to the days when a successful senior white male partner of one of the cities' leading law firms could practically write his ticket to the bench, provided he was of the right political persuasion and had made appropriate contributions. Each panelist, while adhering to objective standards of excellence, will naturally want to see a judge from his or her race of sex, or his or her legal background, given the same consideration as the senior partners of the "establishment", "blue ribbon" law firms.

Our panel is not alone in the diversity of its composition. The Kentucky federal merit selection panel includes a minister and a newspaper editor. A farmer and a housewife sit on the panel which selects federal judges in Iowa. In fact, many of the Senate's voluntary panels have one short of a majority of lay members.

With the judges in Boston having run the school system, and the judges in Alabama in charge of the prisons, it is becoming increasingly apparent that citizens other than lawyers should have some input in deciding which lawyers or judges should be considered for elevation to the Federal bench. Administrative capabilities, a sensitivity toward community problems and willingness to make prompt decisions are becoming traits as important as an ability to write long and learned opinions.

I have not found the lay people of our panel deficient in any aspect of evaluation of candidates. Moreover, they are often unimpressed with the unanimity of lawyer members that John or Jane Doe is a "lawyer's lawyer", and are somehow innately superior. It has become as important in our panel to know about the candidates' work in civil rights, neighborhood legal services programs and their work on behalf of their community.

This diversity, as I said earlier, has not resulted in any lack of emphasis on a candidate's legal excellence. Most of the panels have a majority of lawyers as ours did. The Colorado, Indiana, Iowa, Kentucky, Florida and Ohio panels have seats reserved for representatives chosen by the state bar.

I might add that while I urge senators, including Paul Sarbanes, to adopt a merit selection system for their states, I would not like to see the Administration appoint the panels and establish the procedures as it has done on the circuit court level.

There can and should be flexibility among the various plans. An example of this is the question of the senators' involvement in the selection process. Senator Bayh's panel sends five names to him, from which he selects one to send on to the White House. The Florida senators operate similarly. On the other hand, the senators from Kentucky, Iowa, Colorado, and Senator Byrd of Virginia, absent themselves completely by sending all names to the President and giving him the final say.

Senator Bayh has a separate panel for each district in Indiana; Senators Cranston and Hayakawa have one for the entire State of California.

Each Senator should be able to fashion the panels as he (or she, now that Mrs. Humphrey has become a senator) sees fit, as long as the basic goal remains unchanged.

Let me conclude by saying that I see the adoption of merit selection plans as good politics, and therefore, inevitable. An open process which produces top quality candidates and which eliminates the unfit will become something the voters will demand of their senators. As the Judiciary becomes more involved in voters lives, the voters will want to know who it is making those decisions and how he or she got there.

SENATE JOINT RESOLUTION 124—TO DESIGNATE APRIL 16–22, 1978, NATIONAL OCEANS WEEK

Mr. STEVENS. Mr. President, I send to the desk a joint resolution and ask for its immediate consideration.

The PRESIDING OFFICER. The joint resolution will be stated by title.

The assistant legislative clerk read as follows:

A joint resolution (S.J. Res. 124) to authorize the President to issue a proclamation designating the week beginning on April 16 through April 22, 1978, as "National Oceans Week".

Mr. STEVENS. Mr. President, I wish to give special thanks to the chairman of the Judiciary Committee, Senator EASTLAND, and the ranking Republican on that committee, Senator THURMOND.

We have cleared this resolution with the distinguished majority leader and minority leader.

It is necessary for us to expedite consideration of this because the proclamation that would be issued pursuant to the resolution would affect the week of April 16 through April 22. There have been serious plans made for National Oceans Week by the American Oceanic Organization.

I am privileged to have as cosponsors of this resolution the Senator from Massachusetts, Senator KENNEDY, the Senator from Washington, Senator

MAGNUSON, and the Senator from South Carolina, Senator HOLLINGS.

We have worked together trying to get greater recognition to the problems of the oceans, and we are joined by a number of our colleagues on the House side who would like to have the President issue the proclamation to bring about National Oceans Week.

I ask that the resolution be considered at this time.

The PRESIDING OFFICER. Without objection, the Senate will proceed to its immediate consideration and, without objection, the joint resolution will be considered to have been read the second time at length.

The joint resolution (S.J. Res. 124) was ordered to be engrossed for a third reading, was read the third time, and passed.

The preamble was agreed to.

The joint resolution, with its preamble, reads as follows:

S.J. RES. 124

Whereas the oceans are playing an increasingly important role in the food, energy, and mineral production of the United States as well as the transportation of United States goods; and

Whereas it will be beneficial for the American public to learn of the interrelationship of the United States and the world's oceans; and

Whereas the declaration of a National Oceans Week would help Americans learn about the importance of the oceans: Therefore be it

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That the President of the United States is authorized and requested to issue a proclamation designating the week of April 16 through April 22, 1978, as "National Oceans Week" and calling upon the people of the United States to observe such same week with appropriate activities.

The PRESIDING OFFICER. Is there further morning business?

Mr. STEVENS. I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

REQUEST TO HOLD H.R. 50 AT THE DESK

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that a message from the House of Representatives on H.R. 50, the Full Employment and Balanced Growth Act of 1978, be held at the desk pending further disposition.

Mr. ALLEN. Mr. President, reserving the right to object, and I do not plan to object, will the distinguished majority leader tell us the nature of the resolution?

Mr. ROBERT C. BYRD. I believe this is the Humphrey-Hawkins bill.

Mr. ALLEN. I believe I will object.

The PRESIDING OFFICER. Objection is heard.

NATIONAL FALLEN HEROES MEMORIAL SUNDAY

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the Senate proceed to the consideration of Calendar Order No. 642.

The PRESIDING OFFICER. The joint resolution will be stated by title.

The assistant legislative clerk read as follows:

A joint resolution (S.J. Res. 101) to authorize the President to issue a proclamation designating the Sunday following Fire Service Recognition Day as Memorial Sunday for firefighters who have been disabled or killed in the line of duty during the preceding year.

The PRESIDING OFFICER. Is there objection to the present consideration of the joint resolution?

There being no objection, the Senate proceeded to consider the joint resolution which had been reported from the Committee on the Judiciary with an amendment to strike all after the resolving clause and insert the following:

Resolved by the Senate and the House of Representatives of the United States of America in Congress assembled,

That the President is authorized and requested to issue a proclamation designating the third Sunday in May, 1979, as National Fallen Heroes Memorial Sunday for firefighters and law enforcement officers who have been disabled or killed in the line of duty and calling upon the people of the United States and interested groups and organizations to observe such day with appropriate ceremonies and activities.

SEC. 2. The President is authorized and requested to include in the proclamation issued under the first section a provision calling upon Government officials to display the United States flag at half-staff on all Government buildings, and the people of the United States to display the flag at half-staff at their homes or other suitable places.

The amendment was agreed to.

The joint resolution was ordered to be engrossed for a third reading, was read the third time, and passed.

The preamble was amended so as to read:

Whereas courageous men and women have protected the lives and dreams of their neighbors from the ravages of fire since the beginning of civilization; and,

Whereas men and women have protected the lives and dreams of their neighbors from the ravages of crime; and,

Whereas many of these men and women have made the ultimate expression of love for their neighbors by laying down their lives; and,

Whereas some of these courageous men and women have suffered permanent disability; and,

Whereas numerous churches of many denominations have indicated a desire to participate in a designated memorial Sunday honoring these consecrated men and women for their ultimate sacrifices for their fellow men; and,

Whereas it is appropriate to commemorate the sacrifices of brave citizens by setting aside a day in their honor and by displaying the United States Flag at half-staff; Now, therefore, be it

The title was amended so as to read:

To authorize and request the President to issue a proclamation designating the third Sunday in May, 1979 as National Fallen Heroes Memorial Sunday for firefighters and law enforcement officers who have been disabled and killed in the line of duty.

Mr. ROBERT C. BYRD. Mr. President, I move to reconsider the vote by which the joint resolution was agreed to.

Mr. BAKER. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

ORDER TO HOLD H.R. 50 AT THE DESK

Mr. ROBERT C. BYRD. Mr. President, I repeat my unanimous-consent request with respect to H.R. 50, the Full Employment and Balance Growth Act of 1978, that it be held at the desk pending further disposition.

The PRESIDING OFFICER. Is there objection?

Mr. ALLEN. Mr. President, reserving the right to object, and I shall not object if I understand the distinguished majority leader the purpose of holding it at the desk would be to allow the various committees that might have a claim on its jurisdiction to get together and decide how it will be handled by the committees.

Mr. ROBERT C. BYRD. Yes.

Mr. ALLEN. I have no objection.

Mr. BAKER. Mr. President, reserving the right to object, I might say that that procedure was cleared on this side of the aisle. We have no objection to proceeding in that manner as well.

The PRESIDING OFFICER. Without objection, it is so ordered.

SENATOR PAUL LAXALT

Mr. LEAHY. Mr. President, in November 1974 Senator PAUL LAXALT and I were both elected to the Senate. We have known each other since we arrived here and have become quite good friends. We vote in alphabetical order with each other, although there are those who have noted that on occasions we do vote somewhat differently, a matter of some consternation among the people who tally the votes with LAXALT and LEAHY arriving together during the rollcall and we both vote the same—I might add, to the shock of each other when that occurs, feeling that either one or the other of us has suddenly seen the light or one or the other of us have made a mistake.

I have found Senator LAXALT to be unfailingly courteous during that time. It has been a privilege both for myself and my wife to know Senator and Mrs. Laxalt. We have enjoyed living near them in The Plains, Va.

I was pleased to see two articles about them by three of my favorite columnists, Germond and Witcover, and Mary McCrory. Mr. President, I ask unanimous consent that both articles be printed in the RECORD at this time because I think both have very clearly captured Senator LAXALT, the man who has friends certainly on both sides of the aisle, and a

man who has friends among all ideologies represented here in the Senate.

There being no objection, the articles were ordered to be printed in the Record, as follows:

IN COMBATING THE PANAMA CANAL TREATIES, LAXALT GAVE CONSERVATISM A GOOD NAME

(By Jack W. Germond and Jules Witcover)

Attila the Hun would have been disappointed in Paul Laxalt, the leader of the Senate opposition to the Panama Canal treaties.

It was not just that Laxalt lost on the first treaty, but the way he played the game. On a raw-meat issue many conservatives would have run over their grandmothers to win, Laxalt was a pussycat. Tenacious, thorough, determined, but nonetheless a pussycat who refused to use a meat-ax on colleagues who wouldn't go along with him. And in the process, he did as much as anyone has done lately to give conservatism a good name.

For all the emotionalism involved and the intense constituency pressure on senators, for all the macho talk of America becoming a second-class power if it gave away the canal, Laxalt waged the battle with class and decorum. He lobbied senators himself and his forces flooded the states of wafflers with radio spots, but to implore, never threaten. If Sen. Tom McIntyre of New Hampshire had a legitimate complaint about right-wing tactics, and he probably did, it was against Gov. Meldrim Thomson and publisher William Loeb, not Paul Laxalt.

The Laxalt style may be an important element in the second round of the canal fight as opponents try to hold their 32 votes and pry two more from the pro-treaty camp. Laxalt contends the neutrality treaty was "the leadership's strongest" and professes to be optimistic about winning on the second test.

The Nevada Republican insists his 32 will hold firm if only because they will be so roundly commended by their constituents when they go home for the Easter recess that they won't be able to switch. And he suggests that in all those soul-searchers on the first go-round, there must be two or more who can be shaken loose by more pressure from home, and by economic arguments on what the Panamanian takeover will cost the American taxpayer.

Laxalt will not name specific targets, but it takes no mind-reader to identify several of them: Dennis DeConcini of Arizona and Paul Hatfield of Montana, Democrats, and Ed Brooke of Massachusetts and H. John Heinz III of Pennsylvania, Republicans. All were hand-wringers on the first treaty vote and Hatfield and Brooke specifically said that vote did not bind them to back the second treaty.

Brooke particularly will hear from the ultra-right that controls his state GOP apparatus, so he faces the profile-in-courage number all over again. A member of the White House inner circle observed before the first vote that Brooke was probably the only senator who could be hurt at home for opposing the treaties, inasmuch as his statewide constituency is regarded as liberal. But in his own party in Massachusetts, he's bound to be in the doghouse now.

Laxalt says he made a mistake in not courting Brooke's vote because he just assumed he would be pro-treaty. But after hearing Brooke's Senate speech announcing support but filled with negative observations, Laxalt was sorry he hadn't tried. "I listened and I found he was with us for the first 27 paragraphs and against us in the 28th," he says.

DeConcini is still considered a possible switcher because, according to Laxalt, constituent pressure on him from Arizona to oppose the treaties has been "as strong as anywhere in the country." Says Laxalt: "What Dennis did in the face of it was gutsy." But the anti-treaty forces plan to step up the pressure by running more radio spots in Arizona, and in the states of other target senators, in the next weeks.

One senator who crumbled without apology was Jennings Randolph of West Virginia. He told Laxalt that he received 310 phone calls in the first hour of his office was open on the day of the first vote—after numerous radio spots in the Mountain State urging voters to phone him. When Randolph approached him to inquire how close the vote was, Laxalt says, he peeked at a make-believe list in his jacket pocket, smiled and said, "Jennings, you're it!" And that was about the maximum cruelty the Nevadan inflicted on anybody.

Another target on the second treaty will be Republican Henry Bellmon of Oklahoma, whose vote for the first treaty was a mild surprise. Laxalt says Bellmon was particularly sensitive to deal with, and will be again. "Henry is independent," he says. "If you apply too much pressure on Henry, you'll lose him." The anti-treaty forces lost him anyway, but Laxalt remains opposed to brass knuckles, on Bellmon or any other colleague. In this rough-and-tumble league, that approach nearly made it in the first round and, if Laxalt has his way, it will be used in the second, win or lose.

IT WAS A LITTLE HARD TO TELL THE WINNERS FROM THE LOSERS

(By Mary McGrory)

It was a little hard, in the first moments after the vote, to tell the winners from the losers. Bobby Byrd and Howard Baker, the leadership team, were patting each other on the back for having given President Carter his first Panama Canal victory.

But Republican Paul Laxalt of Nevada seemed equally, unaccountably elated.

"I'm very optimistic," he enthused, his face flushed with the excitement that usually comes with victory. But the two-vote margin, which brought relief and joy to the White House, had brought him high hopes.

Laxalt, who is one of the pleasantest men in the Senate, had proven that it is possible to wage a campaign on a conservative cause without breaking the furniture. Ronald Reagan's 1976 campaign manager had said nothing irretrievable in the course of the debate, and displayed in his vigorous behind-the-scenes activity a civility that is often absent in discussions of right-wing issues.

He was graciousness itself in defeat, leaped the net to congratulate Byrd and Baker. That was partly because it is his nature, and partly because he thinks next time around—that is, the vote on the second treaty—he'll be the one with the two-vote lead.

"I think it would be difficult for someone to turn around and vote for giving up the canal," he said. "Our 32 votes are firm and solid. They are committed."

He anticipates constituent huzzas for the 32 over the Easter recess. He intends to keep the heat on senators who voted for the first treaty, but who have expressed reservations about the second, people like Edward Brooke of Massachusetts and H.J. Heinz of Pennsylvania.

Brooke was a surprise to Laxalt. The moderate Republican from Massachusetts made a speech the day before the vote and put the case against the treaty in a jingoistic manner worthy of Ronald Reagan. He dwelt on the "debilitating deficiencies" of the document—and said he would vote for it.

"He was with us for 27 paragraphs," Laxalt said. "And we lost him in the 28th."

Brooke was his "mistake," Laxalt said.

"I didn't think Ed was doable," he mused. Nobody could have blamed him. Brooke comes from the most progressive state in the Union and is elected by Democrats. But to get the nomination, he must pass through the needle's eye of a Republican convention run by right-wing ultras, who are crowding him on Panama.

If Brooke was his "mistake," Sen. Henry Bellmon, R-Okla., is his greatest regret. He spent a lot of time with Bellmon, but never could corral him.

"I think he loves to thumb his nose at his constituency," Laxalt said after Bellmon gave thumbs up to Carter. "A man who would come out for busing in Oklahoma is inscrutable. He wouldn't tell us anything, refused a presidential invitation, refused to meet with veterans' groups. Just went his own way."

Laxalt's troops are gearing up for a final offensive. The "Truth Squad" plane will fly again. "Key constituents" (here read "big contributors") are waiting in the wings to pay weighty calls on wobblers. Radio spots will be beamed into doubters' states.

But most senators agree with one of Laxalt's allies, Republican Robert Griffin of Michigan, who said that Carter won the war in the first vote.

Democrats are still puzzled over why the administration did not play its trump card, the split on the right. Carter was handed two rightwing stars, William F. Buckley Jr., and John Wayne. Buckley devastated Reagan in a nationally televised debate. Wayne, despite howls from his fans, stuck to his guns on the treaty. The Duke, clumping through the Senate in his boots and ten-gallon hat, singlehandedly could have routed the American Legion, battered treaty voters say.

But the White House never mentioned their names, to the regret of senators who could have used two strong right arms to lean on. Laxalt was very grateful that they didn't figure in the debate. Neither, surprisingly, did Jimmy Carter.

And something else, which could have more bearing on the final vote than any other factor, was also not mentioned. It was the rising wave that is cresting around the world. Treaty foes argued endlessly that we should not negotiate under threat of terror, but in the back of their minds, even the most militant are tormented by the thought that if the treaty is rejected, Panama will explode.

In 1964, Panamanian nationalists gave violent demonstration of their abhorrence of American occupation. The senators have, in the past week, been afforded grisly examples of what the disaffected can do. The terror in Israel, the counter-terror in Lebanon, the South Moluccan siege in Holland, the kidnapping of Aldo Moro in Rome, these all suggest the range open to the lunatic wing of the politically outraged.

Nobody wants to invite that kind of horror. The senators do not speak of it, but they are fearful of blood on their hands if the treaty fails. It's a worse prospect even than the revenge of the right which awaits them if they opt for a peaceful passage through Panama.

COMMITTEE MEETING

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the Governmental Affairs Committee be authorized to meet during the session of the Senate today, to consider and report out the nomination of the new Director of the Office of Management and Budget.

The PRESIDING OFFICER. Without objection, it is so ordered.

PRIVILEGE OF THE FLOOR FOR TOMORROW

Mr. LEAHY. Mr. President, I ask unanimous consent that Liam Murphy, of my staff, may have the privilege of the floor throughout all debates and votes on agricultural matters tomorrow.

The PRESIDING OFFICER. Without objection, it is so ordered.

ORDER FOR RECESS UNTIL 8:40 A.M. TOMORROW

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that when the Senate completes its business today it stand in recess until 8:40 a.m. tomorrow.

The PRESIDING OFFICER. Without objection, it is so ordered.

ORDER FOR RECOGNITION OF SENATOR ABOUREZK TOMORROW

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that after the prayer tomorrow mornnig Mr. ABOUREZK be recognized for not to exceed 15 minutes.

The PRESIDING OFFICER. Without objection, it is so ordered.

NOMINATIONS

Mr. ROBERT C. BYRD. Mr. President, there are certain nominations that I would ask unanimous consent be disposed of at this time. They are the following: Calendar Orders numbered 96 on page 2 of the Executive Calendar and 97 on page 3 of the Executive Calendar.

Mr. BAKER. Mr. President, reserving the right to object, and I will not object, I merely wish to state to the majority leader that the nominations he identified are clear on this calendar and we have no objection to proceeding with their consideration and confirmation at this time.

Mr. ROBERT C. BYRD. I thank the distinguished minority leader.

NATIONAL TRANSPORTATION SAFETY BOARD

The assistant legislative clerk read the nomination of James B. King, of Massachusetts, to be Chairman of the National Transportation Safety Board for a term of 2 years.

The PRESIDING OFFICER. Without objection, the nomination is considered and confirmed.

LEGAL SERVICES CORPORATION

The assistant legislative clerk read the nominations of Cecilia Denogean Esquer, of Arizona, Steven L. Engelberg, of Maryland, Hillary Diane Rodham, of Arkansas, Richard Allen Trudell, of California, and Josephine Marie Worthy, of Massachusetts, to be members of the Board of Directors of the Legal Services Corporation for a term expiring July 13, 1980.

Mr. HAYAKAWA. Mr. President, when the nominations to the Board of Directors of the Legal Services Corporation were polled in the Human Resources Committee, I did not cast my vote. In this connection, I want to explain today that I have no objections to the polling procedure nor do I object to the nominees. I have, however, serious reservations about the policies of the Legal Services Corporation. In my judgment, they are not in conformity with the intent of Congress when the Corporation was established.

The legal services program is structured in such a manner that its national staff, which reports to a part-time board of directors, expends Federal funds through a nationwide network of approximately 300 private organizations which employ, in the aggregate, some 5,000 persons full time.

The statutes, regulations, work programs, and evaluation priorities to which federally funded staff projects are subject, place a priority on law reform and group representation.

Over the years, however, thousands of activist organizations, with public policy axes to grind, have been spawned with the essential assistance of salaried LSP lawyers. Organizations which have received help—such as welfare rights groups—have strived not merely to advance their own interests, but to challenge, with public funds, the interests of others.

In the area of "law reform" staff lawyers with assured incomes have been able to devote program resources to advancement of the causes and policies which they have determined to be just—through "test case litigation," preparation of "model legislation," lobbying legislative and administrative decisionmakers, as well as organizing grassroots action in behalf of referendum questions.

The LSP does not empower the poor. The poor remain poor and powerless. They do not, individually or collectively, control program resources. The LSP empowers only those who sit on local project boards and who are paid as project attorneys.

Those boards and the attorneys they employ are shaping public policy with public funds through the courts and through the action organizations they assist. These are the policies and practices to which I object. Thank you, Mr. President.

Mr. JAVITS. Mr. President, this is with respect to the Legal Services Corporation directors.

Mr. President, I fully respect the views of the Senator from California and his deep interest in the situation and the problems which have developed in California about the legal services. I believe that the present law which we have dealt with in a way which is cognizant of these problems will, as it works out and develops, deal with many of them and that these nominees are able people, who I think will do their utmost to carry out not only the letter but the spirit of the law; and for those reasons I favor the confirmation by the Senate of these nominees.

Mr. President, there is an important point that needs to be addressed in respect to the nominees that are before the Senate today.

I refer to the fact that on January 19, 1978, before the Senate reconvened for the 2d session of the 95th Congress, recess appointments were made by the President to the Board of Directors of the Legal Services Corporation.

In my judgment, Mr. President, there is some doubt as to whether the recess appointments were in order because: First, the five incumbents had not resigned, as such, indeed, they had continued to serve even though their terms had expired in July, 1977; and second, the recess appointment power of the President may not apply to directors of the Legal Services Corporation, since it may be that they are not "officers" of the United States.

During our hearings on the nominees—the President did submit their names for Senate confirmation on January 26—I requested the opinion of the Justice Department on this matter and, in turn, referred that to the Library of Congress, American Law Division, for analysis and comment.

In the view of the legislative attorney who looked into this, there is "a significant question about the propriety of the recess appointments made by the President under the vacancies clause to the Board of the Corporation." I submit for the RECORD correspondence from Robert J. Lipshutz, Counsel to the President, to the chairman of the Human Resources Committee (Senator WILLIAMS), the Justice Department opinion on the recess appointments, and the Library of Congress analysis of this opinion.

Mr. President, while I believe it is important to have this material before the public and while I happen to agree with the conclusion of the Congressional Research Service that some question does exist about the propriety of the recess appointments. I want to emphasize that this does not reflect on the quality of the nominees themselves. I have examined the nominees' records and statements and find them characterized by a deep concern for the legal needs of the poor. This should be the overriding consideration in passing on these nominees. I am quite confident that the President has sent the Senate some highly qualified, capable, and sensitive nominees, and I recommend to my colleagues that they approve the nominations without further delay.

The material follows:

THE WHITE HOUSE,
Washington, February 6, 1978.

Hon. HARRISON A. WILLIAMS,
Chairman, Committee on Human Resources, U.S. Senate, Washington, D.C.

DEAR SENATOR WILLIAMS: I am advised that the Human Resources Committee will hold a confirmation hearing on February 7th for the five individuals nominated by the President to serve as Members of the Board of Directors of the Legal Services Corporation. In connection with that hearing, I am advised that a question has arisen as to the propriety of the recess appointments to the Board made on January 19, 1978 by the President.

The January 19, 1978 recess appointments were followed by the formal nomination of these same individuals on January 26, 1978. In my opinion the recess appointments were entirely proper and legal. And, I have received from the Department of Justice a formal opinion confirming that it was within

the President's power to make the recess appointments to the Board of the Corporation; the opinion concludes that the appointments were not illegal and did not constitute an abuse of Presidential power.

I am available to brief you on this matter should you so desire.

Sincerely,

ROBERT J. LIPSHUTZ,
Counsel to the President.

DEPARTMENT OF JUSTICE,
Washington, February 6, 1978.

Re Legal Services Corporation.

MEMORANDUM FOR MICHAEL CARDOZO, ASSOCIATE COUNSEL TO THE PRESIDENT

I am responding to your inquiry of February 2 as to whether the holdover provisions of the Legal Services Corporation Act precluded the President from making recess appointments to the Board of Directors of the Legal Services Corporation after the terms of the members expired but while they were serving as holdovers. It is our conclusion that these provisions do not affect the President's power to make recess appointments.

Section 2 of the Legal Services Corporation Act of 1974, Pub. L. 93-355, 88 Stat. 379, 42 U.S.C. (Supp. V) 2996c(b), provides that the term of office of the members of the Board of Directors of the Corporation is three years, except that five of the members first appointed are for a term of two years.* The subsection continues "Each member of the Board shall continue to serve until the successor to such member has been appointed and qualified." According to the information furnished to us, President Ford appointed five members of the Board for terms of two years beginning on July 14, 1975, which terms expired on July 13, 1977. No new appointments to those positions were made by the President by and with the advice and consent of the Senate during the first session of the 95th Congress. On January 19, 1978, prior to the opening of the second session of the 95th Congress, the President made recess appointments to those positions pursuant to Article II, section 2, clause 3 of the Constitution. That clause provides in pertinent part:

"The President shall have Power to fill up all Vacancies that may happen during the Recess of the Senate . . ."

The exercise of the power to make recess appointments thus presupposes the existence of a vacancy. One of the directors replaced by the President asserts that despite the expiration of his two-year term on July 13, 1977, the position was not vacant, because under the statute he continued to serve until his successor has been appointed and qualified.

It has been the view of the Department of Justice, going back to the Attorney General's opinion of 1880 (16 Op. Atty. Gen. 538), that where the statutory term of an officer has expired, the interim filling of his position, either by a court appointment (United States Attorney) or by a holdover provision, does not fill a vacancy in the constitutional sense.

There are various methods designed to provide for the temporary performance of the duties of an officer after he has resigned or his term has expired. Among them are the temporary appointments by the courts as in the case of U.S. Attorneys and Marshals (28 U.S.C. 546, 565), or holdover clauses as in the cases of United States Attorneys and Marshals (28 U.S.C. 541(b), 561(b)), of territorial judges (48 U.S.C. 1424(b), 1614), and of most, if not all, regulatory commissions. Such a temporary performance after the expiration of the incumbent's statutory term, however, does not "fill" the vacancy. The office remains vacant and the President has the power to make appointments to it during the recess of the Senate. Were it otherwise the Senate could perpetuate in office an officer serving under a holdover provision by failing to confirm his successor. Moreover, Congress could deprive the President of his constitutional power to make recess appointments by the passage of legislation providing for the interim filling of the office. See *Peck* v. *United States*, 39 Ct. Cl. 125, 134 (1904).

The above views reflect the position of the Department of Justice since 1880. At that time the Attorney General ruled that the President had the power to make a recess appointment to the office of a United States Attorney although the position was then being temporarily filled by a court appointment pursuant to what is now 28 U.S.C. 546. The Attorney General stated:

"* * * The authority given to fill the office to the circuit justice is an authority only to fill it until action is taken by the President. The office in no respect ceases to be vacant in the sense of the Constitution because of this appointment, for the reason that the appointment itself contemplates only a temporary mode of having the duties of the office performed until the President acts by an appointment.

* * * * *

"* * * The office is not the less vacant, so far as his power of appointment is concerned, when the only power conferred upon any one else is a power to make an appointment which shall entitle the appointee to serve until an appointment is made by the President, and no longer." 16 Op. Atty. Gen. 539-540. (1880).

In an analogous situation arising at the same time in another judicial district, Mr. Justice Woods, sitting in circuit, came to the same conclusion as the Attorney General. *In re Farrow*, 3 Fed. 112, 116-117 (C.C. N.D. Ga., 1880).

The Justice position has been the same concerning holdover provisions, such as the one here involved. The Department has held that those provisions do not fill the vacancy but that they merely provide for a temporary method of insuring the performance of the functions of the office after the expiration of the term of the incumbent; hence they do not prevent the President from exercising his constitutional authority to make recess appointments. In 1950, the Deputy Attorney General advised the White House that the President had the power to make recess appointments to the Interstate Commerce Commission and the Reconstruction Finance Corporation, although the officials whose terms had expired were serving under holdover provisions. The Department's analysis in 1960 of bills containing holdover provisions with respect to several independent agencies concluded that those provisions would not interfere with the President's power to make recess appointments. Again in 1972, this Department advised the Interstate Commerce Commission that the holdover provisions of the Interstate Commerce Act did not preclude the President from making recess appointments.

Peck v. *United States*, 39 Ct. Cl. 125, *supra*, cited by the General Counsel of the Legal Services Corporation, does not hold to the contrary. It stands only for the proposition that where there is no present vacancy one cannot be created by a recess appointment. (At pp. 135-137). The Presidential practice is full in accord. For example, a United States Attorney cannot be removed during his statutory term by giving a recess appointment to a successor, the reason being that there is no vacancy to be filled. Accordingly, the President must first remove the incumbent. Where, however, a United States Attorney holds over, or serves under a court appointment, a vacancy exists. The President therefore can make a recess appointment which has the effect of removing the incumbent who is merely serving on a temporary basis. That rule governs here.

LEON ULMAN,
Deputy Assistant Attorney General, Office of Legal Counsel.

THE PRESIDENT'S POWER TO MAKE RECESS APPOINTMENTS TO FILL VACANCIES ON THE BOARD OF DIRECTORS OF THE LEGAL SERVICES CORPORATION

The purpose of this report is to analyze whether or not the President of the United States has the power to make appointments to the Board of Directors of the Legal Services Corporation when the United States Senate is in recess.

The Legal Services Corporation was created by the Legal Services Corporation Act, Public Law 93-355 (1974), subsequently amended in part by Public Law 95-222 (1977). The purpose of the Corporation, as set forth in Section 1003 of the Act, is to provide "financial support for legal assistance in noncriminal proceedings or matters to persons financially unable to afford legal assistance." To that end Congress established a "private nonmembership nonprofit corporation", which is Federally funded to carry out the program of providing legal services in a fashion specified in the Act.

The members of the Corporation's Board of Directors are appointed by the President, with the advice and consent of the Senate; however, the Directors are, under the Act, deemed not to be officers or employees of the United States. Section 1004 of the Act, which provides for the organization of the Board of Directors, provides in pertinent part:

Sec. 1004. (a) The Corporation shall have a Board of Directors consisting of eleven voting members appointed *by the President by and with the advice and consent of the Senate*, no more than six of whom shall be of the same political party. A majority shall be members of the bar of the highest court of any State, and none shall be a full-time employee of the United States.

"(b) The term of office of each member of the Board shall be three years, except that five of the members first appointed, as designated by the President at the time of appointment, shall serve for a term of two years. *Each member of the Board shall continue to serve until the successor to such member has been appointed and qualified.* The term of initial members shall be computed from the date of the first meeting of the Board. The term of each member other than initial members shall be computed from the date of termination of the preceding term. Any member appointed to fill a vacancy occurring prior to the expiration of the term for which such member's predecessor was appointed shall be appointed for the remainder of such term. No member shall be reappointed to more than two consecutive terms immediately following such member's initial term.

"(c) *The members of the Board shall not, by reason of such membership, be deemed officers or employees of the United States.*

"(d) The President shall select from among the voting members of the Board a chairman, who shall serve for a term of three years. Thereafter the Board shall annually elect a chairman from among its voting members.

"(e) A member of the Board may be removed by a vote of seven members for malfeasance in office or for persistent neglect of or inability to discharge duties, or for

---

*The members of the Board are appointed by the President with the advice and consent of the Senate. 42 U.S.C. 2996c(a).

offenses involving moral turpitude, and for no other cause. [Emphasis added.]

It should be noted that the Act itself makes no provision for a recess appointment to be made by the President. And, a review of the legislative history indicates that the Congress did not address any understanding about recess appointments in the committee reports which accompanied the measure. See, House Report No. 93–247, 93d Cong., 1st Sess. (1973); Senate Report No. 93–495, 93d Cong. 1st Sess. (1973); House Conference Report No. 93–1039, 93d Cong., 2d Sess. (1974); and Senate Conference Report No. 93–845, 93d Cong., 2d Sess. (1974).

On January 19, 1978, the day before the convening of the 2d Session of the 95th Congress, the President made recess appointments to positions on the Board of Directors of the Legal Services Corporation, pursuant to Article II, section 2, clause 3 of the U.S. Constitution, the Vacancies Clause. At that time five members of the Board of Directors were serving as holdovers.

The question arises as to the power, in the absence of express statutory authority, of the President, alone and without the advice and consent of the Senate, to appoint members of the Board of Directors when the Senate is in recess.

The President of the United States has a constitutional power to fill certain vacancies under Article II, Section 2 of the U.S. Constitution, which provides in pertinent part:

"The President . . . shall nominate, and by and with the Advice and Consent of the Senate, shall appoint Ambassadors, other public Ministers and Consuls, Judges of the Supreme Court, and all other Officers of the United States, whose appointments are not herein otherwise provided for, and which shall be established by Law: but the Congress may by Law vest the Appointment of such inferior Officers, as they think proper, in the President alone, in the Courts of Law, or in the Heads of Departments.

"The President shall have Power to fill up all Vacancies that may happen during the Recess of the Senate, by granting Commissions which shall expire at the End of their next Session."

It is well established that the Appointments clause requires that "Officers of the United States" must be appointed in the manner specified by this clause, either by the President of the United States, by and with the advice and consent of the Senate or by the President alone, the head of a department, or a court of law, and the creation of an "Office" with an alternative form of appointment is violative of the Appointments Clause. *Buckley* v. *Valeo*, 424 U.S. 1 (1975).

Because the President is required by the provisions of Article II, Section 3 to ". . . Commission all the Officers of the United States," it is a well established procedure that for "Officers of the United States", the President nominates the Senate confirms, the President issues a Commission, and thereupon the person assumes "Office." The Commission is clearly a necessary requisite before the "Office" is assumed. *Marbury* v. *Madison*, 5 U.S. 299 (1803). But, the Vacancies Clause permits the President to directly issue Commissions to "Officers" to fill vacancies during the recess of the Senate, when presumably, Senate confirmation would not be possible.

Regarding the Board of Directors of the Legal Services Corporation, there are several issues raised under the Appointments Clause and the Vacancies Clause.

The first matter of consideration is what constitutes a "vacancy" within the meaning of the Vacancies Clause. It is a well accepted view of the phrase "Vacancies that may happen" has been interpreted to mean "vacancies which happen to exist." Appointments During Recess of Senate, 16 Op. Atty. Gen. 522 (1880); Executive Authority to Fill Vacancies, 1 Op. Atty. Gen. 631 (1823); and see, Matter of Farrow, 3 Fed. 112 (C.C. Ga. 1880). Thus, where a vacancy in office exists prior to Senate recess and continues to exist without nomination, or with nomination but without Senate action, the President may issue a temporary Commission under the Vacancies Clause.

Under Section 1004(b) of the Legal Services Corporation Act members of the Board of Directors serve for three years and ". . . shall continue to serve until a successor to such member has been appointed *and qualified.*" [Emphasis added.] As used in several other statutes governing Federal agencies and other "officers", such a "holdover" provision permits a member to continue to serve until a valid designation of a successor has been completed.

However, it does not appear that a holdover provision would prevent the President from making recess appointments under the theory that there was technically no vacancy during the period that the "Officer" continues to serve under a holdover provision. The Department of Justice specifically addressed this question in its "Memorandum For Michael Cardozo, Associate Counsel to the President, Re: Legal Services Corporation," dated February 6, 1978. In that memorandum, the Department of Justice addressed the issue of "whether the holdover provisions of the Legal Services Corporation Act precluded the President from making recess appointments to the Board of Directors of the Legal Services Corporation after the terms of the members expired but while they were serving as holdovers."

The Department of Justice memorandum concludes that holdover provisions "do not affect the President's power to make recess appointments." In reliance upon *In Re Farrow, supra*, and the Attorney General's opinion 'Appointments During Recess of Senate," *supra*, the Justice Department expresses a well accepted view that an "office" is no less vacant for purposes of the recess appointments clause simply because there has been a temporary performance of the duties of the office until the President acts to make an appointment.

Moreover, the reading of *Peck* v. *United States*, 39 Ct. Cl. 125 (1904) by the Department of Justice in a manner consistent with the above also appears to constitute a long accepted interpretation. Peck appears only to stand for the proposition that the improper appointment of an officer does not create a vacancy by means of advancement from one office to another. But there, no vacancy existed because no position of office was authorized, and the question did not involve a "holdover" provision.

For "Officers of the United States'" completion of the appointment process occurs upon the issuance of the Commission by the President.

But not all "Officers of the United States" serve for terms of years established by statute. Cabinet department secretaries serve indefinitely, until the appointment of a successor. Under those circumstances, there is technically no "vacancy" since the Office continues to be filled, until the commission of a new officer terminated the tenure of the previous officer.

Thus, a statutory holdover provision would permit "Officers" to be appointed either as recess appointments or as appointments made with the advice and consent of the Senate. Either type of appointment would "qualify" a successor upon the issuance of a valid Commission.

If, for example, a member of the Board of Directors who had served for three years had not resigned, it would not appear that any less of a vacancy would exist under the Vacancies Clause, assuming its applicability, than with a cabinet Secretary who continued in Office after the swearing in of a new President until the designation of a new Secretary.

In short, it would seem that if the Vacancies Clause applied to the Legal Services Corporation, a "vacancy" within its meaning would exist even though a Director whose term expired continued to serve. When the term expires, the position would appear to become "vacant" even though a person continues to serve as Director under the holdover provision.

But the determination that "holdover" provisions of statutes permit recess appointments by the President under Article II of the Constitution is not dispositive of the question of whether Article II recess appointments can be made to the Board of Directors of the Legal Services Corporation. If it were dispositive, the analysis of the Department of Justice, as reflected in its memorandum of February 6, 1978, would be controlling.

There is, however, another important consideration which was not addressed by the Department of Justice memorandum. That issue is whether the Vacancies Clause applies to members of the Board of Directors of the Legal Services Corporation.

The Vacancies Clause would seem to apply only to vacancies in "Office", as that term is used in the Constitution. The manner of filling vacancies during recess is that the President issues a commission, with the clear implication that it is a commission to "Office." The juxtaposition of the Vacancies Clause after the Appointments Clause clearly suggests that the Vacancies Clause was intended to establish a constiutional means of providing continuity in the performance of duties of "Office" during periods where the Senate could not act. The Vacancies Clause must be read together with the Appointments Clause, because the two Clauses apply to the same subject—appointment of "Officers." It follows that the Vacancies Clause (as well as the Appoinments Clause) is not applicable to those who are not "Officers," as that term is used in the Constitution.

The fact that the Legal Services Corporation Act provides that members of the Board of Directors are ". . . not, by reason of such membership, . . . deemed officers or employees of the United States," does not necessarily establish for the purposes of the Constitution whether such members are "Officers," but it does express an intent of the Congress. Unfortunately, there are no apparent judicial decisions which determine, whether under these circumstances or even closely analogous circumstances, directors of a corporation, such as this, are "Officers."

The language of the Legal Services Corporation Act is not unique, however. The Communications Satellite Act of 1962, Law 87–624, 76 Stat. 419 (1962) contains similar provisions. On October 25, 1962 in an opinion captioned "Communications Satellite Corporation," Attorney General Robert F. Kennedy determined that the incorporators of the Communications Satellite Corporation were not "Officers" in a constitutional sense simply by virtue of the fact that the legislation provided for their appointment by the President by and with the advice and consent of the Senate. In reliance on the Congressional intent, Kennedy determined that the incorporators and the directors were not "Officers." However, as that opinion noted is footnote 2, the President did make recess appointments of the incorporators

without express statutory authority and apparently under the Vacancies Clause.

Kennedy concluded:

"Thus there appears to have been no intention on the part of the originators of the legislation to create directors who would be officers of the Government but rather an intention to dissociate the Government from the directors." Opinion of the Attorney General of the United States (October 25, 1962), at 7.

But in finding that the members were not "Officers", Kennedy failed to explain how recess appointments of these non-"Officers" could be made under the Vacancies Clause, leaving open the possibility that non-"Officers" might also be appointed under the Vacancies Clause.

The fact that this problem has been sufficiently unclear and legally unresolved is further demonstrated by the situation which occurred in 1972 with the Corporation for Public Broadcasting, under a statutory provision similar to that of the Legal Services Corporation. See, 47 U.S. Code Section 396. We understand that a recess appointment to the Board of Directors of that corporation was made in December 1972 by President Nixon. However, it appears that at that time concern for the legal status of that appointment caused the new Director not to vote on corporate questions, even though the Commission from the President had been delivered.

Despite the existence of precedent for a recess appointment under the Vacancies Clause to a corporation like the Legal Services Corporation, the status of such an appointment is unresolved in its effect. It does not appear that any legal dispute has ever been raised that would resolve the matter.

There are a number of considerations which obviously might be argued on either side of the question. Congress did not intend by the language of the Act that the Board members would be officers or employees of the United States. Congress apparently understood the necessity of providing for a means of removal in the statute, since the impeachment clause under Article II, Section 4 only applies to "Officers." Therefore, in further evidence of Congressional intent that Board members are not "Officers" under the Constitution, Congress provided that the Board members could be removed by a vote of the Board for reasons specified in Section 1004(e).

On the other hand, the statute says that the Board members "by reason of such membership" are not deemed "officers," leaving open the possibility that they might be deemed to be "Officers" for some other reason, such as a constitutional reason.

We are left, therefore, with the task of determining what constitutes an "Officer" under the Constitution. Until *Buckley*, the only court precedent which directly dealt with the question was *United States* v. *Mount*, 124 U.S. 303 (1888), which vaguely defined an "officer" as one who was in the service of the United States. Other cases tried to define officer in a generic sense. See for example, *Matter of Hathaway*, 71 N.Y. 238 (1877); and *McArthur* v. *Nelson*, 81 Ky. 67 (1883).

Buckley v. *Valeo*, *supra*, however, required a much closer scrutiny at the functions performed by the individual in question. In that case a review of the functions of the Federal Elections Commission resulted in the determination that the provisions of the statute which provided for appointment by means other than Presidential appointment with the advice and consent of the Senate violated the Appointments Clause because the members of the Commission performed functions as "Officers."

Buckley held, quite clearly, that for persons performing function's required by the Constitution to be performed by "Officers of the United States," those persons *must* be appointed to "office" in accordance with Article II, Section 2:

"We hold that these provisions of the [Federal Election Campaign] Act, vesting in the [Federal Elections] Commission primary responsibility for conducting civil litigation in the courts of the United States for vindicating public rights, violate Art. II, § 2, cl. 2, of the Constitution. Such functions may be discharged only by persons who are 'Officers of the United States' within the language of that section.

"All aspects of the Act are brought within the Commission's broad administrative powers: rulemaking, advisory opinions, and determinations of eligibility for funds and even for federal elective office itself. These functions, exercised free from day-to-day supervision of either Congress or the Executive Branch, are more legislative and judicial in nature than are the Commission's enforcement powers, and are of kinds usually performed by independent regulatory agencies or by some department in the Executive Branch under the direction of an Act of Congress. Congress viewed these broad powers as essential to effective and impartial administration of the entire substantive framework of the Act. Yet each of these functions also represents the performance of a *significant governmental duty exercised pursuant to a public law*. While the President may not insist that such functions be delegated to an appointee of his removable at will . . . none of them operates merely in aid of congressional authority to legislate or is sufficiently removed from the administration and enforcement of public law to allow it to be performed by the present Commission. These administrative functions may therefore be exercised only by persons who are 'Officers of the United States.'" [emphasis added] *Buckley*, *supra*, at 140–141.

This excerpt suggests that "broad administrative powers" such as rulemaking, advisory opinions and determinations of eligibility for funds are functions constitutionally required to be performed by "Officers", because Congress viewed these broad powers as "essential to effective and impartial administration of the entire framework of the Act."

The precise holding in Buckley did not focus on these "powers" separately, for the Commission, there, possessed a broad panoply of powers. But the Court suggested that at the point at which functions are "sufficiently removed from the administration and enforcement of public law" they might be vested in non-"Officers."

How Buckley might apply to the Legal Services Corporation is difficult to resolve. The Corporation operates on direct Federal appropriations, makes grants to recipient organizations who provide legal services, establishes standards for grants and contracts and carries on other functions. It has many of the traditional attributes of a Corporation, but lacks many of the characteristics of a Federal agency. Its chief function consists of administering a grant program to recipient organizations—some private, some governmental—which provide legal services to the indigent. These functions are certainly not of the same character as those prosecutorial, regulatory, and judicial functions carried on by the Federal Elections Commission. But, Buckley does not attempt to draw a precise line.

Congress, in creating the Legal Services Corporation, obviously intended that the Corporation would be removed, at least a step, from actual governmental operations. After all, money appropriated might easily be ultimately utilized to finance litigation in which the Federal Government was an adverse party or to finance the presentation of litigation interests adverse to those of the Federal Government.

Thus, the purpose and the nature of the organization is quite different from the purpose and nature of the Federal Election Commission. Buckley appears to have contemplated this unique type of Federal organization:

"Congress may undoubtedly under the Necessary and Proper Clause create 'offices' in the generic sense and provide such method of appointment to those 'offices' as it chooses. But Congress' power under that Clause is inevitably bounded by the express language of Art II, § 2, cl. 2, and unless the method it provides comports with the latter, the holders of those offices will not be 'Officers of the United States.' They may, therefore, properly perform duties only in aid of those functions that Congress may carry out by itself, or in an area sufficiently removed from the administration and enforcement of the public law as to permit their being performed by persons not 'Officers of the United States.'" *Buckley*, *supra*, at 138–139.

Under *Buckley* it is possible that "offices", in a generic sense, may be created with any means of appointment (including appointment in conformity with the mode or pattern in Article II, Section 2) so long as the functions performed are ". . . sufficiently removed from the administration and enforcement of the public law" as to permit their being performed by persons not "Officers", within the meaning of that term as it is used in the Constitution.

The Legal Services Corporation has no authority to prosecute violations of law. And, it might be argued that the functions of the Corporation are not "significant" governmental duties exercised pursuant to public law. Accordingly, there is substantial doubt that the Corporation, serving as what might be viewed more as an "agent" on behalf of the Congress, carries on functions which must be vested with "Officers of the United States."

And, if it is legally permissible that the functions of the Corporation be performed by a Board of Directors who are not "Officers", then a recess appointment under Article II, Section 2 is arguably unauthorized (vacancy or not).

As can be seen, there is little guidance in the legislative history of the Act or from established judicial interpretation which definitely resolves the questions raised here. We believe some of the implications flowing from the reasoning in the recent *Buckley* decision raise a significant question about the propriety of the recess appointments made by the President under the Vacancies Clause to the Board of Corporation.

Resolution of the questions raised here may require even clearer guidance from the Congress or the Courts.

ROBERT D. POLING,
Legislative Attorney, American Law Division.

The PRESIDING OFFICER. Without objection, the nominations are considered and confirmed.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that a motion to reconsider en bloc the vote by which the nominations were confirmed be in order.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. ROBERT C. BYRD. I so move.

Mr. BAKER. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the President be notified of the confirmation of the nominations.

The PRESIDING OFFICER. Without objection, it is so ordered.

COMMITTEE MEETINGS

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent, as in legislative session, that the Consumer Subcommitteee of the Commerce, Science, and Transportation Committee be authorized to meet during the sessions of the Senate on Tuesday, March 21; Wednesday, March 22; and Thursday, March 23, to consider the National Vehicle Safety Act and reauthorization of the Motor Vehicle Information and Costs Savings Act.

The PRESIDING OFFICER. Without objection, it is so ordered.

CONCLUSION OF MORNING BUSINESS

The PRESIDING OFFICER. Is there further morning business? If not, morning business is closed.

PROGRAM

Mr. ROBERT C. BYRD. Mr. President, the Senate will come in at 8:40 a.m. tomorrow.

After the prayer, the distinguished Senator from South Dakota (Mr. ABOUREZK) will be recognized for not to exceed 15 minutes, after which and no later than the hour of 9 a.m., the Senate will proceed to the consideration, as in legislative session, of the farm bill, H.R. 6782. There is a time agreement on that bill, a limit of 4 hours, which is all inclusive and out of which any time for amendments, motions, et cetera, would come.

Upon the disposition of H.R. 6782, the Senate will then proceed to take up S. 2481 under a similar time agreement.

There will be rollcall votes throughout the day on those measures and on motions and amendments in relation to the same.

Upon the disposition of those two measures, the Senate will proceed under a time limitation to consider the conference report on the redwoods bill. The final votes on the two farm bills will occur back-to-back and will occur no earlier than 4 p.m. tomorrow. So it would appear that tomorrow the Senate will proceed in legislative session to dispose of those two farm bills and the conference report on the redwoods, after which the Senate will resume consideration of the treaty.

RECESS UNTIL 8:40 A.M. TOMORROW

Mr. ROBERT C. BYRD. Mr. President, if there be no further business to come before the Senate, I move, in accordance with the order previously entered, that the Senate, as in legislative session, stand in recess until the hour of 8:40 a.m. tomorrow.

The motion was agreed to; and at 7:33 p.m. the Senate, as in legislative session, recessed until Tuesday, March 21, 1978, at 8:40 a.m.

CONFIRMATIONS

Executive nominations confirmed by the Senate March 20, 1978:

DEPARTMENT OF AGRICULTURE

P. R. Smith, of Georgia, to be a member of the Board of Directors of the Commodity Credit Corporation.

U.S. TAX COURT

Herbert L. Chabot, of Maryland, to be a judge of the U.S. Tax Court for a term of 15 years after he takes office.

NATIONAL TRANSPORTATION SAFETY BOARD

Elwood Thomas Driver, of Virginia, to be a member of the National Transportation Safety Board for the remainder of the term expiring December 31, 1980.

NATIONAL COMMISSION ON EMPLOYMENT AND UNEMPLOYMENT STATISTICS

The following-named persons to be members of the National Commission on Employment and Unemployment Statistics:

Bernard E. Anderson, of Pennsylvania.
Glen G. Cain, of Wisconsin.
Jack Carlson, of Maryland.
Michael Harold Moskow, of Illinois.
Rudolph Alphonsus Oswald, of Maryland.
Samuel L. Popkin, of California.
Mitchell Sviridoff, of New York.
Joan Lawson Wills, of Virginia.

NATIONAL LIBRARY OF MEDICINE

The following-named persons to be members of the Board of Regents of the National Library of Medicine, Public Health Service, for the terms indicated:

For a term expiring August 3, 1979:

Thomas C. Chalmers, of New York.
Kelly M. West, of Oklahoma.

For a term expiring August 3, 1980:

Samuel Richardson Hill, Jr., of Alabama.
Doris H. Merritt, of Indiana.
Cecil George Sheps, of North Carolina.

For a term expiring August 3, 1981:

James Franklin Williams II, of Michigan.
Nicholas Edward Davies, of Georgia.

NATIONAL TRANSPORTATION SAFETY BOARD

James B. King, of Massachusetts, to be Chairman of the National Transportation Safety Board for a term of 2 years.

LEGAL SERVICES CORPORATION

The following-named persons to be members of the Board of Directors of the Legal Services Corporation for terms expiring July 13, 1980:

Cecilia Denogean Esquer, of Arizona.
Steven L. Engelberg, of Maryland.
Hillary Diane Rodham, of Arkansas.
Richard Allan Trudell, of California.
Josephine Marie Worthy, of Massachusetts.

The above nominations were approved subject to the nominees' commitments to respond to requests to appear and testify before any duly constituted committee of the Senate.

IN THE DIPLOMATIC AND FOREIGN SERVICE

Diplomatic and Foreign Service nominations beginning Stephen W. Bosworth, to be a Foreign Service officer of class 1, and ending Ronnie D. Woody, to be a Foreign service officer cf class 7, which nominations were received by the Senate and appeared in the CONGRESSIONAL RECORD on February 10, 1978.

EXTENSIONS OF REMARKS

A LOVELY PARK THAT DOUBLES AS FLOOD CONTROL

HON. JOHN J. RHODES

OF ARIZONA

IN THE HOUSE OF REPRESENTATIVES

Monday, March 20, 1978

● Mr. RHODES. Mr. Speaker, as you are no doubt aware Arizona has recently been ravaged by the worst floods in the State's modern history. The damage to property is running into the millions of dollars, and there has been a tragic loss of life and destruction of property in the once tranquil "Valley of the Sun."

There is, however, one element of solace that the residents of Scottsdale, Ariz., can take from this disaster. In the summer of 1976, the long-awaited Indian Bend Wash flood control project was completed. This project was the culmination of cooperation between the State, local Scottsdale government, and Army Corps of Engineers. It marked the first project of its kind where the Army Corps combined recreational parks, lakes, and other structures with flood control dams and dikes. The city of Scottsdale alone contributed over $7 million to the construction of this project.

The results of this project have borne out the careful planning and hard work that went into it. While the southern half of Phoenix was ravaged by uncontrollable water spilled through the normally dry Salt River bed, the city of Scottsdale to the north was able to control the waters that ran through the center of the town by using Indian Bend Wash. Because of this wash, property damage was kept to a minimum, and there was only minor disruption in the life of the city. I would like to submit for the RECORD an article from the Christian Science Monitor which describes the way the Indian Bend Wash project worked, and the letter of congratulations to me from the mayor of Scottsdale, William C. Jenkins, which highlights the successful flood control aspects of the wash.

Hopefully, this disaster will point out the necessity of moving forward as expeditiously as possible with the construction of Orme Dam as part of the central Arizona project, so the city of Phoenix will be able to plan and provide for a similar flood control project which

has already been named the Rio Salado, to minimize the ravages of any flooding that might occur in the future.

The article follows:

A LOVELY PARK THAT DOUBLES AS FLOOD CONTROL

(By David F. Salisbury)

LOS ANGELES.—Southwest cities faced with the aftermath of this winter's severe flooding would do well to consider the example of Scottsdale, Arizona.

In 1972, floodwaters churned out of Indian Bend Wash, swamping 1,500 homes, cutting Scottsdale in half, and costing the city $10 million in damages. But this year, despite a similar deluge, damage has been minimal.

The difference? A 7½-mile greenbelt that doubles as a recreation area and as a grass-lined spillway designed to protect the city from rushing floodwaters.

According to a spokesman from the Army Corps of Engineers, which originally suggested concrete canals, the new spillway is "the nation's first floodway project to both reduce flood damage and build recreational facilities in the same design."

However, the greenbelt approach is not universally applicable. If the land runs at a steeper slope than it does at Scottsdale, for instance, the spillway might not work. In areas where the flood plain is highly developed, as is the case in neighboring Phoenix, a park system would be expensive to develop. But there are a number of areas in the Southwest where flooding is a perennial problem which might benefit from Scottsdale's example.

Although preliminary damage estimates from recent flooding in next-door Phoenix have been chalked in at $8 million, the only damage in Scottsdale was in the still-unfinished areas of the new park, says Barbara Markiewitz of the Mayor's office.

In 1963, the Army Corps of Engineers prescribed a standard solution for Scottsdale's recurring flood control problems—sterile concrete canals identical to those which crisscross a number of older Southwest cities. Two years later, Congress authorized money to implement the plan.

But officials of the newly incorporated city had other ideas. They voted the idea down by a resounding margin.

CITIZENS OFFERED PLAN

At the time, Scottsdale was conducting a "town enrichment" program. Citizens meeting in neighborhood groups to propose and discuss priorities for development decided that flood control precautions could be combined with park and recreational facilities.

There had been several destructive floods. The worst occurred in 1972, and the resulting damage set the stage for passage of a $10 million bond issue for the proposal. When it became clear that the city was going ahead with the plan to use grass rather than concrete for flood control, the Army abandoned its previous position and joined in.

Today the project is 80 percent complete. Scottsdale's flood plain has been largely transformed into a narrow strip of grassy parks, lakes, golf courses, playing fields, and picnic areas. These are graded from 6 to 18 feet below the homes, businesses, and schools which line the banks. Although the area often is awash during severe floods, the greenbelt has been designed to withstand waters with only minimum resulting damage. Four bridges span the area and prevent sections of the city from being isolated by raging waters.

Total cost of the project is estimated at $30 million, only $4 million more than the original figures for a concrete canal. The investment is expected to save more than $9 million in damages for every severe flood.

SCOTTSDALE, ARIZ., *March 8, 1978.*

Hon. JOHN RHODES,
House of Representatives,
Washington, D.C.

DEAR JOHN: I wanted to write and thank you for your help on the Indian Bend Wash. As you know, the flood control aspects of the Wash were tested during the past week. It worked beautifully!

While Scottsdale residents were inconvenienced by the flooding, the areas protected by the Indian Bend Wash were virtually unscathed by the flooding.

The Council and I recognize the hard work you've done on the project and want to again say thanks!

Sincerely,

WILLIAM C. JENKINS,
Mayor.●

THE GREAT LAKES PILOTAGE ACT OF 1960

HON. PHILIP E. RUPPE

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Monday, March 20, 1978

● Mr. RUPPE. Mr. Speaker, I have today introduced a bill to amend the Great Lakes Pilotage Act of 1960 in order to relieve the restrictive qualification standards for U.S. registered pilots on the Great Lakes. This measure is intended to relieve the growing shortage of qualified applicants for pilots and to enable the development of a suitable training program to insure the continued safe conduct of both foreign and registered U.S. vessels within the confines of our Nation's Fifth Sea.

Pilotage has been defined as that eminent state of maritime "know-how," the achievement of which by all concerned would insure the safe navigation of all things that float. Though this definition is somewhat nebulous the one distinguishing concern expressed therein is—safety. Pilotage is a vital aspect of maritime safety which in the Great Lakes was satisfied in earlier years by experienced lake sailing masters taken on board voluntarily at Montreal as a vessel began her upbound journey.

Traffic increased, the demand for qualified masters grew, and beginning about 1957 the need for licensed pilots under Government control became clear, especially in the face of the fact that while vessels navigating solely on the lakes were required to have the service of officers with qualified piloting skills there was no statutory requirement that oceangoing vessels of any flag utilize similar service while in U.S. waters. This need was enhanced by the opening of the new deeper-draft St. Lawrence Seaway in 1959. There followed, after extensive hearings and consideration of equitable relations with Canada, the "Great Lakes Pilotage Act of 1960" which essentially requires the services of a registered pilot in restricted or "designated" waters and a registered pilot or other qualified officer upon the open or "undesignated" waters of the lakes. Suitable accommodations, reciprocity, and mutual concerns of the United States and Canada have since been covered by memoranda of arrangements. They provide for the equitable participation by U.S. and Canadian pilots in the required services to oceangoing vessels in U.S. and Canadian waters.

While mates of U.S. interlake vessels are licensed as "First Class Pilots," and this is the only license issued to lake vessel deck officers other than a master's license, the prerequisite to status as a U.S. registered pilot to enable service under the Pilotage Act of 1960 to oceangoing vessels is an unlimited master's license. Because of this requirement there is a chronic shortage of qualified applicants which, under the federally mandated system, causes concern for the future safety of navigation in this region. Mates usually sail for 10 years before obtaining a master's license and serve another 10 or more years before obtaining a master's berth. By this time these men are well advanced in their careers, unable to transfer retirement benefits built up with an established company, and otherwise unwilling to face the uncertainties of an applicant pilot's lot.

Other objectives to the master licensure requirement have been identified not the least of which is the accepted argument that essentially only navigational skills are required which can be found in the larger manpower pool of younger, lower ranking but skillful lake vessel officers. To these men "pilotage" would offer career advancement prospects.

Thus my bill would provide that a U.S. pilot need no longer be the holder of an unlimited master's license but that a license as master, mate, or pilot would suffice. However, to insure the requisite pilotage and ship-handling skills and to obviate any possibility that a master might be transferring the conning of his vessel to a pilot who was a less qualified ship handler than himself, my bill provides that the Secretary of Transportation may require additional training and experience as a prerequisite to registration as a U.S. registered pilot.

With these changes, safety of navigation as envisioned by the framers of the Pilotage Act is insured—and incentives to establish a desirable pilotage training program are fostered.●

TITLE XI FINANCING FOR GREAT LAKES VESSELS

HON. JOHN M. MURPHY

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Monday, March 20, 1978

● Mr. MURPHY of New York. Mr. Speaker, today I am introducing a bill to exempt Great Lakes vessels from the 14 knot speed criterion which the Merchant Marine Act of 1936 requires for a lower down payment for direct loans from the Federal Government and for mortgage insurance.

Under the Merchant Marine Act, an applicant whose vessel weighs a minimum of 3,500 gross tons and can maintain a minimum speed of 14 knots is allowed to make a minimum down pay-

ment of 12½ percent toward a direct loan from the Federal Government and toward mortgage insurance. All applicants who cannot meet these criteria must make a minimum down payment of 25 percent.

Most Great Lakes vessels cannot meet these requirements, nor is it necessary that they do. The provisions in the 1936 law were included to stimulate the construction of vessels capable of achieving convoy speed for wartime. It has been found, however, that the most economical operation for a modern-day Great Lakes vessel fully loaded is a sustained speed of 15½ miles per hour, and sometimes less. In order for a Great Lakes vessel to meet the 14 knot, or 16.1 miles per hour, criterion, and therefore obtain the loan or mortgage insurance with a 12½-percent downpayment, it would have to sacrifice cargo, add 5,000 horsepower, and consume more valuable fuel.

The particular nature of the Great Lakes, where numerous rivers and channels constrain vessel movements, does not call for a speed criterion. It is unfair to impose a standard set for oceangoing vessels on those transiting the Great Lakes. This bill, "to permit the guarantee of obligations for financing Great Lakes vessels in an amount not exceeding 87½ per centum of the actual or depreciated cost of each vessel," should remedy that problem.

Joining me in introducing this legislation are Mr. ASHLEY, Mr. DINGELL, Mr. LEGGETT, Mr. EILBERG, Mr. OBERSTAR, Ms. MIKULSKI, Mr. BONIOR, Mr. AKAKA, and Mr. RUPPE.●

EARTH DAY 1978

HON. DOUGLAS WALGREN

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Monday, March 20, 1978

● Mr. WALGREN. Mr. Speaker, on March 20, 1978, winter will officially turn to spring. At the exact moment of the Equinox, which occurs at 6:34 p.m., a ceremony celebrating Earth Day at the United Nations will culminate with the ringing of the peace bell by Dr. Margaret Mead, Earth Day chairman.

Earth Day s a global holiday proclaimed by the Secretary General of the United Nations. Since 1971, when U Thant first rang the peace bell at U.N. headquarters, the bell has been rung each year at the Equinox in the name of man's effort to protect the environment and improve the quality of life.

I would now like to bring to the attention of my colleagues an article by Dr. Margaret Mead which aptly describes the meaning of Earth Day:

EARTH DAY

(By Margaret Mead)

Earth Day is the first holy day which transcends all national borders, yet preserves all geographical integrities, spans mountains and oceans and time belts, and yet brings people all over the world into one resonating accord, is devoted to the preservation of the harmony of nature and yet draws upon the triumphs of technology.

Earth Day draws upon astronomical phenomenon in a new way—which is also the most ancient way—using the Vernal Equinox, when the sun crosses the equator, making night and day of equal length in all parts of the earth. EARTH DAY begins with the striking of the Peace Bell at the United Nations, joined by gongs and bells ringing around the world in Celebration of the Vernal Equinox. The Celebration offends no historical calendar, yet transcends them all.

Earth Day celebrates the interdependence within the natural world of living things, and of humanity's utter dependence upon earth, man's only home. It celebrates the importance of the land, the oceans and the air to life and peace. It is a Celebration for all mankind, for we who live in different lands, on land which we cherish—and which we will be abe to cherish indefinitely, insuring a brighter future for all, if only we apply what we have learned about our earth responsibly and wisely!●

IN OPPOSITION TO SUSPENDING THE RULE TO PASS H.R. 11274

HON. THOMAS A. LUKEN

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Monday, March 20, 1978

● Mr. LUKEN. Mr. Speaker, I am in opposition to the motion to suspend the rules, because I believe this to be a blatant maneuver to block the House vote on tuition tax credits.

The proponents of this measure characterize it as noncontroversial, and at the same time describe the tuition tax credits as a "highly controversial measure." The opponents acknowledge that the two are very closely related. It is common knowledge that this measure would not be before us if the chairman of the Ways and Means Committee had not scheduled hearings on tuition tax credit. Everyone knows that this measure was conceived in opposition to tuition tax credit, and is being brought into the world with no other purpose in mind.

The result of a favorable action here today would be to stifle the debate on tuition tax credit and prevent this urgently needed legislation from being considered fully by the appropriate committee and by this House. Actually, tuition tax credit is a simple, straightforward approach which would provide equitable treatment and very needed relief to millions of taxpayers. Instead of collecting taxes from the American citizen only to return it to them reduced by administrative costs, a tuition tax credit would provide a direct reduction in tax bills, correlated to educational expenses. It is true that the exact coverage and amount of such a tax credit is open to debate, and such a debate should and will take place on the floor of this House if this effort today is frustrated.

Neither, do we listen attentively to the opinion of Attorney General Bell. The Attorney General is not the court of last resort, but is the lawyer for this administration. His opinion is no doubt sincere, but it is also part and parcel of the effort of the administration to defeat tuition tax credits.

On this motion to suspend the rules and pass H.R. 11274, I will vote "no" and I urge all Members of the House to vote "no" out of desire for a full debate on all available options.●

CUTTING HEALTH COSTS IN ST. LOUIS

HON. RICHARD A. GEPHARDT

OF MISSOURI

IN THE HOUSE OF REPRESENTATIVES

Monday, March 20, 1978

● Mr. GEPHARDT. Mr. Speaker, as a member of the House Ways and Means Committee, with its jurisdiction over medicare-medicaid and health insurance legislation, I share the concerns of my committee colleagues that something must be done to stop the ever-increasing costs of health care. In public hearings held in May 1977, on the hospital cost containment proposals, we learned that health care expenditures for the elderly have skyrocketed since 1966. During that year, an average senior citizen paid $237 in direct, "out-of-pocket" health care expenditures. In 1975, senior citizens, who are forced to make ends meet while living on a fixed income, paid an average of $390 in direct, "out-of-pocket" health care expenditures.

Clearly, action is needed to reverse the spiraling cost of health care. Congress has heard dozens of proposals. Few of these proposals are very innovative. Many proposals are negative and are often put forth by very defensive segments of our health care industry.

Fortunately, in my home State of Missouri, a unique health plan has been developed. It is a positive response to meeting this Nation's health care needs. It is innovative in its restructuring of the economics of American medicine.

For these reasons, I call the attention of all my colleagues and to the Nation's medical community a thought-provoking article by Dr. E. J. Cunningham, president-elect of the St. Louis County Medical Society. Dr. Cunningham has detailed the operation and organization of the unique St. Louis metro health plan.

As President of the St. Louis metro health plan, Dr. Cunningham has shown great insight and leadership in developing this positive solution toward reversing the cost-plus spiral. Dr. Cunningham's article follows:

KEY FACTORS TO HMO SUCCESS

As a private, practicing physician, I share the concerns of thousands of doctors about the rising cost-plus spiral which continues to plague the economy and health care industry in the United States. Physicians can, should and must play a real leadership role in reducing and reversing this cost-plus spiral.

Forty of St. Louis' leading private physicians[1] viewed this economic situation as an opportunity, not a problem. My fellow physicians joined me in developing a positive alternative to existing methods of health care financing. St. Louis physicians personally have committed $250,000.00 to start a prepaid

[1] Physicians sponsoring the Saint Louis Metro Health Plan include: President-Elect of the St. Louis County Medical Society; President of Missouri State Board of Healing Arts; Past President of Filipino Physician Association; President-Elect of St. Clair County; Five Hospital Staff Presidents; Past President of the National Medical Association; Missouri Delegate and Trustee to American Medical Association; President, Southwestern Surgical Congress and thirty other leading physicians.

health plan. These doctors clearly recognized that the key issue is basic economics and that the cost-plus spiral can only be reversed if the self interests of everyone are to reverse the spiral and reduce the costs. Private physicians did not want to assume the risk of hospitalization alone. The physicians were willing to accept the total risk of limiting the cost of physician care, in outpatient hospital care and providing the professional concurrent utilization review of services, but wanted a program which allowed all traditional health insurance carriers and every employer the opportunity to participate. The result is a program which allows each insurance carrier to participate by selling the plan to their existing clients and sharing with those clients and the physicians the financial risk and rewards of developing appropriate controls of the utilization of inpatient and outpatient services.

This open panel, multi-site Individual Practice Association provides every employer the opportunity with his existing insurance carrier to offer all employees their individual choice of insurance programs without having to change physicians. In this manner, the best elements of the traditional relationships with which each participant is familiar and accustomed are saved and a new common interest to reverse costs is introduced.

Quite simply, in the best tradition of America, it interferes with no one's rights. Every insurance company may choose to participate. Every consumer may elect to join the Plan. Every physician may participate. Every industry may offer this alternative. The role of the private insurance carrier is preserved. But the Plan's emphasis on outpatient care, preventive care, cost controls and health care education will dramatically reduce the total cost of care. Equally important, the Plan has been designed so that everyone shares in those savings.

By providing existing carriers the appropriate role of marketing, risk assumption and claims processing, and by utilizing a health management firm with experience in dealing with the problems of physicians as well as with the development and management of alternate health care delivery systems, we feel we are maximizing our utilizations of existing human resources in the management of the Plan. This straight forward, non-threatening approach is meeting with the enthusiastic support from every major segment of the health care providers in the community.

By utilizing existing facilities and community physicians, NO provider is excluded and each provider can participate to the extent they wish. By developing the program with the participation of the community's leading physicians, hospitals, insurance carriers and employers, the self interest of all will assure continual provider support. Marketing responsibilities will be shared by the Management[2] Company which has proven ability to develop and sell the prepaid alternative in other markets. The community's largest insurance carrier has agreed to aggressively market the Plan to existing customers and to participate with any employer whose present carrier does not want to assume their appropriate responsibilities by participating in the Plan.

Numerous Corporations and Unions have indicated their desire to participate and encourage their employees and members to participate. Existing closed panel HMO's in St. Louis operating from single sites have not been able to cope with the demand for prepayment. This community wide program will help meet the existing demand. Through inclusion of a wide spectrum of physician leaders as founders, we have been able to receive strong support of our fellow practitioners.

Why has such a unique response been experienced in St. Louis, known as a conservative bastion of private medicine? Can such a response be developed in other communities? We believe it can, but only with a non-threatening approach which clearly recognizes the importance of providing everyone an opportunity to participate and a reward for their participation. Because physicians both provide and determine the proper course of care, they are in effect both the provider and the consumer. The other key parties are labor and industry, who pay for the care.

PAST EXPERIENCE

St. Louis physicians know and HEW knows why HMO's have developed very slowly:

(1) lack of commitment by sponsors
(2) lack of management capability
(3) lack of providers
(4) failure to supply marketing support
(5) strong physician opposition

CURRENT AND SUCCESSFUL ACTIONS

To assure physician participation a plan must:

(1) Preserve the fee-for service concept, in that reimbursement should be made for each service rendered.

(2) Accommodate all types of medical practice, from the solo or small partnership to the large multi-specialty group.

(3) Afford those enrolled free choice of participating physician, regardless of specialty or practice setting

(4) Pay in full for nearly all medically related expenses, whether for inpatient or outpatient care.

(5) Pay for preventive as well as curative services.

(6) Streamline administration and eliminate patient billing and costly paperwork.

To assure industry and labor support, the plan must:

(1) Provide the credibility of participation by major health insurance carriers.

(2) Provide employers and unions the option of retaining their present hospitalization carrier.

(3) Provide employees the option to retain their present physician.

(4) Reduce the cost of administering their health benefit program.

(5) Not require employers to determine the appropriateness of care.

To assure everyone's support, we urge that the plan, through the use of the free enterprise system, should set the existing facilities, human resources and financial resources of the industry into an economic dynamic which will reverse the present incentive which results in a cost-plus spiral.

No amount of community planning, government regulation or control will be as effective in reducing cost as an economic dynamic based on the self interest of all concerned. The viability and responsibility of the free enterprise system are being tested and, in St. Louis, physicians and industry have clearly demonstrated a desire to rise to the challenge. We want our children and their children to have the same freedom to choose their doctor, but we also want them to be able to afford the care they need. To meet these medical needs, the responsibility is not for government to provide us the solution, but for physicians and industry to provide the solution.

CONCLUSION

If the continual support and development of federally funded programs are needed to stimulate an appropriate response, then so be it. In St. Louis, this is not the case, and it need not be in other communities. We hope by our example we will help others to recognize the opportunity.●

[2] *Medserco Incorporated*. Its Primary Care Systems Division, directed by Mr. James Dyer who managed five successful I.P.A. operations in Wisconsin is responsible for all management support.

RECENT FTC ACTIONS

HON. JAMES J. BLANCHARD

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Monday, March 20, 1978

● Mr. BLANCHARD. Mr. Speaker, as a supporter of vigorous antitrust enforcement and reasonable trade regulation to protect the consumer, I, as well as many others in Congress, have an interest in seeing that Federal action in this area be sensible and reasonable.

Without question, Federal resources to enforce antitrust laws and consumer protection laws are limited. These resources must be put to the wisest, most effective use. A recent editorial in the Wall Street Journal calls into question the wisdom of recent Federal Trade Commission actions regarding the cereal industry. In my mind it also calls into question whether Federal resources are, in fact, being put to their most effective use. For the information of my colleagues, the March 6 editorial appears below:

THREE QUARTERS OF A MONOPOLY

What is good news for Quaker Oats Company must logically be good news for the other ready-to-eat cereal companies in the industry's almost eight-year struggle against the Federal Trade Commission.

Quaker last week won from Harry R. Hinkes, administrative law judge of the FTC, a dismissal as defendant in the agency's "shared monopoly" case. Quaker, he decided, was not sharing in the monopoly. What this leaves us with is the silly proposition that Kellogg, General Foods and General Mills now constitute three quarters of a monopoly. This confounds logic as much as the idea of a three-quarters murder, which suggests to us that the sooner the government dismisses the entire case the sooner it can wipe the egg off its face.

The whole concept of shared monopoly was a silly one from the start, the idea that when a few producers share a major portion of the market they can act as a monopoly even without conspiring or colluding. The government would have us believe the four companies would make believe they were competing, dividing up the market with winks and signals, rigging high prices and preventing new competition from coming in to beat these shared-monopoly prices by spending lavish amounts on advertising that the "little guy" can't afford.

Quaker, we see, gets off this twisted hook because it increased its market share to 9% in 1972 from 2% in 1960 and because it evidenced "more rivalry" than the others in seeking supermarket shelf space. Thus, says Mr. Hinkes in his dismissal, the "record fails to show that an order against Quaker is necessary to restore competition in the industry."

It does not take a Jesuit to figure out that it takes two to tango and at least two to compete for supermarket shelf space. And if indeed the other three companies were somehow sharing a monopoly, it is not much of a monopoly if it allows a competitor to quadruple its market share. If there is no case against Quaker there's no case against anyone. We think the FTC and even much of its staff must know it has been engaging in foolishness.

And very costly foolishness at that. Quaker estimated that "despite efforts to minimize costs by handling its defense 'in house' (we) estimate the direct cost to it alone to be

$1,888,405 aside from the nonquantifiable disruptive effects to Quaker's business and the substantial expenditure of taxpayers' money by Complaint Counsel."

Indeed the FTC's staff architect of this effort, Michael Glassman, almost gave Judge Hinkes no other choice when he testified that relief against Quaker "was not essential and would do very little, only make a marginal contribution to increasing competition in the industry," and relief should be pursued only if "it could be obtained cheaply." Dropping Quaker, he said, "would save the public some money."

Does this mean that our bureaucrats in Washington are beginning to sense that their moments of whimsy, as with the concoction of the shared-monopoly theory, involve extraordinary expenses to the taxpaying and consuming public? FTC Chairman Michael Pertshuck says yes, from now on there will be a "cost-benefit analysis" of each FTC proceedings "to make sure consumers are better off than they were before as a result of our action."

But wait a minute! On the very day Quaker finally got out from under the shared-monopoly suit the Federal Trade Commission announced a brave, new proceeding. An inquiry would begin on whether or not all television advertising aimed at children should be banned altogether. An incredible FTC bureaucrat named Tracy Weston appeared on the Today Show to announce, wild-eyed, that television commercials manipulate little minds and must be prohibited. "Parents are helpless," he said. "Government must help parents, who after all cannot police their children day and night."

Who buys those commercials? Cereal companies. Luther McKinney, Quaker's senior vice president who personally argued the Quaker case on the shared monopoly suit, thus did not get even one day to celebrate. "The advertising ban proceedings," he says, "may take four or five years."●

H.R. 10982, FIRST FISCAL YEAR 1978 BUDGET RESCISSION BILL

HON. CARDISS COLLINS

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Monday, March 20, 1978

● Mrs. COLLINS of Illinois. Mr. Speaker, although I was not present on Friday, March 10, to vote on the passage of H.R. 10982, the first budget recission bill of fiscal year 1978, I wish to be recorded as in favor of this bill had I been present.

The effect of this bill, which passed the House by a vote of 318 to 0, is to rescind budget authority previously appropriated by the Congress for purposes that were later determined to be no longer necessary. Included in the bill are $40.2 million for military assistance to Turkey and Greece. Since the implementation of this aid had been made contingent upon a certain degree of progress by these two countries in resolving their dispute over Cyprus—progress which the President had determined had not been made—the committee has recommended this item for recission.

Other items affected by this bill include the Federal Home Loan Bank Board which utilized only $11.5 million out of $21.6 million in borrowing authority which had been appropriated by the Congress for the construction of its new headquarters. Accordingly, H.R. 10982 rescinds the $10.1 million that the Board did not utilize.

Finally, the legislation rescinds $5 million in budget authority for the U.S. share of expenses to maintain United Nations peacekeeping forces in the Middle East. This is due to the fact that in December the U.N. General Assembly approved peacekeeping budgets substantially lower than anticipated, and, as a result, the U.S. assessment was reduced from $32 million to $27 million.●

LIBBY KLAWUHN

HON. HENRY A. WAXMAN

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Monday, March 20, 1978

● Mr. WAXMAN. Mr. Speaker, it is with special pride that I ask the Members to join me in congratulating Libby Klawuhn for outstanding contributions to her community, State, and country on the occasion of the installation dinner of the Hollywood Highlands Democratic Club on March 31, 1978, in Los Angeles.

Libby is being honored for her service as a three-term president of that club, a duty which she carried out with distinction and leadership. But I would like to think of this commemoration as a tribute to her commitment to the principles of democracy through her tireless involvement with the candidates and causes she believes in, starting with the New Deal of the thirties to present day progressive issues.

In her various capacities as alternate to the Los Angeles County Democratic Committee, treasurer of the 45th assembly district council, an active member in the California Democratic council, she is known for her diligence, forthrightness, and as someone who can always be counted on. Not the least of her involvement is serving as a deputy registrar of voters—and in her enthusiasm to impart the spirit of citizen participation in the election process, she has undertaken all manner of tasks whether it be driving a citizen to the polls or getting information distributed where and when needed.

Professionally, Libby Klawuhn is a specialist in the field of temperature measurement instruments. She has also served as field deputy on the staffs of various legislators and in this capacity is the compassionate, efficient buffer between a constituent in need and the services of a sometimes indifferent public agency.

It would seem from all this that little time and energy would be left for the more frivolous interests. This is not so. Libby Klawuhn is a talented musician and composer, painter, science fiction enthusiast, and a first-class Dodger fan. Her friends come from all walks of life, all ages, all interests. They are a reflection of her own all-encompassing regard for human values and achievements.

Because of her special qualities, Libby Klawuhn might be rightfully termed a "Renaissance woman." Those who know and work with her would simply call her a very special human being.●

MILLER CHAIRS HEARINGS ON DOMESTIC VIOLENCE

HON. GEORGE MILLER

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Monday, March 20, 1978

● Mr. MILLER of California. Last week, I had the opportunity to chair hearings by the Subcommittee on Select Education on one very critical subject of domestic violence. The subjects of these hearings have been bills introduced by my colleagues, BARBARA MIKULSKI of Maryland, LINDY BOGGS of Louisiana, and NEWTON STEERS of Maryland. This legislation and these hearings have drawn national attention to this ignored and hidden crisis which, testimony has indicated, is a severe epidemic which transcends every barrier of race, educational level, income, and social status.

While congressional action has illuminated the extent of the problem, we certainly did not originate the idea of providing assistance to victims of domestic violence. That effort has been undertaken very successfully by community people in dozens of cities and rural communities who have established shelters and service programs with a minimum, or no Federal assistance whatever.

I think there should be Federal assistance, targeted specifically for the creation and replication of these locally based programs. A critical part of any Federal legislation must be that we scrupulously avoid introducing unreasonable bureaucratic requirements and redtape.

I look forward to working on developing legislation in this area. I would like to share my opening comments at last week's hearings with my colleagues in the House.

The statement follows:

HEARINGS OF DOMESTIC VIOLENCE LEGISLATION

Today's hearing marks the beginning of action in the House of Representatives which, I am hopeful, will conclude in enactment of legislation providing federal supports for shelters for victims of domestic violence.

Various experts, with far greater expertise in this field than I, will tell members of this subcommittee, and the general public, some extremely disturbing facts about the level of domestic violence which exists in our country. I need not recite the statistics at the outset.

It is important to note, however, that congressional action on the subject of domestic violence is not an example of responding to some fad. The evidence has clearly indicated that we in the Congress are well behind many committed people throughout the country who have recognized, and responded to this widespread problem long before legislation or financial assistance from the federal government became available.

I believe that the federal government should provide help to those operating, or seeking to establish, shelters for abused people throughout the country. But it is

terribly important, in constructing this federal policy, that we avoid establishing bureaucratic and other obstructions which will drain off funds needed for shelter operations and create a mountain of regulations and red tape.

The main goal of federal legislation should be to channel, to community based organizations, funds to assist in the maintenance or creation of shelters. Many successful models have been developed already with a minimum of direct federal assistance, if any, and we should build on these models while assuring that people in their own communities will make decisions about their shelters based upon the specific needs of their own communities.

This hearing, and others like it, can provide us with important information about shelters and the incidence of abuse. In preparation for chairing these hearings, I felt that I needed to gain more personal experience with the issue of domestic violence, and related problems, than I could get in the somewhat antiseptic atmosphere of a hearing room.

Over the past several weeks, I have spent several evenings in homes for abused women, talking with the people who organized the homes, and with the women themselves who sought refuge from battering spouses. I also spent time riding with policemen from nearby communities to gain firsthand their perspectives on the problems police encounter in this area.

These experiences, over several evenings of frank discussion, have greatly supplemented my awareness of the problem, and of the difficulties in offering assistance from the federal level. Most tragically, domestic violence appears to me to be one more piece of evidence that the myth of the American family, and the great value that we place on our children as "our most important resource", is at best a myth, and at worst a cruel lie.

In over three years of work on children and family issues—foster care, adoption, nutrition, education, health, and now domestic violence—I can only conclude that the American family is in the midst of a profound and frightening crisis. Ironically, I have learned, domestic violence is most likely to occur at times when the family is spending substantial amounts of time together—during holidays, on weekends.

The police have told me that domestic disputes are one of the three most frequent calls they receive, and the one they most dread, because the incidence of police deaths due to intervention in domestic disputes is the highest of any police action. Yet, although the police have been aware of the extent of the problem for so long, there are very few alternatives open for treatment. Under state and local laws, police responses are often severely restricted, and the issuance of a warrant for assault is not possible given the available evidence.

Often, the police tell me, they have neither the resources or the time to spend with the complaining party, which results in allegations that the police are "insensitive" or cavalier about complaints of domestic violence.

A related point which I think should be made concerns the personal problems of many police officers in dealing with this problem. From my conversations and from reading, I have learned that the emotional problems associated with high-stress police work often mitigate against an officer being able to serve the counselling function expected of him or her. Interestingly, the related problems of alcohol abuse, family arguments and high divorce levels which are associated with domestic violence are also unusually frequent in many police forces.

The major responsibility of dealing with domestic violence, therefore, should fall to those providing shelter and services to the victims. I have been pleased to learn that the police themselves are favorably disposed towards these shelters, because they provide a needed, non-legal response to women's serious problems. The success of these shelters, and the universally acknowledged breadth of the incidence of family violence, justify support for the kind of legislation we are considering here today.

I think it is very important to stress that domestic abuse is not by any means limited to one portion of the population. Both shelter operators and police have told me that they encounter middle and upper class victims as well as poor victims, from all races, educational and occupational backgrounds. Without divulging confidences, I think I can say that I have personally heard of cases where an abuser was a garbage truck driver, and a high ranking military officer.

Victims from differing background respond to abuse very differently. A poor victim often arrives at a shelter after years of abuse, informing the operators that she found the courage to leave her abuser only because finally there was a place to go. Without any financial resources of her own, she had had little alternative but to bear the abuse for eleven years, in the case of a woman with whom I spoke the other night.

A woman with her own career, or from a higher income family, may have somewhat different circumstances. In some cases, these women do not have access to the family's bank accounts, and are, for all purposes, destitute when they decide to leave their homes. I encountered one woman who left an abusing husband only to find, several days later, that he had sold all of her belongings, including family heirlooms. So, the mere fact that a woman comes from an affluent family is no assurance that she has access to financial resources.

In visiting shelters in middle class communities, I have found that some affluent women have an aversion to coming to the shelter proper. However, these women do use the hotlines to call the shelter staff for advice and counselling.

Another myth is that we should not provide aid to male victims of abuse. There is quite a bit of evidence that men are victims of domestic abuse, although they are (as many women have been) embarrassed or reluctant to admit to it. One woman victim told me that male victims of abuse do not turn up in shelters, but in morgues. "If I'm going to go after my husband," she said, "I'm not going to slap him. I'm going to be sure he can't come back at me." Police have confirmed that, in cases of male abuse, the injury is more often a gunshot wound than a black eye.

Regardless of the issue of who is abused, it is obvious that abuse illustrates severe problems within the whole family, and the evidence is that the whole family suffers. Research illustrates that an abusive spouse is likely to be an abusive parent, and that the child who witnesses or experiences abuse is likely to become an abuser in later life. In addition, given the fact that so many victims of abuse do return to their spouse, we must recognize the need to provide remedial counselling to the abuser, as well as to the abused.

In addition to providing money for the establishment and the maintenance of shelters, there are several other points which I would like to make about legislation on this issue:

1) We must bring about a large measure of coordination among various federal programs which may touch on this issue. LEAA, HUD, HEW, the Child Abuse Center, and other agencies have been developing or operating related programs already, and we should be careful not to duplicate past efforts with the limited funds we have available.

2) We should look to the many federal programs which could be brought into this effort to provide personnel to aid shelters. Congresswoman Mikulski has correctly drawn our attention to the role ACTION can play in this program by enlisting volunteers. We similarly should look to the Retired Senior Citizen Volunteer Program, and CETA to help staff shelters with skilled and trained people from the community.

3) Very importantly, we must not raise unreasonable expectations that, through this legislation alone, the federal government will be able to supply unlimited funds for shelters throughout the country, because that will not be possible. Ultimately, it is my hope that our limited resources will be used to put shelters on a stable footing so that they can compete for other money, such as revenue sharing and Title XX of the Social Security Act, within their own state and local community.

I have become aware of the fact that serious questions currently exist about the ability of shelters to utilize Title XX funds. To eliminate any problem in their gaining access to this important source of federal funding for social services, I will introduce early next week legislation to:

Specifically authorize the use of Title XX funds for adults or children who require shelter or services on an emergency basis because of the danger of physical or mental injury or abuse;

Provide that all funding for shelters shall be on a short term, emergency basis;

Provide a waiver from regular Title XX income eligibility standards for those utilizing such services because of the questionable financial circumstances of people using shelters;

Limit the amount of federal money which any one shelter may receive within one year from Title XX.

This legislation will serve as an important supplement to the Domestic Violence bills we are considering today. Hopefully, the testimony we will hear during these next two days of hearings will provide us with the groundwork on which we can move swiftly to enact these programs and provide much-needed federal assistance to these shelters and the people who so badly need the services they provide.●

STATEMENT ON PANAMA CANAL TREATIES APPLAUDED

HON. ROBERT J. LAGOMARSINO

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Monday, March 20, 1978

● Mr. LAGOMARSINO. Mr. Speaker, on March 6, 1978, our colleague from California, Mr. LEGGETT, sent to all the Members of Congress a copy of his statement concerning the environmental impact of the Panama Canal treaties on the Canal Zone. I would like, at this time, to compliment my colleague on his fine statement.

I was most disturbed over many of the problems presented in the statement. The Carter administration has already usurped the constitutional right of the House to vote on the transfer of U.S. property. It now appears that the executive branch has prepared an inadequate environmental impact statement as required by the National Environmental Policy Act.

The environmental implications of the canal treaties have not received adequate

attention. I strongly urge my colleagues to carefully study Mr. LEGGETT's informative statement.●

THE 60TH ANNIVERSARY OF BYELORUSSIAN INDEPENDENCE

HON. EDWARD J. DERWINSKI

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Monday, March 20, 1978

● Mr. DERWINSKI. Mr. Speaker, as I have in the past, I wish to direct special attention of the Members to the commemoration of Byelorussia's Independence Day. Sixty years ago, on March 25, 1918, the Byelorussian people proclaimed their independence from Communist Russia and declared the autonomy of the Byelorussian Democratic Republic. The Soviet Government retaliated almost immediately, annulling that spark of freedom by creating the Byelorussian Soviet Socialist Republic and cementing it within the ironfisted grasp of the U.S.S.R.

However, that fierce desire to be free remains in the hearts and minds of the people of Byelorussia. Despite the continuous oppression imposed upon them by the Russian Communist regime, the Byelorussians have at every opportunity, sought to restore their national identity as a sovereign state, free from the forces of Communist domination and control. At the end of World War II, the All-Byelorussian Congress again convened to approve a second proclamation of independence, but was soon dispersed by the Soviet armies.

Throughout their history, the Byelorussian people have transmitted from generation to generation their national identity through their cultural achievements language and rich heritage. The knowledge of what it is to be free and the determination for this renewed freedom continues to inspire these valiant people in their dream of restoring their homeland as an independent nation.

It is indeed an unfortunate development that the Byelorussian people, whose heritage is so rich in traditions of democracy, live under the oppressive rule of the Soviet Government. As we commemorate their independence of 1918, we highlight this day as a symbol of the national aspiration of the Byelorussian people for their sovereignty and self-determination. We also command and acknowledge the courage of the Byelorussian people.

Now more than ever, when human, national, religious rights are actively defended throughout the world, but are subject to flagrant violations that occur in Communist countries in Eastern Europe, including Byelorussia, this commemoration gains additional significance. Through this annual observance on behalf of the Byelorussian people, I trust that we can help reassure those brave people whose human rights and cultural heritage are held captive, that they will continue to receive our encouragement and recognition for their paramount goal of self-determination.●

WHO BEARS THE TAX BURDEN?

HON. ELLIOTT H. LEVITAS

OF GEORGIA

IN THE HOUSE OF REPRESENTATIVES

Monday, March 20, 1978

● Mr. LEVITAS. Mr. Speaker, it has long been my contention that the person who bears the heaviest relative burden of the Federal income tax bill in this country is the "middle-income" taxpayer. As the cost of running the country goes up, both in real dollars and inflated dollars, the largest portion of those extra dollars comes from this middle-income group.

The Tax Foundation, a nonpartisan research organization, has interpreted recent IRS statistics of income—how much different income groups pay in taxes—and has discovered that the middle-income taxpayer is in fact footing the largest portion of the bill. I would like to share the results of the Foundation research with my colleagues, because I think they are important for us to be aware of as we undertake new tax legislation in this session of Congress.

Is it fair to continue to sock it to these same people and groups? Are we creating disincentives to this productive segment of our society? When we talk of "tax relief," shouldn't these people be the recipients of some relief rather than the bearers of additional burdens?

I offer for the RECORD the report of the Tax Foundation at this point:

TEN PERCENT OF TAXPAYERS PAYING HALF OF U.S. TAX BILL

Tax Foundation computations based on the recently released *Statistics of Income* of the Treasury Department show that 5 percent of the taxpayers—those with adjusted gross income of $29,272 or more—paid more than one-third of the total personal income taxes collected by the Federal government in 1975. The top 10 percent of taxpayers—those earning $23,420 or more—picked up the tab for nearly half the total tax bill.

Similarly, taxpayers with AGI of $15,898 or more, representing one-fourth of all taxpayers, footed 72 percent of total tax liabilities. In contrast, the lowest 25 percent of taxpayers contributed less than 1 percent of total income taxes paid; the bottom 50 percent accounted for only 7 percent of tax collections.

Although much has been said about high-income taxpayers with little or no tax liability, the latest Statistics of Income showed that the 1,149 taxpayers earning $1,000,000 or more in 1975 paid an average tax of $1,011,317. The total tax paid by these few high-income taxpayers added up to $1.15 billion.

Moreover, as shown in the accompanying table, the relative share of the tax burden taken by upper income taxpayers has been increasing. For instance, the highest 10 percent paid 45.0 percent of total taxes in 1970 but their burden had increased to 48.7 percent by 1975. The share of the upper 25 percent went up from 68.3 percent in 1970 to 72.0 percent in 1975. At the same time, the small proportion paid by taxpayers in the lower income brackets shrunk to even smaller percentages over the 1970–1975 period. In addition, several million taxpayers disappeared from the tax rolls altogether as a result of legislative changes benefiting those with lower incomes during the period 1970–1975.

Adjusted gross income reported on all tax returns rose from $632 billion in 1970 to $948 billion in 1975, or 50 percent, according to Tax Foundation. During the same period the average tax per return increased from $1,415 to $2,020, or 43 percent. The difference between the change in AGI and average tax reflects primarily sharp increases in the amount claimed under the standard deduction—$32 billion in 1970 and $101 billion in 1975, a rise of over 200 percent. Itemized dividual income taxes paid increased from $88 billion to $122 billion, or 38 percent; personal exemptions rose 25 percent, from $128 billion to $159 billion.

Still other comparisons: total Federal individual income taxes paid increased from $84 billion in 1970 to $125 billion in 1975, or 49 percent, but the number on whom the burden of paying taxes fell increased only 5 percent, from 59 million to 62 million.

The Mid-Session Review of the 1978 Budget estimates individual income taxes at $158 billion in fiscal year 1977 and $178 billion in fiscal 1978.

PERCENT OF TOTAL TAXES PAID BY HIGH- AND LOW-INCOME TAXPAYERS, 1970 AND 1975

Adjusted gross income class	Income level		Percent of tax paid	
	1970	1975	1970	1975
Highest 1 percent	[1] $43,249	[1] $59,338	17.6	18.7
Highest 5 percent	[1] 20,867	[1] 29,272	34.1	36.6
Highest 10 percent	[1] 16,965	[1] 23,420	45.0	48.7
Highest 25 percent	[1] 11,467	[1] 15,898	68.3	72.0
Highest 50 percent	[1] 6,919	[1] 8,931	89.7	92.9
Lowest 50 percent	[2] 6,918	[2] 8,930	10.3	7.1
Lowest 25 percent	[2] 3,157	[2] 4,044	.9	.4
Lowest 10 percent	[2] 1,259	[2] 1,527	.1	.1

[1] Or more.
[2] Or less.

REV. B. T. NELSON MARKS 50 YEARS IN THE MINISTRY

HON. LOUIS STOKES

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Monday, March 20, 1978

● Mr. STOKES. Mr. Speaker, I rise on this occasion to bring to your attention and to the attention of my colleagues in the U.S. House of Representatives, one of the leading ministers in the greater Cleveland, Ohio, area, the Rev. B. T. Nelson.

For 50 years, Reverend Nelson has been a devoted minister of the Gospel. Thirty of those years have been spent in Cleveland as the pastor of the Mt. Nebo Baptist Church at 12701 Superior Avenue in East Cleveland. During these years, Reverend Nelson has been a source of inspiration and guidance to his parishioners and to the community at large. He is a member of numerous civic and social welfare organizations including the Urban League of Cleveland, the NAACP, Hough Area Development Corporation, and the 21st Congressional Caucus. In addition, he is an active leader in the Baptist Church both locally and nationally. Some of these religious organizations include the National Baptist Convention of the USA, the National Baptist BTU and Sunday

School Congress, the Ohio State Baptist Convention, the Progressive Baptist District Association, the Greater Cleveland Interchurch Council, the Baptist Pastors' Council of Cleveland and Vicinity, the East Cleveland Ministerial Alliance, and the Interdenominational Ministers Alliance.

Mr. Speaker, on Saturday evening, April 1, 1978, the members of Mt. Nebo Church will hold a testimonial banquet in honor of Reverend Nelson to celebrate his 50 years in the ministry. To commemorate this event, Mr. Speaker, I would like to ask that my colleagues join me in extending our congratulations to Reverend Nelson and the members of the Mt. Nebo Baptist Church on this auspicious occasion. It gives me great inspiration to see a church community as strong and full of faith as Mt. Nebo's. Reverend Nelson is to be commended for a job well done.●

DISSENT WITH CIVILITY

HON. NEWTON I. STEERS, JR.

OF MARYLAND

IN THE HOUSE OF REPRESENTATIVES

Monday, March 20, 1978

● Mr. STEERS. Mr. Speaker, when passions run high during debates such as those on the Panama Canal treaties which are largely centered in the other body, at present, we may lose our patience, our good humor, our "cool."

With the thought that we Americans can use all the cool we can get, I submit the following copies of letters, the first of which was on the stationery of the Manchester (N.H.) Union Leader, which features the slogan, "There Is Nothing So Powerful as Truth":

Representative MILLICENT H. FENWICK,
House of Representatives,
Washington, D.C.

DEAR CONGRESSWOMAN FENWICK: You will not like the enclosed front page editorial, but this is how I see it.

Regarding the situation on the Panama Canal, you know what the polls indicate and you are not only voting against it but you are also throwing away a great political issue and are handing it to the Democrats on a silver platter.

Stupider than that you couldn't be.

Regards,

WILLIAM LOEB,
President.

Mr. WILLIAM LOEB,
President, Union Leader Corp.,
Manchester, N.H.

DEAR MR. LOEB: Thank you very much for your letter. I was impressed by your bannerline: "There is nothing so powerful as truth."

There is nothing so convincing as accuracy.

There is nothing so winning as courtesy.

There is nothing more desirable in our plural society, under our Constitution, than the practice of dissent with civility.

Each one of us is entitled to his or her opinion, and you may be surprised to know that I was delighted—though not surprised—to learn about yours.

Sincerely,

MILLICENT FENWICK,
Member of Congress.●

SHE SERVES WHERE SHE'S NEEDED

HON. HERBERT E. HARRIS II

OF VIRGINIA

IN THE HOUSE OF REPRESENTATIVES

Monday, March 20, 1978

● Mr. HARRIS. Mr. Speaker, so often in civic life we will see a community become something different—something special. The streets may look the same as other communities, the homes may appear the same—even the people. But, the community is different. The people care for one another; and, therefore, do for one another. Problems are not "accepted," they are challenged.

What causes that difference? Usually, one or two people who are special because of a unique gift of commitment.

In Alexandria, Virginia, Annie Rose is such a person. Her philosophy is direct and profound: "I serve where I'm needed."

I would like to share with my colleagues a recent article in The Alexandria Gazette, which tells us a little more about Annie Rose— and about ourselves.

The article follows:

[From the Alexandria Gazette, Mar. 17, 1978]

AN ALEXANDRIAN "YOU CAN'T HELP LOVING"

(By Beverly A. Moses)

Debbie Brown of the Alexandria Urban League describes the 83-year-old Alexandrian as someone you have to love.

Anne Rose, she said is always running around doing something for somebody.

Currently a member of the United Way, the League of Women Voters, the Golden Age Club, the Crunch Bunch and numerous other volunteer organizations, Mrs. Rose believes that "two things stand out in a person's life and they are love and service."

She said her volunteer activities have been aimed at getting senior citizens "out and involved in the community," but she is especially interested in the housing problems in Alexandria.

Formerly on the Commission for the Aging, Mrs. Rose was one of those responsible for the creation of the Senior Citizens Employment and Services of Alexandria, Inc. More recently, City Manager Douglas Harman asked Mrs. Rose to serve on the Alexandria Economic Opportunities Commission.

Mrs. Rose has openly criticized officials who she thought were in positions to do something about present minority housing problems but failed to do so. She is particularly disturbed now about the Alfred Street dwellers who are being forced to move out of their homes so that the houses can be rebuilt and resold, she said.

Mrs. Rose said she herself was almost a victim of the urban renewal redevelopment project now going on in the city. It was the decision by local officials to preserve Old Town that saved her old Duke Street house.

Although she was almost forced to move out of Alexandria, Mrs. Rose said it wasn't by choice that she moved here in 1943.

Living in Occoquan at the time, she was renting a house in Alexandria to a man who used the house for purposes she didn't approve of. Mrs. Rose sought a court order to remove him from the premises and was told that she would have to move in if the man was forced to move out.

"People ask me why I worry about these things," she said, "but something has got to be done."

Mrs. Rose believes that people are just not concerned enough about people.

The haves resent the have-nots, she said, "and it's hurting us."

"We're just living in a, I don't know what kind of world it is." Mrs. Rose said, "but it's got to change.

"This seems to be an age where people really don't care. It's become something of a sadistic world," the Alexandrian continued. "People can hurt your heart, they can hurt your body and they just don't care."

Mrs. Rose thinks that it is up to today's young people to implement changes in society "so that we can get back to values, because polarization is taking hold of our country again."

Regardless of what they do to her, Mrs. Rose said, she can't hate people. She recalled that her father had a great love for people and often told her of the good that he encountered during his life.

"My father, the late L.H. Bailey, was a slave," she added.

Originally sold in Dranesville, her father was taken to Texas, where he worked until freed at the age of 21.

Bailey then searched until he found his mother in a house on the corner of Queen and Alfred streets in Alexandria.

He soon found a job laying track for the railroad line being built between Washington and Richmond, Mrs. Rose said, but like most former slaves, Bailey was not content.

He was eager to learn. On his lunch break he would see newspapers lying around and wish that he could read them. Somehow, she said he knew that he would learn one day.

Bailey was right. While he looked yearningly at the newspapers, one of the other employees, a white man, was watching him. Finally, the man came to him one day and offered to spend his lunchtime teaching Bailey to read.

Later, Bailey met others who were impressed with his eagerness to learn.

"Finally, he ran into a real philanthropist," Mrs. Rose said.

"That man was so impressed that he got in touch with an organization who later sent my father to Whalen Seminary."

"This is why I hesitate when people say that I've done things," Mrs. Rose said. "I haven't done anything."

When her father was graduated with an education degree, Mrs. Rose said, "he graduated in one boot and one shoe.

"Later he told me he wasn't ashamed 'although they laughed at me,'" she said.

Bailey later founded the Greater Zion Baptist Church in Occoquan and also founded a school there, Mrs. Rose said. He asked the father of another Alexandrian, Helen Day, to come and teach music.

"Then people were eager to learn," Mrs. Rose said.

The recent recipient of the Alexandria Chamber of Commerce George Washington Leadership Medal and the Urban League Award for her humanitarian activities, Mrs. Rose tries to help others in any way she can.

She was the first recipient of the Woman of the Month Award given by the Alexandria Commission on the Status of Women for her voluntary efforts to improve human rights.

Mrs. Rose also donates her time to the YWCA, to Church Women United and to the Manassas Educational Association. She was the first black woman to serve as president of the Women's Civic Club of Alexandria, as delegate to a Virginia state Democratic convention and on the local chapter of the League of Women Voters.

Her husband, William H. Rose, died in 1941 and Mrs. Rose said she doesn't have any living family except a brother in Washington.

With time on her hands, Mrs. Rose isn't waiting for young people to act before doing what she can to change this world, a world she describes as being "in a terrible confusion."

"I serve where I'm needed," she said.●

CONNECTICUT'S VOICE OF DEMOCRACY WINNER

HON. ROBERT N. GIAIMO

OF CONNECTICUT

IN THE HOUSE OF REPRESENTATIVES

Monday, March 20, 1978

● Mr. GIAIMO. Mr. Speaker, for 20 years the Veterans of Foreign Wars have been associated with the Voice of Democracy Scholarship program, which this year involved a quarter million high school students. They vied to win this speaking contest in their respective States. This year's contest theme was "My Responsibility to America." Many of us in adult life do not reflect often on the matchless virtues of being an American, but our youth often weigh these values and do it very eloquently.

Thus, I am happy to inform you that the winner of the Connecticut State contest this year was David C. Cullison, a student at Guilford High School in Guilford, Conn. "Cully" Cullison plans to pursue a career as a political scientist and is the chairman of his school chapter of the Young Americans for Freedom, mirroring talents that he displays in his speech.

It is a real pleasure to include Cully's contest-winning speech in the RECORD and to bid him well in his future career:

MY RESPONSIBILITY TO AMERICA

(By David C. Cullison)

On contemplating one's responsibility to America, many people tend to become overawed by the feeling of thankfulness that every American should have for being a citizen of the nation that provides her people with a greater combination of political freedom and economic prosperity than any other nation on earth. There are those who call to mind the great heroes of America's past when thinking of their responsibility to America, yet one's responsibility to America is not just the willingness to perform great deeds should the opportunity come one's way. The responsibility each and every American has to their nation is to do the simple things in their day to day life that will insure the continuance of American greatness.

America is a country of great prosperity. However, for American prosperity to continue, the American worker must be productive. Should I become a businessman I must be willing to do my best to produce the best possible product. Should I become a worker I must try to work more efficiently and effectively than anyone else. No matter how humble my job may be, if I can leave my work each day and say, "I have done my best," then I have contributed to America's greatness.

American cherishes the great statement of our history. Yet it is not the responsibility of every American to become a political leader. None the less, I, as a citizen, do have the responsibility to American democracy. Statistics show that only two-thirds of those eligible to register as voters do so, and only a little more than half of those registered actually vote.

Democracy can only survive where the spirit is held dear. It is my responsibility to America to register and to vote regularly. While I may not become a great political leader, if I study local and national issues, I can follow the candidates' positions on these issues, and therefore vote more wisely. It is simple to become even more involved in the democratic process by volunteering my services to the candidates whom I support. Candidates are always eager for volunteers and I have the responsibility to support those candidates who I believe can best serve my community and my nation.

America has always needed great leaders and great heroes. While I may never be a great leader or hero I can help preserve an America that can produce leaders and heroes. Should I choose to marry and have a family, I owe it to America and myself to choose my spouse with care and to raise my children in a healthy atmosphere, to see to it that they have the best possible health care. I should teach my children right from wrong and instill in them a love of their country and pride in their American heritage. I should show them the responsibility they have toward America. As the family is the basic unit of America we must use the family to see to it that the next generation of Americans is capable of continuing America's greatness.

America has produced some of the great military heroes of all time. Yet not all Americans are expected to become military leaders. While I may not pursue a lifelong career in the military, I must be willing to bear arms to protect my country. As one who cherishes the American way of life it is my responsibility to defend America. It is not enough to love the liberty that America offers, I must be willing to fight to see that future generations of Americans have these same liberties. As General Douglas MacArthur said, "Only those Americans who are willing to die for their country are fit to live."

The responsibilities outlined above may seem commonplace beside the heroics of those few who have become the great men and women of American history, they are by no means easy to fulfill. Despite the fact that they are difficult they can be fulfilled by virtually all Americans. They are indeed the heroics of the many unnamed people who are the backbone of America. If I and all my fellow Americans fulfill these responsibilities, the continuance of America's greatness would be secure.●

THE BERLIN WALL—A SOBERING SCENE

HON. LARRY McDONALD

OF GEORGIA

IN THE HOUSE OF REPRESENTATIVES

Monday, March 20, 1978

● Mr. McDONALD. Mr. Speaker, as a culmination of being unable to convince the East Germans that Marxism was the wave of the future, the East German Government, with the aid of the U.S.S.R., erected the wall of Berlin in 1961. This was designed to prevent the brain and population drain from East Germany as well as the propaganda embarrassment that accompanied it. Last year, Penney Pullen, a State representative from Illinois, visited this "wall of shame" and it made a deep impression on her as well it should all free people. She reported her impressions in the Park Ridge Herald on October 13, 1977. I commend her column to the attention of my colleagues:

THE BERLIN WALL—A SOBERING SCENE

I have now seen The Wall, and I'll never be the same.

A peaceful wall built by peaceful soldiers to keep the happy citizens of East Berlin secure in their prosperous paradise. And beyond, a peaceful expanse of lush green grass, adorning a peaceful minefield.

It is chilling. It is shocking. It is inhuman. The 23 laughing, sightseeing American tourists—all young politicians of varying experience and background—clamber off the bus and walk to a small platform, passing a little souvenir stand. They climb the 10 or 15 steps in a brisk wind. At the top, the chattering stops.

How stark The Wall, so near—almost within reach. The grassy field known as no-man's land. The second wall hundreds of yards away, just at the edge of government buildings. The guardhouse 30 to 40 feet in the air. The guards can see us. They have no choice but to see tourists gawking at their deathwatch all day, every day. What are they thinking?—Surely they know what we are thinking. Surely they are ashamed.

After a few moments of silence, the young guide points to a small rise in the green field. "That's where Hitler's chancellery was." But it's only a hillock now. The Wall is today.

We don't want to leave. We've not yet reached the depth of emotion we can sense is in us. It is as if our standing there looking and feeling can somehow help the people who must be over there somewhere. If that's all we can do, we want at least to stay and do that much.

But three more groups are waiting. And we lumber down the steps, a little hesitantly, drifting off in thought, then wanting to be together, looking around for each other, visting the souvenir stand with thoughts of how crass was its existence and, arriving, realizing that here was not simply an array of Souvenir of Berlin keychains but an arsenal of truth: poignant posters of black and white photos taken at The Wall books about it, post cards of it, items to help us tell others what cannot be adequately expressed.

We have now seen The Wall. And it will never be the same. For in speaking of it and living with its memory, we do more to help the people over there than simply standing and looking and feeling. Each of us 23 Americans will do our part to dismantle that wall, stone by stone.●

A TRIBUTE TO MR. AL GAZVODA

HON. PHILIP E. RUPPE

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Monday, March 20, 1978

● Mr. RUPPE. Mr. Speaker, later this month, Al Gazvoda, who is a good friend and outstanding employee of the Michigan Employment Security Commission, will be retiring after 40 years of service to the State. Al has compiled a remarkable record of achievements throughout his career, and we in the copper country are especially proud of his contributions to the State. The Michigan Legislature in Lansing has recognized him for his work, and I am honored to bring to the attention of my colleagues the legislative resolution which cites some of the highlights of Al's decades of work for the people of Michigan:

Whereas, it has come to the attention of the Michigan Legislature that one of Michigan's leading state employees, Albert J. Gazvoda, district supervisor with the Michigan Employment Security Commission, will retire this month after nearly 40 years of meritorious service to the citizens of this state; and

Whereas, employment problems and job development have been his long time vocations, having joined the National Re-employment Service in 1935 and then the Michigan State Unemployment Commission in 1938; and

Whereas, he compiled an impressive record in attracting industries, job saving gov-

ernment contracts, and training programs to Michigan's Upper Peninsula; and

Whereas, during World War II he was responsible for German prisoners of war assigned to the Upper Peninsula to work on war manpower programs thereby aiding the nation's war effort; and

Whereas, he demonstrated a great ability in coming to grips with a variety of serious problems and in the cultivation of good working relations between the Michigan Employment Security Commission and the community; and

Whereas, in 1973 he was named the Upper Peninsula Man of the Year by community business leaders for his efforts to improve employment in that region; and

Whereas, in 1975 he was cited by Northern Michigan University when he was named recipient of the President's Award for Distinguished Citizenship for his contributions to the training of unemployed individuals in the Upper Peninsula; and

Whereas, in April of this year he will receive Hancock's Suomi College Award for his contributions to education and community participation which led to opportunities for individuals desiring higher education; and

Whereas, he was the longest acting district supervisor in the history of the Michigan Employment Security Commission; and

Whereas, he is representative of those who are not only concerned about but also actively involved in alleviating the employment problems of Michigan's Upper Peninsula, now therefore be it

Resolved by the Senate (the House of Representatives concurring), That the Michigan Legislature accord Albert J. Gazvoda its highest tribute in recognition of his many years of distinguished and dedicated public service and extend to him best wishes for a happy and rewarding future; and be it further

Resolved, That a copy of this tribute be transmitted to Albert J. Gazvoda in testimony to the high regard in which he is held by the Michigan Legislature.●

ABDUCTION OF ALDO MORO CONDEMNED

HON. ANDREW MAGUIRE

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Monday, March 20, 1978

● Mr. MAGUIRE. Mr. Speaker, I rise in support of House Resolution 1082, which expresses the sense of the American people that the abduction of former Italian Prime Minister Aldo Moro was an act which demands international condemnation.

Running a ruthless campaign of political terror in Italy, the urban guerrilla group Red Brigades has disgusted the entire world. They have kidnaped the former Italian Prime Minister, and in so doing, murdered without mercy or conscience, five of his aides.

This politically motivated, death-wielding abduction is a horror to the Italian people, to Italian democracy, to humanity, and to the very concept of freedom.

Cold-blooded terrorism has no place in national or international relations. I support fully and absolutely my colleague Representative PETER RODINO's resolution of condemnation of these scornful events in Italy.●

VICE PRESIDENT MONDALE SPEAKS AT JOINT CENTER FOR POLITICAL STUDIES DINNER

HON. CHARLES C. DIGGS, JR.

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Monday, March 20, 1978

● Mr. DIGGS. Mr. Speaker, on March 9, at the first annual dinner given by the Joint Center for Political Studies here in Washington, D.C., Vice President MONDALE spoke to the assembled crowd of thousands about his own perceptions and views on black progress in the political life of our Nation. The very distinguished members of the audience, from every sector of political, economic and social life, was greatly moved by his remarks, and I would like to share them with my colleagues in the House:

ADDRESS BY VICE PRESIDENT WALTER P. MONDALE

President Eddie Williams, Chairman Louis Martin, Editor Oliver Cromwell, Vice President Eleanor Farrar, ladies and gentlemen:

It is a privilege to join with you tonight for this great event. I can't help thinking in these surroundings how far we have come in a short time. As Ed (Senator Edward Brooke) points out, there is so much further that we must go, and yet one cannot help but be enormously impressed by the profound changes in public life in this country that have come over this nation in the last 10 to 15 years.

This organization, those of you at this head table and in this room, have been at the forefront of all of those fundamental reforms in American life that have been won at such great cost—sometimes at the loss of life itself—as this nation has begun to rendezvous with its conscience and place its principles and its practices on the same plane.

This past few weeks it was my heavy responsibility, along with so many of yours, to participate in a funeral of one of the great exuberant, ever-present, always committed champions of human rights, Hubert Humphrey.

I think it caused us all to think of the time we shared with him, and that is what I did. And I must say I doubt that there has been any period in American history where more people saw the issues more clearly, fought more courageously and effectively, and achieved more fundamental reforms in law and in outlook than was accomplished during the 10 and 15 years when he was in his ascendancy.

I went to the funeral the other day of "Chappie" James. Coleman Young and Charlie Diggs and so on were together with him in the Tuskegee Air Corps experiment in World War II when the question was whether a black could fly. That was the kind of questions they were asking, unbelievably, in those days.

Today those changes are profound and thorough. We passed the Civil Rights Act, which they said was unpassable. We stuck with the one man/one vote principle, and we sometimes forget there was massive pressure to amend that and destroy that principle in American law.

We passed the Voting Rights Act and passed the Fair Housing Act and a range of other legislation of that kind that began the long march toward the elimination of official discrimination and to the clothing with power of every citizen in this country.

Everyone has their favorite law, but my favorite one is the Voting Rights Act, for a simple reason. I have met a lot of dumb politicians in my life, but I never met a successful one who couldn't count.

And people count, all of us count, if we care to, in American life today. And what is special about this Joint Center is that on a wholly bipartisan basis, with a highly skilled staff, modestly—too modestly funded—this center perceived the enormity and potential of the developments that were underway and has done as much good to help this process along, to help new political officers being elected at all levels of government, by way of communicating with each other, by way of providing technical assistance and qualified, and has contributed in a profound way to not only the momentum but the quality of progress that has been underway. And I am enormously proud to be here tonight with you to help this effort along.

There is so much more that needs to be done. One thing I hope we can do in this Congress—I don't know if we can—is to pass a system of public financing for congressional elections. We passed it for the Presidency.

It is still the case that, although everyone has one vote in American life, thank God, if they wish to exercise it, that it is still possible to amass vast quantities of money and, through the use of it, to have a disproportionate influence, contrary to the fundamental principles of American democracy; and in some of the worst cases, to have to make sordid compromises to boot.

We still have a long way to go, and we are beginning to make progress in bringing democracy to the nation's Capital. We elect local officers, but although the District of Columbia's population exceeds, I think, some 20 states in the Union, the citizens of this community cannot elect a voting Member of the House and cannot even elect an observer to the United States Senate.

The District of Columbia has many problems, but as Senator Fauntroy—was telling me the other day, what we need is one of us in the Senate.

We made great progress in the House the other day, with the help of the labor movement, civil rights movement, everyone at this table, and we can do the same in the Senate, right after the Panama Canal Treaties are ratified.

We need to act favorably on the President's sweeping proposals to reform the governmental structure for the enforcement of civil rights at the Federal level. Today the structure of civil rights enforcement is spread all over the Federal Government, so many offices that it defies any kind of rational enforcement policy.

We have made a thorough, in-depth study of what is needed simply to enforce the Federal laws and regulations that are now in existence. This proposal is the product of sweeping study, consultation, and a direct result of doing exactly what Eleanor Holmes Norton told us to do. And we think it ought to be approved, and we hope the Congress will quickly ratify the President's proposals on reorganization of the civil rights effort in Federal structure.

We need to know that elimination of discrimination is not enough. We cannot escape the truth that a ghetto looks no different from the front of a bus, and we need to have not only justice in law but in life. And this requires a continuing, all-out, unremitting policy of full employment in this country.

It must involve this year the adoption of the Humphrey-Hawkins legislation.

There is much else that needs to be done. We have passed a beginning youth employment bill. Now, there are things we can do in this country by way of macro-economic growth, and I am glad to say that Reg Jones is one of the growth people in this country.

There are many things that we can do, but we have learned enough to know that we also need special programs to go particularly to the young people of this country and particularly the minority youth, who are stand-

ing around the center cities of this country by the hundreds of thousands, week after week and month after month and year after year, utterly destroying any sense of self-worth or hope; days and years in which they never have a job, they never learn a skill, they never feel good about themselves. And whether it is in the ending years of a poor school or the endless days in the street, every minute of their lives they are reminded that they are a failure.

This nation cannot afffford to pay that cost. It is the most expensive bill that this country is paying today.

Someone once said, "Our young people make up something like 40 percent of our population, but they make up 100 percent of our future."

We have passed a Youth Employment Act. It is beginning now in some of our major cities, beginning to make a difference. But I don't think we should stop until every young person in this country who needs a job and needs training gets this as a matter of right and can be a part of this country.

We must continue to work with the gifted officials in local government, the Maynard Jacksons and the Dick Hatchers and the Coleman Youngs and the others, to make certain that local government grows and prospers and is better able to meet the overwhelming problems that sometimes face the center cities of our country.

We need to build on the programs that we now have, not only in terms of full employment, but in the total urban package, in decent housing. We have added substantially to education, and I would like to take just a minute, if I might, here. There are many things that parents want for their children, but I think above all they want their kids to have the training and the education to permit them to compete with others once they are out of school.

For too many kids in this country, that is not for them. They go to school and in the first years they are behind. They usually go to the poorest schools. They don't get the basic training that they need to read and write. And every day in that school they realize that they are falling behind.

I am proud of the fact that in two successive years, last year and this year, President Carter has added more money to Title I and other funds for elementary and secondary education, particularly for young people, than any other President in American history.

We need to have a system of national insurance in this country. And there is much more that needs to be done. You are a part of every one of these efforts.

Roosevelt once said that "Governments can err, governments can make mistakes, but the Divine Leader measures the sins of the cold-blooded and the sins of the warm-hearted on different scales. Better the occasional sin of a government operating in the spirit of charity than the sins of a government frozen in the ice of its own indifference."

That is what this council is all about, and that is why I am proud to be with you.

Thank you very much.●

PERSONAL EXPLANATION

HON. ELIZABETH HOLTZMAN

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Monday, March 20, 1978

● Ms. HOLTZMAN. Mr. Speaker, I was unable to be present for the following votes. If I had been present, I would have voted as indicated:

MARCH 14, 1978

Rollcall 143, "yes,"
Roll call 148, "yes." ●

DRUG ABUSE OFFICE AND TREATMENT AMENDMENTS OF 1978

HON. PAUL G. ROGERS

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

Monday, March 20, 1978

● Mr. ROGERS. Mr. Speaker, today I am introducing the Drug Abuse Office and Treatment Amendments of 1978, a bill to extend for 1 year the authorizations of appropriations for the National Institute on Drug Abuse under the Drug Abuse Office and Treatment Act. These authorizations are due to expire September 31, 1978.

Last July the President transmitted to the Congress Reorganization Plan No. 1, calling in part for the abolishment of the Office of Drug Abuse policy. At that time, much concern was expressed by myself, many of my distinguished colleagues, and others about the elimination of that Office since it is the only centralized drug abuse policy and coordinating entity within the Executive Office of the President. We were particularly concerned since the Congress created ODAP to meet the need for an arbitrator in the development, coordination, and implementation of Federal drug abuse policies and activities emanating from approximately 20 Federal agencies with diverse and often conflicting responsibilities. During the course of the debate over the reorganization plan, assurances were made by the Executive Office to Members of Congress that ODAP's functions would be carried out by a system of other identifiable, and adequately staffed entities within the EOP. Reorganization Plan No. 1 subsequently became effective, and I understand that it will be implemented sometime in April, thus officially terminating ODAP at that time.

Since many questions remain unresolved respecting the future effectiveness of the proposed drug abuse policy and coordinating system in the EOP, I am proposing legislation which provides for a 1-year extension of the authorities under the Drug Abuse Office and Treatment Act of 1972, to permit their timely review by the Congress next year. This will provide the EOP the opportunity to demonstrate its proposed drug abuse policy system to the Congress so that the Congress can objectively determine whether it should reestablish ODAP or some comparable entity within the EOP.

In addition, the proposed legislation authorizes $45 million in fiscal year 1979 for State drug abuse formula grants under section 409 of the act and $177 million in fiscal year 1979 for drug abuse project grants and contracts under section 410 of the act. It separates the authorizations under section 410 between those for treatment programs and those for prevention, demonstration and other programs. Specifically it proposes authorization levels of $153 million for treatment programs and $24 million for prevention, demonstration, and other activities under section 410 of the act. This provision is intended to provide more visibility and accountability respecting programmatic expenditures for drug abuse activities authorized under that section.

The proposed legislation also addresses an area of concern regarding reports to Congress under Reorganization Plan No. 1. Section 223 of the Drug Abuse Office and Treatment Act requires the Director of ODAP to submit an annual report to the President and Congress on drug abuse policy and agency coordination objectives, activities, and accomplishments. Section 405(b) of the act requires the Secretary of HEW to submit an annual report to the Director of ODAP on new methods of drug abuse treatment and rehabilitation, their implementation and effectiveness in community programs, and administrative and legislative recommendations respecting such methods and programs for inclusion in the "section 223 ODAP" report. As a substitute for these reporting requirements, the proposed legislation requires the Secretary of HEW to transmit this information in an annual report to the Congress and to the President not later than January 15 of each year. In addition, it requires the Secretary to report other information comparable to that required for alcohol abuse and alcoholism programs under section 102 of the Comprehensive Alcohol Abuse and Alcoholism Prevention, Treatment, and Rehabilitation Act of 1970. Specifically it requires the Secretary to report on the following:

(1) the health consequences and extent of drug abuse in the United States,

(2) a description and evaluation of the effectiveness of the drug abuse prevention functions carried out through any entity of the Department of Health, Education and Welfare in the fiscal year for which the report is made,

(3) a description of the manner in which such functions were carried out and a description and evaluation of the coordination within the Department of Health, Education and Welfare in carrying out such functions,

(4) a description and evaluation of the effectiveness of experimental methods and programs implemented in carrying out such functions, recommendations for implementation of such methods and programs by others in carrying out their drug abuse prevention functions, and a description and evaluation of the effectiveness of the means used to disseminate information respecting such methods and programs, and

(5) proposals for changes in the drug abuse prevention functions carried out by the Department of Health, Education and Welfare (including recomendations for legislation).

I believe that an annual report describing DHEW's response to drug abuse will greatly increase the evaluation capabilities of both the executive branch and the Congress, provide invaluable information to those working in the drug abuse field, and serve as an additional mechanism by which the effectiveness of the President's drug abuse reorganization measures can be gaged.

The Department of Health, Education, and Welfare has expressed concern over the requirement for an annual marihuana and health report under the Comprehensive Drug Abuse Prevention and Control Act of 1970. The Department has indicated that it has produced this report for 5 years and that there has been

insufficient new information to warrant its preparation at such short intervals. I am sympathetic to the concern voiced by the Department; however I also believe that this report is an important health document, particularly at a time when Federal, State, and local Government agencies appear to be shifting toward a policy of discouragement of marihuana use insead of a policy invoking severe criminal sanctions against its use. I am therefore including in this legislation an amendment to the Comprehensive Drug Abuse Prevention and Control Act of 1970 which requires this report to be made biannually instead of annually.

Mr. Speaker, the Subcommittee on Health and the Environment will be scheduling hearings and executive sessions on this legislation within the next few weeks in order to report a bill out of the Interstate and Foreign Commerce Committee by May 15. I urge all my colleagues to support it when it is before this body.●

SUN DAY

HON. RICHARD A. GEPHARDT

OF MISSOURI

IN THE HOUSE OF REPRESENTATIVES

Monday, March 20, 1978

● Mr. GEPHARDT. Mr. Speaker, I rise in support of House Joint Resolution 715 proclaiming May 3, 1978, as "Sun Day," passed on March 6. As I am a cosponsor of this resolution, it was with deep regret that I was not able to be in Washington when it came to a vote. Had I been here, I would have enthusiastically voted yea.

Throughout our country, Federal, local, and State groups are in the midst of planning Sun Day activities to further emphasize the value of solar energy as a viable alternative to this Nation's energy resources. I believe that this is an excellent opportunity to better inform the general public in the residential and industrial uses of solar energy and emphasize the value this source of energy has in securing for us a partial relief from our depleting fossil fuels.

A major step in the development of solar energy for home heating began in 1939 when the Massachusetts Institute of Technology built its first solar house. For the first time, solar collectors placed on a building's roof gathered sunlight for interior heating. During the next several years, MIT continued to experiment with different ways to capture the sun's heat and store it properly. The director of the MIT research team, Dr. Hoyt C. Hottel, together with his assistant, B. B. Woertz, derived an arithmatic formula from the results of different solar heating experiments which is today the basic guide behind the design of solar units.

On May 3 we will be honoring their pioneer work in this area as well as furthering efforts to convert from nonreusable fuels, on which we rely today.

To coincide with the planned activities throughout our Nation, I am planning to hold a Sun Day conference in St. Louis with the assistance of many local companies and organizations which have agreed to display their solar units and energy conservation materials. It is my hope that the success of this venture will set a precedent for similar conferences in the future. I urge my colleagues to plan and participate in mutual activities in acknowledgment of this eventful day.●

CORRESPONDENCE WITH SECRETARY VANCE ON BRITISH REPROCESSING DECISION

HON. JONATHAN B. BINGHAM

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Monday, March 20, 1978

● Mr. BINGHAM. Mr. Speaker, I recently contacted Secretary of State Vance regarding my concern that U.S. policy on approval for reprocessing of our spent nuclear fuel abroad had not been adequately stressed during the recent "Windscale Inquiry" in the United Kingdom. At issue in the Windscale debate is whether or not the United States is going to allow U.S.-source spent fuel to be transferred from other countries—principally Japan—for the extraction of pure plutonium at the proposed expanded Windscale reprocessing plant. The current U.S. policy regarding such spent fuel transfers is that approval will only be made "on a case-by-case basis upon a clear showing of vital need".

The British Government is presently considering whether to permit expansion of the Windscale reprocessing facility; a debate on the question is scheduled to take place in Parliament in the coming weeks. I strongly believe expansion would be most unwise and my purpose in writing Secretary Vance was to gain assurance that U.S. policy has been clearly put to the British Government at the highest levels. I believe the United States should make it very clear to the British that our Government is not favorably disposed towards approving transfers of foreign spent fuel to the Windscale plant; this is especially important in view of the fact that the Windscale plant would be most reliant upon such transfers for its commercial viability.

"Purex reprocessing", the technique which would be employed at the Windscale plant, was developed to maximize outputs of pure plutonium for the fabrication of nuclear warheads. It is completely unacceptable for use in commercial nuclear programs. As reprocessing does little to solve nuclear waste disposal problems (it may, in fact complicate the issue), and since reprocessing is of dubious cost-effectiveness, I certainly hope the British Government will decide against Windscale expansion. At the very least, as I noted in my letter to Secretary Vance, one would hope British will defer a decision on the issue so as not to prejudice the on-going international nuclear fuel cycle evaluation which seeks to identify more proliferation-resistant nuclear technologies.

I insert herewith copies of my correspondence with Secretary Vance, along with the letter which Deputy to the Under Secretary Nye sent to the British Foreign Office last December and which is referred to by Secretary Vance as having clearly stated the administrations policy:

CONGRESS OF THE UNITED STATES,
Washington, D.C., February 24, 1978.

Hon. CYRUS VANCE,
Secretary of State, Department of State, Washington, D.C.

DEAR CY: I am writing to express my deep concern regarding the recently concluded "Windscale Inquiry" conducted by the British government. It has come to my attention that current U.S. policy regarding the transfer and reprocessing of U.S.-origin spent nuclear fuel has been misrepresented during the public inquiry into the proposed expansion of the Windscale nuclear fuel reprocessing facility. Should this misunderstanding be allowed to persist, I believe we might see a course of events unfold which would have the most grave implications for current U.S. antiproliferation efforts.

I am aware that Deputy Undersecretary Nye wrote the British Foreign Office last December 19 in an attempt to clarify the U.S. position. However, I fear that efforts to weaken the impact of this statement have left U.S. policy open to mischievous misinterpretations. This fear has been confirmed by recent reports in the British press indicating that the Foreign Office continues to downplay U.S. concerns over the proposed Windscale expansion.

Should the British proceed with approval for the Windscale expansion, our current policy of approving retransfers of spent fuel for reprocessing only "on a case-by-case basis upon a clear showing of vital need" would be subjected to the most intense international pressures. In particular, the U.S. would be hard-pressed to deny retransfer of U.S.-origin spent fuel from Japan to the U.K. for reprocessing, as such transfers would be necessary to the commercial viability of an expanded reprocessing operation at Windscale.

Thus, it seems imperative for the U.S. government to strongly restate current policy on spent fuel retransfers. I am concerned that such a blunt statement apparently still has not been transmitted at this late hour.

The very least it would seem that we could ask of our British allies would be for them to defer consideration of the proposed Windscale expansion until conclusion of the International Nuclear Fuel Cycle Evaluation (INFCE). If we acquiesce now in the expansion of a facility which will be designed to reprocess large volumes of U.S.-origin material, we would seriously prejudice the INFCE and would spur renewed international competition for commercialization of plutonium fuels. As such a result would clearly undermine the central aims of U.S. antiproliferation policy, I strongly urge you to clarify the U.S. position on Windscale expansion and the use of our fuel in such a facility with all possible dispatch.

I look forward to hearing from you on this urgent matter.

With best wishes,

Sincerely,

JONATHAN B. BINGHAM.

THE SECRETARY OF STATE,
Washington, D.C., March 13, 1978.

DEAR JACK: Thank you for your letter of February 24 in which you expressed your concern regarding the British "Windscale Inquiry."

We were informed this week that the Inspector's report on that inquiry had been

presented to the U.K. Government, which has decided to defer a final decision until after a Parliamentary debate on this subject, expected later this month. A copy of the March 6 statement by Peter Shore, Secretary for the Environment, is enclosed.

The December 19 letter which Deputy to the Under Secretary Nye sent to Patrick Moberly of the U.K. Foreign Office, clearly stated the Administration's policy, and our views on this subject have not changed. The British Foreign Office has both assured us that they clearly understand these views and has made the letter available to the House of Commons. I have discussed the matter with the Foreign Secretary.

With best wishes,

Sincerely,

CY.

Enclosure:
As stated.

UNDER SECRETARY FOR
SECURITY ASSISTANCE,
Washington, D.C., December 19, 1977.

PATRICK MOBERLY, Esquire,
Foreign and Commonwealth Office, London.

DEAR PATRICK: Our attention has been called to a misunderstanding of U.S. policy in the Windscale hearings. Let me try to set the record straight. Our view that it is not wise to build more solvent extraction reprocessing plants at this time has not changed since we discussed the question during consultations last April. The testimony draws an unwarranted conclusion from accommodations that we have made to avoid disruption of existing nuclear power programs.

On the broad question of whether to build a new 1200 MT per year reprocessing facility at Windscale, we of course recognize that this is a matter for your own Government to decide. As you know, President Carter has decided to defer indefinitely commercial reprocessing in the United States. This decision was based not only on the paramount need to seek ways of reducing the associated proliferation risks, but also on the conclusion that reprocessing was not urgently needed in the near term and was not essential to—and could in fact exacerbate—the problems of waste disposal.

While it has been argued that there are potential non-proliferation advantages of reprocessing services being supplied by a few supplier states, this solution entails three major difficulties: (1) If such services involve a requirement to return the separated plutonium directly to the customers, the proliferation gain is illusory. The plutonium will be moving in international, commerce, and the customer will be getting it without going to the trouble, delay and expense of developing its own reprocessing capability. (2) Denial of the plutonium to the customer, on the other hand, may make the customer unwilling to enter the deal, add to the complaints that industrialized states are trying to deny to developing countries fuels and technology, and in the case of nuclear-weapons states, that they are now trying to extend the discriminatory features of the NPT to the civil nuclear field, and thus increase the likelihood that the customer will build its own reprocessing facility. (3) The "compromise" of returning the plutonium only in the form of fabricated fuel elements seems unlikely to be acceptable to other industrialized countries, which have their own fabrication capability designed to meet their nuclear reactor fuel needs. And for threshold countries, it does not present much of an obstacle to obtaining the plutonium.

Accordingly, the United States is not prepared at this time to encourage weapons states to decide in favor of proceeding with new reprocessing plants. Thus, while we will continue to consider MB–10 requests on a case-by-case basis, and grant them in cases where there is a demonstrated need, such as inadequate spent fuel storage capacity, we cannot give any assurance that BNFL may count on MB–10s as a matter of course for feed for a new plant or in support of long-term reprocessing commitments that it may enter into.

Finally, as we have noted in each of the MB–10 requests involving transfers for reprocessing that we have granted in the past two years, the granting of such requests would be subject to our right of consent over the disposition of the nuclear materials resulting from such reprocessing. The enclosed excerpt from the Windscale hearings incorrectly concludes that we are prepared to consent now to retransfers of such products after reprocessing which will not take place for at least 13 years. The enclosed Department of Energy letter from which this conclusion was drawn stated that "in accordance with applicable agreements for cooperation, such transfers would, at that time, have to be approved by the Government of the United States."

I hope that this clarification of our policy is helpful. I am sure that you agree that we should seek to avoid any future misunderstandings that might arise from a lack of clarity now.

Sincerely,

JOSEPH S. NYE,
Deputy to the Under Secretary.●

DECLARATION OF INTERDEPENDENCE

HON. THOMAS A. LUKEN

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Monday, March 20, 1978

● Mr. LUKEN. Mr. Speaker, the following declaration was presented to me by the Hillel Jewish Student Center and the United Christian Ministries on the campus of the University of Cincinnati, on the occasion of Brotherhood Week, on Monday, February 20, 1978:

A DECLARATION OF INTERDEPENDENCE

When in the course of human events it becomes necessary for one people to dissolve the political, economic and cultural distinctions that separate it from another and assume among those who define themselves in broader terms than race, national origin, religion or creed, the interdependent and cooperative station to which the laws of nature and of Nature's God entitle them, a decent respect to the opinions of mankind requires that they should declare the causes which impel them to this action.

We hold these truths to be self-evident: that all humans—regardless of color, race or sex—are born with the desire to live, with the assurance of the basic necessities of life, but beyond that, realizing we neither grow in personal consciousness or appreciation for our fellow humans if we allow the restrictions of tribe, nationality, race, color, religion or creed to impede our goal.

And our goal is this: that the boundaries that separate us be dissolved, that these boundaries, whether they be political systems or narrow ideologies, be replaced by one process—Communication, through which we may grow toward the attainment of universal peace, happiness and freedom.

We look to the stronger among us to enable the weaker to gain strength, and the weak and strong alike to realize that power lies not in economic superiority, political astuteness or military might; rather in the essential goodness of each human person in all their diversity, and the inherent unity that goodness calls us to.

We, therefore, representatives of a very small section of humankind, but important members thereof, assembled at this circus in recognition of the weakness of our brother/sisterhood, do hereby as our first official act in recognition of our membership in the greater world community, affix our names as a sign of our commitment to the establishment of a community of persons and mutually pledge to each other, and to the world of humankind, our time and energy, our hearts and minds.

In the light of this symbol of unity among the various religious organizations on the University of Cincinnati campus, I think we can see the importance and beneficial results of learning to live and work together in appreciation of some of the differences which exist among people. Only when such differences are acknowledged and dealt with creatively can we hope to overcome the misunderstandings which often occur among the various groups who live in the United States.●

FARMERS FACED BY ECONOMIC THREAT

HON. THOMAS S. FOLEY

OF WASHINGTON

IN THE HOUSE OF REPRESENTATIVES

Monday, March 20, 1978

Mr. FOLEY. Mr. Speaker, American agriculture today is caught up in a vicious cost-price squeeze which threatens a crisis of major proportions for the entire country unless something is done and done quickly to reverse the economic dilemma now facing our farmers.

The problem developed as our very efficient farmers responded to a very short supply situation of a few years ago with vastly increased supplies of food and fiber. Now we have the opposite problem—one of oversupply and low prices. These low prices are hitting farmers at a time when their costs of production for such items as fuel, machinery, land, labor, and taxes are rising at rates even higher than the general inflation level being felt by all Americans. This has put many farmers in a desperate position this year of being only able to survive on the farm if they dig deeply into the equities they have built up over the years and which in some cases represent a lifetime of work.

Some may ask, "Didn't Congress just pass the Food and Agriculture Act of 1977 last year and wasn't it addressed to this need?" The answer is "yes," but unfortunately the production adjustment provisions of that act are not coming into play quickly enough this crop year to provide the necessary income protection that farmers need.

This legislation will immeasurably strengthen the 1977 act by increasing the levels of income assurance this year which will make it possible for farmers to engage in the necessary production adjustment to achieve a better balance between supply and demand and that farmers then will be able to get their income from the marketplace. In fact, unless target prices are adjusted upward now to provide this necessary in-

centive for production adjustments, the crisis facing American agriculture will only deepen. My bill addresses this problem by providing for an approximately $2½ billion additional income assurance this year to producers of the basic commodities—wheat, feed grains, upland cotton, and soybeans. This additional income assurance will make it possible for the necessary production adjustment to take place in the 1978 crop year. Specifically, in order to meet these objectives, target prices and loan rates would be changed as follows:

For wheat, the target price would be increased to $3.50 per bushel (now $3.00), and the minimum loan rate to $2.50 per bushel (previously announced at $2.25 per bushel); for corn, the target price would be increased to $2.40 per bushel (now $2.10), and the minimum loan rate to $2.10 per bushel (now $2.00); for upland cotton, the target price would be increased to 60 cents per pound (now 52 cents), and the current formula for the loan rate would be retained but a floor established at 46 cents per pound (now 44 cents).

A set-aside program would be required for upland cotton of 10 percent of the acres planted to cotton in 1978 as a condition of eligibility for program benefits.

Target prices for the 1979 through 1981 crops would be adjusted based on changes in the Consumer Price Index.

A paid land diversion program would be made available in 1978 on wheat, feed grains, and upland cotton to those producers who, in addition to any required set-aside, divert to approved conservation uses an acreage of cropland up to 10 percent of the planted acreage in 1978.

No set-aside program would be provided for soybeans, but a land diversion program would be made available to soybean producers on the same basis as producers of other crops.

Fifty percent of land diversion payments would be made in advance, and these payments would not be subject to payment limitation.

The borrowing authority of CCC would be increased to $25 billion from $14.5 billion in order that CCC may be able to finance outlays under the emergency program as well as under its regular ongoing programs.●

H.R. 7970 REINTRODUCED

HON. G. WILLIAM WHITEHURST

OF VIRGINIA

IN THE HOUSE OF REPRESENTATIVES

Monday, March 20, 1978

● Mr. WHITEHURST. Mr. Speaker, because there were errors in the printing of H.R. 9770 and H.R. 11338, which were reintroductions with cosponsors of H.R. 7970, I am reintroducing H.R. 7970 again today with those same cosponsors, so that they might have a correct copy of this legislation.

This legislation is intended to designate certain lands within the National Forest System in Virginia as wilderness, and I am pleased to note that the Subcommittee on Indian Affairs and Public Lands of the House Committee on Interior and Insular Affairs will be taking it up early next month.

For further information on the provisions of this bill let me refer my colleagues to my RECORD statements of June 22 and October 13, 1977.

Thank you, Mr. Speaker.●

RETIREMENT BILL NEEDS DEBATE

HON. EDWARD W. PATTISON

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Monday, March 20, 1978

● Mr. PATTISON of New York. Mr. Speaker, when the House considered legislation prohibiting mandatory retirement at age 65, there were very few of us who questioned the merits of that proposal. In fact, only four of us voted against it.

I was among that select group. As you are aware, Mr. Speaker, my chief reason for opposing that legislation was my concern over the lack of consideration we had given to it. Virtually no time had been devoted to a discussion of the bill in committee, and the information presented on the floor of the House was not especially enlightening.

My concern was, and is, that the Congress has acted without regard for the consequences. There is a great disagreement over what, if any, impact this legislation will have. Yet, there was no study given to the conflicting interests of those entering and those leaving the employment roles.

Only after our hasty action, while the bill was pending in the Senate, did educational institutions and others have an opportunity to come forward and express their reservations. Even the public commentators were caught flatfooted by the haste of our action.

This past weekend the Albany, N.Y., newspaper, the Times-Record, carried a very perspective and thoughtful column by syndicated writer David Broder. He discusses the continuing need for further consideration of the retirement bill.

At this point in the RECORD, I wish to insert David Broder's recent column. The text follows:

RETIREMENT BILL NEEDS DEBATE

(By David S. Broder)

WASHINGTON.—With little public notice, Congress is about to pass a bill that will affect the future work opportunities of almost every American. It is a measure opposed by most business organizations and viewed with skepticism by the AFL–CIO, and yet there is hardly a politician ready to raise a word of caution about it.

It is the bill that would ban any mandatory retirement age for federal workers and give almost all private-sector employees protection against involuntary retirement up to the age of 70, instead of the present ceiling of 65.

The political appeal of the measure is indicated by the fact that it passed the House last year with only four dissenting votes. And it was approved in slightly different form, by the Senate, with only seven "nays."

A conference committee of the two bodies now has agreed on a compromise version of the bill.

It is a politically appealing measure, described by proponents as an answer to the evils of "age discrimination." But, from another perspective, it can also be called an "I'm all right, Jack" bill. For if it becomes law, it means that those of us who have jobs already can hold unto them longer, if we wish, while younger people, scrambling for a foothold on the employment ladder, wait still longer in the cold.

The hearings on this measure, which whisked through Congress with extraordinary speed, are full of noble sentiment about the rights of senior citizens. But they are conspicuously lacking in anything that can be called a solid estimate of the legislation's impact on a job market where teenagers are having a tough time finding entry-level opportunities, and minority youth unemployment rates in some cities run up to 40 percent.

It is known that voluntary early retirement before the traditional age of 65 has become more and more popular in the past decade.

Relying on that trend, the U.S. Department of Labor told Congress that it estimates that only 150,000 to 200,000 older workers would take advantage of the bill's protection against forced retirement at age 65. Even a shift of 200,000 jobs from the young to the normally retired is a social decision of some consequences. But there are indications the effects may be much larger than that.

A personnel officer of Sears, Roebuck Co. said he thought that the law would cut new hiring by 7 percent in his firm and eliminate 20,000 "job change opportunities" (hirings and promotions) in the first five years of application to that one company alone.

Arthur C. Prine, Jr., testifying for the U.S. Chamber of Commerce, said it was "very clear to us that if this legislation goes through, it is going to undermine in many companies the affirmative action programs which provide for improved opportunities for young and minority workers." Vernon Jordan of the National Urban League expressed the same fear and so did Bert Seidman, director of the Social Securty department of the AFL–CIO.

"It may be unjust to force retirement on those who are healthy and want to continue working," Seidman said. But it is "equally unjust to lay off younger workers with families to support and retain at work elderly workers who are eligible for Social Security benefits, a good private pension and health care."

Despite Seidman's reasoned objections, the AFL–CIO has now adopted a position of neutrality toward the legislation, after winning a provision "grandfathering in" all existing union contracts that have mandatory retirement provisions at an age younger than 70. "We decided," said one AFL–CIO lobbyist, "just to let Congress go its way."

The Carter administration, no more eager than Congress to affront the elderly and their lobbies, is giving the bill its blessing. So there is little to halt its progress.

Questioning benefits for the elderly is dangerous for politicians—and even for reporters, like this one, who are on the downward side of their own graceful slump toward retirement. A previous column on the subject of the exponential growth of federal payments to the retired, a few years back, gave ample warning that any discussion of such questions is likely to invite the charges of ingratitude toward one's elders.

But the issue is there—whether we like it or not. There are hard choices involved. Every elderly third-grade teacher who decides to stay in the classroom an extra five years means that five more classes will be taught by a 1935 college-graduate, rather than a 1975 graduate.

Every federal employee who decides to hold onto his job indefinitely means that much less change in the bureaucracy.

These issues deserve more debate than they have received in the legislation about to become law.●

BOLTON'S FIREFIGHTERS—THE LAST OF A DEDICATED BREED

HON. ROBERT F. DRINAN

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

Monday, March 20, 1978

● Mr. DRINAN. Mr. Speaker, the town of Bolton, Mass., which lies in my congressional district, is the only one of our State's 351 cities and towns which still has an all-volunteer fire department.

Bolton residents can take pride in the spirit of sacrifice and selflessness which motivates their firefighters to work without pay. Volunteer service is always praiseworthy, but when we find individuals willing to work without pay in a dangerous job such as firefighting such service is even more impressive.

The following editorial from the March 9, 1978, edition of the Country News, a weekly journal published in Bolton, is an excellent presentation of the unique virtues of Bolton's fire department.

THE LAST OF A DEDICATED BREED

Bolton has a very honorable distinction. It has, we understand, the very last, totally volunteer fire department in the Commonwealth of Massachusetts.

By totally volunteer we mean that its male and female firefighters receive no monetary compensation whatsoever for their services. [This is not to ignore the ambulance personnel who serve also without compensation, as well as the many board members who receive no pay either.]

The annual budget for the Bolton Volunteer Fire Department this year was $8500 for maintenance and equipment, and $750 for the upkeep of waterholes. There is no provision for salaries or wages for the chief or any of the firefighters. The only other expense which occurs from time to time is the cost of a new truck—and Bolton is accustomed to the best. The townspeople have always been liberal in purchasing good equipment, for they feel it is the least they can do for their department which works without any other compensation.

Volunteerism is a virtue that is rapidly disappearing from our society. The pressures of growth result in an impersonal, large population; a callousness and a take-it-for-granted attitude has taken much of the joy and informality out of volunteering for any public service. The growth of a small town brings with it innumerable frustrations to the dedicated volunteer which, when added together, tempt withdrawal. Growth in a small town, which does not encourage industry and which is losing its farmlands, loses also its citizens who are employed in that town during the day. As a result, fewer and fewer qualified individuals are available during the day to lay down their work tools to answer the fire call. Fewer individuals are willing to give up a hours of pay from their job to order to go fight a fire.

This is all quite understandable. It has been these pressures that have forced 350 other towns to quit their volunteer status. And this is what makes Bolton unique among these towns. It is a remarkable phenomenon—and Bolton stands alone. How much longer can this continue? It's up to the firefighters themselves. And they answered this question at a fire department meeting recently when they voted to continue without pay.

Why? Why do people volunteer? Basically all public service is thankless. Rarely does a Thank You surface from the general public. Public service is taken for granted—"something our taxes pay for, and we pay doggone high taxes." Any attempt to explain volunteerism would be futile. Inner satisfaction must be the strongest and most sustaining motivation.

Bolton should be very thankful. When looked at objectively, service begins to deteriorate when even the smallest compensation is offered. Whereas the volunteer performs strictly out of choice, once money is introduced there is another motivation which is not related to good performance. You cannot pay an individual to love his job.

So here we are, back to the Bolton Volunteer Fire Department, truly the last of a dedicated breed. We think public recognition is long overdue, and that the fire department in its modesty has not played up the fact that they now stand above all others in being unique and real volunteers. Some lettering should be painted on the side of each truck proclaiming this distinction. The town should foot the bill to purchase each department member a unique jacket or medal that will set him and her apart from all the others.

We are very serious about this. Firefighting, and the total dedication of individuals without pay, and at great personal sacrifice in some cases, is very serious business. It should be recognized as the unique and honorable service it is.

We hope you feel the same.●

PUBLIC PLAYGROUND SAFETY EQUIPMENT ACT

HON. NEWTON I. STEERS, JR.

OF MARYLAND

IN THE HOUSE OF REPRESENTATIVES

Monday, March 20, 1978

● Mr. STEERS. Mr. Speaker, last week I joined our colleague, CHUCK WHALEN, in introducing the Public Playground Safety Equipment Act. Yesterday's issue of Parade Magazine, a supplement to the Washington Post, contained an article that discusses our legislation and the general problem of children being injured on playground equipment that has inherent design defects.

Obviously, we cannot protect all children against all injuries that occur on playgrounds. However, I believe we can act now to protect children against unnecessary hazards.

Examples of safety problems in design include protruding nuts and bolts; unguarded moving parts; sharp edges; moving parts made of hard material instead of soft substances.

At this point in the RECORD, I wish to insert the article that appeared in the March 19 issue of Parade magazine. Congressman WHALEN and I will be seeking cosponsors for our bill in the near future, and I hope that our colleagues will read this article for background information:

IS YOUR CHILD'S PLAYGROUND SAFE?

(By Susan M. Gately)

Each year an estimated 118,000 children are taken to the hospital because of accidents on playground equipment.

In suburban Maryland, an 8-year-old boy required 60 stitches after being hit by a low-swinging ladder when he jumped off a playground apparatus. A girl, 6, fractured her shoulder blade when she fell over the side of a slide.

In an Ogden, Utah, public playground, a 7-year-old girl fell from climbing equipment onto concrete and died a few days later.

In Rock Island, Ill., a 10-year-old girl died after a fall from climbing apparatus onto asphalt.

The playground equipment your child climbs, rides, swings and slides on may be unsafe, even fatal. Yet there are at present no federal standards designed to assure the safety of a child in a public playground.

National regulations are sorely needed, and soon. But whereas the Occupational Safety and Health Administration has issued more than 90 regulations to guarantee the safety of the adult workplace, the government's Consumer Product Safety Commission (CPSC) has yet to issue any hard-and-fast standards for playground safety.

Playground equipment manufacturers are eager for federal safety standards. They've been petitioning the government—through their representatives, the National School Supply and Equipment Association (NSSEA)—to issue guidelines since 1973, when the CPSC was formed. However, it took two years and citizen petitions from two safety experts. Elayne Butwinick and Theodora Sweeney, to get the commission simply to study the problem. Any federal guidelines are still months, perhaps a full year, away.

ACCIDENTS CATALOGUED

In 1975, the CPSC published "Hazard Analysis—Playground Equipment," a catalogue of the horrible ways in which children are injured on jungle gyms, slides, swings, merry-go-rounds, seesaws and the like. Of the accidents studied by the commission, 27 percent resulted in broken arms, another 35 percent caused severe cuts and bruises, and nearly 10 percent involved fractured skulls. No safety regulations or guidelines were issued at the time.

The CPSC study noted briefly the importance to children's safety of the surfacing material used on playlots. Substances used today range from grass, wood chips or safety matting to concrete and asphalt.

In northern Ohio, a 4-year-old girl fell from a sliding board, hit her head on a cement surface and suffered a concussion. Her mother bitterly complains, "With all our technology, you'd think they could come up with something better than cement to put under playground equipment. It ought to be outlawed."

Surfacing plays a role in three-fourths of all playground accidents. As Elayne Butwinick notes, "In so many accidents, the asphalt and concrete under the equipment is the real danger."

The National Recreation and Park Association (NRPA), which represents thousands of municipal, county and state parks, wrote to the CPSC in 1976: "Very little information about [surfacing materials] is available now, and it rarely gets into the hands of the builder/installer."

While it may be impractical to outlaw all unsafe surfaces, it is not unreasonable to seek firm construction regulations and general safety guidelines to help interested communities take appropriate action on their own.

Theodora Sweeney suggests the need for "negative labeling." All new playground equipment would carry an inexpensive label warning that it should not be installed on a non-resilient surface. "Our towns have piles of unwanted wood chips that could easily be used to provide safer surfaces," she says.

Some local standards exist now. Since 1969, all U.S. military installations have followed comprehensive and detailed guidelines for the construction of their playgrounds. And many communities have guidelines.

But the lack of uniform standards for the country has kept the accident rate high and bred chaos in the industry. Each manufacturer is building to his own specifications. All say industry self-regulation on a voluntary basis is impractical and undesirable. In addition, local communities and school boards that attempt to set their own standards usually lack guidance and adequate research.

After publishing its "Hazard Analysis," the CPSC sought recommendations from outside groups concerned about playground safety. The NRPA responded with a voluminous, detailed report on all types of playground equipment, backed up by research conducted by the Franklin Institute of Philadelphia.

Many of the recommendations were rejected, however. "There is concern among the commission's professional staff about the NRPA standard," says Elaine Besson of CPSC's Office of Program Management. "It just was not adequate, nor were the test methods. A lot of technical questions need to be resolved."

In attempting to formulate a playground safety policy, the CPSC has been reducing the number of NRPA recommendations and replacing proposed mandatory regulations with voluntary guidelines. In addition, last August the commission authorized another study by its own staff, to include an evaluation of surfacing materials. The new report is due in late fall.

John L. Spalding, general manager of the NSSEA—which helped prepare the NRPA package of recommendations—says the manufacturers are "very definitely in favor of [mandatory] standards," not voluntary guidelines.

THREE ITEMS STANDARDIZED

Since 1973, the CPSC has issued safety standards for only three products under the Consumer Product Safety Act: matchbooks, swimming pool slides and architectural glass.

A report by the General Accounting Office last December concluded that "the commission has not promptly issued safety standards to protect consumers from hazardous products because of . . . a lack of clear commission policies and procedures." Recent charges of questionable practices by the commission led to the resignation of its chairman, F. John Byington.

Several Congressmen looking into the problem of playground safety have expressed amazement at the record of inaction by the CPSC. They have proposed a National Public Playground Equipment Safety Act, which would require the commission to issue performance standards for public playground equipment within one year of the law's enactment.

In addition, equipment newly installed on public playgrounds that receive federal assistance would have to meet the new standards. And playgrounds owned or operated by the federal government would be required to bring all equipment, old and new, into conformity with the standards.

"NO EXCUSE FOR DELAYS"

Rep. Charles Whalen (R., Ohio), author of the bill, says, "There is no excuse for the Consumer Product Safety Commission's continued delays. They should have promulgated standards and guidelines long ago, but it looks like we may have to prod them a bit."

Safety expert Mrs. Sweeney adds, "The CPSC has really dragged its feet about assuring safe playgrounds for children. If they can take a dangerous toy off the shelf in a matter of days, why can't they deal with the unnecessary hazards of playgrounds?"

We can never fully eliminate the risk of children accidentally injuring themselves while playing. "Child's play can get rough, and children are adventurous, ever ready to test their abilities; so playgrounds will always be a place for skinned knees and elbows," says Rep. Newton I. Steers Jr. (R., Md.), father of three active boys. "But many of the dangers of serious injury can be minimized. If we can try to reduce these dangers among adults in their workplace, why not try even harder among children, who have less judgment, in their places of play?"

To these ends, concerned citizens are trying to move the government to act—which is definitely not child's play.●

BEHIND THE CANAL TREATIES

HON. LARRY McDONALD

OF GEORGIA

IN THE HOUSE OF REPRESENTATIVES

Monday, March 20, 1978

● Mr. McDONALD. Mr. Speaker, in a sad day for our Republic the Senate voted to approve the so-called Neutrality Treaty with Panama last week. This supposedly will safeguard American interests in the canal. America is now on its way to second-class status if the other treaty giving away our canal is approved next month, in my view. The Rome News-Tribune of Rome, Ga., had an excellent editorial on why we should not give away the canal, and I would like to commend it to the attention of the Congress. The editorial of March 15, 1978, follows:

[From the Rome News-Tribune, Mar. 15, 1978]

BEHIND THE CANAL TREATIES

It is disappointing to learn that Georgia's senators have decided to vote for the Panama Canal treaties. While we appreciate the fact they have given long deliberation to their decision, we believe they have been persuaded by the protreaty arguments of the Carter administration—and perhaps misplaced loyalty to that administration—to a course which is counter to the wishes of most of the people they represent and which is not in the best interest of Georgia or the nation.

Casting aside the fervent emotion which has surrounded most of the debate over the canal treaties, there are basic economic and national security issues at stake. We do not believe these treaties, perhaps any treaties relinquishing U.S. title and control of the canal, satisfactorily resolve these issues in our national interest.

Economically, the treaties propose a severe new financial burden on the United States. They call for a $345-million immediate aid package to bail out the debt-ridden Republic of Panama plus an annual subsidy of $65-million a year for use of the canal, a payment which may be adjusted upward to $100-million a year by the year 2000. After that, who knows?

Little attention has been given the fact that the new Panama Canal Commission is expected to revise canal passage tolls upward in the range of 25 to 45 percent. These additional transportation costs will severely damage the seafaring economy of the southern and southeastern coastal states, including Georgia, likely costing thousands of jobs in related industries, and impacting adversely on our balance of foreign trade, international business and energy problems.

Additionally, there is the commitment only to improve the existing canal or limit American participation in another canal to Panama. Such an agreement curtails our future options.

Addressing the issue of security, we are binding ourselves with the Republic of Panama to pledging international neutrality of the canal. Just how good is that mutual pledge? We recall a bitter precedent.

In 1954, Great Britain withdrew from the Suez Canal zone under a similar agreement with Egypt. Two years later, piqued by British refusal to finance its Aswan dam. Egypt nationalized the canal, touching off a week-long war with Britain and France.

The incident nearly drew the United States into the fighting and we supported United Nations intervention—on the side of Egypt's right to nationalize the waterway. Have we, then, already sanctioned some such future chain of events in Panama?

This has by no means touched all the issues at stake in the canal treaties but one view which treaty proponents continue to expound is that control of the canal by the Panamanians is a legitimate aspiration of the Latin American people. But there is no such thing as "legitimate aspiration" by some to an achievement created by others. If one considers what Panama would be like today without the canal, it is clear who has received a disproportionate share of benefits and who owes what "moral" debt to whom.

Stripped of meaningless jargon about American "colonialism" and "imperialism" and "exploitation" the "moral" argument holds that we must give up the canal to satisfy the malice, hatred and envy of the worst elements in the Latin American countries and, indeed, in the whole undeveloped world.

The canal is a hated symbol all right, but not of a non-existent American colonialism. What the canal really symbolizes—and what our detractors want symbolically to wipe out by making us give it up—is the energy, accomplishment and pride of a free people.●

THE NEED FOR A NATIONAL POLICY ON TIMBER CAPITAL FORMATION

HON. JAMES WEAVER

OF OREGON

IN THE HOUSE OF REPRESENTATIVES

Monday, March 20, 1978

● Mr. WEAVER. Mr. Speaker, one of the least recognized and most pressing problems in the Nation is the extent to which reforestation is not occurring after harvest on private forest lands, especially nonindustrial private forest lands. In large part, this is due to the lack of incentive which a private forest landowner has to reforest. The costs are substantial, and the benefits come only after the trees are grown which normally is a very long time.

An article by John J. Stephens in the March issue of Forest Farmer titled, "The Need for a National Policy on Timber Capital Formation" correctly identifies the extent of the problem and proposes a solution. I find his investment tax credit proposal interesting and worthy of congressional consideration.

An abbreviated version of the article follows:

THE NEED FOR A NATIONAL POLICY ON TIMBER CAPITAL FORMATION

(By John J. Stephens)

Today the U.S. forest products industry is the only basic American process industry that remains cost competitive on a world-

wide basis. This position is due primarily to the relatively low-cost timber resources of our nation.

To assure America's continuation as world low-cost producer, capital must be generated to provide for maximum productivity from the nation's timberlands. America requires a policy for positive action to encourage timber capital formation.

Historically the difficulty has been that the timber economy requires large amounts of capital invested over long periods at high risk. A realistic tax policy could overcome this difficulty by using tax incentives to encourage capital to be put at risk. This is not, however, the nation's present tax policy, nor is it a definable part of the Administration's proposal as revealed at this time.

Past and present incentives, including capital gains, have been available only when timber is harvested. Incentives for other forest productivity improvements have been negligible, and herein lies a very serious problem. Private, nonindustrial landowners are neglecting reforestation after harvest more than half the time, studies by the Southern Forest Institute disclose. This is particularly critical in the South where 70 percent of the region's 195 million acres of commercial timberlands are in the hands of nonindustrial private owners.

Alabama is a perfect example of this ownership pattern where 75 percent of the nearly 16 million acres of biologically potential forest lands belong to private nonindustrial owners. A study currently being conducted by the FIC Forest Productivity Committee finds that approximately 12 million acres require some form of reforestation activity, and of this, about eight million acres are capable of returning an average of ten percent or better on investment by utilizing intensive management techniques. The study points out, however, that there are two major restraints to increased timber productivity: the nature of the investment and the formation of capital.

Specifically, the relatively high costs of regeneration and intermediate cultivation, coupled with the long investment period—usually more than 10 years and often longer than 20 years—make it difficult for the small landowner to invest in forest management.

Small landowners, in general, do not consider forest management as a primary investment objective. Higher current economic needs, as well as relatively low capital budgets, have a large impact on these owners' lack of interest in forest management activities.

Government programs have failed to overcome this restraint because of low or irregular funding, restrictions on participation, timing of funds allocation and treatment of funds as taxable income.

Herbert Knight, resource analyst of the Southeastern Forest Experiment Station, draws an even more disturbing conclusion. He states that the loss of commercial timberlands is nearly one million acres each year, including roughly 500,000 acres of pine forest type in the Southeast.

If this trend continues just at present levels, by the year 2000 over 20 million additional acres of commercial timberland will be lost, an obvious tragedy for the nation; but one that could be reversed by a realistic and fair tax policy for timber income. Also, if this nation's forest products industry is to meet future softwood fiber demands, it is absolutely essential that nonindustrial private landowners double present productivity of their timberlands.

The small private landowner whose forests are an increasingly vital source of fiber, needs front-end incentives to buffer the high cost of regeneration. Assistance is also needed to relieve financial risks involved in the long delays between cutting cycles, volatile markets, increasing regulatory controls on land management and forest practices, and natural hazards which are not insurable. In addition to these risks, landowners face rising costs for silvicultural practices necessary to bring timberlands into full productivity.

Perhaps the most serious disincentive is the annual cost of carrying the tree farm from regeneration to first harvest. The cash outlay for taxes and timber protection without income is a difficult expenditure for most small tree farmers. . . .

Presently the only incentive available to timber growers is capital gains treatment of the resulting income. This treatment comes after a long rotation period and is compensation for the ravages of inflation and natural risks that can befall any forest.

In the broadest sense, the primary benefit of capital gains treatment has been its contribution to sound, sustained-yield forest management.

Considering that this nation inherited a rich legacy of forest lands which are a national treasure in every sense of the word, one needs only to look to history for the painful lesson of what conditions were before capital gains treatment was allowed.

Prior to enactment of capital gains in 1944, tax treatment, encouraged "cut out and get out" practices that drastically reduced America's private forests and resulted in millions of acres of cutover land being sold out, abandoned for taxes or diverted to marginal agricultural use.

The money earned from timber cut then was usually invested in non-forest assets, where one could be assured of satisfactory return and regular earnings. This period saw our nation's timber resources depleted at a rate of about seven billion cubic feet per year. The enactment of capital gains in 1944 in large measure helped to reverse this situation. U.S. timber-growing stock began increasing and is still increasing today, where it is approximately 175 billion cubic feet more than in 1944.

While this increase, of course, reflects a confluence of favorable economic developments after 1944, including a rapid expansion in demand for lumber and paper products, it is particularly significant that replanting of private forest acreage has increased dramatically since 1944. For every one acre planted in trees prior to World War II, 10 acres were planted in 1976.

In the most recent year for which data is available, it is estimated that more than 1.4 million acres were planted by the private sector.

With all the good capital gains treatment has done, however, it does not meet the needs for adequate renewal of this very important resource. At the time timber is cut, the private timberland owner must make investment decisions. If he decides to reforest under the present accounting treatment for tax purposes, he will capitalize his reforestation, timber stand improvement and other related costs for longer than 20 years in the South, and considerably longer in the Northwest and Northeast.

The small private landowner, at the time he must make his investment decision, has the prospect of a long period with no return. Reforestation of his lands, however, is absolutely essential to meeting this nation's future fiber requirements.

Considering the fact that the forest lands of this nation provide for multiple use and are in reality wood producing factories, why not treat the investment in forestry the same as that in any other employment-creating capital situation? Why not provide forestry with the tax incentive that has had so positive an effect in attracting vital capital for other industries? Why not give an investment tax credit for reforestation?

Another inducement for reforestation would be shorter amortization periods, or immediate write-off of reforestation expenses. This would also aid in the capital formation requirements.

Unlike investments in other capital assets, which begin to earn a return almost immediately upon installation, timber does not generate a return until it is harvested. Present tax rules require that all investments in forest productivity be capitalized over an extensive period. In the West capital lies in a dead account for 30 years before it becomes part of the cost of the timber harvested account and is amortized over the volume harvested. It is likely that the flow-through takes a period of about 50 years.

In the South these capital costs are kept in a dead account for 13 years which means it takes about 25 years for them to flow through.

Most forest products companies have significant sums in non-earning capital assets, and they are growing rapidly.

In essence, the development opportunity costs in timber investment are enormous in relation to any other competing investment. They represent the single largest component of cost in the production of timber.

Capital gains treatment of timber has helped to restore a needed balance between delayed yield forest resource investments and other investments which provide an ongoing return. Further, the returns on timber are low in comparison with alternative investments. While modern forestry techniques can accelerate the growth of trees, there are natural limitations to growth which will always limit investment return. Generally new growth in the range of four to seven percent per year is as favorable as can be anticipated and timber growers frequently encounter lower growth rates.

Normally most business investment opportunities must promise a return of 10 to 15 percent per year to attract equity capital. Given the natural restraints on the speed of wood accumulation in the forest, growth in dollar values of 10 to 15 percent per year cannot be approached unless stumpage prices rise. The forest products companies face a high degree of uncertainty in this regard since there is no guarantee that a sufficient rise in stumpage prices will materialize over the protracted growing cycle of the trees.

The risk return ratio is also less favorable than in most other industries. During its extended life, timber is subject to a broad range of uninsurable risks, encompassing such factors as fire, disease, insect, wind and ice storm damage.

The U.S. Forest Service estimates that in 1976 alone, losses due to fire on all forest lands totaled over five million acres, or one percent of the nation's almost 500 million acres of commercial timberlands. Losses were probably even worse in 1977 because of the drought.

Beyond that, the industry serves end markets which are highly volatile over the business cycle, particularly the housing market which has experienced volume swings of about 50 percent between peaks and troughs. Timber prices show very wide swings over the cycle, adding to the risks and uncertainty.

As a result of the extended growth cycle, new forest investments face a host of natural and economic uncertainties. This represents the basic contradiction of the business: low inherent returns combined with high risk and uncertainty.

The industry is at a disadvantage in competition for equity captial where high risk presupposes higher potential returns. Capital gains treatment has historically helped to overcome this disadvantage by raising the after-tax return of timber growing, albeit not to competitive levels. In fact, the real earnings for second growth timber cut are only slightly better than inflation rates.

Federal Trade Commission reports indi-

cate the return on investment for lumber, paper and allied products during the period 1964 to 1973 was 5.8 percent compared with a return of 6.4 percent for all durable and nondurable goods produced. Moreover, the lumber and wood products segment of the forest products industry is highly competitive as indicated by the substantial number of producers and their moderate rates of return in relation to other industries.

Timber supply responds positively to rising price levels, but response time is measured in decades rather than in months or years as in most other industries.

While harvesting of existing supplies can be accelerated temporarily to meet a peak in demand and prices, new supplies for the longer term can only be assured by increased planting and more intensive management of existing lands.

Realizing that wood costs represent about 50 percent of production costs for unbleached kraft, 70 percent for lumber and over 50 percent for plywood, imagine what loss of capital gains would do to these product costs and prices and their ability to compete with substitute products.

Forest economics have unique characteristics, and it would be a mistake to assume that the normal working of the market system will assure adequate supplies by the end of the century.

What is seen today is that capital gains, the only tax incentive, is doing only half the job. To get the reforestation part of the job done, forest owners need the incentives that have been used in other situations to attract capital.

Forests play a vital role in the economy of America. One million three-hundred thousand people are directly employed in the forests and in direct processing industries. Multiples of that number are influenced in their employment by the products from the wood producing industries.

Exports from the forest products industry in 1976 amounted to $4.7 billion, and this was a major contribution toward the nation's balance of payments, particularly in light of a huge deficit for imported energy.

As important as the economic role played by the forests are their social and conservation roles. The opportunity for recreation, for everything from wildlife to camping, is assured only as long as America's forest lands are maintained and kept productive.

The first major reforestation efforts in the United States were intended to reduce soil erosion and to improve water conservation practices. Watersheds protected by the forests are vital to life in all parts of America.

The pressing need to develop fully our forest resources is now even more evident as America scrambles to become more energy self-sufficient. Energy costs will continue to escalate and alternative sources are an absolute necessity for the nation and most of the world. The economics of utilizing forest residues and low grade forest species for energy production are about at the right point now.

The nation's approximately 500 million acres of commercial forest lands contain about 96 quadrillion BTUs (quads) of usable energy. The annual increase in usable energy stored in these forests is 2.5 quads. If these commercial forests were genetically improved and intensively managed, the annual yield in usable energy could be raised progressively to 28 quads per year, which gives an indication of how growth can be accelerated by more extensive application of modern forestry techniques. An energy yield of 28 quads per year would equate to more than 35 percent of the nation's current annual energy consumption of about 75 quads.

This assumes that all vegetative growth on forest land is utilized. The quantity of biomass remains the same and only unused growth is harvested. These managed forests would be in a steady state, but with a high yield.

The forest industry currently uses only about 2.6 quads of wood per year for lumber and paper products, a small fraction of the nation's forest potential. The U.S. will undoubtedly need this steady renewable energy source in the near future, and the more productivity can be improved, the smaller will be the land base necessary to supply needs of the nation. This certainly represents a more viable alternative than importing all the fuel America uses, although it was not even mentioned in the Administration's energy package.

It might have been argued a few years ago that maximum timber supplies were not really critical since substitute products were available. However, the raw materials for the substitutes, for plastics, aluminum, steel and concrete, are all energy-intensive materials as well as exhaustible resources. Alternative materials such as sell and aluminum are much heavier consumers of energy during processing than wood is. Furthermore, production of such wood substitutes creates greater air, water and solid waste pollution problems than wood production. Much of wood fiber can be recycled, and what is not recycled is biodegradable.

The U.S. Forest Service issued its first report under the Rangeland and Renewable Resources Act in 1976. This report indicated that there is a need to invest over $900 million in public and private nonindustrial lands per year from 1980, increasing to over $1 billion per year in the 21st century. The need to attract capital to assure the availability of this important raw material and environmental resource for generations to come is obvious.

With that backdrop, it is urgent that the Administration, with a view for the needs of our nation, provide sufficient incentives that would attract venture capital necessary to begin immediately increasing levels of fiber productivity.

Most industrialized countries of the world have encouraged risk-taking investors through preferential tax treatment. Special tax provisions to encourage investment in future timber crops and sound forest management have ranged from tax credits, as is the case of Brazil, to special expense deductions, as used in Europe, to favorable treatment of gains from sales of capital assets. Similarly, over 30 states in this country have enacted special rules recognizing that unless the long-term growing requirements of timber are taken into account, it can be taxed out of production.

The economic loss resulting from a disruption of investment in forest management can never be recovered, because time is an essential ingredient in the development of forest resources. Obviously, the ideal tax treatment has never been devised.

Part of the problem is that there is presently an artificial consensus as to the extent of our nation's timber supply. Political leaders must be alerted to the realities of this crisis. Their support would be enlightened and responsive leadership as well as self-evident common sense, focusing on acknowledged national goals of the future.

The nation's forest products industry has a brilliant list of achievements, not only in its scientific capabilities, but it is in fact the only U.S. process industry that is cost competitive on a world basis. This is primarily due to the highly productive timbergrowing capacity of our nation's forest lands. That productivity, moreover, has been accomplished despite environmental contraints and similar cost burdening, and without government support.

The needs of all mankind are dependent now more than ever on our achieving even greater levels of forest productivity. Forest science and technology must continue to progress. The fact remains, however, that this nation has not even scratched the surface of its forest productivity potential. The future will see dramatic improvements in biological productivity, in highly efficient harvesting and utilization systems and in expanded uses of forests for fuel and food.

Almost by definition, problems present opportunities, Just such an opportunity exists in the tax reform package. Specifically, forest owners must convey to the Administration and Congress a sense of urgency regarding forest resources for future Americans. National leaders should be urged to support investment tax credits, shorter amortization periods, . . . and a continuation of capital gains tax treatment, as the principal mechanisms for creating an atmosphere for capital formation essential to increased productivity on our nation's timberlands.

Just as the Forest Service indicated a need for over $900 million investment in the public and private, nonindustrial sectors, the Administration can now recommend those types of incentives that attract capital to the timber growing sector. Timberland investments can then be treated the same as other job-creating capital and be covered by the investment tax credit and shorter amortization schedules.

It is significant that the present high standard of living Americans enjoy today was made possible, in large measure, by past trends in capital formation and other economic aggregates. Hopefully, future Americans will, in turn, benefit from similar equitable rewards for risk-taking. This is possible only if government again fosters a climate in which capital can be formed and put to work. If government enacts a fair and realistic tax policy, cognizant of our nation's need to grow, one that envisions an even greater standard of living than is enjoyed today, and one that recognizes the potential impact of forests as an energy source, forces of productivity can be rekindled. This should result in higher levels of investment in forest productivity including (1) creation of jobs in rural areas. Since 70 to 80 percent of investment funds spent on forestry are for labor, a significant portion of any tax incentive would pass through to the local work force; (2) maintenance of America's role in world trade for forest products; and (3) assurance of adequate timber resources for future generations of Americans.●

FOR IMRI TEL-OREN: LETTER TO A PALESTINIAN MILITARY SPOKESMAN

HON. BENJAMIN S. ROSENTHAL

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Monday, March 20, 1978

● Mr. ROSENTHAL. Mr. Speaker, the Palestinian terrorists' raid in Israel last weekend was an outrageous act of violence against all humanity. It was also a tragedy of a highly personnal dimension. Forty-five individuals were killed and many more were maimed.

One of those slaughtered was Imri Tel-Oren, a 14-year-old Israeli youth who was gunned down by the PLO because he happened to be in a car behind one of the hijacked buses. Imir's American cousin, Cynthia Ozick, wrote a moving story about Imri and his family that appeared in the New York Times on March 16. I would like to share Imri's story with my colleagues:

LETTER TO A PALESTINIAN MILITARY SPOKESMAN

(A Palestinian military spokesman in Beirut said the attack had been carried out by members of Al Fatah, the largest guerrilla group in the Palestine Liberation Organization. He asserted that 33 Israeli soldiers had been killed in the attack.)

(By Cynthia Ozick)

DEAR PALESTINIAN SPOKESMAN: When you say that your friends killed 33 Israeli soldiers in last weekend's terror attack on the road near Haifa, do you mean my cousin Imri? Your friends shot him in the throat. He was not a soldier. He was 14 years old, and played the clarinet.

Now I am not sure what the mentality of a terrorist might be, since unlike you, I have never had one for a friend; but it seems logical to assume that if you have murdered someone, you might like—even if only out of idle curiosity, but especially out of ideology—to know something about the life you have taken. So please let me tell you a little bit about my cousin Imri. I promise you it won't occupy much of your time, because if someone is murdered when he is only 14 years old, how much can there be to tell?

In fact, Imri's life was so brief, and there was so little he ever had a chance to do, that I might as well begin with his grandfather and grandmother.

Imir's grandfather is a poet, a lover of the English Romantics. He has won some fine prizes for his work (including the Brenner Prize, named after an early Zionist who vowed that Jews were no longer going to be murdered just for being Jews), and he has translated Walt Whitman into Hebrew; but he is rather elderly now, so these days he mostly sits in his little garden reading Wordsworth and Keats and Shelley and Blake.

The garden is rather special. It is in the backyard of a house not far from the Lod airport (where some of your other friends murdered a group of Christian pilgrims not so long ago).

When Imri's grandparents built the house—a simple concrete cube filled with volumes and volumes of poetry—it was entirely surrounded by sand. But Imri's grandmother, though very frail, put down seeds and nourished and raised up her "babies"—a whole orchard of flowering fruit trees.

Every morning very early Imri's tiny grandmother climbs a shaky ladder to reach up to each young pear, which she patiently and meticulously wraps in a little paper bag. It looks pretty comical—a paper-bag tree!—but Imri's grandmother will not spray the trees with insecticide; she does not want to kill the insects, who also have a right to live. Imri's grandparents are vegetarians, and so was Imri, and so are his parents and all his brothers and sisters and aunts and uncles. You see, they do not like to take life.

Imri's mother and father are passionate musicians. They play first and second flute in the Jerusalem Symphony—or at least they did until last weekend, because Imri's father may never play again. One of your friends blew up his hand. In the hospital at Haifa they are trying to patch together some of it with bone grafts; soon they will know whether the nerve will die. (Imri's brother Nir is luckier, it was only his leg that was wounded. He lost a lot of blood, but he is all right.)

About two years ago, Imri's father came to America for a time to teach flute at Ithaca College. It was hard to tell which he loved more—music or his students. Tears fell from him when the term drew to an end and he had to say goodbye. When he heard or played music he seemed illuminated: "Isn't this beautiful?" he would murmur. All of Imri's six brothers and sisters are musical. They play all sorts of instrument, and the beauty flies out of their hands.

Imri's oldest sister, Anva, a dancer, just had her second baby, and so what happened was this: Imri and his brothers Nir and Adiel and his little twin sisters Vivi and Cori and their parents all piled into the family car to drive up to Haifa to see the new baby. After the visit, they were on their way home to Jerusalem, just behind a bus, when your friends started throwing grenades and shooting at them, at first on the road itself and then from inside the bus. When Imri's father, who was driving, got hit, Imri's brother Nir. Nir managed to grab the wheel and save his family, even though his leg was streaming blood. In the horror of the explosions and the pursuit it was a little while before anyone realized that Imri was dead.

All right, now about Imri himself.

He was mainly a quiet boy, private as some adolescents like to be, and a good student. Until not long ago he was still quite small, but in the last few months his family had begun to marvel at how he was springing up. He was going to be tall, like his father. He was fond of stamp-collecting, and when his mother toured with the orchestra she always brought back interesting foreign stamps for him. His instrument was the clarinet; he was a member of a youth orchestra in Jerusalem. He used to grumble over his clarinet because it was second-hand and somewhat woebegone; but only two days before your friends killed him he had the delight of learning that he was going to get a better clarinet.

And that is about all I can tell you about your victim Imri. I warned you it wouldn't amount to much. The main thing, you know, is that he was never going to kill anyone or anything—not even a fish or a chicken, much less a fellow human being. He was only going to make beautiful sounds on his clarinet.

Imri's grandfather, when he was not much older than Imri during the First World War, used to write pacifist poems; and once after the 1948 war he began a lyric about Bialik, the Hebrew poet, that in the most natural way turned into a prayer for fraternity between Arabs and Jews. And after that Imri's grandmother kept on growing trees and flowers in what used to be sand, and Imri's whole family kept on sending music, one of the languages of peace, up into the Middle East air.

Well, I just thought you would like to hear about one obscure 14-year-old who happened to become a target of yours, because why shouldn't you know who it is you hated enough to kill? And now that your friends have murdered Imri and blown up his father's hand, there will be that much less music in the world, and that much less civilization.

You have made it pretty clear that all of this feeds your pride and your notion of manhood and especially your sense of nationhood. The triumph of guns and blood excites you more than symphonies and poems and clarinets.

It could be, though, that you didn't really tell an untruth when you called Imri a "soldier." On our battered planet there are always, after all, two armies—the army of guns and the army of clarinets. Death flies out of one and beauty from the other. Imri is a fallen soldier in the army of clarinets, and in the end your most intractable stumbling block, your deepest contest, will have to be not politics, or your Soviet arms suppliers, or land, or your propagandists abroad, or your multiple perversions of the vocabulary of idealism, or your fellow Arabs who have imprisoned and despised and morally crippled and corrupted you for the last 30 years, or your hatred of Jews, or what you call "self-determination" while denying it to other people, or you vow to dismantle Israel, or your putting military uniforms on boys just Imri's age and teaching them terrorism, or even your bloodthirsty braggadocio; or anything like that.

No. You will have to grapple with what you know to be your chosen enemies—rank after rank of the singing clarinets: the army of civilization. Your guns cough in brutal eyeblink blasts and shatter human bones. Your friends, by stealth and ambush, murdered Imri. You are terribly proud of this, and crow it over the airwaves. No matter. Civilization is more tenacious than the death you bring. Paperbag trees, and Keats in a garden near an airport, and the long, long voice of the flute, and the singing clarinets—these are the soldiers you will have to defeat. If you can.●

ANATOLI SHCHARANSKY NO ORDINARY CASE

HON. JOSHUA EILBERG

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Monday, March 20, 1978

● Mr. EILBERG. Mr. Speaker, last week several of us commented on the fact that this month marks a full year of imprisonment for Anatoli Shcharansky, Soviet Jew denied the fundamental human right of emigrating to the land of his choice, Israel.

At that time, I stated that Shcharansky's arrest had a special meaning for me, because 3 years ago I met Anatoli in Moscow when I traveled to the Soviet Union as chairman of the Subcommittee on Immigration, Citizenship and International Law. I also stated that a great many of my constituents plan to be anything but silent as the injustice against this young man continues.

As a demonstration of the strong feeling in Philadelphia for Anatoli Shcharansky, I offer for the RECORD the following article authored by Dean Peter Liacouras, of the Temple University School of Law. Dean Liacouras' account appeared in the Philadelphia Inquirer only the morning after we rose to express our hope that the Soviet Union will recognize the folly of its continued imprisonment of Shcharansky:

DRAW THE LINE AT SHCHARANSKY

(By Peter J. Liacouras)

Today—the Ides of March—marks the first anniversary of the "imprisonment pendling trial" of Anatoly Shcharansky in Moscow's Lefortovo prison. The Shcharansky case has become a watershed in U.S.-U.S.S.R. relations. It is a symbolic threshold in the worldwide struggle for human rights.

Who is Anatoly Shcharansky? Why, as prominent Soviet officials asked Professor Burton Caine of Temple Law School and me during our visit to Moscow and Leningrad last December, is there such interest in his "rather ordinary" case? Why has the case taken on such international significance?

Shcharansky, now 30, is an engaging young man who dabbled in computerized chess playing. In 1973, like thousands of other Soviet Jews, he applied for an exit visa to emigrate to Israel. His request was refused on the ostensible ground that he possessed "state secrets". He reapplied and was again refused.

Since 1973 when Shcharansky first applied, he has been out of work. He has frequently been arrested. This harassment stems directly from his desire to leave Russia, and because he acted as an informal press agent and English interpreter for dissidents with

the Western world, including U.S. news correspondents.

All of his activities were in the open and monitored by the Soviet secret police (the KGB). They considered him a thorn in their side. He was highly successful in helping the fledgling human rights movement in Russia attract embarrassing worldwide attention.

Shcharansky thought that his lawful and courageous activities on behalf of other dissidents would finally convince the government to let him go to Israel. He was wrong. Instead, the massive power of Soviet government has come down on him. Following his arrest last March 15, he has been "on ice" facing treason charges which carry a possible death sentence.

Throughout all 365 days of his imprisonment, Shcharansky has been held incommunicado. He has been unable to see, speak with, or otherwise communicate with anyone except the Soviet secret police (KGB) interrogators trying to make the case of treason against him.

Despite dozens of attempts by the family to supply a lawyer for Shcharansky, none was permitted. A fort-night ago, a KGB-cleared lawyer, not acceptable to the family, was appointed by the president of the Moscow Bar to represent Shcharansky.

Despite the absence of any express provisions of Soviet law or the constitution authorizing such actions, the Presidium of the Supreme Soviet, on Dec. 15, 1977, in a special, secret decree applied only to Shcharansky, extended for an additional six months his incommunicado investigation and interrogation.

Despite Soviet denials that the forthcoming trial of Shcharansky is an attempt to intimidate other Soviet Jews who would like to live as Jews or emigate, some 150 Jews from throughout the U.S.S.R. have been forcibly interrogated under threat of imprisonment. A dozen of them, whom Professor Caine and I interviewed, were warned by the KGB that "as soon as the pressure from the West subsides, you will also be taken care of."

During the past year, three apparent KGB agent provacateurs (Lipovsky, Tsypin and Raslin, all Jewish refuseniks, one of whom shared an apartment with Shcharansky and is an admitted ex-volunteer spy for the CIA) have charged that Shcharansky and other Jewish refuseniks were CIA spies.

President Carter, breaking with a U.S. policy of not commenting on spy charges, has publicly denied that Shcharansky ever "had any sort of a relationship, to our knowledge, with the CIA."

Anatoly Shcharansky is being made "an example" not only because he was a thorn in the side of Soviet leaders who mouth "human rights" while ruthlessly suppressing them.

What is particularly disturbing is that the Shcharansky investigation and forthcoming trial is fanning traditional anti-Semitism in Russia. By characterizing Shcharansky as a "CIA agent guilty of treason," Soviet officials clearly have attempted to distract our attention from continuing violation of the basic right of Jews to practice their religion.

Human rights are no longer matters solely within the "domestic jurisdiction" of the Soviet Union or any other nation. To argue they are makes a farce out of solemn legal obligations freely and voluntarily entered into by nations.

"Everyone shall be free to leave any country, including his own, and to return to his country." That basic human right, expressly binding on the Soviet Union as a party, is guaranteed by the Universal Declaration of Human Rights, the International Covenant on Civil and Political Rights, and the Helsinki Final Act which also guarantees family reunification. Such is the law today. Human rights are not solely domestic concerns for good reason.

During the second decade of this century, some two million Armenians were murdered while other governments including our own stood by without protest, unwilling to incur Turkey's wrath by suggesting that genocide of one's own citizens was also somebody else's business.

The Armenian genocide and the "domestic jurisdiction" shield combined with virulent anti-Semitism, two decades later, produced the Nazi genocide of six million Jews.

That same mind set has led more recently to the slaughter of untold hundreds of thousands of tribal victims in Africa.

Given the traditional anti-Semitism in Russia, and the most recent intimidation of Jews seeking to excercise their cultural identity, history could repeat itself.

Because of detente, the U.S. government is engaged in a variety of negotiations with the Soviet government concerning such matters as SALT, trade, etc. In bargaining, it is important to know the state of mind of your counterpart.

If during the course of important negotiations, you get evidence about the lack of good faith of your adversary on another matter, you naturally draw an inference about his or her state of mind and probable bad faith on the question under discussion.

So when the Soviet Union cracks down on dissidents, especially Jews, in violation of its own law and international treaties to which it is a party, every American citizen may infer the Soviet Union's true "commitment" not only to the principles of detente embodied in the Helsinki Final Act, but also the Soviet Union's true intention in the field of disarmament, arms control, African and Mideast policies, protection of foreign investment, academic freedom of U.S. students and scholars in Russia, and so on.

This is why the Shcharansky case is a clear-cut test for the Carter Administration. We must draw a line with the Soviet government. Detente cannot be a one-way street where we give up our fundamental values, or where the basic human rights of Soviet citizens or those in Soviet-occupied states are bartered away for corporate profits or false educational benefits or false security.

Anatoly Shcharansky is not a spy. He and those hundreds of thousands of Soviet Jews who find it impossible to live in Russia, are more like the slaves Abraham Lincoln emancipated 115 years ago. Those who help Soviet Jews gain freedom to Israel and the West, and who aid the millions of other persons irrespective of religious beliefs and national origin who are in Russia and Soviet-occupied states (such as Lithuania, Poland, Czechoslovakia)—those who help—are like workers on the Underground Railroad of the last century.●

BYELORUSSIAN INDEPENDENCE DAY

HON. EDWARD J. PATTEN

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Monday, March 20, 1978

● Mr. PATTEN. Mr. Speaker, this Saturday marks the 60th anniversary of the proclamation of the Byelorussian Democratic Republic in 1918. That independence day must have been glorious. However, the glory was short lived. In 1920, this independent nation was captured by the Soviet Union.

Today, the spirit of independence is much alive, both in Byelorussian and in the Americans of Byelorussian descent. This anniversary will be celebrated here in the United States in many ways. It will be a celebration of what once was, and what we pray will be again, soon. And today, when much emphasis is on human rights around the world, I call on my colleagues to give support to these activities so that all nations will know that we oppose oppression in Byelorussian and other nations where people do not have the freedom of movement, religion, speech, and culture which we so enjoy.●

CLOSING THE PURSE TO CLOSE OUT THE FOES

HON. HENRY J. HYDE

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Monday, March 20, 1978

● Mr. HYDE. Mr. Speaker, I need not caution my Republican colleagues concerning weekend statements by the Chairman of the Committee on House Administration. Let there be no mistake. The camapign financing bill is still a heavy-handed partisan attempt by the majority party to push the Republican Party toward extinction.

Columnist George F. Will succinctly set forth the facts in his column which appeared in the March 19 issue of the Washington Post, the text of which follows.

I suggest that my colleagues read it carefully, and heed Mr. Will's final comment:

By drafting this bill, House Democrats have shown themselves capable of abusing power in an attempt to secure power.

Mr. Will's column is herewith reprinted:

CLOSING THE PURSE TO CLOSE OUT THE FOES

(By George F. Will)

Politics on Capitol Hill usually is a cascade of more or less amicable disagreement. But occasionally the hard, metallic voice of mean-spirited partisanship is heard. It is heard today in a bill drafted by Democrats in the House of Representatives.

Without even a redeeming trace of subtlety, the Democrats on the House Administration Committee have passed a bill that would rewrite the rules of campaigning to minimize Republican strength. The bill was passed in committee on a party-line vote, just as the Republican request for hearings was defeated on a party-line vote.

The most important provision would drastically reduce by 70 percent—from $50,000 to $15,000—the amount that a party can contribute to one of its candidates for a House seat. The bill's supporters say it is needed to cut "excessive" political spending. To give a thin veneer of plausability to that rationale, the bill also reduces, but much less drastically, the amount that can be contributed to a candidate by political action committees (PACs) established by interest groups. Nevertheless, the real rationale for the bill is obvious and obnoxious.

Democrats have lost four of six recent special elections to the House, and are nervous as they head toward midterm elections in which they expect, on the basis of history, to lose seats. Since 1976, the Democratic National Committee has congealed. The Republican National Committee has hustled. So today, House Democrats are spoiling for a fight, but not a fair one.

In House races in 1976, the average expenditure by Democratic candidates exceeded that spent by Republicans ($74,757 to

$71,945). And the average Democratic incumbent outspent his Republican challenger $73,495 to $52,815. (Also, Democrats usually benefit from, but do not have to report, valuable inkind services from organized labor, such as registration and get-out-the-vote campaigns.)

In 1976, PACs gave 66 percent of their funds to Democratic candidates ($13.6 million), while Republicans received 34 percent ($6.9 million). In 1977, an off-year for elections, the gap widened as PACs gave 70 percent ($1.9 million) to Democrats, 30 percent ($807,000) to Republicans.

In contrast, support from the party is currently much more important to Republicans than to Democrats. In 1976, total spending by Republican candidates was $46.9 million, with 9.7 percent ($4.6 million) coming from rank-and-file contributions to the party. Democratic candidates spent $5.2 million *more* than Republicans spent, but received only 3.7 percent ($1.9 million) from their party.

In 1977, rank-and-file Republicans gave their party $18.5 million; rank-and-file Democrats gave their party just $5.6 million. The difference is especially dramatic because the Democratic Party relied more heavily on large contributors: 47 percent of Democratic Party funds came from contributions of more than $500, compared with just 12 percent of Republican funds. The average Republican contribution was less than $25.

Going into this year, the GOP had $8.2 million on hand; the Democratic Party had just $867,000. So House Democrats, aware that their party is receiving less support from rank-and-file members than the GOP is receiving, want to drastically limit this form of citizen participation in politics. And in doing so, they want to increase the importance of interest-group contributions relative to contributions from rank-and-file members. Their proposal would further reduce the vitality of the parties, which should be a source of coherence and principle for American politics.

Communicating—broadcasting, printing, mailing—costs money. Limits on political spending are limits on political communicating. One reason incumbents vote low limits is that incumbents begin with many advantages, such as recognition, staff, franked mail, travel and stationery allowances and more. When incumbents impose upon themselves and their challengers a low spending limit, the result is the equivalent of a basketball game that begins with one team ahead 50–0, and both teams limited to an equal number of shots.

In 1974, Congress's "response" to Watergate was a law favoring incumbents by limiting political spending. It then became inevitable that, ever after, the party controlling Congress would be tempted to fiddle with the limits to cripple the competition. House Democrats have succumbed to that temptation.

Their wretched excess will not become law. If necessary, Senate Republicans will filibuster it to death. But by drafting this bill, House Democrats have shown themselves capable of abusing power in an attempt to secure power.●

PEACE PEOPLE OF NORTHERN IRELAND

HON. DON EDWARDS

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Monday, March 20, 1978

● Mr. EDWARDS of California. Mr. Speaker, at this time surrounding the celebration of St. Patrick's Day, it is most fitting for the House of Representatives to take special note of the growing efforts by citizens in Northern Ireland to reject the violence that has divided their land. Leading these brave efforts is a group called Peace People formed by Betty Williams and Mairead Corrigan, winners of the 1976 Nobel Peace Prize.

Their story is one of leadership born out of tragedy. In August of 1976 three young children were killed in Belfast by an automobile whose IRA driver had been shot by the British. Betty Williams was the aunt of those children. Since that time the two women and their organization have worked continuously toward an organized rejection of the violence and terriorism in Northern Ireland.

Their efforts for peace were acknowledged last year by the award of the Nobel Peace Prize. In this country, their work has been reflected by a notable shift in official U.S. policy regarding Northern Ireland. From a former position of "It's not our problem," our Government has taken on a more concerned role. The change in attitude was given a powerful assist by the joint statement given last year on St. Patrick's Day by Senators KENNEDY and MOYNIHAN, Speaker O'NEILL and Governor Carey condemning both the violence and the support of violence by Americans of Irish decent.

Last Thursday the Peace People's cause was given further support when I had the pleasure of accompanying Mairead Corrigan to the White House where she met with President Carter in the Oval Office. At the meeting the President said that Betty and Mairead were an inspiration to him personally since they have shown through their actions what an average person can accomplish against tremendous odds. He told Mairead that he strongly encouraged the Peace People to keep up their fine work.

Recently a book was published about the work of these dedicated women and I am pleased to include with my remarks a review of the book which appeared in the February 26 Washington Post. In that review, Robert Coles explains the significance of the contributions these two brave women have made to peace in a troubled land:

A SEPARATE PEACE IN ULSTER

(By Robert Coles)

(Robert Coles, a psychiatrist and Pulitzer Prize winner, is the author of the five-volume *Children of Crisis*. The last two volumes *Eskimos, Chicanos, Indians* and *Privileged Ones* have just been published.)

In his epilogue to *War and Peace* Tolstoy admitted to an awe of history—its mystery, its nagging unpredictability, its willful refusal to be tamed by those who want to know for sure what will happen, when, and why. He also discussed two contrasting modes of historical interpretation—the kind that dwells on important figures, kings and generals and presidents, and the kind that emphasizes the more impersonal social and economic forces that gradually exert sway over us all. And who knows, he asks repeatedly, whether the emergence of a given leader is not itself the result of those forces that have, in a way, enabled someone in particular to be heard, to be found worth following?

Northern Ireland has for years seemed bereft of any leadership at all—a place thoroughly possessed by contradictory and implacable religious tensions and class loyalties. The British, for so long an alien and oppressive force, are now left the thankless, costly, and dangerous job of trying to keep order in the face of deadly murderous confrontations between Protestant and Catholic militants, neither of whom seem inclined to give an inch. The Protestants are the majority and are relatively better off. The Catholics make up about a third of Ulster's population, and are, in the main, poor, afflicted with joblessness and an especially awful housing problem—wretched slums such as George Orwell described as he wandered through England during the 1930s. As is not uncommon, those with money and power don't want to surrender what they have—and are expert at manufacturing excusing self-justifications, often thinly disguised versions of arrogance and hate.

In recent years, the Catholic poor, have signalled *basta*—no more silent acquiescence. The IRA is, of course, notorious, but it does operate in a vacuum; thousands of ordinary Catholics, sick and tired of their fate, crave serious political and economic changes, and search vainly, it seems, for a means of achieving them. And there is an element of the Protestant majority that has shown no reluctance to use violence to intimidate any kind of social protest, however moderate.

In August of 1976 a Catholic woman and her three children got caught up in one of the violent episodes that almost daily plague Belfast. The three young ones were killed by a runaway car, whose IRA driver had been shot by British troops. Suddenly, out of nowhere, it seemed, a social movement was born; the Peace People—those of both Catholic and Protestant backgrounds who had, finally, become not only fed up with senseless violence, but willing to take a stand for their beliefs. Two women, Mairead Corrigan and Betty Williams, both Catholic, the former an aunt of the three dead children, began to speak up, protest, collect signatures, organize marches, collar those who stood by apathetically, inertly and urge them to similar action—all on behalf of a nonviolent campaign to register opposition to the murderous strife that has plagued Ulster these recent years. The result has been a significant historical shift—no panacea, but at least a beginning of reconciliation for a region essentially caught in a civil war.

No historian or social analyst had figured that two such ordinary, modest women, aided by a thoughtful journalist, Ciaran McKeown, could have rallied so many people to their side, against high odds—threats from various parmilitary groups, Protestant and Catholic—and gone on to win the Nobel Peace Prize. But then, no one would have given Rosa Parks, the quiet, lowly seamstress, much of a chance when she protested the segregated seating in the buses of Montgomery, Alabama, during the middle 1950s. An enabling historical moment sometimes beckons unlikely though utterly deserving participants for a dramatic, combatant role.

Richard Deutsch is a French journalist (*Le Monde*) who has lived in Belfast for years and knows Ulster well. He offers his readers a brief, pointed account of that region's history, then uses tape-recorded interviews and his own shrewd, direct observations to construct portraits of two brave and decent women, who have stood witness to the truly Christian side of a people long haunted by awful religious fears, envies, hates—all upheld in the name of God, no less. There is no "answer" in this book—not the kind that politicians will find pragmatic. Even Gandhi perished in the flames of unrest, despite the brilliance and steadfastness of his commitment to non-violent social reform. Still, generations of political and ecclesiastical manipulations have given Ulster nothing but misery and more misery; it is good to know, through this written account, that a benevolent, redemptive history, mediated through Mairead Corrigan and Betty

Williams, and countless others like them, is not yet out of the question for Ulster.●

VETERAN MISSIONER: BISHOP JAMES WALSH

HON. JOSHUA EILBERG

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Monday, March 20, 1978

● Mr. EILBERG. Mr. Speaker, the Catholic Standard and Times, published weekly by the Archdiocese of Philadelphia, recently described the experiences of a man whose career should be an inspiration to all of us.

In a profile prepared by the National Catholic News Service, the Catholic Standard and Times recounts the remarkable dedication of Bishop James Walsh, former missioner in China.

Despite constant harassment by the Communist Chinese Government, Bishop Walsh carried out his efforts in the early 1950's to aid refugees in Shanghai. Later, he was imprisoned, and suffered a great deal for many years.

As the story explains, Bishop Walsh, now 79 years old, maintains his dedication to the people of China and to the goal of serving humanity:

BISHOP JAMES WALSH: VETERAN MISSIONER

(By Father Ronald Saucci, M.M.)

The old man placed his cafeteria tray on the table, sat down and bowed his head to say grace. Waffles covered with peanut butter and maple syrup were his main course. I sat down across from him and tried to make conversation while watching him carefully cut a piece of waffle with his fork, spread some peanut butter on it, and dip it into the maple syrup.

My mind wandered as I thought about this small giant of a man sitting across from me. It went back to Shanghai, 1952, when Bishop James Edward Walsh of Maryknoll, 61-year-old veteran missioner was placed under a kind of house arrest by the Communists. His coming and goings were under constant surveillance by the police as he spent each day giving aid to refugees from outlying areas who arrived penniless in Shanghai. For some years everything went well. But as the Communists carefully worked to eradicate all foreign influence from China, the bishop headed their list of "undesirable aliens."

One day, nine years later, he was arrested, tried in absentia as an American spy, and imprisoned for 20 years for a so-called currency violation, while attempting to aid the local bishop.

He was confined to a small, damp cell in a Shanghai prison. As the months passed his health began to fail. He became frail and boils erupted on his body. "They would send a doctor in to lance my boils occasionally. Fearing that I would not survive in the small cell, they moved me to a light and airy hospital room where I stayed for the remainder of 12 years. It was altogether quite pleasant," he told me.

Shortly after Bishop Walsh returned to the United States, I interviewed him on a WNBC–TV special welcome-home program. He arrived in the studio extremely irritated by a back problem not helped at all by the muggy sweltering weather. I expected to have my hands full during the interview. Was I surprised! As soon as we began to discuss China, his pains seemed to disappear.

As we finished the show, a strange thing happened. The camermen and studio personnel, usually unimpressed by stars, God or man, lined up to shake hands with Bishop Walsh.

In every conversation Bishop Walsh has had since his release from China in 1972, he never once has said anything negative about the Chinese. In fact, his most animated conversation always concerns China and his love for her people. After spending most of his life in China, he proudly claims a close affinity with the people in spite of all the past sufferings he experienced. His feelings for the Chinese almost from the first day he set foot in China in 1918 have remained unchanged.

When asked whether he would return to China if he could he responded, "Of course! After so many years in China I'm practically half Chinese. They're my people."

Readjusting to life in the United States after so many years in a Chinese jail was less difficult than one might imagine for the 79-year-old bishop. Asked about the change from Latin to English in the Catholic liturgy, he said, "It makes a lot of sense."

Since his release from China, Bishop Walsh has made three major journeys.●

FOR THE MAKERS OF TOMORROW, NO TODAY

HON. NORMAN Y. MINETA

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Monday, March 20, 1978

● Mr. MINETA. Mr. Speaker, we have recently received the news that from January to February 1978, the national unemployment rate dropped from 6.3 to 6.1 percent.

That is good news, but we should not be deceived by it. The burden of unemployment does not fall equitably on all groups. About half of the Nation's unemployed are under age 25. Teenage unemployment is now 17.4 percent, almost three times the national average. And teenage unemployment has actually gotten worse in each of the last 3 months. Among minority teenagers, unemployment stands at 38 percent.

Statistics can never fully express the loss to this Nation that occurs when young people cannot find productive work. Our national sense of both individual and collective self-esteem requires productive work. Take that away from the young and you tamper dangerously with our Nation's future.

In appreciation of this fact the Congress has created several youth employment programs, such as the Youth Conservation Corps and the Young Adult Conservation Corps. The success of these programs shows that the work ethic is still very much alive in young people, if we will only give them the opportunity to do the work that needs to be done.

The YCC can accept approximately 47,000 young people this year, and yet the applications outnumber the opportunities by 10 to 1.

The YACC, now in its first year, is expected to hire only 22,000 this year. Young people from 16 to 23 years of age may apply for this physically demanding work, which pays only $2.65 per hour minus a fee for food and lodging, and which they must leave after 12 months. Yet already there are over 4 million applications on file for those 22,000 jobs. That's roughly 182 applications for every job.

There are willing workers and there is work that needs to be done. The Nation will profit many times over by providing work for these willing hands. And there is an opportunity to prevent the erosion of our greatest resource for the future—our young people. I hope we will do everything possible to fully fund and utilize these fine programs.

I would like to bring to the attention of my colleagues an article by Page Smith, former professor of history at the University of California at Santa Cruz, which appeared recently in the Los Angeles Times. His analysis of the special problem of youth unemployment is a strong argument for positive government action:

[From the Los Angeles Times, June 15, 1977]

FOR THE MAKERS OF TOMORROW, NO TODAY

(By Page Smith)

As a species we have, it seems to me, a curious capacity for ignoring the obvious. Although it cannot in truth be said that we have ignored the problem of youth unemployment in the United States, it is certainly the case that we have dealt with it in an oddly evasive fashion. There is a growing awareness, as a consequence of the energy crisis, that we are all in the same economic boat (which bears, it might be said parenthetically, little resemblance to a lifeboat), but our response seems to be a little half-hearted bailing.

If statistics can be trusted at all, the rate of unemployment among men and women in their late teens and 20s is catastrophic, ranging from 15% to 20% in some sections of the United States to as high as 45% among urban minority youth. From these facts innumerable consequences flow, of which drugs, crime and mental illness are only the most obvious.

During the Great Depression Eleanor Roosevelt was deeply concerned that we might lose a generation of young people to alienation and despair because of the lack of work. This made her an ardent advocate of the Civilian Conservation Corps and other youth programs, many of which were highly successful. Indeed, we are still experiencing their benefits.

From the early days of the "automation revolution," we were warned that the replacement of people by machines would have serious effects on the job market. The post-war boom, aided by the oracular pronouncements of economists, obscured the effects of automation, and yet year after year the number of unemployed or marginally employed young people steadily increased, not just in the United States but also in most other highly industrialized nations (Japan perhaps being the most notable exception).

The response of government to the mounting crisis of youth unemployment has been vapid reassurances and inadequate palliatives. Behind these less-than-halfway measures lay the simple-minded and outdated notion that in our "free-enterprise system" the market takes care, in the long run, of unemployment. The trouble is that the run is getting longer and longer. Meanwhile, every month that a young man or woman goes without a job, that person suffers increasing demoralization.

We like to think that America was built on work and the "work ethic." Indeed, the redemption through work has prevailed in recent times over the earlier belief in redemption through God's grace, though the two ideas have certainly been intertwined

throughout most of our history. So how are we to react when our young people—the "heirs of the future," "the makers of tomorrow"—are without meaningful work or any work at all?

There is, it seems to me, an irresistible simplicity to the solution. It becomes plainer every day that the "private sector" cannot substantially alleviate the situation—even if it can somewhere down the road, we dare not wait upon the experiment—and so we have only to declare, with appropriate oratorical embellishments. that we have entered a new era in human history: Modern industrial technology has been so successful in terms of gross efficiency that it has produced a surplus of human energy beyond what is needed to keep it functioning.

Thus, as we will (or should) announce, millions of people in every industrialized country have been freed to do all the tasks that need so badly to be done to conserve and enhance our environment, natural and human. At last, in the long, painful progress of history, we have reached a point where great public works need not be performed by a servile class but can be the creations of free people performing a myriad of public services.

A necessary step toward this proclamation, of course, is for us to stop viewing unemployment as evidence of personal or social economic failure and recognize it as the most brilliant achievement of modern technology. "See," we must say, "what we have accomplished: We have freed a vast army of young men and women from routine labors and given them an opportunity to perform useful, constructive and rewarding work for their country or, more broadly, for humanity. How splendid! How resourceful!"

"But," the cynic will say, "who is paying for all this? The poor, downtrodden, middle-class jobholder and taxpayer?"

"No, the economy will pay. That is to say, we are already, for better or worse, committed to not allowing people to starve in the most flourishing economy in the history of the world. We spend or waste countless billions on armaments too destructive to use and that will be obsolete tomorrow. We dissipate other billions in overbureaucratized, poorly conceived stopgap measures. We paid the necessary price to salvage our children in the depth of a devastating depression; in times of almost euphoric prosperity, surely we can do no less."

It is not, in any event, a question of money. The money is there, the tasks are there, and the people are there often in desperate need, both psychologically and economically. All that we have to do is the simplest and hardest thing for human beings to do: change our minds—change the way we view work and people without conventional work.

Are our millions of jobless a liability or an asset? Most assuredly an asset. As in a fairy tale, we have only to say it, to make it come true.●

WASHINGTON PRESENTATION BY J. EDWARD DODDS ON BEHALF OF THE SOUTH CAROLINA SOIL AND WATER CONSERVATION DISTRICTS AND RESOURCE CONSERVATION AND DEVELOPMENT PROJECTS

HON. KENNETH L. HOLLAND

OF SOUTH CAROLINA

IN THE HOUSE OF REPRESENTATIVES

Monday, March 20, 1978

● Mr. HOLLAND. Mr. Speaker, hearings are currently being held by the House Appropriations Subcommittee on Agriculture and Related Agencies on President Carter's budget request for the resource conservation and development projects. Following is testimony prepared by Mr. J. Edward Dodds from Lancaster, S.C., located in my district, which I believe explains well the need for continued funding of these worthwhile programs at their present level, and I at this time submit it for inclusion in the RECORD:

THE RESOURCE CONSERVATION AND DEVELOPMENT PROJECTS BUDGET OF $31,033,000 SHOULD BE INCREASED, NOT REDUCED

I bring to you greetings from the State of South Carolina and I speak to you in behalf of that state.

These are my credentials:

1. I am a beef cattle farmer with a farm in Lancaster County. I have operated this farm for 22 years.

2. In 1971 I received the Goodyear Conservation Award for outstanding accomplishment in Conservation in Lancaster County.

3. In 1977 I was given the Outstanding Conservationist award by the East Piedmont Association of Conservation Districts.

4. I was chairman of Lancaster County Resources, Conservation and Development Committee for a two-year period.

5. I am presently chairman of Crossroads of History RC&D Area. This is made up of a six-county area.

6. I am chairman of County Rural Development Committee of Lancaster County.

The purpose of being here today is to speak regarding the proposal budget for Resource, Conservation and Development projects. The appropriations budget for 1978 was $31,033,-000.00. The proposed budget is $6,797,000. The proposal is wholly inadequate. In the few minutes at my disposal I believe I can tell you why this is so.

Although my remarks will be confined to experience in South Carolina, I have been in touch with other states and find our experiences quite similar.

Like other states we in South Carolina face the glaring damage resulting from unrecognized ignorance, mistreatment of land and in many cases even willfulness. This state of affairs will require awakening all the people not just farmers to their dependence on the land if we as a nation are to continue to be well fed, clothed and housed.

The four Resource Conservation and Development areas (Crossroads of History, Ninety-Six District, Low Country and Santee-Wateree) in South Carolina are people oriented. By joining the effort as a volunteer local leader begins the educational process of knowing the land and working with nature to improve the soil.

RC&D activities include conservation treatment of eroding roadsides and other critical areas. Other activities include flood reduction and better drainage through improved channels and retarding dams, recreation, wildlife habitat development and many other environmental and economic improvements. Project activities include revegetation of critically eroded land. Special preparation and plantings on steep slopes keep the soil in place and prevent sediment damage to water courses below.

The State of South Carolina is essentially undeveloped with approximately 60% of her land in forest. We are beginning to break out of this condition with the great national emphasis on the Sun Belt. Taking place are clearings for homes, industry, business and transportation. With each development we face the possibility of pollution from erosion. Those of us who have been concerned with water pollution have learned that the greatest source is not chemicals or waste but *soil erosion*. Proper control takes time with good technical advice and guidance. We have had this with our RC&D staff.

Flood and water control is a never ending problem. We are meeting this with flood control ponds, terracing, and proper planting. The State of South Carolina receives adequate rainfall. However, in many instances it does not come at the time needed. Therefore it is necessary to conserve water during the rain periods and use it by irrigation when needed. An emphasis on ponds for that purpose has been initiated by RC&D committees throughout the state.

When one looks at the end result of no erosion control, the destruction is so obvious one would wonder why it would be permitted in the first place. The fact is that erosion control must begin with the clearing of the land. A plan for that control should be a part of the plan for clearing. This is the objective that RC&D has set for basic control. It is the process of education and the development of enforcible regulations that is needed to implement the move toward the objective. About 70% of the land of our state has been surveyed by air. Each cooperating landowner may receive a photo copy of his land with recommendations as to its proper use. We are studying landuse and are already involved in planning at the local level. Proper land use is something that does not happen over night. It is a long hard road to get acceptance. Confidence must be established before one moves to acceptance of an over-all plan. The RC&D, with the local committee volunteer program has the inside track for the education to proper land use.

South Carolina has four (4) RC&D Projects that cover 23 of the states' 46 counties. Each project is sponsored by local units of government such as county councils, town councils, soil and water conservation districts and special purpose districts. Each project has a council that provides direction and position. The council members serve without pay or any other compensation. The members came from varied backgrounds. Some are farmers, doctors, bankers, teachers, etc.

Each project is planned and implemented by local citizens. Each RC&D project has developed its goals and objectives to fit the needs of local people. Many of these objectives take long-term planning. Only a very few can be completed within a year's time. The first RC&D project in South Carolina was the Low-Country RC&D program. Because the "Low Country's" topography is near sea level and wet, water management has been a top priority. Sixteen small flooded prevention plans have been implemented at a cost of $1.3 million. An additional seventeen projects have been requested and developed by various groups. It is estimated that $1,000,000.00 will be needed to install them. The Low Country effort has required financing, designing and the construction of watershed recreation projects. Assistance also was given to many communities with other types of recreation efforts. The establishment of tennis courts, conversion of unused railroad stations to community centers, and the building of little league base ball diamonds to mention a few. The most recent recreational project is Palmetto Islands County Park in Charleston County. This back to nature oriented park is located on 725 acres and composed of several islands. Many conservation techniques are used in the park and the facilities were designed to blend and enhance the natural characteristics of the site. Other such recreational projects have been requested.

The Crossroads of History RC&D Project is located in the northern part of South Carolina where a great deal of erosion is taking place. Silt produced from this erosion has filled many streams in the area and a lowering of water quality and the destruction of wildlife habitat has resulted. Seven critical area treatment plans have been developed and are being put into operation. Four hundred and nineteen acres have been seeded

at a cost of $128.354 using RC&D funds. Additional contracts for $36,700.00 are being awarded this month. In Lancaster County an environmental laboratory has been established at no cost to the RC&D. An area of woodland making up over a hundred acres of land was provided by the Springs Corporation. It was surveyed and plotted by foresters after which trails were developed, trees identified, etc. An all-weather parking area was developed after a road was bulldozed into the land. The objective is to provide students and individuals with an understanding of the land and what is required to keep it in top condition. A plan is underway to set up the trails so blind individuals can enjoy a unique experience. Trail signs in braille and rope-guide lines are to be a part of the project.

One of the most unusual critical area treatment plans is Henry Knob in York County. A mining company moved off the 180-acre mountain and left the county and citizens with a man-made disaster. Silt damages from erosion taking place on the mountain was causing problems ten miles down stream. York County asked the RC&D area committee for help. The Henry Knob Critical Area Treatment Plan was developed. In 1977 half of the Knob was re-vegetated with grass and trees. At the present time the other half is being brought back to life.

Seventy percent of the Crossroads of History RC&D Project area is in woodland which is extremely difficult to sell pulp wood at any price. Nevertheless the project committee is looking for ways to utilize this vast resource. Through study and research we have found that we will be able to help solve the energy crises through the utilization of pelletized wood as an energy source. The pellets can be used in place of coal and produce a heat equivalent to coal.

The Santee-Wateree RC&D Project in central South Carolina has installed four small flood prevention programs with funds provided by the RS&D. The cost was $124,000. Two more have been planned and requests for assistance for a dozen or more are being considered. One county has already used $100,000 to heal over eroded land and it is estimated that it will take at least $400,000 more of RC&D project funds to complete the job over a period of several years.

The RC&D committees have been studying the floodplains of their areas and are alert to development programs that may come to disaster if proper planning is not taken into consideration. The committees have no intention to prevent building development. On the contrary the main thrust of RC&D is proper planning and control to prevent future loss.

Pocotaligo Conservation Park (near Manning in Clarenton County) would not be a reality today if the RC&D Council had not assisted with the planning and implementation of the plan. The land now used for the park is located in a beautiful swamp. It was about to be "clear cut" until the RC&D Council got the local people involved and aware of the immense possibilities. Talk about cooperation, some local funds were provided, RC&D funds were used to plan the park, and a grant from the Bureau of Outdoor Recreation paid for the installation.

The youngest RC&D Project located in western South Carolina, the Ninety-Six District RC&D, has already re-vegetated over 500 acres of critically eroding areas. However, there are 2500 more acres to be completed.

At the present time work is underway on some twenty projects that have come to my attention. Our people are diligent in the work and tireless in their effort because we know that only about a third of all agricultural land in this country is adequately protected against erosion. An important point to call to your attention is that South Carolina is interested in tax dollars. Therefore, we seek opportunities to broaden the tax base by encouraging new industry and business to incorporate in the state. At such times these interests seek the guidance of RC&D staff for proper landuse. To us in a very practical sense, RC&D funds are investments in future tax dollars. One other fact, if South Carolina gets increased tax base the Federal Government always gets its share.

Our objective is to save the land. It is God's gift to man and we are the stewards for a moment of time.

By proper use of this important natural resource the people of America should be able to maintain a high standard of living which includes good homes, schools, churches, adequate and stable incomes for farm people and a continuous and plentiful supply of farm products for all the people. Those of us who have worked with the land know how fragile it is. It must have constant attention. The local RC&D committees try to give it the over all attention it needs.

If our nation is to live and if the well being of its people is to be made secure the soil must be passed on to our descendants in better condition than it was received. This is the objective to which we strive.●

LEGISLATION TO AUTHORIZE APPROPRIATIONS FOR TUNA RESEARCH

HON. JOHN M. MURPHY

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Monday, March 20, 1978

● Mr. MURPHY of New York. Mr. Speaker, I wish to bring to the attention of my colleagues a measure that will greatly assist in the development of the tuna resources of the Central and Western Pacific, and the strengthening of the American tuna industry.

Today I am introducing legislation that will increase the funding authorization for the Central, Western, and South Pacific Fisheries Development Act by an additional $25 million. The existing law authorizes $3 million for the period from September 30, 1976, to September 30, 1979. Although, that authorization does not expire until September 30, 1979, my bill would increase that authorization to $8 million and extend the act for an additional 4 years (for fiscal years 1980, 1981, 1982, and 1983) at a level of funding of $5 million per year.

The Central, Western, and South Pacific Fisheries Development Act was enacted in 1972 to assist in the development of a skipjack tuna fishery in the Central and Western Pacific. The skipjack tuna resource in this area is sufficiently extensive to provide a suitable base for the economic development of the Trust Territories of the Pacific, American Samoa, Guam, and the State of Hawaii.

Unfortunately, although tuna are present in this area, we have not yet developed the fishing gear which can efficiently harvest this resource. This legislation will accelerate current efforts to develop this much-needed new fishing technology.

This bill comes at a particular critical time for the American tuna industry. Although the fleet has demonstrated that it is well on the way toward solving the tuna-dolphin problem, the fleet is now facing a new and possible more damaging challenge. This new challenge has come in the form of exhorbitant Latin American demands for special yellowfin tuna allocations. These demands could spell disaster for the yellowfin tuna resource of the Eastern Pacific and for the American fleet which has pioneered efforts to harvest that resource.

Although the United States should continue to resist these demands, it is incumbent upon us to simultaneously move ahead and develop new fishing grounds outside of the Eastern Pacific Ocean.

Since the enactment of the Central, Western, and South Pacific Fisheries Development Act in 1972 the tuna industry has contributed large sums of money in a joint industry-Government effort to get this fishery off the ground. This legislation will insure that this joint effort is continued and expanded.

I should note, Mr. Speaker, that the development of a tuna fishery in the Central and Western Pacific will not increase incidental dolphin mortality. Although a significant percentage of the yellowfin catch in the Eastern Pacific is landed in association with dolphin, the skipjack tuna of the Central and Western Pacific are not known to travel with dolphin populations. Any expansion of effort in the Central Pacific will work to the benefit of dolphin populations by decreasing the fishing pressure in the Eastern Pacific Ocean.

I hope my colleagues will support the expanded program to be provided by this legislation so that a skipjack tuna fishery in the Central, Western, and Pacific Ocean will be a reality within the not too distant future.●

INNOCENT VICTIMS OF PLO TERROR

HON. ELIZABETH HOLTZMAN

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Monday, March 20, 1978

● Ms. HOLTZMAN. Mr. Speaker, the cowardly and brutal Palestinian Liberation Organization raid on Israel last week resulted in the deaths of 36 innocent people and led to predictable military retaliation. Perhaps the most moving account of the human tragedy wrought by the PLO was written by Cynthia Ozick in the New York Times.

I commend this poignant article to my colleagues.

The text follows:

LETTER TO A PALESTINIAN MILITARY SPOKESMAN

[From the New York Times, Mar. 16, 1978]

Dear Palestinian Spokesman:

When you say that your friends killed 33 Israeli soldiers in last weekend's terror attack on the road near Haifa, do you mean my cousin Imri? Your friends shot him in the throat. He was not a soldier. He was 14 years old, and played the clarinet.

Now I am not sure what the mentality of a terrorist might be, since unlike you, I have never had one for a friend; but it seems logical to assume that if you have murdered someone, you might like—even if only out of idle curiosity, but especially out of ideology—to know something about the life you have taken. So please let me tell you a little bit about my cousin Imri. I promise you it won't

occupy much of your time, because if someone is murdered when he is only 14 years old, how much can there be to tell?

In fact, Imri's life was so brief, and there was so little he ever had a chance to do, that I might as well begin with his grandfather and grandmother.

Imri's grandfather is a poet, a lover of the English Romantics. He has won some fine prizes for his work (including the Brenner Prize, named after an early Zionist who vowed that Jews were no longer going to be murdered just for being Jews), and he has translated Walt Whitman into Hebrew; but he is rather elderly now, so these days he mostly sits in his little garden reading Wordsworth and Keats and Shelley and Blake.

The garden is rather special. It is in the backyard of a house not far from the Lod airport (where some of your other friends murdered a group of Christian pilgrims not so long ago).

When Imri's grandparents built the house—a simple concrete cube filled with volumes and volumes of poetry—it was entirely surrounded by sand. But Imri's grandmother, though very frail, put down seeds and nourished and raised up her "babies"—a whole orchard of flowering fruit trees.

Every morning very early Imri's tiny grandmother climbs a shaky ladder to reach up to each young pear, which she patiently and meticulously wraps in a little paper bag. It looks pretty comical—a paper-bag tree!—but Imri's grandmother will not spray the trees with insecticide; she does not want to kill the insects, who also have a right to live. Imri's grandparents are vegetarians, and so was Imri, and so are his parents and all his brothers and sisters and aunts and uncles. You see, they do not like to take life.

Imri's mother and father are passionate musicians. They play first and second flute in the Jerusalem Symphony—or at least they did until last weekend, because Imri's father may never play again. One of your friends blew up his hand. In the hospital at Haifa they are trying to patch together some of it with bone grafts; soon they will know whether the nerve will die. (Imri's bother Nir is luckier; it was only his leg that was wounded. He lost a lot of blood, but he is all right.)

About two years ago, Imri's father came to America for a time to teach flute at Ithaca College. It was hard to tell which he loved more—music or his students. Tears fell from him when the term drew to an end and he had to say goodbye. When he heard or played music he seemed illuminated: "Isn't this beautiful?" he would murmur. All of Imri's six brothers and sisters are musical. They play all sorts of instruments, and the beauty flies out of their hands.

Imri's oldest sister, Anva, a dancer, just had her second baby, and so what happened was this: Imri and his brothers Nir and Adiel and his little twin sisters Vivi and Cori and their parents all piled into the family car to drive up to Haifa to see the new baby. After the visit, they were on their way home to Jerusalem, just behind a bus, when your friends started throwing grenades and shooting at them, at first on the road itself and then from inside the bus. When Imri's father, who was driving, got hit, Imri's brother Nir managed to grab the wheel and save his family, even though his leg was streaming blood. In the horror of the explosions and the pursuit it was a little while before anyone realized that Imri was dead.

All right, now about Imri himself.

He was mainly a quiet boy, private as some adolescents like to be, and a good student. Until not long ago he was still quite small, but in the last few months his family had begun to marvel at how he was springing up. He was going to be tall, like his father. He was fond of stamp-collecting, and when his mother toured with the orchestra she always brought back interesting foreign stamps for him. His instrument was the clarinet: he was a member of a youth orchestra in Jerusalem. He used to grumble over his clarinet because it was second-hand and somewhat woebegone; but only two days before your friends killed him he had the delight of learning that he was going to get a better clarinet.

And that is about all I can tell you about your victim Imri. I warned you it wouldn't amount to much. The main thing, you know, is that he was never going to kill anyone or anything—not even a fish or a chicken, much less a fellow human being. He was only going to make beautiful sounds on his clarinet.

Imri's grandfather, when he was not much older than Imri during the First World War, used to write pacifist poems; and once after the 1948 war he began a lyric about Bialik, the Hebrew poet, that in the most natural way turned into a prayer for fraternity between Arabs and Jews. And after that Imri's grandmother kept on growing trees and flowers in what used to be sand, and Imri's whole family kept on sending music, one of the languages of peace, up into the Middle East air.

Well, I just thought you would like to hear about one obscure 14-year-old who happened to become a target of yours, because why shouldn't you know who it is you hated enough to kill? And now that your friends have murdered Imri and blown up his father's hand, there will be that much less music in the world, and that much less civilization.

You have made it pretty clear that all of this feeds your pride and your notion of manhood and especially your sense of nationhood. The triumph of guns and blood excites you more than symphonies and poems and clarinets.

It could be, though, that you didn't really tell an untruth when you called Imri a "soldier." On our battered planet there are always, after all, two armies—the army of guns and the army of clarinets. Death flies out of one and beauty from the other. Imri is a fallen soldier in the army of clarinets, and in the end your most intractable stumbling block, your deepest contest, will have to be not politics, or your Soviet arms suppliers, or land, or your propagandists abroad, or your multiple perversions of the vocabulary of idealism, or your fellow Arabs who have imprisoned and despised and morally crippled and corrupted you for the last 30 years, or your hatred of Jews, or what you call "self-determination" while denying it to another people, or your vow to dismantle Israel, or your putting military uniforms on boys just Imri's age and teaching them terrorism, or even your bloodthirsty braggadocio; or anything like that.

No. You will have to grapple with what you know to be your chosen enemies—rank after rank of the singing clarinets: the army of civilization. Your guns cough in brutal eyeblink blasts and shatter human bones. Your friends, by stealth and ambush, murdered Imri. You are terribly proud of this, and crow it over the airwaves. No matter. Civilization is more tenacious than the death you bring. Paperbag trees, and Keats in a garden near an airport, and the long, long voice of the flute, and the singing clarinets—these are the soldiers you will have to defeat. If you can.●

LIKE IT IS

HON. CHARLES B. RANGEL

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Monday, March 20, 1978

● Mr. RANGEL. Mr. Speaker, recently the black public affairs show "Like It Is" celebrated its 10th anniversary on WABC–TV. This enlightening program has provided a much needed forum for minorities in America.

Scholars, heads of state, and other national personalities have, on this show, shared their views on a wide range of both interesting and extremely socially relevant issues.

"Like It Is" has excelled despite its meager budget and resources. The outstanding efforts of its producer and co-host Gil Noble has resulted in consistent programing of outstanding quality and focus.

To commemorate the 10th anniversary of so fine a show, New York Times reporter C. Gerald Fraser wrote an article which I would like to share with my colleagues:

"LIKE IT IS," BLACK-ORIENTED SHOW CELEBRATES ITS 10TH BIRTHDAY

(By C. Gerald Fraser)

"Like It Is," the black-oriented WABC–TV public affairs program, is now 10 years old and has more than 60 awards from community organizations as well as five Emmys from the National Academy of Television Arts and Sciences to show for it.

The primary focus of "Like It Is," the longest running program on WABC–TV and the oldest community affairs program dealing with minority issues on television, is "the politics of the black condition," according to Gil Noble, its co-host and producer. The program deals with "the politics of our health, for example, of our housing and an international perspective," Mr. Noble said.

ONLY HISTORICAL ENTERTAINERS

"The industry has already established that we can sing and dance," he said, so there are few entertainers seen live or on film on the program, only those, such as the late Charlie Parker and Sid Poitier, who have "historical value."

In the production office at 1 Lincoln Plaza, Mr. Noble, conservatively dressed as usual, sat with one of his long legs thrown over one arm of his chair—he is 6 feet 5 inches tall. The afternoon sun brightened the room, which was decorated with plants, and photographs of Paul Robeson, the Rev. Adam Clayton Powell, Jr., Malcolm X and the Rev. Dr. Martin Luther King Jr.

Motoring toward the pictures, the 43-year-old Mr. Noble said that periodically he asks himself, "Am I doing what they would approve of?"

FOCUS ON AFRICA AND CARIBBEAN

General local programming, he said, regularly focuses on the Middle East, Greece, Ireland and human rights in the Soviet Union because a sizable number of the population here hails from those places.

"If that is right, I'm obligated to focus on Africa and the Caribbean," he said. "That is what the people who made my employment possible had in mind, I believe, and I take my commitment very seriously," as he referred to the civil-rights activists of the 60's.

The hour-long program is usually broadcast early Sunday afternoons. In typical public-affairs program fashion, "Like It Is" often floats from one time slot to another.

THE REWARDS OF STUDY

The program uses filmed reports, commentaries, panel discussions and interviews with scholars, physicians, writers, government officials, politicians, heads of state and local and national personalities.

His best programs, Mr. Noble said, included one on the rewards of study. Mr. Noble simply took his camera into the libraries of two black historians—John Henrik

Clarke and Josef Ben Johannan—and each discussed his boyhood, his zest for reading, his sacrifices to get books and what interested him about black and African history and the search for knowledge about himself and his people.

"What surfaced," Mr. Noble said, "was an ethic not glamorized or made important by America. These scholars are true heroes with genuine validity built on hard work. The point was to make, say, John Henrik Clarke as valid and as glamorous as a basketball player."

AFRICA AND THE MOVIES

Other favorites of Mr. Noble include a series on Africa's "gifts to the world," which discussed ancient African metallurgy, architecture and the university at Timbuktu.

Mr. Noble also cited a 90-minute special with Mr. Poitier. It included clips from the actor's movies, and Mr Poitier discussed in detail his career, the motion-picture industry and what happens to money invested in films and revenues from films

What he has tried to do, Mr Noble said, was to "present the continuing stream of information about what is happening in the black experience." "We also want to present a constant stream of history for both white and black viewers"

For this reason, he said, he presents both historical segments and hard news because of the "paucity of exposure of black history on the rest of broadcasting"

MEAGER BUDGET

By television standards, the program's budget, which was $500,000 last year, and, according to a WABC–TV spokesman, is scheduled to be increased 10 percent this year, is meager. A camera crew is available for the program's use one day a week.

These are nettlesome limitations, Mr. Noble said, but for 10 years, he has worked around them. He often augments the film his crew shoots, he said, with footage from the station's film library—film often previously unused because of the news department's different perspective.

"Like It is" was first produced by Ed Silverman and written by a staff newswriter. WABC–TV had wanted to call the program "The Way It Is," but Mr. Noble and Robert Hooks, the actor and the show's first co-host, convinced management to use the more colloquial expression and also to drop a rock-and-roll theme management had thought appropriate.

OFTEN A SPRINGBOARD

By June 1968, Charles Hobson, the program's first black producer, was hired. Other producers have included Richard Watkins, Melba Tolliver and Marquita Pool. All of them have moved on to better-paying jobs in radio or television since they left "Like It Is."

Two other co-hosts were Gloria Rojas and Geraldo Rivera. Both were imposed on the program by the station's management to broaden the show's ethnic appeal. But objections by black community groups and individuals succeeded in keeping the focus on blacks.

The current staff of five includes Robert Van Lierop, a lawyer and film maker who is co-producer and has made films in Mozambique that have been on the program.

BEGAN BROADCASTING AT WLIB

Mr. Noble began his broadcasting career in 1962 working full-time days as a newscaster at WLIB and full-time nights in the letters of credit department at the Chase Manhattan Bank.

In 1967, he moved to WABC-TV.

A pianist, he led the Gil Noble Trio, which attained prominence, in Mr. Noble's home community—Harlem. Today, he is married, and he and his wife, Jean, have five girls; he sculptures, paints and is writing a book on his experiences in television.

He became the "Like It Is" producer about two years ago and has since generally limited his appearances to anchoring the 11 o'clock news on weekends.

"I HAVE TO BE MYSELF"

This suits him, he said, because he realized he did not fit into a "flip" news format. "I have to be myself," he said, "concentrating on what I'm doing. As a reporter, I am a conduit, I am subordinate to the report.

"'Like It Is' has made me feel more like a reporter. I am able to focus on my priorities. 'Like It Is' is not the entire answer, but it makes black peoples' thoughts available to all television viewers." ●

"SCIENCE CENTERS: A POTENTIAL FOR LEARNING"

HON. JOHN BRADEMAS

OF INDIANA

IN THE HOUSE OF REPRESENTATIVES

Monday, March 20, 1978

● Mr. BRADEMAS. Mr. Speaker, in the words of a summary of an article I wish to insert in the RECORD—

The past decade has witnessed a proliferation of science-technology centers, or public places for informal learning about science and technology. Science centers are the only institutions that can provide the general public with participatory exhibits and experiences, together with an accurate scientific interpretation of the materials that are involved. The dramatic rise in attendance and the enthusiasm of repeat visitors to science centers reflect a strong public demand for exhibits designed to help the visitor develop a better understanding of the contemporary scientific issues of society.

Mr. Speaker, the summary I have just quoted describes an excellent article, "Science Centers: A Potential for Learning," published in the January 20, 1978 issue of Science magazine, the weekly publication of the American Association for the Advancement of Science.

The author of this article is Ms. Lee Kimche, formerly executive director of the Association of Science-Technology Centers in Washington, D.C., and now Director of the Institute of Museum Services in the Department of Health, Education, and Welfare.

The text of Ms. Kimche's article follows:

SCIENCE CENTERS: A POTENTIAL FOR LEARNING

Science centers provide a whole new field of self-motivating experiences in learning, through environmental exhibits that appeal to the senses, emotions, and intellect. They are among the most rapidly developing institutions of learning in contemporary society. They have been responsive to a growing public demand for knowledge and information. As more and more people visit them, the science centers have a unique opportunity to assist a large segment of the public to gain a greater understanding of the contemporary technological issues of society. The objects and exhibits can form the basis for other types of educational programs, not only within museums, but throughout the entire community. The informal educational techniques that science centers employ may have implications for other types of institutions. Traditional forms of education are undergoing reappraisal; perhaps some of the methods used in science centers can be adapted to enhance more conventional methods of teaching.

The growth of science centers began early in the century. The greatest growth has occurred within the last 10 years, and there is no sign that the trend will slow down soon. The expansion of existing science centers is proceeding apace with the building of new facilities.

ATTENDANCE EXPLOSION AT SCIENCE CENTERS

The increasing number and size of science centers is a direct result of the sharp rise in public demand on existing institutions. The number of visitors to science museums is greater than to any other single type of museum. According to a 1974 survey of 1820 institutions conducted by the National Endowment for the Arts[1], 38 percent of all museum visits were to science museums, 24 percent to history museums, and 14 percent to art museums. The survey, which included natural history museum in the science museum category, found that, of a total of 308 million museum visits in FY 1971–72, 117 million were to science museums. Excluding natural history museums, science-techonology centers alone have experienced skyrocketing attendance in this decade, with the 14.4 million visits registered in 1973 soaring to 36.5 million in 1975. And in 1976, more than one-fifth of the members of the Association of Science-Technology Centers reported attendance increases of at least 10 percent since 1975. Many science centers that offer after-school, evening, weekend, and summer courses have reported waiting lists for enrollment, and still other museums have been forced to impose time limits at certain participatory exhibits due to long waiting lines.

Until recently, it was thought that science centers appealed primarily to children. It is true that school groups form approximately 25 percent of visitors to these centers, but a brief survey shows that 45 percent of the visitors are adults, including college students and senior citizens.[2]

Most full-scale science-technology centers offer workshops for all age groups in chemistry, biology, photography, ham radio operations, computers, magnetism, model airplane construction, and other popular fields. Classes and workshops for school-age children reveal some intriguing offerings, such as "Elementary, My Dear Watson: Solving Problems by Deduction," "Marble Shoot Computers," "Water Wizardry," "Optical Toys and Parlor Amusements," and "Performing Plants." Although fewer programs are offered for adults, they range from auto rally classes to lapidary labs, from workshops on dehydrating foods to "Wild Parties," banquets based on edible wild plants.[3]

CHARACTERISTICS OF SCIENCE CENTERS

Most other kinds of museums have evolved as depositories for categorical collections that may be admired by the public and studied by scholars in private. While traditional museums emphasize static displays of objects and artifacts, science centers have followed the more dynamic philosophy of the Chinese proverb: "I hear and I forget, I see and I remember, I do and I understand."

Studies by Thier and Linn[4] revealed that visitors are not attracted to science centers to learn only facts; they come to experience new and interesting phenomena. This is substantiated by a preliminary study by Yankelovich[5] at the National Air and Space Museum. Fifty percent of the visitors in the museum, when asked why they visited the museum, answered "for juicy tid-bits"; 40 percent said that they came for entertainment or a dynamic experience; and 10 percent cited miscellaneous purposes.

Attendance at science centers is voluntary, unlike the required attendance of most traditional educational programs, and the course that the visitor follows once inside is self-

---

Footnotes at end of article.

established. There is no "required" reading, listening, or viewing. There is no prescribed path to be followed, or set time for departure. In the museum, visitors may spend as much time as they want at the exhibits that interest them most. Goodman [6] has stated that people will learn best when they have opportunities to make choices about their own learning and chances to build on their own interests. In a study of children between the ages of 10 and 12, Thier [7] found that they showed an interest in exploring science materials of their choice, and that self-selected science experiences foster the development of logical thinking in that age group.

A museum is a social environment, and learning takes place more readily in a social context. One reason that people go to science museums is to share time with family or friends. According to Laetsch, who is director of the Lawrence Hall of Science in Berkeley, family groups constitute the museum's single largest constituency, and his research has shown that adult-child combinations spent more time at the exhibits selected for observation than did child-child or adult-adult combinations.[8] Almost no research has been done on learning in family groups, yet the museum is perhaps the only educational setting where families frequently appear as a unit.

Another feature of science centers is that they provide experiences that are not available anywhere else. Increased technology has brought about an increased desire among people to do things in simulation that they cannot do in actuality.

Through the modern, sophisticated technology found in science centers, the public is able to experience more activities on a firsthand basis. In addition to simulated submarines and airliners, many science museums offer the public opportunities to use telescopes, computers, musical instruments, and other apparatus to which few people have access elsewhere. The instructional design of such exhibits as the "Physics Playground" at the Exploratorium in San Francisco is one of the more innovative approaches to informal learning to be found anywhere. There, swings and other playground equipment were constructed to teach the principles of physics.

People go to science centers to satisfy their curiosity about branches of science that are having more and more impact on their daily lives. The public is demanding timely access to information on subjects such as the saccharin debate, genetic engineering, nuclear reactors, solar energy, air and noise pollution, food supply, and other critical issues. Science centers are peculiarly adapted to presenting this material understandably. Few of these issues were publicly evident when many people completed their formal education; the science center affords access to authoritative information in a setting where people can keep abreast of new developments in science and technology voluntarily and on a lifelong basis.

The learning opportunities available at science-technology centers comprise a resource that can be understood best in the context of a change in public attitudes toward formal and informal education and leisure time. A survey of high school graduates' satisfaction with their educational achievements during the past 10 years since their high school graduation showed that 46 percent were dissatisfied with their intellectual accomplishments.[9] This would partially explain the findings of Hyman [10] that indicate that 50 million adults are currently engaged in pursuing some form of continuing education and that only 9.6 million of those adults are enrolled in programs that lead to a degree or other certification from an educational institution. The remaining 40.4 million are involved in courses, classes, symposia, and discussion groups that are provided by other institutions, such as museums, libraries, businesses, community groups, religious organizations, and science-technology centers.

Furthermore, science centers present information on current issues objectively since their goal is to present enough facts to enable people to make intelligent decisions on their own.

Special constituencies such as the deaf, the blind, women, senior citizens, inner-city youth, and non-English speaking immigrants and tourists are finding that science centers have been among the institutions most responsive to their needs.

OPPORTUNITIES FOR EDUCATIONAL RESEARCH

Relatively little information exists from which to determine whether the experiences that people have in science centers actually result in measurable advances in learning. Research to date has concentrated on gathering demographic data about museum audiences and on exhibit popularity, rather than on the effectiveness of exhibits in transmitting information. Both cognitive and affective testing of museum experiences are limited because the traditional instructional model that is employed in pedagogical research is inadequate to measure the effectiveness of museum experiences.

Furthermore, if learning in a museum is a visual and kinesthetic experience, which differs qualitatively from sequential classroom lectures or reading printed texts, recent theories of brain physiology should also be taken into consideration.[11] Current experiments have found that this distinction has a somatic basis, that is, the hemispheres of the brain have distinctive behavioral attributes (for example, visual learning is right-brained, while linguistic-based information-transfer is left-brained). If we are to maximize the potential of learning opportunities in museums, it is imperative that new models for measurement be developed. These models should be based on the uniqueness of the museum experience and take into account the most recent theoretical and empirical studies of the brain.

A systematic measurement of what people get out of a visit to a science center, or how, if at all, they are changed as a result of the visit, is just getting under way. The few researchers who have pursued this question are divided over the question of whether or not such changes are even measurable. It is possible to measure information transfer in terms of cognitive gains by testing how much a person can do, or how many questions he can answer correctly, before and after exposure to a given exhibit message.[11-13] But if the results of the cognitive testing are disappointing, the value of the visit should probably not be written off without knowing anything about the affective or attitudinal impact of the visit. As long as evaluation of the museum experience is carried out with methodologies designed to measure cognitive gains, or the quantity of information absorbed, the danger exists that museum exhibits will fall short of their potential to be inspirational and provocative stimulators of ideas as well as transmitters of knowledge. New evaluation tools need to be developed that can meaningfully register the museum-goer's attitudes and feelings, not only about science but about the informal learning environment itself. Photography is not a measurement tool, yet one only has to look at photographs of people interacting with exhibits for evidence that something more than information transfer is taking place. Systematic tools need to be designed that can interpret what the camera has always been able to capture: laughter, concentration, perplexity, satisfaction, curiosity, surprise, awe, and the thrill of discovery. Tressel has suggested that one of the most important accomplishments of a museum visit is to provide people with reference points that can aid them in later reasoning.[14] It may be impractical to collect data on the recollection of museum experiences days, weeks, months, or even years after a visit, or on how recollections are triggered; but it is evident that mention of a particular science museum will make eyes light up, nostalgia creep in, and people respond. "I will never forget my childhood experiences at the Museum of Science and Industry," or "I practically grew up in the Franklin Institute."

Screven pointed out in his studies that "learning cannot be directly observed. It must be inferred, usually from observed changes in what a visitor can do before and after exposure to an exhibition".[13] How much visitors learn depends on the time and effort they devote to an exhibit, as well as on an exhibit's content and layout. Therefore, it is useful to distinguish between the "teacher-learning" aspects of an exhibition (what an exhibit potentially can teach or communicate) and its motivational aspects. Motivation involves exhibit conditions (contingencies), which determine whether the visitor will stop, spend time and effort attending to content, return, and so on.[15] Effective teaching exhibits should integrate both learning and motivational aspects.

Shettle found that the average visitor views an exhibit unit for 20 seconds and tours a complete exhibit for a maximum of 14 minutes.[12] If both observations are correct, it may be concluded that science centers are able to draw the attention of the viewer for a very limited, if concentrated, period of time. In order to capitalize on that time, it is important not to require the reading of extensive text nor concentrations on visual aids that would try the patience of the average viewer. To create such learning systems, Screven has added various interactive response devices to permanent exhibits, such as cassette tape recorders linked to punch cards, game cards, or free-standing self-teaching machines. His data suggest that the added interactive devices improve visitor learning.[13] Screven also found that casual visitors in both art and history-science museums can then be motivated to spend time and effort at exhibits to achieve specific learning goals, and will learn considerable substantive content in the process.[13] Much more work needs to be done to develop and expand the most effective use of these methods to meet the principal and everyday demands of museums.

Science centers have been forerunners among educational institutions in introducing participatory experiences which provide effective but informal learning techniques. The findings of Laetsch, Screven, and Shettle correlate well with the theories of many educators who have found that learning is enhanced when the learner is involved in self-discovery.[16] Involving the learner in what is to be learned is an approach basic to science centers. Shettle studied the educational and attitudinal impact of exhibits and stated that "active participation heightens the acquisition and retention of information." [12]

The concepts of "visitor involvement" and "participatory exhibit" have undergone some basic changes in recent years as a result of museum research on viewer attention span and of nonmuseum research on cognitive and affective processes. The earliest exhibits deemed participatory were those in which the role of the viewer was limited to pushing a button which then activated the exhibit on a fixed course, started a tape recording or lit up a panel bearing a printed message. Thus, the push-button variety of exhibit was considered an early mode of viewer participation.

With the advent of systematic exhibit evaluation, the participatory nature of push-

Footnotes at end of article.

button exhibits fell into dispute. Eason and Linn explained "the term participatory does not refer to exhibits equipped merely with start buttons or audio tapes. Participatory exhibits actively involve the visitor in discovering information through his own participation in the demonstration process".[10] In a more recent study, Borun found that push buttons correlate negatively with learning, and that successful participatory learning devices are those that allow manipulation, experimentation, and variation.[11] Laetsch, in attempting to determine the essential properties for an instructionally efficent and effective exhibit, concluded "some feedback loop between the person and object appears to be necessary".[17]

Currently, push-button exhibits are considered first-generation participatory exhibits. In this context, an attempt to improve upon the push-button exhibit and correct its deficiencies has resulted in the development of exhibits that provide for viewer dependent variation. Many of these exhibits are in the form of self-teaching machines, which offer a number of advantages over their push-button predecessors. They are equipped with several buttons instead of one, and may offer the viewer an opportunity to select the button that he thinks is appropriate in response to a series of stimuli. Often the visitor will be asked by the exhibit to select the correct answer to a question from a multiple-choice set of responses, and usually the exhibit will give immediate feedback on whether the answer is right or wrong. This method seems to have some success in helping visitors to learn.[13]

The inclusion of feedback mechanisms into exhibits would appear to be, as Laetsch claimed, essential if the object is to maximize learning. People tend to repeat a behavior when positive reinforcement is given; Shettle has found that people tend to discontinue a behavior when no reinforcement is given as well as when negative reinforcement is given.[12]

While Shettle has demonstrated that interactive devices improve learning,[12] it must be remembered that he is referring to on-the-spot learning and to the learning of a finite amount of information contained in the instructional format of the exhibit. Others have suggested that while automated exhibits may increase the likelihood of learning some things, they actually limit the potential for learning many more things by designing all but a few possibilities out of the exhibit. Self-teaching machines allow choices, but from a preestablished set of alternatives. They do not allow an opportunity for raising questions other than those raised by the machine, or for learning information other than that transmitted by the machine.

Moreover, it has been demonstrated that mechanical devices and moving parts are not necessary to render a participatory experience. "A tree has no pushbuttons or gadgets attached to it. But one can look at it, lie under it, climb it, feel it, study the bark and cambium layer and root hairs, extract sap, learn about photosynthesis, hear the rustle of the leaves, and watch the sway of the branches," says Oppenheimer.[18]

Many science centers make use of live animals in their exhibits and educational programs. Laetsch has found that live animals have more attention-holding power than any other kind of exhibit except computers, each averaging 15 minutes. Other types of exhibits surpassed in holding power by the live animals were passive displays (30 seconds), push-button-activated devices (2.5 minutes), puzzles (5 minutes), and games (5 minutes), including noncomputer self-teaching exhibits.[8] Neither a tree nor a goat has push buttons, nor does an iguana or a rabbit have gadgets attached; yet one can feel, hold, or feed a goat or rabbit, examine its coloring, observe its behavior, and speculate upon the structure and function of its anatomy as an adaptation to its natural habitat. Thus, one is moved to ask more profoundly, "Why does an iguana have thick skin?" or "Why do a rabbit's ears differ from those of a cat?"

If participation is enhanced by maximizing accessibility to an object and its intrinsic features, can trees, animals, water, sand, and prisms be called third-generation participatory exhibits? The addition of interpretative devices to models representing these natural objects and materials may facilitate viewer learning, but it does so at the expanse of reducing the viewer's range for discovery.

The possibilities for learning through participatory exhibits seem to be endless. But the possibilities for measuring what is learned have not even begun to be realized. One can learn the color of animals or the height of trees from a book or lecture or film. But manipulating a live rabbit or tree, or operating a real computer, produces more than a knowledge of its physical properties; it produces affective responses, and it is these affective responses that so far have not been measured adequately. Goodman has noted that it is important to address the "whole person" in any education endeavor. In addition to the cognitive realm, it is crucial that we acknowledge and focus on the affective.[6]

Oppenheimer argues that the attributes of participatory exhibits, "their beauty, their multiple linkages with different themes, the inclusion of extraneous possibilities for intervention and discovery, have proved important to the overall effectiveness of the museum".[19] He sees most of the exhibit pieces at the Exploratorium (San Francisco) as links in a pedagogical chain, with many links common to several different chains. Thus, the Relative Motion Swing, which has a swinging table beneath a pendulum on the same period, can be used in many contexts. "We can use it in talking about vectors, poralized light, Lissajous figures, phase, amplitude and frequency, damping, kinetic and potential energy, frame of reference, and relative motion".[19] Chase, after conducting a museum study on the environment, states "objects that allow tangible, direct, personal and complementary experiences . . . are most meaningful when they are linked to other components of the museum learning environment".[20]

To carry these findings to a logical conclusion, if the cognitive and affective experiences gained by the museum visitor can be linked to the internal and external experiences that occur in everyday living, then the informal kind of learning that is possible in museums is invaluable. It becomes important to understand ways in which opportunities for learning in the museum can be enhanced by appropriate linkages to other learning environments, as well as ways in which learning in other environments might be enhanced through appropriate linkages to museums.

CONCLUSION

Little data have been collected to prove that the experiences that people have in science centers are educational. Two factors suggest that the potential for learning in science centers is great. (i) The dramatic rise in attendance during the past decade and the enthusiasm of repeat visitors reflect a strong public demand for science centers to provide exhibits designed to help the visitor develop a better understanding of the contemporary scientific issues of society. (ii) Objects housed in the museum form the basis of alternative, participatory educational programs. Museums are the only institutions that can provide the general public with these kinds of participatory experiences, together with an accurate scientific interpretation of the materials that are involved. The interaction of these two factors—the predisposition on the part of the visitors to be receptive to the museum's message, and the capability of the museum to transmit the message in a multisensory and yet authentic manner—indicates the presence of conditions favorable to learning.

Although no conclusive data exist, it can be deduced from available research that exhibits can be considered an educational medium, but that new evaluation models must be developed. The present educational and anthropological evaluation models that have been imposed on the science and technology center environment are inadequate. To ascertain the full potential for learning in science centers, systematic data must be gathered about the characteristics and effectiveness of the informal learning environment offered by science centers. Methods for collecting evidence that are not dependent on the exogenous variables that each visitor brings to the science center environment must be devised.

HOSPITAL COST CONTAINMENT

HON. JAMES C. CORMAN

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Monday, March 20, 1978

● Mr. CORMAN. Mr. Speaker, Mal Schechter has been one of Washington's

most perceptive health reporters for 20 years. As correspondent of Hospital Practice magazine and more recently as publisher of several newsletters covering the health field, he has shown a rare ability for cutting through the cliches and getting to the heart of a matter. Mr. Schechter's editorial in the February 24 issue of the newsletter, Health Cost Containment, deals with the problem of hospital cost controls. But his is not the standard fare. He feels that, as closer public scrutiny of hospital budgets develops, major attention should be given to getting the hospitals to do the things that should be done—such as the provision of home care to the chronically ill and elderly—and not just to those things that the hospitals are already doing or that they want to do.

Mr. Speaker, I respectfully request that Mal Schechter's editorial from the February 24 issue of Health Cost Containment be inserted in the RECORD at this point:

GETTING DOWN TO BRASS TACKS WHEN YOU REALLY NEED A BLUEPRINT: A DEBATE OVER CONTAINING COSTS IGNORES REVIEW OF HOSPITAL PURPOSES

There is something out of joint about the current debate on hospital cost containment, the Administration's legislation, the voluntary alternative, and the Rostenkowski riposte. All of this may be step 3 or 4 of a debate in which step 1 or 2 is: To what extent is what hospitals and doctors do really a high priority vis-a-vis community needs and resources? (I.E., should they fund CAT scanners or home-health services?)

Business ought to ask—and keep asking—this question. There is always danger that institutions lose touch with the reality of human need and resources and being to serve themselves. There is a growing literature from economists and others about how hospitals serve themselves and drain resources that might better go into other activities.

We are prompted to these remarks after a day spent in Room 2255 of the Rayburn Office Building for a hearing on home care by the House Aging Committee. If you don't see at once why such a hearing might be important to business, we will just mention that at least half the health spending in this country is for *chronic* illness and that the 65-plus population, the beneficiaries of Social Security cash and health benefits, is 22 million and growing, with the frailest segment (over age 75) growing at a faster pace than the general elderly population.

Many in the packed room were moved by the stories of persevering middle-aged, middle-class sons and daughters who were having great difficulty in helping disabled parents stay out of institutions. The point was made time after time that absence of a $3 or $4-an-hour home-health aide, or of a visiting nurse, or of a housecall physician was stressing these families to the economic and emotional breaking point—and channeling their parents into those high-cost hospitals and nursing homes.

General Accounting Office witnesses reported results of a study that showed that many families invested more in the maintenance of disabled elderly persons at home than did public agencies. These investments don't show up in the $180-billion-a-year pace of national spending for health care.

We were waiting for someone to ask why hospitals and other elements of the medical/hospital complex weren't moving quickly to meet the great need for home care. We didn't hear the question raised. The fact is that nationally hospitals have done a dismal job in home care; they can plead, justifiably, we think, that reimbursement mechanisms focused on acute care are partly the reason. But it also is true that nobody has held the industry's feet to the fire. We wind up, then, with excess hospital capacity in many areas—and no home care. Anybody who wants to see imaginative hospital planning for geriatric needs, including home care, should talk to Greater Southeast Community Hospital in Washington, a town with 2,000 excess hospital beds right under Congress' nose.

How do we make hospitals more efficient at doing the things that ought to be done? The answer lies in an open process of planning and budgeting, that is, through health planning agencies. We think it is inevitable that reimbursement controls and planning will fuse, making local planning agencies a crucial pressure point. Hospitals will submit budgets for review, and, once approved in an open, lay-dominated forum, they will be funded. A missing ingredient: how to get care givers to compete for a limited number of bucks. Some method of setting national, regional and local spending limits clearly is needed. One byproduct would be to give business some certainty for budgeting its own contribution to health benefits at a reasonable rate of controlled growth.

This editorial has gotten a little longer than we intended. There is plenty more one could say, but the basic point has been put. One final shot: we are convinced more and more of the absurdity of saying that the nation can't have national health insurance until health costs are brought under control. We don't think they ever will be brought under control without national health insurance; it's the proverbial cart before the horse. We think business is being led astray by arguments pitched to its often-justified skepticism, if not fear, of bigger government. There happen to be purposes that are best served through governmental mechanisms, qualified by intelligent public participation and oversight. We think cost containment is wrongly approached as an efficiency proposition; the right context is a public planning, budgeting, funding process with plenty of grassroots say by business and other interests.●

THE FUTURE OF THE NUCLEAR FUEL REPROCESSING CENTER AT WEST VALLEY, N.Y., AND THE FEDERAL GOVERNMENT'S ROLE AND RESPONSIBILITY IN THAT FUTURE

HON. JACK F. KEMP

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Monday, March 20, 1978

● Mr. KEMP. Mr. Speaker, the issue of nuclear waste disposal is an important one. Last year Congress addressed itself to it by requiring the Department of Energy to formulate a comprehensive national policy with respect to the disposal of existing and future nuclear waste.

This issue is of particular importance to the people of western New York because one of the major nuclear fuel reprocessing centers, one which operated between 1966 and 1972, is located at West Valley, about an hour's drive south of Buffalo.

This past weekend our colleague STAN LUNDINE and the Department of Energy held a public meeting at West Valley, a meeting on the future of that reprocessing center. That meeting came only 2 days after the Department released its draft report on nuclear waste management, a report which called for total Federal assumption of responsibility for management of nuclear waste but only a partial assumption of the costs. That is eating your cake and having it too, wanting to go to lunch but have the other guy pay for it, or whatever other analogy one would want to use. It is simply unrealistic. If the Federal Government is to assume total responsibility, it must also assume the total costs which go along with that responsibility, at least insofar as other levels of government are concerned.

While I was unable to be at that meeting in person, because I was attending to other duties in Buffalo, I was able to prepare and have offered a statement for the RECORD, one detailing my position on this important question.

Because the issue is of continuing importance to Congress and special importance to the people of western New York, I wish to make that statement a part of our RECORD here today. It follows:

STATEMENT OF REPRESENTATIVE JACK KEMP AT THE DEPARTMENT OF ENERGY PUBLIC MEETING ON OPTIONS FOR THE WESTERN NEW YORK NUCLEAR FUEL SERVICE CENTER

The country is watching West Valley today. It is watching not only what is done but also how it is done. The formulation of a critically important public policy, one which may impact substantially upon the types of energy fuels we, our children and their children will use in the future, must be based on reality. Neither unfounded hysteria nor saying we have nothing to worry about will help us, in the end, resolve this matter.

But everyone concerned with the problem must understand it is not worth endangering the health or life of a single human being because of a postponement of addressing ourselves to the problem and the expeditious effecting of a solution.

There are three questions with which the Department of Energy study of the options available as to the Nuclear Fuel Services Center must answer:

How we got to today;

What is to be done with respect to the wastes, the facility and the site; and

Who is to pay and why?

HOW WE GOT TO TODAY

In 1957 the Federal Government sought industrial and State participation in reprocessing radioactive waste and in their storage. It is important to keep in mind as we go through this inquiry that the impetus which led eventually to today came from the Federal Government.

In 1961 New York State acquired the present site, and in the following year Nuclear Fuel Services, Inc., was formed By W. R. Grace Company and AMF. Between 1962 and 1963 a lease and waste storage agreement was negotiated between Nuclear Fuel Services and the New York State Energy Research & Development Authority. A base load agreement was reached with the Federal Government's Atomic Energy Commission to provide an initial load for the plant, a load understood to be sufficient to insure the success of Nuclear Fuel Services as a commercial venture. The Atomic Energy Commission insisted that the State of New York take responsibility for the long term care and custody of the radioactive wastes. After those assurances were given by the State, utility contracts were negotiated, providing a limited initial commercial load with no responsibility for wastes.

The plant was constructed between 1963 and 1965, and between 1966 and 1972 that plant processed 600 tons of fuel, 75-percent of which was Federal Government source,

three out of each four tons processed. In 1970 the Atomic Commission, an instrument of the Federal Government, changed its policy with respect to long-term storage of radioactive wastes, in essence insisting upon the Federal care and custody of such wastes. The Nuclear Regulatory Commission, a Federal agency and successor to an element previously within the Atomic Energy Commission, sustained that new policy. In short, the new rules required wastes to be solidified and shipped to a Federal waste disposal area, rather than retaining the wastes in a liquid form, as had been contemplated in the construction of the NFS Center. That change in policy made further commercial reprocessing uneconomical.

Based on the change in policy and on the fact that such a change made further commercial operation of the Center's facilities impractical, NFS notified the public, Federal agencies, and the State of such a decision. It also notified the State of its intention not to renew the existing lease beyond 1980, a lease the terms of which not only provided for that contingency but also for the State to take over the entire site and facilities, including the wastes, upon the expiration of the lease.

Last year the State of New York, based upon the preponderant role of the Federal Government in the operation of the facilities, including supplying 75-percent of the spent fuel and governing the facilities' operations through its policies, sought a Federal takeover of the site. Faced with the policy question of what ought to be done, Congress authorized the study by the Department of Energy which brings us to these and other meetings.

What is to be done with respect to the wastes, the facilities and the site?

My staff was informed this week by an engineer with the Department of Energy that the 600.000 gallons of liquid wastes now at the West Valley site would reduce to approximately 85 cubic feet in a solid waste form. That is a block of only four feet by four feet, some 5 feet 4 inches high. I believe those wastes should be moved to a Federal storage area far removed from any population center, presumably on Federal lands in the West. The Department of Energy's draft Report of Task Force for Review of Nuclear Waste Management, released only two days ago, has recommended, "A majority of independent technical experts has concluded that high-level waste can be safely disposed in geologic formation, such as salt or granite." I see no reason why this cannot be done and done far from any population centers.

This report deserves substantial attention today, because as the Federal Government's outline of where it intends to go with respect to nuclear waste management, the decision with respect to West Valley will be made within its framework.

Let me quote from the relevant sections of the Report:

A majority of independent technical experts have concluded that high-level waste . . . can be safely disposed in geological media. . . .

The responsibility for the ultimate disposal for all forms of nuclear waste should be with the Federal Government. . . .

The Task Force recommends that DOE assume responsibility for the ownership and management of the six present commercial low-level waste burial grounds. These are located at . . . West Valley, New York. . . .

Federal management of nuclear waste for ultimate disposal cannot take place independently of local concerns. State and local governments have an important role to play in the process. Their viewpoints, and local expertise, must be more effectively integrated into national planning.

DOE should accept responsibility for the high level waste at West Valley. . . . Planning for the disposition of this material should then be integrated into total DOE planning for high level wastes at all sites. . . . Similarly, other possible applications of the West Valley site to meet future national and state needs should be considered.

Costs associated with assumption of Federal responsibilities should be shared by the participants so that all parties have a financial stake in the decisions taken to restore the site to productive use, if this is desired, and in removal of undesired waste materials.

Now, what does all of this mean.

First, that the Federal Government is willing to accept responsibility for the low-level waste burial ground and the high level waste at West Valley. This is presumably in recognition of their 75-percent role in providing those wastes.

Second, the Federal Government desires the viewpoints and the expertise of State and local governments, viewpoints which can be expressed openly here today.

Third, we do not know what the Federal Government intends to do with the West Valley facilities after assuming their responsibility. The inference is made in the Report that operations at the facility could be resumed.

Fourth, even though the Federal Government wishes to assume responsibility for the wastes and the management of nuclear waste in the future, it feels those costs should be shared by the participants, without clearly defining the participants. Does that mean the State of New York and its State Energy Research and Development Authority? Commercial ventures which supplied 25-percent of the spent fuel? It then wants unrecovered DOE costs for low level burial grounds to be recovered in charges for future low level services to all customers, a strong hint of future activity.

Let me comment on those points.

First, the Federal Government should assume responsibility for the low-level waste burial ground and the high level waste.

Second, State and local government, as well as community interests, public and private, should be heard, and all of this should be on the public record. I will return to this point in a moment.

Third, I believe the site must be decommissioned as a nuclear fuel reprocessing center in the sense it was operated from 1966 to 1972. I am unalterably opposed to its use as a major reprocessing center, bringing wastes in from through the country or the region, reprocessing them and disposing of them at this site. The availability of the site for limited research and development in this field remains to be seen.

I want to make it clear that I am unalterably opposed to using West Valley as a dumping ground for additional nuclear waste in the future.

Fourth, I believe the Federal Government ought to bear the total costs for this matter. To recommend that it assume the responsibility but only a share of the cost is to insult our intelligence; it's analogous to having its cake and eaating it too. It also ignores the role of the Federal Government in having brought the facility into existence, providing it with 75-percent of its work, and then changing the rules and regulations to such a degree that it put the commercial venture out of business.

This brings us to our last principal point. Who is to pay and why?

The most pressing problem for the people of New York is the issue of potential liability for the costs of decommissioning. Depending upon the disposal technique selected, the cost of decommissioning the plant ranges from $20 million to $600 million. It is important to remember, as these figures are analyzed, that there really is no upper limit on expenditure for absolute safety in anything, whether it is an automobile, an aircraft or an electric generating plant.

I am firmly persuaded, however, that liability for any such costs rests entirely with the Federal Government, as I have indicated.

No private organization should be protected from poor business judgment, one which results in commercial failure. But, when the Federal Government assumes responsibility for the complete regulation of an industry, as it did here, it must also assume the responsibility for the economic consequences of such substantial changes in regulations that the viability of the industry is undermined.

In light of this point and the realities on which it is based, there is no reason for the State of New York and thereby its taxpayers to assume these costs. Yet I have heard disturbing rumors in recent weeks that the present New York State Government may be in the process of agreeing to pay as much as 50-percent of the yet-to-be-determined costs. This could add a tax burden of as much as $300 million—nearly half of the proposed tax cut which New Yorkers are supposed to receive under the terms of the new State budget.

This State's leadership has a regrettable history of selecting the highest cost alternatives for its operations. I see no reason to continue that history. If the Governor wishes to make the point to the people that the costs are a result of an agreement arrived at by a prior Governor, he ought simply to say it, make the point, and get on with placing the present responsibility where it really lies, with the Federal Government. It is not too late for the State to reverse its historical pattern and insist upon full Federal liability for costs associated with the NFS decommissioning.

In summation, I think the Buffalo Courier-Express hit the nail on the head when it editorialized about this matter last year, commenting:

". . . the prime responsibility lies with the federal government, which licensed the operation, provided much of the spent fuel and generally encouraged the undertaking (through the then-Atomic Energy Commission). So we hope the Subcommittee (on Environment, Energy and Natural Resources of the House of Representatives) will push this position and insist that it be accepted as government policy." ●

LEGISLATION NEEDED TO SERVE NEEDS OF LIVESTOCK SELLERS AND STOCKYARD OPERATORS

HON. JIM GUY TUCKER

OF ARKANSAS

IN THE HOUSE OF REPRESENTATIVES

Monday, March 20, 1978

● Mr. TUCKER. Mr. Speaker, I am a cosponsor of H.R. 9482, to amend the Packers and Stockyard Act of 1921 to better serve the needs of livestock sellers and stockyard operators in rural areas.

This legislation is necessary to relieve small competitive auction barns in my State of Arkansas from the burden of excessive Federal regulation. Under current law, rural auction barns are treated like public utilities with regulated charges. The bill we are recommending will establish an animal unit as one head of cattle, one calf, one horse, three hogs, and four sheep. Weekly auction barns; that is, any barn that sells less than 100,000 animal units annually, would be exempt from Federal regulation. If such

a barn is more than 75 miles from a competing barn, the maximum number of head that could be sold free of Federal intervention would be 20,000.

Let me briefly trace the situation that has necessitated this legislation action to secure a fair return on livestock sales by small rural auction barns. In 1976, auction barn managers in Arkansas were getting a 3-percent commission on gross sales up to $2,000 and 2 percent on anything over that. When labor costs increased from $2.30 to $2.65, the managers asked for a reasonable 1-percent increase in commission to cover their costs. Their request was turned down by the Packers and Stockyard Administration which in turn proposed a national commission lower than the 3-percent and 2-percent combined rates. The USDA stated as part of the rationale for the low rate proposal the need to weed out livestock operators from what they described as an unfeasible market. An administrative law proceeding subsequently set a rate per head which is inadequate for meeting the actual operating expenses of weekly auction barns in Arkansas.

These auction barns in Arkansas have continued to operate on a percentage rate, but have been ordered by the U.S. court of appeals to hold in escrow the difference between the low rate per head set by the court and the percentage rate. This is an unsatisfactory approach which requires one particular operator in Arkansas to hold more than 51 percent of his commission in escrow, leaving him with no return on his investment.

This law was written in response to the stockyard situation in 1921 when there were 71 terminal markets in the United States. Today, with over 2.000 terminal stockyards nationwide, the days of a natural monopoly for rural stockyards are over. The regulatory standards applied to public utilities are ill-suited to modern stockyards. The law must be updated to reflect current conditions.

We are not recommending changing the rules for large stockyards in major cities or in isolated areas which do, in many cases, operate without effective competition. But in rural areas with a number of auction barns in close proximity, rates that are fair to both the livestock producer and weekly auction barn operators would be best determined by the competitive forces of a free market system.●

REAUTHORIZATION OF THE OLDER AMERICANS ACT

HON. STEPHEN J. SOLARZ

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Monday, March 20, 1978

● Mr. SOLARZ. Mr. Speaker, today the Subcommittee on Select Education of the House Committee on Education and Labor held hearings on the reauthorization of the Older Americans Act, a comprehensive program which provides for planning, research, training, nutrition, home health care, transportation, senior centers, legal services, and employment programs for our older citizens.

In testimony prepared for the hearing, I expressed the views of many of my constituents in calling for an increase in funding for these programs, particularly for the nutrition programs which provide meals at reduced costs for the elderly, and for an extension of home health care services to more of our chronically ill senior citizens.

The testimony follows:

As the Representative of the 13th Congressional District of New York, I am privileged to represent the district with more senior citizens than any other district outside of the state of Florida. They are an active constituency who keep me informed on the impact of federal programs on their lives and well being, and it is because of their need for services that I appear before you today.

Today older Americans are no longer content with being "forgotten Americans", they are working actively to improve their position in our economic and social order. As a co-sponsor of the legislation to extend the protection against job discrimination to persons over 65, and to end mandatory retirement at 65, I was concerned, as are the members of this committee, to give our older workers the protection they need to stay active in the job market for as long as they are able. I have also introduced legislation in the Congress to allow older Americans and handicapped persons to travel twenty-four hours a day at half-fare on our Nation's mass transit systems. Another measure I have introduced would allow seniors to enroll in our Nation's colleges, on a space available basis, without paying tuition so that they might enjoy the riches of knowledge and so that our campuses might profit from the mixing of old and young students together with their various perspectives on life.

But the measure under consideration today represents the most comprehensive approach which we in the Congress have yet devised to deal with the special needs and talents of our older citizens. The Older Americans Act provides for planning, research, training, nutrition programs, home health care, transportation, senior centers, legal services and employment programs.

I would urge the committee that we continue all of these programs and increase the funding so that more of our older citizens may participate, so that the level of services provided may be improved, and so that a greater degree of integrated planning and service coordination can be possible.

Thus, I favor the proposals to consolidate the administration of Titles III, V, and VII and to provide additional funds for planning, but only if this consolidation will not reduce the total amount of services being delivered. At the current time, my district office in Brookyln averages about three requests a month for new senior citizen centers alone—reflecting the real need of my constituents, many of whom are poor or living on greatly reduced incomes, for programs to meet their social and physical needs.

The recent severe snow storms in New York heightened my conviction that more nutrition programs must be established and funded by this Congress. In Brooklyn, we convinced the National Guard that our senior citizens, particularly in the shorefront areas, desperately needed food supplies—and thus the local Jewish Association for Services to the Aged was able to commandeer a National Guard vehicle and driver and with other volunteers delivered the regular "meals on wheels" program. In addition, they took supplies to home-bound individuals in Brighton Beach, which is not now served by any delivered meal program. Brighton Beach has a large population of elderly citizens, many of whom are desperately in need of a "meals on wheels" program. Unfortunately, current funding levels on Federal nutrition programs prohibit Brighton Beach from having a "meals on wheels" program of its own, due to the ceiling on funds under Title XX of the Social Security Act and the fact that only 20 percent of the funds available under Title VII of the Older Americans Act can be used for a delivered meals program.

The storm displayed in a very vivid manner to me just how important such nutrition programs are for our home-bound senior citizens. I urge the Congress and the Administration to break the deadlock on expansion of delivered meal programs and to change the various regulations under Title VII so that more of the senior citizens who need home-delivered meals can receive them. Also, the regulations requiring hot meals delivery might be changed to allow some experiments with frozen foods and the delivery of several meals at one time.

An even more serious problem facing our senior citizens is health care. One of the most frustrating experiences in dealing with constituents who need home health care and social services is the large number of programs that provide these services, with their different regulations, requirements, and types of services. To assist our elderly and help alleviate this problem, I have co-sponsored H.R. 10995, introduced by Mr. Pepper and Mr. Cohen, that would establish "single entry point" programs within communities for the entire range of medical and social services needed by the chronically ill and disabled elderly. One of the chief effects of this bill would be to negotiate the maze of regulations, eligibility requirements, and income limits that confuse and frustrate the elderly in need of health care services. This bill is a first, rational step towards what I feel is the real need of our older citizens—a comprehensive health program that will match senior citizens with the kind and amount of services they actually need at a given time. Thus, institutionalization would become a last resort treatment, only necessary for those severely impaired people who are unable to function in the community, even with the support of home health care services.

I would like to add my voice to that of Congressman Pepper and the Select Committee on Aging in urging a greater provision of home health care services, particularly for senior citizens just above Medicaid eligibility limits who cannot afford the full cost of these services. In addition, I would like to urge the Committee to look into the possibility of adding a new emergency home health care provision to the Older Americans Act that would allow agencies to provide immediate home health services to individuals who can be presumed to be eligible for services funded under Medicare or Medicaid until the various intake procedures, home visits, and screenings can take place. My district staff have told me of cases where an elderly person is released from a hospital only to wait weeks and weeks for the needed home health and personal care services to begin. This delay is caused by the lengthy case eligibility procedures mandated by these programs. In several cases, elderly people have had to be readmitted to hospitals, or even institutionalized, because home health care services did not come quickly enough. The inability to provide immediate home health care services also means that the community must incur the greater costs of hospitalization or institutionalization. A recent G.A.O. report found that home health care was the most cost-efficient method of care for 83% of our nation's elderly in need of health services. The timely delivery of health care services could actually reduce national health costs and prolong the productive lives of our citizens.

Employment programs, provided under Title IX of this act, have allowed many of our senior citizens to earn needed income,

and just as importantly, have given them the opportunity to continue making important contributions to the community through the utilization of their particular talents and abilities. Since individuals can be employed under this Act at age 55, the Act should also allow for some full-time positions. Many individuals 55 and older are not only able and willing to undertake the responsibilities of a full-time job, but because of continuing family responsibilities greatly need the additional income of a full-time position.

In conjunction with paid employment programs, I am also concerned with the fate of the retired senior volunteer program (RSVP). This program was formerly administered by the Administration of the Aging under the Older Americans Act, but was transferred in 1973 to ACTION, which now administers it. RSVP has provided millions of hours of service to our communities from our older citizens, and allowed them a chance for stimulation and activity that utilizes their skills, talents, and experiences in socially useful ways. RSVP currently "employs" over 220,000 elderly volunteers. Recently, however, ACTION proposed cutbacks in this most useful program despite the fact that there has been no formal evaluation of the program that suggests the need for such a cutback. Perhaps this program should be returned to the Administration of the Aging, where it might find a more supportive climate.

Transportation is another need of our senior citizens. The need for improved access to existing mass transit is particularly great. In my district, I have worked for the construction of escalators to our elevated subway lines, for the introduction of barrier-free buses that the elderly and handicapped can use with more ease, and for twenty-four hour half-fares for the handicapped and elderly. Under the terms of the Older Americans Act, some transportation programs designed to meet the special needs of the elderly have been started. I urge their continuation and expansion. Even in a community such as mine, in which good public transportation is available, senior citizens still have special needs that programs such as this can meet—such as transportation to and from centers and clinics, transportation that allows the physically limited to go out to shop, or transportation that can bring senior citizens home from the hospital.

A final proposal that I would like to make to the Committee is to urge a change in the funding formula in Titles III and VII of this Act, to reduce the burden that areas such as New York State face in serving a large number of elderly who are poor and thus more dependent on public services. The current formula takes into account only the total number of elderly in allocating funds, not the percentage of elderly citizens who are poor. Yet the Act itself mandates priority services for elderly citizens who are poor, or who are members of a minority group. Some recognition of these factors should occur in the funding formula to assist states like New York whose total elderly population is declining, but whose remaining senior citizens are disproportionately poor and members of minorities.

In my frequent contacts with my older constituents, I have been inspired by their interest and concern with the many problems that face our country, their knowledge of the issues, and their strong belief in our government's commitment to providing opportunities for a decent life for all our citizens. But in these days of restricted government spending and cutbacks in services, many senior citizens have become concerned for their future. They must now live on fixed reduced incomes and find themselves for the first time dependent on government to meet their needs for services—services that they previously were able to provide for themselves and helped provide for others through their taxes.

As their representative, I am anxious that programs funded under the Older Americans Act be continued and that additional funding be provided so that more of our senior citizens will be able to enjoy that full quality of life that we would wish for ourselves.●

LABOR LAW "REFORM"—A SMALL BUSINESS NIGHTMARE

HON. ELDON RUDD

OF ARIZONA

IN THE HOUSE OF REPRESENTATIVES

Monday, March 20, 1978

● Mr. RUDD. Mr. Speaker, several times a year, the National Federation of Independent Business sends out its Mandate newsletter/questionnaire to almost 500,000 member small businesses throughout the country. Each questionnaire usually covers five issues of concern to consumers, our economy, and to business, and the results are tabulated and sent to every Member of Congress.

I find these survey results to be of enormous benefit as I serve Arizona's Fourth Congressional District and our Nation. I believe that NFIB does us an invaluable service, and I am most grateful to the many small businessmen and women who take the time to participate in this effort.

In the current NFIB Mandate, there is a reprint of an excellent article about the so-called Labor Law Reform Bill (S. 1883) by NFIB President Wilson Johnson. Mr. Johnson demonstrates how this bill will give big labor bosses an unfair advantage against workers and small business owners in their effort to unionize all workers. This would certainly not be in the interests of the general public.

I would like to include the NFIB article at this point in the RECORD:

LABOR LAW "REFORM": A SMALL BUSINESS NIGHTMARE

(Editor's note: The following article by NFIB president Wilson S. Johnson appeared in the January 28th issue of National Journal, a highly regarded weekly news magazine which circulates extensively among the legislative and executive branches of government and business organizations. The Washington NFIB legislative team, headed by James D. "Mike" McKevitt, is working at the behest of the membership to defeat the "labor reform" legislation described below.)

Early in 1978, the Senate will tackle the so-called "Labor Law Reform" bill, S. 1883, a complicated bill that could introduce disastrous powers and penalties into the field of labor-management relations. As so often has been the case, the proposed changes in federal labor laws would greatly increase the pressures and penalties facing small businesses least able to cope with them.

Unlike many recent "reform" bills, this labor law reform has not been initiated by good government groups or reform organizations but by the bureaucrats and power brokers of organized labor. This is not surprising. It seems that the union leaders have noticed a phenomenon very disturbing to them: more workers want less union involvement than ever before. Today only one out of five workers belong to unions, compared to more than one out of four 20 years ago. Unions likewise recite in dolorous tones their pathetic record in organization elections. NLRB fiscal year 1976 figures show that unions won fewer than half of the certification contests conducted by the NLRB.

The union logic is audacious: unions argue that they are not very successful under our present system of labor law, so the rules must be changed to improve their organizational record. This logic completely overlooks the obvious question. If unions are so good for their members, then why don't more workers join unions?

Wherever the fault lies, it is not with the federal labor law. The tumultuous labor environment of the thirties provoked Congress into enacting a system to bring peace and evenhandedness to relations among management, workers and unions. In the 40 years since passage of the original National Labor Relations Act, workers in this nation have enjoyed tremendous gains in wages, fringe benefits and job security. The economic and political impact of unions is awesome and obvious. The present federal labor law has generally worked as it was intended and is not in need of wholesale reform.

But the bill's proponents disagree and claim several current examples of organizing efforts frustrated because the federal law is not strong enough or tough enough. Whatever the facts may be in those cases, it is certain that large national companies will continue to have legions of lawyers and labor consultants available to advise them on how to stay in the bounds of the law and still give the unions a good fight. Small businesses, however, will be severely affected by this bill.

Big labor may well complain that it cannot win against big business. The latest NLRB annual report lists labor as winning only 17 percent of the 119 organizing elections of units with 500 or more workers. But big labor has been going after small business with a vengeance and has been very successful at it. For the same period the NLRB supervised 3,855 elections in units with fewer than 20 employees and unions won 57 percent, nearly three out of every five organizing drives for small units. Small businesses with small groups of employees are clearly easy targets for the big labor leaders.

These statistics document a situation distressing but familiar to many small businesses. Not only do they usually lack regular counsel on labor affairs and laws, but they often lack the time and resources to effectively fight any organizing drive. The small business owner does not sit in a board room giving orders. He or she is often the foreman, inspector, accountant and substitute for any employee off work. He cannot take the time to print placards or organize employee rallies to discuss his views on unions. He is sharply restricted by law and NLRB decisions as to the type and content of contacts with his employees on the union issue. And he is often unaware of any movement toward unionization of his firm until he is presented with the certification petition by the NLRB. By then the union has done all its advance work and the owner faces a fait accompli.

The "reform" bill proposes an accelerated timetable for certification elections, exactly what is least likely to improve labor-management relations. An organizational drive is not unlike a domestic dispute; workers and employers who may have known each other for some time are surprised and often angered at the other's position. It would be much more sensible to impose a mandatory cooling off period of 75 to 90 days after presentation of certification petitions, than the quick interim called for by the Senate bill. Tempers could cool on both sides. Workers would be in a better position to decide whether the union was best for them. Employers would not feel as pressured and would be less likely to react precipitously. Inflammatory language and tactics would likely decline and all sides would approach a very important issue with cool heads.

Proposed changes in the federal labor laws would surely deal organized labor a much stronger hand, vastly increasing the amount of pressure it can bring to bear against workers and businesses. More importantly they will add several new stumbling blocks for small businesses to get over in today's tough business environment.

Congress is responsible for legislating in the public interest. Trade unions are now large, powerful bureaucracies. What is good for unions is not necessarily good for the nation. Federal labor laws must strike a balance among workers, unions, and business, large and small. Each has different needs and problems. The Senate should realize that S. 1883 will badly tip that balance against small business.●

SMALL BUSINESS DEVELOPMENT CENTER BILL

HON. ALVIN BALDUS

OF WISCONSIN

IN THE HOUSE OF REPRESENTATIVES

Monday, March 20, 1978

● Mr. BALDUS. Mr. Speaker, today I reintroduced the small business development center bill (H.R. 5754) with additional cosponsors. Because of the widespread interest in this bill, and the increased likelihood that a request for floor action on the bill will be made this year, I believed it would be helpful to summarize the history of the bill, and to list the cosponsors (over 80) this piece of legislation has attracted to date.

In April of 1977, I first introduced the small business development center bill in the House. Simultaneously, the measure was under consideration in the Senate, and S. 972 finally passed in the Senate on August 5, 1977.

Both the House and Senate measures would authorize the Small Business Administration to provide small business management assistance through cooperating universities around the country.

The House bill was under consideration by the SBA and SBIC Authority and General Small Business Problems Subcommittee for about a year. Earlier this month the subcommittee reported out a small business development center measure, as title III of an Omnibus bill. The bill, including title III, will be marked up in the full Small Business Committee meeting scheduled for tomorrow, Tuesday, March 21, at 10 a.m.

With favorable committee action, it is likely that floor action on the bill will be forthcoming in the near future. I would therefore, like to include at this point the names of the cosponsors of H.R. 5754, as an indication of House support for the small business development center concept:

COSPONSORS OF THE SMALL BUSINESS DEVELOPMENT CENTER ACT, AS OF MARCH 17, 1978

1. Hon. Addabbo, Joseph P. (D–NY).
2. Hon. Akaka, Daniel K. (D-Hawaii).
3. Hon. Aspin, Les (D–Wis).
4. Hon. Badillo, Herman (D–NY).
5. Hon. Barnard, Doug (D–Ga).
6. Hon. Baucus, Max (D–Mont).
7. Hon. Bedell, Berkley (D–Iowa).
8. Hon. Blouin, Michael (D–Iowa).
9. Hon. Bowen, David (D–Miss).
10. Hon. Breckinridge, John (D–Ky).
11. Hon. Brodhead, William M. (D–Mich).
12. Hon. Burton, John (D–Calif).
13. Hon. Carney, Charles J. (D–Ohio).
14. Hon. Cleveland, James C. (R–NH).
15. Hon. Cohen, William S. (R-Maine).
16. Hon. Cornell, Robert J. (D–Wis).
17. Hon. Dingell, John (D–Mich).
18. Hon. Downey, Thomas J. (D-NY).
19. Hon. Drinan, Robert F. (D–Mass).
20. Hon. Edgar, Robert W. (D–Pa).
21. Hon. Edwards, Don (D–Calif).
22. Hon. Eilberg, Joshua (D-Pa).
23. Hon. Ertel, Allen E. (D-Pa).
24. Hon. Evans, Billy Lee (D-Ga).
25. Hon. Fowler, Wyche, Jr. (D–Ga).
26. Hon. Gephardt, Richard A. (D-Mo).
27. Hon. Gilman, Benjamin A. (R–NY).
28. Hon. Ginn, Bo (D–Ga).
29. Hon. Gore, Albert, Jr., (D-Tenn).
30. Hon. Huckaby, Jerry (D–LA).
31. Hon. Ireland, Andy (D–Fla).
32. Hon. Jenkins, Ed (D–Ga).
33. Hon. Jenrette, John W., Jr., (D-SC).
34. Hon. Johnson, Harold T. (D–Calif).
35. Hon. Kastenmeier, Robert W. (D–Wis).
36. Hon. Kasten, Robert W., Jr. (R-Wis).
37. Hon. Keys, Martha (D-Kans).
38. Hon. Kildee, Dale (D–Mich).
39. Hon. Kostmayer, Peter H. (D–Pa).
40. Hon. Lederer, Raymond F. (D–Pa).
41. Hon. Le Fante, Joseph (D–NJ).
42. Hon. Lehman, William (D–Fla).
43. Hon. Levitas, Elliott H. (D–Ga).
44. Hon. Lloyd, Jim (D-Calif).
45. Hon. Lloyd, Marilyn (D–Tenn).
46. Hon. McHugh, Matthew (D–NY).
47. Hon. Mathis, Dawson (D–Ga).
48. Hon. Mineta, Norman Y. (D–Calif).
49. Hon. Moakley, John Joseph (D–Mass).
50. Hon. Moss, John E. (D–Calif).
51. Hon. Murphy, Austin (D-Pa).
52. Hon. Murphy, John (D-NY).
53. Hon. Neal, Stephen L. (D-NC).
54. Hon. Nolan, Richard (D-Minn).
55. Hon. Oberstar, James L. (D-Minn).
56. Hon. Obey, David R. (D-Wis).
57. Hon. Ottinger, Richard L. (D-NY).
58. Hon. Panetta, Leon E. (D-Calif).
59. Hon. Pattison, Edward W. (D-NY).
60. Hon. Pressler, Larry (R- S. Dak).
61. Hon. Rahall, Nick Joe (D-W. Va).
62. Hon. Rangel, Charles B. (D-NY).
63. Hon. Reuss, Henry S. (D-Wis).
64. Hon. Richmond, Frederick W. (D-NY).
65. Hon. Roe, Robert A. (D-NJ).
66. Hon. Ruppe, Philip (R-Mich).
67. Hon. Sarasin, Ronald A. (R-Conn).
68. Hon. Sikes, Robert L. F. (D-Fla).
69. Hon. Spellman, Gladys Noon (D-Md).
70. Hon. Steiger, William (R-Wis).
71. Hon. Stockman, Dave (R-Mich).
72. Hon. Vento, Bruce F. (D-Minn).
73. Hon. Weaver, James (D-Ore).
74. Hon. Whitten, Jamie L. (D-Miss).
75. Hon. Whalen, Charles W. Jr. (R-Ohio).
76. Hon. Winn, Larry Jr. (R-Kansas).
77. Hon. Wirth, Timothy E. (D-Colo).
78. Hon. Won Pat, Antonio Borja (D-Guam).
79. Hon. Yatron, Gus (D-Pa).
80. Hon. Young, Robert A. (D-Mo).
81. Hon. Zablocki, Clement J. (D-Wis).●

A GIANT STEP FORWARD FOR SMALL AND MINORITY-OWNED BUSINESSES

HON. FREDERICK W. RICHMOND

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Monday, March 20, 1978

● Mr. RICHMOND. Mr. Speaker, on March 20, 1978, the House passed by voice vote H.R. 11318, amendments to the Small Business Investment Act and the Small Business Act.

This legislation deals with matters of greatest importance to small and minority-owned businesses.

Chapter 1 of title II amends the section 8(a) procurement program by increasing the Small Business Administration's ability to develop small firms owned by the disadvantaged.

Chapter 2 improves the subcontracting program for both small and disadvantaged business concerns.

Chapter 3 makes it a condition of most forms of Federal financial assistance that the recipient of such assistance utilize small businesses and small businesses owned by the disadvantaged to the maximum extent practicable in most procurements paid for with Federal aid.

The benefits of this legislation will be available to small businesses, and especially those small businesses owned by members of disadvantaged groups—in Bedford-Stuyvesant, in Williamsburg, in Harlem and throughout the Nation. These small business owners have demonstrated their commitment to remain in the inner cities, to provide jobs, to help rebuild our neighborhoods. That is why I am so pleased to be a cosponsor of this legislation.

I am also pleased that as a result of much discussion and debate our Small Business Committee unanimously agreed upon a definition of economic and social disadvantage that provides maximum opportunities for participation by so many of our fellow citizens.

The legislation includes specific references to black Americans and Hispanic Americans who have traditionally suffered discrimination which has inhibited business growth and development.

Also, and of equal importance, the legislation recognizes that minority groups other than these may have suffered discrimination because of their cultural backgrounds or their deeply held cultural convictions and, therefore, they too may be eligible for the kinds of assistance provided in this act. The language in this legislation is close to that of Executive Order 11625, which provides a broad definition of "minority." Thus, it is of particular importance to those of my constituents who are members of disadvantaged minority groups other than those specifically referred to in the bill.

Finally, the bill recognizes that sex discrimination can and does result in business impediments and that sex discrimination may also be a cause of disadvantage.

This legislation will provide opportunities for full participation in our free enterprise system by all socially and economically disadvantaged persons.

It will insure that persons who are socially and economically disadvantaged because of their cultural background or deeply held cultural convictions may participate to the maximum extent possible in business ownership, and that the competitive viability of their businesses will be insured through the provision of a wide range of Government assistance.

The passage of this legislation is a giant step forward for our Nation, if we are to obtain social and economic equality for all of our citizens and improve the functioning of our local and national economies.●

GOVERNMENT DEADHEAD REGULATIONS

HON. JAMES M. COLLINS

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Monday, March 20, 1978

● Mr. COLLINS of Texas. Mr. Speaker, one of the most serious threats to Americans today are the Government deadhead regulations which are devouring the American economy. Overregulation is consuming both jobs and profits, and we must put an immediate halt to this monster which is eating us up.

Let's look at the growth of the bureaucracy since the time of our first President. In 1789, George Washington established two agencies—one to regulate the payment of pensions to Revolutionary War veterans and one to regulate duties collected on imported goods. The Congress expanded the number of regulatory bodies to six in 1887, an addition of only four agencies in 100 years time. We are now dealing with more than 1,250 Federal advisory boards, committees, commissions, and councils involved in the regulation of business. Think of it—1,244 bodies of Government added in the past 90 years compared to the 6 that grew out of the first 100 years of this country's existence.

Big Government has led to bureaucratic intervention in the private sector costing consumers tens of billions of dollars each year. The hidden tax of regulation is passed on through increased costs of goods to the consumer. How does the American public feel about this regulatory overkill? A January 1977 Gallup poll found that 39 percent of the American people believe that big Government is the biggest threat to the country in the future. A 1976 Harris survey found that 76 percent of the people think that the trouble with Government is that the elected officials have lost control over the bureaucrats, who really run things.

The paperwork burden imposed on business by Government is a dominant factor in the increased overhead costs of producing goods and services. According to a National Federation of Independent Business study, there are now 4,400 types of approved Federal forms inflicted on the businessman. One hundred forty-three million man-hours are spent each year just to fill them out. Dow Chemical Co. recently conducted an extensive study to find out what Government regulations had cost their company over a 2-year period. Regulatory costs for Dow increased over 27 percent in 1976 to over $186 million, with excessive and questionable regulatory costs increasing in 1 year 38 percent to more than $83 million.

The delay caused by the time-consuming, expensive paperwork can run into years while the costs pile up. A Dow project to construct a $500-million petrochemical complex in the San Francisco Bay area involved regulatory approval from 65 different Government agencies. Although the plant would have provided 1,000 construction jobs and over 1,000 permanent jobs, the company halted the project after spending 2 years going through this review process, spending $4 million and obtaining only four permits. Environmental impact statements can run up a big bill. The EIS for one off-shore oilfield in the Santa Barbara Channel required nearly 1,300 pages and took 2 years to prepare. Unnecessary Government inspection is another source of regulatory excessiveness. Although the Public Health Service recommends that milk plants be inspected twice a year, the average inspection rate is 24 times annually. And one plant reported that it was inspected 47 times in 1 month.

We are seeing fewer and fewer new products come to the market strictly because of Government redtape. New product applications under the Insecticide, Fungicide, and Rodenticide Act have declined from 5,400 in fiscal 1975 to 1,700 in 1977. New product registrations were only 1 out of 17 applied for as opposed to 1 out of 3 in 1975. With fewer new products coming to the marketplace, less jobs are created and businesses find it hard to expand. Not to mention the small businessman with a bright idea who is driven out of the competition simply because he cannot afford the time or expense of going through the bureaucracy to have his product marketed.

More detailed recordkeeping calls for more management time and outside experts which takes a toll on the time and money managers can devote to the investment end of a company's business. Managers must now spend their time filling out forms, posting notices, and answering trivial questions; and the burden is heaviest on the small businessman who does not have extra staff. In regulating the pension plans, the Government so increased the cost to the small businessman that 30 percent of the private pension plans were driven out of business in a 3-year period.

We have reached a period of regulatory dictation in this country which is totally undermining the economy and the balance of growth. Unless the tide is turned, growth will stop and more Americans will be out of work.●

REGULATIONS FOR FEDERAL NATIONAL MORTGAGE ASSOCIATION

HON. JIM GUY TUCKER

OF ARKANSAS

IN THE HOUSE OF REPRESENTATIVES

Monday, March 20, 1978

● Mr. TUCKER. Mr. Speaker, recently the Federal National Mortgage Association (FNMA) brought to my attention the fact that the Department of Housing and Urban Development proposed regulations that will have a substantial affect on FNMA operations. FNMA questions whether the Department has exceeded its authority with respect to certain sections of the proposed regulations concerning mandatory credit allocation, certain limitations on financing capacity, as well as other areas of FNMA's operations.

FNMA's biweekly free market auctions have generally been extremely successful in enabling mortgage lenders, home builders, real estate brokers, as well as home buyers and sellers, to work in predictable and relatively stable conditions in an otherwise volatile market. The FNMA commitment gives the housing industry the confidence it needs to weather difficult periods while preserving the free-enterprise character of home building. Healthy and vital home-building industry is an essential part of continued economic recovery.

I am hopeful that the final regulations adopted by HUD will reflect the importance of free enterprise in the real estate business. I am confident that the administration will consider the comments and criticisms of FNMA and other interested parties in developing useful and constructive regulations. Following are excerpts from an FNMA statement on this matter:

REGULATIONS GOVERNING OPERATION OF THE FEDERAL NATIONAL MORTGAGE ASSOCIATION

BACKGROUND

On February 24, 1978, Secretary of Housing and Urban Development Patricia Roberts Harris published proposed amendments to regulations concerning the operations of the Federal National Mortgage Association (FNMA). The proposed regulations exceed the Secretary's limited regulatory authority over FNMA and threaten to disrupt FNMA's secondary market operations to the serious detriment of homeowners to whom FNMA provides an important source of mortgage credit and the home building and housing finance industries.

FNMA is a Congressionally chartered private corporation created for the sole purpose of "providing supplementary assistance to the secondary market for home mortgages by providing a degree of liquidity for mortgage investments, thereby improving the distribution of investment capital available for home mortgage financing." FNMA accomplishes this statutory purpose by purchasing residential mortgages and financing these purchases with the sale of common stock and corporate debt to the investing public.

FNMA operates primarily through its Free Market System Actions. At these biweekly auctions, FNMA sells commitments to purchase mortgages at a future date. The purchaser of the commitment (mortgage originator) has the option of delivering the mortgage to FNMA or not doing so, if it can secure a higher price elsewhere. FNMA does not announce the amount of mortgages it will purchase or the minimum yield it will accept before the auction.

FNMA gives mortgage originators the security of knowing that they can sell their loans at a predetermined yield, regardless of interest rate fluctuations. It is the commitment from FNMA that enables mortgage lenders to enter into loan agreements; home builders to proceed with construction plans; and real estate brokers, home buyers, and home sellers, to proceed with their sales plans. These producers and consumers know that financing will be available when needed at terms fixed in advance. Particularly in periods of rising interest rates, the availability of an FNMA commitment is essential to any mortgage lender originating residential mortgages if he does not have the capital to retain such mortgages, as well as to other mortgage sellers originating higher-risk loans which they do not want to retain in their portfolios.

FNMA finances its mortgage purchases by selling various debt instruments, including short-term notes, longer-term debt, and convertible debentures. FNMA and many other corporations have found convertible deben-

tures to be among the most successful tools for raising capital. By generating its funds from non-traditional mortgage investors, FNMA has played a major role in enlarging the availaility of mortgage credit, particularly during periods of disintermediation. In so doing, FNMA has helped to dampen the upward pressure on mortgage interest rates during cyclical shortages of savings inflows.

The FNMA Charter Act provides the Secretaries of HUD and of Treasury with overlapping regulatory authority concerning FNMA's capital structure, to assure FNMA's financial solvency and to coordinate FNMA's financings with Treasury borrowings. The HUD Secretary also has authority to assure that FNMA provides a secondary market for market-rate mortgages on housing for low and moderate income families to implement her authorities by rulemaking, the Act also gives the HUD Secretary "general regulatory power." Finally, the HUD Secretary has the specific power to examine the financial transactions of FNMA and to require the corporation to report on its activities.

The mandatory credit allocation regulations are totally unworkable in the current FNMA auction system. FNMA cannot determine ahead of time the amount of urban, existing, or low and moderate income housing loans it will commit to purchase at an auction. FNMA could only do so by having a separate auction for each of these types of loans, but a separate auction would inevitably result in higher interest rates for these higher-risk loans, thereby defeating the very purpose of the proposed regulations.

Moreover, even if FNMA could ration its commitments, there is no way that it could guarantee that loans will be delivered in the same ratio as the commitments it issues unless it requires sellers to identify loans at the time of commitment and to deliver those loans. At the time they purchase forward commitments for a large block of mortgage credit, mortgage originators do not and cannot identify the individual loans which they may later deliver to FNMA. Accordingly, the proposed requirements would make FNMA's forward commitment procedure, heavily relied on by mortgage originators and builders, impossible. FNMA would no longer be capable of providing homeowners with insurance against interest rate increases.

Finally, by converting FNMA's purchase authority to a multiple of inner-city, existing or low and moderate income housing mortgages, the regulations would also cripple FNMA's ability to respond quickly and efficiently to cyclical shortages in overall mortgage credit. In sum, by destroying the single national Free Market System Auction, and FNMA's forward commitment process, the proposed changes threaten to end FNMA's essential role as the primary national secondary mortgage market lender.

There appears to be general agreement that FNMA has contributed substantially to the secondary market's capacity to improve the geographical distribution of mortgage funds and that FNMA has made a significant contribution to the overall availability of mortgage credit, by generating as much as two-thirds of its funds from nontraditional mortgage investors. FNMA has also been "particularly successful" in ameliorating cyclical shortages of mortgage credit since 1968. FNMA's continued capacity to fulfill this role depends on its ability to generate funds in the capital market at the lowest possible cost. The proposed regulations seriously threaten that capacity.

The proposed regulations represent an attempt to accomplish by regulation fundamental changes in FNMA's purposes and methods of doing business, which were considered by the Johnson Administration and Congress during the drafting of the 1968 amendments to the Charter Act and rejected. The regulations evidence HUD's tendency to blur the distinction between FNMA and GNMA as well as to confuse FNMA's secondary market role with the functions of primary lenders.

These regulations represent a clear move towards government domination of a major, publicly-financed corporation which would seriously damage the business community's confidence in the Federal Government's commitment to deregulation and to reliance upon the private sector as a partner in solving national problems. Because FNMA has an obligation to remain faithful to the statutory purpose of the 1968 amendments to the Charter Act—turning the control and management of FNMA over to its shareholders—the corporation is required to resist any attempts by the Secretary of HUD to extend her regulatory authority beyond the bounds carefully defined by the FNMA Charter Act.●

ILLEGAL ALIEN LEGISLATION NEEDED

HON. DAVID C. TREEN

OF LOUISIANA

IN THE HOUSE OF REPRESENTATIVES

Monday, March 20, 1978

● Mr. TREEN. Mr. Speaker, an interview with Leonel J. Castillo, Commissioner of the Immigration and Naturalization Service, appeared in the February 20, 1978, issue of U.S. News & World Report. Although I do not agree with all of Mr. Castillo's comments, the article does point out that the problem of illegal aliens is a serious one and it is a problem getting worse. Despite the comments of Mr. Castillo, the Carter administration is doing little to resolve this issue. The proposal put forth by the administration is inadequate to deal with the real roots of this problem.

Mr. Castillo points out the seriousness of this problem in this interview:

Q. But have your efforts reduced the number of people who enter this country illegally?

A. Last year we exceeded a million apprehensions. That's the highest since "Operation Wetback," when the service carried out a major roundup of undocumented aliens in 1954.

We are developing a more efficient enforcement arm, but what it really comes down to is that we are running a more efficient revolving door. We can apprehend more, we can deport more, and we can have more helicopters and technological devices. But if illegals can—by simply trying long enough—end up being hired in the U.S. without any problem, what will stop them from continuing to come?

Q. How many illegal aliens do you estimate there are in this country?

A. Estimates have been made by everybody. It makes for fascinating reading, but it doesn't give you anything that you can be sure of. The experts are tending to cluster around 3 to 5 million as the total number in the U.S. But these are really nothing more than guesstimates.

One way these figures are reached is to assume that for every person caught at the border, perhaps three or five more get through. But I know that we've apprehended some people 20 times. We apprehended one man five times in one day.

Q. Five times in one day? How do you do that?

A. Well, after you apprehend them, you deport them. You drive them back across the bridge in El Paso or take them to the border at Tijuana. He came back five times in one day, and we picked him up five times. For all we know, he's here now.

Q. In your opinion, has the number of persons crossing the border illegally been reduced since you've been in office?

A. No. I think the flow is growing. I think our effectiveness is growing and that a lesser percentage is getting across—but, in total numbers, it's higher.

Besides the increasing number of aliens coming into this country with their detrimental effect on our economy, a whole crime operation is an integral part of the illegal alien scene. There are smuggling rings to get illegals into the United States, false identification documents to facilitate the securing of jobs, and blackmail of illegal aliens already here. These illegals are exploited while certain individuals reap an illegal profit from such trade. The problem is intensified by inadequate border personnel and lenient judges.

The Carter administration proposal providing amnesty in various stages would not resolve the problem. When the President announced his suggested amnesty last August, we witnessed an intensified effort by illegals to get into the United States in the following weeks. They got word of the amnesty and wanted to be part of the crowd to be eligible for this bonus. Once inside the United States, false identification papers—e.g., bogus social security cards, birth certificates, rent receipts, drivers licenses—could establish a residency by any date desired. The Carter proposal would actually provide more business for the crime rings operating in the illegal alien field.

I call attention to Mr. Castillo's discussion of the sophistication of the smuggling rings:

Q. How do these people go about getting here?

A. A lot of them arrive as visitors who have visas and they simply overstay.

Lately, we've uncovered some smuggling rings that bring people by land from places as far away as Ecuador—through Mexico.

Q. Do you mean an organized network is smuggling illegal aliens?

A. Yes, and it's a very extensive network. That's one of the reasons we're beefing up our investigations: because we think that maybe as many as one fourth of all people coming across have someone helping them.

There are great, big operations almost like travel agencies. They have an office in New York, and they can find you 50 workers—complete with phony documents—to work in carwashes in Philadelphia. They'll get them in from Brownsville, Texas, for example, with stops in different places.

We're concentrating a lot of resources on the smuggling rings.

Q. Is this part of the organized-crime syndicate—the Mafia?

A. We don't know if it flows to the Mafia, but it's very clearly organized criminal groups. We don't think it's involved very much with things like hard drugs, although there may be some overlap.

We have also apprehended members of "ma and pa" type operations, where they drive down from Los Angeles for a weekend in a station wagon, pick up some people in Tijuana and drive them back to Los Angeles.

They can make $400 to $500 for a weekend drive.

The big ones can deliver all over the country.

Q. How often do you catch and prosecute these smugglers?

A. Last year we presented for prosecution about 5,000 individual smuggling cases. But we have problems with that because we clog up the courts very quickly. There are just too many cases. So we're trying to focus on the bigger and better cases.

Q. Are the judges too lenient?

A. Except for a few jurisdictions, the fines have been uniformly low, and the time in jail is uniformly short. In addition, the law is weak in some areas.

We cannot, for instance, keep the smugglers' vehicles. We've asked for legislation that would enable us to do that. Some vehicles are custom designed. They have special springs so you can't tell that there are 20 people in the back of a pickup truck.

We've apprehended some of these vehicles more than 20 times. We impound the vehicle for a few hours, and they pick it up and use it again.

Q. Where do these poor people in Mexico get $1,000 to pay someone to smuggle them into the U.S.?

A. Some of them become a modern form of indentured servant. They pay a percentage of their salaries for years. Sometimes relatives, both here and at home, help come up with the money.

I joined with my colleagues to sponsor the "Illegal Alien Control Act." In contrast to the Carter administration's half-hearted efforts, this measure would take meaningful steps toward resolving the illegal alien problem.

The highlights of the "Illegal Alien Control Act" include—

Increased border patrol to more effectively prevent entrance of additional illegal aliens into the U.S.

Provisions for the confiscation of vehicles used to smuggle illegal aliens into the U.S. This would prevent these vehicles from being used over and over again for transporting illegal aliens into the U.S.

Increased penalties on those individuals involved in smuggling illegal aliens into the U.S. and increased penalties on illegals captured.

Strengthen the present law making it a criminal penalty to counterfeit border crossing and alien registration cards (or any other documents) used for entry or for a stay in the U.S.

More effective provisions so employers can check out information on prospective employees to discover if they are illegal aliens and/or using false identification.

Penalties on employers who fail to follow the procedure or who knowingly hire illegal aliens.

Tighter restrictions on Social Security card issuance to prevent fraudulent use and abuse of the Social Security card. This would, in addition, protect the Social Security accounts of millions of Americans by cutting down or eliminating fraudulent use of documents.

A "guest laborer" program which would allow aliens to come into the U.S. to work to meet legitimate labor needs in the agricultural field and then return to their native land.

A flat prohibition on federal benefits (e.g., Medicard, Aid to Families with Dependent Children, Food Stamps, Supplemental Security Income) from going to illegal aliens. These benefits would be limited to U.S. citizens or aliens lawfully admitted.

The Carter administration's discussion of amnesty for illegal aliens presently in the United States, increased foreign aid to nations which have been sources of illegal immigration (e.g., Mexico), and harsh penalties on employers without giving the employer a protective mechanism in checking out the status of potential employees will not resolve the illegal alien problem. These measures could conceivably make the situation worse. The suggestions made by the President would do little to break up the network of criminal activities associated with illegal aliens.

I believe the time for action is now and that the Subcommittee on Immigration, Citizenship, and International Law of the House Judiciary Committee should schedule hearings on this problem. The longer the Congress waits and delays, the worse the problem will become. I also urge a careful examination by Members of this Congress of the provisions of the "Illegal Alien Control Act"—a more effective bill to solve our illegal alien problem than the Carter administration proposals.●

SENATE COMMITTEE MEETINGS

Title IV of the Senate Resolution 4, agreed to by the Senate on February 4, 1977, calls for establishment of a system for a computerized schedule of all meetings and hearings of Senate committees, subcommittees, joint committees, and committees of conference. This title requires all such committees to notify the Office of the Senate Daily Digest—designated by the Rules Committee—of the time, place, and purpose of all meetings when scheduled, and any cancellations or changes in meetings as they occur.

As an interim procedure until the computerization of this information becomes operational, the Office of the Senate Daily Digest will prepare this information for printing in the Extensions of Remarks section of the CONGRESSIONAL RECORD on Monday and Wednesday of each week.

Any changes in committees scheduling will be indicated by placement of an asterisk to the left of the name of the unit conducting such meetings.

Meetings scheduled for Tuesday, March 21, 1978, may be found in Daily Digest of today's RECORD.

MEETINGS SCHEDULED
MARCH 22

9:00 a.m.
Agriculture, Nutrition, and Forestry
Foreign Agricultural Policy Subcommittee
To hold hearings on the problems of inspection standards of U.S. produce versus foreign imported produce.
322 Russell Building

Commerce, Science, and Transportation
Consumer Subcommittee
To continue hearings on S. 2604, authorizing funds through fiscal year 1980 for the National Traffic and Motor Vehicle Safety Act and the Motor Vehicle Information and Cost Savings Act.
318 Russell Building

9:30 a.m.
Armed Services
Tactical Air Craft Subcommittee
To resume hearings on S. 2571, proposed fiscal year 79 authorizations for military procurement.
224 Russell Building

Environment and Public Works
Nuclear Regulation Subcommittee
To continue hearings on proposed legislation to provide a means of safe nuclear waste disposal.
Room to be announced

Environment and Public Works
Transportation Subcommittee
To continue hearings on S. 2440, proposed Federal Highway Improvement
4200 Dirksen Building

Governmental Affairs
Energy, Nuclear Proliferation, and Federal Services Subcommittee
To hold hearings on S. 2236, to strengthen Federal programs and policies for combating international and domestic terrorism.
4221 Dirksen Building

Human Resources
To hold hearings on S. 2084, the administration's proposed welfare reform legislation.
Until 12:30 p.m. 4223 Dirksen Building

10:00 a.m.
Appropriations
HUD-Independent Agencies Subcommittee
To continue hearings on proposed budget estimates for FY 79 for the National Science Foundation.
1318 Dirksen Building

Appropriations
Transportation Subcommittee
To hold hearings on budget estimates for FY 79 for the U.S. Coast Guard.
S–146, Capitol

Armed Services
Manpower and Personnel Subcommittee
To continue hearings on S. 2571, proposed FY 79 authorizations for military procurement.
212 Russell Building

Energy and Natural Resources
Business meeting on pending calendar business.
3110 Dirksen Building

Judiciary
To hold hearings on FY 79 authorizations for the Department of Justice.
2228 Dirksen Building

Select Ethics
To resume closed hearings concerning alleged attempts by representatives of the Republic of Korea to improperly influence Members and employees of the Senate.
Until 12:30 p.m. S–407, Capitol

Select Small Eusiness
To resume hearings on S. 2733 and title I of S. 807, to authorize grants to individuals and small business concerns for development of solar energy equipment and energy related inventions.
424 Russell Building

Select Indian Affairs
To resume hearings on S. 2460, to amend the Indian Self-Determination and Education Assistance Act.
S–207 Capitol

10:30 a.m.
Conferees
On H.R. 9179, to extend until September 30, 1981, the basic operating authority of the Overseas Private Investment Corporation.
S–116, Capitol

2:00 p.m.
Appropriations
Defense Subcommittee
To continue hearings on proposed budget estimates for FY 79 for the defense establishment.
S–128, Capitol

Appropriations
Treasury, Postal Service, and General Government Subcommittee
To continue hearings on proposed budget estimates for FY 79 for general government items.
1224 Dirksen Building

Select Ethics
To continue closed hearings concerning alleged attempts by representatives of the Republic of Korea to improperly influence Members and employees of the Senate.
Until 5:00 p.m. S-407, Capitol

Select Intelligence
Closed business meeting.
6226 Dirksen Building

MARCH 23

8:00 a.m.
Agriculture, Nutrition, and Forestry
Agricultural Research and General Legislation Subcommittee
To resume hearings on proposed extension of the Commodity Futures Trading Commission.
324 Russell Building

9:00 a.m.
Commerce, Science, and Transportation
Consumer Subcommittee
To continue hearings on S. 2603, authorizing funds through fiscal year 1980 for the National Traffic and Motor Vehicle Information and Cost Savings Act.
1202 Dirksen Building

Environment and Public Works
Resource Protection Subcommittee
To mark up S. 1140, to encourage and assist States to develop improved programs of the conservation of "nongame" species of fish and wildlife.
4200 Dirksen Building

9:30 a.m.
Armed Services
To resume closed hearings on S. 2571, military procurement authorizations for fiscal year 1979.
212 Russell Building

Commerce, Science, and Transportation
Science, Technology, and Space Subcommittee
To hold oversight hearings on the Office of Science Technology Policy.
235 Russell Building

Environment and Public Works
Transportation Subcommittee
To hold hearings on the status of proposed construction of a Federal interstate highway near Memphis, Tennessee.
1224 Dirksen Building

Governmental Affairs
Energy, Nuclear Proliferation, and Federal Services Subcommittee
To continue hearings on S. 2236, to strengthen Federal programs and policies for combating international and domestic terrorism.
4221 Dirksen Building

Governmental Affairs
Federal Spending Practices and Open Government Subcommittee
To hold hearings on S. 2318, the proposed Buy American Act.
3302 Dirksen Building

Human Resources
To continue hearings on S. 2084, the Administration's proposed welfare reform legislation.
Until 12:30 p.m. 4232 Dirksen Building

Judiciary
Administrative Practice and Procedure Subcommittee
To resume oversight hearings on the witness protection program of the Organized Crime Control Act (P.L. 91-452).
5110 Dirksen Building

Veterans' Affairs
To mark up S. 2384, the Veterans and Survivors Income Security Act.
412 Russell Building

Select Ethics
To continue closed hearings concerning alleged attempts by representatives of the Republic of Korea to improperly influence Members and employees of the Senate.
Room to be announced

10:00 a.m.
Appropriations
Foreign Operations Subcommittee
To resume hearings on budget estimates for FY 79 for foreign aid programs.
S-126, Capitol

Appropriations
Interior Subcommittee
To resume hearings on proposed budget estimates for FY 79 for the Bureau of Land Management, the Indian Health Service, and related activities.
1114 Dirksen Building

Appropriations
Transportation Subcommittee
To hold hearings on budget estimates for FY 79 for the Federal Highway Administration.
1223 Dirksen Building

Banking, Housing, and Urban Affairs
To mark up S. 1010 and H.R. 2777, to establish a National Consumer Cooperative Bank.
5302 Dirksen Building

Energy and Natural Resources
To hold hearings on the price differential between leaded and unleaded gasoline.
3110 Dirksen Building

Governmental Affairs
Energy, Nuclear Proliferation and Federal Services Subcommittee
To continue hearings to explore ways of preventing nuclear terrorism.
4221 Dirksen Building

2:00 p.m.
Appropriations
Defense Subcommittee
To continue hearings on proposed budget estimates for FY 79 for the defense establishment.
S-128, Capitol

Appropriations
Treasury, Postal Service, and General Government Subcommittee
To hold hearings on budget estimates for FY 79 for certain Independent Agencies, and on supplemental appropriations for FY 78.
1224 Dirksen Building

MARCH 24

10:00 a.m.
Banking, Housing, and Urban Affairs
To hold oversight hearings on the impact of building codes on housing rehabilitation.
5302 Dirksen Building

MARCH 31

9:00 a.m.
Commerce, Science, and Transportation
Science, Technology, and Space Subcommittee
To hold hearings on a report by the National Research Council on the space shuttle main engine.
235 Russell Building

APRIL 3

9:30 a.m.
Environment and Public Works
Transportation Subcommittee
To hold hearings on S. 394, proposed Bridge Replacement and Rehabilitation Act.
4200 Dirksen Building

10:00 a.m.
Appropriations
Interior Subcommittee
To hold hearings on budget estimates for FY 79 for the National Endowment for the Humanities.
1114 Dirksen Building

Commerce, Science, and Transportation
To hold overnight hearings on the Coastal Zone Management Act (P.L. 92-583).
235 Russell Building

Foreign Relations
Foreign Assistance Subcommittee
To hold hearings on FY 79 authorizations for security assistance programs.
4221 Dirksen Building

11:00 a.m.
Human Resources
Health and Scientific Research Subcommittee
To mark up S. 2534, to extend through FY 83 programs for health maintenance organizations; S. 2450, authorizing funds for FY 79 for Community Mental Health Centers and for biomedical research; and S. 2466, to establish a National Institute of Health Care Research.
Until 1:00 p.m. 4232 Dirksen Building

2:00 p.m.
Appropriations
State, Justice, Commerce, the Judiicary Subcommittee
To hold joint hearings with Select Small Business Committee on budget estimates for FY 79 for the Small Business Administration.
S-146, Capitol

APRIL 4

9:00 a.m.
Commerce, Science, and Transportation
Consumer Subcommittee
To hold hearings on FY 79 authorizations for the Consumer Product Safety Commission.
1202 Dirksen Building

Judiciary
Antitrust and Monopoly Subcommittee
To resume oversight hearings on ICC regulation in the motor common carrier industry.
Room to be announced

9:30 a.m.
Environment and Public Works
Resource Protection Subcommittee
To hold oversight hearings on the Environmental Noise Control Act (P.L. 92-574).
4200 Dirksen Building

Judiciary
Antitrust and Monopoly Subcommittee
To resume oversight hearings on ICC's price regulation in the motor common carrier industry.
2228 Dirksen Building

10:00 a.m.
Appropriations
Interior Subcommittee
To hold hearings on budget estimates for FY 79 for the Bureau of Indian Affairs.
1114 Dirksen Building

Appropriations
State, Justice, Commerce, the Judiciary Subcommittee
To hold hearings on budget estimates for FY 79 for the Judiciary and on supplemental appropriations for FY 78.
S-146, Capitol

Appropriations
Treasury, Postal Service, and General Government Subcommittee
To resume hearings on budget estimates for FY 79 for the Department of the Treasury, Postal Service, and General Government items, and on supplemental appropriations for FY 78.
S-126, Capitol

Banking, Housing, and Urban Affairs
To resume mark-up of S. 2065, 2470, and 2546, bills to protect consumers' rights and to provide remedies in electronic fund transfer systems.
5302 Dirksen Building

Environment and Public Works
Nuclear Regulation Subcommittee
To hold hearings on proposed legislation to provide a means of safe nuclear waste disposal.
3302 Dirksen Building

Judiciary
To resume hearings on FY 79 authorizations for the Department of Justice.
2228 Dirksen Building

2:00 p.m.
Appropriations
Treasury, Postal Service, and General Government Subcommittee
To continue hearings on budget estimates for FY 79 for the Department of the Treasury, Postal Service, and General Government items, and on supplemental appropriations for FY 78.
S–126, Capitol

APRIL 5

9:00 a.m.
Commerce, Science, and Transportation
Consumer Subcommittee
To continue hearings on FY 79 authorizations for the Consumer Product Safety Commission.
5110 Dirksen Building

9:30 a.m.
Environment and Public Works
To continue oversight hearings on the Environmental Noise Control Act (P.L. 92–574).
4200 Dirksen Building

Environment and Public Works
Nuclear Regulation Subcommittee
To continue hearings on proposed legislation to provide a means of safe nuclear waste disposal.
1202 Dirksen Building

Governmental Affairs
Federal Spending Practices and Open Government Subcommittee
To resume hearings on S. 2318, the proposed Buy American Act.
318 Russell Building

10:00 a.m.
Appropriations
To resume hearings on budget estimates for FY 79 for foreign aid programs.
S–126, Capitol

Appropriations
Transportation Subcommittee
To hold hearings on budget estimates for FY 79 for the Federal Aviation Administration.
1224 Dirksen Building

Banking, Housing, and Urban Affairs
International Finance Subcommittee
To hold hearings on U.S. programs and facilities designed to increase U.S. exports.
5302 Dirksen Building

Commerce, Science and Transportation
To hold oversight hearings into how the U.S. Coast Guard will benefit from two proposed Intergovernmental Maritime Consultative Organization treaties.
235 Russell Building

Finance
Social Security Subcommittee
To hold hearings on S. 2503, S. 2501, and related bills dealing with refinancing of the social security system.
2221 Dirksen Building

Judiciary
To continue hearings on FY 79 authorizations for the Department of Justice.
2228 Dirksen Building

Rules and Administration
To resume hearings on S. Res. 166, to reorganize administrative services of the Senate, and to consider other legislative matters.
301 Russell Building

Select Indian Affairs
To hold oversight hearings on the current status of the reorganization of the Bureau of Indian Affairs.
218 Russell Building

10:30 a.m.
Veterans' Affairs
To hold hearings to receive legislative recommendations from AMVETS Paralyzed Veterans of America, and Veterans of World War I.
Until 1:00 p.m. 6225 Dirksen Building

APRIL 6

9:00 a.m.
Commerce, Science, and Transportation
Consumer Subcommittee
To continue hearings on FY 79 authorizations for the Consumers Product Safety Commission.
5110 Dirksen Building

9:30 a.m.
Commerce, Science, and Transportation
Science, Technology, and Space Subcommittee
To resume oversight hearings on the National Bureau of Standards.
235 Russell Building

10:00 a.m.
Appropriations
To hold hearings on budget estimates for FY 79 for the Geological Survey.
1114 Dirksen Building

Appropriations
Transportation Subcommittee
To hold hearings on budget estimates for FY 79 for the National Railroad Passenger Corporation (AMTRAK).
1224 Dirksen Building

Commerce, Science, and Transportation
To hold hearings on S. 2224, to establish a national ocean policy, to set forth the missions of the National Oceanic and Atmospheric Administration.
318 Russell Building

Finance
Social Security Subcommittee
To continue hearings on S. 2503, S. 2501, and related bills dealing with refinancing of the social security system.
2221 Dirksen Building

Judiciary
To continue hearings on FY 79 authorizations for the Department of Justice.
2228 Dirksen Building

APRIL 7

9:00 a.m.
Commerce, Science, and Transportation
To hold hearings on S. 2541 the Highway Safety Act.
5110 Dirksen Building

9:30 a.m.
Environment and Public Works
Water Resources Subcommittee
To hold hearings on S. 2701 and 2704, bills to promote a more adequate and responsive national program of water research and development.
4200 Dirksen Building

10:00 a.m.
Banking, Housing, and Urban Affairs
International Finance Subcommittee
To resume hearings on S. 2520, FY 79 authorizations for the Export-Import Bank.
5302 Dirksen Building

Commerce, Science, and Transportation
To hold hearings jointly with the Human Resources Subcommittee on Education, Arts, and the Humanities on proposed FY 79–80 authorizations for the National Sea Grant College program.
235 Russell Building

11:00 a.m.
Appropriations
HUD–Independent Agencies Subcommittee
To hold hearings on budget estimates for FY 79 for the Office of Revenue Sharing, and New York City Seasonal Financing Fund, Department of the Treasury.
1318 Dirksen Building

Human Resources
Health and Scientific Research Subcommittee
To mark up S. 2410, to amend certain sections of the Public Health Service Act relative to health planning and health resources development, and S. 2579, to establish a President's Commission for the Protection of Human Subjects of Biomedical and Behavioral Research.
Until 1:00 p.m. 457 Russell Building

APRIL 10

Constitution Subcommittee
To hold hearings on S. 571, to provide for direct enforcement action by HUD in discriminatory housing practices.
2228 Dirksen Building

Human Resources
Employment, Poverty, and Migratory Labor Subcommittee
To mark up S. 50, the Full Employment and balanced Growth Act.
1202 Dirksen Building

9:30 a.m.
Human Resources
Health and Scientific Research Subcommittee
To hold hearings on S. 2549, FY 79 authorization for the National Science Foundation.
Until 12:30 p.m. 4232 Dirksen Building

10:00 a.m.
Banking, Housing, and Urban Affairs.
To hold hearings to consider the reestablishment of housing goals and proposed extension of existing housing programs.
5302 Dirksen Building

Environment and Public Works
Nuclear Regulation Subcommittee
To hold hearings on FY 79 authorizations for the Nuclear Regulatory Commission.
4200 Dirksen Building

Select Ethics
To resume closed hearings concerning alleged attempts by representatives of the Republic of Korea to improperly influence Members and employees of the Senate.
Until 12:30 p.m. S–407, Capitol

1:30 p.m.
Select Ethics
To continue closed hearings concerning alleged attempts by representatives of the Republic of Korea to improperly influence Members and employees of the Senate.
Until 5:00 p.m. S–407, Capitol

APRIL 11

9:00 a.m.
Judiciary
Improvements in Judicial Machinery Subcommittee
To hold hearings on S. 225, to encourage prompt, informal, and inexpensive resolution of civil cases by use of arbitration in U.S. district courts.
2228 Dirksen Building

9:30 a.m.
Human Resources
Health and Scientific Research Subcommittee
To resume hearings on S. 2040, proposed comprehensive Drug Amendments Act.
Until 12:30 p.m. 4232 Dirksen Building

10:00 a.m.
Banking, Housing, and Urban Affairs
To continue hearings to consider the reestablishment of housing goals and proposed extension of existing housing programs.
5302 Dirksen Building

Energy and Natural Resources
Public Lands and Resources Subcommittee
To hold hearings on S. 74, to amend P.L. 94–565 so as to include payments for lands on which certain semiactive or inactive military installations are located.
3110 Dirksen Building

Judiciary
To resume hearings on FY 79 authorizations for the Department of Justice.
2228 Dirksen Building

Select Ethics
To continue closed hearings concerning alleged attempts by representatives of the Republic of Korea to improperly influence members and employees of the Senate.
Until 12:30 p.m. S–407, Capitol

1:30 p.m.
Select Ethics
To continue closed hearings concerning alleged attempts by representatives of the Republic of Korea to improperly influence Members and employees of the Senate.
Until 5:00 p.m. C–407, Capitol

APRIL 12

9:30 a.m.
Environment and Public Works
Transportation Subcommittee
To mark up proposed Federal aid highway legislation.
4200 Dirksen Building

Human Resources
Health and Scientific Research Subcommittee
To continue hearings on S. 2040, proposed Comprehensive Drug Amendments Act.
Until 12:30 p.m. 4232 Dirksen Building

10:00 a.m.
Appropriations
Transportation Subcommittee
To hold hearings on budget estimates for FY 79 for the Federal Railroad Administration.
1224 Dirksen Building

Banking, Housing, and Urban Affairs
To continue hearings to consider the reestablishment of housing goals and proposed extension of existing housing programs.
5302 Dirksen Building

Commerce, Science and Transportation
To hold hearings on proposed FY 79 authorizations for the U.S. Coast Guard.
235 Russell Building

Energy and Natural Resources
Public Lands and Resources Subcommittee
To hold hearings on S. 242, 1812, and 2310, bills to amend the Federal land reclamation laws.
3110 Dirksen Building

Judiciary
To continue hearings on FY 79 authorizations for the Department of Justice.
2228 Dirksen Building

Rules and Administration
To hold hearings on S. 1029, to authorize construction of museum support facilities for the Smithsonian Institution, and to consider other legislative matters.
301 Russell Building

Select Indians Affairs
To resume oversight hearings on the current status of the reorganization of the Bureau of Indian Affairs.
1202 Dirksen Building

2:00 p.m.
Appropriations
Transportation Subcommittee
To continue hearings on budget estimates for FY 79 for the Federal Railroad Administration.
1224 Dirksen Building

APRIL 13

9:00 a.m.
*Human Resources
Employment, Poverty, and Migratory Labor Subcommittee
To resume mark up of S. 50, the Full Employment and Balanced Growth Act.
155 Russell Building

9:30 a.m.
Commerce, Science, and Transportation
Surface Transportation Subcommittee
To hold oversight hearings on the Rail Services Act (P.L. 94–210).
318 Russell Building

10:00 a.m.
Appropriations
HUD Independent Agencies Subcommittee
To hold hearings on budget estimates for FY 79 for HUD.
1318 Dirksen Building

Appropriations
State, Justice, Commerce, the Judiciary Subcommittee
To hold hearings on budget estimates for FY 79 for the Arms Control and Disarmament Agency, Board for International Broadcasting, International Communications Agency, and on supplemental appropriations for FY 78.
S–146, Capitol

Banking, Housing, and Urban Affairs
Housing and Urban Affairs Subcommittee
To hold hearings on S. 2691, the Congregate Housing Services Act.
4232 Dirksen Building

Banking, Housing, and Urban Affairs
International Finance Subcommittee
To resume hearings on S. 2520, FY 79 authorizations for the Export-Import Bank.

SENATE—*Tuesday, March 21, 1978*

(Legislative day of Monday, February 21, 1978)

The Senate met at 8:40 a.m., on the expiration of the recess, in executive session, and was called to order by Hon. QUENTIN N. BURDICK, a Senator from the State of North Dakota.

PRAYER

The Chaplain, the Reverend Edward L. R. Elson, D.D. offered the following prayer:

Let us pray:

Almighty God whose spirit searcheth all things, and whose love beareth all things, we draw near to Thee in sincerity and truth. We would spread before Thee the spiritual deadness of our nature, our carelessness in the things of the spirit, our callous attitudes toward the weak and the poor, our insensitiveness to suffering, our willful breach of Thy holy laws, our habits of self-indulgence, the fading of bright ideals, and our neglect of prayer. Forgive us the things we cannot forgive ourselves, the cruel gesture remembered with shame, the vindictive word that went forth to poison and defame, the little hidden sins too numerous to mention. Not for pardon only but for cleansing, we plead. E'er this week has ended show us the path to Calvary that we may see the glory of God in the face of the Man of Sorrows, see the love that forgives to the uttermost, that will not let us down nor give us up, that suffers for our sins but keeps on loving until there is nothing left for us to do but surrender. Come to us, Lord of life, as we come to Thee, and make us new. Amen.

APPOINTMENT OF ACTING PRESIDENT PRO TEMPORE

The PRESIDING OFFICER. The clerk will please read a communication to the Senate from the President pro tempore (Mr. EASTLAND).

The legislative clerk read the following letter:

U.S. SENATE,
PRESIDENT PRO TEMPORE,
Washington, D.C., March 21, 1978.

To the Senate:

Under the provisions of rule I, section 3, of the Standing Rules of the Senate, I hereby appoint the Honorable QUENTIN N. BURDICK, a Senator from the State of North Dakota, to perform the duties of the Chair.

JAMES O. EASTLAND,
President pro tempore.

Mr. BURDICK thereupon assumed the chair as Acting President pro tempore.

RECOGNITION OF LEADERSHIP

The ACTING PRESIDENT pro tempore. The Senator from Alabama.

THE JOURNAL

Mr. ALLEN. Mr. President, I ask unanimous consent that the Journal of the proceedings of the Senate through yesterday, Monday, March 20, 1978, be approved.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

The Senator from Tennessee.

Mr. BAKER. Mr. President, I have no requirements for my time under the standing order, and I yield it back.

Mr. ALLEN. I have no further requirements for time.

The ACTING PRESIDENT pro tempore. Under the previous order, the Senator from South Dakota (Mr. ABOUREZK) is recognized, as in legislative session, for not to exceed 15 minutes.

The Senator from South Dakota.

THE ISRAELI INVASION OF LEBANON

Mr. ABOUREZK. Mr. President, the news of the Middle East is growing increasingly worse. I am afraid it will get worse yet before it gets better. There are now in excess of 200,000 refugees streaming into Beirut from the south of Lebanon, driven there by the savage Israeli attack on the southern part of that country. The Washington Post has reported that cluster bomb units, antipersonnel weapons provided by the United States, have been dropped on the city of Tyre. At least one bombing raid by the Israeli Air Force has been directed at the city of Tripoli, Lebanon, which is north of the capital city of Beirut. Anthony Lewis of the New York Times reports Monday, March 20, that at least 700 people have been killed in Lebanon thus far by Israeli military operations. A great many of these are innocent civilians. Their numbers are far in excess of the 35 civilians who were killed in the terrorist raid in Tel Aviv.

The Israeli military has moved in force approximately 20 miles north of the Lebanese-Israeli border. The communiques from the Israeli Government, and censored news reports from American reporters on the Israeli side, report all of the operations as being "surgical strikes," against guerrilla encampments. Once again, with the Palestinian attack inside Israel, the grief of the families involved, and gory details of the death of civilians in Israel have been reported time and time again in the American press. But there is hardly any mention of civilian casualties caused by Israel in Lebanon. I have said it before and the statement bears repeating; it is almost as though the lives of Arab women and children are valueless, that they are worth far less than the lives of Israeli women and children. The (in) equality of such press coverage contributes to the ability of Israel to continue to receive U.S. support for such institutionalized terrorism while, at the same time, the United States properly condemns the unorganized terrorism committed by Palestinians.

Reports of the use of American weapons, such as the F–15 and the cluster bomb units being dropped in city areas, killing anyone in range in a nondiscriminatory manner bring to mind a major question; that is, should the United States continue to underwrite such barbarism on the part of a so-called ally. The propagandists for Israel have succeeded in dehumanizing Palestinians, Lebanese, and Arabs in general because such dehumanization makes it easier for Israel to engage with impunity in the savagery of killing. That is a tragic lesson in racism, committed by people who have suffered the most throughout history from racism.

The question of the Israeli attack in Lebanon goes beyond that of retaliation. We would hardly expect the United States to invade Mexico if 10 terrorists from Mexico attacked inside the United States. We would hardly expect the Soviet Union to invade Israel the next time a Soviet Jew hijacked a Soviet airliner. Other than the desire by Israel for its expansion into southern Lebanon, what plausible reason can there be for such an attack? I was told in 1974 by an Israeli journalist that, when Israel deemed the provocation to be appropriate, it would invade southern Lebanon and effectively annex part of that country at the Litani River line. Given the past behavior of Israel in the Middle East, its expansionist history, and its desire for additional water, which can be provided by the Litani River, the statement by the Israeli journalist was believable. In view of the experience of the last few days, what he said was totally credible.

The Sunday edition of the Washington Star has reported that Prime Minister Begin is bringing a comprehensive plan for rebuilding the Lebanese Army and for reconstructing Lebanon as an independent "sovereign state." The newspaper report says that Begin will offer to withdraw Israeli troops from southern Lebanon on two conditions: First, when an equally powerful force takes up a position now held by Israel and undertakes to keep Arab guerrillas out of the area; second, Israeli withdrawal will be linked to the Syrian withdrawal from the rest of the country.

How cynical and how arrogant Mr. Begin and the Government of Israel now appear in making such a proposal. Israel cannot pretend that it has been invited to commit aggression against Lebanon, unless it might be by the small fascist group of right-wing Lebanese who have been proposed by Begin to run the new Lebanese Army, once the Syrian forces have withdrawn. That proposal would effectively place Lebanon under an Israel mandate.

Most of the world has come to recognize the kind of imperialism pursued by the Israel Government.

The Carter administration, with its resolution in the United Nations Security Council demanding prompt Israeli withdrawal from Lebanese soil, has recognized it as well. It is incumbent upon the Congress to give support to that resolution.

As I see it, Israel will refuse to give up the fruits of its aggression, unless it is convinced it has more to lose than it has to gain as a result of such aggression. In 1956, when Israel joined France and England in attacking Egypt and attempted to keep the Sinai Desert, President Eisenhower was successful in threatening Israel to the extent that Israel withdrew from the Sinai.

Unless this administration, joined by this Congress, is equally as firm, we will have once again underwritten the acquisition of territory by force on the part of Israel. If we do so, then nobody who supports Israel's aggression, its barbaric killing of innocent civilians can, with a straight face, speak of the violation of human rights on the part of the Soviets or any other nation.

The Foreign Military Sales Act prevents the use of American weapons for aggression against a third country. All of the facts exist for the cutoff of American arms to Israel, much the same as we shut off the arms for Turkey when Turkey invaded Cyprus. Israel's clear violation of our law is the obvious lever the administration should use to enforce its demand for Israeli withdrawal.

I understand the feasance most politicians must pay to the Israeli lobby but, at some point, Mr. President, those of us in the American Government must consider the American interest, and in addition, the morality of supporting territorial aggression by Israel.

SENATE RESOLUTION 420—SUBMISSION OF A RESOLUTION RELATING TO THE LEBANESE CRISIS

Mr. ABOUREZK. Mr. President, I send to the desk a resolution and ask for its immediate consideration.

Mr. BAKER. Mr. President, reserving the right to object, may I see the resolution?

Mr. ABOUREZK. Yes.

The ACTING PRESIDENT pro tempore. The resolution will be stated by title.

The second assistant legislative clerk read as follows:

A resolution (S. Res. 420) expressing the sense of the Senate with respect to United Nations Security Council Resolution 425, relating to the Lebanese crisis.

The ACTING PRESIDENT pro tempore. Is there objection to the present consideration of the resolution?

Mr. BAKER. Mr. President, reserving the right to object, I have an idea that there is general agreement for this procedure, but I must say that I was only advised of this resolution this morning. It is early in the morning. It is now only 8:52. I would like to suggest the absence of a quorum, or ask the distinguished Senator from South Dakota if he would suggest the absence of a quorum, so that we can consult with others who might be interested in this, particularly with members of the Foreign Relations Committee.

Mr. ABOUREZK. I would be happy to do that. Before I enter the call for a quorum, I will say this is a sense of the Senate resolution which calls upon the United Nations Security Council resolution 425 relating to the Lebanese crisis, adopted a few days ago, Sunday, to be implemented immediately, and that all parties concerned comply fully with the provisions of that resolution.

Mr. BAKER. Mr. President, I hope the Senator understands I am not opposing the resolution, but I am simply trying to protect the rights of Members if, in fact, there are some Members who object to its immediate consideration.

Mr. MELCHER. Mr. President, will the Senator withhold his suggestion of the absence of a quorum so I may make a unanimous-consent request?

Mr. ABOUREZK. Let me finish this.

I understand what the distinguished minority leader has said. That is why I contacted the minority side this morning.

Mr. BAKER. I am happy that the Senator brought it to our attention this morning.

Mr. ABOUREZK. Mr. President, I thought I might explain before we proceed further that all this does is to track the resolution which the United States will sponsor, and which I believe the Senate will probably want to sponsor, in the U.N.

Mr. President, I suggest the absence of a quorum.

The ACTING PRESIDENT pro tempore. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. BAKER. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

Mr. BAKER. Mr. President, if I may have the attention of the distinguished Senator from South Dakota, I notice that the chairman of the Foreign Relations Committee is here. I will yield to him in just a moment.

I have also talked to the distinguished ranking member of the Foreign Relations Committee (Mr. CASE), who has not yet arrived on the Hill.

Before I yield to the Senator from Alabama, I might tell my friend from South Dakota that Senator CASE indicated he would prefer that I object to the immediate consideration of this resolution for the time being, until he can examine it and confer with his staff.

Mr. ABOUREZK. Mr. President, I am not able to hear the distinguished minority leader.

Mr. BAKER. I was asked to object until Senator CASE can confer with his staff, until after he arrives on the Hill. It is now just before 9 o'clock and he has not yet arrived.

If the Senator wants to withhold the resolution for the time being, maybe something can be worked out later. But if he wants to ask unanimous consent to proceed to its immediate consideration, I would feel compelled to object.

(Mr. PAUL G. HATFIELD assumed the chair.)

Mr. ABOUREZK. Instead of that, in view of what the distinguished minority leader said, I would like to ask unanimous consent that 10 minutes be reserved at 10 o'clock for immediate consideration of this resolution at that time, when Senator CASE can be here.

Mr. BAKER. Mr. President, I cannot agree to that. I can agree if the majority has no objections to setting aside 10 minutes at 10 o'clock to discuss it, but I cannot agree in advance to 10 minutes for immediate consideration of it. That is up to the distinguished chairman of the Senate Committee on Foreign Relations.

Mr. ABOUREZK. Oh, I am sorry.

Mr. SPARKMAN. Mr. President, I wish to say, in connection with the remarks by the minority leader, who is also a member of the Committee on Foreign Relations, that I certainly would object to the immediate consideration now, or any agreement for any fixed time for its immediate consideration.

Mr. ABOUREZK. I misstated what I really intended to say.

I would ask unanimous consent that at 10 o'clock, we set aside 10 minutes once again to call up and ask consent at that time so that, if Senator CASE or anybody else might want to object at 10 o'clock, that is up to them. But I would like to have that time set aside.

Mr. SPARKMAN. Of course, I cannot object to the Senator's wanting to present it at that time, but I shall give the Senator notice now that I shall be compelled to object. I think a resolution of this extent—surely no one can object to his right to introduce it, but I think that a resolution of this nature and of this extent should go to the Committee on Foreign Relations for proper consideration.

Mr. BAKER. Mr. President, the majority leader is necessarily away from the floor at this moment. It is his primary responsibility and opportunity to order the scheduling of activities for the Senate. I have no desire to intrude on that. It may be that the majority leader would consider the request contemplated by the Senator from South Dakota. But, right now, we are locked in by a previous unanimous-consent order to proceed to the consideration of two farm bills beginning at 9 o'clock, and to proceed to votes on amendments to those bills as they may occur during the day; then the two bills themselves at 4. So we are under rather tight time constraints already. I, therefore, shall have to object at this point to that procedure.

I once again suggest to the distinguished Senator from South Dakota that if he wants to do that, he consider propounding that request for a time after 4 o'clock and that, in the meantime, he

discuss this matter with the majority leader.

Mr. ABOUREZK. Mr. President, I ask the distinguished chairman of the Foreign Relations Committee if he opposes this resolution, just endorsing the U.N.'s action over the weekend?

Mr. SPARKMAN. I want to say this: I know nothing more I can add to what I have said. That is that a resolution as important as this should have the consideration of the Foreign Relations Committee. I certainly would have no objection to its being introduced. I could not object to its being introduced and properly referred to the Foreign Relations Committee. I can assure the Senator from South Dakota that we will give it prompt consideration.

Mr. ABOUREZK. I wonder if I might ask the distinguished chairman of the Foreign Relations Committee, since this is an emergency situation, how soon the committee would be able to take it up?

Mr. SPARKMAN. Well, I certainly would want to consult with Senator CASE when he comes. So far as I am concerned, if we get permission to sit, we could have a session this afternoon.

Now, I ask that he not bind me to that, because I have to consult the calendar first, but I certainly think we could have time to meet. We can treat it as an emergency, I think.

Mr. ABOUREZK. Yes, that is what I was asking the distinguished chairman. I understand that he cannot, on the floor, set a schedule. But could he commit himself to no later than tomorrow morning for considering this resolution?

There are people dying every day. It is not a routine measure. I think it is important that Congress go on record as supporting an end to the fighting in the Middle East.

I think the distinguished chairman knows, as does the distinguished minority leader, that almost on a daily basis, if there is something that the Israeli side wants, they get it through automatically. Nobody objects to it, nobody wants it to go to the Foreign Relations Committee. But here is a measure where we are trying to speak on behalf of the Senate and say we have to put an end to the fighting and endorse the resolution of the United Nations. It is very simple, very straightforward.

Mr. BAKER. Mr. President.

The PRESIDING OFFICER. The Senator from Tennessee (Mr. BAKER) is recognized.

Mr. ABOUREZK. Mr. President, who has the floor?

The PRESIDING OFFICER. All the time has expired.

Mr. BAKER. Mr. President, a point of order: What is the pending business at this moment?

The PRESIDING OFFICER. The request of the Senator from South Dakota for immediate consideration of the resolution.

Mr. BAKER. Mr. President, I shall be forced to object to that if the Senator continues with the request. I can tell him that if he wants permission for the Foreign Relations Committee to meet this afternoon or during the day, I shall certainly not object to it. We have a 9 o'clock time when we have to begin on the farm bill. I hope we can postpone this conversation until a little later.

Mr. ABOUREZK. Well, I have the commitment of the distinguished chairman of the Foreign Relations Committee that they will meet as soon as they possibly can to consider this emergency measure. I, therefore, Mr. President, withdraw my request.

Mr. SPARKMAN. I want it understood that certainly we should consult with Senator CASE.

The PRESIDING OFFICER. Is the request for immediate consideration withdrawn?

Mr. ABOUREZK. I withdraw it. I merely submit the resolution for immediate referral.

The PRESIDING OFFICER. It will be referred.

Mr. BAKER. I thank the Senator.

EMERGENCY AGRICULTURAL ACT OF 1978

The PRESIDING OFFICER. Under the previous order, the Senate will now proceed to consideration, as in legislative session, of H.R. 6782, which the clerk will state.

The assistant legislative clerk read as follows:

A bill (H.R. 6782) to permit marketing orders to include provisions concerning marketing promotion, including paid advertisement, of raisins and distribution among handlers of the pro rata costs of such promotion.

The Senate proceeded to the consideration of the bill, which had been reported from the Committee on Agriculture, Nutrition, and Forestry with an amendment to strike all after the enacting clause and insert the following:

That this Act may be cited as the "Emergency Agricultural Act of 1978".

ADDITIONAL SET-ASIDE PROGRAMS FOR THE 1978 CROPS OF WHEAT, FEED GRAINS, UPLAND COTTON, AND SOYBEANS

SEC. 2. Effective only with respect to the 1978 crops, title I of the Agricultural Act of 1949 is amended by adding at the end thereof new sections 112 through 115 as follows:

"1978 WHEAT PROGRAM FOR ADDITIONAL SET-ASIDE

"SEC. 112. Notwithstanding any other provisions of law—

"(a) The Secretary shall formulate and carry out a program for the 1978 crop of wheat under which payments shall be made to producers on a farm who, in addition to making any required set-aside of acreage under section 107A(f) of this Act and to the extent prescribed by the Secretary, set aside and devote to approved conservation uses an acreage of cropland on the farm in accordance with contracts entered into by the Secretary with such producers. The payments for a farm shall be at such rate or rates as the Secretary determines to be fair and reasonable, taking into consideration the productivity of the acreage to be set aside, the extent of the cropland to be set aside under this section, and the total acreage of cropland set aside from the production of wheat under this Act.

"(b) The total acreage of cropland set aside from the production of wheat under this section shall be the amount necessary to adjust the total national acreage of wheat to desirable goals, as determined by the Secretary. Notwithstanding any other provision of this section, the rate of payment established by the Secretary shall be set at such level as the Secretary estimates will achieve the purposes of this section and assure the set-aside under this section of not less than fifteen million acres of cropland. The Secretary shall limit the total acreage to be set aside under this section in any county or local communty so as not to affect adversely the economy of the county or local community.

"(c) The acreage set aside under this section may be devoted to wildlife food plots or wildlife habitat in conformity with standards established by the Secretary in consultation with wildlife agencies. The Secretary may pay an appropirate share of the cost of practices designaed to carry out the purposes of the foregoing sentence. The Secretary may provide for an additional payment on such acreage in an amount determined by the Secretary to be appropriated in relation to the benefit to the general public if the producer agrees to permit, without other compensation, access to all of such portion of the farm, as the Secretary may prescribe, by the general public, for hunting, trapping, fishing, and hiking, subject to applicable State and Federal regulations.

"(d) As a condition of eligibility for participating in the program formulated under this section, producers must set aside any acreage of cropland required to be set aside under section 107A(f) of this Act.

"(e) The Secretary shall provide adequate safeguards to protect the interests of tenants and sharecroppers.

"(f) The payment limitation provisions of section 101 of the Food and Agriculture Act of 1977 shall not be applicable to the program formulated under this section.

"(g) If the operator of the farm desires to participate in the program formulated under this section, the operator shall file a contract to do so no later than such date as the Secretary may prescribe. The Secretary may, by mutual agreement with the producers, terminate or modify any contract entered into under this section if the Secretary determines such action necessary because of an emergency created by drought or other disaster, or in order to prevent or alleviate a shortage in the supply of agricultural commodities.

"(h) Fifty per centum of any payment to producers under subsection (a) of this section shall be made in advance of determination of performance.

"(i) In any case in which the failure of a producer to comply fully with the terms and conditions of the program formulated under this section precludes the making of payments, the Secretary may, nevertheless, make such payments in such amounts as the Secretary determines to be equitable in relation to the seriousness of the default.

"(j) The Secretary is authorized to issue such regulations as the Secretary determines necessary to carry out the provisions of this section. With regard to wheat acreage planted for harvest, the Secretary shall administer the program formulated under this section in such a manner as to permit the use of acreage set aside under this section for haying, grazing, clipping, or wildlife food plots and habitat.

"(k) The Secretary shall carry out the program authorized by this section through the Commodity Credit Corporation.

"(l) The Secretary shall permit the production of hay on acreage set aside under section 107A(f) of this Act in any area where a natural disaster or other condition beyond

the control of the producer has depleted stocks of feed in order that the stocks may be replenished.

"1978 FEED GRAIN PROGRAM FOR ADDITIONAL SET-ASIDE

"SEC. 113. Notwithstanding any other provision of law—

"(a) The Secretary shall formulate and carry out a program for the 1978 crops of corn, grain sorghums, and barley under which payments shall be made to producers on a farm who, in addition to making any required set-aside of acreage under section 105A(f) of this Act and to the extent prescribed by the Secretary, set aside and devote to approved conservation uses an acreage of cropland on the farm in accordance with contracts entered into by the Secretary with such producers. The payments for a farm shall be at such rate or rates as the Secretary determines to be fair and reasonable, taking into consideration the productivity of the acreage to be set aside, the extent of the cropland to be set aside under this section, and the total acreage of cropland set aside from the production of feed grains under this Act.

"(b) The total acreage of cropland set aside from the production of feed grains under this section shall be the amount necessary to adjust the total national acreage of feed grains to desirable goals, as determined by the Secretary. Notwithstanding any other provision of this section, the rate of payment established by the Secretary shall be set at such level as the Secretary estimates will achieve the purposes of this section and assure the set-aside under this section of not less than ten million acres of cropland. The Secretary shall limit the total acreage to be set aside under this section in any county or local community so as not to affect adversely the economy of the county or local community.

"(c) The acreage set aside under this section may be devoted to wildlife food plots or wildlife habitat in conformity with standards established by the Secretary in consultation with wildlife agencies. The Secretary may pay an appropriate share of the cost of practices designed to carry out the purposes of the foregoing sentence. The Secretary may provide for an additional payment on such acreage in an amount determined by the Secretary to be appropriate in relation to the benefit to the general public if the producer agrees to permit, without other compensation, access to all or such portion of the farm, as the Secretary may prescribe, by the general public, for hunting, trapping, fishing, and hiking, subject to applicable State and Federal regulations.

"(d) As a condition of eligibility for participating in the program formulated under this section, producers must set aside any acreage of cropland required to be set aside under section 105A(f) of this Act.

"(e) The Secretary shall provide adequate safeguards to protect the interests of tenants and sharecroppers.

"(f) The payment limitation provisions of section 101 of the Food and Agriculture Act of 1977 shall not be applicable to the program formulated under this section.

"(g) If the operator of the farm desires to participate in the program formulated under this section, the operator shall file a contract to do so no later than such date as the Secretary may prescribe. The Secretary may, by mutual agreement with the producers, terminate or modify any contract entered into under this section if the Secretary determines such action necessary because of an emergency created by drought or other disaster, or in order to prevent or alleviate a shortage in the supply of agricultural commodities.

"(h) Fifty per centum of any payment to producers under subsection (a) of this section shall be made in advance of determination of performance.

"(i) In any case in which the failure of a producer to comply fully with the terms and conditions of the program formulated under this section precludes the making of payments, the Secretary may, nevertheless, make such payments in such amounts as the Secretary determines to be equitable in relation to the seriousness of the default.

"(j) The Secretary is authorized to issue such regulations as the Secretary determines necessary to carry out the provisions of this section. With regard to feed grain acreage planted for harvest, the Secretary shall administer the program formulated under this section in such a manner as to permit the use of acreage set aside under this section for haying, grazing, clipping, or wildlife food plots and habitat.

"(k) The Secretary shall carry out the program authorized by this section through the Commodity Credit Corporation.

"1978 UPLAND COTTON PROGRAM FOR ADDITIONAL SET-ASIDE

"SEC. 114. Notwithstanding any other provision of law—

"(a) The Secretary shall formulate and carry out a program for the 1978 crop of upland cotton under which payments shall be made to producers on a farm who, in addition to making any required set-aside under section 103(f)(11) of this Act and to the extent prescribed by the Secretary, set aside and devote to approved conservation uses an acreage of cropland on the farm in accordance with contracts entered into by the Secretary with such producers. The payments for a farm shall be at such rate or rates as the Secretary determines to be fair and reasonable, taking into consideration the productivity of the acreage to be set aside, the extent of the cropland to be set aside under this section, and the total acreage of cropland set aside from the production of upland cotton under this Act.

"(b) The total acreage of cropland set aside from the production of upland cotton under this section shall be the amount necessary to adjust the total national acreage of upland cotton to desirable goals, as determined by the Secretary. Notwithstanding any other provision of this section, the rate of payment established by the Secretary shall be set at such level as the Secretary estimates will achieve the purposes of this section and assure the set-aside under this section of not less than three million acres of cropland. The Secretary shall limit the total acreage to be set aside under this section in any county or local community so as not to affect adversely the economy of the county or local community.

"(c) The average set-aside under this section may be devoted to wildlife food plots or wildlife habitat in conformity with standards established by the Secretary in consultation with wildlife agencies. The Secretary may pay an appropriate share of the cost of practices designed to carry out the purposes of the foregoing sentence. The Secretary may provide for an additional payment on such acreage in an amount determined by the Secretary to be appropriate in relation to the benefit of the general public if the producer agrees to permit, without other compensation, access to all or such portion of the farm, as the Secretary may prescribe, by the general public, for hunting, trapping, fishing, and hiking, subject to applicable State and Federal regulations.

"(d) As a condition of eligibility for participating in the program formulated under this section, producers must set aside any acreage of cropland required to be set aside under section 103(f)(11) of this Act.

"(e) The Secretary shall provide adequate safeguards to protect the interests of tenants and sharecroppers.

"(f) The payment limitation provisions of section 101 of the Food and Agriculture Act of 1977 shall not be applicable to the program formulated under this section.

"(g) If the operator of the farm desires to participate in the program formulated under this section, the operator shall file a contract to do so no later than such date as the Secretary may prescribe. The Secretary may, by mutual agreement with the producers, terminate or modify any contract entered into under this section if the Secretary determines such action necessary because of an emergency created by drought or other disaster, or in order to prevent or alleviate a shortage in the supply of agricultural commodities.

"(h) Fifty per centum of any payment to producers under subsection (a) of this section shall be made in advance of determination of performance.

"(i) In any case in which the failure of a producer to comply fully with the terms and conditions of the program formulated under this section precludes the making of payments, the Secretary may, nevertheless, make such payments in such amounts as the Secretary determines to be equitable in relation to the seriousness of the default.

"(j) The Secretary is authorized to issue such regulations as the Secretary determines necessary to carry out the provisions of this section. With regard to upland cotton acreage planted for harvest, the Secretary shall administer the program formulated under this section in such a manner as to permit the use of acreage set aside under this section for haying, grazing, clipping, or wildlife food plots and habitat.

"(k) The Secretary shall carry out the program authorized by this section through the Commodity Credit Corporation.

"1978 SOYBEAN SET-ASIDE PROGRAM

"SEC. 115. Notwithstanding any other provision of law—

"(a) The Secretary shall formulate and carry out a program for the 1978 crop of soybeans under which payments shall be made to producers on a farm who, to the extent prescribed by the Secretary, set aside and devote to approved conservation uses an acreage of cropland on the farm in accordance with contracts entered into by the Secretary with such producers. The payments for a farm shall be at such rate or rates as the Secretary determines to be fair and reasonable, taking into consideration the productivity of the acreage to be set aside and the extent of the cropland to be set aside under this section.

"(b) The total acreage of cropland set aside from the production of soybeans under this section shall be the amount necessary to adjust the total national acreage of soybeans to desirable goals, as determined by the Secretary. Notwithstanding any other provision of this section, the rate of payment established by the Secretary shall be set at such level as the Secretary estimates will achieve the purposes of this section and assure the set-aside under this section of not less than three million acres of cropland. The Secretary shall limit the total acreage to be set aside under this section in any county or local community so as not to affect adversely the economy of the county or local community.

"(c) The acreage set aside under this section may be devoted to wildlife food plots or wildlife habitat in conformity with standards established by the Secretary in consul-

tation with wildlife agencies. The Secretary may pay an appropriate share of the cost of practices designed to carry out the purposes of the foregoing sentence. The Secretary may provide for an additional payment on such acreage in an amount determined by the Secretary to be appropriate in relation to the benefit to the general public if the producer agrees to permit, without other compensation, access to all or such portion of the farm, as the Secretary may prescribe, by the general public, for hunting, trapping, fishing, and hiking, subject to applicable State and Federal regulations.

"(d) The Secretary shall provide adequate safeguards to protect the interests of tenants and sharecroppers.

"(e) If the operator of the farm desires to participate in the program formulated under this section, the operator shall file a contract to do so no later than such date as the Secretary may prescribe. The Secretary may, by mutual agreement with the producers, terminate or modify any contract entered into under this section if the Secretary determines such action necessary because of an emergency created by drought or other disaster, or in order to prevent or alleviate a shortage in the supply of agricultural commodities.

"(f) Fifty per centum of any payment to producers under subsection (a) of this section shall be made in advance of determination of performance.

"(g) In any case in which the failure of a producer to comply fully with the terms and conditions of the program formulated under this section precludes the making of payments, the Secretary may, nevertheless, make such payments in such amounts as the Secretary determines to be equitable in relation to the seriousness of the default.

"(h) The Secretary is authorized to issue such regulations as the Secretary determines necessary to carry out the provisions of this section. With regard to soybean acreage planted for harvest, the Secretary shall administer the program formulated under this section in such a manner as to permit the use of acreage set aside under this section for haying, grazing, clipping, or wildlife food plots and habitat.

"(i) The Secretary shall carry out the program authorized by this section through the Commodity Credit Corporation.".

INCREASE IN THE BORROWING AUTHORITY OF THE COMMODITY CREDIT CORPORATION

SEC. 3. (a) Section 4(i) of the Commodity Credit Corporation Charter Act (15 U.S.C. 714b(i)) is amended by striking out "$14,500,000,000" and inserting in lieu thereof "$25,000,000,000".

(b) Section 4 of the Act of March 8, 1938 (15 U.S.C. 713a-4), is amended by striking out $14,500,000,000" and inserting in lieu thereof $25,000,000,000".

(c) The increase in the borrowing authority of the Commodity Credit Corporation made by this section shall be effective only to the extent provided in appropriation Acts.

FARMERS HOME ADMINISTRATION REAL ESTATE AND OPERATING LOANS—ELIGIBILITY AND LOAN LIMITS

SEC. 4. (a) The Consolidated Farm and Rural Development Act is amended as follows:

(1)(A) Section 302 is amended by—

(i) striking out the language down through the first comma and inserting in lieu thereof the following: "The Secretary is authorized to make and insure loans under this subtitle to farmers and ranchers, and to private domestic corporations and partnerships controlled by farmers and ranchers and engaged primarily and directly in farming or ranching, in the United States and in Puerto Rico and the Virgin Islands, who individually, or, in the case of corporations and partnerships, the principal stockholders or partners of which, (1) are citizens of the United States,"; and

(ii) inserting at the end thereof the following: "In the case of corporations and partnerships, the family farm requirement of clause (3) of the first sentence of this section shall apply to the farm or farms in which the entity and its principal stockholders or partners, as applicable, have an ownership and operator interest and the requirement of clause (4) of the first sentence of this section shall apply both to the entity and its principal stockholders or partners.".

(B) Section 304(a) is amended by striking out the word "individual".

(2)(A) Section 311(a) is amended by—

(i) striking out the language down through the first comma and inserting in lieu thereof the following: "The Secretary is authorized to make and insure loans under this subtitle to farmers and ranchers, and to private domestic corporations and partnerships controlled by farmers and ranchers and engaged primarily and directly in farming or ranching, in the United States and in Puerto Rico and the Virgin Islands, who individually, or, in the case of corporations and partnerships, the principal stockholders or partners of which, (1) are citizens of the United States,"; and

(ii) inserting at the end thereof the following: "In the case of corporations and partnerships, the family farm requirement of clause (3) of the first sentence of this subsection shall apply to the farm or farms in which the entity and its principal stockholders or partners, as applicable, have an operator interest and the requirement of clause (4) of the first sentence of this subsection shall apply both to the entity and its principal stockholders or partners.".

(B) Section 312(a) is amended by striking out the word "individual".

(b) The Consolidated Farm and Rural Development Act is further amended as follows:

(1) Section 305 is amended by striking out the first sentence and inserting in lieu thereof the following: "The Secretary shall make or insure no loan under sections 302, 303, and 304 of this title that would cause the unpaid indebtedness under such sections of any one borrower to exceed the lesser of (1) the value of the farm or other security, or (2) in the case of a loan other than a loan guaranteed by the Secretary, $200,000 or, in the case of a loan guaranteed by the Secretary, $300,000. The Secretary is authorized to establish each year an amount or amounts of total unpaid indebtedness that may exist against the farm or other security, which shall apply with respect to loans made or insured during that year. Whenever such amount or amounts are in effect, the Secretary shall make or insure no loan under sections 302, 303, and 304 of this title that would cause the total unpaid indebtedness against the farm or other security at the time the loan is made to exceed the applicable amount.".

(2) Section 313 is amended to read as follows:

"SEC. 313. The Secretary shall make or insure no loan under this subtitle (1) that would cause the total principal indebtedness outstanding at any one time for loans made under subtitle to any one borrower to exceed, in the case of a loan other than a loan guaranteed by the Secretary, $100,000, or, in the case of a loan guaranteed by the Secretary, $200,000; or (2) for the purchasing or leasing of and other than for cash rent, or for carrying on any land leasing or land purchasing program.".

SEC. 5. (a) Effective October 1, 1978, section 8c(6)(I) of the Agricultural Adjustment Act, as reenacted and amended by the Agricultural Marketing Agreement Act of 1937, is amended—

(1) by inserting "raisins," after "apples"; and

(2) by inserting ", raisins," after "with respect to almonds".

(b) Within a period of sixty days following the second anniversary of the implementation of this section, the Secretary of Agriculture shall submit to the Committee on Agriculture of the House of Representatives and to the Committee on Agriculture, Nutrition, and Forestry of the Senate a report which shall describe in detail how this section has been implemented including, but not limited to, information as to the issuance or amendment of any affected order, the annual amount of assessments collected, in the aggregate and by size and class of handler, the manner in which such assessments were collected, the amount of direct expenditures credited against the pro rata expense assessment obligations of each handler, and the purpose to which such assessments and such direct expenditures of each such handler were devoted.

Amend the title so as to read: "An Act to provide emergency assistance to producers of wheat, feed grains, upland cotton, and soybeans, and for other purposes.".

The PRESIDING OFFICER. Time for debate on this bill is limited to 4 hours, to be equally divided and controlled by the Senator from Kansas (Mr. DOLE) and the Senator from Georgia (Mr. TALMADGE), with the time for debate on all amendments, motions, appeals, and points of order submitted to come out of the 4 hours; and with the Senator from Vermont (Mr. LEAHY) to be recognized for 5 minutes on this matter.

The Senator from Georgia (Mr. TALMADGE).

Mr. TALMADGE. Mr. President, a parliamentary inquiry. I understand that the unanimous-consent order further requires back-to-back votes at 4 p.m.

The PRESIDING OFFICER. The Senator is correct.

No; the agreement is for no earlier than 4 o'clock.

Mr. TALMADGE. No later or no earlier? Is it ordered no earlier than 4 p.m. or no later than 4 p.m.?

The PRESIDING OFFICER. No earlier than 4 p.m., is my understanding.

Mr. BAKER. Will the Senator yield to me?

Mr. TALMADGE. I yield to the distinguished minority leader.

Mr. BAKER. I ask a point of clarification from the Chair. As I understood it, the Chair said all votes are to be at 4. That is not the agreement as I recall it. As I recall it, the votes were to be on amendments during the day as propounded, with the vote on the bill to be no earlier than 4 p.m.

The PRESIDING OFFICER. The Senator is correct. The amendments will be voted upon as they are brought up.

Mr. BAKER. I thank the Chair. I thank the Senator for yielding.

Mr. TALMADGE. Further parliamentary inquiry.

The PRESIDING OFFICER. The Senator will state it.

Mr. TALMADGE. If the Senate were to vote on the final passage of the bill

prior to 4 p.m., that would require unanimous consent, would it not?

The PRESIDING OFFICER. The Senator is correct.

Mr. TALMADGE. Mr. President, I ask unanimous consent that the following staff members of the Committee on Agriculture, Nutrition, and Forestry be granted the privilege of the floor during consideration of H.R. 6782, including all rollcall votes thereon: Michael McLeod, Henry Casso, Carl Rose, Dale Stansbury, Phil Fraas, Steve Storch, Karen Schubeck, and Laura Rice.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. TALMADGE. Mr. President, I further ask unanimous consent that Bill Seale of Senator HUDDLESTON's staff, and Bill Motes of Senator CLARK's staff be granted the privilege of the floor during consideration of H.R. 6782, including all rollcall votes thereon.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. McGOVERN. Will the Senator yield to me?

Mr. TALMADGE. I yield to the distinguished Senator from South Dakota.

Mr. McGOVERN. I ask unanimous consent that Mr. Owen Donley of my staff be granted the privilege of the floor during all proceedings under this bill.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. TALMADGE. I yield to the distinguished Senator and ranking minority member of our committee, the distinguished Senator from Kansas.

Mr. DOLE. Mr. President, I make the same request for H.R. 6782 and S. 2481 for the following persons: Dale Sherwin, William Taggart, Glenn Tussey, Morgan Williams, Stu Hardy, and a member of Senator HANSEN's staff, Patty Howe, and also Jack Odgaard of Senator CURTIS' staff and Karen Darling of Senator HAYAKAWA's staff, and Mr. Twilley of Senator THURMOND's staff.

The PRESIDING OFFICER. Without objection, it is so ordered.

(The following proceedings occurred during Mr. ABOUREZK's remarks:)

Mr. MELCHER. Mr. President, I ask unanimous consent that Ben Stong and Jim Rock, of my staff, be granted the privileges of the floor during the consideration of the bills today and all the votes.

Mr. ABOUREZK. Mr. President, I make the same request for Dave Sherwin of my staff.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

Mr. BAKER. Mr. President, I ask unanimous consent that Jim Range be granted the privileges of the floor during the consideration of the two bills the Senate will consider today.

Mr. SCHMITT. Mr. President, I make the same request for Emma Lou Gale.

The ACTING PRESIDENT pro temport. Without objection, it is so ordered.

(This concludes proceedings which occurred earlier.)

Mr. TALMADGE. Mr. President, the bill now under consideration, H.R. 6782, is emergency farm legislation to deal immediately with the critical economic problems of American agriculture.

This is a simple, straightforward bill that does four things:

First, it directs the Secretary of Agriculture to make land diversion payments to producers of wheat, feed grains, upland cotton, and soybeans who voluntarily agree to set aside at least 31 million acres this crop year. The cropland withheld from production would be an addition to the set-asides already announced by the Secretary of Agriculture for wheat and feed grains. The objectives of the land diversion program are to put cash payments in farmers' hands immediately, stimulate market prices for the covered commodities, and reduce the huge carryovers of grains and cotton that have depressed market prices.

Second, the bill increases the borrowing authority of the Commodity Credit Corporation—CCC—from $14.5 to $25 billion. This increased authority is necessary because of increased CCC activities resulting in part from the farm crisis.

Third, it will increase the lending limit on farm real estate and operating loans under the Consolidated Farm and Rural Development Act. These provisions are needed on an emergency basis to increase credit availability to hard-pressed farmers immediately.

A separate, comprehensive farm credit bill has been approved by the Senate Committee on Agriculture, Nutrition, and Forestry and will come before the Senate in due course.

Fourth, H.R. 6782, as passed by the House, amends the Federal marketing order provisions to authorize market development and research for raisins. This bill was adopted as a vehicle by our committee in order to obtain the quickest possible consideration of the emergency provisions of the legislation in both the Senate and the House.

Mr. President, the heart of this emergency farm legislation is the voluntary land diversion program.

I do not believe a single Member of the Senate—whether or not from an agricultural State—needs to be reminded again of the gravity of the economic situation that confronts farmers today.

Our committee completed 11 days of intensive hearings on the agricultural crisis on March 10. We heard from some 200 witnesses, most of them rank-and-file farmers and ranchers.

Whether it was a corn producer from Georgia, a wheat farmer from Kansas, or a cottongrower from Texas, the main theme of the testimony we heard was virtually the same:

Farmers have been devastated by falling prices and escalating production costs.

Many already are broke and others are on the precipice of bankruptcy.

They are deeply in debt and many are without cash or credit resources to make this year's crops.

Almost without exception, the witnesses appealed to our committee—and to the Congress—for help now, immediately.

The Emergency Agricultural Act of 1978 will provide that help now, immediately.

The paid land diversion program is, in my opinion, the only viable method available to Congress for providing financial help to farmers before this year's crops are in the ground—especially in southern areas of the country. In my own State, spring planting is already well advanced.

This is the reason I have urged and pressed for congressional approval of this emergency legislation before the Easter Recess later this week. Unless we send a bill to the President immediately, it will be too late for a great many farmers.

We will have denied them the help they so desperately need.

Mr. President, yesterday, I addressed the Senate on the urgent need for immediate action on this emergency legislation. I sought to point out why the land diversion approach was the only attainable solution to the immediate farm problem.

I also placed in the RECORD a comparative analysis of the Talmadge land diversion bill, the Dole flexible parity proposal, and the currently authorized farm programs. This analysis was prepared for our Committee by the Department of Agriculture and was received only late last week.

I hope that most Members of the Senate have taken the time to study this analysis carefully.

At this time, I only wish to summarize quickly the compelling reasons why the land diversion bill is the only attainable means of providing immediate help to farmers.

First, it would result in an increase of more than $7.5 billion in returns to producers of wheat, feed grains, upland cotton, and soybeans over cash production costs on this year's crops.

Second, by making half of the payment at the time of signup, the diversion program would put $2.1 billion into farmers hands almost immediately. The Department of Agriculture has assured me that it could administer the additional set-aside program at once.

Third, within the 1-year life of the program, the existing huge commodity surpluses would be brought down to manageable levels. According to USDA estimates, the Talmadge bill would reduce carry-overs as follows:

Wheat from 1.21 million bushels to 800 million bushels.

Corn from 1.132 million bushels to 590 million bushels.

Upland cotton from 5.7 million bales to 3.7 million bales.

The soybean carryover actually would increase under my bill, from 215 million bushels to 268 million bushels. But this prospective increase would be about 100 million bushels less than is now anticipated under current programs.

Fourth, with the prospect of smaller

supplies, market prices would increase under the land diversion program.

The minimum price objectives of the bill are: $3.50 per bushel for wheat; $2.50 per bushel for corn; $0.60 per pound for cotton, and $6.00 per bushel for soybeans.

While these price objectives are not as high as many producers and I might wish, they are realistic. More important, they are achievable under this bill.

Fifth, paid land diversion is the most cost-effective means of achieving immediate price and income relief for farmers. Budget outlays for fiscal years 1978 and 1979 would be $6.742 million under this bill, a reduction of $90 million in current program costs for the 2-year period.

Mr. President, the land diversion bill as originally introduced would have authorized the Secretary of Agriculture to enter contracts on a basis of bids by farmers as an optional method of determining participation in the program. I want to emphasize that this provision has been stricken from the bill. Instead, the Secretary is directed to offer diversion payments on a basis that will be "fair and reasonable" to all producers. The Department has advised me that the bid system will not be used if H.R. 6782 becomes law.

Furthermore, it is my understanding, as the bill's author, and the committee's intent that the Secretary shall administer the program in such a way that every farmer will be guaranteed a fair and equal opportunity to participate.

I wish to allay any fears that large farmers will have any advantage over small producers in participating in the program.

While the Secretary would have latitude in arriving at payment rates, it is anticipated that payments for the various commodities would be based on a rate of return on par with what the diverted acreage might have been expected to produce if it had been planted to the given commodity.

Mr. President, the Department of Agriculture provided the committee with a range of land diversion payments that it feels would be necessary to set aside the required 31 million acres.

I ask unanimous consent that a table showing this range be printed in the RECORD at this point of my remarks:

There being no objection, the table was ordered to be printed in the RECORD, as follows:

RANGE OF LAND DIVERSION PAYMENT RATES TO OBTAIN DIVERSION UNDER TALMADGE PROPOSAL

Commodity	Program yield per acre	Payment rates	
		Per unit	Per acre
Corn (bushels)	90.0	$1.00–$1.50	$90–$135
Sorghum (bushels)	54.5	.75– 1.25	40– 68
Barley (bushels)	44.5	.60– 1.10	26– 50
Soybeans (bushels)	28.0	3.00– 4.00	84– 112
Cotton (pounds)	500.0	.14– .20	70– 100
Wheat (bushels)	30.9	1.50– 2.00	[1] 46–[1] 62

[1] An additional cost of $25 to $35 per acre would be required to divert winter wheat because of costs already incurred.

Mr. TALMADGE. Mr. President, I have spoken thus far about what can be attained and accomplished through the enactment of my land diversion bill. Now let us consider some of the consequences if the Talmadge bill is not enacted.

First, there would be no immediate payments to farmers. The administration could, under the 1978 act, implement a paid land diversion program, but it has declined to do so.

Thus, unless my emergency bill is enacted, farmers will be denied $4.2 billion in payments, half of which could begin flowing into the Nation's farm communities next month.

Second, unless a paid diversion program is implemented, the surpluses of grains and cotton that are overhanging the market and depressing prices would not be appreciably reduced and in some cases would even be increased.

According to USDA projections, the corn carryover of 1.132 million bushels will increase under the current program to 1.250 billion bushels. As I stated earlier, the current carryover would be reduced to 590 billion bushels in 1978–79 under my proposal.

In the case of wheat, the present carryover of 1.210 billion bushels will be reduced nominally under current programs, to 1.105 billion bushels. Under my bill, the carryover would shrink to 800 million bushels.

The present upland cotton carryover of 5.7 million bales would be reduced to 5.1 million bales under current programs. But under my bill the cotton carryover would be reduced to 3.7 million bales.

Third, without the reductions in projections that would occur under my bill, farm prices on this year's crops will remain weak.

The Department of Agriculture projects that corn prices this year will average $2.10 per bushel under current programs. The projected minimum price under my bill is $2.50 per bushel.

Cotton prices under the existing program are expected to average $0.53 per pound this year. Under my bill, cotton prices are expected to rise to $0.60 per pound on the 1978 crops.

Soybean prices are projected to fall to an average of $5 per bushel under the current program. By contrast, soybean prices are projected to be $6 per bushel if my bill is enacted.

Finally, if current programs are not changed, producers of wheat, feed grains, cotton and soybeans will incur a loss of $411 million on this year's crops, in contrast to an increase in return of $7.532 billion if my bill is enacted.

Mr. President, what this all boils down to is that the farm crisis that has ruined many farmers and frustrated all farmers will get worse instead of better.

Farmer unrest and discontent will not subside, but will become even more intense.

Mr. President, the Senate has a clear responsibility to approve emergency farm legislation today. The bill I offer will provide immediate financial assistance to farmers and restore stability to American agriculture.

I believe the farmers of this country have waited long enough.

What they want now is action.

The Senate and the House of Representatives can provide farmers a solution by sending this emergency farm bill to the White House before the Easter recess.

Mr. President, I yield the floor.

I am sure the distinguished ranking minority member desires to make a statement at this time.

The PRESIDING OFFICER. The Senator from Kansas (Mr. DOLE).

Mr. DOLE. Mr. President, first, I thank the distinguished Senator from Georgia, the chairman of our committee. I point out at the outset that we would not be in this Chamber today acting on legislation if it were not for the leadership of the distinguished Senator from Georgia, a longtime friend of the farmer. He has indicated that again, because without the chairman's approval, we would not have had hearings in the first place; and without those hearings, we would not be here, trying to make some determination on farm legislation.

I thank the distinguished Senator from Georgia for his able statement which sums up concisely the economic difficulties facing American agriculture at this time. I also thank the Senator for his effective and responsive leadership as chairman of the Committee on Agriculture, Nutrition, and Forestry. He has worked long and hard for the farmers of this Nation.

As I look around the Chamber, I find those Senators present who have a very sincere interest in agriculture, a bipartisan interest in agriculture. That is the way our committee operates and functions, and we hope that is the way it will function during this debate today.

There is no question about the facts as outlined by the chairman. As I have said many times, we have had a three-stage program.

The first stage was when the American farmers, because they were frustrated and because they were suffering from economic problems, took to their tractors, and in other ways tried to alert the American people to their problems. That effort was very successful.

The second stage was the fact that many farmers came to Washington. Many farmers discussed their problems with Secretary Bergland and some with the President of the United States. This was the second stage—telling the administration about their problems.

Finally, came the legislative approach, and that is our responsibility, as legislators. Here, again, the American farmers, from all across the country, whether from Oregon, Texas, Kansas, Georgia, Arkansas, Nebraska, or wherever, have indicated to us the need for additional legislation.

We are now in the process of completing the third stage, so far as the Senate is concerned, because sometime today, a bill will pass the Senate and will be on its way to the House, where we hope we can have some very quick action.

FOOD AND AGRICULTURE ACT PROVIDES TOOLS

Last year, during deliberations on the omnibus farm bill, the Agriculture Committee received testimony from more than 250 witnesses representing every

sector of the food and natural fiber industries. After 26 days of hearings, and another 9 days of markup sessions, many of which began at 8 a.m., the committee produced a farm bill which remained substantially intact when the President signed it on September 29, 1977.

The Food and Agriculture Act of 1977 does not answer all questions or solve all problems that confront the Nation's farmers and ranchers. But this act does provide the tools to respond adequately to the present farm crisis.

The Food and Agriculture Act of 1977 provides authority to the Secretary of Agriculture to:

Increase loan levels for most basic commodities;

Provide better terms to increase participation in the farmer-held grain storage program;

Provide financial incentives for additional acreage set-asides or land retirement.

Despite repeated urgings by Chairman TALMADGE and other Members, including the Senator from Kansas, the administration has declined to use the tools it now has to take constructive steps toward resolving this emergency.

So we were faced with our responsibility to pass new legislation.

NOW IS THE TIME FOR ACTION

Since the administration has not voluntarily provided adequate price supports, or established effective acreage controls, the Congress must take the initiative—and do so at once.

Mr. President, time has now run out.

Preparations for spring planting are underway all across the Nation. In the Deep South, farmers are already planting cotton. In my State of Kansas, and throughout the southern plains, the winter wheat crop is already in the ground, and will soon be ready for harvest. We must act now in order to curtail overproduction and bring supplies of farm commodities into balance with demand.

FARM CRISIS SPREADING

The farm situation is the worst since the Great Depression. Farm debt has increased 63 percent in the last 5 years. In 1974 it was $74 billion; by 1977 it had increased to $119 billion.

In terms of current dollars, farm income declined from $33 billion in 1973 to only about $20 billion in 1977—just 4 years later. The economic problems of farmers are spreading to other agribusiness enterprises such as farm machinery and farm supply dealers and manufacturers—and it will spread even further. The nonfarm economy cannot long escape the effects to the disastrous farm situation.

The plight of the American farmer has resulted in increasing frustration as production costs have continued to rise. Farmers have called their deteriorating economic situation to the attention of the administration, Congress, and the American public, as I have indicated before, in rather dramatic fashion since the first "tractorcade" in late 1977.

COMMITTEE ACTION

Recognizing that emergency farm legislation is needed—and needed at once—the Agriculture Committee reported two emergency farm bills on Monday and Wednesday of last week. The first bill, H.R. 6782, is before us now. The second bill, S. 2481, will also be considered. Following these remarks, I will offer the germane portions of S. 2481, as an amendment to H.R. 6782.

THE NEED TO CURTAIL OVERPRODUCTION

Both of the emergency farm bills, H.R. 6782 and S. 2481, are aimed at achieving the same basic objective bringing supplies into line with demand. These bills represent alternative methods of curtailing overproduction of the 1978 crop, and restoring a measure of economic stability to our Nation's depressed farm sector. Every member of the Agriculture Committee shares this objective. The only question is which bill, H.R. 6782 or S. 2481, offers the best means of accomplishing our common objective.

Ever since the post-World War I era, the problem of farm surpluses has been a major dilemma confronting farm policymakers. As in other sectors of the economy, prices are a function of supplies. Oversupply is the result of excessive acreage devoted to production while world demand is slack. The only way to get back into a more desirable supply-demand balance is to reduce planted acreage and, therefore, production.

CARRYOVER STOCKS

Let us look at the carryover stocks before we make a judgment. Let us look at the statistics relating to the commodity supply situation for wheat, corn, and cotton. In wheat, our carryover stocks now stand at about 1.2 billion bushels. But despite these vast supplies, the Department of Agriculture estimates that wheat farmers will plant as many as 66 million acres in crop year 1978.

In corn, our carryover stocks now stand at about 1.1 billion bushels. Nevertheless, planting intentions by corn producers this spring are estimated at a whopping 81 million acres.

The cotton outlook is just as bad Stocks of cotton now total about 5.8 million bales, but spring planting will likely remain at a high level of 12.6 million acres.

You do not need a Ph. D. in agricultural economics to conclude that these statistics mean a continuation of depressed prices for wheat, feed grain, and cotton. It is equally apparent that the existing acreage set-aside programs for wheat and feed grains has proven totally ineffective.

FEATURES OF THE PAID SET-ASIDE PROGRAM

This critical problem of oversupply is at the root of the present farm crisis, and it is this problem which H.R. 6782 and S. 2481 both attempt to resolve.

The Senator from Georgia has described in detail the provisions of H.R. 6782, which he introduced on March 8 under the title, "Emergency Agriculture Act of 1978."

This bill was cosponsored by this Senator from Kansas and by seven or eight other Senators on the committee and a total of 20-some Senators so it has broad support.

Let me summarize the key features. This legislation would require the Secretary of Agriculture to implement immediately a land retirement program under which farmers will be paid to withhold from production cropland that otherwise would be harvested or planted in wheat, corn, grain sorghum, barley, cotton, and soybeans.

The bill would provide for the retirement through a 1-year paid set-aside of not less than 31 million acres with total payments estimated at $2.1 billion based on a per acre average of $75. The set-aside payments would be largely offset by reduced deficiency payments, and the cost to taxpayers could prove minimal, and in fact, the Senator pointed out, it might even be a net plus.

In the case of wheat and feed grains, farmers would be required to make additional set asides of acreage over and above those already announced in order to qualify. They would then be eligible for payments on the additional set-aside acres.

PROS AND CONS OF H.R. 6782

This emergency diversion program mandated in H.R. 6782 has several beneficial features.

By retiring a minimum of 31 million acres of cropland, crop production will begin to fall back into balance with demand, and commodity prices will respond immediately and rise to more reasonable levels.

Since the bill provides that one-half of a participating farmer's set-aside payment will be made as soon as the contract is signed, it will put urgently needed dollars in the pockets of farmers.

Finally, this temporary emergency measure is not expected to cost the taxpayers any more money than would be spent under existing programs.

These are the strong points of H.R. 6782. But on the opposite side of the ledger, there are some who have reservations.

RETURN TO SOIL BANK

In the first instance, this emergency land retirement program is based on the old soil bank concept of land retirement payments. Many Senators may remember the soil bank, which was a key feature of national farm policy during the decade of the 1950's and 1960's.

The soil bank program was the land retirement program which received so much bad publicity. Critics said that it made no sense to pay farmers not to farm. It was a difficult criticism to refute—even by those who understood the need for production controls.

FLEXIBILITY IS LACKING

There are other concerns with H.R. 6782 in that it lacks flexibility in application and imposes a standard, uniform program on farmers who produce under vastly differing conditions and who have vastly differing needs.

It is hoped there may be an amendment adopted that would provide some flexibility. The amendment that the Senator from Kansas hopes to offer adds a title II incorporating the flexible parity provisions of my bill, S. 2481, as reported by the Committee on Agriculture, Nutrition, and Forestry.

I wish to explain that farmers will not benefit under both programs from

the same set-aside acreage. You cannot have it both ways. You cannot participate in both programs. Each one of the problems inherent in H.R. 6782 is addressed and resolved, I believe, in S. 2481.

It seems to me that S. 2481 is an appropriate addition to H.R. 6782 to address these concerns.

It also seems to the Senator from Kansas that by sending to the conference with the House of Representatives both concepts, the concept introduced by Senator TALMADGE and 20 others, and the concept introduced by the Senator from Kansas and 21 others, we will have a package that I think can result in sound legislation that will bring immediate help to the American farmer.

However, my amendment will add this needed flexibility.

My amendment to H.R. 6782 adds a title II incorporating the flexible parity provisions of my bill, S. 2481, as reported by the Senate Committee on Agriculture, Nutrition, and Forestry.

I wish to explain that farmers will not benefit under both programs from the same set-aside acre.

NEED TO SUPPORT BOTH BILLS

Each one of the problems inherent in H.R. 6782 is addressed and resolved in S. 2481, the Flexible Parity Act of 1978. I believe that S. 2481 is the appropriate addition to H.R. 6782 to address these concerns.

FREEDOM OF CHOICE FOR FARMERS

During 11 days of hearings in late February and March 1978, before the Committee on Agriculture, Nutrition, and Forestry, testimony was received from approximately 200 witnesses representing every major commodity and all regions of the Nation. A persistent theme throughout the hearings was the need to provide flexibility and maximize the choices available to producers in complying with any future system of price supports and production controls. Producers want and need the freedom to make rational production decisions reflecting their current circumstances and capabilities. This freedom ought to extend into the area of price supports and production controls in recognition of the infinite complexity of American agriculture today.

In the past, our national farm programs, however, effective in providing a basic level of support, tended to remove the decisionmaking function from hundreds of thousands of individual farmers and ranchers, and concentrated decisionmaking in Washington, D.C. Any future farm program ought to continue to provide a basic level of price stability, yet leave decisions and production choices where they belong—with individual farmers and ranchers.

WHAT S. 2481 DOES

Mr. President, I wish to state very briefly what S. 2481 does. It is just a little different approach, I might say, without reference to what may be written in front of me, to the very fine effort by the chairman of our committee, Senator TALMADGE. It is a little different concept. Some have reservations about S. 2481. I think it is fair to say that there are some who think it will not work.

My bill achieves land diversion for the 1978 crop year through a system of incentives in the form of higher target prices as farmers voluntarily increase their set-aside acreage in order to bring production in line with demand. This freedom of choice will enable farmers whose costs of production require higher target prices to achieve the needed level by increasing their set-aside acres up to 50 percent of their planted acreage for either wheat or feed grains. In the case of upland cotton, the bill provides a voluntary set-aside of 20 percent for a target price of 60 cents per pound.

Some would think it may be too costly. There are some who are not certain because it is a new concept, and certainly the Senator from Kansas understands that questions will be raised and questions should be answered, and that they may be valid questions. There may be flaws in the concept.

But it seems to me that what appeals to the American farmer in an incentive program based on the target price system which, in effect, permits the market price to rise and the farmer to receive his profit. That is really what he wants: a profit from the market place.

We are going to see some figures by the Congressional Budget Office on the cost, and I am certain the Senator from Oklahoma is going to stress those in great detail. But I would say in advance to the Senator from Oklahoma that those figures reflect a market price which is less than the market price today, and I suggest if the concept that was worked out by the distinguished Senator from South Carolina (Mr. THURMOND) and others, a flexible parity concept, is adopted, we will see a higher market price, this means that we are going to see a very small deficiency payment, and the CBO estimates of $1.5 billion are going to be, if anything, zero.

I will discuss that later on when the amendment is being debated. But it is obvious if you want to make the program sound bad under our concept you estimate on the basis of a very low market price, and that is just what they have done; that is just what has happened in every instance. They try to make it look like a very expensive program, and it is not an expensive program. It is geared to the marketplace, and if I have learned anything from the farmers in the last 6 to 8 weeks it is that they want to get their profit from the marketplace.

So all we do in applying the flexible parity concept is say to the American farmer of wheat, of feed grains and, to a certain extent, of cotton:

The more you reduce your acreage, the more you set aside your production: the higher the target price.

That is not a Government payment, that is the target price, the theory being, of course, that the market price will rise once we set aside acreage. The same theory inherent in the bill introduced by Senator TALMADGE and others. The flexible parity bill is going to have an effect on the market price just as the Talmadge bill will have.

The day the Talmadge bill passed the market rose the limit; the day S. 2481 was reported, the market rose as well. So flexible parity legislation has an impact on the market.

Now, in supporting S. 2481, the flexible parity concept, we say to the farmer:

You are not going to get any payment at all or any higher target price for the first 20 percent. Take wheat. Only if you set aside additional acres will you get a higher target price.

A wheat grower under my bill would be able to freely choose voluntarily the target price level for his crop in accordance with the following schedule:

If the set-aside is:
20 per centum, the established (target) price shall be $3.00 per bushel;
25 per centum, the established (target) price shall be $3.25 per bushel;
30 per centum, the established (target) price shall be $3.50 per bushel;
35 per centum, the established (target) price shall be $4.00 per bushel,
40 per centum, the established (target) price shall be $4.25 per bushel;
45 per centum, the established (target) price shall be $4.50 per bushel;
50 per centum, the established (target) price shall be $5.04 per bushel.

At 50 percent you would get the established target price, which would be up to full parity. That is why it is called the Flexible Parity Act. It does not mean there is going to be a payment to every farmer on every bushel of $1.5 or $2 per bushel.

The same is true with corn. A corn grower would exercise freedom-of-choice in a similar manner in accordance with the schedule below:

If the set-aside is:
10 per centum, the established (target) price shall be $2.10 per bushel;
20 per centum, the established (target) price shall be $2.25 per bushel;
25 per centum, the established (target) price shall be $2.45 per bushel;
30 per centum, the established (target) price shall be $2.65 per bushel;
35 per centum, the established (target) price shall be $2.85 per bushel;
40 per centum, the established (target) price shal be $3.05 per bushel;
45 per centum, the established (target) price shall be $3.25 per bushel;
50 per centum, the established (target) price shall be $3.45 per bushel;

It should be made very clear that the farmer has to make a sacrifice. He has to set aside part of his productive capacity in order to receive this higher target price. I think the concept makes a great deal of sense.

The established target prices for grain sorghum, and if designated by the Secretary of Agriculture, oats, and barley shall be at levels appropriate with their relationship to corn.

An amendment to my bill limits producers of cotton to only one voluntary set-aside option—a 20-percent set-aside at an established target price of 60 cents per pound.

It is my understanding that the distinguished Senator from South Carolina (Mr. THURMOND), and the Senator from Texas (Mr. TOWER), and the distin-

guished Senator from Louisiana (Mr. LONG) may want to change that provision back to its original form.

An amendment to S. 2481 proposed by the distinguished Senator from Montana (Mr. MELCHER) was adopted in our committee and provides a loan level in 1978 of $2.85 per bushel for wheat and $2.40 per bushel for corn. This is up from $2.25 for wheat and $2 for corn under the Agriculture Act of 1977, as administered by Secretary Bergland.

Mr. President, I support the flexible parity approach proposed in S. 2481 because I trust the judgments of farmers to adjust production of crops based on the market signals that they receive more than I do the bureaucrats who may think they can fine tune the farm economy from Washington.

At the same time, however, I believe that H.R. 6782 is also capable of providing timely and effective assistance to thousands of depression-stricken farmers.

The distinguished Senator from Georgia said it all. He said that time is of the essence; we must act now. The crisis is real and it is here, it is now, it is immediate. I urge my colleagues to support H.R. 6782, as amended.

I ask the support of my colleagues in the passage of this legislation which will give individual farmers the opportunity to exercise freedom of choice in bringing about needed adjustments in American agriculture.

At the appropriate time I would like to have considered an amendment which I send to the desk and will withhold.

Mr. TALMADGE. Mr. President, will the Senator yield momentarily?

Mr. BELLMON. Mr. President, will the Senator yield for a unanimous-consent request?

Mr. TALMADGE. May I get this committee amendment agreed to first? Mr. President, I ask unanimous consent that the amendment of the Committee on Agriculture, Nutrition and Forestry to H.R. 6782 be agreed to, and the bill, as amended, be considered as original text for the purpose of further amendment.

The PRESIDING OFFICER (Mr. CLARK). Is there objection? The Chair hears none and it is so ordered.

Mr. TALMADGE. I do not know who has the floor.

The PRESIDING OFFICER. Who yields time?

Mr. BELLMON. Mr. President, will the Senator from Kansas yield for a unanimous-consent request?

Mr. DOLE. I yield.

Mr. BELLMON. Mr. President, I ask unanimous consent that Brad Gungoll of my staff, Bill Stringer and Paul Cartter of the Budget Committee staff, be granted floor privileges during the consideration and votes on this bill.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. CURTIS. Mr. President, will the Senator yield for a unanimous-consent request?

Mr. DOLE. I yield.

Mr. CURTIS. I thank my distinguished friend. Mr. President, I ask unanimous consent that Belinda Neilson of my staff be granted the privileges of the floor during the deliberation on these two bills.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. DOLE. I yield to the distinguished Senator from South Carolina who has other pressing business.

Mr. BELLMON. Mr. President, will the Senator yield to the Senator from Oklahoma for about 5 minutes.

Mr. DOLE. I yield to the distinguished Senator from Oklahoma.

Mr. BELLMON. Mr. President, the farmers of this country are facing a disastrous economic situation, the past 3 years have demonstrated that all sectors of agriculture are able to get sick at the same time. In spite of the overwhelming evidence of economic disaster facing American agriculture the administration has refused to use the authority Congress provided in the 1977 farm bill to strengthen prices by bringing supply and demand into balance.

Since 1974, the price of wheat has fallen from a season average of $4.09 to a low of $2.03 in 1977. This is a reduction of more than 50 percent, and at the same time costs of production were going up. Corn prices have fallen from a season average of $3.03 in 1974 to a low of $1.60 in 1977. Cattle prices have slipped from an average value of $321 per head in 1974 to $206 in 1977, with prices much lower than this in the interim. Beef prices are beginning to strengthen. This welcome news has been greeted by a high administration official with the threat of expanded imports of foreign beef.

During this same period, farm real estate debt has risen more than $15 billion. Most of this increase is due to borrowing by farmers against the value of their land, to pay production expenses that have been incurred and that cannot be paid from income from the sale of commodities. The result of this inverse relationship between costs and prices is that farmers are facing bankruptcies at 4 to 5 times the normal rate, especially in the High Plains area of the Middle West. The impact of this situation has been felt most by our young farmers. These young producers are the future of agriculture in this country, and the whole country has a stake in keeping them in agriculture. This situation creates a dim view of the Nation's ability to fulfill future food production needs.

Most young farmers do not have the resources built up over years of farming to survive heavy losses, and are being forced to sell out and quit. The country will need these efficient young food producers in the very near future.

The agricultural policy which this Nation has chosen to pursue is largely to blame for the intolerable markets farmers are facing. Past administrations have encouraged "all-out" production at times of high prices and then greeted farmers who have responded to their urging with embargoes and price controls. The present administration has failed to achieve an aggressive agricultural export policy. In addition, tools in the 1977 farm bill have not been used to strengthen farm income. The USDA seems oblivious to the problems of farmers and will not act to help producers at this time of crisis. The President and Secretary Bergland appear to have allowed the Departments of State and Treasury and the Office of Management and Budget to determine agricultural policy rather than the USDA, which supposedly has expertise in the area.

Mr. President, our people do not understand that one farmer cannot affect the price situation he faces. Neither can segmented groups have an appreciable effect. It takes leadership from the administration to bring supply and demand into balance and strengthen farm prices. This leadership has been lacking. This absence has created a situation that requires immediate administrative action or further legislation. The farmers of this country have called for action, and the administration has failed to act. Unless this current administration's stonewalling policy changes at once, Congress has no choice but to provide funds to make farmers able to get through this depressed state.

However, we as Members of Congress must use good judgment, caution, and restraint to insure that we do not overreact and help farmers to the extent that we destroy them in later years. Overreaction by Congress which results in suplies becoming overliquidated can be just as disastrous as previous policies which created oversupply. If supplies reach critically short levels, then producers face the threat of embargoes, price controls, and consumer boycotts. These actions can result in loss of foreign markets and would again send shock waves of disastrous proportions through the agricultural sector.

The present farm situation could have been prevented. We appropriate more than $70 million annually to the USDA to assemble information to show farmers what situation they face. However, little of this information ever reaches farmers and when it does it is generally not in usable form. Evidently, the information which the USDA has assembled is not in usable form for USDA either. Perhaps this explains why the administration has been so reluctant to act. Or perhaps the Department of Agriculture is not to blame. Perhaps the Carter administration has decided that agriculture is too important to be left with agriculturists. Regardless of the reason for this inaction, I have joined Senator TALMADGE as a cosponsor of his bill to force the administration to do what they have failed to do. That is, to use tools available to strengthen farmer income. The Talmadge proposal may not be the only way to accomplish these surplus reductions. However, I feel that it is the best and the most responsible action Congress can take at this time, if in fact we must act in the face of the administration not meeting its responsibility.

Mr. President, I do not like to see Congress get into the business of administering programs on a day-to-day basis. The executive branch is capable of performing administrative functions in a more orderly fashion than can the legislative branch. But because of lack of action by the administration, Congress has no choice at this time. It is unfortu-

nate that the U.S. Department of Agriculture, which is responsible for action to strengthen farm income, is not being used; but since the President has apparently used his authority to prevent the Secretary from using the provisions of the farm bill to improve life on the farm, I believe Congress in this case is going to have to do the administration's job and pass the emergency legislation that is before us at this time.

Mr. President, I yield the floor.

The PRESIDING OFFICER. Who yields time?

Mr. DOLE. I believe the Senator from South Dakota (Mr. McGOVERN) had wanted to be recognized.

The PRESIDING OFFICER. Who yields time?

Mr. TALMADGE. Mr. President, I yield time to the distinguished Senator from South Dakota to call up an amendment.

Mr. McGOVERN. Mr. President, first I I ask unanimous consent that Bob Reynolds of Senator WALLOP's staff be accorded the privilege of the floor during the remainder of the debate on this

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. McGOVERN. Mr. President, today is the first day of spring. I cannot think of a more appropriate action for the U.S. Senate to take on this opening day of the spring season than to pass a strong farm bill, designed to meet the serious agricultural crisis that all of us on this floor are aware of.

I commend the chairman of our committee (Mr. TALMADGE) for making it possible for us to be here in the Senate Chamber today, just 60 days after the opening of this session of Congress, prepared to act on important farm legislation. It has been my privilege to serve on the Committee on Agriculture, Nutrition, and Forestry at the side of Senator TALMADGE for some 15 years. I am beginning my 16th year in that role in 1978, and I know that he is dedicated to the proposition that we must have a strong program for American agriculture.

There may be some honest disagreements among farmers, among Senators, and among our fellow citizens as to the most practical way to approach the problems that face us in rural America today, but I think it is fair to say that the chairman of the committee has worked diligently over the last 2 months, and indeed throughout his public career, to strengthen the hand and the position of the American farmer.

I commend also Senator DOLE, the ranking minority member of our committee, and the other members of the committee for the bipartisan spirit in which these hearings and deliberations and the effort here today have been conducted.

I also wish to express my admiration for the effectiveness of the American agricultural movement, these farmers who have sprung up from all over the United States and have come here to the Nation's Capitol to present the case of American agriculture to those of us in the Congress of the United States. When this effort first began, as I told my colleagues on the committee, I was frankly skeptical as to how to win the broad kind of public support that was necessary before we could do what some of us wanted to do last year to strengthen the terms of the farm legislation so that we could have avoided the crisis that faces us in 1978.

But I have been encouraged, not only by the reaction of Members of Congress to these citizens of ours from the farm States who have been in our midst in the last few months, but also by the reaction of the American public.

I placed in the CONGRESSIONAL RECORD just a month ago, on February 20, the results of a public opinion poll conducted nationwide by one of the most respected polling organizations, the Lou Harris survey, in which Americans were scientifically selected to represent every shade of American life; and on the basis of that poll, we discovered by a margin of 80 to 13—80 percent to 13 percent—the overwhelming majority of Americans are in sympathy with the farmers who have taken to their tractors to protest falling farm income.

The news account of this poll indicates that the public, by a 54 percent to 36 percent majority, would be willing even to have food prices rise significantly, in order to give farmers their partity goals. By margins of more than 5 to 1, the American public supports the basic demand of farmers, which is to raise the prices of the crops they sell so that they would be based on 100 percent of parity.

The survey experts who conducted this public opinion study indicate that a significant part of the reason why the American public feels deep sympathy for the farmers is the fact that they do not blame the American farmer for the basic increases in food prices that have taken place in recent years. Quoting now from this article, by a lopsided 87 to 4 percent the majority of the American people continue to agree with the charge of the farm protest leaders that food middlemen rather than the farmers are the ones who are making most of the profits from food.

Mr. President, I took the time to make these points about public opinion because I believe our colleagues in the Congress ought to understand that we are legislating in a different environment today than was the case even a year ago; that the American people are aware of the vital role that agriculture plays in the life of this country, and they are aware of the seriousness of this crisis.

I am not going to belabor the points which have already been made by Senator TALMADGE, Senator DOLE, and others, other than to say that it is impossible for farmers to produce wheat that costs in excess of $3 a bushel to produce and then sell it for somewhere around $2.25 a bushel. That is an absolute formula for bankruptcy. It does not make any difference whether a farmer has a half-million dollars in assets, $100,000, $1 million, or whatever it is, if on that asset, on that land, that machinery and that property, he is selling a product at a per bushel loss. Obviously he is going broke and he is jeopardizing the banks and businesses in his community who depend on his solvency.

Beyond this, we are jeopardizing the enormous contribution that American agriculture makes to our balance of payments situation. We know about the decline of the American dollar. We know about the deepening crisis in our balance of payments. It is only our agricultural production and our agricultural exports which are keeping us in the international ball game at all.

AMENDMENT NO. 1735, AS MODIFIED

(Purpose: To increase loan rates and established prices for the 1978 crops of wheat and corn, increase the established price and loan rate for the 1978 crop of upland cotton, and increase Public Law 480 activities in fiscal year 1979.)

Mr. McGOVERN. Mr. President, at the appropriate point I also have an amendment I want to call up. I believe the amendment is now at the desk.

I would like to ask that it be reported at this time.

The PRESIDING OFFICER. The amendment will be stated.

The legislative clerk read as follows:

The Senator from South Dakota (Mr. McGOVERN) proposes an amendment numbered 1735.

Mr. McGOVERN. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered. The amendment is as follows:

On page 2, line 20, insert "LOAN RATES, TARGET PRICES, AND" immediately before "ADDITIONAL".

On page 2, line 21, strike out "UPLAND COTTON, AND SOY-" and insert in lieu thereof "AND UPLAND COTTON, AND SET-ASIDE PROGRAM FOR SOY-".

On page 2, line 25, strike out "112 through 115" and insert in lieu thereof "112 through 118".

On page 2, immediately after line 25, insert the following:

"1978 WHEAT LOAN RATE AND TARGET PRICE

"SEC. 112. Notwithstanding any other provision of this Act—

"(a) The Secretary shall make make available to producers loans and purchases on the 1978 crop of wheat at a level not less than $2.80 per bushel.

"(b) The established price for the 1978 crop of wheat shall be $3.55 per bushel.".

On page 3, line 2, strike out "SEC. 112." and insert in lieu thereof "SEC. 113.".

On page 6, between lines 11 and 12, insert a new section as follows:

"1978 CORN LOAN RATE AND TARGET PRICE

"SEC. 114. Notwithstanding any other provision of this Act—

"(a) The Secretary shall make available to producers loans and purchases on the 1978 crop of corn at a level not less than $2.25 per bushel.

"(b) The established price for the 1978 crop of corn shall be $2.50 per bushel.".

On page 6, line 13, strike out "SEC. 113." and insert in lieu thereof "SEC.115.".

On page 9, between lines 19 and 20, insert a new section as follows:

"1978 UPLAND COTTON TARGET PRICE

"SEC. 116. Notwithstanding any other provision of this Act, the established price for the 1978 crop of upland cotton shall be 60 cents per pound.".

On page 9, line 22, strike out "SEC. 114." and insert in lieu thereof "SEC. 117.".

On page 13, line 2, strike out "SEC. 115." and insert in lieu thereof "SEC. 118.".

On page 20, immediately after line 17, insert a new section as follows:

"AMENDMENT TO PUBLIC LAW 480

"SEC. 6. Section 409 of the Agricultural Trade Development and Assistance Act of 1954 is amended by adding at the end thereof the following: "Notwithstanding any other provision of this Act—

"'(1) the minimum distribution amount under section 201(b) of this Act of one million six hundred thousand metric tons for fiscal year 1979 shall be increased by such tonnage, and

"'(2) financing during fiscal year 1979 of the purchase of United States agricultural commodities under agreements entered into under titles I and III of this Act shall be increased by such amount in excess of $800,000,000, as could be accomplished by an additional expenditure of $500,000,000. The total increase shall be apportioned between the title II minimum distribution amount increase and the titles I and III financing increase so as to reflect the comparative needs of the programs during fiscal year 1979.' ".

Mr. McGOVERN. I had intended in this amendment to offer one section which would have raised the authority under the Food for Peace program, Public Law 480, by a half billion dollars. That is something we very much need to do. However, I am advised that it is not germane under the parliamentary situation under which we are operating today. So I modify my amendment to strike that portion which has to do with Public Law 480.

The PRESIDING OFFICER. The amendment will be so modified.

Mr. McGOVERN. Mr. President, the remaining sections of this bill are based on my own conviction that we cannot rely on the vagaries and uncertainties of the market alone as a means of securing a fair price for our farmers. While I support the proposal offered by the chairman of our committee (Mr. TALMADGE), and I will support Senator DOLE's amendment to that bill, I do think that a third step is needed to give farmers some assurances beyond the uncertainties and the unpredictability of the marketplace.

I am still old fashioned enough to believe that there is room for a strong price support program and a strong target price system for American agriculture. At the appropriate point today I would like to offer the amendment which embraces roughly what I attempted to do last year at the time we were marking up basic farm legislation.

In short, it would accomplish the following things: It would raise the present target rates on wheat in the bill we passed last year, which is a 4-year bill, from $3 a bushel to $3.55, to not less than $3.55. It would raise the loan rate on wheat from the present level in the bill we are now operating under from $2.25 to $2.80 a bushel.

On corn, the present target price of $2.10 would move up, under my amendment, to $2.50. Corn loans would move from $2 to $2.25.

The target price on cotton would move from 52 cents a pound in existing legislation to 60 cents a pound, and the cotton loans from 44 cents to 50 cents a pound.

Mr. President, one modification in the amendment as printed would include the following: I ask unanimous consent that the minimum on cotton on the loan be raised to 50 cents in the amendment I have pending at the desk.

The PRESIDING OFFICER. The Senator is allowed to modify his amendment and it is so modified.

The amendment, as modified, is as follows:

On page 2, line 20, insert "LOAN RATES, TARGET PRICES, AND" immediately before "ADDITIONAL".

On page 2, line 21, strike out "UPLAND COTTON, AND SOY-" and insert in lieu thereof "AND UPLAND, AND SET-ASIDE PROGRAM FOR SOY-".

On page 2, line 25, strike out "112 through 115" and insert in lieu thereof "112 through 118".

On page 2, immediately after line 25, insert the following:

"'1978 WHEAT LOAN RATE AND TARGET PRICE

"'SEC. 112. Notwithstanding any other provision of this Act—

"'(a) The Secretary shall make available to producers loans and purchases on the 1978 crop of wheat at a level not less than $2.80 per bushel.

"'(b) The established price for the 1978 crop of wheat shall be $3.55 per bushel.

On page 3, line 2, strike out "SEC. 112." and insert in lieu thereof "SEC. 113.".

On page 6, between lines 11 and 12, insert a new section as follows:

"'1978 CORN LOAN RATE AND TARGET PRICE

"'SEC. 114. Notwithstanding any other provision of this Act—

"'(a) The Secretary shall make available to producers loans and purchases on the 1978 crop of corn at a level not less than $2.25 per bushel.

"'(b) The established price for the 1978 crop of corn shall be $2.50 per bushel.' ".

On page 6, line 13, strike out "SEC. 113." and insert in lieu thereof "SEC. 115".

On page 9, between lines 19 and 20, insert a new section as follows:

"'"1978 UPLAND COTTON LOAN RATE AND TARGET PRICE

"'"SEC. 116. Nothwithstanding any other provision of this Act—

"'"(a) The Secretary shall make available to cooperators nonrecourse loans on the 1978 crop of upland cotton at a level not less than 50 cents per pound.

"'"(b) The established price for the 1978 crop of upland cotton shall be 60 cents per pound." '.".

On page 9, line 22, strike out "SEC. 114." and insert in lieu thereof "SEC. 117.".

On page 13, line 2, strike out "SEC. 115." and insert in lieu thereof "SEC. 118.".

On page 20, immediately after line 17, insert a new section as follows:

Mr. TALMADGE. Will the Senator yield at this point?

Mr. McGOVERN. I yield.

Mr. TALMADGE. I have studied the amendment of the distinguished Senator from South Dakota, as has the distinguished minority manager, Senator DOLE. I agree that we need some improvement in these rates. We hope to achieve that in the marketplace by bringing supply in line with demand. If we can do that, the amendment proposed by the distinguished Senator from South Dakota will have a cost to the Government which will be very minimal. Senator DOLE and I are both agreeable to accepting it and taking it to conference.

Mr. DOLE. Will the Senator yield briefly to me?

Mr. McGOVERN. I yield.

Mr. DOLE. I agree with the remarks of the chairman and also, of course, the statement of the distinguished Senator from South Dakota.

As I understand, this would not do violence to an amendment the Senator from Kansas hopes to have accepted later. If it gets to conference, the total area we are trying to cover will be presented, and I assume at that point we could make some decision on which way we will finally go. But in any event, it seems to this Senator there should be an adjustment in target prices and an adjustment in loan rates, whether it is at the level set as the Senator from Kansas proposes or the Senator from South Dakota, or some other figure. I think it is a very constructive amendment.

I have no objection. I see Senator YOUNG is in the Chamber. He is the father of the target price concept.

Does the Senator have any objection to the amendment?

Mr. YOUNG. I appreciate the comment about me being the father of the target price system.

The target price does not raise the market price to a level to which consumers would object. It does provide higher level of income to what the farmer receives by giving a cash payment over the market price when the market price is low.

I have no objection to this amendment—I support it.

Mr. TALMADGE. If the Senator will yield further, I also want to pay tribute to the distinguished Senator from North Dakota for the concept of the target price, rather than to make loans so high as to preclude sales in international markets. We have seen agricultural exports increase from $7 billion annually to $24 billion in recent years. Were it not for our huge agricultural exports, this country would really be in a far worse situation on international trade than we are at this moment.

Mr. YOUNG. I appreciate the comments of the distinguished Senator. The target price concept wouldn't have been possible if he hadn't immediately seen the merit in it.

Mr. ALLEN. Will the Senator yield?

Mr. McGOVERN. I yield to the distinguished Senator from Alabama.

Mr. ALLEN. I thank the distinguished Senator for yielding. I would like to inquire about the established price for the 1978 crop of cotton. I note in the Senator's amendment that that is set at 60 cents per pound.

Mr. McGOVERN. That is correct.

Mr. ALLEN. The current market prices in future delivery months are up around 62 cents a pound right now.

I would say that this figure would be entirely inadequate for cotton farming. I know the argument is made that if the price gets up to the parity price, around 84 cents, mills might shift over to synthetics. But I question whether we are dealing fairly with the cotton farmer as compared with the corn farmer and the wheat farmer and, hopefully, the soybean farmer when we set the price, the established price, at 60 cents a pound, because that contains practically no profit. With practically no profit for the

farmer and escalating costs, by the time the 1978 crop is brought in, I daresay 60 cents a pound would result in a loss to the cotton farmer.

I know the distinguished chairman has indicated that he is going to accept this amendment, but I cannot stand idly by and see a 60-cent figure for cotton pass in the Senate when we are supposed to be giving relief to all farmers. The cotton farmers of Alabama have been hard hit.

I respectfully request the distinguished Senator from South Dakota seriously to consider setting some figure between the 60-cent and the 84-cent figure.

The PRESIDING OFFICER. The Senator's 2 minutes have expired.

Mr. TALMADGE. I yield 2 additional minutes to the Senator from South Dakota.

First, may I yield myself some time?

What would the distinguished Senator from Alabama suggest at this point? All these matters will be in conference. Of course, the Senator from Alabama is fully aware of the fact that all synthetic fibers sell at about 55 cents a pound. If prices get too high, they price themselves out of the market. There will be no market domestically or internationally for cotton. I agree with the Senator from Alabama that we want the cotton farmers to have a fair price, but at the same time, we do not want to kill the market. We want to keep them in business.

Mr. ALLEN. Sixty cents a pound is not going to keep the Alabama cotton farmer in business. I hope the distinguished Senator from South Dakota will be willing to modify his amendment to set this at least at 70 cents.

Mr. McGOVERN. Mr. President, if the Senator will let me respond, I want to make clear, first of all, that a target price is not a ceiling. There is nothing in setting a target price on cotton at 60 cents or a wheat target at $3.55 that means that is a ceiling. That is a floor.

Mr. ALLEN. I understand that.

Mr. McGOVERN. I hope, personally, that with the kind of diversion that we are talking about here under the bill submitted by the chairman, prices will go well above the minimum targets that are set in the legislation. We do not produce much cotton in South Dakota. I would be more than happy to respond to cotton State Senators as to what they think is a fair target price.

I have discussed this with the Senator from Mississippi and other Senators, but if some modestly higher price—does the Senator from Alabama think the 70-cent range is in line with what we are doing on other basic commodities?

Mr. ALLEN. It would still be well below the approach to parity that is contained for the other crops.

The Senator says that by the set-aside provisions, the diversion provisions, prices are going up. That being true, why would the Senator object to a modest increase?

Mr. McGOVERN. I would not object to a modest increase.

Mr. ALLEN. I hope he will accept the 70-cent figure.

The distinguished chairman states it is in conference. Since the House has no provision whatsoever, then the 70-cent figure would not do violence to the concept of the bill. I hope that an agreement can be reached on the floor to set this figure at 70 cents.

Mr. EASTLAND. Will the Senator yield me 2 minutes?

Mr. McGOVERN. I yield to the Senator from Mississippi.

The PRESIDING OFFICER. Does the Senator from Georgia yield to the Senator from Mississippi?

Mr. TALMADGE. Yes, I yield 2 minutes to the distinguished Senator from Mississippi.

Mr. EASTLAND. Mr. President, I am as much interested in a sound cotton program as anyone. Cotton has to compete with synthetic fibers directly, and let me say now that cotton's share of the fiber market has decreased from 80 percent to around 35 percent because it was not competitive. Synthetic fibers are 54 cents a pound. Cotton is an industrial fiber that has to compete with it directly to stop this erosion of cotton's share of the market. I have seen, because of these matters, the Soviet Union become the leading cottongrower in the world. We have to compete with synthetic fibers.

Also, we have to compete in the export market. That would happen under 60 cents a pound. It is not a ceiling, it is a floor under the price. I hope we will not do something that will destroy the cotton industry. It will destroy it in 2 years.

Mr. BUMPERS. Will the Senator from Georgia yield for a question to him?

Mr. TALMADGE. I yield to the distinguished Senator from Arkansas.

Mr. BUMPERS. Mr. President, I wish to address a couple of questions to the distinguished chairman of the Committee on Agriculture.

No. 1: Is my understanding correct that the manager is prepared to accept the Dole bill? Is that a correct assumption?

Mr. TALMADGE. I have agreed to take it to conference. It is my judgment that the Dole bill has little chance of becoming a law, either by the House accepting, or by Presidential signature. The only way to get the Dole bill into conference is to accept it as an amendment to this bill.

Mr. BUMPERS. Will there be an up or down vote on that amendment?

Mr. TALMADGE. No, I am prepared to accept it by voice vote.

Mr. BUMPERS. Could the floor manager tell me approximately at what time that will occur.

Mr. TALMADGE. I am ready to accept it right now. But we have an amendment pending by the distinguished Senator from South Dakota, so it is not in order to consider the Dole amendment until we dispose of the amendment of the Senator from South Dakota.

Mr. ALLEN. If the distinguished chairman would yield, I would like respectfully to suggest that if we can agree on this 70-cent figure, that same concept he brought forward into the Dole bill as an amendment to the bill.

Mr. TALMADGE. I am willing to take it to conference, sir. May I say to the distinguishsed Senator from South Dakota and the distinguished Senator from Alabama, these matters will be considered in conference. The Senator from Alabama has served on many conferences with agriculture bills. He knows it is a give-and-take proposition.

Mr. ALLEN. Yes, sir.

Mr. TALMADGE. It has difficulties. I also point out that I share the views of the distinguished Senator from Mississippi.

Mr. ALLEN. I know the distinguished Senator does.

Mr. TALMADGE. I do not want to kill cotton.

Mr. ALLEN. I understand that.

Mr. BUMPERS. May I ask just one more question?

Mr. MUSKIE. Will the Senator yield?

Mr. ABOUREZK. Will the Senator yield?

Mr. TALMADGE. Mr. President, may we have order?

The PRESIDING OFFICER. The Senate will be in order. The Senator from Georgia has the floor.

Mr. BUMPERS. Could the distinguished floor manager tell me two things?

No. 1, how much land is it anticipated will be set aside under the Dole bill? How much will it cost, in all the crops listed therein, if the agriculture people in this country decided to set aside the full 50 percent in order to get 100 percent parity?

Finally, what effect would that have on consumer prices if that occurred?

Mr. TALMADGE. We had a good deal of testimony. I cannot answer it in a limited period of time. But under the Dole bill it was to cost the taxpayers an additional $1.5 billion more. The land retirement under the Dole bill would be a total of 14½ million acres under the Dole bill, as to present estimates, and about 30 million under mine.

Mr. BUMPERS. Those have to be estimates.

Mr. TALMADGE. Estimates.

Mr. BUMPERS. Out-of-hand estimates.

Mr. TALMADGE. The best estimates I can get.

Mr. BUMPERS. One of the calculations I made, based on today's wheat prices, which I assume would go up if 50 percent of all wheat in this country were set aside, roughly $2.75 as of this morning, and the set-aside figure of $5.04, 100 percent parity, if we cut production.

Last year we had a 2.2-billion-bushel wheat crop. If we set half aside, which would be 1.1 billion, and presumed the price remained the same, that alone would cost over $2 billion, would it not?

Mr. TALMADGE. That is possible. Of course, they hope to achieve that price in the marketplace.

Mr. BUMPERS. I understand. I think a certain portion will be, but it occurs to me these estimates just have to be——

Mr. TALMADGE. We hope to achieve it in the marketplace under the bill I have proposed and save the Government $90 million in the process.

The PRESIDING OFFICER. The Senate will be in order.

The Senator from Georgia has the floor.

Mr. ABOUREZK. Will the Senator yield?

Mr. TALMADGE. Our staff economist tells me that under the Dole bill it is estimated that 34 million acres of land would be retired, and, under the Talmadge bill, 61.8 million acres would be retired, but that includes the set-aside already mandated.

Several Senators addressed the Chair.

Mr. TALMADGE. The Senator from Maine has been seeking time.

Let me point out to my colleagues that under the unanimous-consent agreement we have only 2 hours to the side.

I would like, if I could, to disporse of these amendments and then yield for colloquies later.

But I yield now to the distinguished chairman of the Budget Committee.

Mr. MUSKIE. I thank the Senator from Georgia.

I simply rise at this moment to ascertain what the likely parliamentary situation is going to be. The unanimous-consent agreement provides for 4 hours to be equally divided on the Talmadge bill.

Mr. TALMADGE. That is right.

Mr. MUSKIE. To be followed by 4 hours to be equally divided on the Dole bill.

Mr. TALMADGE. That is correct.

Mr. MUSKIE. Now, I understand, contrary to my understanding at the time that unanimous-consent agreement was entered into, that the Dole bill will be offered as an amendment to the Talmadge bill. That will considerably shrink the time that I had expected would be available for these two very important issues because the Dole bill, in effect, will have to be debated the same time as the Talmadge bill within the constraints of a 4-hour rather than an 8-hour time limitation.

Then, in addition, I understand there will be a McGovern amendment offered, the existence of which I was unaware of yesterday, which also has serious budgetary as well as economic implications.

That, too, I understand will be offered in this 4-hour period on the Talmadge bill, and a combination of these three really restricts the time that we ought to have available to us to discuss these issues. They are difficult. They are urgent.

Mr. TALMADGE. I think we can get unanimous consent for further time.

Mr. MUSKIE. In what order does the floor manager expect these to arise?

Mr. TALMADGE. The McGovern amendment is pending at the present time. I understand subsequent to the McGovern amendment the Senator from Kansas desires to offer his amendment. That would be the next pending matter after the McGovern matter.

Mr. MUSKIE. There is one other matter that needs to be disposed of, a technicality, that is the question of the section 402 waivers. Implementation of our understanding on those requires that two amendments be offered, one to the Talmadge bill and one to the Dole bill, in order to eliminate provisions that would otherwise require a section 402 waiver.

That, I understand from staff, can be done toward the end of the consideration of the bills.

Mr. TALMADGE. Yes.

Mr. MUSKIE. And that is agreeable to me.

Mr. TALMADGE. Yes.

Mr. MUSKIE. I would reserve my comments on that until we can get to that point.

For the time being, I say to my good friend from Georgia that I would reserve my time.

Mr. TALMADGE. That is agreeable.

Before I yield to the junior Senator from South Dakota, may we complete action on the McGovern amendment?

Mr. ALLEN. I have an amendment that I hope will be agreed to.

The PRESIDING OFFICER. Who yields time?

Mr. TALMADGE. I have yielded 2 additional minutes to the Senator from South Dakota.

Mr. McGOVERN. Mr. President, after listening to the statements of the Senator from Alabama and the chairman's willingness to accept this amendment on the cotton target price, I would have no objection to going to conference with the 70-cent target price on cotton.

UP AMENDMENT NO. 1214

Mr. ALLEN. Mr. President, I have an amendment I would like to offer on behalf of myself and the distinguished Senator from South Carolina (Mr. THURMOND), which I send to the desk.

The PRESIDING OFFICER. The amendment will be stated.

The legislative clerk read as follows:

The Senator from Alabama (Mr. ALLEN), for himself and Mr. THURMOND, proposes unprinted amendment numbered 1214:

Amend pending amendment on page 2, line 21, strike 60 and insert 70.

The PRESIDING OFFICER. Who yields time?

Mr. MUSKIE. Mr. President, will the Senator yield?

Mr. TALMADGE. I yield 1 minute to the distinguished Senator.

Mr. MUSKIE. Do I understand we are on the verge of seeing the McGovern amendment accepted without further debate?

I would like to speak to the McGovern amendment as well as these others.

Mr. TALMADGE. The Senator will have that opportunity. How much time does the Senator want at this time?

Mr. MUSKIE. I would like to begin with 10 minutes. I am in a difficult position.

Mr. TALMADGE. Mr. President, I ask unanimous consent that the distinguished Senator from Maine may be allotted 10 minutes at this time without it being charged to either side.

Mr. ALLEN. Reserving the right to object, and I shall not object, is the distinguished Senator speaking on the amendment to the amendment?

Mr. MUSKIE. On the McGovern amendment.

Mr. ALLEN. Yes, but the Senator——

Mr. MUSKIE. Is there an amendment to the McGovern amendment now?

Mr. ALLEN. Yes. Does the Senator have an objection to the adoption of the amendment to the amendment?

Mr. MUSKIE. Will the Senator advise me of the nature of the amendment to the amendment?

These are coming out of the woodwork faster than I can keep track of them.

Mr. ALLEN. It changes the 60-cent floor for cotton to 70 cents.

Mr. MUSKIE. Well, we might as well make the amendment as bad as possible from a budgetary standpoint.

The PRESIDING OFFICER. Is there objection?

Mr. ALLEN. Parity will be 84 cents.

Mr. MUSKIE. This sets it at 70 cents.

I have no objection to it being part of the McGovern amendment. My difficulty is, may I say to my good friend from Alabama, that since I was not advised of these amendments until 10 o'clock last night, I have not had an opportunity to get an economic analysis of their implications.

I am really disturbed. I understand the urgency of the farm problem. I have no desire to delay beyond the time necessary for us to understand the implications of what we are doing.

These amendments have budgetary implications. They have inflationary implications. We ought to at least know what those are.

The Senator from Alabama has offered an amendment to a McGovern amendment which itself catches me by surprise without the kind of analysis we ought to have.

Now, if we have agreed to make it part of the McGOVERN amendment, I guess I have no real objection to that. But I have considerable reservation about moving so quickly on proposed agricultural policy which has such serious implications.

I am going to be able to give the Senate only a very smattering of insight from the point of view of the Budget Committee on either proposition.

The PRESIDING OFFICER. Is there objection to the unanimous-consent request by the Senator from Georgia to allow 10 minutes to the Senator from Maine, without objection, from either side?

Mr. ALLEN. I reserve the right to object and I hope the Chair would put the question on the pending amendment.

The PRESIDING OFFICER. The Senator cannot reserve the right to object unless someone yields time for that purpose.

Mr. ALLEN. Well, I object to the unanimous-consent request pending the approval of the pending amendment to the amendment.

The PRESIDING OFFICER. Objection is heard. Who yields time?

Mr. MELCHER. Will the Senator yield 2 minutes to me?

Several Senators addressed the Chair.

Mr. ALLEN. I do not object to the distinguished Senator from——

The PRESIDING OFFICER. I thought I heard the Senator object.

Mr. ALLEN. I reserve an objection and I was in hopes the Chair would put the question on the amendment to the amendment, prior to recognizing the distinguished Senator from Maine because he said he has no objection to that.

The PRESIDING OFFICER (Mr. ZORINSKY). Will the Senator from Georgia propound the unanimous-consent agreement?

Mr. TALMADGE. Yes. I ask unanimous consent that the distinguished Sen-

ator from Maine have 10 minutes, without it being charged to either side.

The PRESIDING OFFICER. Is there objection? The Chair hears none. Without objection, it is so ordered.

The Senator from Maine.

Mr. MUSKIE. Mr. President, I appreciate the Senator's courtesy.

Let me repeat what I just said. The budget imposed upon this Senator is an obligation and a duty to provide the Senate with a budgetary analysis and with an analysis designed to identify the economic impact of legislation of this kind and this Senator is unable to do so this morning. My inability to do so has nothing to do with our lack of resources. It has to do only with the lack of time.

The haste with which this series of policy proposals are being paraded to the floor I find enormously disturbing. I reached a unanimous-consent agreement last Friday with the distinguished Senator from Georgia, the distinguished Senator from Kansas, and the majority leader covering two propositions.

We set the date for Tuesday because, in my judgment, from Friday to Tuesday would give the CBO and my staff adequate time to develop the information which the Budget Act says I have a duty to provide the Senate. Now, this morning I find that there has been added to those two propositions two more: one, the Dole amendment as an amendment to the Talmadge bill; and the other, a McGovern amendment to the Talmadge bill.

Now, Mr. President, there is no way—no way—for the budget process to provide instant analysis on such serious problems. I would have to oppose these amendments on that ground alone. The budget process is designed and intended to equip us to know what we are doing before we adopt programs with budget implications. I do not know what other amendments are lurking in the woodwork to be added to these bills, but my fear is that they are pretty horrendous.

Mr. DOLE. Will the distinguished Senator yield for just a moment?

Mr. MUSKIE. Of course.

Mr. DOLE. I share the frustration of the distinguished Senator from Maine and I know it is not a matter of resource; it is a matter of time, but in defense of the Dole amendment, I think the budget implications do not change. In fact, if anything, they are reduced because we remove the Food for Peace section, which reduces the cost by $400 million.

Mr. MUSKIE. The Dole and Talmadge measures together had different consequences for the budget and the economy than Talmadge and Dole separately. There are three combinations: Talmadge alone, Dole alone, and Talmadge-Dole together.

As a matter of fact, on Talmadge-Dole together, unless the Senator is equipped with information that I have not been able to get, the Department of Agriculture has not yet been able to tell us how they would administer both of them together, so they are not the same.

Combining them is not the same as having two and two and getting four, and I do not know what the answer to that is going to be, but I know that the inflationary implications are going to be magnified if both are adopted.

I know that the budgetary costs are going to be magnified if both are adopted. And if on top of that the McGovern amendment is added, both the inflationary and budgetary costs are going to be magnified and exacerbated in ways that I have absolutely no way of advising the Senate.

This chapter in agriculture policy follows on a very disturbing year from last year. Let us review what happened last year.

President Carter asked for $2.3 billion for agriculture in the budget—$2.3 billion. The Agriculture Committee, the very committee that brought these bills to the floor recommended $4.35 billion in its recommendation to the Budget Committee. That $4.35 billion is not the number that the Budget Committee produced. It is a number that the Agriculture Committee recommended to us and we put it in the budget. That first budget resolution provided $4.35 billion.

Two weeks later the Senate passed an agricultural bill that cost $5.6 billion. The ink was not dry yet on the first budget resolution and it was that $5.6 billion that we put in the second budget resolution.

Then what happened? The very day after the Budget Committee went along with that $5.6 billion the Agriculture Conference Committee voted a conference report costing $6.3 billion, and the Senate reported that conference bill and defeated the Budget Committee's recommendation of $5.6 billion which it had just approved the day previously. By a vote of 64 to 27 the Senate voted to raise the second budget resolution and the deficit it contained to pay for this new agriculture bill.

That is not all. Three weeks later the Senate voted to break that new ceiling which the Agriculture Committee had added to the budget resolution. Three weeks later, the Agriculture Committee reported another bill which reached the ceiling Congress had just adopted. This new bill provided a new and unanticipated $21 million payment program for some of the wealthiest, largest farmers in the United States. It gave them money to cut their crop losses from last year's drought, even though loan programs are available from the Government for the same purpose.

When Senator BELLMON and I took the floor against that budget—the Muskie bill—we were defeated by a vote of 61 to 26.

May I point out that 10 Senators who had voted against the budget resolution only voted against it because it was too high, and voted for this new agriculture bill which broke that very budget which they said was too high.

What kind of game are we playing?

The present projected cost of what I just recited, according to the latest scorekeeping report, for fiscal year 1978 is not $6.3 billion. It is $9 billion. And that number does not include $1.5 billion that was added to the SBA program for disaster relief payments to farmers. If we add that we are up to $10.5 billion for agriculture compared to the $2.3 billion we started the year with just a year ago.

We have not even tried that farm bill which has produced this escalation. We have not even tried it to see whether it would work. We were told that the increases I have recited were justified because we needed new farm policy and that this new farm policy was going to solve the problem. Now before it is tried we have this deluge of proposals that are going to add billions of cost to the budget. They are going to trigger inflationary pressures again with promises that this time it will work.

I say to Senators I think that is the greatest comedy of errors under the supposed aegis of the Budget Act that I have seen in all my experience with it. The Senate of course can work its will. The Senate, if it chooses, can break the budget and a lot of these costs that we are talking about will show up in 1979 rather than 1978.

But let me tell Senators something about 1979. The March 15 committee reports to the Budget Committee are in. I have not had a chance to analyze them all, but let me give just two.

The PRESIDING OFFICER. The Senator's 10 minutes have expired.

Mr. MUSKIE. Mr. President, will the Senator yield me just a minute so I may finish?

Mr. DOLE. I yield 1 minute to the Senator.

The PRESIDING OFFICER. One minute is yielded on the time of the Senator from Kansas.

Mr. MUSKIE. Mr. President, the Appropriations Committee has recommended $508 billion. That is above the President's budget. The Finance Committee, with its tax cut recommendations, has given us a revenue floor of $428 billion.

I say to Senators the difference is $80 billion of deficit, not the President's $60 billion, not this year's figure of $57 billion, not $65 billion or $70 billion, but $80 billion, and we have not yet looked and fully analyzed the recommendations of other Senate committees. That $80 billion does not include anything of what we are debating today, nothing of what we are debating today with these proposals.

The PRESIDING OFFICER. The 1 minute has expired.

Mr. MUSKIE. Mr. President, will the Senator yield me 2 additional minutes?

Mr. DOLE. Mr. President, I yield 2 additional minutes.

The PRESIDING OFFICER. The Senator from Kansas yields 2 additional minutes to the Senator from Maine.

Mr. MUSKIE. Mr. President, these proposals should not even be considered under the Budget Act until we take up the first concurrent resolution—that is what the Budget Act says—because we should not decide and make these spending decisions for 1979 until we know what other spending decisions we are asked to make.

So here we have the prospect of an $80 billion deficit, or more. Before we even get into the details of that one we are adding spending above the $80 billion, or considering adding it in the form

of these amendments which hit us too fast for anyone to analyze them.

I know the plea of urgency and emergency. Congress should be flexible enough to be able to respond to urgencies and emergencies. But I say to Senators if we set precedents here of this kind, which just casually brush aside the budget process, we set the precedent for others who will seek to do the same for other purposes. When that becomes a snowball the budget process will be dead.

As I get other insights into the McGovern amendment, I will be glad to provide whatever analysis we can on the spot.

I will just say this, without McGovern, the Talmadge bill in 1978–79 would have a net cost of $700 million. With the McGovern amendment, the McGovern-Talmadge bill would have a net cost in those 2 years of $2.6 billion. That is a difference of almost $2 billion attributable to the Talmadge bill, and we have not even gotten to Dole. We have not even gotten to Dole.

Mr. DOLE. Get to me first.

Mr. TALMADGE addressed the Chair.

The PRESIDING OFFICER. Who yields time?

Mr. TALMADGE. Mr. President, I yield myself such time as I may take.

BUDGET WAIVER RESOLUTION

Mr. TALMADGE. Mr. President, I move that the Senate proceed to the immediate consideration of Calendar Order No. 648, Senate Resolution 415.

The PRESIDING OFFICER. Is there objection?

Mr. ALLEN. Mr. President, if the Senator will yield, should we not dispose of this first?

Mr. TALMADGE. No. We cannot dispose of that until we get the waiver passed.

Mr. ALLEN. Very well.

The PRESIDING OFFICER. The question is on agreeing to the motion.

The motion was agreed to.

The PRESIDING OFFICER. The resolution will be stated.

The assistant legislative clerk read as follows:

A resolution (S. Res. 415) waiving section 402(a) of the Congressional Budget Act of 1974 with respect to the consideration of H.R. 6782.

Mr. MUSKIE. Mr. President, I do not want to delay the Senate unusually, but I think it is important for the record to note the reason why the Budget Committee reported the two waivers. It reported them, because this amendment has the effect of taking out of the Talmadge bill that provision which was subject to a point of order under section 402.

Mr. President, I ask unanimous consent that the committee report on that issue be printed in the RECORD at this point.

There being no objection, the committee report was ordered to be printed in the RECORD, as follows:

WAIVER OF SECTION 402(a) OF THE CONGRESSIONAL BUDGET ACT WITH RESPECT TO CONSIDERATION OF H.R. 6782

PURPOSE OF THE RESOLUTION

Section 402(a) of the Congressional Budget Act of 1974 provides that it shall not be in order in either the House or the Senate to consider any bill or resolution which directly or indirectly authorizes the enactment of new budget authority for a fiscal year unless that bill or resolution is reported in the House or Senate, as the case may be, on or before May 15 preceding the beginning of such fiscal year. Because H.R. 6782, as reported, authorizes enactment of new budget authority, which could be available in FY 1978, and was reported by the Committee on Agriculture, Nutrition and Forestry on March 13, 1978,—after the May 15, 1977, deadline—a resolution waiving Section 402(a) of the Budget Act with respect to H.R. 6782 must be adopted before this bill can be considered by the Senate. In reporting favorably on the resolution, the Budget Committee is assuming that the effective date of this provision will be changed and is not otherwise prejudging the merits of the bill.

Committee criteria

The Budget Committee is extremely reluctant to recommend the adoption of resolutions waiving section 402(a) of the Budget Act. This section was included in the Budget Act to insure that all authorized legislation is considered as far as possible in advance of the fiscal year in which it will take effect so that it could be considered in the formulation of the First Concurrent Resolution. In addition, this section was included to provide the Appropriations Committee with some reasonable notice of needed appropriations for the coming fiscal year so that the Appropriations Committee can meet the appropriations timetable spelled out in the Budget Act.

Legislation authorizing the enactment of new budget authority which is reported to the Senate after May 15 could delay the enactment of appropriations bills past the Budget Act deadline of seven days after Labor Day for the completion of the entire appropriations process. The legislative history of the Budget Act indicates that the May 15 reporting deadline is not to be lightly waived. Under these circumstances, the Budget Committee, in deciding whether to favorably report resolutions waiving section 402(a) of the Budget Act, will consider factors including: the reporting committee's effort to meet the May 15 deadline, the delay in the appropriations process engendered by the late reporting of the authorization, and whether the enactment of the authorization will significantly affect the national priorities established in the Congressional budget.

Budget considerations

H.R. 6782 authorizes appropriations of an increase in the borrowing authority of the Commodity Credit Corporation from $14.5 billion to $25 billion. Since the reported bill is effective upon the date of enactment, the legislation constitutes an authorization of new budget authority for FY 1978 and, therefore, is subject to a point of order under Section 402 of the Budget Act because it was reported after May 15, 1977.

However, the Chairman of the Committee on Agriculture, Nutrition and Forestry has reviewed the status of the Commodity Credit Corporation and found that delaying the authorization until FY 1979 will not restrict the program. In a letter to the Budget Committee, reproduced below, the Chairman has stated that he will offer a floor amendment on behalf of the Committee to change the effective date of this provision to fiscal 1979.

To permit orderly consideration of H.R. 6782 by the Senate, the Budget Committee reports favorably on Senate Resolution 415, with the understanding that the effective date of the authorization will be changed, and recommends that the resolution be adopted.

Mr. MUSKIE. I think further comments by me are unnecessary.

Mr. TALMADGE. Mr. President, I move adoption of the resolution.

The PRESIDING OFFICER. The question is on agreeing to the resolution.

The resolution was agreed to as follows:

Resolved, That pursuant to section 402(c) of the Congressional Budget Act of 1974, the provisions of section 402(a) of that Act are waived with respect to the consideration of H.R. 6782, a bill to permit marketing orders to include provisions concerning marketing promotion, including paid advertisement, of raisins and distribution among handlers of the pro rata costs of such promotion. As reported by the Committee on Agriculture, Nutrition, and Forestry, H.R. 6782 would also provide emergency assistance to producers of wheat, feed grains, upland cotton, and soybeans.

Such waiver is necessary to permit consideration of statutory authority to increase the borrowing authority of the Commodity Credit Corporation from $14,500,000,000 to $25,000,000,000. Section 3 of H.R. 6782, as reported by the Committee, states that the increase in the borrowing authority of the Commodity Credit Corporation will be effective only to the extent provided in appropriation Acts. Section 3, therefore, is an authorization of new budget authority, which was not reported by May 15, 1977, and requires adoption of a waiver resolution pursuant to section 402(c) of the Congressional Budget Act before it may be considered by the Senate.

The need for increased borrowing authority is an emergency response to a deteriorating situation with respect to American agriculture. This need for increased support could not have been foreseen prior to May 15, 1977.

BUDGET WAIVER RESOLUTION

Mr. TALMADGE. Mr. President, I move that the Senate proceed to the consideration of Calendar Order No. 649, Senate Resolution 418.

The PRESIDING OFFICER. The question is on agreeing to the motion of the Senator from Georgia.

The motion was agreed to.

The PRESIDING OFFICER. The resolution will be stated.

The assistant legislative clerk read as follows:

A resolution (S. Res. 418) waiving section 402(a) of the Congressional Budget Act of 1974 with respect to the consideration of S. 2481.

Mr. MUSKIE. Mr. President, I ask unanimous consent that the committee report on that waiver which touches the Dole bill be printed in the RECORD.

There being no objection, the report was ordered to be printed in the RECORD, as follows:

WAIVER OF SECTION 402(a) OF THE CONGRESSIONAL BUDGET ACT WITH RESPECT TO CONSIDERATION OF S. 2481

PURPOSE OF THE RESOLUTION

Section 402(a) of the Congressional Budget Act of 1974 provides that it shall not be in order in either the House or the Senate to consider any bill or resolution which directly or indirectly authorizes the enactment of new budget authority for a fiscal year unless that bill or resolution is reported in the House or Senate, as the case may be, on or before May 15, preceding the beginning of such fiscal year. Because S. 2481, as reported, authorizes enactment of new budget authority in FY 1978 and was reported by the Committee on Agriculture, Nutrition and Forestry on March 16, 1978,—after the May 15, 1977 deadline, a resolution waiving Section 402(a) of the Budget Act with respect to S. 2481 must be adopted before this bill can be considered by the Senate. In reporting favorably on the resolution, the Budget Committee is assuming that the effective date of

this provision will be changed and is not otherwise prejudging the merits of the bill.

Committee criteria

The Budget Committee is extremely reluctant to recommend the adoption of resolutions waiving section 402(a) of the Budget Act. This section was included in the Budget Act to insure that all authorizing legislation is considered as far as possible in advance of the fiscal year in which it will take effect so that it could be considered in the formulation of the First Concurrent Resolution. In addition, this section was included to provide the Appropriations Committee with some reasonable notice of needed appropriations for the coming fiscal year so that the Appropriations Committee can meet the appropriations timetable spelled out in the Budget Act.

Legislation authorizing the enactment of new budget authority which is reported to the Senate after May 15 could delay the enactment of appropriations bills past the Budget Act deadline of seven days after Labor Day for the completion of the entire appropriations process. The legislative history of the Budget Act indicates that the May 15 reporting deadline is not to be lightly waived. Under these circumstances, the Budget Committee, in deciding whether to favorably report resolutions waiving section 402(a) of the Budget Act, will consider factors including: the reporting committee's effort to meet the May 15 deadline, the delay in the appropriations process engendered by the late reporting of the authorization, and whether the enactment of the authorization will significantly affect the national priorities established in the Congressional budget.

Budget considerations

S. 2481 authorizes additional budget authority of $0.2 billion for Public Law 480, the Food for Peace program. Since the reported bill is effective upon the date of enactment, the legislation constitutes an authorization of new budget authority for 1978 and, therefore, is subject to a point of order under Section 402 of the Budget Act, because it was reported after May 15, 1977.

However, the sponsor of the provision, Senator McGovern, has reviewed the status of P.L. 480, Food for Peace, and has found that delaying the authorization until FY 1979 will not restrict the program. In a letter to the Budget Committee, reproduced below, Senator McGovern has stated that he will offer a floor amendment to change the effective date of this provision to fiscal 1979.

To permit orderly consideration of S. 2481 by the Senate, the Budget Committee reports favorably on Senate Resolution 418, with the understanding that the effective date of the authorization will be changed, and recommends that the resolution be adopted.

Mr. DOLE. Mr. President, it, too, is relevant because that provision in the Dole measure which raises a point of order will be stricken by agreement.

Mr. TALMADGE. Mr. President, I move adoption of the resolution.

The PRESIDING OFFICER. The question is on agreeing to the resolution.

The resolution was agreed to as follows:

Resolved, That pursuant to section 402(c) of the Congressional Budget Act of 1974, the provisions of section 402(a) of that Act are waived with respect to the consideration of S 2481, a bill to provide wheat, feed grain, and cotton producers the opportunity to receive parity prices for the 1978 crops.

Mr. TALMADGE. Mr. President, I believe now the amendment proposed by the Senator from South Dakota, modified by the Senator from Alabama, is in order.

Mr. BENTSEN. Mr. President, I wish to suggest to the Senator from Georgia that he allow me 3 minutes to proceed.

Mr. TALMADGE. I yield 3 minutes to the Senator from Texas.

The PRESIDING OFFICER. The Senator from Texas is recognized for 3 minutes.

Mr. BENTSEN. Mr. President, I would like to state my support of Senator McGOVERN's amendment. I am particularly interested in its application to upland cotton. The cotton loan rate is presently at least 10 cents per pound below the level any Member of the Senate anticipated at the time of passage of the 1977 farm bill. I know the intent of the Senate at that time was to set a loan rate which would allow producers the ability to continue growing cotton on their land. Certainly, it was not the intention of Congress to have a loan rate on 1978 crops which is below the 1977 loan level; however, this is currently the situation. This problem is even more serious in Texas. Due to the type of short staple cotton grown in Texas, many producers are forced to put their cotton in the loan at less than 40 cents per pound. I am sure my colleagues realize this price is well below today's cost of production. Frankly, I believe the loan for cotton should be higher than the 50 cents proposed in the McGovern amendment, but recognizing the sentiment of the Senate I believe this is the best we can expect.

Mr. President, 60 percent of the cotton grown in Texas is exported to foreign countries. Without agricultural exports, our balance-of-payments deficit would be considerably higher, and we as a nation cannot afford this. To my colleagues who say a higher loan rate will only increase cotton production (resulting in a surplus), I say that our farmers will participate in the set-aside programs available. If farmers are forced to grow alternative crops because of the low upland cotton loan rate, it will only increase the surplus of other commodities.

Mr. President, I ask unanimous consent to have printed in the RECORD a letter dated January 20, 1978, from the Fisher County agriculture movement.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

ROBY, TEX.,
January 20, 1978.

DEAR SENATOR BENTSEN: The purpose of this open letter is to present data compiled by the Fisher County American Agriculture Movement to accurately identify the disparity of prices paid by farmers and ranchers in Fisher County, Texas, for goods and services versus the prices received by farmers for raw agricultural products. The businesses of Fisher County furnished yearly prices from 1967 through 1977 of representative items which had no product improvement. Some items had design changes during the period. No product improvement items accurately reflect inflation of prices.

Prices were obtained on representative items in the categories of farm equipment, chemicals, petroleum, rubber, steel, textile, food, and medical services. Percent of price increase from 1967 through 1977 was computed. The percent of price increase for cotton, milo, and wheat (primary agricultural products of Fisher County) was computed for the same period. Comparisons were made to reveal the discrepancy between operation and living costs and receipts for agricultural products which results in a loss in a typical Fisher County farming operation at current prices received for agricultural products. The following comparisons illustrate this disparity by showing the number of pounds of an agricultural product required to purchase farming and ranching necessities based on 1977 Fisher County market prices; December 15, 1977 USDA price quotations; and 100 percent parity:

Agricultural commodity versus manufactured item	1977 Fisher Co. market price	Dec. 15, 1977 USDA price quotations	100 percent parity price.
Pounds milo needed to purchase 1,000 gal diesel at 38½ cents per gal	18,780 lb at 2.05 cents per lb	11,526 lb at 3.34 cents per lb	6,638 lb at 5.80 cents per lb.
Pounds wheat needed to purchase 1 $2.75 steel fence post	86.75 lb at 3.17 cents per lb	67.40 lb at 4.08 cents per lb	32.66 lb at 8.42 cents per lb.
Pounds bales cotton needed to buy 100 hp tractor ($15,500)	37,500 lb at 40 cents per lb	33,623 lb at 46.10 cents per lb	18,430 lb at 84.10 cents per lb.
Pounds cottonseed needed to buy 50 lb salt block ($2.05)	63.08 lb at 3.25 cents per lb	65.08 lb at 3.15 cents per lb	28.67 lb at 7.15 cents per lb.
Calf pounds needed to buy 1 in by 3 in steel shank and clamp $48	No county market	130.08 lb at 36.90 cents per lb	70.28 lb at 68.30 cents per lb.

In 1977 cost per ground acre for a diversified farming operation in Fisher County was approximately $130, excluding land costs and management fees. (See attached per acre costs breakdown.) Receipts from sale of agricultural products in 1977 were approximately $100 per ground acre. This is a loss of $30 per ground acre or a $30,000 loss for a 1,000 acre diversified farming operation in 1977, which was an above average crop production year. The primary reason for the loss was the increased cost of essential goods and services. (Computations of prices for goods and services purchased by Fisher County farmers from 1967 through 1977 showed:

1. Petroleum products showed the most drastic increases; increases averaged 216 percent. Propane increased 260 percent. An energy policy which is effective in reducing inflation rates of petroleum products is a most pressing need.

2. Farm chemicals (cotton insecticides and defoliants which are petroleum derivatives) showed an increase of 175 percent.

3. Rubber products (e.g. tractor, implement, and road vehicle tires) increased by 72 percent.

4. American-made hammered and pressed steel items, increased 245 percent. A solution to the rapidly increasing price of steel is imperative for agriculture.

5. Farm equipment increased 173 percent. Highest increases in equipment for which data were obtained were planters and cultivators which increased 216 percent.

American agriculture uses over half the steel milled in the United States. Much of the steel is used in equipment to a farming operation. Attached is a list of the most basic equipment required for a 1,000 acre diversified farming operation in Fisher County. The approximate cost of this equipment purchased new is $241,330. The same equipment purchased used would cost approximately $159,675.

Fisher County has an average annual income of $22.5 million from agriculture. At no time from 1967 through 1977 were any agricultural commodities marketed at 100 percent of parity. The 1967 prices were an average of 25 percent below parity; the 1977 prices, lowest percent of parity since 1933, were an average of 35 percent below parity.

The attached graph shows average percent of parity since 1910.

In addition to prices for agricultural commodities already being below parity, the slight increases from 1967 through 1977 in prices paid farmers and ranchers in no way kept pace with increases in prices for essential goods and services purchased. During this period agricultural commodity prices increased the following amounts: (1) cotton increased 21 percent; (2) cottonseed increased 14 percent; (3) wheat increased 52 percent; (4) milo increased 28 percent. Texas State Senator Ray Farabee recently stated:

When costs of production exceeds that income ($22.5 million acreage farm income), it not only hurts the people of Fisher County, but it hurts Texas and America and destroys the family farm which has been responsible for making this country the most productive in the world.[1]

Not only has cost of production exceeded income for Fisher County farmers and ranchers, but the cost of living has shown drastic increases during the period from 1967 through 1977. Computations revealed:

1. Medical services which include doctor, hospital, and nursing care, increased 208 percent. Prescription drugs, identical in form today as in 1967, rose 105 percent.

2. American-made retail cotton products which have not been improved since 1967 (i.e. sanforized with shrinkage allowances but not pre-washed, faded, etc.) increased 93 percent. In contrast the price (already below parity) paid for baled cotton used in these manufactured cotton products increased only 31 percent.

3. Grocery items manufactured from raw agricultural products increased by 75 percent. Canned vegetables increased only 32 percent, which suggests the vegetable farmer is experiencing the same problems as the Fisher County farmer and rancher.

The difference between these average increases (31.25 percent average increase for agricultural products and 139.4 percent average increase for goods and services) puts the Fisher County farmer and rancher at a 108.15 percent disadvantage. This 108.15 percent disadvantage shows why farmers and ranchers are losing money in their farming and ranching operation and equity in their land, homes, and equipment.

1977 COSTS PER GROUND ACRE FOR DIVERSIFIED FARMING IN FISHER COUNTY, TEX.

Item	Cost
Labor	$13.64
Supplies	7.48
Repairs	7.02

MINIMUM MAJOR ITEM EQUIPMENT LIST NEEDED FOR 1,000 ACRE DIVERSIFIED FARMING OPERATION (65 PERCENT COTTON, 10 PERCENT MILO, 10 PERCENT WHEAT, 15 PERCENT LIVESTOCK) IN FISHER COUNTY

Item	New price	Average used price
2 tractors 100 hp	$31,000	$19,600
2 cultivators complete	4,800	3,200
2 planters complete	1,770	1,300
2 14 ft tool bars complete	3,600	2,400
1 4 bottom plow and rake	3,650	2,400
2 14 ft tandem disc and rake	7,960	5,000
1 90 in. shredder	1,690	750
2 300 gal spray rigs	3,150	1,900
1 1,000 gal water trailer	2,200	1,600
1 14 ft chiesil	2,100	975
1 big ox 9 shank	1,800	850
1 cotton stripper	10,500	6,800
10 cotton trailers	24,000	20,000
1 cotton ricker	3,100	2,100
1 grain drill	2,300	1,600
1 combine 14 ft header	45,000	29,600
1 grain truck	19,400	14,000
2 ¾ ton pickup trucks	10,950	4,900
2 fuel storage tanks	1,400	1,100
1 8 row rotary hoe	3,950	2,600
1 8 row sand fighter	1,970	900
1 12 ft hay swather	6,540	3,700
1 stack hand	10,700	6,400
1 stack mover	4,800	3,500
1 metal barn with shop (40 ft by 100 ft)	9,700	6,000
1 16 ft stock trailer	2,800	2,100
Farm shop equipment and tools	12,000	9,000
Livestock miscellaneous equipment	8,500	5,400
Total	241,330	159,675

Mr. McGOVERN. Mr. President, will the Senator yield me 2 minutes? I thank the Senator from Texas for his support, and I would suggest, if there is no objection, that we go to the consideration of the Allen-Thurmond amendment which would set the target price on cotton at 70 cents. Senator BENTSEN of Texas would also like to be listed as a cosponsor, as would Senator TOWER, and I ask unanimous consent that they be added.

The PRESIDING OFFICER. Without objection, it is so ordered.

The question is on agreeing to the amendment of the Senator from Alabama. (Putting the question.)

The amendment was agreed to.

Mr. TALMADGE. Mr. President, I yield 1 minute to the distinguished Senator from Montana.

UP AMENDMENT NO. 1215

Mr. MELCHER. I thank the chairman for yielding.

Mr. President, a week ago tomorrow when we were considering in committee the question of where loan rates should be for wheat we attached to the Dole bill a loan rate on wheat of $2.85. The McGovern amendment before us has a loan rate of $2.80. For the sake of consisteency, I suggest to the Senator from South Dakota (Mr. McGOVERN) that we ask him to modify his amendment. I have an amendment prepared that would merely increase the loan rate from $2.80 to $2.85, to be consistent with that action of last week.

I might point out to the Senator from Maine, the chairman of the Budget Committee, that by doing this we reduce the exposure for wheat. Hence, the deficiency payment is reduced by $75 million if the amount of wheat that would go under loan and be subject to a deficiency payment would be 1.5 billion bushels.

The reason for that is the market would automatically go to a floor of $2.85.

I have an amendment prepared and I ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report.

Mr. MELCHER. This is on behalf of myself and Senator HATFIELD of Montana that I offer this.

The legislative clerk read as follows:

The Senator from Montana (Mr. MELCHER) for himself and Mr. PAUL G. HATFIELD proposes an unprinted amendment numbered 1215: On page 1 line 13, of amendment 1735 strike $2.80 and insert $2.85.

Mr. McGOVERN. Mr. President, I think the points the Senator from Montana has made on this modification are well taken, and I move the adoption of the amendment.

The PRESIDING OFFICER. The Senator from Maine.

Mr. MUSKIE. Is there any reason why I cannot yield myself my own time?

Mr. DOLE. Does the Senator wish 10 minutes?

Mr. MUSKIE. I do not need that much, only a couple of minutes.

I hope the Senator's amendment has the effect he described. Unfortunately, since we did not have the basic McGovern amendment for purposes of analysis, I have no really precise measure of its consequences, so I sort of have to take the Senator's word. He is knowledgeable about this field, I have no question about it. I have to sort of take the Senator's evaluation of the consequences of his amendment. I hope they are as beneficient as the Senator described.

My basic problem is not with the Senator's amendment but with the McGovern amendment which we simply have had no opportunity whatsoever to analyze, and I think that is——

Mr. MELCHER. Mr. President, will the Senator yield?

Mr. MUSKIE. Of course.

Mr. MELCHER. I thank the Senator for yielding.

I merely point out again this was the loan level amount for wheat that was adopted last Wednesday in the Committee on Agriculture to the Dole bill, so the Senator and the Budget Committee have had the $2.85 figure before them, and it would be consistent with that.

Mr. MUSKIE. That is not an accurate description of the events of the past few days since Wednesday. No. 1, we did not get anything by way of a written description of what DOLE was until the weekend. I did not get an analysis of it until Sunday evening, and that did not include the McGovern amendment at that point. I understood the committee was working on the question of support prices and target prices, and so on, but as a component of the policy we would debate today I was not informed to that effect.

We had job enough, may I say to the Senator, to analyze the two propositions on which we had reached agreement, a

time agreement. One was the Talmadge bill separately, and one was the Dole bill separately.

Now, to say that we should somehow have had judicial notice, or committee notice, or something else from the Committee on Agriculture that might be added to this bill I do not think is very realistic or fair to us.

Getting these analyses is an unprofessional challenge. We have to check with the Department of Agriculture, with CBO, with the affected committees in order to insure that our analyses are based on agreed-upon facts or if there is disagreement that the disagreement is identified.

We just cannot casually produce these analyses. We simply did not have time to respond to the McGovern amendment as a piece of action that we would face today. Maybe we should have read the signals more clearly, but we did not. The time agreement simply did not include it.

Mr. MELCHER. Mr. President, will the Senator yield again?

Mr. MUSKIE. Yes, I yield. I do not know where the time is coming from, but I yield.

Mr. MELCHER. I repeat that the $2.85 loan rate for wheat is the same loan rate for wheat that was in the Dole bill that was given to the committee, and it is for the basis of consistency.

Mr. MUSKIE. But the Dole bill is a set-aside proposal. Obviously McGovern adds something to that or it would not be offered. I mean, you are talking about support prices here in a different sense than you are talking about it as part of a set-aside program.

Mr. MELCHER. The Dole bill contained the loan rate at $2.85.

Mr. MUSKIE. As part of a set-aside program.

Mr. MELCHER. As part of the bill which would modify existing legislation.

Mr. MUSKIE. I was prepared to discuss the Dole amendment. I am not prepared to discuss the McGovern amendment, because I do not have the analyses, and I make that point with all the emphasis at my command, which is not insignificant.

Mr. TALMADGE. I yield 2 minutes to the Senator from Ohio.

Mr. BUMPERS. Mr. President, will the Senator yield for a unanimous-consent request?

Mr. TALMADGE. I yield 1 minute to the Senator from Ohio and to the Senator from——

Mr. BUMPERS. I ask unanimous consent that Richard Arnold and Grace Ellen Rice of my staff be granted floor privileges.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. METZENBAUM. I make the same request with respect to Dan Grady of my staff.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. METZENBAUM. Mr. President, I rise to indicate that I intend to support the Talmadge bill in the form in which it was reported by the Committee on Agriculture. It is beginning to look, however, as if this bill may become another Christmas tree measure by the time it is passed. If that happens, I may be forced to reconsider my position.

I am prepared to cast my vote in favor of the Talmadge bill as reported by the committee because I recognize that farmers in all parts of our country are on the edge of financial ruin. As the result of conditions beyond their control, tens of thousands of family farmers have been forced in recent years to leave the land. Farm prices are now lower in real terms than they were in 1970, but farm operating expenses have increased since that date by over 60 percent. Similarly, farm debt has escalated from $59 billion in 1970 to over $100 billion today.

I concur with the judgment of the Senator from Georgia that strong and immediate Federal action is needed in order to restore an orderly agricultural market.

Farmers must be able to plan for a future in which they can reasonably expect to get a fair return on their investments in dollars and in labor.

The vast agricultural surpluses created by almost a decade of shortsighted Federal agricultural policy must be reduced to manageable levels.

Farm income must no longer be subject to the wild fluctuations we have experienced in recent years.

And other nations of the world must realize that the temporary existence of large American surpluses is no excuse for the world's failure to move ahead aggressively to create adequate international food reserves.

This bill is a temporary expedient. It is an emergency measure, designed to cope with an extreme situation. I will support it as such, but I must say to my colleagues that I will cast my vote with the greatest reluctance.

Mr. President, I believe that there is something deeply wrong about paying American farmers not to produce. I believe it is a tragedy that our farmers are suffering as a direct result of their success in responding to the need of a still-hungry world for additional food production. It is a shame that American taxpayers must intervene to sustain the world's most efficient farm industry and that American consumers must look forward to rising food prices.

A few short years ago, in 1974, I attended the World Food Conference in Rome. That Conference, called in response to the potential disasters that confronted the world in 1972 and 1973, seemed at the time to offer the hope that a process could be set in motion to create an effective international approach to a common problem for all humanity.

But the 4 years that followed have been disappointing.

We have had 4 years of relatively good weather.

We have lost the sense of urgency that motivated the delegates who assembled in Rome in 1964.

We have made little progress and it appears that we will make little more until we are confronted once again with the specter of massive starvation.

Mr. President, the world food shortage is over, but it is only over for now. The bumper crops of the last few years represent merely short-term increases in the food supply. The 2.5-percent annual rate of growth achieved worldwide in the 1970's falls well below the 4-percent growth rate recommended by the World Food Conference.

Current world food stocks—now about 14 percent of annual consumption—are still well below the 17 to 18 percent designated by the United Nations Food and Agriculture Organization as the minimum "safe level." Current stocks are, in fact, comparable to what they were in 1972–73, when poor weather and massive crop failures in the Soviet Union caused a rapid depletion in world reserves.

In taking the steps proposed by this bill, we will remove 31 million acres of American land from production.

These steps are inevitable. They may be necessary. They are certainly sufficient to make a major, positive impact on farm income. But we must face the fact that they involve real and substantial risks for this country and for the poor of the world.

Mr. President, we must find a better way to deal with the long-term needs of our farmers and of the world. World food security cannot, I submit, be left to chance. We must move to initiate vigorous international action to provide a truly international solution to the problem of secure food supplies. And we must do so now.

I believe that we should pass this measure as reported. But I do not believe that we should stop there.

American agriculture, more than virtually any other American industry, is vitally tied to the world economy. Solutions to our agricultural problems must be considered on the international as well as on the national level.

Mr. President, I believe that our incomparable agricultural potential can and should be fully harnessed in the cause of ending hunger and malnutrition in our own country and in the world at large. The prospect that people anywhere in the world will go hungry while our farmland lies idle is unacceptable to me and, I am convinced, to the farmers of America.

Mr. President, let us take this emergency step, but let us also move to insure that we will never have to do such a thing on such a scale again.

Let us say to the world that we in America are ready and willing to do our share to meet our international responsibilities. Let us say that we are ready to take the lead in negotiating international agreements to insure that buyers who depend on the world market and farmers who produce for it will be able to enjoy a degree of protection from roller-coaster price fluctuations and alternating periods of shortages and glut.

We are responding today to an immediate emergency, but I hope that we will learn from this painful experience and do what is necessary, at home and abroad, to permit our farmers to produce to their capacity in a rational and stable market.

Mr. President, I will support the Tal-

madge bill because I know that the farmers of this country are suffering as they have not suffered in many a year. I believe that it is our duty to do something about this situation and I am convinced that the bill we have before us is a fair response. It is fair to the farmers of America and acceptable to American taxpayers and consumers as a short term solution.

But I must reiterate, Mr. President, that massive set-aside programs are not and cannot be our policy in the long run.

I call upon the President, the Secretary of Agriculture, and chairman of the Agriculture Committees of both the House and Senate to provide the leadership and the programs so that the men and women who have made the United States the food basket of the world will never again be called upon to plow under or to refrain from growing crops that could be grown to feed the hungry mouths of the world.

Mr. TALMADGE. I yield 1 minute to the Senator frrom South Dakota.

Mr. ABOUREZK. Mr. President, I would like to direct a question to the distinguished chairman of the Agriculture Committee. I think a little while ago he said that he was willing to accept the Dole amendment and the McGovern amendment and take them to conference; did I understand the Senator correctly?

Mr. TALMADGE. Yes; I said it was my feeling that the conferees on the part of the House and the White House would be willing to accept the Dole amendment.

Mr. ABOUREZK. If I might have 1 more minute——

Mr. TALMADGE. Of course, I am only speculating and speaking as one Member of the body.

Mr. ABOUREZK. Senator DOLE yields me 2 additional minutes.

I would like to say to the Senator from Georgia (Mr. TALMADGE) that I think his bill is good as far as it goes, the McGovern amendment is good as far as it goes, and the Dole amendment is good as far as it goes, but I think there are additional protections for cattlemen that ought to be put into the bill, whichever one of them we accept.

I do want to say that the American Agricultural Movement, all the farmers we have seen in Washington for several weeks now, have come here in a sincere effort to try to get something through that will mean something to prevent them from going into bankruptcy. I think it is not only in their interest and in the interest of the people who represent those farmers, but in the interest of the country in the long run, that something be done so that they do not have to come back. If we are simply going through an exercise today that will get some legislation over in the conference committee that will be dropped out in the operation of the conference committee and will never see the light of day again, I think we are doing a disservice to all these people who have worked so hard, including the fellow from South Dakota—as my colleague, GEORGE MCGOVERN, who has been talking with him, knows—Wayne Peterson left his farm, he and his wife came to Washington, and they have not even made arrangements for people to feed their cattle; and I had a farmer out there last week tell me his cattle were dropping over because they have not had any feed or water; but they are here in a desperately serious effort to get some kind of legislation so that they can go back to their farm and stay there.

I appeal to the members of the committee—I know they have put in a lot of effort, but I am pleading with them, including Senator DOLE and the other members on that side as well, not to send these farmers home just to be disappointed, but to stand by them, or in fact keep the farmers here in Washington. If you send them back home with the hope they are going to get something, and later it gets dropped out over your objection, it will not do any good, and they are going to have to drop everything and come back to Washington again.

So I am asking you that you stay in conference and talk as firmly as you can.

Mr. DOLE. Mr. President, let me say to my friend from South Dakota that that is certainly the intention of this Senator. I think the distinguished chairman of our committee joins me in the hope that, without going to conference for an unloading operation, we will come back from conference with something for the American farmer.

I happen to believe that there is a way to nail some of these proposals together to get a very good farm bill, much like the one in which the distinguished junior Senator from South Dakota wants. So I pledge right now that it is not my intent just to shove it off to conference, wave goodby to the farmers, and let them go home and be disappointed. I hope my chairman shares my view in that respect.

Mr. TALMADGE. I do.

Now, Mr. President, is the amendment of the Senator from Montana pending?

Mr. MELCHER. It is.

Mr. TALMADGE. Could we have a vote on it?

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from Montana (Mr. MELCHER).

The amendment was agreed to.

Mr. TALMADGE. Now the question is on agreeing to the McGovern amendment as modified; is that correct?

The PRESIDING OFFICER. The question is on agreeing to the McGovern amendment, as amended.

Mr. TALMADGE. I believe the distinguished Senator from Maine wanted the yeas and nays on that question.

Mr. MUSKIE. Mr. President, I would like the yeas and nays, but before I request them, I would like to make sure that there is complete understanding on the next order of business. I understand that the Dole amendment will be the next order of business. I would like to have some definite time. I do not have an analysis of the Dole amendment to present.

Mr. TALMADGE I think the Senators will be glad to give the Senator time.

Mr. MUSKIE. I will be glad to do that, and I have been asked to provide some time for other Senators as well.

Mr. TALMADGE. How much time remains on each side, Mr. President?

The PRESIDING OFFICER. The Senator from Georgia has 57 minutes.

Mr. TALMADGE. And the Senator from Kansas?

The PRESIDING OFFICER. The Senator from Kansas has 78 minutes.

Mr. DOLE. How much time does the Senator need?

Mr. MUSKIE. If I could be sure I could have up to an hour of that time, I doubt that I will use it all, but so that I can yield to other Senators. Or we can start with 45 minutes.

Mr. TALMADGE. Mr. President, I ask unanimous consent that the distinguished Senator from Maine, the chairman of the Budget Committee, may have 45 minutes in opposition to the Dole amendment.

The PRESIDING OFFICER. Is there objection? Without objection, it is so ordered.

Mr. DOLE. In other words, the time will not be charged to either side?

Mr. TALMADGE. Not charged to either side.

Mr. DOLE. I want to furnish the Senator all the rope I can.

Mr. TALMADGE. I could not agree more.

Mr. MUSKIE. Mr. President, will the Senator from Kansas yield?

Mr. DOLE. I yield.

Mr. MUSKIE. Earlier, I indicated that we had not had any kind of analysis, and I gave some rough figures as to the budget costs. I have now received a letter from Alice Rivlin of CBO on the budget cost question; and in order that the record may be complete, I ask unanimous consent to have this letter printed in the RECORD. It simply confirms the figures I estimated roughly in the course of the debate.

There being no objection, the estimate was ordered to be printed in the RECORD, as follows:

CONGRESSIONAL BUDGET OFFICE,
Washington, D.C., March 21, 1978.

Hon. EDMUND S. MUSKIE,
Chairman, Committee on the Budget, U.S. Senate, Washington, D.C.

DEAR MR. CHAIRMAN: The Congressional Budget Office is providing the following estimate in response to a request from the Budget Committee staff.

If H.R. 6782 were amended to authorize an additional $500 million for P.L. 480, effective October 1, 1978, and to raise for 1978 crops only: the wheat loan rate to $2.80 per bushel and the wheat target price to $3.55 per bushel; the corn loan rate to $2.25 per bushel and the corn target price $2.50 per bushel; and the cotton target price to $.60 per pound, CBO's cost estimate of March 15 would be changed as shown in the following table:

BUDGET AUTHORITY AND OUTLAYS

[By fiscal years; in millions of dollars]

	Mar. 15 CBO estimate		Possible amendment		Revised total	
	1978	1979	1978	1979	1978	1979
Budget Function 350:						1,847
New budget authority for additional set-aside	1,064	−432	−432	+2,279	641	
Authorization for increased CCC borrowing authority	10,500	0	0	0	10,500	0
Net potential budget authority impact	9,396	−6,266	0	0	9,396	−6,266
Outlays:						
Raisin promotion	1	(1)	0	0	0	0
Payments for additional set-aside	1,064	1,064	0	0	1,064	1,064
Decreased outlays for related CCC programs	0	−1,496	−423	+2,279	−423	+783
Net outlays	1,064	−432	−423	+2,279	641	1,847

[1] Less than $500,000.

This revised estimate assumes that loans and targets will revert to the levels specified in P.L. 95–113 for the 1979 and following crops.

The above costs of this amendment represent our best estimate in the brief time we had available to study the effects of H.R. 6782.

We are unable to estimate at this time, the budget effects of an additional authorization of $500 million to the P.L. 480 program. We would be able to provide further details later should you desire.

Sincerely,

ALICE M. RIVLIN,
Director.

Mr. MUSKIE. I now ask for the yeas and nays on the McGovern amendment.

Mr. DOLE. Mr. President, before the Senator does that, I ask unanimous consent that Barbara Washburn, of Senator JAVITS' staff, and Bob Cooper, of Senator BARTLETT'S staff, have the privilege of the floor during the consideration of this measure. Also Mr. Sneeden, of Senator THURMOND'S staff.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. TALMADGE. Mr. President, I ask for the yeas and nays on the McGovern amendment. as amended.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

The PRESIDING OFFICER. The question is on agreeing to the amendment, as amended, of the Senator from South Dakota (Mr. MCGOVERN). The yeas and nays have been ordered, and the clerk will call the roll.

The assistant legislative clerk called the roll.

Mr. CRANSTON. I announce that the Senator from Alaska (Mr. GRAVEL), the Senator from Hawaii (Mr. MATSUNAGA), the Senator from Michigan (Mr. RIEGLE) and the Senator from New Jersey (Mr. WILLIAMS) are necessarily absent.

I further announce that the Senator from Colorado (Mr. HASKELL) is absent on official business.

I further announce that, if present and voting, the Senator from Michigan (Mr. RIEGLE) would vote "yea."

Mr. STEVENS. I announce that the Senator from Utah (Mr. HATCH) and the Senator from Illinois (Mr. PERCY) are necessarily absent.

The result was announced—yeas 58, nays 35, as follows:

[Rollcall Vote No. 69 Leg.]

YEAS—58

Abourezk	Hart	Nelson
Allen	Hatfield,	Nunn
Anderson	Mark O.	Packwood
Baker	Hatfield,	Pearson
Bartlett	Paul G.	Randolph
Bayh	Hodges	Sarbanes
Bentsen	Hollings	Sasser

Curtis	Kennedy	Scott
DeConcini	Laxalt	Weicker

NOT VOTING—7

Gravel	Matsunaga	Williams
Haskell	Percy	
Hatch	Riegle	

So Mr. MCGOVERN'S amendment (No. 1735) as modified and amended, was agreed to.

Mr. MCGOVERN. Madam President, I move to reconsider the vote by which the amendment was adopted.

Mr. TALMADGE. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

The following Senators requested and, by unanimous consent, the privilege of the floor was granted in behalf of the following staff members: Mr. CRANSTON: Kathryn Files; Mr. DOMENICI: Darla West; Mr. PACKWOOD: Greg Dow; Mr. DANFORTH: Burleigh Leonard; Mr. DECONCINI: Lois Pfan; Mr. HELMS: George Dunlop; Mr. GLENN: Tom Dougherty; Mr. THURMOND: William E. Twilley; Mr. HARRY F. BYRD, JR.: Mr. John Mac Ilroy.

Mr. MUSKIE. Mr. President, I make a parliamentary inquiry related to the time schedule for today.

The time agreement that was reached last week was to the effect that the first 4 hours today would be devoted to the Talmadge bill, with the final vote at 4, and the next 4 hours to the Dole bill. Now what is happening is that the Dole bill is being offered as an amendment to the Talmadge bill, which, for me, confuses the time situation.

In addition, I wonder what it does to the order of voting. We are to vote, as I understood it, back to back at 4 o'clock. I should like to know what the situation now is.

Is that time agreement still controlling? Should we have another one? I think Senators would like to know for their own information when we can expect votes and ir. what order, because these are two very serious issues. They will have adequate debate, I am sure.

I wonder if this might not be the time, and I do not see the majority leader, to propose another unanimous-consent agreement, taking into account the new order of things here.

Mr. TALMADGE. I did not hear the Senator. I was engaged in a conversation.

Mr. MUSKIE. I wondered if it might not be well, given the fact that we are now considering these two proposals together, Dole and Talmadge, why it might not make sense to arrange a new time agreement and a new time for voting.

Mr. TALMADGE. I requested that the Senator be allotted 45 minutes.

Mr. MUSKIE. I am not complaining about that. I am not sure—we are supposed to vote on the Talmadge bill at 4, followed by the Dole bill at 4. Obviously, we are going to have a vote on Dole before 4.

Mr. TALMADGE. No; we cannot do that. The unanimous-consent agreement provides that we cannot vote on either bill prior to 4 o'clock.

Mr. MUSKIE. Even though it is offered as an amendment?

Mr. TALMADGE. If it is offered as an amendment, the amendment can be voted on, but passage of the bill cannot be voted on until 4 p.m.

Mr. MUSKIE. What was that?

Mr. DOLE. If I offer my bill as an amendment, which I am about to do, it is my understanding that the amendment can be voted on at any time.

Mr. TALMADGE. That is correct.

The PRESIDING OFFICER. The Senator is correct.

Mr. DOLE. If that amendment, by some strange event, were defeated, I still have the right to offer it separately later

today. Then it would fall into the 4 o'clock agreement, because I understand this is a primary day in Illinois. We are trying to protect the Senators from that State.

Mr. MUSKIE. If that were to happen, it would be a strange reason, indeed.

Mr. DOLE. It would be very unfortunate for the American farmer, but it could happen.

Mr. MUSKIE. That is all right. The matter has been straightened out as far as I am concerned.

Mr. BUMPERS. Who has the floor, Madam President? I wish to make a parliamentary inquiry.

The PRESIDING OFFICER. The Senator from Kansas has the floor.

Mr. DOLE. I am happy to yield.

Mr. BUMPERS. Madam President, a parliamentary inquiry on this unanimous-consent request.

The PRESIDING OFFICER. The Senator will state it.

Mr. BUMPERS. On this unanimous-consent request on which we are, the agreement under which we are operating, how is the time divided, No. 1, on the Dole amendment, who controls it? No. 2——

Mr. TALMADGE. The Dole amendment time will be controlled by the distinguished Senator from Maine and the distinguished Senator from Kansas.

Mr. BUMPERS. Two hours on either side?

Mr. TALMADGE. Not if it is offered on the amendment, only on the bill, but by the unanimous consent I got 45 minutes allotted to the distinguished Senator from Maine and he will handle the time in opposition thereto.

Mr. BUMPERS. Second, Madam President, how much time will be given for amendments to the Dole amendment?

Mr. TALMADGE. There is no time allotted on that.

How much time remains for the distinguished Senator from Kansas and the floor manager of the bill, myself?

The PRESIDING OFFICER. There is no specific time allotted.

Mr. TALMADGE. Yes, there is, Madam President. There is a time allotment of 4 hours on the bill and to that 4 hours will be added 45 minutes to the Senator from Maine.

Will the Chair please give me the time remaining to the Senator from Kansas and the Senator from Georgia?

The PRESIDING OFFICER. The Senator from Georgia has 57 minutes. The Senator from Kansas has 72 minutes.

Mr. BUMPERS. Does this mean an amendment offered, unless the floor managers elect to yield time to offer that amendment, it would have to be voted on without debate?

The PRESIDING OFFICER. That is correct.

Mr. TALMADGE. If the Senator from Arkansas desires time, I am sure the Senator from Maine will allot him some, I am sure the Senate would allot him time.

I do not want to foreclose debate on any Senator.

Mr. MUSKIE. As I understood my discussion with the majority leader on the time agreement basically controlling this, it is all confusing by the proposal to offer the Dole amendment, it was that there would be 4 hours on Talmadge which would include time for amendments. There is no doubt about that, in my judgment.

Now, no specific time, no specific amount of time, but that was supposed to include time for amendments.

Mr. ROBERT C. BYRD. The Senator is precisely correct.

The PRESIDING OFFICER. The Senator is correct.

Mr. MUSKIE. I do not know who will determine how much time, but I would think maybe this would be a good time to arrange for that. We are going to have a whole day. I would suggest we have half an hour on amendments.

Mr. BUMPERS. Will the Senator from Kansas yield?

Mr. DOLE. Yes.

Mr. BUMPERS. I have an additional inquiry on the agreement we are operating under now.

I understand we cannot vote before 4, but that does not mean we cannot vote at sometime after 4; is that correct?

Mr. DOLE. That is correct.

Mr. BUMPERS. So we are not under any real time constraints of the unanimous-consent request propounded for additional time, the present agreement would not prohibit that?

Mr. ROBERT C. BYRD. The Senator is correct.

But I hope the time on amendments could come out of the 4 hours, as earlier agreed, and then, if we find 4 hours does not accommodate that situation, we can adjust ourselves to it at that time.

Mr. BUMPERS. I hope the majority leader would, as he always does, monitor this because I have an amendment that I would certainly like 20 or 30 minutes on, and there may be others similarly situated.

Mr. DOLE. I have not discussed this, maybe it is something we can accommodate the Senator on.

Mr. BUMPERS. Maybe, and I will be happy to talk to the Senator on it, and the chairman of the committee, both.

Mr. DOLE addressed the Chair.

The PRESIDING OFFICER. The Senator from Kansas.

Mr. ROBERT C. BYRD. Will the Senator yield?

Mr. DOLE. I yield to the distinguished Senator.

Mr. ROBERT C. BYRD. Madam President, it seems to me we have a total of 8 hours here between the two bills and that Mr. DOLE is going to offer his bill as an amendment to the bill that is now pending.

It would seem to me we could merge the two allotments of 4 hours each and make a total of 8 hours. That should be sufficient for all amendments, motions, and so forth.

Mr. DOLE. The Senator from Kansas has only one reservation.

As I indicated to the Senator from Maine, if, by some misfortune, the Dole amendment should be defeated as an amendment, then I would still want the right to offer it separately because it might make a difference with some Senators on how they vote.

Mr. MUSKIE. Will the Senator yield?

Mr. DOLE. But I am very happy to take 2 hours out of the 4 and add it onto this.

Mr. ROBERT C. BYRD. That might be an answer, may I say to the Senator from Maine, take 2 hours off the bill, add it to this.

Madam President, I ask unanimous consent that the arrangement whereby 4 hours were to be allotted to the bill now pending be modified to allow 6 hours under the same conditions, to wit, that amendments, motions, and so forth, come out of that 6 hours and that on the bill by Mr. DOLE, in the event we still take up that bill, the time be limited to 2 hours under the same conditions.

Mr. MUSKIE. Who is to control the time?

The PRESIDING OFFICER. Is the Senator from Maine still to have 45 minutes in addition thereto?

Mr. ROBERT C. BYRD. Well, I would hope it would come out of the 6 hours because I think the Senator from Maine wants time and if it is allowed out of the 6 hours I would hope he would be agreeable to that, so that we do not start making exceptions.

The PRESIDING OFFICER. Is there objection?

Mr. MELCHER. Madam President, might I inquire of the majority leader what the constraints would be of the 4 o'clock vote then?

Mr. ROBERT C. BYRD. Well, the earlier agreement was that the vote come not before 4 o'clock.

Mr. MELCHER. So, it could occur at 6 o'clock, if need be?

Mr. ROBERT C. BYRD. It could, yes.

Mr. MELCHER. I thank the Senator.

Mr. ROBERT C. BYRD. In answer to——

Mr. MUSKIE. I suppose a vote on the Dole amendment, as against the Dole bill, the Dole amendment, I take it, could take place at the end of 6 hours, as the Senator is suggesting?

Mr. ROBERT C. BYRD. Yes; the vote on the Dole amendment would not have to wait, under the agreement, only the two final votes were to begin no earlier than 4 p.m.

The PRESIDING OFFICER. That is correct.

Mr. ROBERT C. BYRD. Votes on amendments could occur earlier.

Several Senators addressed the Chair.

Mr. TALMADGE. For the purpose of clarification——

Mr. HARRY F. BYRD, JR. Reserving the right to object, the Senator from Virginia has no amendments to offer to this bill, but the Senator from Virginia is concerned as to the precedent of such a unanimous-consent agreement, because, as the Senator from Virginia understands the situation, no amendments could be offered unless the managers of the bill or those in opposition were to grant time.

I think that rules out, without the con-

sent of someone else, the right of a Senator to offer an amendment.

For that reason, I would be inclined to object to this unanimous-consent request, except that goes back to the original unanimous-consent request, which contains the same provision.

So I will not object to this, but in the future I will object to any unanimous-consent request that does not permit time on an amendment.

Mr. ROBERT C. BYRD. Madam President, may I say to the Senator, this agreement in this instance does not set a precedent. I have arranged similar unanimous-consent agreements in the past. I can understand his concern. I feel sure that the Senator, if he wishes to offer an amendment, will not be shut out.

Mr. HARRY F. BYRD, JR. I have no amendment to offer.

Mr. ROBERT C. BYRD. The leadership will do everything it can to cooperate and accommodate Senators. I know the managers of the bill, Mr. DOLE and Mr. TALMADGE, will do the same.

Mr. HARRY F. BYRD, JR. I have no amendment to offer, but I do not want in a future bill another Senator not get time to offer an amendment.

The PRESIDING OFFICER. Is there objection?

Mr. ROBERT C. BYRD. May I say again, this is not a precedent.

Mr. TALMADGE. Reserving the right to object, for the purpose of clarification now, I understand we have 6 hours of time on the bill to be equally divided. The original proviso was the time to be divided between the distinguished Senator from Kansas and myself. I have by unanimous consent requested, and the Senate has agreed, that the distinguished Senator from Maine have 45 minutes in opposition on the bill. How will the time be handled now in opposition to the Dole amendment and the time limitation thereon? I want to allot the time in opposition to the Senator from Maine.

Mr. ROBERT C. BYRD. That would be agreeable.

Mr. TALMADGE. How about reaching this agreement: an hour and a half on the Dole amendment, to be equally divided between the distinguished Senator from Kansas and the distinguished Senator from Maine

Mr. MUSKIE. Madam President, reserving the right to object——

Mr. TALMADGE. The time to begin as soon as he offers the amendment.

Mr. ROBERT C. BYRD. The time to come out of the 6 hours.

Mr. TALMADGE. The time to come out of the 6 hours.

Mr. MUSKIE. Reserving the right to object, when I agreed to 45 minutes, I did not expect the possibility of someone using my time to offer an amendment. Forty-five minutes would be restrictive. I may not need the full 45 minutes. If we should need additional time for an amendment in opposition——

Mr. TALMADGE. I suggest this to the majority leader, the Senator from Maine, and other interested parties: I ask unanimous consent that time on the Dole amendment be evenly divided between the distinguished Senator from Kansas and the distinguished Senator from Maine, the time not to exceed an hour and a half, and that any amendment thereto be limited to 30 minutes, to be equally divided between whoever offers the amendment and the distinguished Senator from Kansas.

Mr. ROBERT C. BYRD. Reserving the right to object, with all time to come out of the total 6 hours.

Mr. TALMADGE. All time to come out of the total 6 hours allotted on the bill.

Mr. MUSKIE. That is agreeable.

The PRESIDING OFFICER. Is there objection?

Mr. HATHAWAY. Reserving the right to object, I have two amendments of my own that might take a half-hour each. If the manager of the bill will accept them, they will take less than that—or will accept at least one of them. I do not know how the agreement which is proposed to be entered into leaves me with my amendments.

Mr. TALMADGE. I will take a look at the Senator's amendments, and I am sure the Senator from Kansas will. I assure the Senator from Maine that if he desires to offer amendments, he will have ample opportunity to do so; and if we have to request additional time, I think the Senate will authorize that.

Mr. HATHAWAY. All right.

The PRESIDING OFFICER. Is there objection? The Chair hears none, and it is so ordered.

Who yields time?

Mr. ROBERT C. BYRD. Madam President, I thank all Senators for their cooperation.

UP AMENDMENT NO. 1216

Mr. DOLE. Madam President, I call up my amendment and ask that it be stated.

The PRESIDING OFFICER. The amendment will be stated.

The assistant legislative clerk read as follows:

The Senator from Kansas (Mr. DOLE) proposes an unprinted amendment numbered 1216.

Mr. DOLE. Mr. President, I ask unanimous consent that reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 2, line 20, insert "TITLE I—" immediately before "ADDITIONAL".

On page 2, line 23, strike out "SEC. 2." and insert in lieu thereof "SEC. 101.".

On page 9, line 20, insert quotation marks immediately before "1978".

On page 11, line 1, strike out "average" and insert in lieu thereof "acreage".

On page 14, line 15, strike out "anl" and insert in lieu thereof "and".

On page 15, after line 23, insert the following:

TITLE II—PRICE SUPPORT FOR PRODUCERS SETTING ASIDE ACREAGE FOR THE 1978 CROPS OF WHEAT, FEED GRAINS, AND UPLAND COTTON

"SEC. 201. This title may be cited as the "Flexible Parity Act of 1978".

"SEC. 202. Effective only with respect to the 1978 crops, title I of the Agricultural Act of 1949 is amended by adding at the end thereof new sections 116 through 118 as follows:

"1978 WHEAT LOAN RATE AND TARGET PRICE

"SEC. 116. Notwithstanding any other provision of this Act—

"(a) The Secretary shall make available to producers loans and purchases on the 1978 crop of wheat at a level not less than $2.85 per bushel.

"(b) The established price for the 1978 crop of wheat shall be at a level related to the amount of cropland that the producers on a farm voluntarily elect to set aside from production. If the acreage the producers voluntarily set aside is—

"(1) 20 percent, the established price shall be $3 per bushel;

"(2) 25 percent, the established price shall be $3.25 per bushel;

"(3) 30 percent, the established price shall be $3.50 per bushel;

"(4) 35 percent, the established price shall be $4 per bushel;

"(5) 40 percent, the established price shall be $4.25 per bushel;

"(6) 45 percent, the established price shall be $4.50 per bushel;

"(7) 50 percent, the established price shall be $5.04 per bushel.

"1978 FEED GRAIN LOAN RATES AND TARGET PRICES

"SEC. 117. Notwithstanding any other provision of this Act—

"(a) The Secretary shall make available to producers loans and purchases on the 1978 crop of corn at a level not less than $2.40 per bushel.

"(b) The established price for the 1978 crop of corn shall be at a level related to the amount of cropland that the producers on a farm voluntarily elect to set aside from production. If the acreage the producers voluntarily set aside is—

"(1) 10 percent, the established price shall be $2.10 per bushel;

"(2) 20 percent, the established price shall be $2.25 per bushel;

"(3) 25 percent, the established price shall be $2.45 per bushel;

"(4) 30 percent, the established price shall be $2.65 per bushel;

"(5) 35 percent, the established price shall be $2.85 per bushel;

"(6) 40 percent, the established price shall be $3.05 per bushel;

"(7) 45 percent, the established price shall be $3.25 per bushel;

"(8) 50 percent, the established price shall be $3.45 per bushel.

"1978 UPLAND COTTON TARGET PRICE

"SEC. 118. Notwithstanding any other provision of this Act, the established price for the 1978 crop of upland cotton shall be 60 cents per pound in the case of producers who voluntarily set aside an acreage of cropland on their farm equal to 20 per centum of the acreage of upland cotton planted for harvest."

TITLE III—GRAIN RELEASE PRICES

SEC. 301. Effective for the period beginning on the date of enactment of this Act and ending one year thereafter—

(1) Section 110(b)(5) of the Agricultural Act of 1949 is amended by striking out "wheat has attained a specified level which is not less than 140 per centum nor more than 160 per centum of the then current level of price support for wheat or such appropriate level for feed grains, as determined by the Secretary" and inserting in lieu thereof "the commodity has attained a specified level which is not less than the current parity price for such commodity."

(2) Section 110(b)(6) of the Agricultural Act of 1949 is amended by striking out "is not less than 175 per centum of the then current level of price support for wheat or such appropriate level for feed grains as determined by the Secretary under this Act" and inserting in lieu thereof "is not less

than 105 per centum of the current parity price for such commodity".

SEC. 302. Effective for the period beginning on the date of enactment of this Act and ending one year thereafter, section 110(d) of the Agricultural Act of 1949 is amended by striking out "150 per centum of the then current level of price support for such commodity" and inserting in lieu thereof "the parity price for such commodity."

SEC. 303. Effective for the period beginning on the date of enactment of this Act and ending one year thereafter, the language following the third colon in the third sentence of section 407 of the Agricultural Act of 1949, as amended by section 408 of the Food and Agriculture Act of 1977, is amended by striking out "115 per centum of the current national average loan rate" and inserting in lieu thereof "the current parity price".

On page 16, line 1, insert "TITLE IV—" immediately before "INCREASE".

On page 16, line 2, strike out "SEC. 3." and insert in lieu thereof "SEC. 401.".

On page 16, line 8, insert quotation marks immediately before "$".

On page 16, line 9, insert quotation marks immediately before "$".

On page 16, line 13, insert "TITLE V—" immediately before "FARMERS".

On page 16, line 15, strike out "SEC. 4." and insert in lieu thereof "SEC. 501.".

On page 19, between lines 20 and 21, insert "TITLE VI—RAISIN MARKETING ORDERS".

On page 19, line 21, strike out "SEC. 5." and insert in lieu thereof "SEC. 601.".

Mr. DOLE. Madam President, I yield to the distinguished Senator from North Dakota.

Mr. BURDICK. Mr. President, I ask unanimous consent that Steve Petrie be allowed the privilege of the floor during the debate on the farm bill.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. DOLE. Mr. President, let me review what we are about to do, because other Senators have come to the Chamber.

We are now discussing the flexible parity concept. It is a concept supported by farmers all across this Nation. Its strength is that it gives the farmer the option. The farmer makes the determination as to whether he is going to set aside 20 percent or 25 percent, up to 50 percent, of his production. In return for that sacrifice or that set-aside—that decision by the farmer, there will be a determination of the amount of the target price.

I hasten to add that that is not a Government payment; that is a target price. When the Congressional Budget Office and the USDA made estimates on the cost of this bill, I am prepared to show at the appropriate time that they used the worst possible examples. They tried to make the bill cost as much as it possibly could. The worst case assumptions were used. They were using market prices, after the bill had been passed, that were even lower than the market price today.

I know one thing: If you set aside production, the market price is going to go up. It is going to cut production and raise demand, and there is going to be lots of the product there. So what happens? The market price increases. The more the market price increases, the less the deficiency payment, the less exposure to the Government.

I happen to believe that the flexible parity concept will work. I believe that the flexible parity concept has the support of Democrats and Republicans. If it will help pass the bill, I will take off my name and put on a Democrat's name. The Senator from Kansas really does not care whose name is on the bill. It seems to me that with 20-odd cosponsors, about equally divided on both sides of the aisle, there is some interest in this concept.

I hope we are not shot down because of what the USDA might estimate—if we can have the attention of the distinguished Senator from Oklahoma—and what the Congressional Budget Office might estimate as to the cost of this program. It is easy to add up a lot of figures when you are trying to make a case for or against.

I will give an example of how figures vary on this particular bill. The USDA figures for this bill for fiscal year 1978 are $3.68 billion; for fiscal year 1979, $4.7 billion. That is a total estimated cost by USDA of $8.3 billion.

The Congressional Budget Office figures are just the opposite. For fiscal 1978 there is a saving of nearly $1.1 billion, and the cost in fiscal 1970 is $3.5 billion; and they say the total cost would be $4.7 billion.

Here are two different groups estimating the cost of this program. One says $8.3 billion; the other says $4.7 billion. It seems to this Senator that if we use the right assumptions, the cost will be even less. Let me suggest what I mean.

While we are finding that, let me suggest that even with the CBO estimate, if we use the 5-year total cost for the Dole bill of $621 million and use the 5-year total cost for the Talmadge bill, it is $151 million. So we are talking about $451 million. But let us take a look at how the CBO estimated their costs. The farmers will understand this, if no one else does.

Let us take wheat, for example.

CBO assumes for wheat a target price of $3.85 per bushel.

What do they assume for a market price? $2.80 a bushel. Market price of wheat as of March 17, 1978, was $3.20, leaving a difference between target and market of 60 cents, instead of $1.

And my point is this: Certainly, if I estimate the market price at a very low cost, a very low price, you are going to have more exposure for the Government. You are going to be able to get a higher cost figure for the program.

Let us take corn, because I know the distinguished Senator from Iowa (Mr. CLARK) is interested in corn. Maybe, the distinguished Senator is not interested in the flexible parity bill, so he assumes a target price of $2.76 per bushel. He further assumes a market price of $2.40 a bushel; therefore, a deficiency payment of 36 cents a bushel.

Well, the market price of corn as of March 17, 1978, was $2.49 higher than the market price assumed by the Congressional Budget Office after the set-aside, after the program would be in effect, and that would reduce the deficiency payment as of that date to 27 cents a bushel instead of 36 cents, and I suggest that would reduce the cost.

And my point is this: The flexible parity concept is designed to give that farmer the option of setting aside production and therefore permitting the market forces to operate to lift the price and reduce the exposure to the Government.

Mr. McGOVERN. Will the Senator yield for just a moment?

Mr. DOLE. Yes.

Mr. McGOVERN. I think the Senator from Kansas is making a very valuable point here that Senators ought to take into serious consideration when they make their judgment on these programs and that is, that it is impossible to do anything more than to make an educated guess about the cost of these various farm proposals that are now pending before us.

I realize that all of us have to make some estimates, but we do not know how much land the farmers are going to set aside. We do not know what the world market prices are going to be. So whether we are talking about the Department of Agriculture's estimate or the Congressional Budget Office or some other source, we ought to recognize that these are not mathematically precise figures. They represent, at the very best, an educated guess.

Now we do have some general knowledge, rather accurate knowledge, I think, about what it costs for farmers to produce a bushel of wheat, or a bushel of corn, or a pound of cotton. What the Senator from Kansas is trying to do with his legislation, and what others have tried to do, is to see to it that the farmers get a fair price that does lower the cost of production, plus a reasonable return on investment.

So I just wanted to commend the Senator from Kansas for the point he is trying to make here and reminding us that none of these cost estimates are all that reliable. At the very best, they represent somebody's educated guess.

Mr. DOLE. I thank the distinguished Senator and my colleague.

As we are all certainly aware, I can say very honestly, when a $2 billion price tab was placed on the McGovern amendment, I stood in the well and I heard many Senators say, "What does it cost?" When Senators hear a figure of $2 billion, they vote "No."

It has a very serious impact when people walk into the well who have not listened to the debate and they see a $2 billion price tag and they vote "No." I am not certain the McGovern amendment is going to cost $2 billion. It might not cost anything.

As the Senator from Nebraska has just mentioned to me, farmers pay income tax when they make a profit.

Mr. McGOVERN. I say to the distinguished Senator, if it does cost $2 billion or if it costs three or whatever the mentioned figure is, that represents just a modest contribution toward the losses that farmers are now receiving. It means that to whatever extent these cost factors are accurate, that is the amount by which farmers are now subsidizing the rest of us.

Mr. DOLE. That is absolutely correct.

Mr. McGOVERN. By selling their product below the cost of production.

So to whatever extent the estimate moves legislation out of this Chamber this afternoon that will assure farmers a decent return on what they have to produce, we are making amends for past injustices to the farmers of this country.

When we talk about a $2 billion cost, what about the cost to this country of hundreds of thousands of farm families faced with bankruptcy. That represents a loss in revenue to the Treasury alone that runs many billions of dollars. So I think we need to look at costs from a perspective that is broader than someone's estimate of what a particular amendment is going to cost. We need to consider the larger cost to this country that we are going to face if millions of farm families go under. That will be a cost that is inestimable.

Mr. DOLE. The Senator is absolutely correct.

Before I yield to the Senator from Alabama I want to give him cotton. Those are probably the worst estimates.

The CBO assumes for cotton per pound a 60-cent target price. They figure the marketplace for 46 cents. So that will be a deficiency payment of 14 cents per pound.

Well, the facts are that as of March 17—that was yesterday—the market price was 57 cents a pound, but if you want to paint the worst possible picture you lower the market price and therefore make the deficiency payment greater and you charge up more cost to the Government.

We can all paint these dark pictures and look under rocks and find the worst case but knowing the Senator from Alabama's interest in cotton, I wanted to recite that figure before yielding.

I am happy to yield to the distinguished Senator from Alabama.

Mr. ALLEN. I thank the distinguished Senator from Kansas, and I commend him on the great work that he has done in trying to do something to help the American farmer. I commend him for his recognition that this is an emergency legislation and something must be done and done immediately, and I commend him for his flexible parity concept.

I do have the honor of being one of the cosponsors of the bill as introduced, but I would like to comment on the fact that the bill as it came out of the Committee on Agriculture, pretty well deprives the cotton farmer of the flexible parity concept because it sets a floor, it is true, of 60 cents a pound.

Now as to the Talmadge bill, the figure has been changed to 70 cents as the target price. The Dole amendment, which is now the amendment which came out of the Agriculture Committee, it carried forward the 60-cent target price and did not give the cotton farmer the opportunity by cutting his planted acreage to achieve parity. Now I understand the distinguished Senator from Texas (Mr. TOWER) is to offer an amendment that would restore the parity concept.

Mr. DOLE. The Senator from Texas has just entered the Chamber.

Mr. ALLEN. At the present time it would not be in order to introduce it until the time has expired on the Dole amendment.

I would like to inquire if the distinguished Senator from Kansas would support going back to the original concept of his bill as to cotton?

Mr. DOLE. The Senator from Kansas is willing to restore the concept.

As the Senator from Alabama knows, there was some resistance in the committee on the theory that we are going to devastate the cotton market and inadvertently create an incentive for manmade fibers, but again I think the concept is sound despite those who say that the farmer is going to put too much in set-aside. He does not have any return if he does that.

Mr. ALLEN. But if we do not add that concept back in as to cotton, then if we go to conference we would be frozen at the 70-cent level provided in the Talmadge bill, which achieves 70 cents only by an amendment here on the floor which raised it from 60.

Mr. TOWER. Will the Senator yield?

Mr. ALLEN. Excuse me for just a moment.

Even if we do have the parity concept that would allow by 50 cents reduction in acreage to achieve the 84 cents. If the conference committee is not willing to go along on that, they could cut it down.

But if we do not have that in here there is no way in the world under the conference committee rules that they could go up from the 70 cents; is that not correct?

Mr. DOLE. That is correct. I think that is what the Senator from Texas has in mind.

Mr. TOWER. Mr. President, if the Senator will yield, the Senator from Texas does intend to bring up his flexible support amendment as an amendment.

Mr. ALLEN. I would like to be added as a cosponsor.

Mr. TOWER. As soon as all time is yielded back.

Mr. DOLE. There are others. Senator THURMOND has an interest in that amendment as well as the Senator from Alabama.

Mr. TOWER. I have dearly noted that interest.

Mr. DOLE. May I yield to the Senator from South Carolina 7 minutes at this time?

The PRESIDING OFFICER. The Senator from South Carolina.

Mr. THURMOND. Mr. President, first I commend the able chairman of the Committee on Agriculture (Mr. TALMADGE) for his interest in the farmers and his outstanding leadership in their behalf.

I also commend him for the bill which he introduced to provide emergency assistance to the producers of wheat, feedgrains, upland cotton, and soybeans.

However, I feel that the Flexible Parity Act introduced by the distinguished and able Senator from Kansas (Mr. DOLE) and myself and a number of other Senators is the more practical approach, because it permits the farmer to choose set-asides at target price levels that best suit his needs.

I hope the conference committee will be able to keep in the bill the Flexible Parity Act, as I think it is probably the most practical approach I have seen or that anyone has suggested.

Now, Mr. President, I am deeply concerned about the plight of the farmers. I know the situation in my State, and I think that condition prevails throughout the Nation. The farmers are up against a wall. Their very survival is at stake. They are not receiving as much for their product as it costs to produce it. I want to cite some figures from Clemson University, which is the agricultural college in South Carolina, to substantiate that fact.

Now, these are the 1978 crop production cost estimates that are made by Clemson University. Take wheat, for instance. The State average yield is 38 bushels. It costs the farmer $2.89 per bushel to produce the wheat. The market price is $2.85 per bushel. In other words, the market price will be 4 cents less, Clemson estimates, than it actually costs the farmer to produce it.

This means that instead of making a profit on wheat in my State, the farmers would lose $1.52 an acre on wheat that they produce.

Now, take corn, for instance. Clemson University estimates the State average yield as 60 bushels to the acre. The production cost is $2.66 per bushel. Today's market price is $2.25. That means a loss to the farmer of 41 cents per bushel. This is a loss of $24.60 per acre, a substantial loss.

Let us take soybeans: Clemson University estimates the average State yield is about 21 bushels to the acre. The production cost is $6.26 a bushel. The current market price is $6.30. In other words, a farmer will make a profit of only 4 cents a bushel on soybeans in 1978.

The profit per acre on soybeans will be 84 cents.

Take cotton: Clemson estimates the State average yield as 450 pounds to the acre. They estimate the cost of production at 73 cents a pound. The current market price is 52 cents a pound. Therefore, the farmer loses again. He will get 21 cents per pound less for cotton than it actually cost him to produce it. This means a loss to the farmers of my State of $94.50 per acre to grow cotton. They not only fail to make a profit, but suffer a loss instead. That is the reason why I am joining in an amendment here to raise the cotton target price.

Now, Madam President, I just want to say that no farmer can stay in business in my State with prices at today's level.

There has been talk about the budget. I do not think there has been any Member of this Senate who has stood more for economy than the Senator from South Carolina. But this is a time when we must help this segment of our population, if they are going to survive. If farmers do not survive. then the Nation will have corporation farms and the prices of farm products will go up significantly.

I think it is in the interest not only of the farmer but in the interest of the consumer and in the interest of all the American people that we take action here to help the farmer during this period of crisis.

I want to say further that some people feel the farmer is getting fair prices. He

is receiving, in many cases, less than it costs him to produce, and he cannot stay in business on that basis.

For instance, 10 years ago fertilizer was $58 per ton. Fertilizer now—and these are 1977 figures, and there has even been an increase some from that—is $120 per ton, which is an increase of 106 percent.

Ammonia was $89 per ton compared now to $182 per ton, an increase of 104 percent.

Nitrogen was $65 per ton. Now it is $300 per ton, an increase of 361 percent.

Pesticides have gone up, of course.

We will take a 110-horsepower tractor. Ten years ago it was $8,800. Today it is $21,000, an increase of 138 percent.

Fuel, diesel fuel, 10 years ago was 17 cents per gallon; today it is 45 cents per gallon, an increase of 164 percent.

Lubricating oil, 10 years ago it was $3.18 per gallon; today it is $7 per gallon, an increase of 120 percent.

Maintenance is up 300 percent in the last 10 years. A disc harrow is up 300 to 400 percent in the last 10 years. A combine, an average combine, that sold for $13,000 10 years ago today sells for $45,000, an increase of 246 percent.

Madam President, we see from these figures that what the farmer buys has gone up from 100 to 300 or 400 percent. On the other hand, what he sells is bringing practically little more. This is many times less than his cost of production.

Again I say it is a matter of survival. Do we want the farmers to survive? Do the consumers and people of America want the farmers to exist? We must have food and fiber, and I urge the Senate to take action, and take it today. Let us give relief to these farmers.

Every agency in South Carolina which has anything to do with farmers has recommended that we act on this bill. They prefer the flexible parity bill to the so-called Talmadge bill. I have a letter here from the Agriculture Commission of South Carolina. They are endorsing the flexible parity bill introduced by Senator DOLE, myself, and some other Senators.

I have a letter here signed by Robert E. Connelly, Lynn H. Youmans, and Johnny E. Kirkland representing the American agriculture movement of South Carolina.

I ask unanimous consent that these two letters, together with the attachment, be printed in the RECORD at this point in my remarks.

There being no objection, the letters were ordered to be printed in the RECORD, as follows:

COLUMBIA, S.C., *March 2, 1978.*

HON. STROM THURMOND,
U.S. Senate, Senate Office Building, Washington, D.C.

DEAR SENATOR THURMOND: The enclosed Resolution was adopted at today's special meeting of the Agriculture Commission of South Carolina.

We respectfully request your full support of these two Bills which we feel will offer some help to many of our farmers in overcoming their current financial crisis.

Sincerely yours,

JOHN JAY JAMES,
Chairman.

RESOLUTION

Whereas, South Carolina producers of feed grains and cotton are in a state of uncertainty as to plans for planting such crops in 1978; and

Whereas, outlook for prices for such products is so low as to be unfavorable to yield a profit; and

Whereas, in order to obtain the greatest degree of freedom in planting for 1978 and to obtain 100 percent of parity or less for such products produced and to have a voluntary program; and

Whereas, proposed legislation has been introduced in the Congress of the United States which would provide "flexible" parity for producers who voluntarily agree to reduce acreage of such above crops and thereby receive up to 100% of parity, and

Whereas, such proposed legislation is contained in the Thurmond-Dole Senate Bill S. 2481 and a companion Jenrette-Sebelius House Bill H.R. 10781 merits support, provided soybeans are also included, and offers some hope for profitable production of the above crops. Now, therefore,

Be it resolved that the Agriculture Commission of South Carolina, in session March 2, 1978, urgently requests the full support of all members of our Congressional Delegation on the above proposed legislation.

Be it further resolved that the Commission requests the General Assembly to support the above proposed legislation by Resolution and such resolution be forwarded to members of the State's Congressional Delegation in the national Congress.

MARCH 21, 1978.

DEAR SENATOR THURMOND: We the farmers of South Carolina, representing the American Agriculture Movement of the great state of South Carolina, do support and urge you and your colleagues of the U.S. Senate, to support and vote for the, Flexibility Parity Act, of 1978—Number S 2481.

Sincerely,

ROBERT E. CONNELLY,
LYNN H. YOUMANS,
JOHNNY E. KIRKLAND, Jr.

Mr. THURMOND. Madam President, the South Carolina Farm Bureau also has endorsed this Flexible Parity Act. We can see that the business people of the State and the leading farm movement organizations of the State have endorsed this bill. I hope the flexible parity bill will be acted upon and will be adopted here today.

I wish to commend the able Senator from Kansas for his outstanding foresight and leadership in this matter. No man in this body has worked harder than he, and I wish to express my deep appreciation to him on behalf of our farmers.

Madam President, I ask unanimous consent that a statement I made before the Senate Committee on Agriculture, Nutrition, and Forestry be printed in the RECORD at this point.

There being no objection, the statement was ordered to be printed in the RECORD, as follows:

STATEMENT BY SENATOR STROM THURMOND

Mr. Chairman and members of the committee: I want to thank Chairman Herman Talmadge and Ranking Minority Member Bob Dole for this opportunity to make a statement before this committee. The farmers in my State of South Carolina are experiencing economic difficulties as is the case of farmers all over the country.

South Carolina agriculture has undergone many transitions and adjustments over the years. In the early days, South Carolina was a large producer of rice and indigo. These crops gave way to cotton and tobacco. While tobacco and cotton are still important cash crops in my State, cotton is no longer king. We have a diversified agriculture—we produce sizable acreages of soybeans, peanuts, grain, fruit and vegetable crops. Additionally, we produce beef cattle, daily products, poultry and swine. However, this diversification has not insulated our farmers from the present farm crisis. The problems of inflation have run up the cost of production on all farm commodities and products. This has left all farmers, regardless of what they produce, caught in a cost-price squeeze.

In my State we have many farm families from which one or more family members work in industry. If it were not for this supplement to their incomes from farming, they would be in deep trouble. I welcome these off farm opportunities for the people of my State, but I regret that their earnings from industry must often be used to cover losses from their farming operations.

Farm debt is one of the most accurate barometers of farm distress. Farm debt, as you know, is on the rise. Farm indebtedness increased rapidly in the past year, rising a record 16 percent. Farm debt now totals nearly $120 billion, twice as much as in 1970!

Clearly, farmers don't need more credit, they need better prices.

Four weeks ago the administration released its budget proposal for FY 1979. The budget, as you know, is the biggest ever, and it means a record deficit.

But despite the generous funding increases in many urban-oriented agencies, the budget numbers hold out very little promise for farmers and rural Americans. The total budget of the Department of Agriculture is put at $17.7 billion in 1979—$5 billion less than in 1978. This compares, for example, to the Department of Health, Education and Welfare, which is given a $17 billion increase—an increase nearly as large as the total agriculture budget!

The deepest agriculture cuts occur in the areas of soil and water conservation, rural development, and research.

Let me cite some examples:

Conservation cost-sharing under the agriculture conservation program is cut in half (from $190 million to $100 million).

The resource conservation and development program is phased out of existence.

A number of plant and animal disease control programs are cut or eliminated.

Tobacco research is eliminated.

The forestry incentives program is cut by one-third.

New watershed project starts are eliminated from the small watershed program.

These and other cuts are being proposed at precisely the time when farmers in every State in the nation need all the help they can get just to stay in business.

I support the President's goal of a balanced Federal budget. At the same time, however, I believe that budget cuts should be spread out among all agencies, and that cuts should be made in duplicative, wasteful or unnecessary programs—not in programs that are vital to the economic health and well-being of rural America.

A number of legislative initiatives have been offered by my colleagues. These initiatives range from increasing loans and target price levels to strengthening existing credit programs. The element of time is important to immediately provide farmers with needed assistance. South Carolina farmers are today planting corn. Cotton will be planted by the first of the month.

Therefore, I have cosponsored with Senator Dole and others several bills which are designed to provide this immediate relief.

The first is S. 2481, the Flexible Parity Act of 1978. This bill provides a mechanism under which farmers can collectively control production and under which each individual farmer can select a target price level and set-aside that best applies to his farm situation. Thus, the producers of wheat, feed grains, and cotton can have the opportunity to receive parity prices for their 1978 crops. (However, the bill should be amended to cover soybeans.)

A more aggressive export program for farm exports should also be launched. I do not think we should concede the grain market in the People's Republic of China to the Canadians, the Australians, and the Argentines. We should not concede the cotton, peanut, or tobacco markets of Europe and Asia to our competitors. Therefore, I have cosponsored with Senator Dole and others a second bill—S. 2483. This bill would authorize the Secretary a minimum of $1 billion additional to increase financing for exports in fiscal year 1978 under title I of the Pub. L. 480 program.

As a continuing effort to strengthen farm prices, I cosponsored with Senator Dole and others, a bill, S. 2482, that will provide an incentive to farmers to participate in the extended loan programs for wheat and feed grains by increasing the storage payment to not less than $.25 per bushel. This bill will also require the Secretary of Agriculture to lower interest charges to farmers on commodity loans to not more than the cost of money to commodity credit corporation from the U.S. Treasury.

A fourth bill which I cosponsored with Senator Dole and others, S. 2492, is aimed at providing aid to meat producers. S. 2492 will amend the Meat Import Quota Act of 1964 so that meat import quotas would be adjusted in inverse proportion to changes in per capita U.S. production of cow beef. The suggested formula would have meat imports decreasing when U.S. production of cow beef increased cyclically, and vice versa. This would help provide more stability of supplies and prices.

However, from a long term view, we need some solid thinking on a program that will provide rural America with more than a "quick fix". Therefore, I have introduced a bill, S. 2526, which would establish a bipartisan national parity farm income commission to examine and analyze the long term agricultural problems of our U.S. farmers.

This 15-member Commission shall be composed of farmers, agricultural economists, and scholars, as well as members of the Congress. It would prepare a report to the President and the Congress within one year after its establishment.

I realize, Mr. Chairman, that this legislation that I have cosponsored is not by any means the answer to all of the farmers' problems. However, I am convinced that these bills are a step in the right direction.

I would like to commend the distinguished chairman, Mr. Talmadge, on his bill to provide emergency assistance to the producers of wheat, feed grains, upland cotton, and soybeans. However, I feel that the Flexible Parity Act is a more practical approach because it permits the farmer to choose set-asides and target price levels that best suit his needs. However, if the Flexible Parity Act is not received favorably, I have joined you, Mr. Chairman, in cosponsoring S. 2690.

Mr. Chairman, again I thank you and Senator Dole for this opportunity to appear before the agriculture committee to discuss farm problems of my state and how these problems are a part of the larger national problem. I hope that this committee will be able to soon report out legislation which will be enacted into law, and when coupled with full and quick implementation will help restore prosperity to rural America and the Nation.

Mr. DOLE. Mr. President, I thank my distinguished friend from South Carolina.

Let me add, that one of the places we went for information was South Carolina.

We had hearings in South Carolina. Senator THURMOND was there and is certainly aware of the contribution the farmers made that day.

Madam President, at this point I would like to yield 7 minutes to the distinguished Senator from North Dakota (Mr. YOUNG). Before doing that, let me say particularly to the wheat farmers in America that I would guess that Senator YOUNG has had more impact on wheat legislation than anyone else who has ever been in the Senate. I think that goes without saying. He had served 33 years on the committee as of March 12, just a week ago, and all that experience has been of benefit to the farmers of America.

I am pleased that he supports this concept. It was, in fact, his concept; the target price was not the idea of the Senator from Kansas or the Senator from Georgia, it was the idea of the Senator from North Dakota (Mr. YOUNG).

Mr. YOUNG. Madam President, I deeply appreciate the comments of our colleague from Kansas (Mr. DOLE). I may have had a lot to do with wheat legislation in the past, but in more recent years the Senator from Kansas and the Senator from Georgia (Mr. TALMADGE) have had more important roles than I have had. You are doing a great job for farmers.

Madam President, I rise to support the farm price support legislation amendment sponsored by the distinguished Senator from Kansas (Mr. DOLE) and others.

I support the motion to amend the Talmadge bill by adding the Dole bill. We will have two versions in conference, but both of them have great merit. Out of it could come a better bill than either two.

The Dole bill, like all other bills dealing with farm legislation, is not perfect. It is, however, the best answer that we have right now to cope with the serious financial problems that a sizable number of our farmers are facing. Present farm prices would not be so bad if it were not for the severe inflation we have had in recent years. Only those farmers who were well-fixed and well-established before this severe inflation hit are able to stay even.

The American agriculture movement is composed mostly of young farmers who just got started when farm prices were much higher than they are now. Thus, with their huge investments, high rates of interest, and inflated cost of everything, they cannot help but be in trouble now.

It would not only be a great loss to agriculture, but to the entire Nation if these young farmers had to leave the farm. The average age of our present farmers is approaching the age when most people in other occupations are retiring. Without the young farmers to take over, we will be in serious trouble.

Many people who are unfamiliar with the problem of these farmers seem to think that they are only in the minority. I find that in North Dakota, one of the great farm States, and I think it is true in most other farm States, the majority of all farmers are in sympathy with their request for better farm prices and better price support legislation.

I note in a poll taken by weekly newspapers in North Dakota that not only the majority of farmers are sympathetic to the position taken by the American agriculture movement but other people as well. The result of this weekly newspaper poll was published by the member papers last month. This poll indicates that 74.8 percent of farmers polled and 56.6 percent of the nonfarmers polled support the objectives of the American agriculture movement.

Madam President, I ask unanimous consent to have printed in the RECORD as part of my remarks the results of this poll published by one of the member weekly newspapers, the McLean County Independent of Garrison, N. Dak.

There being no objection, the poll as published was ordered to be printed in the RECORD, as follows:

NORTH DAKOTANS SUPPORT CONCEPT OF FARM STRIKE BY MARGIN OF 2-TO-1

North Dakotans support the concept of a farm strike by a margin of better than 2-to-1, but they're not nearly so keen about continuing cattle blockades along the Canadian border.

A North Dakota Poll survey indicated that 67.0 percent support the concepts of a farm strike, but these same people would reject continuance of blockades along the border by a margin of 39.0 to 38.6 percent even though most, 51.1 percent, felt the blockades were "worthwhile."

As might be expected, farmers were more sympathetic than non-farmers to the blockade and grain freeze efforts which seemingly peaked in North Dakota last month, during the time the survey was taken by 10 community newspapers which make up the North Dakota Poll.

The folks who said they were "engaged in farming" (a total of 458) backed the farm strike concept 74.8 percent to 17.3 with 7.9 undecided. While the non-farmers (numbering 341) also said they supported that concept, the margin was only 56.6 to 32.3 percent with 11.1 undecided.

Poll respondents in the Garrison area had the same general views as North Dakotans in other parts of the state except in this area the non-farmer showed more sympathy to the blockade and grain freeze efforts.

Participating in the North Dakota Poll are 799 or about 40 percent of the 2,000 North Dakotans who were asked opinions on questionnaires mailed to them by their local community newspaper. Newspapers participating in the survey, in addition to the Independent, were the Casselton Reporter, Crosby Journal, Finley Press, Grafton Record, Harvey Herald, Kenmare News, Linton Record, New Rockford Transcript and Stanley Promoter.

Here are the questions and the results, for both North Dakota and the Garrison area:

"Farm strikes and blockades are in the news these days. How you feel is important, and we would like to know:

"Were the cattle blockades at the Canadian border worthwhile? Yes, No, Undecided.

"Should the blockades be continued? Yes, No, Undecided.

"Do you generally support the concepts of a farm strike? Yes, No, Undecided."

North Dakota

While there was strong support for demonstrations by farmers focusing attention on low farm prices, many respondents stressed "sincere hope there will be no violence." Others stressed this nation's good relations with Canada and expressed hope the blockade of cattle won't impede that relationship.

A somewhat typical reaction to the farmers' demonstrations was a comment by a reader of the Independent who wrote: "Organization to work for higher prices is alright, but . . . absolutely no violence!"

Still others thought the blockade was wrong, one man from Kenmare calling it "a Marxist concept" while another, from Stanley, wrote, "As a taxpayer, I don't condone the use of the State Highway Patrol to ride shotgun on cattle coming into the State . . ."

Some were critical of the farmers' efforts to attract attention to low prices. "Parades with 50–60 thousand dollar machines are ridiculous," wrote a Stanley man. A Casselton area resident maintained, ". . . the farms that are in trouble are the ones that have made poor business decisions in the past, buying unneeded equipment for tax credits and holding wheat and durum when they could have sold it for $5 and $8 a bushel."

Others felt that a "buyers' strike" would be more effective. "I don't believe in striking the market," wrote a Kenmare area resident, then asked, "Why not refuse to buy the $60,000 tractor or the $10,000 pickup."

Some people who penned their opinions blamed labor, government leaders and even farmers themselves for the current problem. From New Rockford came an indictment of President Carter: ". . . if Pres. Carter would keep his campaign promises, there would be no problem." But a Casselton Reporter reader laid the blame on North Dakota's congressional delegation, stating "North Dakota needs representation in Washington, and not the self-serving politicians we have now."

A reader of the Independent who said he generally didn't support "this kind of action" (blockades and grain freezes) wrote that he nonetheless felt "we have reached the place of drastic action" because "I feel American agriculture has been sold down the river by Big Labor, Big Business and Big Government."

A Stanley area resident who obviously supported efforts by farmers to raise the prices of their commodities indicated his belief that little would come of the current campaign. "There is no central organization or power structure in this farm strike or in general," he wrote, but he had a solution. "Hire a George Meany for 5–16 percent of gross sales and let him kick ass and take names and farmers would have 150 percent of parity."

Mr. YOUNG. It is interesting to note that this poll indicates there was far less support for the blockades carried out by farmers.

Madam President, the provisions of the Dole bill are workable and I cannot help but feel there would be very sizable participation by farmers. The cost of this bill may seem a little high to some people, but it is very small compared to the amount of good it will do in stabilizing farm income and in keeping the new generation of farmers from going broke. If permitted to go broke, they would have to leave their farms to seek work in our bigger cities where there is already high unemployment.

This would be a small price to pay, not only to stabilize agriculture but all the vast number of businesses associated with agriculture as well. Those who provide the goods and services to agriculture, too, are deep in debt for the credit they have extended. I cannot help but feel the Dole bill would go a long way toward stabilizing our economy in rural America. In doing so, it will also go a long way toward stabilizing the economy of the Nation as a whole.

I yield the floor.

The PRESIDING OFFICER (Mr. LEAHY). Who yields time?

Mr. DOLE. Mr. President, I thank the distinguished Senator from North Dakota.

Is the Senator from Maine prepared to use some of his time?

Mr. MUSKIE. Mr. President, at this point I yield to the distinguished Senator from Iowa (Mr. CLARK); then thereafter I will be glad to get into the issue myself. But he has a time problem, and I am happy to yield 8 minutes at this time to the distinguished Senator from Iowa.

Mr. CLARK. I thank the Senator very much. I shall try to be very brief.

Mr. President, I am very much concerned about what seems to be happening here today, and I would like to talk about that rather than the weaknesses or strengths of this particular bill or that particular amendment.

As Senator DOLE knows, I made the argument in the Agriculture Committee that I am very much afraid that his legislation would cause Federal grain price supports to go so high that it would be devastating to livestock, dairy, poultry, and so forth. But quite aside from whether that argument is valid or not, I am concerned about something rather different.

In my judgment, what is happening here today is that we are abdicating our responsibility as Senators with regard to farm legislation. We are not really facing up to the tough decisions which will be required of us if farmers are to be seriously helped.

Why so? Well, it seems to me what we are doing is saying we are going to support every increase that is presented to us. Then we can each go off this floor and out into the halls, and be patted on the back and take credit for having done everything we could to raise farm prices. We will have voted for everything—everything anybody thought of. That is a comfortable position, given the pressures that I suspect most of us are under with regard to this legislation.

But what is going to happen, now that we have the Talmadge bill, the McGovern amendment, the Allen amendment which raises target prices on cotton from 52 cents to 70 cents; we have the Melcher amendment, and now it appears we are going to have also the Dole amendment? Never mind that the Dole amendment and the Talmadge bill are mutually contradictory—how in the world we could have both of them is beyond me. But never mind that; we are going to support both. We will pass both, and add 20 more on for good measure. Everyone gets everything he wants; we can report to the farmers that we have voted for everything, everything we could think of. Nothing is voted down, and we supported it.

But where will we go with this bill when all the votes are in, and it is amended and amended and amended ad infinitum? Where is this bill going to go after 4 o'clock today, when we vote on it?

I would like to predict at this moment that it is going nowhere. I think most of us know that. It is not going any place after it is passed. No one seriously believes that this bill will be accepted in conference by the House of Representatives, or by the President, first because the Talmadge and Dole bills are mutually contradictory. How can we accept both of them?

Both bills were almost unanimously supported in the committee; I think mine was the only negative vote on the Dole bill in the committee, and I think there were no negative votes on the Talmadge bill. So all those who are going to conference are already committed to vote for both, and now the Senate is apparently going to say, "Yes, we want both"; so that is our instruction to the conference.

Now, with the conferees supporting both bills, and the Senate having passed both bills, what is the conference going to do? Remember, we are attaching this bill to the House-passed bill, so the House is not going to have a chance to debate this bill or to offer amendments. They can debate the conference report, but not this legislation. So I think it is quite clear what will happen after we get done here today: nothing. And I would like to go on record as predicting, first, that there will be no conference until sometime in April; there will not be any conference now before planting season, so there will be delay in any case, even if the bills were adopted. The corn is already in, and the wheat will be in by that time, with no opportunity really to help the farmers.

Mr. DOLE. Mr. President, will the Senator from Iowa yield?

Mr. CLARK. I will yield at the end of my statement.

I think what will happen, therefore, is we will get a conference sometime in April, which will be deadlocked in the House between the Dole and the Talmadge bill, and the other amendments, and we are going to end up with nothing. Farmers are going to be the losers. There will be no bill to help farmers this year if we send this bill with everything. Even if the conference by some miracle passes both of them, mutually contradictory, obviously the President would veto it.

That might give people a good issue to talk about back home. "We did everything we could. We voted for everything. That is the President's fault or somebody else's fault. That is the conference's report." They will blame the President.

What about the farmer? What does he get out of this exercise? He gets absolutely nothing. He may get the benefit of a good political education about how things happen and how things work, but he ends up with nothing, nothing but a kind of cruel hoax which has been played upon him. I came here dedicated to the idea of supporting the Talmadge bill. It is a modest bill. It does not cure all the problems, but it gets some land out of production and gives the proper incentive to get that land out of production. Perhaps we should add some support prices to it. I thought it had a good chance of getting out of this body, getting over into the House, being accepted, and signed by the President before the end of this week, before planting season began. We had every opportunity to help farmers with the Talmadge bill.

That is gone, once we add the Dole bill, in my judgment. That is the end of that. We all have a great issue; we have absolutely nothing for the farmer. I am prepared to yield on the Senator's time.

Mr. DOLE. If that is what the Senator wants to happen——

Mr. CLARK. It is not what the Senator wants to happen.

Mr. DOLE. What does the Senator propose?

Mr. CLARK. That we pass the Talmadge bill, which will be accepted by the House, signed by the President, and go into law before we get deeper into the planting season.

Mr. DOLE. I do not think the House will accept the Talmadge bill without some changes.

Mr. President, this is on my own time.

Certainly, this Senator is not standing on the floor and has not been going to hearings every day, including hearings in Kansas, just for exercise. I think the flexible parity concept is a novel concept that has a great deal of merit. So do other Members in this body, including members of both parties. If the Senator from Iowa does not like it, certainly that is his privilege. I detect, based on a statement I saw issued by the Senator, and a statement on the floor, that maybe it is because I am a Republican. If I were a Democrat, he would probably be embracing that bill. That is his right, to make it a political issue.

I think we have a farm issue which is much more important than politics. I share the view of the distinguished chairman of this committee that we are going to conference to get a farm bill. We do not need any political issues. There is enough time for that later.

Mr. CLARK. If the Senator from Maine will yield 1 additional minute, I do not think it has anything to do with partisanship or where the committee stands. Everybody is supporting all the amendments. It is not a question of that. It is a question, it seems to me, of whether we are going to help farmers. The fact is I would be happy to hear the Senator address himself to whether he really thinks we are going to leave here this afternoon, the conference is going to meet, and the conference will adopt the Talmadge and Dole proposals, and all these other proposals and send them to the President. If the Senator is prepared to say that is what will happen, I am willing to consider it.

I would like to know how we will have both the Talmadge and the Dole bills at the same time. Having resolved that problem, it seems to me the central question is what are we going to do for the farmers, and not just to talk about it. What will come out of this? I see nothing coming out of it.

Mr. DOLE. The Senator has been here a long time and has made a number of contributions to agriculture. I remember the last conference we had he did not think much would come out of that. The point is that we are going to conference with a couple of concepts which we hope can be forged into a stronger instrument for rural America. If the Senator has already given up—I have not—if he has given up on the Senate floor, that is one thing. I am determined. These concepts are not mutually contradictory, as we will explain later on. I will say to the Senator from Iowa I will join him. He will probably be a conferee, and that will be our responsibility. We cannot predict what the House may do.

I share his view that if it is an exercise in futility it is certainly a blow to the American farmer. I do not see it that way. I hope, in cooperation with the Senator from Iowa and others, it will not be that way. I say that as a compliment to the Senator from Iowa since I know of his interest in the bill.

Mr. BELLMON. Will the Senator yield?

Mr. DOLE. I was going to yield to the Senator from Maine.

Mr. MUSKIE. Does the Senator want some time?

Mr. BELLMON. I would like to have 5 minutes.

Mr. MUSKIE. Mr. President, I yield 5 minutes.

Mr. BELLMON. Is the Dole amendment the pending business?

The PRESIDING OFFICER. The Senator is correct.

Mr. BELLMON. Are amendments to the Dole amendment in order?

The PRESIDING OFFICER. Not until the expiration of the time, except by unanimous consent.

Mr. BELLMON. Mr. President, I ask unanimous consent that I may be allowed to offer two amendments which I believe are noncontroversial.

The PRESIDING OFFICER. Is there objection to the unanimous-consent request?

Mr. DOLE. Reserving the right to object——

Mr. HODGES. Mr. President——

The PRESIDING OFFICER. The Senator from Kansas reserves the right to object.

Mr. HODGES. Mr. President, I also reserve the right to object until I find out what the amendments are.

Mr. BELLMON. I would be glad to have the amendments read, Mr. President.

Mr. President, I withdraw the request.

The PRESIDING OFFICER (Mr. MELCHER). The request is withdrawn.

Mr. BELLMON. I would like to ask the Senator from Kansas to enlighten the Senator from Oklahoma. I am a coauthor of the Talmadge bill. I agree very much with what Senator CLARK has said, that we have to do something to help the farmers now and not get caught up in a legislative hassle which will keep us tied up until well into the summer.

I would like to ask the Senator from Kansas to tell me the effect of his amendment to the Talmadge amendment on a typical Kansas farm. Let us say this farm has 1,000 acres of cultivated land. Under the present law, if the farmer wishes to participate, he will be required to set aside 167 acres. Does the Senator agree?

Mr. DOLE. Yes.

Mr. BELLMON. Under the Talmadge amendment, we do not know how much the set-aside would be because the amendment simply requires that the Secretary try to get 15 million acres of wheatland retired in the country. So I do not think we know what the situation would be on any individual farm if the Talmadge bill passed. What about the Dole amendment? How much set-aside would that farmer have to make under the Dole amendment if he chose to qualify for full parity?

Mr. DOLE. It is estimated that the base would be about 35 percent.

Mr. BELLMON. I am talking about one farmer, one farmer who wants to get full parity for his production and he has 1,000 acres of cropland.

Mr. DOLE. 311 acres.

Mr. BELLMON. That is not in addition to the 167 acres under present law. That is the total set-aside?

Mr. DOLE. No. That is in addition.

Mr. BELLMON. What is the total set-aside?

Mr. DOLE. Excuse me. It includes the 167.

Mr. BELLMON. So the farmer would have a set-aside of 311 acres total; right?

Mr. DOLE. Right.

Mr. BELLMON. What would be the situation under the Talmadge bill as amended by Dole? What would that farmer do?

Mr. DOLE. I assume he would probably make an election. If both bills passed, the farmer would elect whether to participate in accordance with the flexible parity schedule, or accept 20 percent set-aside on wheat and 10 percent set-aside on corn under the Talmadge land diversion program.

Mr. BELLMON. Let me inquire. The farmer has 1,000 acres of cropland. The Talmadge bill, as amended by Dole, is now law. The farmer needs to know what to do right away because the crops are rapidly reaching maturity. How much does he set aside? What is his best course of action under the Talmadge bill, as amended by Dole?

Mr. DOLE. To see where he would make the most profit?

Mr. BELLMON. That is right. What is in his best economic interest?

Mr. DOLE. I assume that would be determined by each individual farmer on what he wanted to do.

Mr. BELLMON. I am talking about one individual farmer who has 1,000 acres of cropland. What is his best course of action under the bill we are considering?

Mr. DOLE. Do I know his cost of production?

Mr. BELLMON. I do not see that has any relevance.

Mr. DOLE. I think it would have some relevance.

Mr. BELLMON. His crop is already planted and in the ground, in the southern wheat belt.

Mr. DOLE. If the Senator will give me the facts——

Mr. BELLMON. I am giving the facts. He has 1,000 acres of cultivated land.

Mr. DOLE. If the Senator will give us a little time, we will give an answer.

Mr. BELLMON. I am trying to give the Senator the facts.

Mr. DOLE. The point is, Mr. President, and I would like to have the Senator's attention, I do not think anybody knows what the impact of this legislation is on an individual farm.

Mr. BELLMON. We are passing or are about to pass legislation here on which I do not believe the good Lord himself knows what would be the best course of action for any producer.

Mr. DOLE. I think we have some information, I say to the distinguished Senator, which I shall have available to discuss in a few moments.

Mr. BELLMON. I shall be glad to come back, then. Let us go to another point.

What would be the amount of payment that this farmer with 1,000 acres of wheatland would qualify for under Talmadge as modified by Dole?

Mr. DOLE. That would depend on Congress. I have a payment limit and there is no payment limit in the Talmadge bill.

Mr. BELLMON. We cannot guess what Congress is going to do. We have to look at the legislation before the Senate. I think we need to know what the impact on any single farmer would be. This one I have chosen is a fairly typical 1,000-acre size operation.

Also, if the Senator from Kansas would do so, I would like to know what the projections are as to what the production of wheat in the country under this proposal would be. I think he would agree, we do not want to run the country out of wheat. I am concerned that, if we pass this double-barreled bill, will it be so attractive to farmers to idle land that they will simply idle so much land that we will run short?

We now have around 1,002 million bushels. Could he also give the Senate figures on what the expected production, nationwide, would be, under Talmadge as amended by Dole?

We do not want to cut it so much that there is not enough production to go around.

If the Senator does not have the information, I shall be glad to wait.

Mr. DOLE. Right. They are trying to dig it out here, but we shall provide it.

I think what the Senator is asking is a figure that we do not have; that is, if both bills should become law.

Mr. BELLMON. Mr. President, I shall yield the floor. I hope to get the information from the Senator later on.

Mr. DOLE. We have analysis by the Congressional Budget Office dated March 19.

Mr. BELLMON. What does the analysis show?

Mr. DOLE. According to the Budget Office, it shows that if both programs are fully implemented and H.R. 6782 is administered so as to meet the acreage objectives in the bill, acreage and production would be reduced beyond that estimated for either bill alone. Using CBO's current assumptions on set-aside participation with S. 2481, wheat production would be likely to be around 1.1 billion bushels. However, if all farmers chose both the 50 percent set-aside under S. 2481, and an additional 15 million acres were bid out of production, production could be as low as 700 million bushels, slightly more than domestic consumption. That is the CBO estimate.

They cannot choose both. They have to make an election.

Mr. BELLMON. I hope we can get the facts before we vote on this legislation.

Mr. DOLE. Right. I agree with the Senator from Oklahoma. I do not accept everything that comes out of the Congressional Budget Office as fact.

The PRESIDING OFFICER. Who yields time?

Mr. MUSKIE. Mr. President, I yield myself 10 minutes.

I thought the Senate might like to know the perception that some people outside this Chamber have of what goes on here. I just read in the press that my ACA rating—that is the rating by the Americans for Constitutional Action—was 13 percent last year. I stood on this floor in the last 3 years, opposing and voting against proposals that will breach the budget, and people in this body have voted to breach the budget who have a much better ACA rating than I do. I am a little curious as to what it is all about. So as sort of an exercise in amusement, I have prepared a table here that I might call the Muskie Rating System.

Last year, there were 11 key votes involving the first budget resolution. The Budget Committee lost 8 of those 11 here, in the Senate. I ask unanimous consent that the table indicating those votes be printed in the RECORD at this point.

There being no objection, the table was ordered to be printed in the RECORD, as follows:

COMPARISON OF THE RECORDS OF SENATE REPUBLICANS AND DEMOCRATS ON THE 11 KEY VOTES

[C=votes consistent with the First Budget Resolution; N=votes not consistent with the Resolution]

vote	Democrat (C–N)	Republican (C–N)	Democrat (percent C)	Republican (percent C)	Vote	Democrat (C–N)	Republican (C–N)	Democrat (percent C)	Republican (percent C)
1—Increase Ag Outlays	16–40	11–24	28.6	31.4	7—Recommit Social Security Bill	12–43	24–11	21.[illegible]	68.6
2—Table Tuition Tax Credit	22–32	3–27	40.7	10.0	8—Add Tuition Tax Credit	10–36	1–25	21.7	3.8
3—Increase SBA Loans	6–52	7–30	10.3	18.9	9—Extend Unemployment Benefits	27–19	16–10	58.7	61.5
4—Add Energy Tax Credit for the Elderly	1–55	1–33	1.8	2.9	10—Increase Corn Target Price	38–18	31–7	67.8	81.6
5—Cut Inter-city Bus Tax Credit	26–28	17–14	48.1	54.8	11—Reduce Ag Target Price	28–30	18–20	48.3	47.4
6—Table Residential Energy Tax Credit	13–35	14–13	27.1	51.9					

Mr. MUSKIE. I have another table to accompany that. We have analyzed the votes of every Senator with respect to those 11 key votes. Anybody looking over this list will quickly note that a substantial majority of Senators voted against the budget resolution more often than they voted for it. There are two notable exceptions, Senator BELLMON and myself.

I ask unanimous consent that that table, without the names of Senators, be printed in the RECORD at this point.

There being no objection, the table was ordered to be printed in the RECORD, as follows:

The following table sets forth the stances taken by individual Senators on key votes challenging Senate-established budget targets.

C=vote cast was a position consistent with the First Budget Resolution.

N=vote cast was position not consistent with the First Budget Resolution.

'=no vote was cast, but senator was paired on the side indicated.

"=no vote was cast, but senator announced for the side indicated.

Mr. MUSKIE. I shall strike the names of Senators so that Members may look at this survey dispassionately. If they can identify their own place in the table, that is fine. If not, we shall be glad to supply them with the information.

Why do I refer to this sort of thing? Mr. President, frankly, I think we set something in motion last year and we are adding momentum to that motion here today, that can destroy the budget process. If all we need to breach our own targets is a constituency out in the country, there are plenty of them: In the field of education, the field of health, the senior citizens, veterans—you all know who they are. We can set the example for them here in the way we do this—and there is no doubt in my mind what we are going to do this afternoon—we are going to vote for this package of unanalyzed, undigested, inconsistent proposals, for only one reason. We all know what the reason is.

Do you not suppose that other constituencies are watching? Or, if they are not watching, that they will not quickly learn how to do it for themselves? Do we think this is the only budget function that is vulnerable to that kind of pressure? If you do, you are more naive than a U.S. Senator ought to be.

I told the Senate earlier this morning that the deficit for 1979, if we are to look only to the recommendations of the Appropriations Committee and the Committee on Finance, is going to be $80 billion in 1979, and that does not include this legislation. The Budget Committee has already lost 1 vote today to add to the 11 last year. Now it is 12 votes, of which we have lost 9. We are going to lose at least 2 more this afternoon, so it will be 11 out of 14. As we build up momentum behind our notion that whenever—whenever—there is a loud enough voice and an urgent enough problem raised back home, we are going to breach the budget, the budget process is gone.

I would have supported Talmadge. I was prepared to support Talmadge even though it involved some budget problems.

One of the reasons was that the administration already has the authority to do what Talmadge would do. So we have provided the authority, the budget problems would have been procedural rather than substantive, in my judgment, and I think the problem the farmers face is urgent enough to justify that kind of action.

But now we are adding things we do not even have time to properly analyze.

I listened to the Senator from Kansas complaining about the CBO estimates. We created CBO, this Congress. For what reason? To give us our own analytical arm. We did not want to trust OMB. We did not want to trust the agencies downtown. We created our own.

What does the Senator from Kansas propose? That we brush CBO aside and create another independent arm of some kind.

I ask the Senator which is worse, to put estimates on the basis of the worst case or to put estimates on the basis of the best case?

The Senator is inclined to use the best case, the case that minimizes budget impact, the case that minimizes costs, and he says that CBO is biased the other way.

The second point I would make to the Senator from Kansas is, how in heaven's name—how in heaven's name—does he evaluate either the budget cost or the inflation cost of this three-headed monster? We have Talmadge, we have Dole, we have McGovern.

The Senator from Kansas was using the cost estimates of Dole standing alone. Well, I have some of those, but I do not regard mine as being relevant to this new package, and I am surprised if the Senator from Kansas thinks his are relevant to the new package.

The fact is that we do not have the facts on what this new package is going to cost. We do not have the facts on what its impact on inflation will be. We do not have the facts on what possible shortages may be stimulated by an overgenerous stimulus to farmers to withdraw land from production.

We do not know.

I do not care what the Senator from Kansas' estimates are on his bill. They are not relevant to this new package, and he knows it as well as I do.

There is not a Senator on this floor, including the chairman of the Budget Committee, who can tell any Senator who may inquire, "What is this going to cost, Mr. Chairman? What is the inflation impact going to be, Mr. Chairman? Will this result in too little production? Will it put us in a position to respond economically to a crop shortage this year, if it should happen?

If that should happen, as it did following 1972, what will happen to prices? How will that impact on cattle producers? We do not know.

So, out of the emotion of this emergency, we are going to do something without adequate information. Are we going to build up expectations of the farmers as to what we are doing for them? Are we going to mislead consumers about what we may be doing to them? Are we going to have an impact upon our potential agricultural exports upon which we depend for much of our foreign exchange earnings to pay for our oil? We do not know.

The PRESIDING OFFICER. The time of the Senator has expired.

Mr. MUSKIE. Two more minutes.

The PRESIDING OFFICER. The Senator from Maine.

Mr. MUSKIE. Should we not know things like that, I ask my colleagues, before we embark upon policy making of this quality?

The budget process is something more than holding a ceiling on costs. The budget process is supposed to provide us with information. I cannot see any hunger for information on the floor of the Senate this afternoon.

Mr. President, I am going to discuss estimates with respect to the Dole bill as it was, not because I think that is the kind of information we ought to have, but because it is the only information we do have. We ought to have better, and we ought to wait until we have better information. But no, we are not going to.

The troops are there. The vote was 58-to-31. I doubt that it changes much. So the 58, having the votes, have the power. Because they have the power they are able to say that they are right and that we are wrong. As a matter of fact, we may be a little annoying because we raise these questions.

But I have raised them not just to agriculture programs, may I say to my good farm friends in the galleries, I have raised them all across the budget because I was charged 4 years ago to try to implement a system for disciplining the way in which we pay out taxpayers' dollars.

I do not seem to have much company this morning.

The Muskie survey is now in the RECORD. It will make interesting reading for a number of people.

May I say to the press, I will not supply the names of Senators.

Mr. DOLE. Will the Senator give mine?

The PRESIDING OFFICER. The 2 minutes have expired.

Mr. MUSKIE. Mr. President, I will reserve the remainder of my time, for the time being, because I do want to go elsewhere, and discuss this with the Senator from Kansas, if there is some way we could.

Mr. DOLE. The Senator from Nebraska is willing to proceed for 10 minutes at this point. Would that give the Senator enough time?

Mr. MUSKIE. That will be convenient. I will come back at that time and we can continue the debate.

Mr. CURTIS. I thank the distinguished Senator from Kansas.

The PRESIDING OFFICER. The Senator from Nebraska.

Mr. CURTIS. Mr. President, I am sure that by the time I use my 10 minutes, our beloved friend from Maine will think of something else to say. [Laughter.]

Mr. President, he is a very much loved Senator. He is honest. He speaks with conviction, and he is forceful. But, Mr. President, on the issue of the budget he is totally wrong.

Under his leadership as chairman of the Budget Committee, this country is headed further and further into debt, into larger and larger deficits.

What is it that is weighting the country down? It is the welfare state.

What is our Budget Committee doing about that under the leadership of the distinguished chairman? Nothing.

Take the budget for the Department of Agriculture in round figures. It is $14 billion. Who gets $9 billion of it? Welfare programs. Food stamps and related items.

I stood on this floor and offered amendment after amendment to take out the abuses of the food stamp program. The distinguished chairman of the Budget Committee opposed every one of them.

I am glad to say that not all the members of the Budget Committee did. The distinguished chairman of the Agriculture Committee supported amendments that would do what every American knows ought to be done—reduce the food stamp program.

Has the chairman of the Budget Committee ever come on this floor and asked us to do something about the $9 billion in welfare programs in the Agriculture Budget? No.

Mr. MUSKIE. Will the Senator yield?

Mr. CURTIS. I will yield when I finish my statement.

Mr. MUSKIE. The Senator should review the record to find that, with respect to administration of the food stamp program, the Budget Committee did, indeed, urge the committee of jurisdiction, of which the Senator, I think, is a member, to reform the administration of the program to reduce the cost.

Second, the authorizing legislation originates not in the Budget Committee, which is not a legislative committee, but in the committee of which the Senator is a member. We cannot rewrite legislation. The best we can do is report to the Senate the budgetary consequences of the law as it is.

Mr. CURTIS. The Senator declines to yield further. I have only 10 minutes.

Mr. MUSKIE. The Senator referred to my name.

Mr. CURTIS. I am going to refer to him again. I am very respectfully going to refer to him again.

I stood on this floor and offered 10 amendments to reduce the food stamp program, and the Senator from Maine voted against every one. We do not have that many hungry people in the country. That program can be reduced.

The committee can recommend, but the final action is taken on the Senate floor, and the chairman of the Budget Committee has opposed those amendments.

Where is our money going? Not for national defense, not for the necessary functions of Government. That is what it is costing us to provide, not to govern. These programs are costing us, this year: food, $8,955 billion; housing, $6.8 billion; education, $19.6 billion; assistance to local and State governments, $81.17 billion; medical health programs, $56 billion; unemployment compensation, $10.6 billion; retirement and disability, $122.4 billion; the Panama Canal, $6 billion.

Now, what is the record? Well, if the Director of the Congressional Budget Office does not speak for the distinguished Senator from Maine, for whom does she speak? This is what she was quoted as saying in the press last December. Miss Alice Rivlin has been quoted by the press as favoring increased expenditures and increased tax reduction, which would mean an increased deficit. The press states that her reason is to spur the economy. That is the voice of the chairman of the Budget Committee, favoring increased deficits to spur the economy.

Mr. President, the Secretary of HEW has a proposal to expand the welfare program. It is going to cost between $14 billion and $17 billion. The administration has start-up money in the budget. I challenge the chairman of the Budget Committee to oppose that. Time will tell.

The administration advocates national health insurance. It will cost $75 billion. We have now a medical care program for the aged. We have one for the poor. So they come in and say, "Let's have a program for people who are neither poor nor aged." It is in the administration's program. I challenge the chairman of the Budget Committee to oppose it. Time will tell.

Mr. President, nobody knows what the Humphrey-Hawkins bill will cost, but it will cost plenty. If I were to make a guess, I would guess it would cost between $25 billion and $30 billion. I challenge the chairman of the Budget Committee to oppose it.

Mr. President, this idea of picking on a small minority in our population, the farmers, knowing that out of 100 people, all 100 consume food but maybe 4 or 5 produce it—to pick out those 4 or 5 and club them and club them and club them, year after year, under a pretext of balancing the budget, is ridiculous. That does not constitute the big items in the budget.

The administration brought in here an energy program. We built a great bureaucracy. It is costing $10 billion a year—more money than the profit of all the oil companies in the United States—and it has not produced a pint of new oil. There is not a line in this program to increase production at all. Mr. President, what is the record of the distinguished chairman of the Budget Committee on that $10 billion erection of a huge bureaucracy that produces no oil?

They have what they call countercyclical revenue sharing. Revenue sharing is a scheme whereby we give money to other politicians to spend, which they will not collect themselves in taxes. To speed that up, it is going to cost nearly $6 billion. Not only does the distinguished chairman of the Budget Committee support that; I think he thought it up. It is sort of his proposal.

Oh, it is easy to pick on a small minority of people who produce the food, who supply the only bright spot we have in exports, and club them over the head and pick out the worst assumptions you can to make a picture look bad.

Mr. President, when is the Budget Committee going to get on the side of the taxpayers and attack the cause of big government? It is the welfare state. It is providing for people, not governing.

I mentioned the food stamp program earlier. It is around $6 billion.

The PRESIDING OFFICER. The Senator's time has expired.

Mr. CURTIS. May I have 2 minutes?

Mr. DOLE. I yield 2 minutes to the Senator.

Mr. CURTIS. I had some amendments that I offered to the Committee on Agriculture. I offered them on the floor. I sort of believed this talk that the Budget Committee wanted to balance the budget. I was shocked and disappointed to find here that they were opposed to any reduction.

Also, something needs to be said about the way these figures are arrived at. When they make a commodity loan—they make somebody a corn loan, they count that as an expenditure. Most of those are paid back. If they are not, the Government takes possession of the corn, and the Government gets something out of the corn; so the actual budget loss is what they lose on that, not the original amount of the loan. That is a

mistake in our budget. I would not vouch for all the things in this bill, not at all.

I made a motion in the Agriculture Committee in reference to wheat and feed grains, to raise the target price and the loan price by 50 cents a bushel across the board. My motions failed, but a couple of days later we adopted similar provisions.

I received a call from my State of Nebraska that pointed out that there was no money on Main Street because no one had any to spend.

The PRESIDING OFFICER. The 2 minutes of the Senator have expired.

Mr. DOLE. I yield the Senator 1 minute.

Mr. CURTIS. I received a report from a supplier of feed, fertilizer, seed, and the like. He had $300,000 on his books and he could not collect it, so he could not extend more credit to the farmers, and he could not buy any more.

I realize that commodity loans are not a solution to the farm program, but in this year we provided, for 1 year, to do something about this very problem; and the fact that loan rates will be raised will help every situation on every farm.

Mr. President, if I have said anything unkind about the distinguished chairman of the Budget Committee, about him personally, I point out that he is a man of excellent character and good intentions, but he needs to get on the right track with respect to budget matters. It is the welfare state that is breaking the country. The welfare programs in the Department of Agriculture are getting the lion's share of the money—$9 billion out of $14 billion.

I come from a rural State, and I resent the attacks upon a small minority that, in many respects, stand as individuals and are not organized because of the great diversity and the great geographical area involved.

I thank the distinguished Senator for yielding.

Mr. DOLE. I thank the distinguished Senator from Nebraska and yield 5 minutes on the bill to the distinguished Senator from Alabama.

The PRESIDING OFFICER. The Senator from Alabama.

Mr. ALLEN. I thank the distinguished Senator from Kansas for yielding.

Mr. President, I support the concept of the original bill, because it did extend the concept of flexible parity to all commodities covered by the bill, including cotton. As the bill came out of the Agriculture Committee in effect cotton was deprived of the flexible parity concept and the target price of cotton was frozen in at 60 cents.

Now the Tower amendment, of which I am a cosponsor along with a number of other Senators, restores to the Dole amendment, because the Dole amendment has the same provision as the Dole bill as it came out of the Agriculture Committee, the flexible parity concept to cotton, and I see no reason why cotton should not have the same flexible parity that other commodities have.

Mr. President, just last week as I drove to work one morning, I heard a radio interview with one of the American agriculture movement representatives. In response to a question as to how he was received by the officials at USDA he replied:

> They listen but do not hear, they talk but don't say anything about immediate solutions to our problems.

I believe that the flexible parity concept will provide some immediate relief. I think it will result in a substantial rise in the market price on the commodity exchanges for various commodities and certainly when the 1978 crop comes in the farmers would be guaranteed the price for their commodities that the amount of their set-aside entitled them to.

Mr. President, we in the U.S. Senate have been listening and talking now for more than 2 months to our farmers who have so clearly presented to us their serious problems. Now it is time for action by this body. The united voices of the farmers have reached a crescendo and with one voice they have told us they want parity not charity; the ability to profit within the marketplace not Government subsidy. They should be given that chance.

Thirty-four years ago our late President, Franklin Delano Roosevelt, in his state of the Union message, outlined what he called "The Economic Bill of Rights." Appropriately enough, one of the rights espoused was "The right of every farmer to raise and sell his products at a rate which will give him and his family a decent living." Farmers are as much entitled to that right in 1978 as they were in 1944.

Our farmers have been caught in a terrible cost-price squeeze. The cost of production has more than doubled while prices paid to farmers for their commodities have steadily declined over the last year. Farmers are deeper in debt today than ever before and farm income has declined from $30 billion in 1973 to an estimated $19 billion in 1978. The value of farmland has taken a downward turn and exports are off. Yet this Nation's 2.8 million farms still provide jobs for about 4.4 million people, including the principal operator, working family members, and hired hands. That is more jobs than are provided by such industrial heavyweights as autos and steel. Our national unemployment percentage reached a 3-year low in February at 6.1 percent, which brings great relief to us all, but with a continual decline in the farm income, there will surely be an increase in the number of farmers looking for other jobs, at a time when unemployment among nonfarmers is just beginning to show improvement. But, what can we expect when USDA figures reveal that last year the average income per farm was $7,885, compared with a peak of $10,529 in 1973. Alabama farmers have patiently and forcefully outlined their economic inequities to me along with their suggested solutions. They do not want sympathy or a Government handout. They want a fair price for their crops and livestock.

This Nation is composed of the sum of its separate parts. When one part of its economy is sick, the entire economy suffers. We cannot have a healthy national economy in the absence of a healthy agricultural economy. We, here today, have a real responsibility to do what is reasonable, responsible, and feasible in helping farmers achieve a fair share of the national income.

After traveling throughout Alabama last summer and fall, seeing first hand the situation in the agriculture sector, and hearing the serious financial plight that my farmers were in, I came back to Washington and introduced S. 2392 on January 19, the first day of the 2d session of this Congress, to increase the target prices on cotton and corn for the 1977 and 1978 crops. I said at the time that this legislation was no "cure-all" but that it could serve as a vehicle for the attachment of other sound, reasonable, and practical amendments which could bring much needed assistance to our sorely depressed agricultural economy. That bill, in my judgment, served that purpose.

Following this legislative initiative came the Flexible Parity Act of 1978 as introduced by my distinguished colleague, Senator DOLE, on February 2, which I gladly cosponsored and which many of my farmers preferred. This bill, which would allow an individual farmer to choose the target price he needs all the way up to 100 percent of parity, so long as he scales down his production accordingly, is an innovative idea for these unusual circumstances in which the farmer finds himself.

On February 9, I joined my dedicated colleagues on the Agriculture Committee in cosponsoring Senate Resolution 393, which called upon the President and the Secretary of Agriculture to use the authority vested in them by the 1977 farm bill to ease the financial crisis faced by the farmer. But this was evidently another instance in which USDA and the administration listened, but did not hear and talked without offering any solution. Even as the crisis grows deeper and the hour grows later, Secretary Bergland was saying on television Sunday that we did not need legislation, but could remedy the current crisis by using the 1977 farm bill administratively. Mr. President, those provisions giving the Secretary of Agriculture discretionary authority to act in situations like this, could have been put into effect long ago. In my State it is planting time right now. In some States some crops are already in the ground. Our farmers cannot wait any longer. The legislative branch of the Government must act now to deliver the farmers from the quagmire in which they find themselves through no fault of their own.

After 10 days of extensive hearings by the Agriculture Committee when we heard more than 150 witnesses, our chairman introduced the Emergency Agricultural Act of 1978, S. 2690, and I was delighted to be listed among its cosponsors. This bill, which we are presently considering, can and will give emergency relief to our farmers which they so desperately need. The witnesses who appeared before our committee agreed and the members of the committee concur, that due to our large surpluses and carryover stocks, we need a reduction in planted acreage. This bill will take some

31 million acres out of production and infuse some $1 billion into the hands of producers immediately to alleviate the financial anemia which is plaguing them. Our farmers are standing by awaiting some signal from Washington as to what relief we intend to give them and we must therefore act with dispatch.

This legislation before us today, S. 2690 and S. 2481, will solve our greatest problems—the problem of excessive stocks. Planting intentions registered by our farmers indicate that the potential 1978 crops may add to these stocks by more large carryovers. Our country, the most efficient agricultural producing nation in the world, is faced with the necessity of reduced production. By reducing production we can at the same time raise the income of our farmers by increasing the value of their commodities at the marketplace, thus covering their cost of production and providing a fair return to the producer. These bills before us today will not only give the farmer higher prices in the marketplace, but will decrease excess stocks now hanging over the marketplace driving prices received by the farmers ever downward.

I know that the issue of cost to the Government will be raised and it is appropriate that it should. But those who raise that issue should bear in mind that we are faced with an emergency situation here. The agricultural economy of my State and every other State, is on the verge of collapse.

Congress must now provide an immediate infusion of financial help to enable farmers to pay off their debts, meet their notes, buy new farm equipment, and to continue producing food and fiber. We have given financial assistance to every other sector of our national economy when faced with emergency situations and disasters. There have been emergency public works projects along with emergency unemployment legislation, but there are few, it seems who are enthusiastic about helping the agricultural sector in its time of distress. Some of the farmers have even accused us of "stonewalling." But if the farm sector fails, those businesses related to agriculture are placed in jeopardy also—the farm machinery dealer, the hardware merchant the rural banks which have loaned him money, and those other merchants whose livelihood is dependent on farms and farmers. The economy of many of our small towns is totally dependent upon the farmer. The sectors of our economy are mutually dependent on each other. When one is unhealthy, all function at less than total efficiency. The Nation's continued prosperity lies in a strong and stable agriculture.

There will be those here today who worry about the cost of whatever legislation we pass on the one hand while on the other hand taking little thought as to what it will cost the American taxpayer to give away the Panama Canal. Yes; we liberally give billions in foreign aid and then conservatively question the cost-benefit ratio of meeting the domestic emergency faced by our farmers. We glibly talk of a $25 to $35 billion cut in Federal income taxes beginning October 1 of this year. Mr. President, we could do more for our country, our farmers, and our consumers by cutting this proposed reduction in Federal income taxes enough to offset what this legislation will cost and channeling it into the agricultural sector of our economy on which every other sector depends. The cost of these farm bills pales when compared to our expenditures in other areas.

Of course, I am concerned about inflation, Mr. President. I have consistently fought to balance our budget and restrain Federal spending. But for too long our Government has used the farmer as its number one hedge against inflation. It is not fair to deny the farmer a decent wage and a decent profit to balance off the inflation effects of other governmental programs and legislation. The farmer cannot be sacrificed any longer and he should not be asked to sacrifice anymore. We must make sure he has his fair share of the national income just as he inherits his share of the national debt and that he is given his proper recognition as the very "backbone" of this Nation and its economy.

Alabama farmers and those from across the Nation have stated to me privately and have announced publicly that they are willing to reduce production. They would prefer, however, to remain in business in the process so that they might continue to produce for themselves, the American consumer, and for the world market. They must not be held hostage to a "cheap food policy" whether it be by this administration or any administration.

Mr. President, these men and women of our established farm organizations and of the American agriculture movement have come to us in good faith exercising their right to present their grievances to their Government through their elected officials expecting redress therefrom. For the most part, they have been patient. Some in their desperation have become hostile, but only a few. I wish to compliment those from Alabama who have been here for the past 2 months for their decorum and demeanor. They have raised the profile of American agriculture and the American farmer as never before. This country is more farmer conscious today than ever before. The farmer, as a result of these efforts, has more friends and more understanding and more appreciation than ever before.

Consequently, Mr. President, it would be the cruelest hoax ever if after the investment of their time, their energy, their money, and the efforts of the Committee on Agriculture, we failed to pass this emergency legislation before us today. Therefore, I implore my colleagues to support these needed pieces of legislation which can be so effective in bringing relief to our beleaguered farmers.

I yield the floor.

The PRESIDING OFFICER. The Senator from Kansas.

Mr. DOLE. Mr. President, how much time does the Senator from Kansas have remaining on the amendment?

The PRESIDING OFFICER. The Senator from Kansas has 5 minutes remaining.

Mr. DOLE. I am not certain what the wishes of the distinguished Senator from Maine are. He has 21 minutes remaining?

The PRESIDING OFFICER. The Senator from Maine has 18 minutes remaining.

Mr. DOLE. I wonder if I might have 5 minutes on the bill while we are waiting for the Senator from Maine to return.

The PRESIDING OFFICER. The Senator from Kansas is recognized for 5 minutes.

Mr. DOLE. Mr. President, just let me say that there has been some concern expressed by the distinguished Senator from Iowa, Senator CLARK, and I think the Senator from Oklahoma, Senator BELLMON, that if the Dole bill were implemented, we would run out of wheat or run out of cotton.

I am taking the USDA estimates which I assume would be accurate. In 1978–79 under the current program we will have a wheat carryover of 1.1 billion bushels. Under the Talmadge bill, we will have a carryover of 800 million bushels, and under the Dole bill we will have a carryover of 957 million bushels.

With reference to corn, under the current program we have 1.2 billion bushels, under the Talmadge bill we have 590 million bushels, and under the Dole bill 1.1 billion bushels.

Under feed grains, the ending stocks in million metric tons, under the current program we have 45.5, under Talmadge 23.5, and under the Dole bill 40.5 million metric tons.

I supply those figures for the RECORD so that Senator BELLMON and others who are concerned about running out of wheat and the price of wheat going too high, whatever that is, will have that information.

Mr. President, I again emphasize the CBO estimates, because I serve on the Budget Committee and I have the greatest respect for the Congressional Budget Office and the Budget Committee. But when they use prices that are lower than today's market prices, it is pretty hard for this Senator to understand how they can give an accurate estimate of the bill.

There has also been some question about the Flexible Parity Act in its administration.

I received a letter this morning from Harold Hunter, former Oklahoma State executive director of ASCS, and Frank Mosier, former Kansas State executive director of ASCS. It said:

> One of the merits of your Flexible Parity Bill is the simplicity of its administration.
>
> As former State Executive Directors in Kansas and Oklahoma, we would like to endorse your concept of flexible target prices and indicate the ease with which we feel such a program could be administered in the State and County offices. We are confident that other persons now employed by ASCS in top positions would concur, but hesitate to step forward for fear of jeopardizing their position.
>
> The requirements for eligibility at the various levels of participation would be uniform to all producers and easily stated. The benefits accruing to the producer could be easily understood by him.
>
> The proposal of the Department to the producer would be a firm contractual com-

mitment, based on the options relating to the level of set aside provided by the producer.

The producer could have a clear understanding of these options and the benefits inherent to each.

And this is the key paragraph:

We administered the target price provisions of the present law for the past five years and feel the extension of flexible targets would only necessitate the printing of another form. Certification is verified on a random basis, which has proven very accurate and satisfactory.

Furthermore, if you and Chairman Talmadge should decide to combine your flexible target concept and paid diversion programs, we feel it would be equally as easy to administer and would necessitate only adding another option for the farmer to choose from when he signs up for the program.

Because of the innovative benefits this legislation would provide our farmers and the extreme need many farmers face today, we hope you are successful in passing this legislation.

(Mr. INOUYE assumed the chair.)

Mr. DOLE. Mr. President, another objection raised to the flexible parity concept is that the Talmadge bill would make one-half of the payment immediately.

It seems to me that the one thing we do with the flexible parity concept once it is enacted is to raise the market price.

Another thing we do is guarantee the farmer a certain target price and hope the market price goes higher, but he has that guarantee.

Mr. President, I have a number of telegrams from bankers indicating that the flexible parity bill would allow bankers to loan money to farmers to plant crops. Let me just read two or three of those while waiting for Senator MUSKIE to return.

One telegram is from Floyd Pinnick, president, Grant County State Bank:

I am manager of Kansas' second largest agricultural lending commercial bank. I have studied Senator Dole's flexible support bill. I believe that the farmer benefits from this bill through establishing a target price for wheat from $3 to $5.04 will enable the farmer to borrow from our bank against this commitment.

Another one is from Max Dickerson, senior vice president, Commercial National Bank, Kansas City, Kans., addressed to me:

If your bill would provide for some instrument from ASC that certain payments would be received by the farmer most agricultural bankers would loan money on that instrument for immediate funds some banker might want a formal method of assignment your bill would be very helpful to agriculture.

The PRESIDING OFFICER. The Senator's 5 minutes have expired.

Mr. DOLE. Mr. President, I yield myself an additional 5 minutes on the bill.

The PRESIDING OFFICER. The Senator is recognized for 5 additional minutes.

Mr. DOLE. Mr. President, we have a number of telegrams from Oklahoma and from Kansas supporting the Talmadge bill and the Dole bill and indicating that in either event, either through the prepayment by Senator TALMADGE or the fact that we are going to have a guaranteed price and the flexible parity concept it is going to ease the credit pinch for farmers. I ask unanimous consent that those telegrams be made a part of the RECORD.

There being no objection, the telegrams were ordered to be printed in the RECORD, as follows:

Senator BOB DOLE,
U.S. Senate,
Washington, D.C.

I am manager of Kansas' second largest agricultural lending commercial bank. I have studied Senator Dole's flexible support bill. I believe that the farmer benefits from this bill through establishing a target price for wheat from $3 to $5.04 will enable the farmer to borrow from our bank against this commitment.

FLOYD PINNICK.
President, Grant County State Bank.

Senator ROBERT DOLE:

If Dole-Talmadge bill is enacted it will assist the farmers credit considerably.

Mr. and Mrs. WALLY KLINE.

Re financing farmers for 1978 production.
Senator ROBERT DOLE,
Senate Office Building,
Washington. D.C.:

If your bill would provide for some instrument from ASC that certain payments would be received by the farmer most agricultural bankers would loan money on that instrument for immediate funds some banker might want a formal method of assignment your bill would be very helpful to agriculture.

MAX DICKERSON, Sr.
Vice President, Commercial National Bank, Kansas City, Kans.

Senator ROBERT DOLE:

We support your Senate Bill as well as Senator Talmadge's bill.

ORIN LANCASTER,
Vice President, Central National Bank.

Senator ROBERT DOLE:

We support your farm bill. It is urgently needed in our area.

WESLEY NIXON,
President, Freedom State Bank.

Senator BOB DOLE:

We at the First Security Bank have many farm customers who in the next few weeks will be needing financing in order to plant this year's spring crops. It would be easier for us to justify providing these loans if we were assured that these farmers would be given the opportunity to receive a fair price for their products. Therefore we urge you to support the Dole flexible parity concept as we feel that it would give our farmers the best opportunity to receive a fair price for their products.

J. C. LYLE,
President, First Security Bank,
Beaver, Okla.

Senator BOB DOLE:

Passage of Dole-Sebelius amendments will strengthen the lending ability to farmers in this area.

LESTER SNOW,
President, First State Bank.

Senator BOB DOLE:

We at the Bank of Beaver City have many farm customers who in the next few weeks will be needing financing in order to plant this year's spring crops. It would be easier for us to justify providing these loans if we were assured that these farmers would be given the opportunity to receive a fair price for their products. Therefore we urge you to support the Dole flexible parity concept as we feel that it would give our farmers the best opportunity to receive a fair price for their products.

A. C. HARRIS,
President, Bank of Beaver City,
Beaver, Okla.

Senator ROBERT DOLE:
Capitol Building,
Washington, D.C.

If the Dole flexible parity bill is enacted it will have a positive effect on our policy in lending to farmers.

MIKE PERKINS,
State Guaranty Bank.

Mr. DOLE. Finally, Mr. President, I want to go back to the CBO. We are in the process now of trying to compute the cost of the flexible parity approach. If we just use today's prices—they used prices lower than today's market prices in figuring the cost of my bill and even with that figure the cost over a 5-year period is only $621 million.

The price of cotton, according to the Wall Street Journal yesterday was 57 cents. The target price of my bill is 60 cents, but the Budget Office used a market price of 46 cents.

So the deficiency payment would be 14 cents a pound instead of 3 cents per pound.

Well, it would not take any genius to understand very quickly they used the worst example they could find and we are willing to accept that it may cost some money—we do not believe so—but I think it is much more objective and more meaningful, and the American farmer knows how it is based and what the costs are.

I am not going to accept the Budget Office figures when they use market prices to figure the costs of my bill, when it is lower than today's market price before the bill has had any impact. Once the bill is enacted, whether it is by itself or whether it is in combination, or whatever may happen, there is going to be an impact. Acres will be then out of production. The market price is going to rise and the deficiency payment is going to be much smaller.

So I just suggest, based on what I consider not to be estimates but guesses, and not even very accurate guesses, that the cost of the program being proposed now as an amendment would be, if anything, on the negative side. It would be a plus over current policies.

Let us not forget there is some cost in the present farm bill. I think over the life of this bill the costs are around $12 billion.

So I suggest that in either the Talmadge approach or the flexible parity approach that the Congressional Budget Office figures may not be accurate.

It seems to me that we ought to keep this in mind as we consider this legislation.

Mr. TOWER. Will the Senator yield me 5 minutes on the bill?

Mr. DOLE. I yield 5 minutes to the Senator from Texas.

Mr. TOWER. I thank my friend from Kansas. I have an amendment that I intend to offer when the time expires, but since the Senator from Maine is not here, I think perhaps we could do some talking about it right now and save some time later on.

Mr. President, when I joined the distinguished Senator from Kansas in introducing S. 2481. I was particularly pleased that the legislation contained provisions for wheat, feed grains, and upland cotton. On Wednesday of last week, however, the Agriculture Committee deleted the flexible parity concept for upland cotton, and reported the bill with a target price of 60 cents per pound when a producer voluntarily sets aside 20 percent of the acreage planted for 1978 harvest instead. In other words, to be eligible for the 60-cent established price, farmers must cut back 20 percent.

The cotton producers in my State, and producers in other cotton-producing areas tell me that they could make better production and management decisions if they were afforded the same options as we are now considering for those who produce wheat and feed grains.

In my view, cotton farmers should be afforded the same opportunity as producers of wheat and feed grains to make decisions based upon their cost-price analyses. Our Nation's food and fiber producers want what any other businessman wants—the opportunity to sell a product and realize a reasonable rate of return on investment. When farm income is compared with farm equity, the farmer's return in 1976 was only 2.4 percent as compared to approximately 13.5 percent in other industries. Our farmers and ranchers want to be able to make production decisions which are based upon sound management practices, founded upon realistic cost-price analyses.

Amending the Dole amendment to insert the original concept of flexible parity will not interfere with export markets. It will not encourage an individual farmer to substitute with other crops. It simply would allow cotton farmers to set the target price they need to remain financially solvent when increases in target prices, up to parity, are accompanied with decreases in production.

Even if the program we are considering is enacted into law, producers must continue to deal with physical risks which occur from destruction or deterioration of the product itself by unfavorable weather conditions. Farmers and stockmen must still obtain the necessary financial resources. They must continue to exercise the management skills and production efficiencies which are as inescapable as the need for feed, seed, or fertilizer.

Mr. President, in 1976, Texas farmers produced 3.307 million of the 10.5 million bales of upland cotton produced in this country. Roughly 70 percent of the Texas production is sold abroad. The problem we face at this point is that there is an oversupply of cotton in this country which continually depresses prices in the marketplace.

Under my amendment, if the farmer chooses to cut back 30 percent, he assures himself of a target price of 60 cents, allowing him the necessary room to adjust his production and management decisions such that his efforts will be fruitful.

Upland cotton is produced in 18 States and is of appreciable significance in 13 of those States. Of those principal 13 States, cotton accounts for from about 1.7 percent of the total cash farm receipts in Missouri to 21 percent in the State of Arizona.

I hope that my colleagues in the Senate will lend their support to my amendment to the Dole amendment so that we can give cotton producers the opportunity to avoid financial ruin and failure.

I should like to ask my distinguished friend from Kansas if he might be prepared to accept the amendment that I offered as an amendment to his amendment to establish this flexible formula for cotton.

Mr. DOLE. The Senator from Kansas is prepared to accept the amendment.

It was, as the Senator knows, part of the original Tower-Dole bill, and there was some objection raised in the committee. There has been a change made in the McGovern amendment which raises the target price of cotton to 70 cents. I do not have the same reservations about the amendment that some had in the committee.

I would certainly be willing to accept it as a part of my amendment.

Mr. TOWER. I thank my distinguished friend from Kansas.

If he is prepared to accept the amendment, and in the interest of the preservation of time, if he would accept it as a modification to his amendment, I think we would then not have to go through the time expiration process.

Mr. DOLE. Mr. President, I think on that basis that if it would save some time I would so modify the amendment. I would send a modification to the desk.

Mr. TOWER. I send the modification to the desk.

The PRESIDING OFFICER. The Chair reminds the Senator that such modification takes unanimous consent.

Mr. TALMADGE. The yeas and nays have not been ordered.

Mr. DOLE. Have the yeas and nays been ordered?

The PRESIDING OFFICER. There is a specific time limitation on the amendment.

Mr. TOWER. I simply asked the Senator from Kansas to modify his amendment to include language that I have proposed. It is my understanding that if he accepts that modification it is not necessary to act on the amendment.

The Senator from Kansas has the right to modify his own amendment.

Mr. DOLE. I think under a time constraint it would take unanimous consent since there might be someone here who will object and not——

Mr. TOWER. I ask unanimous consent that the Senator from Kansas be allowed to so modify his amendment.

The PRESIDING OFFICER. Is there objection?

The Chair hears none, and without objection, it is so ordered.

Mr. TOWER. I thank my distinguished friend from Kansas for the modification.

UP AMENDMENT NO. 1217

The PRESIDING OFFICER. The clerk will report the modification.

The legislative clerk read as follows:

On page 3, delete section 118 and insert in lieu thereof:

"Notwithstanding any other provisions of this Act, the established price for the 1978 crop of upland cotton shall be at a level related to the amount of cropland that the producers on a farm voluntarily elect to set aside from production. If the acreage the producers voluntarily set aside is—

(1) 20 per centum, the established price shall be 54 cents per pound;

(2) 25 per centum, the established price shall be 59 cents per pound;

(3) 30 per centum, the established price shall be 64 cents per pound;

(4) 35 per centum, the established price shall be 69 cents per pound;

(5) 40 per centum, the established price shall be 74 cents per pound;

(6) 45 per centum, the established price shall be 79 cents per pound;

(7) 50 per centum, the established price shall be 84 cents per pound."

The PRESIDING OFFICER. Who yields time?

Mr. TALMADGE. Mr. President, I ask unanimous consent that I may have a brief rollcall, without it being charged to either side, for the purpose of getting word to the distinguished Senator from Maine that there is an amendment on the floor, if he wants to use the remainder of his time.

The PRESIDING OFFICER. The Senator from Kansas (Mr. DOLE) time has expired.

Mr. TALMADGE. We would like to get word to the distinguished Senator from Maine concerning the amendment if he wants to use the remainder of the time to come to the floor. I ask unanimous consent that I may have a brief rollcall, without it being charged to either side, Mr. President.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. TALMADGE. Mr. President, I suggest the absence of a quorum, and I ask the clerk to let the Senator from Maine know that he is desired here on the Senate floor.

The PRESIDING OFFICER. The clerk will call the roll. The legislative clerk called the roll.

Mr. TALMADGE. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. MUSKIE. Mr. President, I yield myself 10 minutes. I find it difficult to believe that everyone else is talked out. Perhaps I can stimulate a little more discussion.

Mr. President, no one questions that farmers in this country face an economic crisis. I understand that crisis and I sympathize with those who are concerned about the fate of the family farm.

In my own State, agricultural output is almost entirely from family farms.

In Maine as in the rest of the country, families have proved to be an efficient social and economic unit.

Family farms are the backbone of rural communities.

They are important for the food and fiber they produce and the way of life they preserve.

I am committed to these families who produce food for our own people and much of the world.

The amendment offered by Senator Dole, originally the Flexible Parity Act of 1978, is designed to provide relief for producers of wheat and feed grains, representing approximately one-third of America's farm output.

It also provides assistance to growers of upland cotton.

Falling prices, the burden of interest payments and increased operating expenses have caught these farmers in a cost-price squeeze.

Of course, not all farmers are so situated.

Wheat and feed grain producers have suffered while cattle, poultry and hog producers have actually benefited from low feed prices.

Nevertheless, there is a serious problem.

This amendment establishes a system of graduated target prices for wheat, feed grains and upland cotton based on the acreage a farmer chooses to set aside from production.

The amendment also increases the minimum loan rate for the 1978 crops of wheat and corn, raises the prices controlling the release of Government and farmer owned stockpiles of grain and increases the authorization for the food-for-peace program (Public Law 480).

The purpose of the amendment is to remove acreage from production and increase farmers' selling prices and income.

While the problem the farmers face is very real, we can not afford the luxury of considering this bill only in relation to their needs.

Careful thought must be given to the impact this amendment will have on inflation, food supplies and the Federal budget.

I remind my colleagues that because we now have not just the Dole amendment, but the Dole amendment taken together with the McGovern amendment to the Talmadge amendment, all of these figures which I use and which other Senators have used are suspect. But these figures give us an order of magnitude that we ought to take into account.

Overall prices are expected to rise 6.2 percent in 1979 under current law.

The Congressional Budget Office estimates the amendment would add 0.36 to 0.5 percent to the rate of increases in the Consumer Price Index.

This will cost the consumer up to $6 billion in 1979. This amendment would increase the annual food costs for a family of four by $100.

These costs result not only from the acreage that is taken out of production but also because the loan rate for commodities and thus prices will be increased by direct Government action.

These estimates take into account the fact that grains are only part of food costs and food only part of the Consumer Price Index.

Further, these figures reflect only the "first round" effect.

The Budget Office estimates that by 1981 the total inflationary impact would be nearly twice the first round effect because the more rapid increase in consumer prices would result in higher wage increases and thus higher product prices in other sectors of the economy.

This amendment could reduce stocks to a dangerous level and increase the risk that crop failures will result in food shortages and runaway commodity prices.

According to Congressional Budget Office estimates, compared to current law, this amendment would result in a diversion of about 29 million acres.

This in turn will result in a 20-percent drop in production of wheat and feed grains.

Wheat stocks under the amendment would drop by about 33 percent and feed grains by about 47 percent by the end of marketing year 1978.

Wheat stocks in the farmer-held reserve would be reduced by 50 percent and feed grain stocks in the farmer-held reserve would be reduced by 97 percent compared to current policy.

The stocks of farmer commodities at the end of 1972—if we are interested in history—were insufficient to prevent massive increases in corn and wheat prices when consecutive major crop failures took place in 1973 and 1974.

Under this amendment wheat stocks would be below their 1972 levels and feed grain stocks would be only half of their 1972 levels.

The risk of shortages and inflation would increase and the size of the potential price increases would be larger.

This action is being proposed at a time when world grain consumption has increased 50 million tons in each of the past 3 years.

Given these increases in consumption and the limits on production in this amendment, the resulting stocks are not big enough.

In the last 2 years, we have had unusually good weather and bumper crops.

We cannot assume this will continue indefinitely. We must anticipate the lean as well as the bumper years.

Without adequate stocks, bad weather here or abroad could result in a problem of the same magnitude of 1973 and 1974.

Turning to budget costs, this amendment will result in additional net outlays of $3 billion through fiscal year 1979, $2.4 billion of which will be direct payments to farmers, not loans. It increases the farmers' dependence on Government payments and on Government-controlled prices.

The fiscal year 1978 savings in this amendment are illusory.

They are simply the result of early repayment of loans.

Further, although this amendment authorizes higher loan rates only for fiscal year 1978, I am sure all of us realize the difficulty of lowering these rates in the future.

The administration contends the current law has not had time to achieve its intended results.

There is some evidence to support that contention.

Wheat farmers, have placed nearly 220 million bushels in the grain reserve, two-thirds of the administration's goal of 330 million bushels.

I would emphasize here that this amendment would cut the reserve program.

Although I am sympathetic to the plight of farmers in financial distress, I believe we should place their problems in proper perspective.

The PRESIDING OFFICER. The Senator's 10 minutes have expired.

Mr. TALMADGE. Mr. President, I yield an additional 5 minutes.

The PRESIDING OFFICER. The Senator is recognized for an additional 5 minutes.

Mr. MUSKIE. I thank the Senator.

I remind my colleagues that in 1973 and 1974 grain prices soared. Farmers who were meat producers lost their shirts. They were forced to butcher their stocks and consumers reaped the advantage of exceptionally low meat prices. As grain prices have come down profitability has been restored to meat production and herds have been replenished.

During that period of exceptionally high grain prices many farmers believed that $5 per bushel of wheat was here to stay. Consequently they bought more land and invested heavily in new machinery and implements. In the process the price of farmland soared and farmers now find themselves with unrealistically high mortgages.

Experience should have taught us by now that efforts to drive up grain prices will only serve to drive up the price of land, proving the old saying that in agriculture land gets all the profit.

Now prices for grain have come back down. As a consequence many young farmers, people who have just entered farming, are hurting very badly. They purchased land at unrealistically high prices which in turn reflected the ephemeral phenomenon of high grain prices.

I sympathize with them but I do not believe that we should prescribe a remedy which will take us on another roller coaster ride of higher prices followed by disastrous contractions. These trips will leave many Americans high and dry with only frustrated dreams to carry them through the tough times.

Should we begin to think about the long-term consequences of our actions in the agriculture sector?

Should we continue to approach these problems on an ad hoc basis without carefully weighing the budgetary, fiscal, and economic factors which affect American farmers, and about which we have inadequate information today, before we vote on this three-headed bill?

Should we continue on our present course, which calls for Federal direct and indirect burdens on us as taxpayers and consumers?

Should we continue to ignore the budget process as we rush headlong into still another ill-conceived series of programs to bail out American farmers?

I believe we must undertake a responsible, prudent course and let the current farm program—which we enacted into law with such high hopes on the part of the sponsors just last year—have a chance to operate.

For these reasons, Mr. President, I must oppose the Dole amendment. I reserve the remainder of my time.

Mr. DOLE. I would hope the distinguished Senator would yield back any unused time.

As I understand, the impact on retail

prices and consumer expenditures in 1979 will be plus 1 percent under the Dole proposal and plus 1.3 under the Talmadge proposal. As I indicated in the absence of the distinguished Senator from Maine, as far as corn is concerned, under the Dole bill there will still be about 1.1 billion bushels, and wheat will be 957 million bushels, which is more than adequate.

I would also say, with reference to the comments of the Senator from Maine, I certainly do think we have to look at the long range. I think that is what the farmers have been telling us for the past several weeks.

With reference to world supplies, most farmers feel, and I think the records reflect, that we are sort of the world's granary, that we will have our farmers hold wheat at their cost. They cannot even sell it for the cost of production. They have sort of become the world grain suppliers. That is certainly not fair to the American producer.

Our bins are full, and that is another reason prices are depressed. That is the reason that both myself and the distinguished Senator from Georgia are trying to address the problem, to reduce the production unit in an effort to take some of the pressure off the market, which we hope will be reflected in higher grain prices.

This is not to be reflected in higher Government costs. I think the farmers themselves share the views expressed by the Senator from Maine, as far as Government cost and Government spending. I believe they are sincere when they say, "We do not want a subsidy. We want our profit from the marketplace."

We have tried to respond with responsible legislation. It is probably not perfect, and there are probably a great many things that can and should be done to tighten it up. But it seems to me it addresses the problem in a responsible way. I would hope whatever the Senator from Maine has in mind does not succeed. I am not certain what he has in mind. Will it be an up-or-down vote on the Dole proposal?

Mr. MUSKIE. Mr. President. I ask at this point for the yeas and nays on the amendment. I do not intend to move to table it.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

Mr. MUSKIE. I have 3 or 4 minutes. I shall not use all of that.

As fast as I can get information that bears upon this amendment, I shall provide it. I now have a table showing the CBO's estimates on carryover, beginning with the year 1972. For example, the wheat carryover in 1972 was 1 billion bushels. That was not sufficient to carry us through the next 2 crop years and we had escalating prices, with all of the consequences that I described. That was 1 billion bushels.

At the present time, we have 1 billion bushels.

So it was 1 billion bushels in 1972, and it is 1 billion bushels today.

With the Dole amendment alone, in 1979, that carryover would shrink to 700 million. Under Talmadge alone, it would shrink to 800 million. Under Dole-Talmadge-McGovern, it will shrink to 600 million. So that is 40 percent less than the carryover in 1972, which will lead to shortages in the next 2 years.

With respect to feedgrains, in 1972 the carryover was 2.1 billion. Under the current policy, today, it is 7.1 billion bushels. Under Dole, it would be 900 million, under Talmadge, 1.6 million. Under Dole-Talmadge-McGovern, that carryover would shrink to 300 million bushels, leaving us in 1979 with an 800 million carryover in wheat and a 300 million carryover in feedgrains, compared with a 1 billion and 2.1 billion in 1972, which appeared inadequate.

These are the figures that tempt many of us to believe that this bill, the Dole amendment, offers a very high, an unacceptably high risk of underproduction, inadequate carryover, and the risk of really uncontrolled commodity prices if we have a bad year in the next year or two.

I yield back the remainder of my time.

Mr. DOLE. I yield back the remainder of my time.

The PRESIDING OFFICER (Mr. BUMPERS). All time has been yielded back.

UP AMENDMENT NO. 1218

Mr. BELLMON. Mr. President, I have an amendment at the desk. I ask unanimous consent that it be considered.

The PRESIDING OFFICER. Without objection, the amendment will be stated.

The assistant legislative clerk read as follows:

The Senator from Oklahoma (Mr. BELLMON) proposes an unprinted amendment numbered 1218 to the Dole amendment:

On page 3 of the amendment, insert immediately after the last line new sections 119 and 120 as follows:

" 'GRAZING AND HAYING ON ACREAGE SET ASIDE UNDER THE 1978 COMMODITY PROGRAMS

" 'SEC. 119. Notwithstanding any other provision of this Act, the Secretary shall administer the 1978 set-aside programs for wheat, feed grains, and upland cotton in such a manner as to permit the use of the acreage set aside for grazing and hay production.' ".

" 'NORMAL TILLAGE PRACTICES ON ACREAGE SET ASIDE UNDER THE 1978 WHEAT PROGRAM

" 'SEC. 120. Notwithstanding any other provision of this Act, the Secretary shall administer the 1978 set-aside program for wheat in such a manner as to permit producers to perform normal tillage practices on set-aside acreage the same as if such acreage had not been set aside.' ".

Mr. TALMADGE. Will the Senator yield?

Mr. BELLMON. I am very happy to yield.

Mr. TALMADGE. I am looking at section 12 and I read as follows:

. . . shall administer the 1978 setaside program for wheat in such a manner as to permit producers to perform normal tillage practices on setaside acreage, the same as if such acreage had not been set aside.

That includes only tillage to preserve moisture and not to produce a crop; is that right?

Mr. BELLMON. That is correct.

Mr. TALMADGE. I have no objection to the amendment; I accept it. I think I have the same thing in my bill.

Mr. BELLMON. The same thing is already in the Talmadge bill. We want to put it in the Dole amendment so that, if the Dole amendment survives the conference, the bill will be identical in this respect.

I yield back my time.

The PRESIDING OFFICER. All time having been yielded back on the Bellmon amendment, the question is on agreeing to the Bellmon amendment to the Dole amendment.

The amendment was agreed to.

UP AMENDMENT NO. 1219

Mr. BELLMON. Mr. President, I have another amendment at the desk that I ask to have considered.

The PRESIDING OFFICER. The amendment will be stated.

The assistant legislative clerk read as follows:

The Senator from Oklahoma (Mr. BELLMON) proposes unprinted amendment No. 1219 to Dole amendment No. 1216.

Mr. BELLMON. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page two of the Dole amendment, following line 4 of section 116(b) delete the remaining portions of that subsection and insert in lieu thereof;

"20 per centum, the established price shall be $3.00 per bushel;

"30 per centum, the established price shall be $3.34 per bushel;

"40 per centum, the established price shall be $3.68 per bushel;

"50 per centum, the established price shall be $4.02 per bushel;

"60 per centum, the established price shall be $4.36 per bushel;

"70 per centum, the established price shall be $4.70 per bushel;

"80 per centum, the established price shall be $5.04 per bushel;"

Mr. BELLMON. Mr. President, the effect of the amendment is to raise the set-aside required to qualify for the parity price of $5.04 on wheat. The problem is that the way the program is being administered, the set-aside of 50 percent does not actually produce a 50-percent set-aside. Rather, it produces only about a 33-percent set-aside. This results because the calculation of the set-aside is against planted acres rather than against total acres.

The facts are that a 50-percent set-aside produces a 33.5-percent reduction in acreage and an 80-percent set-aside produces only a 44.4-percent reduction in acreage. I believe that the Senator from Kansas can see that this amendment will help to achieve the purpose that he has in mind in his bill.

Also, in testimony yesterday before the Senate Agriculture Appropriations Subcommittee, Professor Tweeten of Oklahoma State University testified that the Dole amendment as now written will result in the expenditure of $8.25 for each bushel of wheat production that is removed. The adoption of this amendment would have the effect of lowering the cost of each bushel of wheat production removed down to $3.63 a bushel.

Mr. President, I ask unanimous consent that Professor Tweeten's statement be printed in the RECORD at this point.

There being no objection, the statement was ordered to be printed in the RECORD, as follows:

STATEMENT BY LUTHER TWEETEN

A. Talmadge Bill (H.R. 6782):

1. It is difficult to hold the price relationships specified (wheat $3.50, corn, $2.50, soybeans $6.00, cotton 60 cents) with set aside alone. Wheat, in excess supply, will tend to fall to its feeding value relative to corn. Hence, I assume $3.12/bu. for wheat in my appraisal.

An increase in loan rates could remove this problem, but creates some new problems.

2. The desired price and stock levels are incompatible—prices acceptable to farmer are not compatible with desired stocks (e.g. 600–800 million bushels wheat, 40 million tons of feed grains). The following stocks are compatible with desired prices:

Wheat $3.50/bu, 700–750 million bushel carryover.

Corn $2.50/bu, 800–850 million. Bushel—20–25 million ton carryover.

One solution is to use farmer held reserves to partially insulate stocks from markets. Here, I would suggest a "first" release price for wheat raised from the current $3.15 (140% of loan) to $3.50 (155% of loan).

3. It will be very difficult to implement the proposal on the 1978 crop of winter wheat because harvesting will begin in May. However, a crash program allowing grazing and haying of wheat would help reduce the grain harvest without excessive harm to the cattle industry.

4. It will be necessary to set aside considerably more than 31 million additional acres to achieve seasonal average market prices of $2.50 for corn, $3.12 for wheat, $6.00 for soybeans and 60 cents per pound cotton.

5. Achieving price goals will require the following set aside and costs:

Wheat—20 percent set aside will leave stocks nearly unchanged. To reduce stocks to 800 million bushel carryover requires diversion of 400 million bushels.

400 mil. bushels × $3.12 = $1,248 million (cost est. No. 1).

Set aside is as follows:

Set aside land 75 percent as productive as average, hence expected yield is .75 (31 bu. average land) = 23 bu./acre.

To reduce production by 400 million bushels requires 400/23 or 17.4 million acres.

It requires 1.5 acres of set aside to take out one harvested acre.

1.5 × 17.4 = 26.1 million acres + 10.9 under 20 percent set aside = 37 ml/acres.

This compares to national program acreage of 53.9 mil. acres and 74.8 million planted acres in 1977/78.

The additional (over 20 percent) set aside cost is 26.1 mil. acres × $2.08/bu × 23 bu/acre = $1,248 mil. (cost est. No. 2).

Feed grains—Stocks of 22.4 million metric tons will achieve desired seasonal average price of $2.50 for corn.

This requires diversion of an additional 20 million metric tons or 800 millon bushels of corn equivalent.

800 million bushels × $2.50/bu = $2,000 million (cost est. No. 1).

Set aside as follows:

Set aside land 75 percent as productive as average land, hence expected yield is .75 (90 bus., average land) = 67.5 bu/acre.

To reduce production by 800 million bushels requires 800/67.5 or 11.85 million acres.

It requires 1.5 acres of set aside to take out one harvested acre.

1.5 × 11.85 = 17.8 mil. acres + 5.0 (under 10 percent set aside, all feed grains) = 22.8 mil. acres.

This compares to national program acreage of 88.7 mil. acres and 128.1 million planted acreage in 1977/78.

The additional (over 10 percent) set aside cost is 17.8 mil. acres × $1.66/bu. × 67.5 bu/acre = $2,000 mil. (cost est. No. 2).

Cotton—Stocks of 3.7 million bales will achieve desired seasonal average price of 60 cents/lb. for upland cotton. This requires diversion of an additional 1.4 million bales.

1.4 mil. bales at 500 lbs/bale × $.60/lb = $420 million (cost est. No. 1).

Set aside as follows:

Set aside land 75 percent as productive as average land, hence expected yield is .75 (500 lbs/acre, average land) = 375 lb./acre.

To reduce production by 1.4 million bales required 1.4/.75 or 1.87 mil. acres.

It requires 1.5 acres of set aside to take out one harvested acre, thus set aside is 1.5 (1.87) = 2.8 mil. acres. This set aside is 2.8/10.25 (27 percent) of national program acreage or 2.8/13.64 (21 percent of 1977–78 planted acreage.

The set aside cost is 2.8 mil. acres × $.40/lb. × 375 lbs/acre = $420 million (cost est. No. 2).

B. Dole Bill (S. 2481)—

1. Incentive to participate is very attractive up to the full extent of permitted diversion. Nevertheless, because of payment limitations, producers aversion to any set aside program or for other reasons, some producers will not participate. Preliminary calculations indicate the 50 percent participation rate is profitable for wheat price below $4.36/bu. and operating costs $3.00/bu. and is profitable for corn with corn price below $2.83/bu. with operating costs $1.60/bu.

2. Because the program is complex and requires Congressional action, it will be extremely difficult to implement for the 1978 wheat crop, and perhaps difficult for the 1978 feed grains crop.

3. The following set aside acreages and deficiency payments are estimated.

Wheat—Estimated 50 percent (maximum) diversion on 75 percent of production base of 55.6 mil. acres = 21 million acre set aside. Set aside acres 75 percent as productive as average, hence yield is .75 (31 bu/acre, average land) = 23 bu/acre.

Each set aside acre removes .67 acres of wheat, hence wheat harvested acres reduced .67 (21 mil. acres) = 14 mil. acres.

14 mil. acres times 23 bu/acre = 931 mil. bu. reduction in wheat output.

	mil. bu.
Production without any wheat program	2,100
Less set aside	—332
Expected production with S. 2481	1,775
Expected utilization	1,758

Thus stocks increase slightly. Utilization depressed by high prices.

The loan price and market price is $2.85.

Deficiency payments—

$5.04 (estab Price) − $2.85 = $2.19 × 30 bu. yield × .75 (% part) × 55.6.

$5.04 (estab Price) − $3.50 = $1.54.

mil. acre allotment = $2,740 million = 2 billion—our bill.

(Costs government $8.25/bu. of production removed).

$3.63/Bu. = Tweeter says very reasonable. Talmadge = $3.12.

Feed grains—Estimated 50% (maximum rate) diversion on 75% of production base of 79.5 mil. corn equivalent acres = 29.8 mil. acre set aside.

Set aside acres 75% as productive as average, hence yield is .75 (90 bu/acre, average land) = 67.5 bu. of corn equivalent/acre.

Each set aside acre removes .67 acres of corn harvested, hence corn equivalent harvested acres reduced .67 (29.8 mil. acres) = 20 mil. acres.

20 mil. acres times 67.5 bu/acre = 1350 mil. bu. reductions in corn equivalent or 33.75 million tons.

	Million tons
Expected production with S. 2481	164
Beginning stocks	42.4
Total supply	206.4
Utilization	185.0
Ending stocks	21.4

Estimated average price $2.60 in first 5 months of market year.

Deficiency payments — $3.45 (estab. price) — $2.60 = $.85/bu × 90 bu. yield × .75 (% part.) × 79.5 mil. acres = $4,561.3 mil.

(It costs $3.38 to remove each bushel of corn).

Cotton—Results are similar to the Talmadge bill, setting aside 2.8 mil. acres at a set aside cost of $420 million.

4. The Dole program is subject to large instability. If farmers anticipate high prices because other farmers participate because of unfavorable weather or large export demand, then participation will be low, farm prices will be at loan levels and stocks will accumulate under loan (and it will be difficult to get them out from under loan, once in). On the other hand, if producers anticipate little participation by other farmers and expect low market prices, participation could be large. Realized prices would be high and reward who stay out of program. Feed grains supplies will be inadequate after 2 years of program.

5. The cost for government to remove a unit of production tends to be very high.

C. Summary—Comparison of proposals—

1. Without knowledge of the degree of participation in the S. 2481 program, it is impossible to accurately judge the set aside and payment levels. However, some general statements are warranted.

Any given level of outlay under the H.R. 6782 will result in less production and higher net farm income than will S. 2481. This is because S. 2481 is more nearly a direct payment program than H.R. 6782. A diversion program thrice benefits farmers: (1) with the payment for diversion, (2) with lower production cost and (3) with higher farm prices induced by lower production.

2. It is much more difficult to tailor H.R. 6782 than S. 2481 to farm price and production adjustment needs. The current version of S. 2481 withdraws too little wheat relative to feed grains from production.

3. The storage release policies under H.R. 6782 could insulate stocks from markets to a degree that gyrations in prices would become large.

4. The high loan rates under S. 2481 reduce exports and feeding of wheat and encourage excessive farm output.

5. Summary of set aside cost and acreage estimates, 1978/79.

Commodity	Set aside (million acres)				Payments to farmers (millions of dollars)	
	Talmadge			Dole total	Talmadge (set aside)	Dole (deficiency)
	Current	Added	Total			
Wheat	10.9	26.1	37.0	21.0	1,248	2,740
Feed grains	5.0	[1] 21.0	26.0	[1] 34.0	2,000	4,561
Cotton		2.8	2.8	2.8	420	420
Total	15.9	49.9	65.8	57.8	3,668	7,721
Def. pay					−1,000	1,500
Total					2,668	6,221

[1] Expressed as corn equivalent acres in text. Grain sorghum would be 4,000,000 acres, barley 3,000,000 acres, and corn 14,000,000 acres with H.R. 6782, for a corn equivalent of 17,800,000 acres. Grain sorghum acreage would be 6,000,000 acres, barley 4,000,000 acres, and corn 24,000,000 acres in S. 2481 for a corn equivalent of 29,800,000 acres.

Mr. BELLMON. Mr. President, I should think the wheat producers of the country would be very much in favor of this amendment, because it will help to get supplies in line with demand and it will help to make certain that the costs of this reduction are not exorbitant.

The amendment is very simple. As I say, it simply changes the schedule of reductions so that, in order to reach full parity, we have to set out 44.4 percent of our land as compared to 33.3 percent under the Dole bill.

Mr. DOLE. Mr. President, I rise in opposition to the amendment. I do not know whether it is quite as simple as the distinguished Senator from Oklahoma points out. It would require the farmer to set aside up to 80 percent rather than the 50 percent contained in the flexible parity bill that has been cosponsored by some 20 Senators in this body. We are asking the farmer, even under the circumstance explained by the Senator from Oklahoma, to make considerable sacrifice before he reaches parity.

I have not had a chance to study the reference he had to some professor at Oklahoma State. I do not have any quarrel with him except that I do question the cost. In the short time I looked at that study, he also indicated that it would be difficult to participate in the flexible parity program. They also had contained in the original proposal the same provision with respect to corn. We only have to set aside up to 30 percent of corn to reach parity, but 80 percent of wheat.

Now, they have dropped the corn portion for some reason, and I think that, perhaps, if they dropped the wheat provision, it would be a good idea, too. Based on what we have been able to achieve and what we have been telling farmers working on the basis that we have had in our bill from the outset, I oppose the amendment.

Mr. BELLMON. Mr. President, if the Senator from Kansas will allow me, the amendment which the Senator from Oklahoma offered does not require the setting aside of 80 percent of the land to qualify for parity, but rather, 44.4 percent. It it less than 50 percent, not 80 percent.

I am not sure the Senator from Kansas fully understands.

Mr. DOLE. I understand the Senator. Under my proposal it requires about 33 percent.

Mr. BELLMON. That is right.

So it is not 50 percent of setaside to reach parity, but 33.3 percent under the Senator's bill.

Mr. DOLE. Well, 30 percent, and 80 percent of 500 acres is what the Senator from Oklahoma has in mind?

Mr. BELLMON. No, that in order to qualify for full parity, a farmer would set aside 44.4 percent of his acreage.

Mr. DOLE. How much of his planted acreage?

Mr. BELLMON. A farmer has a thousand acres of land, of wheat land. Under my proposal he will be able to harvest 666 acres. He would set aside 444 acres.

Mr. President, let me correct that statement. It is 556, not 666. It is 444 acres of set-aside and the balance would be harvested.

To me, this does the thing the Senator from Kansas (Mr. DOLE) has in mind, which is to set parity for those who set aside roughly half of their land.

Mr. DOLE. I disagree with the Senator from Oklahoma, who is a wheat farmer himself.

I will say, as I said earlier, we are asking, under my proposal, and I guess to reach the established price, or target price, of $5.04, set aside 50 percent of planted acreage. The Senator from Oklahoma wants 80 percent set aside to reach the target price of $5.04.

I guess the second half of the amendment has been discarded.

We could set aside 30 percent of planted acres of corn to reach the target price of $3.45 a bushel, which is about 100 percent of parity, as is $5.04 100 percent of parity on wheat.

I think the Senator from Kansas understands what the Senator from Oklahoma has in mind, but I disagree with the result.

Mr. BELLMON. Mr. President, the purpose of these bills, I think, is to bring supply and demand closer into balance so that producers of wheat, particularly, my amendment goes only to wheat, not corn, will get a decent price, a parity price, for their production, hopefully, in the marketplace.

As long as we continue to overproduce, we will have a surplus hanging over the market and the result will be very low prices.

So the purpose of my amendment is to reach the objective set up by the Senator from Kansas. That is, that those who harvest about half their acres will get full parity, and that is the thrust of this amendment.

Mr. President, I ask for the yeas and nays.

Mr. DOLE. The Senator from Oklahoma told me 2 days ago that my amendment would run the country out of wheat. Now he wants to take more out of production.

Mr. BELLMON. The Senator from Oklahoma asks for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

Mr. DOLE. Mr. President, I move to table the amendment.

The PRESIDING OFFICER. Does the Senator yield back all of his time?

Mr. DOLE. I yield back the remainder of my time.

The PRESIDING OFFICER. Does the Senator from Oklahoma yield back all of his time?

Mr. BELLMON. I yield back the remainder of my time.

Mr. DOLE. Mr. President, I move to table the amendment.

Mr. BELLMON. I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second on the motion to table? There is a sufficient second.

The yeas and nays were ordered.

The PRESIDING OFFICER. All time has been yielded back. The question is on agreeing to the motion of the Senator from Kansas to lay on the table the amendment of the Senator from Oklahoma to the amendment of the Senator from Kansas. The yeas and nays have been ordered and the clerk will call the roll.

The legislative clerk called the roll.

Mr. WILLIAMS (when his name was called). On this vote I have a pair with the Senator from Colorado (Mr. HASKELL). He is in Denver, at a hearing on energy and natural resources. If he were present and voting, he would vote "yea." If I were permitted to vote, I would vote "nay." I therefore withhold my vote.

Mr. CRANSTON. I announce that the Senator from Alaska (Mr. GRAVEL), the Senator from Hawaii (Mr. MATSUNAGA), and the Senator from Michigan (Mr. RIEGLE) are necessarily absent.

I further announce that the Senator from Colorado (Mr. HASKELL) is absent on official business.

I further announce that, if present and voting, the Senator from Michigan (Mr. RIEGLE) would vote "yea."

The result was announced—yeas 66, nays 29, as follows:

[Rollcall Vote No. 70 Leg.]

YEAS—66

Abourezk	Hansen	McIntyre
Allen	Hart	Melcher
Anderson	Hatch	Morgan
Bartlett	Hatfield	Moynihan
Bentsen	Mark O.	Nelson
Burdick	Hatfield,	Nunn

PRESENT AND GIVING A LIVE PAIR, AS PREVIOUSLY RECORDED—1

Williams, against.

NOT VOTING—4

Gravel	Matsunaga	Riegle
Haskell		

So the motion to table Mr. BELLMON'S amendment (UP amendment No. 1219) was agreed to.

Mr. THURMOND. Mr. President, I move to reconsider the vote by which the motion to lay on the table was agreed to.

Mr. ROBERT C. BYRD. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

The PRESIDING OFFICER. The question recurs on the Dole amendment, as amended and modified.

Several Senators addressed the Chair.

Mr. BENTSEN. Mr. President, I have an amendment.

The PRESIDING OFFICER. The Senator from Texas.

Mr. McCLURE. Mr. President, will the

Senator yield for a unanimous-consent request?

Mr. BENTSEN. I am glad to yield for a unanimous-consent request.

Mr. McCLURE. I thank the Senator.

Mr. President, I ask unanimous consent that Mr. Frank Cushing, of my staff, be accorded the privilege of the floor.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. TALMADGE. Mr. President, may we have order?

The PRESIDING OFFICER. The Senator will suspend until we have order.

Will Senators please take their seats? The Senator from Texas is entitled to be heard.

The Senate is still not in order.

Please proceed.

UP AMENDMENT NO. 1220

Mr. BENTSEN. Mr. President, I send an unprinted amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The assistant legislative clerk read as follows:

The Senator from Texas (Mr. BENTSEN) proposes unprinted amendment No. 1220.

Amend title I by adding at the end of section 118, the following new subsection:

"The Secretary shall make available to producers loans and purchases on the 1978 crop of upland cotton at a level not less than $.50 per pound."

Mr. BENTSEN. Mr. President, earlier today, I spoke in favor of the upland cotton provisions of Senator McGOVERN's amendment to the Talmadge bill. As passed, the McGOVERN amendment raises the loan price for the 1978 crop of upland cotton to 50 cents per pound. I had initially proposed an amendment to raise this loan rate to 52 cents per pound, but the realities of the Senate are such that 50 cents is the best loan rate we can expect.

Since the Senate is now considering the flexible parity plan contained in Senator DOLE's bill, I believe it is in order to keep cotton in line with other commodities by increasing the loan rate for upland cotton to at least 50 cents per pound. Since the flexible parity provisions contained in the original Dole bill have been accepted as a modification of the amendment currently under consideration, I would ask that the Senate accept this increase in the loan rate in order to give every farmer a chance to participate in the Government loan program at a reasonable level.

Mr. President, time is very crucial. Many farmers in south Texas are planting, and some will be completed very soon. The uncertainties which face these men and women are most unfair. They still do not know what help, if any, Congress and the President will offer. If we act now, it will not be too late to help them.

At a loan rate of 50 cents per pound, we will keep cotton on an even keel with other commodities. The provisions of the 1977 farm bill were designed to accomplish this, but the complex formula has not worked. I think we must correct this situation now. Mr. President, I wish to cite the case of a typical Texas county, which shows the tremendous increase in costs of production over the last 10 years, while showing only a moderate rise in the prices the farmer receives for his products.

During the past decade the cost of petroleum products used by Fisher County farmers has risen by 216 percent—propane is up even more. Farm chemicals cost 175 percent more today than in 1967. Steel products like fencing are up by 245 percent; the cost of farm equipment is up 173 percent. Today a Fisher County farmer has to produce 19 tons of baled cotton to purchase a 100-horsepower tractor; he has to produce 87 pounds of wheat to buy one fencepost.

Farm prices have simply not kept pace with inflation in Fisher County, Tex. During the past 10 years cotton prices have increased by only 31 percent; wheat prices by 52 percent; milo by 28 percent.

The result, Mr. President, is that it costs the Fisher County farmer $130 to farm an acre of land and the crops he brings to market earn him only $100 per acre.

Mr. President, there are those who say that a higher loan rate for cotton will allow synthetic fibers to take over an increasing share of the market. I do not believe this to be the case. Just as the cost of petroleum products has risen in Fisher County by 216 percent, the costs of producing synthetics has also increased. The cost of petroleum has dramatically increased in all segments of industry. I believe that domestically produced cotton can continue to compete effectively with synthetics if we give our producers the necessary incentive to produce at a price above the cost of production.

According to figures available from the U.S. Department of Agriculture, the current loan rate for upland cotton is 44 cents per pound. Last year at this time, the loan rate was 44.63 cents per pound. I suggest that the cost of production for cotton has certainly not decreased. I believe these figures serve to dramatize the problem faced by our farmers.

Mr. President, cotton farmers need a higher loan rate. I think my amendment to increase the loan to 50 cents per pound is a reasonable increase. It will allow producers to continue growing cotton and not force them to alternative crops which will only add to the surplus in other commodities. I ask for the support of my colleagues on this amendment.

Mr. DOLE. Mr. President, I think it is a good idea. Without any opposition from the chairman, I accept the amendment to my amendment.

The PRESIDING OFFICER (Mr. SASSER). It would take unanimous consent to modify an amendment.

Mr. DOLE. Mr. President, I ask unanimous consent to modify the amendment to so reflect.

The PRESIDING OFFICER. Is there objection?

Mr. BELLMON. Mr. President, reserving the right to object, may the amendment be explained?

Mr. BENTSEN. Mr. President, the amendment is to provide a 50-cent-per-pound loan on cotton as was added by the McGovern amendment.

Our problem in Texas is that the loan goes into effect about 4 or 5 cents below the current level. The 1977 loan rate provided a higher loan provision than we are getting in 1978.

I do not think this was the intent of this body at the time the 1977 farm bill was passed.

What we are trying to do is just make the loan provision in the Dole amendment the same as that in the McGovern amendment.

Mr. BELLMON. Mr. President, I have no objection.

The PRESIDING OFFICER. Without objection, the amendment is so modified.

The question is on agreeing to the Dole amendment, as amended.

The yeas and nays have been ordered.

Mr. MUSKIE addressed the Chair.

Mr. McCLURE. Mr. President, was the Senator from Maine seeking recognition?

Mr. MUSKIE. Mr. President, I wanted recognition before we voted on the Dole amendment, but I yield.

Mr. TALMADGE. Mr. President, are there any additional amendments other than the Dole amendment? If not, then as to the Dole amendment, are there any amendments to the Dole amendment?

Mr. McCLURE. I may or may not have an amendment. Let Senator MUSKIE go ahead first.

UNANIMOUS-CONSENT AGREEMENT

Mr. TALMADGE. Mr. President, before we vote on the Dole amendment, Senator MUSKIE has requested that I ask unanimous consent that both he and the distinguished Senator from Kansas have 2 minutes to summarize the arguments for and against the amendment. There are a substantial number of Senators on the floor now. Unfortunately, during most of the day there had not been this good an attendance.

So, I ask unanimous consent that Senator MUSKIE have 2 minutes, and Senator DOLE have 2 minutes, to conclude the argument, and then Senator MUSKIE, I am sure, wants a yea and nay vote on the Dole amendment, and I ask that the yeas and nays be ordered at this time.

The PRESIDING OFFICER. The yeas and nays have been ordered.

Without objection, the Senator from Maine is recognized.

Mr. MUSKIE. Mr. President, it is impossible to summarize all of the arguments in 2 minutes, but I would at least like to provide to my colleagues information bearing upon the inflationary impact and the possible risk of a shortage in production, given the present state of carryout stocks.

Mr. TALMADGE. May we have order, Mr. President.

The PRESIDING OFFICER. The Senate will be in order.

Mr. MUSKIE. I made the point earlier that because of the way in which these amendments have been brought to the floor the Budget Committee simply does not have the information on the budget impact, the inflation impact, and the supply impact of this combination of policies.

On the McGovern amendment, the Talmadge bill, and the Dole amendment, we simply do not have it, and I think it is most unfortunate and regrettable because if there is anything the budget

process is supposed to do it is to give us the information necessary for us to vote intelligently, and we do not have that information.

With respect to the inflation impact, the carryover impact of this combination of bills, I do now have tentative information from the Congressional Budget Office. On the inflation side what this will do is add 1 full-percentage point to the rate of inflation. It will mean that the cost to the consumer of food bills will be increased by $7 to $12 billion. For a family of four that translates into an additional cost of feeding a family of four of $130 to $220.

With respect to the risk of a shortage in production, in 1972 our wheat carryover was 1 billion bushels. It was not sufficient to carry us through the next 2 bad crop years, which led to the roller coaster of higher and higher feed prices that undercut the situation of the meat producer, and that eventually led to low prices that have undercut the wheat and feedgrain farmer. That 1 bushel carryover in 1972 would be reduced as a result of this bill to 600 million bushels, less than in 1972.

With respect to feedgrains, we had a 2.1 billion bushel carryover, which would be reduced to 300 million bushels. Those are two of the risks associated with this amendment.

Mr. DOLE. Mr. President, I appreciate the concern of the distinguished Senator from Maine.

Just let the Senator from Kansas point out that we took the CBO figures when they said the Dole amendment would cost $1.8 billion, and all we did was to use today's prices, not the prices 6 months from now but today's prices, and on that basis reduced the cost over $1 billion.

They are using prices that are lower than today's market prices in trying to figure the estimate.

In addition, we have taken out the Public Law 480 proposal, which reduces the cost another $375 million.

So I suggest the total cost, just based on today's prices not on the prices that are going to be up higher and higher because of the set-aside, is around $600 million some. I suggest the cost will be nothing to the American taxpayer.

I do not know that we have ever run out of wheat in this country, but it is the same old story we hear about that we ought to have low farm prices. Well, the American farmer cannot produce anymore at present farm prices. He is producing now at less than the cost of his production.

We have plenty of wheat. We will have plenty of wheat, plenty of corn, and plenty of feedgrains under this proposal or any combination of these proposals.

I just suggest it is time to act for the American farmer. It seems to me we would be doing it in a responsible way, and I would hope that the Members of the Senate would approve the amendment, the flexible parity amendment.

SEVERAL SENATORS. Vote!

Mr. DOLE. I yield to the distinguished Senator from Idaho.

Several Senators addressed the Chair.

Mr. BAKER. Mr. President, there are some Members of the Senate who are involved in a luncheon for a distinguished foreign guest and others who are away from the floor under the expectation that the vote on the Dole amendment would come somewhat later. I do not mean to discommode the Senate, but I wonder if there will be any objection to another amendment being called up and dealt with at this time?

I understand the distinguished Senator from Idaho has an amendment to the Talmadge-Dole bill, and if he would be agreeable to offer it at this time, I wonder if we could get unanimous consent to do that now instead of having a vote on the Dole amendment?

Mr. DOLE. If the Senator will yield, Mr. President, I just agreed that we are finished with the Dole amendment, everything except the vote. The yeas and nays have been ordered, and we could take up other amendments to the Talmadge proposal.

Mr. BAKER. That would be entirely satisfactory to me.

Mr. TALMADGE. Mr. President, reserving the right to object, how much time remains on the bills of the Senator from Kansas and also the Senator from Georgia?

The PRESIDING OFFICER. The Senator from Georgia has 67 minutes on the bill; the Senator from Kansas 50 minutes.

Mr. TALMADGE. Do I understand the request of the distinguished minority leader—and I certainly want to cooperate with him, he has been most cooperative in all instances that I have ever requested—is to postpone the vote on the Dole amendment until 3:30 p.m.?

Mr. BAKER. Mr. President, that would be fine.

Mr. MUSKIE. Until what time?

Mr. TALMADGE. 3:30 p.m. Is that the request of the distinguished minority leader? I shall not object, Mr. President.

Mr. LEAHY. Reserving the right to object——

Mr. TALMADGE. Are there any other amendments to the Dole amendment at this point? I think they have all been completed. Are there other amendments to the bill?

Mr. BUMPERS. I have an amendment to the Talmadge bill, and I was just curious as to how many amendments were to be offered.

UNANIMOUS-CONSENT REQUEST

Mr. TALMADGE. How many amendments are expected to be offered to the Talmadge bill? Apparently about four.

Then, Mr. President, I ask unanimous consent that notwithstanding the fact that the Dole amendment is pending that other amendments be considered at this time to the Talmadge bill.

Mr. DOLE. There are no further amendments to the Dole bill.

Mr. LEAHY. Reserving the right to object, Mr. President, if there is a time certain for a vote on both the Dole amendment and the Talmadge bill, does that mean the Senator from Vermont still has his 5 minutes reserved on both those bills?

Mr. TALMADGE. Certainly. The unanimous-consent agreement obtained by the distinguished majority leader provided—at that time it was anticipated that the vote on the Dole bill and the Talmadge bill would be back to back—but the distinguished Senator from Kansas has offered his bill as an amendment to the committee bill that I sponsored, and of which he is also a cosponsor, and by unanimous consent with the distinguished minority leader, we have postponed voting on the Dole amendment until the hour of 3:30 p.m.; and then after voting on that I expect that the amendments would be concluded in the remainder of the bill, and then we will vote on the Tadmadge committee bill at 4 p.m. In the meantime, if the distinguished majority leader desires to take up the conference report between the Dole amendment and the vote on the Talmadge bill, there may be a hiatus in time, but that could be squeezed in or perhaps follow the 4 p.m. vote on the Talmadge bill. Is the Senator from Vermont assured that the time reserved for him will be available sometime between now and 3:30?

Mr. TALMADGE. I can assure the distinguished Senator from Vermont, who is a very diligent, hard-working member of our staff, that he will have 5 minutes.

Mr. LEAHY. I thank the Chair.

Mr. BAKER. Mr. President, reserving the right to object, do I understand now the form of the request is that the vote on the Dole amendment is to occur at 3:30 this afternoon?

Mr. TALMADGE. Correct.

And that the vote on the Talmadge bill is to occur at 4, as was established yesterday and the day before by unanimous-consent agreement.

Mr. BAKER. And also that other amendments to the bill, notwithstanding——

Mr. TALMADGE. It has been agreed to and may be in order right now.

Mr. BAKER. I understand.

Mr. BUMPERS. Reserving the right to object, I understood the amendment by unanimous consent this morning provided for 30 minutes on amendments.

Mr. TALMADGE. That was the Dole amendment.

Mr. BUMPERS. Was that the Dole amendment only?

Mr. TALMADGE. Yes.

Mr. BUMPERS. Well, this means that if we vote on the Dole amendment at 3:15——

Mr. TALMADGE. 3:30 p.m.

Mr. BUMPERS. 3:30.

And the Talmadge amendment at 4, and there are three amendments pending after the McClure amendment, that means that all three would have to be considered within that 30-minute period.

Mr. TALMADGE. We are going to do it right now. It is 2:30 p.m. and we expect to proceed to consider other amendments by unanimous consent at this time.

If the Senator desires some more time on the amendment, I think we can arrange to secure that.

Mr. BUMPERS. Will the Senator assure me of that, if we get into a bind at that time. My amendment is not all that comprehensive, but it will take a few minutes to explain it to the Senate, and I would like to have some assurance that there will be no objection to a unani-

mous-consent request for a few minutes to do that.

Mr. TALMADGE. I cannot speak for 100 Senators, but this group lives by accommodation, and I would certainly urge that all 100 Senators give any Senator ample time to propose an amendment, and I certainly support that.

Mr. BUMPERS. It is my thought that if the floor manager does not object to that time increase, probably nobody else would.

Will the Senator from Kansas object to that?

Mr. DOLE. I have no objection, as long as we vote on my amendment at 3:30, because we have some people that have to leave after that vote.

Mr. BUMPERS. After 3:30.

Mr. DOLE. That is right.

Mr. TALMADGE. We will vote on the Dole amendment at 3:30 by unanimous consent.

Mr. DOLE. It is 2:30 now. We have an hour.

Mr. BUMPERS. Mr. President, will the majority leader consider a unanimous-consent request to make sure that I get at least 20 minutes on my amendment, 10 minutes on either side?

Mr. ROBERT C. BYRD. Is the Senator in a position to call up his amendment between now and 3:30?

Mr. BUMPERS. Depending on how long the McClure amendment takes I will be happy to do that.

Mr. TALMADGE. I think the McClure amendment will take about 90 seconds.

Mr. BUMPERS. In that case——

Mr. TALMADGE. And the Hansen amendment will also take about 90 seconds.

Mr. BUMPERS. I will agree with the distinguished Senator from Georgia and I will call up my amendment immediately after that.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent on the disposition of the amendment by Mr. McCLURE that Mr. BUMPERS be recognized to call up an amendment.

The PRESIDING OFFICER. Without objection, it is so ordered.

Without objection, the vote on the Dole amendment will occur at 3:30, the vote on the bill at 4, and the rule XII is waived.

UP AMENDMENT NO. 1221

Mr. McCLURE. Mr. President, I have an amendment at the desk and I ask the clerk to report.

The PRESIDING OFFICER. The clerk will state the amendment.

The legislative clerk read as follows:

On page 15, following line 23 insert the following section:

"AGRICULTURAL COMMODITIES UTILIZATION PROGRAM

"SEC. . Notwithstanding any other provision of law; (a) The Secretary of Agriculture is authorized to permit, under such regulations as he may prescribe, any person participating in any year in any program administered by the Department of Agriculture under which there is an acreage set-aside or land diversion program in effect for such year to plant and harvest on the set-aside or land diversion acreage of such person's farm any agricultural commodity which is to be used or sold by such person for the purpose of being converted into industrial hydrocarbons and blended with gasoline or other fossil fuels for use as motor or industrial fuel.

"(b) In order to insure that a constant supply of agricultural commodities used in the manufacture of hydrocarbons suitable for blending with gasoline or other fossil fuels for use as motor or industrial fuel is available in years in which no acreage set-aside or land diversion program administered by the Department of Agriculture is in effect for such commodities, the Secretary of Agriculture is authorized to formulate and carry out in such years a production set-aside program under which producers of such commodities will be paid an incentive payment, in such amount as the Secretary determines necessary, to set aside a portion of their production of such commodities for use only in the manufacture of hydrocarbons for the purpose described in subsection (b).

"(c) Whenever a production incentive program is established under subsection (b) of this section in any year for any agricultural commodity, no producer shall be permitted to participate in such program unless such producer agrees to produce, for use or sale for the purpose described in subsection (a), a quantity of the commodity equal to not less than 15 per centum of the farm acreage allotment or farm base acreage for such commodity.

"(d) The amount of the incentive payment provided for in subsection (b) of this section shall be an amount determined by the Secretary of Agriculture to be necessary to obtain sufficient participation in the program to insure an adequate supply of the agricultural commodities needed for use in the manufacture of hydrocarbons for the purpose described in subsection (a).

"(e) The Secretary of Agriculture is authorized to issue such rules and regulations as he deems necessary to carry out the provisions of this section.

"(f) There are authorized to be appropriated such sums as may be necessary to carry out the provisions of this program."

Mr. McCLURE. Mr. President, I can explain this amendment in very simple terms. I have given copies of the amendment to both the majority floor manager and the minority floor manager of the bill.

It simply allows the Secretary of Agriculture to permit by regulation the use of diverted acres for crops that are devoted to the production of alcohol for blending with gasoline and the so-called gasahol program. This will carry forward one more step what we have already put in process without repeating all of the arguments for the gasahol program, which may be important to us both from the energy standpoint.

Mr. President, I am today submitting an amendment which is the same as the Agricultural Commodities Utilization Act which I introduced earlier, important legislation designed to encourage the production of agricultural commodities suitable for use in the manufacture of industrial hydrocarbons to be blended with gasoline or other fossil fuels.

As many of my colleagues are well aware, the technology involved with the production of hydrocarbons—more commonly referred to as ethyl and methyl alcohol—for use as a motor fuel blend has been with us since the late 1930's. Although alcohol was produced and blended with gasoline in great quantities during World War II, the economics of the situation did not lend itself to serious consideration of an alcohol-gasoline, "gasohol," motor fuel for everyday consumption.

However, those days of cheap foreign and domestic petroleum products are a thing of the past. We must now do everything in our power to both conserve our energy resources and find reasonable, effective energy alternatives whenever and wherever possible. Alcohol produced from agricultural commodities is just such an alternative.

Mr. President, while we all acknowledge the importance of conserving and finding new energy sources, there is another consideration involved with the production of alcohol from agricultural commodities which I feel is of equal, if not greater, importance. Stated simply, every gallon of alcohol produced means roughly 1½ bushels of grain (or other commodity equivalent) that American farmers can market. In years such as this when the national average price of wheat is slightly over $2 per bushel, the national average cost of producing the wheat is $3 or more, and our national surplus of wheat stocks amounts to well over 1 billion bushels, any market farmers can find is nothing less than a godsend.

Mr. President, the amendment I offer today is one of the very important steps that must be taken if the United States is to fulfill these two important goals of assisting farmers and finding energy alternatives.

First, my amendment provides that farmers participating in any USDA set-aside or land diversion program would be able to plant and harvest crops on his set-aside or diverted acreage, provided such crops are dedicated to the production of alcohol for use as a motor or industrial fuel. This provision, of course, thwarts the farmer's nemesis of forced land idling while providing an additional monetary incentive for farmers to continue to produce.

Secondly, because acreage set-asides and land diversion programs do not occur every year, we would be foolish to expect that individuals would invest in an alcohol manufacturing facility if supplies of agricultural commodities could not be constantly assured. Therefore, this legislation provides an additional monetary incentive to farmers in non-set-aside or diversion years when they dedicate established acreages to the production of industrial hydrocarbons.

Mr. President, a comprehensive gasohol program is still in its infancy stage in the United States. The Food and Agriculture Act of 1977 provided the first step by authorizing loans for the construction of four alcohol manufacturing plants, as well as for college and university gasohol research grants during the next 5 fiscal years. It is clearly the responsibility of this Congress to insure that the now-popular gasohol concept be reviewed and nurtured properly for the benefit of all of us in the coming years.

It is, also, clearly our responsibility to get moving now. I am confident that my colleagues will find this legislation an important and necessary link in their gasohol plans, and hope that they will join me in passing this amendment.

I urge the amendment be adopted.

Mr. TALMADGE. I have examined this amendment and the staff has exam-

ined it and I presume the distinguished Senator from Kansas has examined it.

Mr. DOLE. I have examined it.

Mr. TALMADGE. This authorizes the Secretary and merely authorizes. It does not make mandatory that the land that is set aside be used to produce any commodity that he thinks can make gasahol, which would be used as a propellant for automobiles and farm machinery. In the Food and Agriculture Act of 1977, Senator CURTIS and I put in two provisions to try to utilize forest and wood products for petroleum resources, as the Senator knows. We directed the Secretary of Agriculture to build a pilot plant to use wood for development of the alcohol and also separate agricultural commodities.

If my memory serves me correctly, the distinguished Senator from Indiana has authored a bill similar to the amendment here and it may well be on the statute books, but I have no objection to it being on the statute books the second time.

I urge my colleagues to approve the amendment of the Senator from Idaho.

Mr. McCLURE. I thank the distinguished Senator.

Mr. MAGNUSON. Will the Senator yield?

Mr. McCLURE. I will be happy to yield to the distinguished Senator from Washington.

Mr. MAGNUSON. I am glad that the manager of the bill has accepted this amendment. I want to join with the Senator from Idaho on this amendment.

Mr. McCLURE. I ask unanimous consent that the distinguished Senator from Washington be added as a cosponsor.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. MAGNUSON. We do have out in our country in Idaho and Washington some very exciting prospects and we are hopeful that we will get some approval, which this amendment will do, to proceed with those projects.

I am glad that it is accepted. It calls attention to the fact that this is technically probable. The research has been done and it is just a question of how much it is going to cost, whether we will get the cost down, but it can be down and I am glad we are starting on this road and I am glad it has been endorsed by Senator DOLE and Senator TALMADGE, and their previous works in asking the Secretary to do these things.

Mr. McCLURE. I thank the Senator for his support.

I ask unanimous consent that the distinguished Senator from South Carolina (Mr. THURMOND) be added as a cosponsor to the amendment and the Senator from Washington——

Mr. JACKSON. Will the Senator yield?

Mr. McCLURE. I yield to the distinguished Senator from Washington.

Mr. JACKSON. I ask unanimous consent that I be joined as a cosponsor.

Mr. McCLURE. I thank the Senator.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. HANSEN. Mr. President.

The PRESIDING OFFICER. The Senator from Wyoming.

Mr. HANSEN. I ask unanimous consent that the previous unanimous-consent agreement whereby Senator BUMPERS was going to follow Senator McCLURE with an amendment may be amended so as to permit me to go ahead of the distinguished Senator from Arkansas (Mr. BUMPERS).

Mr. BUMPERS. Mr. President, I think unanimous consent has been agreed to on all sides. I have no objection to the change of the unanimous-consent agreement, providing I follow that Senator.

The PRESIDING OFFICER. Without objection, it is so ordered.

The question is on agreeing to the amendment of the Senator from Idaho.

The amendment was agreed to.

Mr. McCLURE. I move to reconsider the vote by which the amendment was agreed to.

Mr. CURTIS. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. McCLURE. Will the Senator yield for a unanimous-consent request?

Mr. BUMPERS. I do not have the floor.

The PRESIDING OFFICER. The Senator from Wyoming has the floor.

Mr. McCLURE. Will the Senator yield for a unanimous-consent request?

Mr. HANSEN. I yield to the distinguished Senator from Idaho.

Mr. McCLURE. Mr. President, I ask unanimous consent that Senator CURTIS be added as a cosponsor to the amendment just adopted.

Mr. EAGLETON. Will the Senator yield?

Mr. HANSEN. I will be happy to yield to the distinguished Senator from Missouri.

Mr. EAGLETON. I thank my colleague from Wyoming.

Mr. President, I ask for two unanimous-consent requests. First, that Mr. Auer and Mr. Lewis, of my staff, have the privilege of the floor during the pendency of the agriculture bills.

The PRESIDING OFFICER. Without objection, so ordered.

Mr. EAGLETON. Mr. President, I ask unanimous consent, bearing in mind that I have been in and out of this Chamber all day, that my amendment No. 1738 be taken up for consideration immediately following the disposition of the Bumpers amendment.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BENTSEN. Will the Senator from Wyoming yield for a further unanimous-consent request?

Mr. HANSEN. I will be happy to yield to the distinguished Senator from Texas.

Mr. BENTSEN. I ask unanimous consent that staff members Charles Pucket, David Allen, and Carroll Schubert be allowed the privilege of the floor during consideration of this legislation.

The PRESIDING OFFICER. Without objection, it is so ordered.

AMENDMENT NO. 1736

Mr. HANSEN. Mr. President, I call up my amendment No. 1736.

The PRESIDING OFFICER. The amendment will be stated.

The legislative clerk read as follows:

The Senator from Wyoming (Mr. HANSEN) proposes amendment No. 1736.

Mr. HANSEN. Mr. President, I ask unanimous consent that further reading of the amendment may be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 20, after line 6, add the following:

MEAT IMPORT LABELING

SEC. 6. (a) Section 20(a) of the Federal Meat Inspection Act (21 U.S.C. 620(a)), is amended by inserting "(1)" after "(a)" and by adding at the end thereof the following:

"(2) Any imported meat or meat food product referred to in paragraph (1), and any meat food product made in whole or in part of such imported meat, or its package or container, shall be labeled as 'imported' or 'imported in part', as the case may be. This paragraph shall not apply if the meat or meat product, or its package or container, is marked and labeled to show the country of origin as required under regulations referred to in paragraph (1).

"(3) If any person other than the ultimate consumer cuts or otherwise divides meat or meat food products into pieces or breaks a package or container containing meat or a meat food product and such meat, product, package, or container is marked or labeled as required by paragraph (1) or (2), such person shall affix a label to each piece of such meat or product or to each package or container in which any such meat or product is placed to provide the information required by paragraph (2). This shall include any product that may result from a blend of imported and domestic meat, except that such product may be labeled as 'contains imported meat.' In applying this paragraph and paragraph (2), for purposes of this Act the term 'label' includes 'labeling' as defined in section 1(p).

"(4)(A) The Secretary shall prescribe such assessments and fees on imported meat and meat food products as he determines necessary to cover the costs of labeling (or other marking) required under this section.

"(B) In establishing the level or rate of assessments and fees to be imposed under this section, the Secretary shall take into consideration the volume of exports, the value thereof, and such other factors as he deems appropriate in order to achieve a fair and equitable allocation of such assessments and fees among exporters.

"(C) The Secretary shall reimburse, from assessments and fees imposed under subparagraph (A), any State which carries out a mandatory meat inspection program under title III of this Act for any expenses incurred by such State in enforcing the provisions of paragraphs (2) and (3) of this subsection.

"(D) The Secretary shall have authority to suspend or revoke the privilege of any exporter of meat or meat food products to export such products to the United States if such exporter fails to pay the assessments or fees for which such exporter is responsible to pay under this section.".

(b) The provisions of subsection (a) shall become effective one hundred and eighty days after the date of enactment of this Act.

Mr. HANSEN. Mr. President, the purpose of this amendment is to enable consumers in this country to determine whether the meat they buy is of domestic or foreign origin. The amendment says that all meat and meat food products made in whole or in part of imported meat must be so labeled at all stages of distribution so that citizens may know when they are buying a product of foreign origin.

The amendment also says that the cost of administering and enforcing this labeling requirement must be paid by the foreign exporters who sell their meat in this country.

Mr. President, legislation passed several years ago by Congress greatly expanded Federal monitoring and control of meat production, processing, and marketing to the American public. The purpose of this legislation was, of course, to protect the health and well-being of consumers and enable them to know what they are buying and eating.

We have the best meat inspection and labeling law in the world. American consumers know when they buy meat regulated by this law that it has been rigorously examined for wholesomeness and purity and that it is labeled according to requirements meant to tell people what they are buying and where it came from.

In addition to regulating domestically produced meat and meat products, our existing Federal law also applies to canned, processed, and prepared meats which come from foreign countries. Such products must be labeled as to country of origin. We import more than half a billion pounds of processed and canned meat every year, all of which is labeled as to origin according to the requirements of existing law.

But, Mr. President, that processed meat accounts for only about one-third of the total amount of foreign meat imported by the United States. The rest is distributed to consumers in the form of various products, but it is not labeled as to origin and the consumer has no way of knowing when he or she is buying and consuming this foreign meat.

Typical of the products made from foreign meat, but not so labeled, are most hot dogs, soups, TV dinners, and hamburger. The meat in these kinds of products is usually imported. But unlike the canned luncheon meat from Argentina or Canada, the hot dogs and the hamburger and the other products bear no label telling the buyer where the meat came from. A consumer who wishes to do so cannot restrict purchases to domestically produced and inspected beef and meat, because there is no way to determine the origin of the meat in most products.

So, our law requires that foreign meat entering the United States in canned, processed, or prepared form be labeled as to origin for the benefit of American consumers. It even requires that domestically produced meat intended for sale to foreign countries bear a label saying it is for export and disclosing information about any preservatives used. This is for the protection of foreign consumers of American beef.

But the law does not require disclosure of the origin of more than a billion pounds of foreign beef and meat which enters the United States every year in fresh, chilled, and frozen form. This meat is sold to consumers in restaurants and in supermarkets throughout the country. It is made into hamburger, hot dogs, frozen dinners, soup, lunch meat and dozens of other products. The labels on these products must, by law, tell consumers the name of the product, the ingredients, the name and place of business of the manufacturer, packer, or distributor, the quantity of the contents, and whether the product was inspected.

But the most important information—the origin of the meat—does not appear on products made from imported fresh, chilled, or frozen meat. This is a serious oversight which my amendment would correct.

We are not talking about a minor amount of meat, Mr. President. We are talking about billions of pounds of imported meat which is made into products sold to millions of American citizens. Last year, we imported close to a billion and a half pounds of this meat which was not labeled as to origin when it reached the retail level.

Imported meat which arrives frozen is generally thawed and made into a variety of products for sale to American consumers. Most of the frozen meat we import is ground, blended with fat trimmings from domestic beef, and then sold as "fresh" hamburger. Millions of consumers then refreeze this hamburger in their home freezers. The freezing, thawing, and refreezing of meat is discouraged by the Department of Agriculture, which warns in a consumer bulletin:

Cook thawed meat immediately or keep only a short time in a refrigerator. Avoid refreezing thawed meat.

Mr. President, American consumers deserve to be told if the meat they buy has previously been frozen and they deserve to know where it came from. Our law says countries which sell meat to the United States must have inspection laws as strict as ours, but I would stress that there is no way without subjecting it to our inspection system to guarantee that foreign meat measures up to our standards. Consequently, many people would prefer to buy domestically produced products which they know have been produced here in the United States and have passed through our strict and exacting inspection system. My labeling amendment would permit citizens the opportunity to buy domestic products.

I was pleased to see in a United Press International story that ran yesterday that Carol Foreman, Assistant Secretary of Agriculture for Consumer Affairs, has endorsed the concept of labeling meat which is imported. I welcome her support.

I believe this amendment is in the best interests of consumers and producers alike, Mr. President, and I urge my colleagues to approve it.

Mr. President, this amendment seeks to do two things: One is to require that the country of origin be shown on all meat products which are imported into the United States; and, further, that the cost of administering this labeling requirement must be paid for by foreign exporters who sell their meat in this country.

The concept of this amendment has been endorsed by the Secretary of Agriculture.

Essentially, it seeks to carry out what the Department of Agriculture has——

Mr. TALMADGE. Will the Senator yield?

Mr. HANSEN. I yield.

Mr. TALMADGE. I understand this amendment would require the labeling of imported meat and meat products and do nothing more; is that correct?

Mr. HANSEN. That is correct.

Mr. TALMADGE. I support the amendment.

Mr. DOLE. Mr. President, I support the amendment.

Mr. HANSEN. Mr. President, we are ready for a vote.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from Wyoming.

The amendment was agreed to.

Mr. HANSEN. Mr. President, I ask unanimous consent that Senators MELCHER, DOLE, MAGNUSON, DOMENICI, MCCLURE, THURMOND, ALLEN, BURDICK, BENTSEN, CURTIS, and Mr. HATFIELD of Montana be included as cosponsors.

The PRESIDING OFFICER. Without objection, it is so ordered.

The Senator from Arkansas.

UP AMENDMENT NO. 1222

(Purpose: To permit loans to be made up to 36 months and to create a National Commodity Reserve)

Mr. BUMPERS. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The legislative clerk read as follows:

The Senator from Arkansas proposes an unprinted amendment numbered 1222.

Mr. BUMPERS. Mr. President, I ask unanimous consent that further reading be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

At the end of the bill, insert the following:

"TITLE II

"SEC. 1. In the event of any conflict as between this Title and any other provision of this Act or of any other law, this Title shall prevail. The Agricultural Act of 1949 is amended by adding Sections 2-10 hereof, as appropriately renumbered, to its terms.

"GUARANTEE OF LOANS: AMOUNT OF LOANS: TERMS

"SEC. 2. (a) The Secretary shall guarantee in any year loans made by commercial lending institutions to producers of nonperishable specified commodities for which a loan program is authorized by law. The amount of any such loan (loan level) in the case of any producer shall be an amount not in excess of an amount determined by multiplying the quantity of such commodity on which such producer is eligible for a loan by the loan level as set pursuant to law.

(b) The term of such loan shall be for such period as may be agreed upon by the lender and the producer-borrower but in no case for a period longer than thirty-six months.

(c) No loan may be guaranteed under this Act unless the rate of interest thereon is no greater than the rate of interest on comparable loans made by commercial institutions in the same area for the same purpose without the benefit of Federal guarantees.

DIRECT LOAN AUTHORITY

SEC. 3. (a) The Secretary is also authorized to make loans to producers of such nonperishable specified commodities on their crops through the facilities of the Commodity Credit Corporation. Loans made under authority of this section shall be made at a

level not less than that prescribed in section 2(a). Loans made by the Secretary under authority of this subsection on any specified commodity shall be made at the same rate of interest at which loans guaranteed under this Act are made on the same commodity. The Secretary shall use the guarantee loan program whenever practicable in providing an initial loan to any producer on any specified commodity.

(b) Producers shall be entitled, upon application to the Secretary, to obtain a loan from the Secretary as provided in subsection (a) on the commodities owned by such producers in an amount not less than that described in section 2. Loans made under this subsection shall be for an unspecified period of time. Notwithstanding the foregoing no loan may be made by the Secretary on any specified commodity of such producer unless such producer has satisfied any prior loan made on such commodities which was guaranteed by the Secretary or unless the proceeds of the loan made by the Secretary are to be used to satisfy such prior loan.

NONRECOURSE NATURE OF LOANS; ADJUSTMENTS FOR GRADE AND OTHER FACTORS; COMPLIANCE REQUIREMENTS

SEC. 4. (a) Loans guaranteed by the Secretary under section 2 and loans made under section 3 shall be guaranteed and made without recourse against the producer-borrowers and no security other than the commodity on which such loans are made shall be required.

(b) The Secretary may adjust the loan level for any specified commodity on the basis of the grade, type, staple, or quality of such commodity.

MANDATORY RELEASE PRICE

SEC. 5. (a) The Secretary shall establish for each specified commodity mandatory release prices at which a percentage (specified by the Secretary) of the quantity of that commodity under loan (made or guaranteed under this Act) must be released for sale in domestic or export markets. Mandatory release prices shall be a condition of any loan made or guaranteed under this Act.

(b) Mandatory release prices shall be established for each specified commodity prior to the start of the marketing year for such commodity and shall remain in effect for that marketing year.

(c) Mandatory release prices in the case of any specified commodity shall be established by the Secretary as a percentage of the loan level for that commodity plus storage charges and interest charges applicable to prevailing loans for that commodity.

AUTHORITY TO CALL LOANS

SEC. 6. The Secretary is authorized to call any loan made under this Act and secured by commodities comprising part of the National Commodity Reserve, if the Secretary determines that the domestic or foreign market for the commodity for which such loan was made is unstable because insufficient quantities of that commodity are being offered for sale, except that the Secretary may only call loans on such commodity at any time that the market price for such commodity is at or above the mandatory release price established by the Board for such commodity. The Secretary shall call the oldest outstanding loans first and proceed chronologically to the newest loans outstanding; except that at no time shall the Secretary call any loans on any specified commodity if the calling of such loans will cause the price of such commodity to drop below the loan level currently in effect for such commodity.

PROHIBITION AGAINST RENEWAL OR EXTENSION OF CERTAIN LOANS

SEC. 7. No new loan may be made or guaranteed under this Act with respect to any quantity of any specified commodity owned by any producer and no existing loan may be renewed or extended on any quantity of any such commodity owned by any producer if such quantity of such commodity has been ordered released from loan pursuant to section 5 of the loan on such quantity of such commodity has been called pursuant to section 6.

Mr. BUMPERS. First, I apologize, Mr. President, to the Senator from Georgia for not having gotten this to him and his staff earlier. I will make every effort to be as concise and precise as I can be in stating to him and the other colleagues present the purpose of the amendment and what is does.

Since I do not have any other time allotted to me, I would like to take about 2 minutes to say that I am going to vote against the Dole amendment. I am going to do it for some of the reasons which have already been articulated by the Senator from Maine, but I am going to vote against it for other reasons.

Number one, I do not believe that the Budget Office or the Department of Agriculture can give this body any assurance that the approach of the Dole amendment is in keeping with all the interests that we have to consider, the farmer interests, our exports, the U.S. Treasury, and the consumers.

I do not believe anyone can tell us with any degree of certainty how many acres will be set aside, and, therefore, it is impossible to tell what the cost will be.

We do not know what the price of these commodities will be. Obviously, the price of these commodities in the future will depend to some extent on how many acres are set aside. But we cannot know how many acres will be set aside.

Finally, I believe that the Dole bill and the Talmadge bill are contradictory. I do not see how they can be made compatible with each other. I know there is a chance that the Dole bill will be kicked out in the conference, but I do not think we ought to legislate with that understanding. I do not think we ought to vote for the Dole bill and go home and tell our farmers we voted for 100 percent parity for them with the certain knowledge it will be kicked out in conference.

I do not have any strong opposition to the approach of the Senator from Kansas, but I just think it goes too far. I think serious shortages in the commodities covered under that bill could result.

In addition, it does not cover livestock. In my State, when I was Governor, it was like being Governor of two States. Everything east in Arkansas was soybeans, rice and cotton, and everything in the West was poultry and livestock. I say this facetiously, but I used to go to the East and say they were not getting enough for their grain and go to western Arkansas and tell them their grain was costing too much.

This is what we are doing here. We are being deceptive. I think the Talmadge bill has a chance of passing here and in the House. We can say to the farmers, "It is not a perfect solution. It is an approach. At least we are doing something for you now."

It will help the farmer and also help get rid of the glut or surpluses with which we are confronted.

Mr. President, my amendment is taken from a bill that Senator HODGES and I introduced sometime ago after weeks of hard work. This amendment is only one section of it. But the thrust of this amendment is to give the farmers two options:

No. 1, when the Secretary sets the loan levels on any commodity, the farmer can go to a commercial lending institution and get a federally guaranteed loan for the amount that he is going to raise. If he has 100 acres and he is going to raise 100 acres of wheat, he can go to the bank and say, "The Secretary has set the loan levels on wheat at $3 or $3.10"—whatever, though I do not think it is that high—and he can get a federally guaranteed loan.

That is not going to be a subsidized loan. That will be at the going interest rate. The only difference between this and what the farmer is doing right now is that the Government will guarantee that loan.

The second part of this amendment provides that he will also have that same privilege of putting his commodities in the Commodity Credit Corporation at that same loan level, but it will be for up to a 3-year period, to be negotiated between the Secretary and the producer-borrower. The same time the loan would be available on commercial loans, incidentally.

In the past, one of the problems the farmers have had is they borrow money from the bank and the bank loan comes due on December 31. They always feel compelled to sell the crop to pay off the bank loan.

What has been happening? Last April, less than a year ago, soybeans were selling for $10 to $10.15 in this country, and the bigger farmers who had the grain storage on their farms, or who had the wherewithall to hold out and keep their commodities off the market, were able to hold out and get $10 a bushel for their soybeans.

This past fall, between October and the end of December, I will guarantee that 70 to 80 percent of the farmers in my State sold their beans at somewhere between $5 and $6 a bushel because they had to pay off a loan.

Yesterday, the closing price on soybeans was around $7 to $7.10. I hope nobody in this country holds onto their beans based upon what I am about to say, but I will venture a guess that beans will go still higher. Why will they? Because they are beginning to get worried about them. Brazil came out and said, "We did not produce as many soybeans as we thought." They have run their guess from about 13 million metric tons down to 9 million metric tons. The speculators are getting worried and the price is going up. If it is not Brazil, it is some other problem.

If we go back and look at the charts and graphs of what has happened to the price of soybeans—and I am using that as an illustration, which we can do with almost any crop except wheat, which stays depressed—if we go back and look at the charts and graphs, we will see that at harvesttime when there is an abundance of everything the price is

down, and that is when the farmers are forced to sell. If he can hold on until April, May, or June of the next year, almost invariably the price is up where, if he could have held out, he could have made a decent profit.

Of the farmers in my State, one of the biggest farmers down there and one of the leaders in the agricultural movement, told me that he made two bales of cotton to the acre. There are farmers who said if he made two bales to the acre he made money regardless of what he sold his cotton for. I am not here to argue that. All I am saying is he sold his cotton for 42 cents, and if he was selling it today he would be getting 52 to 55 cents. Today, if he wants to book his cotton for this fall he can probably get 58 cents.

I am not trying to make speculators out of farmers; I am just trying to give them a fair shake so they can participate in all the benefits that agribusiness and the wealthy farmers have been enjoying for years because of their financial ability to withhold their commodities until the price went up.

It is not asking very much. We are not asking anybody to subsidize them because they will be paying the going rate of interest.

Did Members know that the Commodity Credit Corporation has made money since the day it was set up? It not only never lost a dime, but it has made money.

Why can we not help the farmers by allowing them to leave their commodities in there for a little longer period of time and allow the Secretary—and this is the final provision in the amendment—to set a triggering mechanism by which any time the price of that commodity exceeds the loan level by some percentage, they will be required to take a percentage of their commodity out of the loan?

Is that not fair enough? Right now, the Secretary says he is going to set a loan level of $4.50 on soybeans. This would mean that a farmer puts his beans in the loan, in the Commodity Credit Corporation, this fall at $4.50. He can leave them there until the price reaches the predetermined rate set by the Secretary.

Let us assume the Secretary says that when soybeans reach $6, the farmer has to take a percentage of his beans out of loan. That does not mean he has to sell them. He may or may not. If he does not have storage space for them, if he does not have the wherewithal to hang on to them, it means, in effect, that he will have to sell them.

If they go to $7, the Secretary might say, "You have to take out another 40 percent or 50 percent." That way, the farmer gets rid of the crop, he does not keep it in storage, but it does give him an opportunity not to be taken advantage of by the speculators and the telecommunications systems and computer systems in Chicago.

The American Board of Trade and the Chicago Board of Trade have computers and they can tell exactly how many bushels of any commodity will come out of loan on any given day. All they have to do is look at what their demand is, push a button on the computer, and say, "Well, that is not going to push prices up because on this day and the next, so many bushels are going to come out of Commodity Credit Corporation."

There has to be an adequate supply. They ought not to have that kind of information to take adavntage of farmers. If this amendment is adopted, they will not have.

This amendment is not going to deprive anybody of anything.

Mr. TALMADGE. If the Senator will yield, I did not see this amendment until a few minutes ago. I have heard a good many complaints about the release of stocks from the Commodity Credit Corporation reserve as presently constituted and it does need some improvement. Will the Senator take me now through the scenario of how this amendment is going to work?

Take Farmer Smith. He produced 1,000 bushels of soybeans in Arkansas. Will the Senator tell me what happens under this amendment?

Mr. BUMPERS. No. 1, before he produces the beans, he goes down to the bank and says, "I am going to produce 1,000 acres of soybeans." The Secretary of Agriculture has set the loan level on beans at $4.50 per bushel. He would be entitled to get a federally guaranteed loan from that banker for some figure agreed on, possibly the average yield that he could anticipate.

Mr. TALMADGE. Of course, that loan is not mandated by law. That would depend on the financial security of the farmer in that community, I suppose.

Mr. BUMPERS. That is correct.

Mr. TALMADGE. All right. I ask the Senator to proceed further. Assuming the farmer has adequate credit, he can get loans from the bank contingent on the price that the Secretary of Agriculture has set on soybeans. Take me down in the scenario further now.

Mr. BUMPERS. He can do either of two things: he can leave that loan in the commercial lending institution at that same rate of interest for up to 3 years.

Mr. TALMADGE. There again, it would be dependent upon the bank. Most banks do not make commodity loans for 3 years. We do not mandate a commercial bank to make commodity loans for 3 years.

Mr. BUMPERS. That is right. If the bank does not want to make those loans, that also is their privilege. We are assuming there will be some institutions that would make loans of up to 3 years, anyway.

Mr. TALMADGE. He can get a loan now direct from the Government, but it has to be renewed from year to year. Does the Senator's amendment change that? Would the Commodity Credit Corporation be mandated to make a 3-year loan rather than a 1-year loan?

Mr. BUMPERS. That would be any given period of time. It could be up to 36 months.

Mr. TALMADGE. In other words, the law would be changed and it would be authorized to make loans up to 3 years in lieu of 1 year?

Mr. BUMPERS. That is correct.

Mr. TALMADGE. The rate of interest on loans would be at what level?

Mr. BUMPERS. At the going rate. Both the CCC and the lending institution rate would not be a subsidized rate. It would be the going rate.

Mr. TALMADGE. Who would pay the storage fee?

Mr. BUMPERS. The farmer would pay the storage fee.

Mr. TALMADGE. What would the storage fees amount to? I believe the rate was recently raised to 25 cents a bushel in the reserve program. I believe the farmer pays the interest on that loan at cost of borrowing by the Commodity Credit Corporation. How does this amendment change that?

Mr. BUMPERS. It does not change that, in any respect.

Mr. TALMADGE. What else does it do to change existing law?

Mr. BUMPERS. It just gives the farmer the opportunity of leaving his crop in loan a longer period.

Mr. TALMADGE. Thirty-six months in lieu of 12?

Mr. BUMPERS. That is true, unless the price reaches a certain level. The Secretary would have the right to set certain triggering price limits under which he would be required to take action.

Mr. TALMADGE. He would recall the loan at that point?

Mr. BUMPERS. That is right.

Mr. TALMADGE. What is the price level of the call? At what rate would the Secretary call the loan?

Mr. BUMPERS. We would leave that to the Secretary under the bill. It is not set here.

Mr. TALMADGE. That is left to the Secretary's discretion.

Mr. BUMPERS. That is right.

Mr. TALMADGE. I notice some reference to a board here. What board is the Senator referring to?

Mr. BUMPERS. That word should be stricken. Where does the Senator find that?

Mr. TALMADGE. It is in the explanation that I saw.

It is at the bottom of page 4: "The Secretary, in consultation with the board."

Mr. BUMPERS. That line should be striken.

Mr. President, I ask unanimous consent that it be stricken from the amendment.

Mr. TALMADGE. Is it all of line C?

Mr. BUMPERS. No, it would just read "The Secretary shall designate."

Mr. TALMADGE. "The Secretary shall designate the national reserves." In other words, strike out "in consultation with the Board."

Mr. BUMPERS. That is correct.

Mr. TALMADGE. Does the Senator so modify his amendment?

Mr. BUMPERS. That is correct.

The PRESIDING OFFICER. Is there any objection to the modification?

Mr. TALMADGE. The Senator has that right. The yeas and nays have not been ordered here.

What is the national commodity reserve to which the Senator refers in his bill?

Mr. BUMPERS. The national com-

modity reserve section should be stricken. I apologize for that. This was taken from a bill, but that entire section should be stricken.

Mr. TALMADGE. That is on page 4, section 8.

Mr. BUMPERS. Section 8 should be striken and section 9 should be renumbered section 8. Section 10 should be renumbered section 9.

I ask unanimous consent that it be so modified.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. TALMADGE. Those are the main features.

I must say to the Senator that this may or may not be exactly what the confereees, when and if we reach agreement with the House, will want to do. But I have heard considerable complaint about the commodity reserve and loan program, and many farmers tell me it can stand some improvement. If my distinguished colleague from Kansas is willing, I am perfectly agreeable to taking it to conference. Then we can have a second look at it and the views of the administration and make a decision that may or may not be more enlightened than one on such short notice.

Mr. BUMPERS. Mr. President, let me make an additional modification, because section 9 and section 10 should be stricken, too. All three of those sections deal with the national commodity reserve.

Mr. DOLE. Reserving the right to object.

Mr. BUMPERS. Mr. President, I have the right to modify my amendment.

Mr. TALMADGE. Certainly, the Senator has a right to modify his amendment.

Mr. BUMPERS. Mr. President, I further modify the amendment by striking sections 9 and 10.

The PRESIDING OFFICER. Since the Senate gave unanimous consent for consideration of this amendment, it will take unanimous consent to modify it.

Mr. DOLE. And I reserve the right to object.

Mr. BUMPERS. Will the Chair please restate the proposition?

The PRESIDING OFFICER. Since the Senate gave unanimous consent to consider the amendment, it will take unanimous consent to modify the amendment.

Mr. DOLE. Let me say to the Senator from Arkansas, who was so kind when he spoke of the flexible parity bill and not being certain what it did and what would happen when it went to conference. I hope the Senator understands that the same thing might happen to this amendment.

Mr. BUMPERS. I understand that quite well.

Mr. DOLE. I want to make a further point. I do not intend to object, because I want to get the best bill we can. I do not want to go to conference with any death wish. If we are just going to go in and throw out things, I hope we revise or revamp this amendment to make it work.

I hope we can come out of the conference with something like flexible parity, but I hope the Senator from Arkansas will be willing to assist me on that.

I withdraw my reservation.

Mr. TALMADGE. One final question.

The PRESIDING OFFICER. Without objection, the amendment is so modified.

The amendment (UP Amdt. No. 1222), as modified, is as follows:

At the end of the bill, insert the following:

"TITLE II.

"SEC. 1. In the event of any conflict as between this Title and any other provision of this Act or of any other law, this Title shall prevail. The Agricultural Act of 1949 is amended by adding Sections 2–10 hereof, as appropriately renumbered, to its terms.

"GUARANTEE OF LOANS: AMOUNT OF LOANS: TERMS

"SEC. 2. (a) The Secretary shall guarantee in any year loans made by commercial lending institutions to producers of nonperishable specified commodities for which a loan program is authorized by law. The amount of any such loan (loan level) in the case of any producer shall be an amount not in excess of an amount determined by multiplying the quantity of such commodity on which such producer is eligible for a loan by the loan level as set pursuant to law.

"(b) The term of such loan shall be for such period as may be agreed upon by the lender and the producer-borrower but in no case for a period longer than thirty-six months.

"(c) No loan may be guaranteed under this Act unless the rate of interest thereon is no greater than the rate of interest on comparable loans made by commercial lending institutions in the same area for the same purpose without the benefit of Federal guarantees.

"DIRECT LOAN AUTHORITY

"SEC. 3. (a) The Secretary is also authorized to make loans to producers of such nonperishable specified commodities on their crops through the facilities of the Commodity Credit Corporation. Loans made under authority of this section shall be made at a level not less than that prescribed in section 2(a). Loans made by the Secretary under authority of this subsection on any specified commodity shall be made at the same rate of interest at which loans guaranteed under this Act are made on the same commodity. The Secretary shall use the guarantee loan program whenever practicable in providing an initial loan to any producer on any specified commodity.

"(b) Producers shall be entitled, upon application to the Secretary, to obtain a loan from the Secretary as provided in subsection (a) on the commodities owned by such producers in an amount not less than that described in section 2. Loans made under this subsection shall be for an unspecified period of time. Notwithstanding the foregoing, no loan may be made by the Secretary on any specified commodity of such producer unless such producer has satisfied any prior loan made on such commodities which was guaranteed by the Secretary or unless the proceeds of the loan made by the Secretary are to be used to satisfy such prior loan.

NONRECOURSE NATURE OF LOANS; ADJUSTMENTS FOR GRADE AND OTHER FACTORS; COMPLIANCE REQUIREMENTS

SEC. 4. (a) Loans guaranteed by the Secretary under section 2 and loans made under section 3 shall be guaranteed and made without recourse against the producer-borrowers and no security other than the commodity on which such loans are made shall be required.

(b) The Secretary may adjust the loan level for any specified commodity on the basis of the grade, type, staple, or quality of such commodity.

MANDATORY RELEASE PRICE

SEC. 5. (a) The Secretary shall establish for each specified commodity mandatory release prices at which a percentage (specified by the Secretary) of the quantity of that commodity under loan (made or guaranteed under this Act) must be released for sale in domestic or export markets. Mandatory release prices shall be a condition of any loan made or guaranteed under this Act.

(b) Mandatory release prices shall be established for each specified commodity prior to the start of the marketing year for such commodity and shall remain in effect for that marketing year.

(c) Mandatory release prices in the case of any specified commodity shall be established by the Secretary as a percentage of the loan level for that commodity plus storage charges and interest charges applicable to prevailing loans for that commodity.

AUTHORITY TO CALL LOANS

SEC. 6. The Secretary is authorized to call any loan made under this Act and secured by commodities comprising part of the National Commodity Reserve, if the Secretary determines that the domestic or foreign market for the commodity for which such loan was made is unstable because insufficient quantities of that commodity are being offered for sale, except that the Secretary may only call loans on such commodity at any time that the market price for such commodity is at or above the mandatory release price established by the Board for such commodity. The Secretary shall call the oldest outstanding loans first and proceed chronologically to the newest loans outstanding; except that at no time shall the Secretary call any loans on any specified commodity if the calling of such loans will cause the price of such commodity to drop below the loan level currently in effect for such commodity.

PROHIBITION AGAINST RENEWAL OR EXTENSION OF CERTAIN LOANS

SEC. 7. No new loan may be made or guaranteed under this Act with respect to any quantity of any specified commodity owned by any producer and no existing loan may be renewed or extended on any quantity of any such commodity owned by any producer if such quantity of such commodity has been ordered released from loan pursuant to section 5 of the loan on such quantity of such commodity has been called pursuant to section 6.

Mr. TALMADGE. Where is the money coming from to make these guaranteed loans?

Mr. BUMPERS. The amendment does not touch any authorization for such sums. It just guarantees it. I do not know.

Mr. TALMADGE. Out of the Commodity Credit Corporation, I assume.

Mr. BUMPERS. There is a provision in here, as the Senator knows, that increases the amount of money available to the Commodity Credit Corporation from $14 billion to $25 billion.

Mr. TALMADGE. I shall have an amendment on that in a moment, based on a figure from the Bureau of the Budget dated October 29, 1977. Prior to that time, it conformed to the projection that the committee has made.

If there be no objection on the part of any Senator, I am prepared to urge that this amendment be approved and we take it to conference and that it be given further scrutiny at that time.

Mr. BUMPERS. I thank the Senator, very much.

Mr. DOLE. Will the Senator yield?

Mr. BUMPERS. Yes.

Mr. DOLE. It is my understanding that it has been modified. I share the view expressed by the Senator from Arkanas. This does have a lot of merit. I think it is one that I have discussed, at least briefly, with the junior Senator from Arkansas (Mr. HODGES). I reiterate that I hope the distinguished senior Senator will be pushing in the conference for the best bill we can have. I do not want anybody here thinking we are just trying to put everything in the pot and say, "Well, it is all over, and we have fooled the farmers again this year, let us go home."

That is not my intent. I am sure it is not the Senator's intent.

Mr. BUMPERS. I appreciate the Senator's comments. I simply want to say that I think one of the most pressing things, the urgency of the matter, is that the farmers in my State are anxious to get some word as quickly as possible as to where they stand this planting year. My thought was and I think the record is for the flexible parity concept, that the Talmadge proposal could be adopted easily, whereas the combination would present almost a problem for the Department.

I am most anxious to do everything I can to help hammer out the best possible bill for the farmers of this country. But I think time is extremely important.

Mr. TALMADGE. Mr. President, after we vote on the amendment, I will send a further amendment to the desk.

The PRESIDING OFFICER. The question is on agreeing to the amendment.

Mr. BUMPERS. Mr. President, I ask unanimous consent that Senator HODGES be added as a cosponsor to my amendment.

The PRESIDING OFFICER (Mr. ALLEN). Without objection, it is so ordered.

The question is on agreeing to the amendment of the Senator from Arkansas.

The amendment, as modified, was agreed to.

Mr. TALMADGE addressed the Chair.

The PRESIDING OFFICER. The Chair will call to the attention of the distinguished Senator from Georgia that under the unanimous-consent agreement, on the disposition of the Bumpers amendment, amendment No. 1739 of the distinguished Senator from Missouri (Mr. EAGLETON), was to be called up.

Mr. TALMADGE. Mr. President, I ask unanimous consent that we act on the amendment I will send to the desk while we await the arrival of Senator EAGLETON to the floor and then consider his amendment next.

The PRESIDING OFFICER. Is there objection?

Without objection, it is so ordered.

UP AMENDMENT NO. 1223

(Purpose: Makes the increase in CCC borrowing authority from $14.5 billion to $25.0 billion effective October 1, 1978)

Mr. TALMADGE. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The assistant legislative clerk read as follows:

The Senator from Georgia (Mr. TALMADGE) proposes an unprinted amendment numbered 1223:

On page 16, between lines 12 and 13, insert a new subsection as follows:

"(d) The provisions of this section shall become effective October 1, 1978.".

Mr. TALMADGE. Mr. President, the committee bill which is before the Senate increases the lending authority of the CCC from $14.5 billion to $25 billion.

The amendments I have sent to the desk would make the effective date October 1 in lieu of enactment of the bill.

I urge the adoption of the amendment.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from Georgia.

The amendment was agreed to.

Mr. DOLE addressed the Chair.

The PRESIDING OFFICER. The Senator from Kansas.

Mr. DOLE. Mr. President, I am wondering, while we await the arrival of the Senator from Missouri, if the Senator from New Mexico might have 5 minutes.

Mr. TALMADGE. I have no objection.

The PRESIDING OFFICER. Hearing no objection, the Chair recognizes the distinguished Senator from New Mexico (Mr. DOMENICI).

Mr. DOMENICI. Mr. President, let me first extend my congratulations to the distinguished chairman of the committee, the senior Senator from Georgia, and the ranking Republican (Mr. DOLE) for bringing to the floor their respective bills today after much national debate and without having a lot of time to conduct hearings.

I am sure that the American farmer and I am sure that the American consumer and all America, when they understand the significance of these two bills in light of the plight of our farmers, will also join in extending to them and the Senators that support the American farmers here on the floor today their congratulations.

Mr. President, when a farmer goes to a market to sell his crop, he asks, "How much will you give me?" But when that same farmer buys supplies for his farm and his family, he must ask, "How much will it cost me?"

Mr. President, the Congress of the United States, and this particular body, takes a great deal of pride in bringing legislation to the floor of the Senate, especially when they can say something is just, that something is fair.

We ought to be extremely proud of this legislation today because we cannot even put an adjective in front of the word that would describe the dimension of fairness that is present here today and needed for the American farmers.

It is simple justice, simple fairness. Whatever the most basic kind of fairness we can describe, that is the situation today.

There will be arguments about inflation. But I ask, did the American consumer get the benefit when the American farmer's wheat went from $3.50 to $4 to $1.85?

There were those prophets of gloom when the farmer was starting to get a fair price that said, "Let's don't even sell any more overseas because we're going to have $1 a loaf bread."

What happened to that increase when it went down to $1.85? It should have been decreasing. In fact, if they were right, bread should have come down 40 cents or 50 cents to 20 cents or 25 cents. But in spite of this, it went up.

If we think the American free enterprise system is working, then why did not the consumer get the break when the farmer went broke? They did not, did they?

Bread went up. The only commodity that went down was beef and there is a question whether it had any relationship to the price of grain or whether it was something else that caused that to happen.

If, as a matter of fact, this is going to be inflationary, then let me say three things. I do not believe the dimension of the inflation. But, even so, and if the farmer is going to get a fair price for his crops, then it is their just due. They should have got it last year and the year before, and the American consumer should have been paying for it last year and the year before.

If this system was working, we should have had a deflation while they were going broke, and we just picked that up now with an inflation, which they would be entitled to and simple justice demands.

So we can stand up here and talk about social justice when we pass a social security bill that is going to cost the American people $33 billion. We can stand up here and talk about simple social justice when we change the minimum wage. Yet it is said by economists that those two acts alone will add 2 full percent to the consumer price index within 18 months after they are in full force and effect.

Yet we passed them. This Congress passed them in the name of justice, in the name of something that was needed for this country.

We do not have very many options left for the farmers in America. We either have an independent small farmer out there growing our crops, keeping us productive, keeping us healthy, selling overseas to balance our payments, or we let them go broke and let something take its place.

Either the Government runs it, and if we do as well with it as we did with the Post Office, it will make the subsidies that people are crying about here look like absolute Christmas presents. Or we can let the huge monstrous corporate farms take over. Then we will see the prices. We will see them related directly to supply because they will control them.

It will not be the small independent farmer who trusts this enterprise system, only to find that when he loses money and the price to him comes down, the consumer does not benefit. But the first time he comes in, in a disaster, and says, "Give me a fair return," the cry is, "Inflation. We can't afford it." Well, I think tit for tat.

We should have given them credit last time, when they lost money; and if we have to make it up now with some added

costs and some inflation, then it is their just due.

I am not smart enough to know how to straighten out this system, whereby the American farmer can get a reasonable, fair return for the work and the risk. They do not really demand very much. They like their life, but they also like to be assured once in a while that their toils will bring them a reasonable profit. They are sick and tired of the roller coaster. They are sick and tired of selling a lot overseas one year and a little the next.

I say more power to the Agriculture Committee, to bring us these two bills. I hope that when they go to conference, they will bring back a bill that will say to the American farmer, "We want you to make a fair living, and you're just as much entitled to simple justice and equity as any other group of Americans, be they social security recipients or those we are trying to protect with a minimum wage, or the millions and millions in categorical grants that we continue to pass here, in the name of helping the unfortunate people of this country who cannot help themselves."

These farmers do not demand that much. They only want help through a disaster and a crisis so that they could do it for themselves, for this country, and help feed the world.

I thank the Senator from Kansas for yielding 5 minutes to the Senator from New Mexico.

Mr. TALMADGE. Mr. President, the Senator from Missouri has a noncontroversial amendment which will take only a few minutes, and then the distinguished Senator from Vermont desires 5 minutes.

UP AMENDMENT NO. 1224

The PRESIDING OFFICER. The Chair recognizes the distinguished senior Senator from Missouri (Mr. EAGLETON) to call up an amendment.

Mr. EAGLETON. Mr. President, I send an amendment to the desk, which is a modification of the printed amendment which is at the desk.

The PRESIDING OFFICER. The amendment, as modified, will be stated.

The assistant legislative clerk read as follows:

The Senator from Missouri (Mr. EAGLETON), for himself and Mr. BELLMON, proposes an unprinted amendment numbered 1224.

Mr. EAGLETON. Mr. President, I ask unanimous consent that reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment as modified, is as follows:

On page 3, line 5, strike out "under which" and insert in lieu thereof "so as to achieve an average price of not less than $3.50 per bushel for such crop of wheat. Under such program".

On page 3, beginning with "estimates" in line 24, strike out down through "section" in line 25, and insert in lieu thereof "determines necessary, together with the exercise of his authority under any other program authorized by law, to achieve the purposes of this section".

On page 6, line 17, strike out "under which" and insert in lieu thereof "so as to achieve an average price of not less than $2.50 per bushel for corn and an equivalent price for grain sorghum and barley for such crop of such commodities".

On page 7, beginning with "estimates" in line 10, strike out down through "section" in line 11, and insert in lieu thereof "determines necessary, together with the exercise of his authority under any other program authorized by law, to achieve the purposes of this section".

On page 10, line 1, strike out "under which" and insert in lieu thereof "so as to achieve an average price of not less than 60 cents per pound for such crop of upland cotton".

On page 10, beginning with "estimates" in line 20, strike out down through "section" in line 21, and insert in lieu thereof "determines necessary, together with the exercise of his authority under any other program authorized by law, to achieve the purpose of this section".

On page 12, line 25, strike out "Corporation." and insert in lieu thereof "Corporation.'."

On page 13, line 5, strike out "under which" and insert in lieu thereof "so as to achieve an average price of not less than $6.00 per bushel for such crop of soybeans. Under such program".

On page 13, beginning with "estimates" in line 21, strike out down through "tion" on line 22, and insert in lieu thereof "determine necessary, together with the exercise of his authority under any other program authorized by law, to achieve the purposes of this section".

Mr. EAGLETON. Mr. President, time and again we in Congress have set forth in agricultural legislation that it is the goal of the Federal Government to preserve the American family farm. And yet, unless we take action now, we will be supporting the death of the family farm.

The fence-row to fence-row policies of the previous administrations have caused such drastic supply and demand dislocations that prices have plummeted. At the same time the cost of the inputs needed to produce each bushel of grain and bale of cotton has markedly increased. This situation is now so bad that farmers have been determining what to plant not on the basis of which crop will make them the most money, but rather on the basis of which crop will minimize their losses.

As consumers we must recognize the blunt facts. Whereas our Nation's farmers have not only fed us more than adequately ever since the beginning of this country, they are now subsidizing out of their own pockets each meal we consume.

The Carter administration has taken steps which have stopped the fall of prices so that the situation will get no worse.

They have instituted the farmer-held grain reserve program which not only isolates the surplus production off the marketplace, but also provides the farmer with an additional marketing option previously unavailable. In addition, the grain storage facility construction program has provided many farmers with the opportunity to build storage on his farm so that he can hold all or a portion of his crop when it is harvested instead of having to sell it at harvest time when prices are almost always at their lowest.

These efforts by the Carter administration are to be praised; however, they do not go far enough, fast enough, to solve the current problem. It is my firm belief that the family farm system of agriculture in this country cannot survive any longer under current market and price conditions.

The bills we have before us today are both intended to give the family farmers relief from their strained financial situation.

As chairman of the Senate Agriculture Appropriations Committee, I conducted 2 days of hearings in an effort to pin down the costs of both the Talmadge and Dole bills and their impact both on farmer income and on consumer prices.

The Department of Agriculture's chief economist, who testified at both sessions states that the 31 million additional set-aside acres which the Talmadge bill calls for would not be adequate to achieve the market-price levels desired; namely, $2.50 for corn, $3.50 for wheat, $6 for soybeans, and $0.60 for cotton. To reach those levels, according to the Department's analysis, would require an addition of approximately 15 million acres of set-aside above and beyond what the Talmadge bill calls for. That would bring the total set-aside acreage for the 1978 crop year to something in excess of 61 million acres. Broken down as follows:

Fifteen million acres alreay programed for set-aside under current Department plans.

An additional 31 million acres proposed under the Talmadge bill.

Yet another 15 million acres thought to be necessary by the Department to reach the desired commodity price levels.

Mr. President, it was the strong view of the Department that it would be hazardous to withdraw that much acreage from food production. It could leave us extremely vulnerable to bad weather in this country or a poor harvest elsewhere in the world. Wheat reserves are very high at the present time, but we would seriously deplete those stocks if we attempted to curtail production this year on the scale that would be necessary to meet the price objectives of the Talmadge bill.

I strongly support the Talmadge bill and the amendment I propose in no way changes the basic thrust of that bill. It would, however, give the Secretary of Agriculture some discretion as to how he would achieve the price objectives we want, so that he is not required by law to accomplish that goal solely through set-asides, with all the implications that might have for world food reserves.

My amendment proposes that rather than legislating the means of achieving our price goal we legislate the goal itself and give a range of discretion to the Secretary in how he goes about it.

I believe some part of that solution must involve additional set-aside acreage and so I have not changed in any respect the new set-asides called for in the Talmadge bill. But, in view of the Department's belief that those 31 million acres will not be sufficient, my amendment provides the Secretary shall take such other actions as he deems necessary and desirable to meet the price levels called for. These could include a number of things such as increasing our farmer-held grain reserves and raising commodity loan levels. The Secretary is fully empowered to take such actions on his own.

In sum, I believe my amendment simply restates the Talmadge objectives in a manner which is more achievable and with fewer risks to critical food reserves.

Mr. TALMADGE. Mr. President, I have examined the amendment, and so has the staff, and I have discussed it with Senator DOLE. It merely mandates the objectives of the bill and directs the Secretary to accomplish them—that is, a price of $3.50 a bushel for wheat, $2.50 a bushel for corn, 60 cents a pound for cotton, and $6 a bushel for soybeans. Those would be the floors and not the maximums, of course.

I am prepared to urge the Senate to accept the amendment.

Mr. MUSKIE. Before the Senator does that, I should like a question.

As I understand the Eagleton amendment, by putting in prices to be achieved as a result of the set-aside program, this result could follow, and I put it in the form of a question, either to the sponsor or the floor manager: If the set-aside does not have the effect of achieving the price level named in the Senator's amendment, then presumably the Secretary would have to find additional acreage to set aside, until the price level is achieved.

Mr. TALMADGE. That would be one. He could put more in reserve, or he could lower the level.

Mr. EAGLETON. I might add, in response to the distinguished Senator from Maine, that the way the amendment is worded, the Secretary can use any method he desires to achieve the price. He does not have to use set-aside. He can use other alternatives that are within his executive authority. It does not per se mandate that there must be a set-aside greater than the 31 million acres Senator TALMADGE has included in his bill in order to achieve the stated prices.

Mr. MUSKIE. The effect is to assure that prices rise as mentioned in the Senator's amendment.

Mr. EAGLETON. It is the desire that prices do rise to the level indicated in this amendment.

Mr. DOLE. Mr. President, will the Senator yield?

Mr. EAGLETON. I yield.

Mr. DOLE. I share the views expressed by the chairman. I think it is a good amendment. What it does is to keep the pressure where the pressure should be applied. From that standpoint, with the upward pressure to achieve the goals set forth in the amendment, it will be helpful to the Secretary of Agriculture. I am not suggesting that he needs pressure, but I think this will be something to point at and say, "This is the law." I think it is a good amendment.

The PRESIDING OFFICER. The question is on agreeing to the amendment, as modified.

The amendment, as modified, was agreed to.

Mr. EAGLETON. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. TALMADGE. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. TALMADGE. I yield 4 minutes to the distinguished Senator from Vermont.

The PRESIDING OFFICER. The Chair recognizes the distinguished Senator from Vermont (Mr. LEAHY) for 4 minutes.

Mr. LEAHY. I thank the chairman, Senator TALMADGE.

Mr. President, in the last few months, the American agricultural movement has successfully brought attention to the present plight of the American farmer. The protests, the strikes, and the lobbying by the farmers demonstrates the severity of the situation.

Farmers costs have increased dramatically, while prices received for their products have dropped. They are being crushed by overwhelming debt. Their purchasing power is at one of the lowest points since the depression of the 1930's.

Action to provide a fair return to farmers for their work and investment must be taken.

The two bills on the Senate floor today are directed to alleviating the current pressure of low prices. I laud their intent to provide greater income to farmers. However, I cannot share their approach. Both H.R. 6782 and S. 2481 are directed toward reducing supply and therefore forcing market prices up. Both bills reduce supply by paying farmers not to grow. The Talmadge bill does this directly through diversion payments. The Dole bill indirectly by paying farmers greater deficiency payments for growing less.

I object to this approach of supporting farm prices. I have deep philosophical problems with any measure which pays farmers to idle their land. I believe my view opposing paid set-aside is shared by a great portion of the American people. The American public is committed to supporting the farmers of the Nation. They will support us in our efforts to provide a fair return to the farmer for his goods. However, I fear they will not understand paying for not growing and will be less willing to support any farm program in the future.

In addition to my philosophical objectives, I believe that massive paid set-asides are too much of a gamble to take. I want the present set-aside program to have a chance to work. However, the reduction of stocks by the quantities foreseen in the Talmadge and Dole bills leave us very vulnerable to the vagaries of weather. Both bills assume that with good weather grain prices will rise sufficiently to provide grain farmers a fair return. As I have stated I support this increase, and I believe that the major feed users, the cattle, dairy, and poultry industries, do also because we cannot provide a long-term stable supply on a cheap feed or food policy.

However, I am worried about what happens if after such a large cutback of planting we have a major crop shortfall here in the United States or anywhere in the world? Food and feed prices would skyrocket.

Under such a "bad weather" situation a dollar or two a bushel jump in prices is conceivable. Such an increase in so short a period of time would be devastating for our livestock and poultry industry. In addition, the inflationary impact would be seriously disruptive to our economy.

Finally, diminished resources would have the greatest impact in human terms. If we have a serious shortfall after reducing our stocks, it would be painfully felt by those in greatest need—the hungry and malnourished of this country and the world.

Opposing any paid set-aside does not mean I oppose income supports for farmers. It merely means I support a different approach.

I support measures to provide a farmer a reasonable return for his crop. I believe we should raise farm target and loan supports so they more accurately reflects the cost of production.

I support this minimum income price concept for a number of reasons. First, it provides freedom to farmers to make their own management. They can decide what and how much to grow. The Government should, as it does with numerous other products, merely insure that they receive an adequate price for their product. I believe the Ameican public can understand and support this minimum price concept.

In addition, the paying of deficiency payments does not affect our buffer stocks. If we experienced a serious shortfall, we might have sufficient stocks to see us through without serious disruption to the other segments of the farm sector and to our economy.

Also, I fear if we take steps to reduce our supply and unilaterally raise our grain prices, our negotiating position with world grain producers and consumers will be seriously eroded and we may even price ourselves out of the world grain markets.

Finally, higher price support payments built upon the 1977 current law with its payment limitation will direct our Government resources toward the small- and moderate-size farmer who needs it the most.

I understand that if we do have gross higher target prices without acreage reductions it will mean increased exposure for the U.S. Treasury. However, I prefer to take this gamble than gamble with reduced stocks and the possibility of a serious crop shortfall and its resulting consequences.

Therefore, Mr. President, I plan to oppose any measure for paid set-asides and will support measures, such as my vote for Senator MCGOVERN's amendment, to guarantee a reasonable return to farmers through increased target and loan prices.

Mr. TALMADGE. Mr. President, I believe the distinguished Senator from Maine has one additional amendment he desires to consider at this time.

The PRESIDING OFFICER. The Senator from Maine (Mr. HATHAWAY).

UP AMENDMENT NO. 1225

(Purpose: To prohibit the growing of Irish potatoes on set-aside acreage)

Mr. HATHAWAY. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The assistant legislative clerk read as follows:

The Senator from Maine (Mr. HATHAWAY) proposes an unprinted amendment numbered 1225.

Mr. HATHAWAY. Mr. President, I ask unanimous consent that the reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 6, after the period in line 3, add the following:

"In no case shall any producer be permitted to devote any acreage set aside under this section to the production of Irish potatoes.".

On page 9, after the period in line 16, add the following: "In no case shall any producer be permitted to devote any acreage set aside under this section to the production of Irish potatoes.".

On page 12, after the period in line 22, add the following: "In no case shall any producer be permitted to devote any acreage set aside under this section to the production of Irish potatoes.".

On page 15, after the period in line 20, add the following: "In no case shall any producer be permitted to devote any acreage set aside under this section to the production of Irish potatoes.".

Mr. HATHAWAY. Mr. President, the Talmadge bill will set aside 31 million acres, and this amendment simply assures that on those acres that are set aside potatoes will not be grown.

Mr. TALMADGE. Mr. President, will the Senator yield?

Mr. HATHAWAY. I yield.

Mr. TALMADGE. I am glad to accept the amendment, and I state that my colleague from Kansas is agreeable to accept the amendment and I urge the Senate to approve it.

We do not want to set aside land and urge the growing of Irish potatoes on that land and cause a surplus in Maine.

Mr. DOLE. Mr. President, I accept the amendment.

The PRESIDING OFFICER. The question is on agreeing to the amendment.

The amendment was agreed to.

UP AMENDMENT NO. 1226

(Purpose: To provide a 1978 potato set-aside program)

Mr. HATHAWAY. Mr. President, I have another amendment that I send to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The assistant legislative clerk read as follows:

The Senator from Maine (Mr. HATHAWAY) proposes unprinted amendment numbered 1226.

Mr. HATHAWAY. Mr. President, I ask unanimous consent that the reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 2, line 24, strike out "115" and there insert "116".

On page 15, between lines 17 and 19, insert the following:

"1978 POTATO SET-ASIDE PROGRAM

"SEC. 115. Notwithstanding any other provision of law—

"(a) The Secretary shall formulate and carry out a program for the 1978 crop of potatoes under which payments shall be made to producers on a farm who, to the extent prescribed by the Secretary, set aside and devote to approved conservation uses an acreage of cropland on the farm in accordance with contracts entered into by the Secretary with such producers. The payments for a farm shall be at such rate or rates as the Secretary determines to be fair and reasonable, taking into consideration the productivity of the acreage to be set aside and the extent of the cropland to be set aside under this section.

"(b) The total acreage of cropland set aside from the production of potatoes under this section shall be the amount necessary to adjust the total national acreage of potatoes to desirable goals, as determined by the Secretary. Notwithstanding any other provision of this section, the rate of payment established by the Secretary shall be set at such level as the Secretary estimates will achieve the purposes of this section and assure the set-aside under this section of sufficient acreage. The Secretary shall limit the total acreage to be set aside under this section in any country or local community so as not to affect adversely the economy of the country or local community.

"(c) The acreage set aside under this section may be devoted to wildlife food plots or wildlife habitat in conformity with standards established by the Secretary in consultation with wildlife agencies. The Secretary may pay an appropriate share of the cost of practices designed to carry out the purposes of the foregoing sentence. The Secretary may provide for an additional payment on such acreage in an amount determined by the Secretary to be appropriate in relation to the benefit to the general public if the producer agrees to permit, without other compensation, access to all or such portion of the farm, as the Secretary may prescribe, by the general public, for hunting, trapping, fishing, and hiking, subject to applicable State and Federal regulations.

"(d) The Secretary shall provide adequate safeguards to protect the interests of tenants and sharecroppers.

"(e) If the operator of the farm desires to participate in the program formulated under this section, the operator shall file a contract to do so no later than such date as the Secretary may prescribe. The Secretary may, by mutual agreement with the producers, terminate or modify any contract entered into under this setcion if the Secretary determines such action necessary because of an emergency created by drought or other disaster, or in order to prevent or alleviate a shortage in the supply of agricultural commodities.

"(f) Fifty per centum of any payment to producers under subsection (a) of this section shall be made in advance of determination of performance.

"(g) In any case in which the failure of a producer to comply fully with the terms and conditions of the program formulated under this section precludes the making of payments, the Secretary may, nevertheless, make such payments in such amounts as the Secretary determines to be equitable in relation to the seriousness of the default.

"(h) The Secretary is authorized to issue such regulations as the Secretary determines necessary to carry out the provisions of this section. With regard to potato acreage planted for harvest, the Secretary shall administer the program formulated under this section in such a manner as to permit the use of acreage set aside under this section for haying, grazing, clipping, or wildlife food plots and habitat.

"(i) The Secretary shall carry out the program authorized by this section through the Commodity Credit Corporation."

Mr. HATHAWAY. Mr. President, first of all, I thank the Senator from Georgia and the Senator from Kansas for accepting my last amendment. I hope that they will extend the same courtesy on this next one, which establishes a set-aside for potatoes.

Mr. TALMADGE. Mr. President, will the Senator yield?

Mr. HATHAWAY. I am happy to yield.

Mr. TALMADGE. Mr. President, this amendment provides for the set aside of cropland previously used to produce Irish potatoes. No. 1, this is not germane and is subject to a point of order.

No. 2, the Irish potato is a short season vegetable crop that is produced probably everywhere in the United States and sometimes it is in short supply and sometimes it is in surplus.

I do not believe it lends itself to a set-aside. It is a perishable commodity.

The other commodities have not been perishable except over a very long period of years and huge surplus.

I regretfully have to make the point of order that the amendment of the Senator from Maine is not germane and is therefore not in order.

The PRESIDING OFFICER. The point of order is well taken, and the amendment is ruled to be out of order.

● Mr. HATHAWAY. Mr. President, I wish to express my support for the Emergency Agricultural Act of 1978.

As we have seen in recent weeks, there are thousands of farmers who need help at this time if they are to avoid bankruptcy.

Chairman TALMADGE, in the committee report to the bill states:

What we have seen is but the tip of the iceberg. The gathering farm crisis is painfully evident in terms every American should be able to understand.

Many farmers are being crushed by overwhelming debt.

The prices farmers must pay to produce the food and fiber for the Nation and much of the world has multiplied manyfold.

They have been devastated by natural disasters of drought and flood.

They have been subjected to a vicious cycle of boom or bust.

For potato farmers and dairy farmers in the Northeast and in Maine, section 4 of the bill is of the greatest interest. Liberalizing eligibility and increasing the limits on real estate and operating loans will help many farmers whose banks have been unable to go further than they already are with their clients.

However, I believe that increasing the ability of farmers to borrow money is of little use when prices are low, because of uncontrollable and abundant production.

Potato farmers in Maine are suffering from one of the worst years in memory. Prices have remained tenaciously low—about $2 a barrel. But costs of production and storage are between $6 and $7 per barrel.

Less than 10 years ago, it cost about $400 per acre to produce potatoes. Today, it costs about $1,000 per acre. Tractors, equipment, fertilizer, and pesticides are increasingly expensive.

But demand for potatoes is somewhat more inelastic than for many other agricultural commodities. They are perishable, thus harder to export or store for long periods of time.

I feel that, given these factors, it may be time to consider creating a set-aside

program for potatoes. After all, if Farmers Home is going to support a system of credit that only enables farmers to get further overextended than they would have gotten on their own, it must be time to approach this on a businesslike basis. That means some control on production is required in order to achieve better prices for all.

Acreage limitations on potatoes were used in the 1940's up until about 1951. They had some problems, but I am sure that with a careful look at today's needs, coupled with the lessons of experience, it would be possible to fashion a program of benefit to all potato farmers.

In any case, agriculture has become so expensive, while food in the United States remains such a bargain, that it behooves us to look at all of agriculture, in all parts of the country, and start to take steps to preserve and strengthen it.

My amendment, which has been ruled out of order, would have enabled the Secretary of Agriculture to conduct a 1-year potato set-aside. In that way, we would discover how to perform a set-aside of a crop like potatoes, which is more perishable than soybeans or wheat. I do believe that the principle of a set-aside is essentially the same in each case, since it is not perishability that is important; it is, instead, supply and demand.

I regret that there was not the opportunity to be included in the time agreement on the bill. However, I shall submit legislation and will press the chairman to hold hearings in order that the potato industry can participate fully in determining the kind of help it needs.●

Mr. TALMADGE. Mr. President, the distinguished Senator from Kentucky desired 3 minutes. I yield him 3 minutes.

The PRESIDING OFFICER. The Chair recognizes the distinguished Senator from Kentucky (Mr. HUDDLESTON).

Mr. HUDDLESTON. I thank the distinguished chairman of the Agriculture Committee.

Mr. President, I shall take a couple minutes to express my support for the effort that is being made here today on the floor of the Senate.

First, I commend the chairman of the Agriculture Committee who several weeks ago, seeing and understanding the plight that the American farmer was faced with, scheduled a long series of hearings by the committee to explore the dimensions of this difficulty and to seek ways to find solutions. He and the distinguished ranking minority member of the committee, Senator DOLE of Kansas, joined in these very extensive hearings, and today's labor is a result of those hearings.

I have supported both efforts that have come to the floor, the Talmadge bill and the Dole flexible parity approach.

I believe that they both have good features. Also, they both have language in them that needs to be adjusted, and I think the melding of them here today with the other amendments gives us the opportunity to go to conference, work out the best, combine that which is good, discard that which may not be effective, and produce an effort that will be of substantial benefit to the agriculture sector of our Nation.

I think it is appropriate that we do this.

All of us recognize that the agriculture production capacity of the United States is without doubt our greatest asset. If we do not protect that asset, and if we permit the American farmer to be run off the farm to seek other ways to make a living, we will lose that capacity. And, as the population not only of this country but of the remainder of the world continues to climb upward, somewhere not too far distant production will not be adequate and we will find ourselves in a serious shortage situation. It is in the best interest of the American consumer and the best interest of this Nation that we prevent that from happening.

The need is now. I think everyone recognizes the urgency of doing something that will provide some immediate relief. We know this is not the final answer. We know that in the total picture to put together a program that takes care of the needs of all of the diverse sectors of agriculture is like a giant jigsaw puzzle. The pieces have to fit together very carefully. But this is a start.

Mr. DOLE. Mr. President, will the Senator yield?

Mr. HUDDLESTON. I yield.

Mr. DOLE. Mr. President, I say very quickly that I appreciate the Senator's comments and also his leadership on the committee, his efforts to work all the time for agriculture, and his help on the flexible parity concept in particular.

I thank my distinguished friend.

Mr. TALMADGE. Mr. President, I thank my distinguished colleague from Kentucky who served so ably on our committee.

Mr. JAVITS. Mr. President, will the Senator yield 2 minutes?

Mr. TALMADGE. I yield 2 minutes to the distinguished Senator from New York.

The PRESIDING OFFICER. The Chair recognizes the distinguished Senator from New York (Mr. JAVITS) for 2 minutes.

Mr. JAVITS. Mr. President, the consumers, and I represent millions of them, have really much at stake here. We must strike a balance between what is to be done for American agriculture and the impact on the consumers from the increased food costs that will result without any question if what we are discussing today becomes law. Of course, inflation would, therefore, rise and the consumer's real standard of living would, therefore, be jeopardized.

Mr. President, I am going to try to vote as far as I can with the full recognition of those competing interests. I understand the situation which will be presented to us in that regard, and I may have to vote against everything, because of the interests which I represent. But I have a real feeling for the farmers suffering losses and so would vote for a bill that is more provident from the point of view of Government spending and less burdensome on the consumers. I hope such a bill would result from conference.

I wish to call my colleagues' attention to the fact that one classic way of improving the farm situation without bringing windfalls to some and not enough to others who feel they have been badly hurt, such as those who are overextended from purchases of machinery and land, is by aggressively developing farm exports. In 1977 the United States expected $24 billion worth of agricultural products. This year it is estimated we will export $3 billion less. This situation must be reversed.

There is an enormous opportunity right now to increase trade in the fact that the multilateral trade negotiations at Geneva are not yet concluded. A determined effort by our Government at Geneva to increase agricultural exports could be very, very successful.

In addition, we are engaged in very extensive foreign aid both directly and indirectly—directly through AID and indirectly through the international financial institutions. For fiscal year 1979 the administration has requested $1.8 billion in bilateral development assistance and $3.8 billion in multilateral development assistance. There should be a high premium placed upon this kind of assistance which is a great incentive to people to do better and better their own condition.

So I rise, Mr. President, for the purpose of seeing that in this debate, which essentially relates to the domestic price level, the opportunity for a great benefit to agriculture is not overlooked and that we maintain as a key element of our agricultural policy the need for widely stimulating, inventively and intelligently, agricultural exports as one of the prime ways in which the agricultural situation can be helped.

Mr. TALMADGE. Mr. President, will the Senator yield?

Mr. JAVITS. I yield.

Mr. TALMADGE. I concur fully with the distinguished Senator from New York.

As he knows, agricultural exports have risen from $7 to $24 billion.

Food needs are worldwide. Most of the countries use sophisticated gimmicks to keep out our agricultural products. I have talked to Ambassador Straus at least a half-dozen times, and assured him of the urgency of getting equity in the marketplace. For instance, in Japan they have a beef quota that Tokyo can eat up in 24 hours. Yet beef in Japan brings $15 a pound.

Mr. JAVITS. I understand that and am quite concerned about it myself.

Mr. TALMADGE. Our farmers are being swamped with beef imports from Argentina and Australia. I thank my colleague.

● Mr. EAGLETON. Mr. President, let me say a word or two on the Dole amendment. I most certainly agree with Senator DOLE's objective, the objective we all share; namely, to help the beleaguered farm economy. I honestly feel, however, that the implementation of the Dole amendment will be so difficult that it will not be of meaningful help to farmers who will have to plant their crops within the next few weeks. I believe that the Talmadge approach and the McGovern-Foley approach can be of help quickly. Therefore, I opted in favor of the Talmadge and McGovern-Foley approach.●

● Mr. BELLMON. Mr. President, as the Senate knows, the Senator from Oklahoma endeavored to amend the Dole proposal so that it would have the effect of requiring the idling of 44 percent of wheat acreage in order to qualify for the $5.04 per bushel support price. The bill, as now written, requires that a producer idle only 33 percent of the land in order to receive the $5.04 target price. My amendment lost by a vote of 29 to 66.

The Dole bill, as it presently stands, will cost the taxpayers in excess of $8 per bushel for each bushel of wheat not grown. To me, this is an exhorbitant price to expect taxpayers to pay. Certainly there must be a more cost effective means of achieving the result of balancing wheat supply and demand.

Had the Bellmon amendment been approved, the cost to the Treasury would have been reduced to about $3 per bushel of wheat not grown. That figure is not out of line since at the present time the price of wheat in the marketplace is about $2.80.

Mr. President, in good conscience I cannot support the Dole amendment in its present form. I consider it to be wasteful and that, in the long run, it would be detrimental to the interests of the farmers we are trying to help.●

The PRESIDING OFFICER. At this time, the hour of 3:30 having arrived, the question is on agreeing to the Dole amendment, as modified, and as amended. The yeas and nays have been ordered, and the clerk will call the roll.

The assistant legislative clerk called the roll.

Mr. LEAHY (when his name was called). Mr. President, on this vote I have a pair with the Senator from Michigan (Mr. RIEGLE). If he were present and voting he would vote "yea." If I were at liberty to vote I would vote "nay." Therefore, I withhold my vote.

Mr. WILLIAMS (when his name was called). Mr. President, on this vote I have a pair with the Senator from Colorado (Mr. HASKELL). If he were here and voting he would vote "yea." If I were at liberty to vote I would vote "nay." Therefore, I withhold my vote.

Mr. CRANSTON. I announce that the Senator from Alaska (Mr. GRAVEL), the Senator from Washington (Mr. MAGNUSON), and the Senator from Michigan (Mr. RIEGLE) are necessarily absent.

I further announce that the Senator from Colorado (Mr. HASKELL) is absent on official business.

The result was announced—yeas 55, nays 39, as follows:

[Rollcall Vote No. 71 Leg.]

YEAS—55

Abourezk	Hart	McGovern
Allen	Hatch	Melcher

Leahy, against.
Williams, against.

NOT VOTING—4

Gravel	Matsunaga	Riegle
Haskell		

So Mr. DOLE's amendment, as modified and as amended, was agreed to.

Mr. DOLE. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. TALMADGE. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

The PRESIDING OFFICER. The Senator from Maine.

Mr. MUSKIE. Mr. President, I note that for the first time today we have a good attendance on the floor. I really am inclined to conclude that there is no point in the chairman of the Senate Budget Committee spending a day on this floor to provide information on the budget and economic consequences of a bill like this; but I think I have some obligation to try for a few minutes. I doubt that it makes any difference. It seems to be the mood of the Senate to vote for anything that has the words "farm bill" in the title.

But last year there were 11 key issues on the floor of the Senate involving the question of whether or not the Senate would support the congressional budget resolution. The Budget Committee lost eight of those votes. Today, the Budget Committee has lost every vote that has been taken. In last year's vote of 11 votes, only 16 Senators voted for the budget most of the time.

I put the table in the RECORD this morning. I left out the names. It is my hope that not letting the other shoe drop might have some useful effect, but only 16 Senators last year voted to support the budget.

I wish to make a second point, and I made this point earlier when there were fewer Senators here. We have examined some of the March 15 reports of committees. I gave Senators two totals they can digest.

The Appropriations Committee has recommended appropriations for fiscal year 1979 of $508 billion.

The Finance Committee has set revenues at $428 billion. All Senators can subtract as well as I. Those two figures would mean a deficit in fiscal year 1979 of $80 billion, and that does not take into account the reports of other committees, many of which I know propose additional spending not reflected in those numbers.

And those numbers do not include the cost of this bill.

Now with respect to this bill, there is another point that to me is even more significant than the numbers we now have. I assume a substantial majority to support the Talmadge-Dole-McGovern bill. But nobody knows what the budgetary, inflationary, and economic consequences of that combination is.

This was put together at the last moment. The McGovern amendment did not even come to my attention until near midnight last night. We have an analytical arm in the Congressional Budget Office. It has not been able to give us the analysis which the budget process is supposed to give us so that we can vote intelligently. So we do not know. We have heard numbers. I have used the best I have got. We do not know what the budget cost for 1978–79 is.

The Dole amendment by itself was a $3 billion bill for 1978 and 1979. The McGovern bill by itself was a $1.9 billion bill for 1978–79, but you do not necessarily add those two numbers and be fair. Nobody knows.

As for the inflation effect, CBO has told us, because I pressed them to give us something today, that the inflation impact of Dole, McGovern, Talmadge is 1 full percentage point added to the rate of inflation, because of the impact on carryover stocks, which are our protection for stable markets, which are our protection against bad crop years.

Excessive exports are going to be down from the 1 billion bushels of wheat that we had in 1972 to 600 million on feed grains. We are going to drop from the 2.1 billion bushels of feed grains that we had in 1972 to 300 million, and those numbers in 1972 were not sufficient to protect us against runaway prices when we had 2 crop years in the 2 years following.

Now all of this is imprecise information because we have not taken the time, and nobody on this floor was interested in taking the time to get a final and full analysis.

We had a prime example today of voting without knowing what we are voting for, and we think we are doing a favor for the agricultural sector of our economy. We may learn otherwise in a year or two.

I have seen too many examples of ad hoc pieces of legislation rushed through here under the pressure of emotion and urgency and emergency that later proved not only not to solve the problem that the sponsors urged, but to create the side effects that were worse than the original problems.

Well, I am not sure how long this budget process is going to survive, but I doubt if it can survive this kind of situation.

It is like the Bill of Rights. The Bill of Rights is tested by bad clients. It is the people who commit crimes who test the Bill of Rights.

Well, with respect to the budget it is not the good bills that test it usually. It is the tough choices that test it. As far as I can see over the last 2 years, when we came to the tough choices, the Senate backed down.

The PRESIDING OFFICER. Who yields time?

Mr. DOLE. Mr. President.

The PRESIDING OFFICER. The Senator from Kansas.

Mr. DOLE. Mr. President, may I take a minute to voice a vote of confidence for the so-called flexible parity concept.

I share some of the statements made by my distinguished colleague from Maine, the chairman of the Budget Committee, but I would again say that if we take the estimates of the CBO it is not a very rosy picture.

We checked some of their figures against present-day prices and I know there is the charge that now we have all three of these bills lumped together and I guess you add up the total cost of each and say that is going to be the cost of what——

Mr. MUSKIE. I said to the Senator we have not done that. I very carefully said a few moments ago I would not do that because I cannot do it.

Mr. DOLE. The Senator had a $3 billion figure for the Senator from Kansas.

Mr. MUSKIE. I said that I got that from the combination.

Mr. DOLE. I do not think the $3 billion figure applies to this Senator.

Mr. MUSKIE. The Senator has not used the same source as we rely on. He has made it clear that he prefers his own analysis.

I must rely on the CBO, which is our independent analytical arm created by the Congress for that purposes. The Senator would have us choose to go with our own computer rather than the CBO. That is another breakdown of the process.

Mr. DOLE. I do not suggest that at all. I would say to my distinguished chairman that it does seem to this Senator that if we are going to figure out costs for the flexible parity concept, we must take a realistic look at what the market prices are going to be when acreage is set aside. The market prices are going to go up.

Now when we talk about stable prices, you are talking about low prices and the farmers have had it bad enough. They would like to make a profit. They want to stay on the farms. They want to educate their children. They want to pay their bills.

We can talk all day long about justice and the CBO, but if we do not have a farmer left in this country the prices are going to go right out of this room for the American consumer, and I just suggest——

Mr. MUSKIE. Will the distinguished Senator yield?

Mr. DOLE. I will in a minute.

I just suggest—let us just take cotton. The CBO used the estimate of a market price of 46 cents a pound. The market price is 57 cents a pound. The target price is 60 cents a pound. So you make a bigger exposure for the Government if you use a lower market price.

I just think we have to be realistic. There is not a Senator in this Chamber who does not believe that if you set aside acreage, lower the production of a commodity, the market price is going to go up. That is the law of supply and demand.

But the Congressional Budget Office did not even assume that would happen, and I just suggest that we have a responsibility to take this into account.

We are not irresponsible because we happen to believe that what we are doing will not cost 1 cent. In fact, the chairman's bill, I think, will save about $90 million.

Mr. TALMADGE. $90 million?

Mr. DOLE. In the next 2 years, and I think the flexible parity concept offered by this Senator and many other Senators, Democrats and Republicans, will end up in saving the American taxpayers money.

Mr. McCLURE. Will the Senator from Kansas yield to the Senator from Idaho?

Mr. DOLE. I am happy to yield to the Senator from Maine and then to the Senator from Idaho.

Mr. MUSKIE. I have never been one to argue that budget processes do not work. If the budget process does not work, it means that Congress has lost the one institution it has created to set priorities, to assure stability of the economy to the best of our wisdom, and if it does not work, the loss will be not only mine and the Senator from Kansas, but the loss will be the farm population of this country, the consumer population of this country, the taxpayer population of this country.

Mr. President, I ask unanimous consent that the CBO estimate of the Dole bill be printed in the RECORD. It speaks for itself and it speaks very well.

There being no objection, the estimate was ordered to be printed in the RECORD, as follows:

CONGRESSIONAL BUDGET OFFICE,
Washington, D.C., March 19, 1978.

Hon. EDMUND S. MUSKIE,
Chairman, Committee on the Budget, U.S. Senate, Washington, D.C.

DEAR MR. CHAIRMAN: In response to your request of March 16, enclosed is a copy of the Congressional Budget Office cost estimate of S. 2481, the Flexible Parity Act of 1978.

Also enclosed in response to your request is a CBO staff analysis of the estimated effects of both S. 2481 and H.R. 6782 on production, prices, exports and stocks by crop underlying our separate cost estimates of the two bills. This staff analysis also discusses the possible effects on these factors if both bills were enacted and implemented.

Additional information has been provided to the Committee staff concerning the details of the CBO cost estimates and staff analysis.

Sincerely,

JAMES BLUM,
(For Alice M. Rivlin, Director).

Enclosures.

CONGRESSIONAL BUDGET OFFICE,
Washington, D.C., March 19, 1978.

Hon. HERMAN E. TALMADGE,
Chairman, Committee on Agriculture, Nutrition, and Forestry, U.S. Senate, Washington, D.C.

DEAR MR. CHAIRMAN: Pursuant to Sections 403 and 308 of the Congressional Budget Act of 1974, the Congressional Budget Office has prepared the attached cost estimate for S. 2481, a bill to provide producers of wheat, feed grains, and upland cotton the opportunity to receive parity prices for their 1978 crops; to amend the Agricultural Trade Development and Assistance Act of 1954; and for other purposes.

Should the Committee so desire, we would be pleased to provide further details on the attached cost estimate.

Sincerely,

JAMES BLUM,
(For Alice M. Rivlin, Director).

[From the Congressional Budget Office]

COST ESTIMATE, MARCH 19, 1978

1. Bill number: S. 2481.

2. Bill title: Flexible Parity Act of 1978.

3. Bill status: As ordered by the Senate Committee on Agriculture, Nutrition, and Forestry, March 15, 1978.

4. Bill purpose: S. 2481 provides for a variable parity program for the 1978 crops of wheat and corn. Producers may select one of seven set-aside levels for wheat, or one of eight set-aside levels for corn. Each set-aside level corresponds to a specific target price. For cotton, one set-aside choice would be available.

S. 2481 also increases the 1978 crop loan rates to $2.40 for corn and $2.85 for wheat. In addition, the release prices for the farmer-held grain reserves are to be based on parity prices rather than on loan rates.

S. 2481 also amends the Agricultural Trade Development and Assistance Act of 1954, as amended, as follows:

(1) Section 301 amends Title II of the Act to increase the minimum tonnage distribution in fiscal year 1978 by such tonnage of commodities as can be purchased by an additional expenditure of $250 million; and,

(2) Section 302 amends Title I of the Act to require the Secretary of Agriculture to provide financing of not less than $1,050 million for the purchase of U.S. agricultural commodities under agreements entered into during fiscal year 1978.

5. Cost estimate: The following table represents the estimated budget authority and outlays for direct spending programs in S. 2481:

Budget function 350

[Fiscal years, in millions of dollars]

Budget authority change (increase or decrease in contract authority):	
1978	−1,104
1979	+3,562
1980	0
1981	0
1982	0
Outlays:	
1978	−1,198
1979	+3,562
1980	−679
1981	−503
1982	−561

The next table shows the authorization amounts and costs associated with the proposed amendments to the Agricultural Trade Development and Assistance Act of 1954.

Budget function 150

[Fiscal years, in millions of dollars]

Authorization amounts, net:	
1978	154
1979	474
1980	—
1981	—
1982	—
Estimated costs:	
1978	372
1979	256
1980	—
1981	—
1982	—

6. Basis for estimate: This estimate assumes this legislation is enacted prior to April 15, 1978. The estimate is the change from the CBO current policy/current law base.

COMMODITY PROGRAMS

CBO's current policy projection of contract authority, necessary for the Commodity Credit Corporation, is $1,104 million in fiscal year 1978. This amount will be new budget authority in fiscal year 1978. The decrease in outlays in fiscal year 1978 under the provisions of S. 2481, if enacted, would reduce estimated contract authority (new budget authority) to zero.

The variable parity program has not previ-

ously been implemented as a government support mechanism, so there is no historical basis for projecting producers' reactions. Because each farmer's situation and judgment are likely to differ, a uniform distribution of base acreage over each of the possible set-aside categories was assumed for wheat and corn. For example, with eight set-aside alternatives available for corn, one-eighth of CBO's estimated base acreage was allocated to each of the alternatives. This implies 100 percent participation in the set-aside program, but at many different levels (in the case of cotton, 100 percent participation at the 20 percent level was assumed). The average set-aside on corn is about 32 percent, and the average set-aside on wheat is about 35 percent.

CBO did not adjust its base acreage estimates for possible shifts among crops.

Under these assumptions, wheat production would be reduced to 1.6 billion bushels from the current projection of 1.8 billion bushels. Corn production would be reduced from 6.2 billion bushels to 5.0 billion bushels, and cotton production from 13.4 million bales to 10.7 million bales.

However, the reduction in volumes produced would be partially offset by a lower volume of farmer-held reserves than is assumed in CBO's current projection. This occurs because of the change in the release price mechanism. Farmers are not likely to place additional grain in the reserve if the release prices are nearly double the current prices, and are likely to be continually rising as parity prices are adjusted. This could have the effect of taking the grain off the market indefinitely. The result is additional loan repayments on approximately 500 million bushels of corn and approximately 150 million bushels of wheat, part of which fall in fiscal year 1978 and part in fiscal year 1979.

The higher loan rates, which tend to push projected end-of-year prices upward, induce some additional repayments on existing loans. However, the higher loan rates induce increased gross lending on the 1978 crop.

With the uniform distribution assumption on set-aside selection, the average target price for corn is estimated to be $2.76, and deficiency payments would average $0.36 per bushel, as opposed to the current projection of $0.10 per bushel. In addition, the assumption of a 100 percent participation rate doubles the volume of corn on which deficiency payments are made as compared to the current policy projection. These estimated increased payments would fall in fiscal year 1979.

For wheat, the average target price is estimated to be $3.85, resulting in deficiency payments averaging $1.00 per bushel (the current projection is $0.62). However, the volume on which deficiency payments are made would decrease from 1.6 to 1.5 million bushels. The resulting estimated increase of $542 million would fall in fiscal year 1979.

Cotton deficiency payments in fiscal year 1979 are estimated to increase by over $200 million. The deficiency payment is projected at $0.142 per pound, as opposed to a current projection of $0.08 per pound, but the increase is partially offset by the decrease in production.

Disaster payments in fiscal year 1979 would increase by an estimated $130 million as target prices increase.

In the fiscal years following 1979, market prices are assumed to decline from those in fiscal year 1978, but remain above currently projected levels. This results in a savings in net lending and deficiency payments as opposed to current policy projections.

AGRICULTURAL TRADE DEVELOPMENT AND ASSISTANCE ACT OF 1954 (P. L. 480) AMENDMENTS

Section 301 requires that in addition to the current law minimum distribution of 1.6 million metric tons, an additional $250 million worth of commodities must be distributed in fiscal year 1978. Transportation costs for the $250 million of additional commodities shipments would require $75 to $125 million depending on the mix of commodities shipped. The mix will determine unit acquisition costs, total tonnage and shipping costs per ton. If the entire $250 million worth of commodities were actually shipped, the increased costs in fiscal years 1978 and 1979 would be from $325 to $375 million. The lower end of the transportation cost range implies the same mix of commodities shipped under the $250 million increment as are currently being shipped. The CBO estimate assumes the current commodity shipping mix.

Section 301—Title II

[Fiscal years, dollars in millions]

	1978	1979
Estimated authorization:		
New shipments and transportation	$325	—
Higher prices	—	$34
Change in funds carried forward	−172	172
Total	154	205
Estimated costs:		
New shipments and transportation	156	169
Higher prices	—	—
Total	156	203

Section 203 of the Agricultural Trade Development and Assistanct Act authorizes the Commodity Credit Corporation (CCC) to pay for the acquisition, processing, and transportation to designated ports of entry abroad of commodities distributed under Title II of the Act from its own resources. Section 403 of the Act authorizes the appropriation of such sums as may be necessary to carry out the purposes of the Act including such amounts as may be required to make payments to the Commodity Credit Corporation (CCC) for its actual costs incurred or to be incurred. Entering fiscal year 1978, the Title II program had available to it through appropriations Acts $648.8 million. If the full amount of commodities were purchased and shipped, the costs to the CCC would exceed this amount by $150 to $200 million. The President could cover this by requesting a supplemental appropriation for fiscal year 1978, or he could direct the Secretary of Agriculture to use the resources of the CCC to cover any obligations and seek an appropriation in fiscal year 1979 to reimburse the CCC.

The above cost stream assumes the President will seek a supplemental appropriation in 1978 for the full cost of commodities and transportation less the funds available to be carried forward into 1979. It also assumes a larger appropriation will be sought in fiscal year 1979 to cover the higher commodity prices from other provisions of the bill and the loss of funds carried forward.

Using the currently shipped mix of commodities, CBO assumes additional $250 million would purchase 1.1 million tons of commodities, or nearly a seventy percent increase to the current program. With half of the fiscal year passed, CBO assumes that both programing and shipping an increase of that magnitude in fiscal year 1978 is not possible. The above cost stream assumes the shipments will take place in fiscal years 1978 and 1979. However, completing all shipments could take more than two years if donees cannot be found for all the food that can be purchased with the $250 million.

Section 302 of this bill directs the Secretary of Agriculture to provide financing of not less than $1,050 million for the purchase of agricultural commodities under agreements entered into during fiscal year 1978 under Title I of the Act. Section 409 of P.L. 480 requires that new spending authority for Title I be limited to such amounts as are provided in appropriations acts. Entering fiscal year 1978, the President had $1.0 billion including receipts available for Title I. Shipments of $1,050 million plus transportation costs of $105 million in fiscal year 1978 would exceed this level by $155 million, and would require subsequent appropriations.

It is assumed, however, for purposes of this cost estimate that the President will negotiate and carry out agreements under Title I in conformance with the other provisions of the Act, including the requirement that the President shall take reasonable precautions to safeguard usual marketings of the United States, to assure that sales under this title will not unduly disrupt world prices of agricultural commodities or normal patterns of commercial trade with friendly countries, and to assure Title I sales do not displace any sales which would otherwise be made for cash dollars.

It is further assumed that in order for an agreement to be signed and commodities shipped in fiscal year 1978, the agreements must be under active consideration now. CBO estimates of the potential for new agreements over the Administration's current allocation range from $120 to $200 million. This estimate assumes the current allocation plus $120 of new agreements will be signed.

These new shipments are estimated to increase costs from the CBO current estimate by $216 million to $986 million. The CBO current estimate assumes that additional budget authority of $231 million is available in fiscal year 1978 for Title I purposes so that no new appropriations would be needed to cover the additional costs of Section 302.

Fiscal year 1979 costs are increased by higher commodity prices only. The CBO cost estimate assumes the level of commodity shipments is not affected by this legislation. The authorization level would be increased by the higher commodity prices and the smaller amount of funds carried forward from fiscal year 1978.

Section 302—Title I

[Fiscal years, dollars in millions]

	1978	1979
Estimated authorization:		
New agreements	$216	—
Higher prices	—	$63
Change in funds carried forward	−216	216
Total	—	279
Estimated costs:		
New agreements	216	—
Higher prices	—	63
Total	216	63

7. Estimate comparison.—

Commodity programs: USDA has estimated the combined fiscal year 1978 and 1979 costs of this bill at $1.5 billion, about $0.8 billion lower than CBO's estimate. USDA estimates an increase of $2.8 billion in deficiency payments, as opposed to CBO's estimated increase of $2.4 billion. However, USDA estimates a decline in net lending of $1.3 billion, while CBO estimates a net decrease of only $0.1 billion.

USDA assumes some acreage shifts from soybeans to corn, and from oats, flax, and sunflowers to wheat and barley. USDA also assumes a low participation rate in the corn

program. The average corn target is $3.17, (compared to CBO's $2.76) and the average wheat target is $4.29 (compared to CBO's $3.85). Estimates of market price do not differ substantially.

P.L. 480 amendments: None.

8. Previous CBO estimate: None.

STAFF ANALYSIS OF ESTIMATED EFFECTS OF H.R. 6782 AND S. 2481

The enactment of one bill or the other is likely to have a different result than the enactment of both bills.

SINGLE BILL ENACTMENT

Production is projected to decrease under each bill, but would decrease less with H.R. 6782 than with S. 2481. The estimated decrease in production for feed grains is approximately 200 million bushels for H.R. 6782, compared to approximately 1.2 billion bushels for S. 2481. The decrease in wheat production is about the same for both bills, about 300 million bushels.

The estimates for harvested acreages of wheat under both H.R. 6782 and S. 2481 are roughly equivalent (46–49 million acres). Feed grain acreage is estimated at about 80–82 million for H.R. 6782, but only 75–77 million for S. 2481. The feed grain acreage going out of production under H.R. 6782 is assumed to be composed largely of barley and grain sorghum, while the set-aside acreage for S. 2481 will probably be drawn from corn.

The market prices projected for the 1978 crop year are likely to be higher under S. 2481 than under H.R. 6782 for wheat and corn. While both bills restrict production and tend to move market prices upward, S. 2481 also increases loan rates. The loan rate increase exerts an additional upward push on market prices. Projected 1978 crop year prices for corn are roughly $2.40 per bushel with S. 2481 and $2.10 per bushel for H.R. 6782, compared to the current policy projection of $2.00 per bushel. Projected 1978 crop year prices for wheat are $2.85 per bushel with S. 2481 and $2.65 per bushel with H.R. 6782, compared to the current policy projection of $2.49 per bushel.

The estimated direct effect of H.R. 6782 on consumer prices is an increase of .15 to .20 percent in 1979. The estimated direct effect of S. 2481 on 1979 consumer prices is a .35 to .50 percent increase. It is possible that further price increases in 1980 would occur as a result of secondary effects.

The variable parity option in S. 2481 is estimated to increase the average target price for corn to $2.76 per bushel and the average target price for wheat to $3.85 per bushel for the 1978 crops. These increases, together with increased program participation, more than offset decreases in production volumes, and increase projected deficiency payments in fiscal year 1979 by $2.4 billion. With H.R. 6782, targets are static, but market prices increase and volumes decline. The net effect is a decrease in projected deficiency payments of $800 million in fiscal year 1979.

The higher market prices generated by H.R. 6782 would result in a net lending decrease of roughly $600 million in fiscal year 1979. Under S. 2481, there is a probable decrease in net lending of $1.2 billion in fiscal year 1978, but an increase of $1.0 billion in fiscal year 1979. The 1978 decrease occurs because of the farmer-held reserve does not reach the volume projected under current policy, and because end-of-year market prices induce higher repayments. However, in fiscal year 1979, the higher loan rate, together with declining end-of-year prices, increase net lending.

Exports of corn and wheat would be reduced minimally under H.R. 6782, less than one percent in fiscal year 1979. However, with S. 2481, the export volume of corn is estimated to drop twelve percent in fiscal year 1979 and the export of wheat drops eleven percent.

Wheat stocks are estimated to drop by approximately 17 percent, and feed grains drop by about 5 percent by the end of marketing year 1978 under H.R. 6782. Wheat stocks under S. 2481 drop by about 33 percent and feed grains by about 47 percent by the end of marketing year 1978. With S. 2481, the wheat stocks in the farmer-held reserve are reduced by 50 percent and feed grain stocks in the farmer-held reserve are reduced by 91 percent over the volumes with current policy and H.R. 6782.

BOTH BILLS ENACTED

The legal implications of the enactment of both bills are not clear. The order of enactment, the timing, and the manner in which USDA chooses to administer the programs will also help determine the combined effects.

If both programs are fully implemented, and H.R. 6782 is administered so as to meet the acreage objectives in the bill, acreage and production would be reduced beyond that estimated for either bill alone. Using CBO's current assumptions on set-aside participation with S. 2481, wheat production would be likely to be around 1.1 billion bushels. However, if all farmers chose both the 50 percent set-aside under S. 2481, and an additional 15 million acres were bid out of production, production could be as low as 700 million bushels, slightly more than domestic consumption. With CBO's current assumptions on set-aside participation for S. 2481, feed grain production would probably be about 4.1–4.8 billion bushels, depending on the crops taken out for the additional set-aside. However, with H.R. 6782 if all farmers were to choose both the 50 percent set-aside, an additional 10 million acres were bid out of production, production could be as low as 3.0–3.7 billion bushels. Stocks would be cut substantially in all cases.

With the enactment of both bills, there is clearly a possibility of greatly increased prices for wheat and feed grains. In addition, the risks associated with crop failure are magnified.

Government outlays for deficiency payments and net lending would be likely to decrease in the face of much higher market prices. However, the amount required for set-aside payments would increase.

Mr. McCLURE. Mr. President, will the Senator yield?

Mr. DOLE. I yield to the Senator from Idaho.

Mr. McCLURE. Just in the time available, I wish to say that I am a member of the Budget Committee. We questioned the witnesses who came before us in regard to the budget estimate and, let me frankly say, I do not believe those figures are accurate. If I believed those figures were accurate, I might respond as the Senator from Maine has responded. But I think the evidence is on the other side that, as a matter of fact, those costs will not occur as CBO has said.

THE FARM CRISIS

Mr. McGOVERN. Mr. President, I had a printed amendment to S. 2690, a bill to provide emergency assistance to producers of wheat, feedgrains, upland cotton, and soybeans and for other purposes.

Before explaining my amendment I want to congratulate the distinguished chairman of the Committee on Agriculture, Nutrition, and Forestry (Mr. TALMADGE) for the leadership he has shown in the face of the current agriculture crisis. The chairman moved swiftly and held 10 days of hearings to listen carefully to every segment of the agricultural community. No one can question his long and dedicated service to American agriculture. I have served on the Agriculture Committee for 15 years at the side of the present chairman. During those years we have both seen the agricultural scene change drastically. The senior Senator from Georgia is sensitive to the problems of farmers and his legislative skills prompt him to move swiftly. The present bill for consideration has a number of cosponsors. It was reported from the committee without dissent. Admittedly, it addresses itself in the short range to the present emergency by pumping an estimated $2.3 billion into the hands of farmers quickly in return for their agreement to lay aside land. Laying aside 31 million acres will undoubtedly have a positive effect on farm prices. It can also be a valuable land conservation and energy saving measure.

The American Agriculture Movement has made its point in this Capitol City. Though the bill under consideration falls short of all their goals, it is still a start. I am confident that the chairman will seek later in the year to address the concern of the committee to the long range objectives of this Movement and to the long-term concerns of some of our farm organizations who have been fighting the battle for farm parity for many years.

Mr. President, though I support the present legislation and voted for it in committee, I feel that there is a good opportunity to strengthen it. Farmers must still be encouraged to produce. They will only do this if they have reasonable assurances of support from the government at reasonable levels. The bill we passed last year did not contain acceptable figures in this area and, though I feel that the administration must bear the brunt of this responsibility, it is certainly evident from the farm demonstrations this year in Washington that farmers simply won't accept the figures contained in that bill. I offered a bill in committee which I felt contained reasonable target and loan figures. Though it was rejected by the committee, there was substantial support for its acceptance. This leads me to conclude that the committee was not conceptually opposed to higher target and loan rates on basic commodities but rejected only the figures I offered.

For this reason, I now offer an amendment with more moderate numbers. These numbers, in my judgment, are still not high enough but they do, I feel, contain sufficient encouragement to let farmers know that we are on their side.

Thus, I propose that the minimum established price for 1978 on wheat be raised to $3.55 and the minimum loan to $2.80. On corn, I propose an established price of at least $2.50 a bushel and a minimum loan of $2.25.

On upland cotton, I ask a target price $0.60 per pound and raise the loan to $0.50.

Let me say, Mr. President, that one of the reasons I offer this amendment is to strengthen the position of the Senate in dealing with the House in conference. It is my judgment that both the House

Agriculture Committee and the membership in the House are not ill disposed to the concept of higher targets and loans on basic commodities. With this conviction in mind, as well as a strong feeling on my part that these better figures are needed, I offer this amendment.

To those who would criticize this move on the basis of cost, let me say that taking 31 million acres out of production has to result in an upward movement in market price, and can do nothing but cut the cost of a support program. I do not know what the market will be. I do know that without these basic minimums in support prices, this Congress will severely short change any effective farm program. I further want to remind Senators that the figures I suggest today are not too far from those I recommended last year. Had these figures been in last year's bill, it could well be that some of the intensity of ill-feeling farmers now have for the Congress and the administration could have been averted.

Mr. President, the last section of the amendment I propose calls for an additional half a billion dollars in Public Law 480 food for peace authorization for fiscal year 1979. This program has fallen on bad days and needs new life. It is popular with farmers as well as consumers and charitable organizations. As a matter of record, it was accepted by the committee as an amendment to the so-called Dole bill and thus bears the imprimatur of the Agriculture Committee. I will temporarily withhold this section of the amendment because I am advised that it is not germane in the present parliamentary situation.

Mr. President, in conclusion, I urge the distinguished Senator from Georgia to accept this amendment as a part of the bill he is presently managing.

● Mr. BAKER. Mr. President, I rise in support of this important and urgently needed legislation, H.R. 6782, which has been offered by our colleagues, both majority and minority, on the Agriculture Committee. The members of this committee have responded quickly and effectively to the critical situation being faced by farmers all across this country.

I am pleased that the committee has acted expeditiously on this issue for, indeed, the farmers are in a grave situation. It is imperative that we enact legislation which allows farmers to receive a reasonable return on their investment and hard work. Farmers that we have had visiting us in the last few months have convinced me that they cannot do this under present circumstances. If the legislation we are approving today can be quickly enacted it will provide the short term relief which is a major first step in addressing the total agricultural question.

I am sure that all of us in the Senate have been impressed with the deep concern and sincerity of the members of the agriculture movement. This farm group is composed of politically unsophisticated but determined people who have come to Washington to tell the Congress about their plight. They have been most eloquent in their own way.

These farmers feel strongly that if they fail in their effort as a catalyst for farm policy reform in Washington that the family farmer, the independent producer who keeps the market competitive and honest, may well fail with them. I agree with them.

In view of our actions today I have a strong feeling that the farmers have succeeded in their efforts. This is due largely to their dedication and the fact that they deserve to be heard. It is reassuring that the Senate has been able to respond to the problems presented by the farmers because this group really represents the true spirit of American ingenuity and independence.●

● Mr. WALLOP. Mr. President, this emergency agriculture assistance legislation is long overdue. Lack of congressional direction and administration leadership have compounded the problems of farmers and ranchers.

The experience of farmers and ranchers over the past few years demonstrates the need for immediate assistance. The situation in Wyoming is no better than the conditions met by other producers across the country. Farmers in my State have seen an erosion of farm income from $123 million in 1973 to under $10 million in 1977. This decline in farm prices and the continued rise in the cost of production has driven thousands of farmers to bankruptcy.

It is essential to point out that not just the farmers will be hurt by the depression in agriculture. If farmers cannot purchase farm equipment, fertilizer, or other manufactured goods, then every American will suffer from the ripple effects of an agricultural depression.

There are two proposals before us today which attempt to provide emergency assistance to agriculture. Both proposals will help to raise farm incomes and increase production through land diversion programs. Senator Talmadge has sponsored a traditional land diversion scheme. Senator DOLE has introduced an alternative proposal that combines land set-asides with the concept of a moveable target price. I support the flexible parity proposal. The strong point of this proposal is that it allows each farmer to decide what target price he needs to meet his cost of production. It allows each farmer to choose and achieve his desired target price by setting aside additional acreage, up to a target price equal to parity.

The greatest advantage of this proposal is that it is geared to the marketplace. There is a growing need to bring supply and demand into line so that market prices can rise. The acreage set-aside of the flexible parity proposal will raise prices and let the farmer meet his cost of production. The real assistance provided by this bill is through the market, where strong commodity prices will allow the good producers to receive a fair return on their investments and will make them more productive.

There are Senators who will oppose the flexible parity proposal and the acreage set-aside proposal of the Talmadge bill because both will raise the price of food. The Department of Agriculture estimates that these bills would raise food prices 1 to 1.5 percent. To put this in terms that consumers can understand, this means that the cost of a loaf of bread would rise about one cent if these bills were enacted. However, the American consumer still enjoys the least expensive food in the world. The Carter administration is willing to run record deficits to fund ever-expanding programs with little concern for the inflationary consequences. But when it comes to an agriculture assistance bill that will provide real help for the farmer, we suddenly see great concern for inflation and the budget. It is time to stop the free ride that the consumer is getting from the farmers and ask the question: "Are Americans willing to break the back of agriculture to continue a short-range and destructive cheap food policy?" I believe the answer is "no."

Mr. President, I want to commend the Agriculture Committee for its hard work and effort that they have put into these bills. However, this legislation does nothing to address the problems of the cattle industry. The cattlemen have been suffering from an extended period of low prices and high production costs. The cattlemen neither need nor ask for a system of Government price supports. The fact is that the cattle industry has requested and desperately needs some relief from excessive beef and live cattle imports.

This is not the time to introduce an amendment dealing with beef imports. An emergency agriculture bill complicated by the issue of beef imports would be delayed and its passage would be severely hampered. Today is the day to assist the farmer, but this year's emergency agriculture legislation will not be completed until something is done to curtail live cattle imports and meat imports are contained to an acceptable level. The Finance Committee has held hearings on beef imports and the labeling of imported beef products. To this end, I commend my colleague from Wyoming, Senator HANSEN, for introducing an amendment which would require the labeling of imported beef. But I would urge the Finance Committee to approve a bill that will bring cattle imports to an acceptable level as soon as possible, so that prosperity can return to the cattle industry.

Mr. President, I hope that the efforts of our farmers and ranchers will not go unnoticed in the future. We owe much to them, and the Congress, the administration, and the American people should not forget this fact.●

● Mr. PELL. Mr. President, I have voted today against the Emergency Agricultural Act of 1978 because I believe it is a hastily and ill-conceived measure.

I fully understand the plight of American farmers—the fact that they are not receiving an adequate return for the cost of their labors—however, I believe in attempting to correct this problem in one segment of our population, we must not shift the burden to another segment—the consumers.

Last year the Congress passed and the President signed into law a farm bill designed to provide relief to farmers. This current law has not had time to achieve its intended results.

In racing this measure through the Senate today, the Senate has ignored the budget process and the inflationary impact of this bill.

It is unfair that consumers, who are already burdened by the high cost of energy and the increasing costs of living, should now be asked to pay even higher prices for their food, because of an ill-conceived farm relief measure.

The Nation's farmers have a real problem. This bill just happens to be the wrong way to solve it.

Because this bill was approved by the Senate with no proper time for deliberation of the consequences, there is no assurance that the Senate has acted in a way that is in the best interests of all farmers, of our export trade, or most importantly, of our consumers.●

The PRESIDING OFFICER. The hour of 4 o'clock having arrived, under the Senate agreement, the debate must end.

Are there further amendments?

If there be no further amendment to be proposed, the question is on agreeing to the committee amendment in the nature of a substitute, as amended.

The committee amendment in the nature of a substitute, as amended, was agreed to.

The PRESIDING OFFICER. The question is on the engrossment of the amendments and third reading of the bill.

The amendments were ordered to be engrossed and the bill to be read a third time.

The bill was read a third time.

Mr. TALMADGE. Mr. President, I ask for the yeas and nays on the bill.

The PRESIDING OFFICER. Is there a sufficient second?

There is a sufficient second.

The yeas and nays were ordered.

The PRESIDING OFFICER. The bill having been read a third time, the question is, Shall it pass? The yeas and nays have been ordered. The clerk will call the roll.

The legislative clerk called the roll.

(Mr. McGOVERN assumed the chair.)

Mr. CANNON (after having voted in the negative). Mr. President, on this vote, I have a pair with the junior Senator from Michigan (Mr. RIEGLE). If he were present and voting, he would vote "yea." I have already voted "nay." I therefore withdraw my vote.

Mr. WILLIAMS. Mr. President, on this vote I have a pair with the distinguished Senator from Colorado (Mr. HASKELL). If he were present and voting, he would vote "yea." If I were at liberty to vote, I would vote "nay." Therefore, I withhold my vote.

Mr. CRANSTON. I announce that the Senator from Alaska (Mr. GRAVEL), the Senator from Hawaii (Mr. MATSUNAGA), and the Senator from Michigan (Mr. RIEGLE) are necessarily absent.

I further announce that the Senator from Colorado (Mr. HASKELL) is absent on official business.

Mr. STEVENS. I announce that the Senator from Oklahoma (Mr. BARTLETT) is necessarily absent.

The result was announced—yeas 67, nays 26, as follows:

[Rollcall Vote No. 72 Leg.]

YEAS—67

Abourezk	Hart	Melcher
Allen	Hatch	Morgan
Anderson	Hatfield, Mark O.	Nelson
Baker		Nunn
Bayh	Hatfield, Paul G.	Packwood

PRESENT AND GIVING A LIVE PAIR, AS PREVIOUSLY RECORDED—2

Cannon, against.
Williams, against.

NOT VOTING—5

Bartlett	Haskell	Riegle
Gravel	Matsunaga	

So the bill (H.R. 6782) was agreed to.

The title was amended so as to read:

An Act to provide emergency assistance to producers of wheat, feed grains, upland cotton, and soybeans, and for other purposes.

Mr. THURMOND. Mr. President, I move to reconsider the vote by which the bill was passed.

Mr. TALMADGE. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. TALMADGE. Mr. President, I ask unanimous consent that H.R. 6782 be printed as passed by the Senate and that the Secretary of the Senate be authorized to make technical and clerical corrections in the engrossment of the Senate amendments.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. TALMADGE. Mr. President, I ask unanimous consent that the order on S. 2481 be vitiated and that S. 2481 be postponed indefinitely.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. GLENN addressed the Chair.

The PRESIDING OFFICER. The Senator from Ohio.

Mr. GLENN. Mr. President, I ask unanimous consent that I be granted 3 minutes to comment on the previous vote.

The PRESIDING OFFICER. Without objection, it is so ordered. The Senator is recognized for 3 minutes.

Mr. GLENN. Mr. President, I voted against the agriculture bill. I did it with great hesitation. I did it with great personal displeasure. But I think we must heed the words of the Senator from Maine concerning the impact of this bill on inflation, concerning the unknown impact on the economy.

As much as I am for helping the farmer, as much as I am for helping agriculture, it was with these considerations in mind that I voted against this bill.

I voted against the McGovern amendment earlier. I voted against the Dole amendment. But I had planned to vote for the Talmadge bill because I felt it addressed the problem fairly and squarely and did much of what the farmers hope for—it was timely and adequate.

But I am afraid the extent to which this bill goes now really upsets the apple cart with regard to agriculture and with regard to our not paying enough attention to Senate budget processes and not paying enough attention to the inflationary impact of this legislation. I feel it has gone too far. I repeat that I would like to help the farmer and help agriculture.

Some of the members of the committee and those who are going to conference expressed their view that they were voting for the bill on the basis the Dole amendment undoubtedly would be knocked out in conference. If we could be certain of that, I would have been the first to vote for the Talmadge bill, because I repeat we need to do something for agriculture and for the farmer.

So I wish to go on record as favoring the Talmadge bill, and I hope the conferees are successful in knocking out the other excessive amendments that were added to it today.

I now give my pledge, in advance, that if the Talmadge bill comes back to us stripped of these other excesses, I fully plan to support it and to vote for it. I hope the conferees are successful in bringing back what I feel is an appropriate level of support for agriculture and for the farmer. I plan to vote for the Talmadge bill if the conferees are successful in bringing it back to us in that form.

● Mr. HEINZ. Mr. President, I was prepared to vote for the Talmadge bill as it came to the floor this morning. Unfortunately it was no longer the same bill that we considered this afternoon in its original form. The Talmadge bill provided a commonsense, though ultimately short-term, solution to the legitimate problems of our Nation's farmers.

The record should be clear that the vote I cast on the Talmadge bill a few moments ago was aimed at the Dole amendment, and does not necessarily reflect my vote had the Talmadge bill stood alone. It is unfortunate that these two items—representing very different approaches and bearing very different price tags—could not have been separately considered on their separate merits.

The fact is, the Talmadge bill had much to commend it. The cost of set-aside payments would have been substantially offset by reduced deficiency payments. A definite amount of land—31 million acres—would have been taken out of production and the resulting market situation would have financed the improvement in farm prices. True,

there would have been a budgetary cost in excess of what we contemplated in the second concurrent resolution; and increased consumer prices could have contributed a bit more to expected inflation. But compared to the farmers' need, the bill was arguably modest; and compared to the Dole proposal, it was fiscally responsible.

Although the 1977 farm bill provided what were at the time considered extremely generous target prices and loan rates, it cannot be ignored that market prices of most commodities remain depressed. Farm income has plummeted, while farm debt has soared. The losses being experienced go beyond the normal risks of entrepreneurship. It is not for idle reasons that farmers around the country have taken to the streets of the Nation's Capital.

The plight of younger farmers is particularly acute, since their recent investments have made for heavy mortgages. Moreover, they have not enjoyed the occasional good years that can tide farmers over.

And the fault is not entirely their own that they today find themselves overextended. Our own Government encouraged them to plant fence row to fence row just a few years back when prices were high, and when it was assumed that there would always be an export window to boost prices when necessary. Of course, the truth is that weather and harvests remain unpredictable, and that few expected farmers today to be faced with such a degree of carryover stock and continuing surplus.

Perhaps the American Farm Bureau is correct in arguing that the fundamental solution is new marketing and bargaining legislation to provide producers fair leverage in negotiating prices in the marketplace. Perhaps there is some merit in the President's support of grain reserves, though some suspect that, no matter how they are regulated, their very existence will always act as a depressant on prices. But these are long-term approaches.

The immediate need is for incentives to restrict production. Such set-aside authority as Congress has recently vested in the Secretary of Agriculture has not been exercised. I do not find it unreasonable that a majority of the Senate seems prepared to mandate the land diversion that the current administration has avoided.

I voted against final passage of the Talmadge bill because it was amended beyond recognition. I am referring not only to the Dole amendment, but as well to the McGovern amendment, which tagged on major increases in target prices and loan rates. It is my hope that this legislation can be scaled back in conference, so that it provides the relief farmers deserve without recklessly ignoring budget discipline.

Mr. President, I want to take this opportunity to associate myself with remarks made earlier in the day by Senator JAVITS, namely, his suggestions for improving the market for our farm exports and providing a release for our surpluses. In addition, I would call the attention of my colleagues to a number of recommendations issued today by the ad hoc Republican Policy Subcommittee on Agriculture, chaired by Senator DOLE. I do not necessarily endorse them all, but I do believe they represent the type of imaginative thinking useful in averting further crisis on the farm.

RECOMMENDATIONS

Senate Republicans believe much can be done to turn things around for the American farmer. We offer these recommendations as a basis for a coherent agriculture policy which, if adopted, would raise farm income, create jobs, strengthen the economy, and bolster that part of America which works to feed and clothe us.

SELL AMERICA ABROAD: THE NEED FOR EXPORTS

U.S. agriculture exports have increased for seven successive years, reaching $24 billion last year. In 1978, exports are expected to decline to about $21 billion.

To revive the momentum of food and fiber exports, we recommend:

Capitalizing on our advantages as the world's foremost producer by emphasizing to importing countries that we can guarantee them a dependable supply of farm commodities.

Aggressively developing foreign markets for U.S. farm commodities.

Building a policy framework for the pursuit of export markets in the developing world.

Expanding the Food for Peace Program (P.L. 480), thereby stimulating U.S. exports while helping meet the food requirements of developing nations. Current levels of Public Law 480's Title I programming are too low in view of both the need to stimulate exports and to help meet the food requirements of developing nations. We believe that the Title I funding level of $800 million should be increased to at least $1 billion.

Restoring the Office of Food for Peace to its previous position of prominence. Only last year the Congress amended the law to place even greater emphasis on the use of food aid for promoting international development. The administration's recent reorganization of AID has undermined this congressional intent, buried the Food for Peace Program under bureaucratic layers and redtape, and delayed the shipment of vital exports to hungry countries overseas.

Providing short and intermediate term Government credit (through the Commodity Credit Corporation) to other countries for the purchase of U.S. farm products.

Directing the Secretary of Agriculture to establish an "intermediate CCC credit program" to take advantage of export market opportunities that demand credit for a term of five to ten years.

Directing the Secretary of Agriculture to establish a program for expanding exports of farm commodities by making available Commodity Credit Corporation financing to exporters who extend deferred payment terms to foreign buyers.

Expanding Export-Import Bank financing of loans for farm commodity exports commensurate with agriculture's share of total U.S. exports.

Expressing the sense of the Congress that the Export-Import Bank not discriminate between the financing of agricultural and industrial exports. If this Sense of Congress Resolution does not produce this fair and equitable treatment for farmers by the administration, additional Republican legislation, which will mandate such treatment when the Export-Import Bank Act comes up for extension later in this session of Congress, will be introduced.

Taking advantage of the current multilateral trade negotiations in Geneva to gain concessions for U.S. farm exports and improved market access, especially to markets in Japan and Western Europe.

Adjusting our tariff policy to provide most-favored nation tariff status to certain countries in those instances in which it is necessary to protect the interests of American agriculture and to advance the commerce upon which our economy, especially our farm economy, depends.

Implementing existing legislation that permits foreign nations to purchase our grain and store it in the U.S. for subsequent export.

Recognizing that the most important human right is the right to food. The subordinations of foreign sales of grain to State Department notions of what constitutes benign social policies will destroy our humanitarian goal of eliminating hunger in the world. Farmers should not be made pawns of the Carter-Mondale Administration's inconsistent foreign policy.

Changing the Meat Import Act of 1964 to provide for "counter-cyclical" beef import quotas so that expanded imports will not occur when prices are low. Currently, imports increase as U.S. production increases, and imports reached record high levels last year. If this trend is not halted, many ranchers will have to cut back production or be driven out of business. The end result, therefore, would be higher meat prices for consumers. Imports of meat should be phased to U.S. production.

Requiring that all imported meat, poultry, and dairy products be subject to the same labeling and health and sanitation inspection standards as domestic farm products.●

REDWOOD PARK EXPANSION—CONFERENCE REPORT

The PRESIDING OFFICER. Under the previous order, the Senate will now proceed to the consideration of the conference report on H.R. 3813, which will be stated by title.

The legislative clerk read as follows:

The committee of conference on the disagreeing votes of the two Houses on the amendment of the Senate to the bill (H.R. 3818) to amend the Act of October 2, 1968, an Act to establish a Redwood National Park in the State of California, and for other purposes, having met, after full and free conference, have agreed to recommend and do recommend to their respective Houses this report, signed by a majority of the conferees.

(The conference report is printed in the House proceedings of the RECORD of March 8, 1978.)

The PRESIDING OFFICER. The time for debate on this conference report is limited to 4 hours, to be equally divided between and controlled by the Senator from South Dakota (Mr. ABOUREZK) and the Senator from Wyoming (Mr. HANSEN).

Mr. ABOUREZK. Mr. President, I ask unanimous consent that the following members of the staff be accorded the privilege of the floor during consideration of the conference report on H.R. 3813: James Beirne, Tom Williams, Daniel Dreyfus, Michael Harvey, Tony Bevinetto, Marsha J. Williams, and Kathy Files.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. ROBERT C. BYRD. Mr. President, may we have order in the Chamber and in the galleries, please?

The PRESIDING OFFICER. The Senate will be in order.

Will our friends in the gallery be as

quiet as possible during the further deliberations of the Senate?

Mr. ABOUREZK. Mr. President, I will keep my remarks on this legislation brief, as I believe all of the issues have been fully discussed both in committee and on the floor. I believe that this is an outstanding measure which fully recognizes the national interest and responsibility for both the protection and preservation of our natural treasures and the impact that such protection has on individuals. The beauty and majesty of the redwood forest needs no elaboration on my part. The legislation before us fully protects this unique resource.

I am pleased and proud of the work done by the conferees and I especially would like to thank Senator HANSEN for his invaluable assistance and his dedication on the resource questions in this legislation. I think in all respects title I of this legislation is a tribute to his wise counsel. The Senator and I disagree on the need for the inclusion of title II, but even in the discussion of title II he was constructive and offered invaluable assistance in assuring that the program would be administerable and would accomplish its objectives.

I think it is important in considering this legislation that we recognize that there is no uniform boilerplate language universally applied to all national parks. Each national park is considered in the context of an organic act. Specific legislation addressed to the specific park which takes into account the resources to be protected, the management which is necessary, and the objectives which are contemplated. In considering national park legislation, we have always paid careful attention to the location of boundaries so as to protect the resources while creating as little adverse impact on the local area as possible.

The situation at Redwoods is unique and this legislation addresses the uniqueness of that situation, a situation I might add which was not caused by the Federal Government or the national park. The local economy is almost exclusively dependent upon timber harvesting although some effort has been made in the recent past to diversify. The liquidation program which timber companies have historically engaged in has created a situation of excessive unemployment and a precarious economy in the area which would be even worse if the companies had not recently begun a program of reforestation.

I firmly believe that the creation and full protection of the Redwood National Park will be a significant boon to the local economy. In the short term, however, there will be an impact on individuals and it is these individuals who are addressed in the legislation. I deeply and firmly believe that the Federal Government has an obligation to the people of this country, and where we take an action in the national interest which impacts on individuals we should help to alleviate that impact.

I do not foresee any other situation where the creation of a national park is so critical or so vital nor do I see the situation where creation of a park would cause this impact. I do want to emphasize that all of the evidence before the committee and before the Congress indicates that the impact will be minimal. The maximum potential job displacement identified by the companies themselves would amount to no more than 900 jobs.

The administration has already identified in excess of 800 new job opportunities as a direct result of this legislation. This does not take into account any new job opportunities which could become available as a result of the efforts of the Economic Development Administration in the area. This is not a massive program which we are talking about. The thrust of the program is not to provide rocking chair money for an extended period of time to individuals who could be gainfully employed if they so chose. The thrust of this legislation is to provide retraining where necessary, consideration for employment, job search and relocation allowances where necessary, and protection if all else fails.

Mr. President, I believe that the conferees have significantly improved the language of H.R. 3813 by deleting specific directives to the Secretary of Labor to adopt a specific course of conduct in meeting the objectives of the legislation and permitting him discretion.

Mr. President, considerable concern has arisen over the intent of the language surrounding the park protection zone. That language was developed by the Senate committee and I believe that the report of the Committee on Energy and Natural Resources is abundantly clear on the intent and history of that section. The Secretary should be guided by the language of the committee report. I would like to emphasize that the language of the bill refers to a finding by the Secretary of damage from a parcel of land or portion thereof. Any construction which would imply that the Secretary is limited in his acquisition to particular trees or specific rocks within a parcel rather than the acquisition of an entire parcel in order to minimize severance would be absurd.

It could be expected that activities on a parcel of land could result in a situation of potential damage to park resources which could be traced to a portion of that parcel, but that does not limit that Secretary's authority to the specific portion. Under no circumstances is the Secretary to consider esthetics, visitor access or enjoyment, or access in his determination of the extent of acreage to be acquired by condemnation.

He is limited strictly to the protection of park resources. However, it is expected, and landowners in the area should be aware that the Secretary will acquire entire parcels to minimize severance where a more limited acquisition is not prudent. It is probable that in many situations the Secretary may be able to acquire only the specific lands causing physical damage, but in other situations where the resulting impairment of the use of the remainder of the parcel would result in extensive severance costs we firmly expect the Secretary to adopt the reasonable construction of the language and acquire the entire parcel.

Mr. President, I wholeheartedly endorse and support the action of the conference committee and urge the adoption of the conference report.

Mr. HANSEN. Mr. President, when the bill to expand the present Redwoods National Park reached the floor, after extensive hearings and consideration in the Energy and Natural Resources Committee, I felt compelled to support that bill. I still feel that those reasons for support are there in the portions of the bill that speak to the preservation of the natural resource.

At the risk of being repetitive, let me list those reasons. When Congress established Redwoods National Park in 1968, many thought a significant example of coastal redwoods would be preserved for future generations to enjoy. The world's tallest trees were thought to be protected by the inclusion of a narrow peninsula following Redwood Creek and extending upstream from the main body of the park. I said at that time, and I think it bears repeating, the essence of that park and the reason for its national significance is that tall tree grove. I am sure the Senate today will concur. A narrow peninsula called "the worm" drains an unstable, silt laden watershed that was being harvested until just recently.

The stated purpose of this proposed expansion of some 48,000 acres was to primarily acquire this watershed ridge to ridge. And an additional 30,000 acres was established as a park protection zone which can only be acquired if land practices occur that would result in actual physical damage to the park. The conference committee concurred in both of these actions.

The legislation has many controversial provisions. Careful attention was given to most of them. The portions calling for legislative taking were justified, in my estimation. Provisions calling for a forest rehabilitation program which proposes to repair and patch the land damaged from prior timbering practices are not only a resource program, but some $33 million has been authorized and directed to this activity and it is labor intensive. The various company timbering practices today and in the last few years are excellent and do minimal damage to the land, but older timbering practices did scar and tear the land and rehabilitation is needed.

I opposed the effort in the Senate committee to include provisions calling for income maintenance of "jobs" for protection of workers who would theoretically be displaced by park expansion. The committee defeated the attempts to add these provisions and they were not added on the Senate floor.

I firmly believe the bill as passed by the Senate went a long way using existing Federal programs to mitigate the effects of park expansion. The administration has directed upward of $40 million for the existing Federal programs. The forest rehabilitation program and an additional $33 million is, as I said before, labor intensive. I think a dangerous precedent has been set by agreeing to the House title II, the so-called jobs package.

I am convinced that park expansion is not the root cause of unemployment

in Humboldt and Del Norte Counties. I firmly believe that over the long run national parks have become positive economic forces in the region in which they are established. The transition in local economies may be rough, with some displacement. But time after time a national park makes a real contribution to the regional economy. I know this from personal experience and close observation of the symbiotic relationship of Grand Teton National Park and Teton County, Wyo., that this does in fact occur.

I call the Senate's attention to a letter sent by James T. McIntyre, Acting Director, Office of Management and Budget, to the Honorable THOMAS P. O'NEILL, Speaker of the House of Representatives, dated February 8, 1978:

Shortly, the House will consider H.R. 3813, a bill to enlarge the boundaries of Redwoods National Park in California. The Administration has strongly supported legislation to protect these valuable park resources and has endorsed the acquisition of 48,000 additional acres for the park. In his recent State of the Union message, the President expressed his desire for early Congressional action on this important matter.

However, I want to share with you the Administration's concern over Title II of H.R. 3813. Title II would have the Secretary of Labor provide extraordinary services and cash benefits for up to six years to individuals who are presumed to have been affected by the federal law acquiring additional land for the park.

This Administration has consistently opposed any such provision.

As you are no doubt aware, last Spring the President directed the Secretary of Labor to join with the Secretary of Commerce in analyzing the potential employment effects of the Redwood Park land-taking. In addition, the President directed both agencies to take whatever steps were necessary to develop plans, working with appropriate State and local officials, to ensure that all available applicable Government programs—including job training, job placement, unemployment insurance, economic development aid, and other federally funded services—would be ready to help the affected communities when needed. Secretaries Marshall and Kreps have fulfilled their responsibilities; staff of both agencies are well prepared to move expeditiously when the Redwood Park bill becomes law.

The steps taken to date are proper actions of the Federal Government whenever we find a significant local unemployment situation developing. Our general authorities under both Commerce and Labor Department statutes have been drawn by the Congress to assure this flexible, timely response capability.

The provisions of Title II are neither desirable nor appropriate. They would allow one group of workers to receive from the government extremely costly and specialized benefits that we cannot justify for other workers whose unemployment is equally painful. We firmly believe that in the absence of overwhelming national policy considerations, which we do not find in the Redwood Park situation, all workers who have lost jobs through no fault of their own and have difficulty finding others deserve to be treated equally by their government.

I hope that the Congress can speedily enact the Redwood Park legislation, whose basic purpose is warmly supported by the President, without including these most undesirable provisions.

Let me also quote from the CONRESSIONAL RECORD of February 9, 1978, on page 2909. Mr. WEAVER, the gentleman from Oregon, is making a statement on H.R. 3813, the Redwoods bill:

Madam Chairman, first, let me say that my admiration is great, and the respect of this body should be great, for the efforts of the gentleman from California (Mr. PHILLIP BURTON) for his leadership in what has been a very controversial and hard-fought bill. I happen to believe that this bill is one great monument of labor legislation, containing, as it does, carefully worked out reemployment, relocation, and retraining programs for the workers of the region affected. It shall stand as a great precedent to what I would hope to be future legislation affecting workers, employment and business in areas affected by governmental policy decisions . . .

Again, let me reiterate. I have no substantive objections to the park expansion itself and related provisions, but I have strong reservations about the cost and the precedent involved in the bill's effort to protect jobs. In existing programs $40 million has been allocated; in the labor-intensive rehabilitation program, $33 million additionally. Title II as offered in the conference report is estimated to cost upward of $20 million. Almost $100 million additional costs to address direct or indirect displacement of the economy.

What is in title II? I would ask the Senator from South Dakota to explain in detail the provisions. Title II as considered by the House had no hearings in subcommittee, in full committee nor an explanation provided on the floor. A substantially different labor or income maintenance provision had a brief hearing in the Senate, but that is not the title II being considered today.

I, for one, believe the issue of park expansion should and could be made on resource values alone. The cost of the resource decision is estimated to be $359 million. As the issue is decided in the courts it may well be more. Add to that the $93 million or $100 million of economic costs and the total is well over half a billion dollars. By far, the most expensive park expansion ever considered by Congress.

I urge my colleagues to vote no on accepting the conference report. Should the report be rejected, I am prepared to offer a motion to appoint new conferees and instruct the Senate on title II alone. As stated before, Mr. President, the other provisions have received careful attention and I think reflect the will of Congress and I support the expansion as it deals with the resource.

Mr. MARK O. HATFIELD. Mr. President, I am in full accord with the remarks of the Senator from South Dakota (Mr. ABOUREZK) and the Senator from Wyoming (Mr. HANSEN) concerning the study which the Forest Service is required to undertake pursuant to this legislation.

In my view, this study should include a comprehensive discussion and analysis of reasonable alternatives to present Forest Service harvest scheduling policy. The framework and authority for establishing harvest levels different from present policy was well established by the National Forest Management Act, passed by the Congress last year. Congress, throughout its consideration of the National Forest Management Act, rejected the concept of writing detailed prescriptions into law. Congress intended the Forest Service to have broad latitude to exercise professional judgment in its establishment of planning processes and criteria, in the determination of silvicultural prescriptions, and in the setting of harvest levels. Section 11 of NFMA is intended to provide considerable flexibility to deviate from present harvest policies for a variety of reasons including, but not limited to, situations where it would be needed to improve the age-class distribution of a forest, to reduce high mortality losses or to protect the economic stability of dependent communities. This last situation will be particularly applicable to the California north coast if this bill is passed.

It is my understanding that the harvest ceiling language contained in the first part of section 11 must not, and should not, be read separately from the provisos which follow. Moreover, any interpretation of section 11 should be made with full consideration of the language contained in the conference report and other appropriate legislative history, especially the colloquy which occurred during passage of the conference report on the floor of the Senate between Senator Hubert Humphrey and me.

The net effect of section 11 and its legislative history was to reject the Forest Service policy of applying nondeclining yield ceilings without exception to all forests and in all situations. The language of section 11 clearly requires the Forest Service, where it may be appropriate for any number of reasons, to consider reasonable alternatives to the harvest ceilings which would normally be set under the language in the first part of section 11. The study required of the Forest Service by Redwood Park legislation should reflect the full flexibility available to the Agency to analyze and adopt harvest schedules different from present policy. The primary constraint on harvest levels under section 11 is that they must be designed to achieve and be consistent with meeting "overall multiple-use management objectives." As such, multiple-use objectives mean not only water quality, wildlife, and recreational and environmental goals, but also timber management, economic, and community stability objectives as well.

It is very unfortunate that the harvest scheduling issue has been presented as strictly an economic versus environmental issue. Any deviation from even-flow, regardless of size or duration, has been referred to as over-cutting. This charge is an attempt to appeal to emotion without regard to the facts or complexity of this issue.

The harvest scheduling issue is concerned with the timing of management, not the extent or area which will eventually be managed. Neither does it affect the silvicultural system or logging methods which will be applied, or the road design standards which will be used. The same land areas are involved, regardless of whether or not exceptions to the ceiling language are granted. The Forest Service must utilize forest management systems which give appropriate protection to environmental and multi-

ple-use values regardless of the harvest schedule adopted.

The Congress clearly intended to give the Secretary of Agriculture flexibility to determine harvest schedules which deviate from its present policy. It is extremely important that in the study required by this bill the Forest Service not place unnecessary constraints on the flexibility which Congress intended.

Is this also the understanding of the Senator from South Dakota?

Mr. ABOUREZK. The Senator is correct.

Mr. HANSEN. Will the Senator clarify the meaning of some of the language agreed to by the conferees on this measure?

Mr. ABOUREZK. I will be happy to do so.

Mr. HANSEN. It is my understanding that the new map reference in the legislation does not alter any of the boundaries nor include nor exclude any lands not included by both the Senate and the House when this measure was originally considered.

Mr. ABOUREZK. The Senator is correct. Because each House had used different terminology in referring to areas included in the legislation, we decided that a new map reference would be appropriate to avoid any ambiguity as to the intent of the Congress. There are absolutely no changes or alterations.

Mr. HANSEN. It was my understanding that with the exception of additional authority for the Secretary of the Interior to acquire lands within the park protection zone from a willing seller the conferees agreed to the Senate language and the Senate history and intent on the park protection zone.

Mr. ABOUREZK. The Senator is correct.

Mr. HANSEN. I think it is important that we have this issue perfectly clear. The park protection zone was conceived in the Senate committee as an alternative to the regulatory authority proposed by the Department because we felt that the question of park protection was far too important and too critical to be left to new methods. The clear intent of the committee and of the Senate was that we did not intend to impair the Secretary's existing authority or responsibility to protect park resources through whatever means are necessary, including the seeking of equitable relief; but that we did permit the Secretary to acquire additional lands within the park protection zone, if and only if, he makes a finding that the failure to acquire such lands could result in physical damage to park resources. It was my understanding that the Secretary's authority to acquire lands extended only to those parcels which he felt could physically damage park resources.

Mr. ABOUREZK. The Senator is correct. It was not the intent of the Senate nor of the conferees to permit the Secretary to acquire lands willy-nilly for esthetics, access, interpretation, public enjoyment, or for any reason other than the protection of the physical resources of the Redwood National Park.

Mr. HANSEN. That limitation does not apply to the case of a willing seller.

Mr. ABOUREZK. That is correct, but the acquisition of land from a willing seller will in no way modify the requirement for finding of potential physical damage prior to acquisition where condemnation is used.

Mr. HANSEN. The Senator is in effect restating his earlier comments to the Senator from Idaho (Mr. McCLURE), restating that the acquisition of any lands within the park protection zone will not in and of itself provide a basis or justification for the acquisition of additional lands.

Mr. ABOUREZK. The Senator is correct and for that reason we agreed to the language included in the House version which so stated.

Mr. HANSEN. One further question on the park protection zone. Does the language with respect to a person's right to peaceful use and enjoyment of their lands confer any new rights on landowners or would it in any way limit the Secretary's authority to take such other action, short of acquisition, which may be necessary to protect park resources?

Mr. ABOUREZK. No; it will not. That language merely affirms the fact that acquisition of a particular parcel within the park protection zone will not itself give rise to actions against adjacent or neighboring land-owners to protect that specific parcel. The land-owner would still be subject to acquisition, injunction, or other appropriate action should he engage in activities which could result in damage to park resources.

Mr. HANSEN. The conference committee adopted the language of the House measure with respect to the removal of down tree personal property. Although the language is rather extensive, it is my understanding that the entire import of the language is simply to authorize the Secretary to impose reasonable terms and conditions on the removal of such property. The language is not designed to limit ownership rights in such property but rather to recognize that the removal of such property should be done in such a manner as not to disturb park resources.

Mr. ABOUREZK. The Senator is correct.

Mr. HANSEN. On the last day of the conference, the conferees agreed to language proposed by Representative DON CLAUSEN with respect to grants by the Secretaries of Agriculture, Commerce, and Labor on forest resources improvement and utilization. It is my understanding that the purpose for all of the grant programs is to benefit the local economy of Humboldt and Del Norte counties. In that event I would think that the Secretaries should look first to the local counties and only in the event that they find that the local counties are totally unable to use such funds they may look to the State of California.

Mr. ABOUREZK. The Senator is correct. Under no circumstances should any grants be made to the State of California where the local units of government are capable of administering and implementing such programs; and there could be no justification for having moneys diverted by the State of California when the local economies should be the beneficiaries. I think the amendment offered by Congressman CLAUSEN could be of great value to the local economy and to the two counties; and I would not want to see those efforts frustrated by ignoring the local counties and providing such funds to the State.

Mr. HANSEN. One section of the legislation was identical in both Senate and House versions and that was the language offered by the distinguished junior Senator from California for a study of timber harvest scheduling alternatives for the Six Rivers National Forest. It appears to me that the language of the bill is absolutely clear.

Mr. ABOUREZK. I would agree with the Senator.

Mr. HANSEN. The legislation does not provide any constraints on the Secretary beyond those included in existing law.

Mr. ABOUREZK. The Senator is correct.

Mr. HANSEN. It is my understanding that the requirement for a study is not intended to mandate a revised timber management plan for the Six Rivers National Forest nor is it designed to indicate congressional sanctions of either an increased or decreased cut level for the Six Rivers National Forest. The language does no more than require the Secretary to conduct a study. It does not authorize him to implement any options developed in the study nor does it prohibit him from implementing any options which he finds to be consistent with his duties and responsibilities under existing law.

Mr. ABOUREZK. The Senator is correct. I would hope that the study will provide a useful basis for future decisions by the Secretary and I certainly expect that the study will be objective, but in no sense are we constraining the Secretary in his analysis beyond those environmental, economic, and social considerations which he would be otherwise required to consider.

Mr. HANSEN. I think the history of this amendment should be recognized. The purpose of the amendment was to afford the affected companies an opportunity to demonstrate that the present levels of timber harvesting are too low and could be increased consistent with existing law. While I am expressing no opinion as to whether that assertion is correct or incorrect, I do think it is important that the record indicate the genesis of this amendment.

Mr. ABOUREZK. I agree with the Senator in his historical analysis and also concur with him that we have no basis to either agree or disagree with the claims made, but I would caution again that this is a study, a study which should be objective and which should fairly consider the evidence presented by the affected timber companies but, nevertheless, it is only a study and in no sense should be considered as a congressional mandate to alter, modify, or otherwise deviate from existing law.

Mr. HANSEN. I agree with the Senator. The companies have maintained that they have not had a fair hearing on their evidence and this study is designed only to insure that they receive such a review. It does not prejudge the outcome

of such a review which may very well indicate that the present plan is the correct one.

Section 103(h) includes a judicial review procedure by reference to those procedures contained in the Trade Act of 1974. Would the Senator share with us the legislative intent underlying this section?

Mr. ABOUREZK. Yes, I would be happy to address this matter. The only reason the Trade Act was specifically referenced was to expressly assure that, for purposes of reviewing a determination by the Secretary of Labor, the "substantial evidence" standard be the measure by which the appeal would be decided. It was felt by the conferees that the often used "arbitrary and capricious" standard might preclude effective judicial review of agency action. While we are confident that the Secretary's determination will of course be based on an adequate consideration of all relevant factors, we felt nonetheless that specific statutory safeguards be prescribed

Mr. HANSEN. Was it the intent of the conferees to limit, as the Trade Act does, the right of appeal to the 60 days immediately following the determination?

Mr. ABOUREZK. No, this was not discussed by the conferees. The only issue discussed had to do with the standard of review, not the time for review.

Mr. President, I am ready to vote.

The PRESIDING OFFICER. The question is on agreeing to the conference report. Do Senators yield back their time?

Mr. STEVENS addressed the Chair.

The PRESIDING OFFICER. Who yields time?

Mr. HAYAKAWA. I wish to make a unanimous-consent request.

Mr. HANSEN. I yield such time as the Senator from Alaska needs.

Mr. STEVENS. I yield to the Senator from California.

Mr. HAYAKAWA. Mr. President, I ask unanimous consent that a member of my staff, Mary Eddy, have the privilege of the floor during the discussion of this conference report.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. STEVENS. Mr. President, I inquire whether the Senator from California intends to make remarks at this time concerning this conference report. I have some remarks.

Mr. HAYAKAWA. I have some remarks to make on the conference report.

Mr. STEVENS. I would prefer to follow the Senator from California, if he wishes to make remarks at this time. If not, I will proceed.

I ask the Senator from Wyoming who is managing the time on this side.

Mr. HANSEN. I am.

Mr. STEVENS. Let me yield the floor and allow the Senator from Wyoming to yield such time as the Senator from California wishes, and I will seek time from the Senator from Wyoming later.

Mr. HANSEN. I am happy to yield such time as the Senator from California may desire.

Mr. HAYAKAWA. I thank the Senator from Wyoming.

Mr. President, I would like to point out to my colleagues the controversial nature of this Redwood Park expansion legislation. Northern California already has set aside 181,000 acres of old-growth north coast redwoods in Federal, State, and local parks combined. We do not need any additional acreage of redwoods.

The arguments for park protection are highly disputable—the results of soil erosion studies show that soil deposited in the Tall Trees Grove is soil that has been carried from miles upstream, and not soil from adjacent hillsides as a result of logging. Under the guise of "park protection" we are adding 48,000 acres of redwoods, and only 1 out of every 5 acres of this land has any old-growth on it.

Many hundreds of people will lose their jobs, many thousands of acres of land will be taken out of timber production, and for what? So that we can triple the size of the Redwood National Park, which is the sixth least visited national park in the entire United States? The 28,000 acres of already existing Redwood National Park is already more expensive than all other national parks combined. This additional 48,000 acres will cost the taxpayers at least $400 million, probably more.

The income maintenance package that originated in the House bill, is a typical example of the Federal Government throwing welfare dollars at a problem, and hoping that it will go away. The loggers who are losing their jobs do not want a welfare handout.

The want their jobs. They do not want to be retrained as short order cooks or as kindergarten teachers. They want to continue to be loggers.

This income maintenance provision is an insult to any self-respecting logger. It is a real slap in the face. I cannot support this approach to alleviate the unemployment problems that result from this unnecessary park expansion.

This provision is especially poor in that it provides no incentive for the recipient of this Federal hand-out to find new employment. Up until this time all citizens of the United States were treated the same. If a worker loses his or her job, then they are eligible for unemployment compensation, which does not pay as much as their original salary. This old structure provides an incentive for the former worker to go out and find new employment. Now title II of the Redwood Park expansion conference report provides for full compensation for employees who lose their jobs for up to 6 years. This is the new proposal. Although I am extremely sympathetic to this jobs situation in this case, as I have repeatedly expressed, I cannot condone the income maintenance provision.

This provision will not only apply to the workers who lose their jobs as a result of the Redwood Park expansion. When future park bills come before Congress, or other legislation that puts people out of work, the legislators from those areas will also want income maintenance for the workers affected by that action. I believe that we are setting a dangerous precedent, and I urge my colleagues to join with me in voting against this conference report.

I wish to comment on the park protection zone provision. Mr. President, it is my understanding that this 30,000 acre area shall be purchased by the Secretary of the Interior only in cases where there is a definite danger of damage to park properties as a result of activity on that land. I noticed that there was some discussion on the House floor indicating purchase of the land to provide for enhanced public benefits and that consideration should be given to esthetics, visitor use, and the like. I cannot agree with this opinion and believe that it is inconsistent with the original intent of this section based on the committee's diiscussions about this legislation. My fear, Mr. President, is that we are actually talking about a 78,000 acre park expansion bill instead of one for 48,000 acres. It is my hope that, through careful management of the lands known as the park protection zone, these lands will never have to be purchased and that the private property owners in this area will not be harrassed by the Federal Government.

There has also been some discussion about compensation for the land and the timber involved in this legislation. Some people have questioned whether or not redwood timber is really competitive, since there is a limited market. Redwoods only grow in a small area in California. I state that there is a free flow of competition upon which to base free market values. There are many kinds of timber, and redwood timber is competitive on the commercial timber market with all of them. I state this for the record, Mr. President, because of the timber companies involved in this legislative taking of land did not want the Federal Government to come in and take their land. They simply want to get on with their business. I certainly believe that they should be awarded just compensation for the property they lose as a result of this legislative taking.

Furthermore, Mr. President, there is an amendment in the final bill for the Secretary of Agriculture to study timber harvest scheduling alternatives on the Six Rivers National Forest and to report back to Congress in a year. The Six Rivers National Forest is in the same general area as the Redwood National Park expansion acreage, and the timber sales from this forest serve the same general economy of northern California.

We have recently heard from Secretary Patricia Harris of the Department of Housing and Urban Development on the incredible rise in the cost of timber in recent years. Secretary Harris was very much concerned about this tremendous rise in the costs of housing, which continues to increase at a terrific rate, and she was demanding a Federal investigation. At the request of Secretary Harris, the Council on Wage and Price Stability issued a report in October 1977 clearly linking the management of Federal timber lands to our Nation's ability to meet future demands for housing material.

In addition, I refer to Forest Service report No. 21 entitled "The Nation's Renewable Resources: An Assessment.' This report points out that our national

forests contained 46 percent of all softwood inventories in our country—and 56 percent of the softwood timber stocks in 1970.

Mr. HANSEN. Mr. President, may we have order?

The PRESIDING OFFICER. The Senate will be in order.

Mr. HAYAKAWA. However, these national forests contributed only 20 percent of the softwood output and 27 percent of the softwood sawtimber output that year. These figures raise some questions about the efficiency of public timber management policies.

Mr. Barry Bosworth, the Director of the Council on Wage and Price Stability, recently suggested that harvesting of timber on public lands be increased to combat high lumber costs. That advice was reiterated by Chairman Miller of the Federal Reserve Board in his recent testimony before the Budget Committee.

This approach makes perfect sense, especially considering the timber in the Six Rivers National Forest, the area which will be designated for study under this bill. Special attention should be given to the large amount of old growth in this forest, in order to avoid a potentially high mortality rate of these trees.

My office has had several discussions with Forest Service officials. The Forest Service does not always employ every possible means to increase the timber output per acre on national forest lands. I hope this study will produce positive results in this direction. Through improved and intensified management practices we would be able to alleviate unemployment in the north coast area and increase the timber supplies to fight inflation. Another important point to remember is that timber is a renewable resource. Through careful management of our national forests, we can insure timber for future generations.

Mr. President, I ask unanimous consent to print in the RECORD an article from the Wall Street Journal, March 16, 1978, in which it is stated clearly by Mr. Miller that the Government increase the amount of timber harvested from Federal forests to combat soaring lumber costs and that it "would be desirable" to reduce payroll taxes that contribute directly to higher prices.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

NEW FED CHAIRMAN MILLER PRESSES CARTER TO BOLDLY ATTACK INFLATION, ENERGY WOES

(By Richard J. Levine)

WASHINGTON.—The new chairman of the Federal Reserve Board, linking the dollar's decline to accelerating inflation, stepped up pressure on President Carter to act boldly and quickly to conserve energy and slow wage and price increases.

A week to the day since taking office, Chairman William Miller used an appearance before the Senate Budget Committee to campaign for a "very aggressive" anti-inflation program and for either import fees or quotas on oil if Congress fails to pass an energy bill soon.

Unless Mr. Carter deals with these "fundamentals," the chairman said, the Fed's intervention operations in foreign-exchange markets to support the dollar "will prove of little value" because this "bridging action will be perceived to be superficial."

Thus did the businessman-turned-central banker ally himself with Treaury Secretary Michael Blumenthal and other Carter administration policymakers who believe the White House must pay greater attention to the intertwined problems of inflation, energy and the dollar.

"I hope we have the courage to make inflation our highest priority for domestic economic policy," Mr. Miller declared. He added: "We're going to be tested now if we have the will."

In Mr. Miller's view, "strong presidential leadership" will be required if the administration's voluntarily anti-inflation program is to stand a chance of success. That program, under which business and labor will be urged by the administration to "decelerate" price and wage increases from the level of the past two years, has got off to a very slow start since it was announced in January.

The deceleration effort simply hasn't been "implemented with the degree of visibility" needed, Mr. Miller said, noting that he would like to see "restraints" on pay increases for federal government workers that could serve as a model for the private sector. The Fed boss also suggested that the government increase the amount of timber harvested from federal forests to combat soaring lumber costs and that it "would be desirable" to reduce payroll taxes that contribute directly to higher prices.

Barry Bosworth, director of the Council on Wage and Price Stability, has urged President Carter to make such moves. And yesterday, Mr. Miller said that Mr. Bosworth's ideas constitute the "beginnings of an outline" of a broad-based anti-inflation program.

The Fed chairman also urged budget restraint in the battle against inflation. He said that the $53 billion federal deficit projected for fiscal 1978 should be viewed as a "maximum" and that it would be "prudent" to reduce the $59.6 billion in red ink projected for fiscal 1979, which begins Oct. 1. It's an "anomaly" to see the deficit widening, rather than narrowing, so late in an economic recovery, Mr. Miller said.

In the absence of effective anti-inflation efforts, the Fed chairman testified, the economy's basic inflation rate could turn out to be a percentage point or more higher than the 6 percent figure currently cited by many economists. Indeed, he said, the decline of the dollar just since last December could add three-quarters of a point to inflation this year—an estimate with which administration analysts concur.

"We see serious problems ahead" on the inflation front, he said.

The Fed chairman told the Senators that, in addition to curbing inflation, the U.S. must adopt an energy-conservation policy if the dollar's decline against the German mark, the Japanese yen and the Swiss franc is to be halted. There's an urgent requirement for Congress to "pass an energy bill," he said. But if that isn't forthcoming in a matter of weeks, he added, then "executive action" will be needed in the form of a presidential decision to impose either import fees or quotas on oil imports.

After the hearing, Mr. Miller told reporters that, as of today, "I'd prefer the fee" because "it has simplicity and could be easily administered." But whether Mr. Carter prefers a quota or a fee, Mr. Miller added, "he shouldn't wait very much longer" because of the dollar's deteriorating position.

Mr. Miller conceded that such action would add immediate inflationary pressures to the economy, citing this as one of the many difficult "policy dilemmas" currently confronting Washington officials.

Discussing the U.S. policy of buying dollars to support the value of the American currency when exchange markets become "disorderly," Mr. Miller said that "all of us approach intervention with great reluctance." But, he continued, it's "important to create some order" in the currency markets.

Mr. HAYAKAWA. Mr. President, I also wish to add some remarks made by former Gov. Ronald Reagan in a recent radio address.

As he says:

No one can quarrel with the idea of preserving the Cathedral like groves of Coast redwood trees which are found only in California. And, likewise, it's hard to be against a national park when one thinks of the exceptional beauty spots preserved now in parks such as Yellowstone and Yosemite. Why then do I think the idea of a National Redwood park doesn't make sense? I think I have an answer.

The Los Angeles Times, in an editorial, recently referred to the long struggle that—"led first to the creation of the original 58,000-acre park to the preserve." I believe the people of the United States who are being asked—make that told—to put up millions and millions of dollars for the added acreage plus $40 million or more on a job training program for the lumber jacks and others who will be thrown out of work should know there isn't a 58,000-acre National Redwood park.

We have nothing of the kind. He continues:

Back in 1968 when diehard preservationists were going all out for a national park the federal government learned that virtually all of the superlative redwoods, the cathedral-like groves were already preserved in a number of state parks totaling 282 square miles. That is more than 180,000 acres. The only way there could even be a pretense of a national park would be to include one of our existing California state parks. The Federal government bought 28,000 acres (not 58,000) and 16,000 of those acres were either non-timber or cut-over land. Only 320 acres consisted of the superlative trees, plus 10,000 acres of old growth redwoods similar to the kind used for lumber.

Governor Reagan continues:

When I left the California Governor's office in early 1975 nothing had been done to incorporate the state park into the national holding. The promise of more than one and a half million visitors a year as a boost to the local community turned out to be about 35,000. Nor had the Bureau of Land Management opened the 40,000 acres of commercial-type forest to timber cutting which had been promised to avoid hardship in the lumber industry.

The state park that was supposed to make the National purchase look like a park has almost six times as many acres of superlative trees and twice as many old growth forest. It only has one-fourth the open or cut-over land as the federals bought. I'm sure this is known to Senator Cranston and Congressman Phil Burton of California who honchoed this measure through Congress. But, I wonder if it is to all those others who voted "aye"?

The 48,000 acres approved for purchase are not the ancient giant trees that we have already preserved in those state parks.

As I say, giant trees are preserved elsewhere. Continuing:

This purchase is for a so-called buffer zone and is a run of the mill mix of redwoods and fir trees. I have no doubt the push will continue to acquire more thousands of acres of timber land to act as a buffer zone for the buffer zone.

This business of adding buffer zones to buffer zones to buffer zones is what is creating so many of our problems in the destruction of jobs and employment, and the destruction of the economy of northern California.

I thank the Chair.

Mr. ABOUREZK. Mr. President, I yield 5 minutes to the senior Senator from California.

The PRESIDING OFFICER. The Senator from California is recognized.

Mr. CRANSTON. Mr. President, I would like to express my strong support for the conference report on H.R. 3813, legislation to expand the Redwood National Park. I believe Senator JIM ABOUREZK, Senator CLIFF HANSEN, and the other Senate conferees did an excellent job of preserving the important provisions of the Senate bill, while accepting appropriate House language to protect any loggers and mill workers who lose their jobs as a result of the park expansion.

I am particularly pleased that the House conferees agreed to the Senate provision increasing the authorization for the Redwood Creek watershed rehabilitation program from $12 million to $33 million. The watershed rehabilitation work is extremely important to stabilize the soils and control the erosion of the slopes which is damaging the park. The increased funding will permit a labor intensive watershed rehabilitation program, providing additional job opportunities for displaced woods workers and insuring against the use of heavy equipment which could cause further erosion and damage to the park.

I am also very happy the Senate conferees agreed to the employee protection provision in the House bill (title II). While I believe the watershed rehabilitation program and the other employment provisions in the Senate bill—the commitment of $40 million in existing Federal programs, job training, and additional park hiring—will more than offset the job losses, the employee protection provision will deal with any temporary dislocations.

Regarding section 201(14) in title II of the bill, it is our intention that among the unique characteristics which the Secretary of the Interior should keep in mind in defining "suitable work" is the strong attachment of many of the employees in the industry to outdoor work and particularly to woods and related work.

The conference committee language in section 102 of the bill encourages the Secretaries of Interior, Agriculture, Commerce and Labor to make grants or enter into contracts or cooperative agreements with the State or counties to develop and implement a program of forest resource improvement as a key element of Federal efforts to provide employment opportunities and strengthen the economy of the Humboldt and Del Norte County regions. The State of California has already initiated a forest improvement program designed to revitalize presently underproductive forest lands and resources. This program should be given a first priority by Federal agencies responsible for implementing section 102 of the bill. It relates directly to the improvement of the regional economy in both the short and long term and has the support of local labor representatives.

Mr. President, I believe the conferees have refined the best features of both the House and Senate bills into a final measure which once and for all will establish a viable Redwood National Park. I want to thank all those involved in this effort. Senator ABOUREZK has done an outstanding job in guiding this bill through the Senate Energy and Natural Resources Committee and the Senate. I also want to thank Senator HANSEN, the ranking minority member of the Energy Committee, and Senator JACKSON, the committee chairman, for their support and fine work. In addition, I want to express my deep appreciation to Senator BYRD, the majority leader, for his cooperation in expediting floor consideration first of the bill and now the conference report. A special thanks also goes to Congressman PHILLIP BURTON for his dedicated and hard work in the House and his important contributions to the bill, especially the addition of the jobs package. Finally, I would like to thank Kathy Files and Roy Greenaway of my own staff, Jim Beirne and Tom Williams of the Senate Energy Committee, and Tony Bevinetto of Senator HANSEN's staff for all their good work.

Mr. President, I hope that we can vote favorably on the conference report today, clearing the measure for the White House.

Mr. ABOUREZK. Mr. President, I just want to say there is one other staff member who has worked extremely long hours on this legislation, Jody Williams, and I would like to express the thanks of the entire committee for her work on this legislation.

I reserve the remainder of my time.

Mr. HANSEN. Mr. President, I yield such time as the Senator from Alaska may require.

Mr. STEVENS. Mr. President, I want to call the Senate's attention to the provisions in this bill that provide income maintenance for those workers who are affected by the bill. This will include loggers, pulp workers, and any of those working for logging companies directly.

It provides for preferential hiring for those laid off; it waives the Federal equal employment opportunity laws and provides certain other Federal standards relating to hiring. It provides that these people who are displaced by the application of this bill will be provided jobs, in effect.

I am informed that some people believe this is not a precedent. I want to state that for myself I consider it to be a precedent of rather substantial magnitude. The Congress has before it the so-called d-2 issue, which is the issue that arises out of section 17(d)(2) of the Alaska Native Land Claims Settlement Act, and legislation before Congress provides in one form at least for setting aside almost 150 million acres in wilderness.

The proponents of that bill were the proponents of this bill. They have sought setting aside areas that go far beyond the actual needs at the time for protection, for redundant protection, of the redwoods area.

Now, that is the proposal that is before the Congress. As far as my State is concerned, I want to call attention to this precedent because we have people with the same problems. We have people who are going to be put out of work. They are going to be denied employment opportunities if the extreme version of the d-2 issue is passed.

We have a much greater dependency upon resources and resource employment than do the people in California who live near the redwoods and have been employed in connection with harvesting the redwoods in the past.

Unemployment in the Fairbanks area is now at least 17 percent. Unemployment in southeastern Alaska is above 10 percent. Unemployment in the native villages of Alaska now approaches 80 percent, and yet we have proposals to deny job opportunities and, in fact, to do away with some of the job opportunities that exist in Alaska today.

The impact of the d-2 legislation would disrupt employment opportunities in not only the timber fields but also in terms of recreation, tourism, oil and gas activities, mining activities, and all of the related activities concerning access to the areas that could provide employment.

The ramifications of the d-2 issue in terms of labor opportunities and employment opportunities are so great that it would be difficult to put them in the RECORD at this point. But I want to state, and state clearly, that in fairness the precedent that is established here in the redwoods bill must be applied to my State. If it is fair to the employees who are going to be disturbed, in terms of their income-producing ability in the redwoods, with respect to action taken by Congress, it is fair that similar consideration be given to the people in Alaska whose employment opportunities would be disturbed if Congress accedes to the requests of the extreme environmentalist organizations and sets aside almost a third of Alaska, denying those people there now the opportunity for employment that has existed in the past.

This is a labor protection provision. If it makes sense in connection with the redwoods—and the conference committee has decided that it does—then it makes sense in connection with Alaska. I want to assure you that it is going to be raised in connection with Alaska, and it is going to be applied to Alaska if it is applied to California. I view this as a matter of States' rights, employees' rights, and the rights of American citizens. There should not be any difference, in terms of the rights of people who have jobs and the way they are protected by Federal legislation, that is dependent upon where they live. If this is fair for the employees of California it is fair for the Alaska Native, the Alaska logger, and anyone in Alaska who would be disturbed by the final version of the Alaska d-2 legislation.

I raise that question as one who has legislation before Congress, before the Senate, which would in fact impact on some employment opportunities. We intend to address that problem, dependent upon the final version of the so-called d-2 bill as it passes the Senate. But I hope

those who support this precedent today realize that it is a precedent.

I want to state that I voted against the bill when it passed the Senate before. It did not have these provisions in it then. The presence of these provisions, with due respect to my friend from California, with whom I have worked in the past, makes this bill of such a precedent shattering character that I must support the bill now, because I want that precedent.

I want the President, the world, and the country to know that we are going to apply that precedent to the Alaskan working people if the d-2 legislation passes. Mind you, I do not know what the price of this legislation now is. Maybe the Senators from California have put that in the RECORD. But I know it will be substantial when it comes to the application of this precedent to the Alaska lands controversy.

I thank my good friend from South Dakota for allowing me to establish a precedent.

Mr. HANSEN. Mr. President, will the Senator yield?

Mr. STEVENS. I will be happy to do so.

Mr. HANSEN. Mr. President, I think the distinguished senior Senator from Alaska has pinpointed the most glaring weakness and error in this bill. I share his sentiments and those of our esteemed colleagues from California, who are on both sides of this issue, as well as the distinguished Senator from South Dakota, in recognizing the overwhelming interest of people throughout the entire United States in providing more protection for the redwoods in Califrnia. But I think the Senator from Alaska is precisely right when he asks, "How can you differentiate between workers in Alaska and workers in California?" I find no basis at all on which to take issue with him when he makes that statement, and I have expressed earlier my feeling and my conviction that this particular provision will come back to haunt us every time we create a national park or set aside for posterity lands that will be designated for controlled use, as are our national parklands.

I say to my good friend from Alaska that I think he is precisely right. I am going to vote against the bill, not because I do not feel very enthusiastic about the overall good that I am confident will flow from title I, but title II does indeed worry me considerably, and I thank my friend from Alaska for making the valid point that he has.

Mr. STEVENS. I thank my friend from Wyoming.

I am sure the junior Senator from California has expressed it; title II does not create any economic assets. But you face in California a proposition that involves how many acress? Some 85,000 acres, is that about what is involved in this bill? I think that is about right.

Mr. HAYAKAWA. 78,000.

Mr. ABOUREZK. Forty eight plus thirty.

Mr. STEVENS. Forty eight plus thirty?

Mr. HAYAKAWA. Forty eight plus thirty, yes.

Mr. STEVENS. Well, we face in Alaska 150 million acres. I hope you understand why I see this as being something that will make people think before they set aside 150 million acres and take on the obligations that title II would impose on the Federal Government for people who are disturbed by such action.

I understand full well why the Senator from Wyoming would disagree with title II. But as someone who looks forward to the situation of the d-2 bill and all it means to employment opportunities in my State, I think we have no alternative but to support it.

Someone is reported to have told one of the guides who came down from Alaska to complain about the d-2 legislation that he should not worry; that if it passed, this Member of Congress would be glad to recommend him to be a park ranger. He said this very facetiously. Title II does just that. What it does is provide for retraining to be a park ranger. There is a lot of that in here.

But you cannot make guides into park rangers; you cannot make commercial fishermen into park rangers. There is going to be a substantial relocation problem in my State if you make one-third of it into a wilderness area. Do you know what that is? That is all of New England, New York, New Jersey, and Pennsylvania put together, and man will be permitted in there only as a visitor on foot.

I intend to use title II as a symbol to my people. Think what setting aside 150 million acres will mean to the largest State of the Union. Again I thank my good friend. I think he understands what I am doing. I want to support this bill now, because I think you have here probably the most precedent-shattering employee protection provisions that Congress has ever passed. I want that to be in everyone's mind when they vote on the d-2 question when it comes before Congress later this year.

Mr. ABOUREZK. Mr. President, I have an idea what our colleague from Alaska is up to. You know, there are certain people around the country who do not like my politics. When I want to destroy a political candidate, I go out in those areas and endorse him. That is what my friend from Alaska has just done to this bill.

I have got to say that even if he says this is a precedent, as manager of this legislation I do not see it as a precedent. As I see it, in this case we do it on a case-by-case basis.

Mr. STEVENS. That reminds me of what an old judge used to tell me about a case I said was on all fours. He said:

That's all right, but I wanted a horse case, not a cow case.

That is what the Senator from South Dakota is saying, but still this is a precedent. It is a precedent that is an employee protection mechanism for those displaced by the overzealousness of some people in the environmental field.

You are right. While I am not trying to love it to death, I am trying to say I love that provision because those people are about ready to squeeze us to death. We want everyone to understand that when that squeeze comes, we are going to ask for this kind of protection, too. Maybe it will make people see what it will cost to give in to this kind of pressure every time.

Mr. ABOUREZK. I do not want to prolong this debate, Mr. President, because I think we are about ready to vote on the conference report, unless someone else wishes to speak on it. I only want to say that we put in a jobs provision and we accepted it in the conference committee, because I think it is time, and we have done it in different cases before, that when someone's property is taken away from him in this country, if you take a piece of his land he gets paid for it by the Government.

But what happens when you take his job? They are usually out of luck. I think we did establish something this time. We have shown that a person's job is a piece of property in some respects. Unless we abolish the property system in this country, I think it is a good idea to put in title II.

There is a Member of the Senate who is new, Senator KANEASTER HODGES, of Arkansas. He was not here when we first brought the redwood bill out. He is a very strong supporter of this legislation.

I ask unanimous consent that Senator KANEASTER HODGES, of Arkansas, be added as a cosponsor to the redwood bill. He was a little worried about being added at the last minute, but since he is new in the Senate, I believe it is perfectly all right.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. THURMOND. Will the Senator yield?

Mr. ABOUREZK. Yes, I will yield. How much time does the Senator wish?

Mr. THURMOND. I would like to ask some questions of the Senator.

Mr. ABOUREZK. May I ask for the yeas and nays—does the Senator from California wish the yeas and nays on this bill?

Mr. HAYAKAWA. Mr. President, I ask for the yeas and nays on passage.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

Mr. THURMOND. Mr. President, I voted for this bill when it was passed by the Senate. It did not contain title II at that time. Is that correct?

Mr. ABOUREZK. That is correct.

Mr. THURMOND. This title concerns me a great deal. I wanted to inquire of the Senator if he could explain just what does occur with regard to anyone who loses his job there. We have unemployment compensation for people who lose their jobs. We have ways to take care of people until they get another job. What has been done here that is so drastic, as referred to by the able Senator from Alaska, which is so different and establishes precedent, as he says it does? I want to ask if this is correct: Does this pay an employee a full salary? I was told by someone that it pays an employee who loses his job a full salary for 6 years, maybe, or something like that. Will the Senator please explain exactly what it does? I would like to vote for this bill, because I believe in preserving our natural resources as much as possible under reasonable circumstances. But if

this title II is unreasonable, it could cause me to change my mind.

Mr. ABOUREZK. There is nothing in title II which is unreasonable, to answer the question. It is a reasonable provision which provides that if a person is thrown out of work as a result of this condemnation that we are undertaking here, he will be provided help in getting a new job, retraining, and full consideration by Government agencies for hiring, if he is thrown out of a job as a result of this park expansion. If he refuses to accept suitable work, then he is paid a full salary, yes, but he has to——

Mr. THURMOND. If he refuses to accept work?

Mr. ABOUREZK. No, if he refuses to accept suitable work he is not paid any benefits at all. But if he cannot find work, if there is no suitable job offered him, then he is paid full benefits.

Mr. THURMOND. I would not object to helping anybody to be retrained. I think that is all right. If he has been thrown out of a job and the Government is responsible, that is all right. But does he draw his full salary? If so, for how long can he do that?

Mr. ABOUREZK. He can do so for up to 6 years.

Mr. THURMOND. Full salary?

Mr. ABOUREZK. If there is no job available to him. We fully expect jobs through the retraining program and the job search help. Incidentally, there is additional help in the business community in Del Norte and Humbolt County through EEA, through the Commerce Department, which will provide a great deal of employment. In addition to that, there is a rehabilitation program in the park itself, a $33 million rehabilitation program. We do not expect that anybody will be out of work. We do not expect that any of this money for salary benefits will be paid to any of these workers. It is there just as a kind of insurance policy, just in case they need it. We do not expect to have to use it.

Mr. THURMOND. As I understand from the Senator, if they are offered suitable employment they will have to take it or they will not draw the salaries.

Mr. ABOUREZK. That is correct.

Mr. THURMOND. For what length of time is he retrained for another position, and at what cost?

Mr. ABOUREZK. Would the Senator repeat the question?

Mr. THURMOND. For what length of time is he trained or retrained for new employment, and at what cost to the Government?

Mr. ABOUREZK. We do not set a specific period of time there. That is up to the Secretary of Labor to do that. We do not know the cost of that retraining. It will take some people longer to retrain than others. We have no idea what the cost will be.

What we are primarily concerned about are those workers right now who are over 60 years old, very close to retirement. We are greatly concerned about them. That problem is mostly what the insurance program is designed to take care of. If they are near retirement, we do not want to ask those people to relocate in some other part of the world, which would be very unfair to them. They will be offered jobs and rehabilitation. It will be very difficult to retrain somebody over 60 years of age. We have the insurance program and the rehabilitation program designed for them.

Mr. THURMOND. Does the Senator know of any precedent for paying anybody in a case like this the full salary, as provided for here, in case they cannot obtain suitable employment?

Mr. ABOUREZK. Yes. The Railroad Reorganization Act is one specific example of a precedent very similar to this one.

Mr. THURMOND. For what period of time did that run?

Mr. ABOUREZK. I cannot give the answer to that.

Mr. THURMOND. But here it could run for 6 years?

Mr. ABOUREZK. I think that ran for at least 6 years, but I am not certain.

Mr. THURMOND. In this proposal, it could run for 6 years?

Mr. ABOUREZK. It could run up to 6 years, that is correct.

Mr. THURMOND. If a person is offered suitable employment, he would have to take it; is that correct?

Mr. ABOUREZK. That is correct.

Mr. THURMOND. And then he would not get his salary from this.

Mr. ABOUREZK. That is right.

Mr. THURMOND. I just do not want to see something passed which the public will feel is irresponsible. That is what I am trying to ascertain, if what this conference committee did is responsible or not. I am trying to get the facts to make a determination. As I say, I would like to vote for this bill, but I want to be sure it is responsible.

Mr. ABOUREZK. We tried to our utmost to be fully responsible to the taxpayers in this area. We believe that the taxpayers wanted this park expanded. We also believe that this bill is fair to those people who work in the timber industry. We have taken care of the timber companies. They will go into the district court under this legislation and get paid a fair value for the land we have taken from them as a result of the park expansion.

Mr. THURMOND. Does the Senator mean the owners of the property?

Mr. ABOUREZK. That is correct.

Mr. THURMOND. Of course we have to pay the owners of the property.

Mr. ABOUREZK. Why does the Senator say, of course, we have to pay them and the Senator is questioning whether or not we are trying to keep a guy in a job who is a poor working stiff.

Mr. THURMOND. The Constitution provides that you cannot take private property without just compensation.

Mr. ABOUREZK. Is a job private property or not?

Mr. THURMOND. No, a job is not private property, as I construe the Constitution. I do favor retraining people to do other jobs if there is no job in the area where they live which they could perform, if they lose their job in an instance like this.

Mr. ABOUREZK. That is what we are doing.

Mr. THURMOND. But I am concerned about the Government being responsible to pay people for 6 years. That is what disturbs me.

Mr. CURTIS. Will the Senator yield?

Mr. THURMOND. I will be pleased to yield.

The PRESIDING OFFICER. Who yields time?

Mr. ABOUREZK. If the Senator wants to oppose this conference report, I would appreciate his taking it from Senator HANSEN's time.

Mr. CURTIS. I wanted to ask a question.

The PRESIDING OFFICER. On whose time?

Mr. ABOUREZK. Senator HANSEN's time.

Mr. CURTIS. Is it not true that the rank and file covered by our unemployment compensation law have a basic period of 26 weeks?

Mr. ABOUREZK. It is longer than that now.

Mr. CURTIS. We have a supplemental program where, under certain circumstances, it is extended. But all of it adds up to less than a year, is that not correct?

Mr. ABOUREZK. That is correct.

Mr. HATCH. Will the Senator yield?

Mr. ABOUREZK. I yield.

The PRESIDING OFFICER. On whose time?

Mr. ABOUREZK. Senator HANSEN's time. He is not here.

The PRESIDING OFFICER (Mr. METZENBAUM). The Senator from Utah.

Mr. HATCH. As I understood the distinguished Senator from South Dakota, the Senator indicated that he did not believe any employees would be receiving any benefits under this, because they would be going into other jobs, is that correct?

Mr. ABOUREZK. I did not say I did not believe it. I said I did not expect they would receive these benefits, but if they do need this, we will have this insurance program.

Mr. HATCH. I see.

Now, as I understand it, although you do not expect anybody will do it, if anybody was to, he is going to be paid his full salary that he would normally make for 6 years?

Mr. ABOUREZK. No, that is not what I said, and that is not the case.

Mr. HATCH. I am asking you.

Mr. ABOUREZK. That is not the case.

The case is that up to a 6-year period——

Mr. HATCH. Will the Senator explain it?

Mr. ABOUREZK. If there is no job available after retraining the job stiff, if there is no job available, no suitable job to be offered to the guy, then he will receive full salary benefits, yes.

Mr. HATCH. That will be during the period——

Mr. ABOUREZK. Let me finish now.

Mr. HATCH. Yes.

Mr. ABOUREZK. If he is offered suitable work, and it does not have to be of the exact kind that he was thrown out of, if he is offered that and if he turns it down, his benefits are cut off.

Mr. HATCH. Who is going to determine what is a suitable job?

Mr. ABOUREZK. The Secretary of Labor.

Mr. HATCH. The Secretary of Labor would?

Mr. ABOUREZK. That is right or his designee.

Mr. HATCH. Who is going to offer the job to him?

Mr. ABOUREZK. Who is going to offer him a job?

Mr. HATCH. Since there were jobs.

Mr. ABOUREZK. I cannot answer that job. I do not know.

Mr. HATCH. If he stays right there, say, in Eureka, Calif., and, of course, the jobs are cut off because of this particular bill by acquisition of property by our Government and he just sits on his dime, he is going to be entitled to full salary benefits up to 6 years; is that right?

Mr. ABOUREZK. That is true.

Mr. HATCH. How is it true, because who is going to offer him a job?

Mr. ABOUREZK. Well, I cannot answer that question. There are probably thousands of employers who might offer him a job, I do not know.

Mr. HATCH. The employment in Eureka, Calif., has been markedly decreased as a result of this particular acquisition by the Government.

Mr. ABOUREZK. That is not exactly the case either, Senator HATCH.

Mr. HATCH. It is not?

Mr. ABOUREZK. The case is that EDA has a program, and as a result of this park expansion EDA will go in and rejuvenate the local business economy through different State packages that will provide jobs. There is a $3 million package.

I wish the Senator had been here a little eariler. I am tired of repeating this.

There is a $3 million rehabilitation package for the existing park and expanded park that will be expended for jobs for people who are thrown out of work as a result of the expansion program.

Mr. HATCH. And these people will be expected to take those jobs?

Mr. ABOUREZK. Well, they will, presumably, be offered those jobs, that is right, and if they turn them down they get no benefits. There ought to be plenty of jobs in that area.

Mr. HATCH. They will either be working for the Federal Government or the expanded jobs, as a result of the expanded economy that is going to——

Mr. ABOUREZK. That is right.

Mr. HATCH (continuing:) Occur because the Federal Government has taken away from old sources land for development.

Mr. ABOUREZK. That is right.

Mr. HATCH. Well, I apologize for not having been here before, but the distinguished Senator knows I have been on the floor almost every hour——

Mr. ABOUREZK. I know that.

Mr. HATCH. Week after week.

Mr. ABOUREZK. All I am saying is I have answered the question four times.

Mr. HATCH. I understand.

Mr. ABOUREZK. I only wish you had been here. I gave a better answer the other time.

[Laughter.]

Mr. HATCH. I hope you gave a better answer the other time than you just gave to me now, because——

Mr. ABOUREZK. That is right.

What I just tried to tell you was I gave a better answer. I wish you had been here.

Mr. HATCH. I will have to take your word on that. I have not thought too well of your present answers, although I have enjoyed the colloquy.

All I am saying is that under certain circumstances, as I understand it, assuming there are not new jobs developed, assuming that there are not ways that they can get jobs elsewhere, be moved elsewhere, they may be able to sit down and not work for 6 years and get full benefits.

Mr. ABOUREZK. Assuming that there are no jobs available, that there is nothing to offer them and they have been retained and they do not relocate somewhere they can find a job, in South Dakota or Utah, whatever, they would be eligible for benefits up to 6 years.

Mr. HATCH. All right.

Mr. ABOUREZK. We do not expect that there will be any or very few people who will use that program.

Mr. HATCH. All right, I thank the distinguished Senator.

Mr. HAYAKAWA. Will the distinguished Senator yield?

Mr. ABOUREZK. I just wanted to make a comment before I yield.

I will be happy to yield in a minute or two.

I remember during the debate itself and the same lineup of people over here worried about paying out to somebody for a job where other people were worried about whether the timber companies were going to get paid enough. Remember that? I remember it. They were out there worrying about whether the timber companies are entitled to more money. Why do not you worry about a working stiff instead of the rich timber companies?

Mr. HATCH. Will you yield on that?

Mr. ABOUREZK. When I am done.

Mr. HATCH. Consider yielding now, would you?

Mr. ABOUREZK. Let me pose the question and I will be happy to yield for a response.

Mr. HATCH. Certainly.

Mr. ABOUREZK. Now I have never seen one bit of concern for a working guy that gets thrown out of a job. He is just kind of a straw in the wind. He is at the whim of the faction of the ones for the park and the faction of those who do not want the park. He is right in between both of them. He is in between the timber companies and the environmentalists, and the administration, the Park Service, the Labor Department. He is right in between them. I think that guy is entitled to some kind of protection from the Federal Government, and I reject the argument that the timber companies are entitled to more than their fair share.

My distinguished colleague from California (Mr. HAYAKAWA) tried to get a Court of Claims provision put in, because they are more generous with the timber companies. I do not blame him for doing that. I am just saying a fact is a fact, is a fact, is a fact, and the point is that when you try to unload the treasury on the timber companies and then try to shut it off again for working stiffs it is unfair. I think it is wrong and unfair.

I just wanted to say that.

Mr. HATCH. Will the Senator yield?

The PRESIDING OFFICER. On whose time?

Mr. ABOUREZK. On his time.

Mr. HANSEN. I yield time.

Mr. HAYAKAWA. I thank the Senator from Wyoming.

I am touched by the concern that the distinguished Senator from South Dakota shows for the "working stiffs," as he calls them. What really moves me to anger and concern about this whole legislation and the whole operation of jobs for "working stiffs" is the arrogance and the contempt for workingmen who are involved in this whole damn training program. Men in the lumber industry, the sawmill hands, the lumberjacks, all these people have pride in their work. They have dedicated their lives to it and we want to say, "Oh, we will retrain you as something else because what you do is not important. All you need is security. We will guarantee it for 6 years."

It is a kind of shuffling around of helpless human beings in situations by people who have no respect for their work, in the way that we respect our own jobs as legislators, as lawyers, as professors, and so. This is a kind of condescending to another class of people, that can be readily shifted around from being sawmill hands to whatever else you are going to make out of them. This is the basic contempt to the working stiff that I object to so seriously in this bill.

And to talk about employment, goodness me, you have these little towns like Orick, Calif., just north of Eureka, where the kind of rehabilitation that you are talking about is not restored. Eureka used to be a prosperous town. The restaurants that existed there, there are only half of them now. The motels that existed there, there are only half of them now, and a little over a half of the service stations.

When one says, as the distinguished Senator from South Dakota says, that the taxpayers want this park expansion, where is the evidence for that? The only evidence you have is the evidence of pressure groups who want the park expansion, not necessarily the working people. The people have shown their lack of desire for a park expansion, in light of the fact that over the years, despite an expected 1.5 million visitors per year to that Redwood Park they have only had 35,000. There is no demand. The State parks are not filled up. The Federal parks are not even made into parks that people can use. There is no public demand for this park expansion.

It is only a demand from conservationists who do not want this land used for economic purposes because again there is a syllogism that what people do for a living does not matter. The work that people do that requires dignity as human beings does not matter. They should stop cutting down these redwood trees.

They take over twice cutover land. They take over mixed land from the redwoods and everything else and they lump it all together as buffer zones to account for buffer to buffer to buffer zones for a few redwood trees. I can readily say there are 181,000 acres of redwood trees already in preservation, and those redwood trees are majestic, and they are just fine, and with that we preserve them.

I do not think they need to preserve all these tens of thousands of acres of cutover land to serve, as I say, buffer to buffer to buffer. I have failed to see any concern for the working people and the dignity of the working people, and the dignity of the people who have dedicated their lives to the preservation of the forest and to make a living out of the forest and keep the forests going. That dignity is yet to be discussed in this legislation.

Thank you.

Mr. HATCH. Will the Senator yield?

Mr. ABOUREZK. I yield to the Senator from California (Mr. CRANSTON).

Mr. CRANSTON. I would just like to join with the distinguished Senator and say that he has handled that bill so very ably.

Let me go further and say that I feel that when the U.S. Government takes an action that may put some people out of work, the U.S. Government has an obligation to seek to find ways to enable those people to find work and if there are times when they cannot find work we have an obligation to help them during that time. I think that the statistics that some people have tossed around of many, many people put out of work are not accurate and that we will find that that is the case. Obviously, some people will suffer some dislocation.

Obviously, some people will suffer some dislocation. I think we have an obligation to help them, just as we have had an obligation and do have an obligation, and we will fulfill that obligation, to save those magnificent redwood trees.

Mr. ABOUREZK. I might just add to that, we have been hearing figures of anywhere between 2,000 and 6,000 people being thrown out of work, because of this expansion.

I say to my colleagues who are concerned about this title II, this jobs package, that we asked the working stiffs themselves to work up this jobs package. We put them together with the Labor Department and the Energy Committee staff, the working stiffs themselves from California, from Eureka, Humboldt County, Al Laxley was one of them on the committee, to work up this title II part of the legislation.

But we sent this same committee to the timber companies who were screaming about job losses for so long and asked them to detail an outline of who was going to be laid off as a result of the expansion.

The timber company's figures were, when we pinned them down on it, 972 people maximum. That is all they could scrape up. You can bet your sweet bippie they were out looking for every person to be laid off and they were not conservative in their estimates.

That is the maximum, 972 people. I maintain it is much less than that.

In any event, the rehabilitation program will likely be in forestry, in the kind of work they have been doing. It is not going to change them or reduce the dignity of the work they have been doing one bit. It will be the same kind of work they have been doing all their lives. They will hire most of the people that are laid off.

For those not laid off, there will be a retraining program, a job search program, and if all that fails, then we have salary benefits for them, and I think they are entitled to it.

SEVERAL SENATORS. Vote! Vote!

Mr. ABOUREZK. I am ready to vote any time.

Mr. HATCH. Will the Senator yield?

Mr HANSEN. I yield to the Senator.

Mr. HATCH. I compliment the distinguished Senator from California (Mr. HAYAKAWA). Because I heard the debates before, it seemed to me his major thrust was the loss of jobs, the loss of dignity, the loss of business, the taking away of opportunity for people in this area.

I happen to have gone to that area as a working stiff myself and I understand the pride and dignity those people have.

I believe there will be more than 900 jobs lost. I have no problem with jobs approaches that would find people jobs, give them opportunities, put them to work and do many of the things the Senator thinks this will do.

On the other hand, the major concern when we debated this before was the loss of jobs, the loss of business, the loss of the unnecessary jobs, business, and economic development of that particular area, plus the cost to the Federal Government, plus, in a very real sense, having them go to a court that will not treat, in our opinion, the owners of the property as well as the court of claims, which may treat them better and probably more fairly.

These were some of the issues.

All I can say is that I do not know how it is going to work. I hope it works in the exotic nirvana state that the distinguished Senator from South Dakota and the other Senator, my friend and colleague (Mr. CRANSTON), think that it will work.

Unfortunately, in almost every one of these Federal cases, they never seem to work out that way in the end. In the end, it is the good old Joe Public who gets the shaft, while, as in this case, certain conservationists get thousands and thousands of extra acres that may not benefit anybody.

Mr. HANSEN. Mr. President, I am ready to yield back the remainder of my time, but, before I do, I express my gratitude and thanks to the distinguished floor manager of the bill (Mr. ABOUREZK), to Senator CRANSTON who has worked so long and diligently and faithfully on this, and to our very good friend, the junior Senator from California (Mr. HAYAKAWA), as well as those staff members whose names have already been mentioned. We are grateful to them.

Mr. President, I yield back the remainder of my time.

Mr. ABOUREZK. Mr. President, I yield back the remainder of my time.

The PRESIDING OFFICER. All time having been yielded back, the question is on agreeing to the conference report. The yeas and nays have been ordered and the clerk will call the roll.

The assistant legislative clerk called the roll.

Mr. CRANSTON. I announce that the Senator from Missouri (Mr. EAGLETON), the Senator from Mississippi (Mr. EASTLAND), the Senator from Alaska (Mr. GRAVEL), the Senator from Montana (Mr. HATFIELD), the Senator from South Carolina (Mr. HOLLINGS), the Senator from Hawaii (Mr. MATSUNAGA), and the Senator from Michigan (Mr. RIEGLE) are necessarily absent.

I further announce that the Senator from Colorado (Mr. HASKELL) is absent on official business.

I further announce that, if present and voting, the Senator from Michigan (Mr. RIEGLE) would vote "yea."

Mr. STEVENS. I announce that the Senator from Arizona (Mr. GOLDWATER), the Senator from Kansas (Mr. PEARSON), and the Senator from Connecticut (Mr. WEICKER) are necessarily absent.

The result was announced—yeas 63, nays 26, as follows:

[Rollcall Vote No. 73 Leg.]

YEAS—63

Abourezk	Hatfield, Mark O.	Muskie
Anderson	Hathaway	Nelson
Bayh	Heinz	Nunn
Biden	Hodges	Packwood
Brooke	Huddleston	Pell
Bumpers	Humphrey	Percy
Burdick	Inouye	Proxmire
Byrd, Robert C.	Jackson	Randolph
Cannon	Javits	Ribicoff
Case	Johnston	Sarbanes
Chafee	Kennedy	Sasser
Church	Leahy	Sparkman
Clark	Long	Stafford
Cranston	Lugar	Stevens
Culver	Magnuson	Stevenson
Danforth	Mathias	Stone
DeConcini	McGovern	Talmadge
Durkin	McIntyre	Thurmond
Ford	Melcher	Williams
Glenn	Metzenbaum	Zorinsky
Griffin	Moynihan	
Hart		

NAYS—26

Allen	Dole	Morgan
Baker	Domenici	Roth
Bartlett	Garn	Schmitt
Bellmon	Hansen	Schweiker
Bentsen	Hatch	Scott
Byrd, Harry F., Jr.	Hayakawa	Stennis
Chiles	Helms	Tower
Curtis	Laxalt	Wallop
	McClure	Young

NOT VOTING—11

Eagleton	Haskell	Matsunaga
Eastland	Hatfield, Paul G.	Pearson
Goldwater	Hollings	Riegle
Gravel		Weicker

So the conference report was agreed to.

Mr. ABOUREZK. Mr. President, I move to reconsider the vote by which the conference report was agreed to.

Mr. CRANSTON. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. ABOUREZK and Mr. THURMOND addressed the Chair.

The PRESIDING OFFICER. The Senator from South Dakota is recognized.

SENATE RESOLUTION 422—SUBMISSION OF A RESOLUTION RELATING TO THE LEBANESE CRISIS

Mr. ABOUREZK. Mr. President, I send a resolution to the desk and ask unanimous consent for its immediate consideration.

The PRESIDING OFFICER. The resolution will be stated.

The legislative clerk read as follows:

S. RES. 422

Whereas innocent lives are being lost hourly in southern Lebanon;

Whereas the Israeli invasion of southern Lebanon is a direct threat to the prospects of peace in the Middle East;

Whereas it is in the highest national interest of the United States and all parties to the Middle East conflict that an equitable, just, and durable peace be negotiated: Now, therefore, be it

Resolved, That the United Nations Security Council Resolution 425 relating to the Lebanese crisis, adopted on March 19, 1978, be implemented immediately and that all parties concerned comply fully with provisions of such Resolution.

SEC. 2. The Secretary of the Senate shall transmit a copy of this resolution to the Secretary General of the United Nations.

The PRESIDING OFFICER. Is there objection to the present consideration of the resolution?

Mr. TOWER. Mr. President, reserving the right to object, I do not believe it has been cleared on this side.

Am I to understand that the unanimous-consent request is for immdiate consideration?

Mr. ABOUREZK. Yes.

Mr. SPARKMAN. Mr. President, will the Senator yield to me?

Mr. TOWER. I yield to the Senator from Alabama, reserving my right to object.

Mr. SPARKMAN. Mr. President, I ask my good friend, Senator ABOUREZK, if this is not the same resolution that he proposed earlier today.

Mr. ABOUREZK. This is exactly the same resolution that I proposed early this morning and asked the distinguished chairman of the Foreign Relations Committee if he would agree to its immediate consideration. If the chairman will recall, he said that he would take it up in the Foreign Relations Committee if it were referred and have hearings on an emergency basis. I wish to say that I was notified later by both the staff of the Foreign Relations Committee and the chairman himself that the ranking minority member of the Foreign Relations Committee, Senator CASE, had advised him that he could not agree to act on it until after the recess.

Mr. SPARKMAN. That is correct.

Mr. ABOUREZK. Mr. President, this resolution is very simple and noncontroversial in that all it does is it has the Senate endorsing the Resolution No. 425 of the United Nations, which was sponsored by the U.S. Government, calling for an end to the fighting in Lebanon, for withdrawal of Israeli troops from that third country that they have invaded, and for replacement of the Israeli troops by UN buffer troops.

It is to try to save lives. And I say that if the Foreign Relations Committee desires to put it off until after the recess and tries to kill it by procedural methods in that manner, I think it is horrendous. I know there are people dying as we stand here talking, and I think it extremely important for the U.S. Senate to go on record to endorse an act of peace.

We have gone on record many times endorsing acts of war by shipping arms to this country or that country. In fact, Mr. President, the arms we have shipped to Israel have created this circumstance that we are now trying to put an end to.

Mr. TOWER. Mr. President, will the Senator yield?

Mr. MOYNIHAN. Mr. President, will the Senator yield?

Mr. ABOUREZK. I am happy to yield.

Mr. TOWER. Mr. President, if the Senator will withold his unanimous-consent request to take up immediately until we can get a quorum call and touch all bases, perhaps it can be expedited. So, if he would withhold his request and allow me to suggest the absence of a quorum, maybe the matter could be very quickly resolved.

Mr. MOYNIHAN. Mr. President, will the Senator yield only for a question?

Mr. TOWER. I am happy to yield.

Mr. MOYNIHAN. Mr. President, the Senator spoke to the United Nations Security Council resolution, and it is indeed a resolution supported by our Government, but it is a resolution of our Government accepted in the Security Council of the United Nations, a body which is not distinguished or noted for its friendship to the United States.

For example, the call for the withdrawal of Israeli troops, with which I would agree, nonetheless should be balanced by a call for the withdrawal of Syrian troops. The Syrian Army has been in occupation of Lebanon for 3 years, and no Security Council resolution has come forward.

Iraqi arms have moved through Syrian lines with impunity and repetitiveness.

It seems to me, with great respect to the Senator, that the thought that this is not a controversial matter is surprising to me. I would have thought that very strong reservations might be introduced, and I would think that at the very least the chairman of the Committee on Foreign Relations ought to be shown the normal courtesy of the Senate to have the matter considered in his own committee. But that may not be the judgment of the chairman. I do not want to speak for him.

Several Senators addressed the Chair.

Mr. ABOUREZK. I ask for recognition.

Mr. TOWER. I object.

The PRESIDING OFFICER. Objection having been made the resolution will go over under the rule.

Mr. ABOUREZK. I ask for recognition for a parliamentary inquiry. Because of the objection this goes over under the rules; is that correct?

The PRESIDING OFFICER. If the Senator from South Dakota insists upon immediate consideration, an objection will put the matter over for consideration under the rules.

Mr. ABOUREZK. That has already happened.

Secondly, I would like to respond to the Senator from New York. I would submit there is a little bit of difference between the Syrian troops in Lebanon and the Israeli troops in Lebanon in that the Syrian troops were invited by the Government of Lebanon and the Israeli troops were not.

Mr. MOYNIHAN. Mr. President, will the Senator allow me to respond?

Mr. ABOUREZK. I would be happy to.

Mr. MOYNIHAN. I would simply say that is a matter of dispute, and the circumstance in which that government did state what it did was a circumstance under siege, a siege which was in very many ways brought about by political elements in association with the Syrian Government.

I do not mean to dispute what the Senator has said. I only suggest this is an immensely complex subject, an equally immensely important one, and not likely to be resolved save by a very extensive inquiry of the kind the Committee on Foreign Relations is fully capable of performing.

Mr. ABOUREZK. An extensive inquiry, Mr. President, while people, while civilians are dying by the minute because of the invasion of Israel into the territory of Lebanon is a waste of time, if I might say to my distinguished colleagues here.

I want it on the RECORD that there has been an objection by the minority side. There has been—there would probably have been an objection by my distinguished friend from New York.

Mr. MOYNIHAN. If your distinguished friend knew the rules.

Mr. ABOUREZK. The Senator can object. The Senator knows how to do that. Had he not objected he would have; had he not, he would have; and had he not he would have. So let me say——

Mr. MOYNIHAN. I will say for the RECORD that I would have objected.

Mr. ABOUREZK. I do not yield at this point.

I just want to say, Mr. President, I am very sad to see the U.S. Senate going on record as being afraid, as being afraid to say something to Israel that they ought to do, that is the right thing to do, and I think it is a crying shame. That is all I want to say about it. It speaks for itself.

Mr. TOWER. Mr. President, if the Senator will yield——

Mr. ABOUREZK. I am not going to yield until I am done. It just seems to me that the Members of this Senate ought to have the courage, for God's sake, to stop the killing, to at least go on record as saying we are against the killing. They are not doing it and they are refusing to do it, and they are afraid to do it because of the Israeli lobby. I will tell you one thing, I am not afraid of the Israeli lobby. but there are too many Members of this body who are. Maybe they are justified in being so, but I will

say one thing, that it is going to go on the moral record of this U.S. Senate.

I will yield if the Senator wants to comment.

The PRESIDING OFFICER. The Senator from Texas.

Mr. TOWER. I would like to take issue with the Senator's contention that the U.S. Senate has gone on record. The U.S. Senate has done no such thing. We have objected to the immediate consideration of the resolution proposed by the Senator from South Dakota in the interest of due deliberation and consideration of the matter, and for reasons so ably raised by the distinguished Senator from New York (Mr. MOYNIHAN).

I do not think it reflects any expression of sentiment on the part of the Senate at all. As long as we are talking about killing, there is a great deal of killing in this world we can disapprove of, not the least of which is the tourist killing activity of the PLO.

Mr. ABOUREZK. Let us disapprove of that right now as well, and I am ready to go on record as to that.

Mr. SPARKMAN. Mr. President, will the Senator yield to me? The Senator has been quite patient.

Mr. ABOUREZK. I yield to the Senator.

Mr. SPARKMAN. Let me say just this: I recognize much of the truth of the Senator's statement. People are being killed. But that happens many times and in many places. I remember Pearl Harbor. I remember when Franklin D. Roosevelt came before the Congress and pronounced that day "a day that will live in infamy."

But we did not declare war immediately following the attack. It took the regular course of having Congress declare war.

Pearl Harbor had been virtually destroyed with all of the ships. Certainly it was a time for quick action, but we did not declare war immediately. We waited until the President addressed the Congress and until both Houses considered his request.

Here is my attitude, that I expressed this this morning when the Senator first brought up his resolution. I said my objection to it was that the resolution is of a nature that ought to have committee consideration and it ought to go before the Committee on Foreign Relations which has jurisdiction.

I said that I would try to get as expeditious action as I possibly could, and I will try. I recognize the value of some of the arguments of the Senator, and I sympathize with many of the points that he makes.

But, after all, we are a deliberative body. We are not supposed to just at the drop of a hat enact things that may have disastrous results. I agree that we ought to do what we can to stop the killing.

The United Nations has already acted. I believe that Secretary-General Waldheim is going in as an agent for peace. Things are being done. Furthermore, I think I can assure the Senator that the Senate Committee on Foreign Relations will give as early consideration to this as it possibly can.

Mr. ABOUREZK. I have already had the word, Mr. President, from the distinguished minority member, ranking member of the Committee on Foreign Relations, who said he does not want to hear it until after the recess.

Well, you know what is going to happen between now and the recess and between now and after the recess. Israel will have established whatever it wanted to establish. That is the reason for the delay. That is the only reason.

Let me ask what is so bad about endorsing a U.S. resolution in the U.N. sponsored by the U.S. Government? Is there anything wrong with that?

The PRESIDING OFFICER (Mr. HARRY F. BYRD, JR.). The Senator from Texas.

Mr. TOWER. Is the Senator aware that the Israelis——

Mr. ABOUREZK. What kind of due deliberation is required to stop the fighting and send in a U.N. force?

Mr. TOWER. It has already stopped.

Mr. ABOUREZK. What?

Mr. TOWER. Is the Senator aware that Israel ordered a cease-fire at 11 a.m. this morning?

Mr. ABOUREZK. Let me——

Mr. ROBERT C. BYRD. Mr. President, regular order. I do not want to shut the Senator off in the middle of his statement, I would like for him to finish. But I would like to call the attention of the Chair that the order was to go to the treaty.

I ask unanimous consent that the Senator may have 5 minutes. Does anybody else want 5 minutes?

Mr. TOWER. I will take 5.

Mr. MOYNIHAN. I would like to speak for about 2 minutes.

Mr. ROBERT C. BYRD. Five minutes to the Senator from Texas and 5 minutes to the Senator from South Dakota.

Mr. TOWER. I will yield several minutes to the Senator from New York.

The PRESIDING OFFICER. Is there any objection? The Chair hears none, and it is so ordered. The Senator from New York.

Mr. MOYNIHAN. I thank my former colleague of the London School of Economics—I had to get that in—the distinguished Senator from Texas.

Mr. President, I should like to associate myself with the statement of the Chairman of the Committee on Foreign Relations and with the added fact that the Senator from Texas has brought forward.

First, there is a cease-fire declared today. Second, the U.S. Government has made its proposal to the U.N. The U.N. has acted. What remains for the Senate is to judge how well it acted and with what completion.

It seems to me that there is a distinct double standard in the behavior of the Security Council, and not greatly to the credit of the United States that the invasion of Lebanon by Syria, and I choose to think of it as an invasion, was never protested, not by this country, and certainly not by the Security Council.

A second point——

Mr. ABOUREZK. Will the Senator yield at that point?

Mr. MOYNIHAN. Yes, but I need 20 seconds to finish.

Mr. ABOUREZK. I do not think you can revise history to the extent that you can say that the Syrians were not invited to Lebanon. They were. You know it, I know it, and everybody else knows it.

Mr. MOYNIHAN. The Germans under Adolph Hitler were invited into one country after another, which they conquered brutally.

I would like to put one other thing in the RECORD, if we have to do so, and I think we do not, this Senator is not afraid of the Israeli lobby. What this Senator is afraid of is a United States of America that will not defend the remaining free nations of the world. I thank the Senator from Texas.

Mr. ABOUREZK. Mr. President, just to use up a little bit of the time allotted to me, I want to say that the importance of how the Senate speaks on this issue cannot, I think, be overstated to any extent. I say that because the bulwark of support for Israel's objectives comes from the U.S. Senate. Everything, every bit of territorial acquisition by force that Israel has undertaken successfully has been done and has been underwritten by the U.S. Senate.

Every time the administration makes a foreign policy initiative in the Middle East that it believes is in the best interests of the United States, the Israeli lobby comes to the Senate and gets it turned around. Every foreign policy action that has been taken by the United States has been thwarted by the Israeli lobby acting through the Senate.

The importance of the Senate speaking on U.N. Resolution No. 425 is that it will let Israel know, at one point in time, that by God the Senate is not going to stand for the killing and the invasion and the aggression into an innocent third country that they have undertaken in Lebanon.

That is what I am asking, is for an up or down vote on that, and I cannot even get that. I just want the Senate to go on record one way or the other, and they will not do that. They will kill it with delay and procedural votes, they will get it in the Foreign Relations Committee and swallow it up, and we will never see it again.

I yield back the remainder of my time.

Mr. SPARKMAN. Mr. President, before the Senator goes, will he yield to me?

Mr. TOWER. I yield the Senator from Alabama such time as he may require to respond out of the time allotted to me.

Mr. SPARKMAN. I just wish the Senator from South Dakota would tell me when the Foreign Relations Committee has taken a resolution or a bill referred to it and swallowed it up. We do not act that way.

Furthermore, when we had this resolution before the Senate this morning, I think I heard the Senator make a motion to have his resolution referred to the

Foreign Relations Committee. Is that not correct?

Mr. ABOUREZK. Well, I did; I agreed——

Mr. SPARKMAN. Is that not correct?

Mr. ABOUREZK. Mr. Chairman, I agreed that if you would take it up on an emergency basis I would agree to that referral. I asked for immediate consideration of the resolution.

Mr. SPARKMAN. And I objected.

Mr. ABOUREZK. That is right.

Mr. SPARKMAN. And I said that any time you asked for immediate consideration I would object, because a resolution of that import is entitled to careful and serious consideration by the Foreign Relations Committee. As soon as we can have a meeting on this issue, I will be glad to do it, and to give full consideration to the Senator's resolution.

Mr. ABOUREZK. Could I ask——

Mr. SPARKMAN. You know we have been restricted on committee meetings, and you cannot just call a committee meeting all at once.

Mr. ABOUREZK. Mr. President, I ask unanimous consent that the Committee on Foreign Relations be allowed to meet all day tomorrow, if necessary, to consider this resolution and report it out.

The PRESIDING OFFICER. Is there objection?

Mr. SPARKMAN. Yes, I object.

The PRESIDING OFFICER. Objection is noted.

Mr. ABOUREZK. All right.

Mr. TOWER. Mr. President, how much time do I have left?

The PRESIDING OFFICER. The Senator has 4 minutes remaining.

Mr. TOWER. Mr. President, if there is no further discussion of this issue, I am prepared to yield back the remainder of my time.

THE PANAMA CANAL TREATY

The PRESIDING OFFICER. All remaining time having been yielded back, under the previous order, the Senate will resume the consideration, in executive session, of the Panama Canal Treaty, which the clerk will report.

The second assistant legislative clerk read as follows:

Executive N, 95th Congress, 1st Session, the Panama Canal Treaty.

Mr. THURMOND addressed the Chair.

Mr. ROBERT C. BYRD. Mr. President, will the Senator yield, for his own benefit?

Mr. THURMOND. Mr. President, I will be pleased to yield to the distinguished majority leader.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the distinguished Senator from South Carolina speak as in legislative session. The Senate is in executive session. Inasmuch as he is speaking on a subject which does not pertain to the treaty and is not an executive session matter, I ask unanimous consent that he may speak as in legislative session.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. THURMOND. I thank the majority leader.

DANGERS POSED BY THE SOVIET SATELLITE KILLER

Mr. THURMOND. Mr. President, admission by Defense Secretary Harold Brown that the Soviets had achieved an operational capability to destroy some U.S. satellites represents a development of serious and far-reaching implications.

Central to this issue, in my view, is that such a capability jeopardizes U.S. verification rights. Such rights are essential to Strategic Arms Limitation Talks and bring into doubt Soviet intentions to abide by current and future agreements.

Paragraph 2 of article XII of the ABM Treaty, signed and ratified in 1972 by President Nixon, reads as follows:

Each Party undertakes not to interfere with the national technical means of verification of the other Party.

This right to verify a nation's missile launchers by satellite is also protected in the interim agreement of SALT I, also signed in 1972, with identical words in paragraph 2 of article 5 of that agreement.

Thus, although the ABM Treaty and the interim agreement of SALT I are clear on this subject, the Soviets have now achieved an operational capability to interfere with our means of verification which is central to these arms agreements.

Mr. President, this new Soviet weapon brings into serious question the worth of the verification safeguard in the ABM Treaty. Further, the question arises as to how such safeguards can be assured by SALT II and are they worth anything in view of Soviet policy to circumvent these articles.

Furthermore, article IV of the Space Treaty of January 27, 1967, states as follows:

States Parties to the Treaty undertake not to place in orbit around the Earth any objects carrying nuclear weapons or any other kinds of weapons of mass destruction, install such weapons on celestial bodies, or station such weapons in outer space in any other manner.

Operational capability of a satellite killer by the Soviets, as confirmed by Secretary Brown, makes it also unclear as to the Soviet intent to abide by the Space Treaty. While the letter of the treaty may be avoided by this issue, it certainly violates the spirit of the Space Treaty.

Of possible even greater import is the fact that this new capability gives the Soviet Union the option to destroy vital missions of U.S. satellites. These include general reconnaissance, general communication, the targeting of our sea-based missiles, and detection of launch of Soviet missiles. If any of these capabilities were denied us, our defensive capabilities would be greatly impaired.

On April 23, 1977 I warned in a speech at Columbia, S.C., that the Soviets were developing just such a satellite killer. Certainly the administration has known for some time about this development.

This development deserves the strongest type of protest by U.S. SALT negotiator Paul Warnke, whose Arms Control and Disarmament Agency monitors treaty violations through a permanent team in Geneva. While I have seen no formal protest raised by the United States to date, I assume it would be forthcoming promptly and with force.

The capability of the killer space satellite gives the Soviets greater power to strike against us without warning. I question any future Treaty guarantee could effectively remove this threat.

We must not allow our research and development to lag to such an extent that we are victims of such surprises like the Soviet satellite killer.

Research Director Malcolm Currie warned the Congress just last year about such a danger. Dr. Currie's words leave no doubt as to the importance or significance of this development. He stated, it would be "catastrophic" to the balance of power if the Soviets "obtain a military advantage in space through antisatellite weapons."

Mr. President, I view these developments as having far-reaching and serious implications. The United States should accelerate its own efforts in this area, as the Soviet actions are clearly provocative and destabilizing. It gives the Soviets great potential to initiate a first strike, the very capability President Carter denounced for the United States in his United Nations speech last year.

Besides the administration's responsibility in addressing this development, the Congress has an equal or greater responsibility. Our efforts to accommodate ourselves to "essential equivalence" with the Soviets is fraught with dangers as evidenced by this development. World peace demands a more vigilant and aggressive U.S. position in assuring we can protect ourselves and restrain the Soviets from their expansionistic goals.

The fiscal year 1979 budget does include increases in spending for our military space programs. However, Congress should accelerate this effort if after examination it is found this late-blooming request is insufficient.

Mr. President, in a recent development on this issue the State Department has sought talks with the Soviets to seek a ban on satellite killers. Why this request was not undertaken last year remains a mystery.

In any event I ask unanimous consent that an article by George C. Wilson entitled, "U.S. Seeks Talks on Killer Satellite Ban" which appeared in the March 20, 1978 issue of the Washington Post newspaper be printed in the RECORD at this point.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

[From the Washington Post, Mar. 20, 1978]

U.S. SEEKS TALKS ON KILLER SATELLITE BAN

(By George C. Wilson)

The State Department said yesterday that the United States has asked the Soviet Union to open negotiations on putting outer space off limits to such hostile action as satellites that destroy each other.

Although the department did not disclose how the request was made, nor when, administration sources said yesterday it was made last month to Soviet officials in Washington. U.S. officials suggested that the first meeting be held sometime in April, sources said.

The Soviet Union has not yet replied to the request, according to administration officials.

Defense Secretary Harold Brown, administration sources said, felt that a meetng next month wouldn't allow enough time to coordinate the U.S. government's effort and unsuccessfully argued for a later date.

Brown, sources stressed, welcomes negotiations to ban hostile space activities, and did not argue for waiting until the United States had such weapons in hand. The Soviet Union has a satellite killer system while the United States is still developing one.

The Soviet antisatellite system requires that the killer satellite track and intercept the enemy satellite and then explode near it. The United States is working on several faster-reacting systems.

The Vought Corp. of Dallas, for example, has a contract with the Air Force to build a flying test model of a tiny vehicle that would leave the mother rocket once in space and home in on the heat of the enemy satellite. The tiny satellite killer would crash into the enemy satellite while flying thousands of miles an hour, relying on the force of collision rather than explosives for destruction. This heat-seeking satellite killer is expected to be ready for flight testing by 1980.

President Carter and Defense Secretary Brown have said that the United States is hopeful of negotiating a limitation on military activity in space. Said State Department officials yesterday in confirming that the United States had asked the Soviets to begin talks: "We don't want to see the arms competition extended into outer space."

The U.S. military has become increasingly dependent on space satellites for reconnaissance, communications, navigation and monitoring such Soviet activity as rocket launchings. Brown said in his annual posture statement that the Soviets "with their present capability" in space "are leaving us with little choice" but to respond to those efforts both defensively and offensively.

"Because of our growing dependence on space systems," Brown said, "we can hardly permit them to have a dominant position in the ASAT [antisatellite] realm."

Brown said last October that the Soviets had put into operation an antisatellite system. The Pentagon's fiscal 1979 budget called for sharp increases in military space programs, a trend that would become more pronounced in future years if a broad outer space treaty covering antisatellite systems is not negotiated.

Mr. ROBERT C. BYRD. Mr. President, will the distinguished Senator yield? I do not want to interrupt his statement, but the Senate is back on the treaty and Senators have been patiently waiting to resume the consideration of the treaty. I wonder if the Senator could give us a suggestion as to the time he would need to complete his remarks.

Mr. THURMOND. I would think about 3 minutes.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the distinguished Senator from South Carolina may continue to speak for not to exceed 5 minutes, as in legislative session.

The PRESIDING OFFICER. Without objection, it is so ordered.

SUBMARINE MISSILE GAP IN 1980's

Mr. THURMOND. Mr. President, an outstanding article which addresses the approaching missile gap in U.S. submarine forces was published in the March 19, 1978 issue of the Washington Post newspaper.

This article by George C. Wilson, entitled "The Next Missile Gap: Submarines" points out that delays in construction of the new Trident sub and the retirement of our older missile boats will reduce the number of missiles in our sea-based deterrent during the mid-1980's.

As students of United States-Soviet strategic forces know, the United States is already facing trouble in this period, as 90 percent of our Minuteman III missiles will be vulnerable in the early 1980's. This approaching weakness is very significant because of administration delays and cutbacks in development of the new mobile MX missile program.

Mr. President, with the B–1 strategic bomber now scrapped, the Minuteman III becoming vulnerable and a shortage of sea-based submarine missiles also in prospect, it is easy to see the United States is falling behind in defense.

No one could predict the delays in construction of the Trident. But we have known for sometime Minuteman III was becoming vulnerable and we also had a choice on the B–1.

This Nation needs some leadership from the White House if we are to avoid confrontation in the future. Such confrontations can best be avoided by a position of strength. The current policy of "essential sufficiency" is a policy of risk and reduction.

Mr. President, I ask unanimous consent that this article by Mr. Wilson entitled "The Next Missile Gap: Submarines" be printed in the RECORD at this point.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

THE NEXT MISSILE GAP: SUBMARINES

A new missile gap is opening up, this one of the United States' own making. Pentagon managers, not the Kremlin nor a presidential candidate looking for headlines, are to blame.

Simply put, the Navy's present fleet of Polaris and Poseidon missile submarines will wear out faster than they can be replaced by the giant Trident missile subs now beset with cost and construction difficulties.

This confronts U.S. policy makers with two alternatives, neither of them attractive: keep the aging Poseidon-Polaris fleet of 41 subs at sea longer than planned to reduce the gap or gamble that such a risk need not be taken because the United States can safely settle for a smaller sea-based nuclear deterrent.

Defense Secretary Harold Brown said at his March 10 press conference that the way to stave off the forthcoming missile gap "is to make plans, if necessary, to extend the life of the Poseidons. That is not simple. It is likely to cost money, and it is likely to mean that they have to be out of commission a somewhat longer time, but it is an alternative approach."

Although B–52 bombers have been kept flying long after their scheduled retirement dates, the depths of the ocean are mercilessly unforgiving of any kind of mechanical failure on a submarine. Sending men down into the sea on an over-age submarine would involve risks no leader would like to take. And even if such risks were taken, Navy projections still show there would be a big gap.

The second option, of tolerating a reduction in the sea-based deterrent of submarine missiles, would bring down a number of problems on any administration—unless the Soviets made offsetting cuts, a dim prospect at the moment.

Historically, both hawks and doves in Congress have enthusiastically supported the missile submarine force. The idea of hiding missiles under tons of water where they can neither be found nor destroyed has made eminent sense through the years to politicians of the left and right. These submarine missiles would be fired at Russia to retaliate for a surprise nuclear attack on the United States—or would deter the Kremlin from pushing the button in the first place.

The missile submarine is clearly a retaliatory weapon, which has made it especially attractive to arms control specialists. The missiles now carried by submarines would not be used to launch a surprise, first-strike attack, because they are neither accurate nor powerful enough to crack Soviet missile silos. But they could devastate Soviet cities in a retaliatory second strike. (That old distinction between first-strike and second-strike weapons is now being blurred, however, by improvements in the submarine missiles and in the satellite systems that would guide them to their targets.)

Any president who announced that the United States was going to reduce unilaterally its sea-based missile force would draw heavy political fire from all sides. Therefore, the president would be tempted to add to another part of the U.S. nuclear arsenal.

This is where a land-based mobile missile called MX comes in, a nuclear blockbuster that would be carted back and forth inside tunnels 10 to 15 miles long. The MX, to the distress of hawks, has been kept at a moderate rather than all-out development pace by President Carter. But the Navy's problems on Trident are likely to give the Air Force MX program a boost.

Once Congress perceives the extent of the projected gap between the Polaris-Poseidon and Trident submarine fleets, the demands for going ahead with MX are sure to intensify. If MX does go into full-scale development by virtue of that argument, the gap in the nation's second-strike submarine force will have helped tilt the American nuclear offense toward first-strike. This is because the MX would be so accurate and powerful that it would fall into the first-strike category of "silo busters," especially in the eyes of the Soviets.

How did Pentagon leaders, past and present, fail to anticipate the gap between Polaris-Poseidon and Trident? And is there anything more that can be done to minimize it besides extending the life of the Poseidon?

The short answer to the first question is that, despite record high Pentagon budgets of recent years, there was not enough money to buy all the Tridents needed to avoid a gap. Adm. Elmo Zumwalt Jr., former chief of naval operations, wrote about Trident's first delay in his book, "On Watch": "In order to soften the financial impact" of Trident on the Pentagon's Fiscal 1973 budget to go to Congress in January, 1972, former defense secretary Melvin R. Laird "decided that the target date for deploying the first boat should be 1980 rather than 1978" as the Navy had planned.

Today, despite earlier efforts to return to the 1978 deployment date, the Navy estimates the first Trident will not go to sea until 1981. So this replacement missile submarine is off to a late start and still slipping.

Compounding the slippage problem, the cost of this first Trident is running 50 per cent above Navy estimates—$1.2 billion rather than $800 million. More increases are anticipated. President Carter and Defense Secretary Brown have concluded that the Trident building rate can be no higher than 1½ submarines a year. Otherwise the Navy would have money for little else in the way of ships besides Trident.

To further cloud Trident's future, the only shipbuilder contracted to build this

largest-ever submarine is so angry at the Navy that it has threatened to stop work on its other big submarines project, the 688 class of attack submarines. General Dynamics' Electric Boat division of Groton, Conn., has threatened to abandon the 688 project on April 12 on the ground the Navy has refused to make an equitable settlement of $544 million in disputed back bills.

Until last week, the official line was that problems with the 688 class of attack sub would not jeopardize Trident. But in Electric Boat's letter to the Navy dated March 13, the company said: "The Navy's material breaches of the 688 contracts have materially increased the cost of performance on the Trident contract and seriously delayed delivery of the Trident vessels . . ."

Even if the Navy and Electric Boat manage to resolve their differences and get Trident back on schedule, the planned building rate still will leave a gap. Vice Adm. C. H. Griffiths, deputy chief of naval operations for submarine warfare, detailed this gap in testimony to a House Armed Services subcommittee last month:

"Retirement of the Poseiden submarines at their normal service life of 20 years or at the presently planned maximum extended life of 25 years will result in a significant reduction of [submarine missile tubes] in the 1980s and early 1990s since the Polaris-Poseidon force was built at a much faster rate than that planned for Trident."

The admiral added that if the Navy does not spend the money to renovate Poseidon subs to make them last 25 instead of 20 years, the big submarine missile gap will occur in 1986, when the United States would have only 312 launchers available instead of today's 656. (Each of the 41 Polaris and Poseidon subs carries 16 missiles for a total of 656. Each Trident will carry 24 missiles.)

If the Poseidons are made to last 25 years, the biggest submarine missile gap will be pushed back to 1992, when the United States would have 480 submarine missile tubes to deploy in the depths, according to Griffiths.

"A CONTINUED SOVIET ADVANTAGE"

Even though Brown has said Trident subs and their missiles will be more lethal than the Polaris-Poseidon fleet, the Navy estimates of the gap are ready-made for political thundering. One likely formulation: "The Navy itself admits that by 1986 the submarine missile gap will be so big that the United States will have only half as many missiles at sea as are deployed today. We must go ahead with new land missiles or build a new bomber."

A possible counter-argument is that the more powerful Trident missiles, plus the Trident II missile under consideration for future deployment, could hurl more individual nuclear warheads, called MIRVs, longer distances, and that the gap in submarine missile launchers therefore is not as alarming as it seems.

Griffiths buttressed the hawkish side of the argument by stating: "The combination of a steadily increasing Soviet SLBM [submarine-launched ballistic missile] force level, block obsolescence of the U.S. Polaris-Poseidon force and a slow Trident shipbuilding rate clearly predict a continued Soviet advantage in SLBM launchers, the most invulnerable element of each nation's strategic forces, for the foreseeable future."

Currently, the Pentagon is planning to build a total of 14 Trident submarines for $25 billion, including new bases for the giant sub, making it the most expensive weapon in the history of warfare. (The MX would cost about $40 billion.) It would take 27 Tridents, each carrying 24 missiles for a total of 648, to come close to duplicating the current force of 656 submarine missiles.

Adm. James L. Holloway III, chief of naval operations, said in an interview with The Post that he sees "no alternative" to the Trident for keeping up the nation's sea-based nuclear deterrent. But undersea warfare specialists, who declined to be quoted for fear of retaliation by Navy leaders, argued that there are ways to plug the coming submarine missile gap if the defense establishment will only stand up to Adm. H. G. Rickover and change course. Rickover, by insisting on building bigger and bigger nuclear power plants, they claimed, has saddled the Navy with giant submarines it can neither afford nor build in a hurry.

Alternatives recommended by these specialists in a series of interviews included:

Converting the troublesome 688 class attack subs to missile boats. This, it was argued, would help plug the missile gap while giving the Navy breathing time to design better subs than the 688 and Trident. One drawback here: The 688, despite all the praise President Carter heaped on it when he was given a demonstration ride, cannot go as deep as the old Polaris missile boat. Depth is protection for subs.

Building a mix of do-everything and single-purpose attack and missile subs. The Navy, specialists argued, cannot afford to keep building all its subs as big and as expensive as the Trident and 688. Non-nuclear propulsion deserves a new look in this context, they said.

Changing course away from fast missile subs like Trident to slower and cheaper ones that would rely primarily on depth and quietness for protection. Even the huge Trident power plant will not provide the sub with enough speed to outrace modern Soviet killer subs.

Compressing today's nuclear propulsion plants into smaller units without sacrificing horsepower, thus increasing performance while reducing the size of new subs.

Some of these specialists predicted that as the extent of the coming submarine missile gap begins to be appreciated by the public and Congress, the Navy will be forced into an overdue look at alternatives to the giant attack and missile submarines now threatening to leave the service short of money and the nation short of vital weapons.

THE LABOR REFORM ACT OF 1978

Mr. THURMOND. Mr. President, I rise again to express my opposition to S. 2467, the so-called Labor Reform Act of 1978. Few, if any of us in this Chamber would label the Washington Post a conservative oriented newspaper. It is for this reason that I found an editorial, which appeared in the Post recently concerning S. 2467, particularly interesting. The point made was on the mark. Mentioned as a major failing in this bill was the abuse it fails to address. It does nothing to protect workers from abuses by labor unions.

The distinguished Senator from Utah (Mr. HATCH) has introduced a bill S. 1855, which does fill this gap. Together with other Senators, I have joined him in this effort.

Mr. President, I ask unanimous consent that this editorial, along with my remarks be printed at this point in the RECORD.

There being no obection, the article was ordered to be printed in the RECORD, as follows:

[From the Washington Post, Mar. 15, 1978]

THE LABOR BILL

The Labor Reform Act is one of those pieces of legislation whose pluses and minuses are buried under the cloud of rhetoric that accompanies it. The bill is (depending on which version of the literature you prefer): a) a measure desperately needed to protect vital rights of working men and women from destruction by law-breaking and vindictive employers; b) a last-ditch effort by labor unions to bolster their sagging membership rolls by stacking the deck against workers who do not want to join unions; c) a relatively insignificant measure that tinkers with, but makes no monumental changes in, present law.

Regardless of which view is closest to the truth, the bill is going to be the major battleground between the unions and business organizations this year. Both sides have already invested vast sums of money and lobbying power in the fight. More will be forthcoming as the time for the Senate to begin debate on the subject draws closer. Both sides, it seems to us, have staked far more on the bill than its merits deserve. Organized labor appears to regard its passage as the best way to retrieve at least part of the prestige it lost last year when the common situs picketing bill was defeated. Business groups seem to see the bill as an opportunity to demonstrate that the political clout the labor movement once had is slipping quickly away.

We do not intend to get into the specifics of this legislation just now. It is enough, for the moment, to say that the bill is mislabeled. It ought to be called the "Union Organizing Act of 1978." Most of its major provisions are aimed at making it easier for unions to organize new units. Some of these are aimed at well-documented problems, but others are not. Much of the rest of the bill involves procedural changes at the National Labor Relations Board. However, one major section would put the government in the business of blacklisting companies that are persistent violators of the labor laws.

Last fall, when the House passed its version of this act, we noted that we were less troubled by what the bill did than by what it failed to do. That is still true. Like the House, the Senate Human Relations Committee has lost sight of the need to change the law so that it better protects the rights of workers. This bill does improve the protection of some of those rights against abuses by management, but it does nothing to protect them from labor unions. And one kind of abuse is about as common as the other these days. The main focus of this legislation is on the rights of unions—as unions, not as representatives of workers. We doubt that adding additional provisions strengthening the law against union misdeeds would take much of the bitterness out of the fight that is going on over passage of the bill. But that would at least reduce the one-sidedness of this "reform" act.

FOOD STAMPS AND STRIKERS

Mr. THURMOND. Mr. President, I have just today learned that since January 1978, it has cost taxpayers nearly $13 million per month for food stamps for striking miners. The President has invoked the Taft-Hartley Act, which the strikers have chosen to disregard. Yet, food stamps still go to the strikers. Should the strike continue, and when the food stamps are cut off by the administration, we can expect the union to go to court. Thus insuring a flow of food stamps to strikers, while the battle for an injunction against the administration goes on.

So far the coal strike has resulted in a slowdown of other vital industries and layoffs. It will inevitably cause a further inflationary spiral and higher prices. The lion's share of the costs will be borne by taxpayers and consumers who have no connection with the coal industry.

The Federal Government has provided food stamps to people who have voluntarily walked off their jobs. This amounts to the Government injecting itself into the strike on the side of the union bosses. This is not fair. It is particularly not fair to American taxpayers, who must bear the overwhelming share of the cost of the food stamp program. The program was never intended to assist those who voluntarily refuse to work. It was meant to be used to help those who are genuinely in need.

On February 1, 1977, I introduced S. 567, a bill which would deny food stamps to any household where the head of the household is engaged in a labor strike. Joining me as cosponsors of this proposed legislation were Senators BARTLETT, CURTIS, GARN, GOLDWATER, HATCH, HELMS, HOLLINGS, MCCLURE, SCHMITT, TOWER, and WALLOP.

The time has come for action on S. 567. The Federal Government should not feed those who voluntarily refuse to work. That is the responsibility of the striking union.

Mr. President, I ask unanimous consent that the attached editorial from the Columbia Record, Columbia, S.C., dated March 9, 1978, be printed in the RECORD at this point.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

CRUEL IRONY TO STRIKE

In its recent issue of "Congressional Action," the Chamber of Commerce of the United States makes some telling points relative to the current national ordeal, the prolonged coal strike.

The chamber noted that the taxpayers have, in a sense, been both unwitting collaborators and victims in the whole sorry situation because of a multi-million dollar drain placed on the nation's food stamp and welfare coffers by striking miners.

Take West Virginia, for instance. Statistics there show that the number of persons on non-welfare food stamp rolls nearly doubled as a result of the strike. In January and February, 34,000 striking households were added to the West Virginia rolls, costing the taxpayers $8.8 million more than would normally be the case.

In Ohio, the normal food stamp caseload runs about 715,000. In January, it jumped to 752,000 and to 805,000 in February.

The same situation is reflected in other coal-producing states.

"Regardless of whether one supports the coal miners' strike or not," said the chamber, "it is a very cruel irony that the taxpayer and consumer not only have to pay for the coal strike with higher prices, their own job layoffs, and even cold homes and businesses, but also have to support the striking miners with their tax dollars through government welfare programs."

Enough said.

The PRESIDING OFFICER. The Senator from West Virginia.

Mr. ROBERT C. BYRD. Mr. President, the Senator from South Dakota (Mr. MCGOVERN) has been waiting very patiently all afternoon to present some comments. I ask that he may be permitted for not to exceed 5 minutes, as in legislative session. At the conclusion of his remarks, Mr. President, I will insist on regular order, reluctantly.

THE SENTENCE OF MR. BHUTTO

Mr. McGOVERN. Mr. President, I was shocked to learn of the conviction and sentencing to death before a firing squad of former Pakistani Prime Minister Zulfiqar Ali Bhutto. While I do not wish to interfere in the internal affairs of another state and I do not intend to challenge the judicial process in Pakistan, I am compelled to state my personal feelings on this issue and to appeal to the Pakistani Government to commute the sentence.

In January 1976, I was a guest of Mr. Bhutto in his home in Larkana during my visit to Pakistan. He was a gracious host and a distinguished leader with impressive achievements. In my report on this trip to the Senate Foreign Relations Committee, I observed that although, as Mr. Bhutto's critics pointed out even then, he was ruling with a firm hand that was becoming more authoritarian, Mr. Bhutto, nevertheless, deserved to be recognized as a man who brought stability and international prestige to Pakistan during very difficult times. I reported then:

Mr. Bhutto, a forceful and erudite leader appears to retain much of the charisma attached to him when he came to power after the 1971 war [in which Bangladesh was created]. He assumed leadership of a shattered, bewildered and demoralized country and played the central role in getting the country moving again. Perhaps his greatest achievement is the restoration of Pakistan's self-confidence and respect and its standing in the international community following the 1971 war.

As the current unrest within Pakistan indicates, there still remains a considerable degree of support for this condemned man. His execution would almost certainly result in deepening divisions, widespread violence, and a lowering of international confidence in Pakistan's political system.

It is certainly not my role to sit in judgment on the guilt or innocence of Mr. Bhutto, either on the charge of ordering the assasination of a political opponent for which he was sentenced to death, or on the charges he faces in six other cases that have not yet been brougt to trial. However, I strongly urge the Government of Pakistan to act out of prudence, compassion and wisdom. Commuting the death sentence is not tantamount to revoking the verdict in the crime with which he was charged. Commutation is merited in consideration of the role that Mr. Bhutto once played during a painful period in Pakistani history, in consideration of the damage which his death would cause to the country today, and in consideration of the setback his death would represent to the commitment made by Gen. Mohammend Zia Ul-Haq to return the country back to civilian rule.

Most of all, commutation of Mr. Bhutto's death sentence is justified on humanitarian grounds. Surely Mr. Bhutto and his family have already suffered much. They face many more ordeals ahead. My hope is that Mr. Bhutto decides to appeal the judgment in this case to the supreme court. But if he declines to do so, then it would be to the greater benefit of the country as a whole—and certainly a mark of statesmanship for the Pakistan Government itself—if Mr. Bhutto, a man who ruled as President and Prime Minister for 5½ years, were allowed to live.

Mr. President, in addition to my remarks today, I ask unanimous consent to have printed in the RECORD an editorial in the Washington Post likewise appealing to the Pakistan Government to reconsider Mr. Bhutto's fate.

There being no objection, the editorial was ordered to be printed in the RECORD. as follows:

[From the Washington Post, Mar. 21, 1978]

MR. BHUTTO'S DEATH SENTENCE

The death sentence given former Pakistani prime minister Zulfiqar Ali Bhutto, convicted for ordering a rival's assassination, poses a stark choice between the demands of law and the demands of politics. His trial was public and lengthy and held in conformance with the law of the land; Mr. Bhutto can yet appeal and ask the government for clemency. But even though the principles of accountability and legality are thus being respected, a certain basic political "law" is not. Mr. Bhutto still claims substantial numbers of followers, and many of them see his sentence, as they saw his arrest and trial, as an expression of vengeance. The disturbances reported yesterday in several Pakistani cities offer a taste of the form their continued alienation could take. The military leadership is not so firmly in command as to tempt that sort of trouble without a second thought.

We hope the government of Gen. Mohammed Zia ul-Haq does give that second thought. We do so not with the thought that the crime of which Mr. Bhutto was convicted is not serious or that he is innocent or that his trial was fraudulent. What troubles us is that it is asking a great deal of Mr. Bhutto's still substantial constituency to expect them to accept that the process by which justice has been meted out to Mr. Bhutto is untinged by politics. For all of his real and imagined misdeeds and flaws of character and policy, Mr. Bhutto did have political legitimacy: He was the people's choice. The generals do not have that legitimacy, and they are therefore at a great disadvantage in convincing Mr. Bhutto's supporters that what is happening to him now is fair.

In the very different circumstances surrounding President Ford's pardon of President Nixon, essentially political grounds were found for sparing the disgraced president the full rigors of the judicial process. The argument was the country had seen sufficient upheaval during the period leading up to Mr. Nixon's resignation and that the public interest in tranquillity and a return to normalcy would be better served by pardon than by a series of trials. That is not to say that the pardon was universally approved or that the Pakistanis should or can follow literally that particular American example. It is to say that Americans are in a good position to appreciate the moral and legal and political complexities of the passage the Pakistani government is entering now.

Mr. MOYNIHAN. Will the Senator yield?

Mr. McGOVERN. Yes, I yield to the distinguished Senator from New York (Mr. MOYNIHAN).

Mr. MOYNIHAN. Mr. President, I should like to express the appreciation

of, I am sure, many of us on the floor and in the Senate to the distinguished Senator from South Dakota (Mr. McGOVERN) for having raised this matter and the tone with which he did so and the content of his statement.

I, too, have had the great pleasure of being a guest of Prime Minister Bhutto. He was surely a gracious man and in his time in Pakistan, he showed himself not to be a brutal man by the standards of so many nations today. It is indeed a point about his own country that, while it has had a succession of nondemocratic governments come to power by overthrowing their predecessors, it has also had a tradition of some compassion about those predecessors. They have been placed under house arrest. I believe Gen. Yaya Khan is still under house arrest.

I cannot let the opportunity pass simply to note that those nations which fail in their democratic vows create for themselves intolerable problems of succession. There are many things the matter with the way we do things, but our leaders are not taken away in chains, much less in a box. Perhaps the world will come to note that there are, in fact, advantages to the inconveniences we put up with, including, perhaps, listening interminably to speeches such as the Senator and I have just made.

I thank the Senator from South Dakota and congratulate him.

Mr. McGOVERN. I thank the Senator for his remarks and I subscribe to them wholly.

Mr. President, I yield the floor.

THE PANAMA CANAL TREATY

The Senate continued with the consideration of the treaty.

The PRESIDING OFFICER. The Chair recognizes the Senator from New York (Mr. MOYNIHAN).

Mr. MOYNIHAN. Mr. President, I rise briefly as the debate on the second Panama Canal Treaty resumes. Last evening, at about this time, or perhaps a little earlier, the Senate having just voted on the second of two amendments that had been presented, I rose to speak, both in retrospect with regard to that day's proceedings and as to the prospective proceedings that have now commenced. I addressed myself in part to an amendment which had been proposed by the distinguished Senator from Wyoming, a Member, as I am, myself, of the freshman class in the Senate and a man for whom I have come to have the highest regard and close relations. In the confusion of the moment following the vote, I was not aware that Senator WALLOP had left the floor, so I inadvertently spoke to a matter of considerable, of very direct concern to him, when he was not present to reply. Of course, I spoke in opposition to his amendment, as I voted in opposition.

I did so in very considerable, in largest measure, because he had complained, if I might use that term—he might want to use some other term—to the Senate at the time of the vote on his measure that it had not been debated by the proponents of the treaty; that, rather than entering a dialog with him and rebutting, if they could and as they were able, to the extent they were able, his argument, a vote was simply called for and the majority that exists for these treaties voted down his amendment. That seemed to me a perfectly appropriate matter to raise and I did raise it.

I thereupon used and, in several passages, I employed terms and analogies and references which seemed to me not to have been necessary and, in retrospect, that seemed to me not to have been in order. I should like to express to my good friend—and he knows that our relations are of that order—my regret for any wrong I may have done and to state that he knows of my great regard for any man who has had the good fortune to be educated at Yale. As a CCNY man, I have almost a class deference to such persons.

Finally, Mr. President, I should like to say that, with respect to my having spoken yesterday when he was not on the floor, when I called the Senator from Wyoming this morning to offer my apologies for having done that—stating that it was inadvertent, but it nevertheless did occur—characteristically and most graciously, the Senator from Wyoming accepted my apologies. We have since had occasion to talk about these matters and, with respect to any ill service that I may have done him, that matter is behind us. The issue of the treaties and of his particular point of view which he represented in that amendment is still very much before us.

I recall that the Senator asked yesterday that, since the matter was not debated fully, or at all, in his view, it be brought up at a later time and no point of germaneness be brought against it. I believe the managers of the bill indicated that they acceded to his desire and I think they were wise to do so.

Mr. WALLOP. If the Senator would yield to me for a minute.

Mr. MOYNIHAN. The Senator is happy to yield.

Mr. WALLOP. One of the things that I admire most about being in the Senate is the stature of the men that are in the Senate and, you, sir, I think have shown in every way that the Senate rightfully deserves that reputation.

I accept your apology and I accept your friendship and so far as I am concerned, the Senate has many better things to do than to drag grudges across the floor from day to day, and let me say that I bear no grudge, I bear no ill will, and as far as I am concerned, the matter will be raised as an amendment by Senator STEVENS. We can talk about it at that time, I do much appreciate your kind and gracious words, and I thank you very much.

Mr. ROBERT C. BYRD. Mr. President, will the Senator yield?

Mr. MOYNIHAN. I yield to the distinguished majority leader.

Mr. ROBERT C. BYRD. Mr. President, I wish to congratulate both the distinguished Senator from New York (Mr. MOYNIHAN) and the distinguished Senator from Wyoming (Mr. WALLOP). They have demonstrated what to me is a courtesy, which is of the highest caliber, and for which Senators and this institution itself are known.

I listened to the distinguished Senator from New York on yesterday and I never understood at any point that he was expressing in any way any disrespect for the Senator from Wyoming nor could I determine in his words any aspersions on that distinguished Senator from Wyoming.

As a matter of fact, he went out of his way later to state very emphatically and clearly that he meant no offense to the Senator from Wyoming and I understood it that way.

I am grateful that he has in the meantime contacted the Senator from Wyoming and that he has taken the floor here this afternoon to state beyond any peradventure of doubt his high respect, his high regard for the Senator from Wyoming, and I hope that that will make the record clear.

I admire the Senator from New York. He has an enormous facility for expressing himself and expressing himself well. I think he was directing his attention not only to the amendment that had been introduced by the Senator from Wyoming but he got to the fact that the Senate is being subjected to the consideration of a good many amendments, and some which have merit, but I think he was remonstrating against amendments that really, as he characterized the amendment yesterday, are incapable of implementation.

I am not entering the argument as to whether it was or whether it was not capable of implementation, but I clearly remember those words. And that was one of the objections he had to the amendment, and I think he was speaking for all of us, when he expressed the view that we ought to avoid, if we can, introducing amendments which are incapable of implementation, which obviously are—and I do not characterize the Senator from Wyoming's amendment this way when I say that but Senators' amendments that obviously are not going any place and in some instances may be considered to be frivolous and which take up the Senate's time and which keep the Senate from reaching a final conclusion on the treaty itself.

So I did not misunderstand the Senator from New York. I think he was very kind and generous and he did the right thing, I think, in contacting the Senator from Wyoming to explain what he had said and to state that he was apologizing for having inadvertently spoken while the Senator was not on the floor.

I think the Senator from Wyoming, likewise, has demonstrated a splendid attitude in the way he has reacted toward this, and I join with him in saying that I hope that we can now put the matter behind us and get on with the business of consideration of the treaty.

Mr. WALLOP. May I say that I thank the distinguished majority leader.

My friend, the Senator from New York, called me this morning and I explained to him that I thought no public act was necessary on this thing. He has been more than gracious in offering it and I think it speaks well of both himself and the

United States Senate. I thank the distinguished majority leader for his remarks.

Mr. ROBERT C. BYRD. I thank the distinguished Senator.

Mr. BAKER. Will the Senator yield to me for just a moment?

Mr. MOYNIHAN. The Senator is honored to yield to the Senator from Tennessee.

Mr. BAKER. I must confess to my colleagues for the record that when the event that we are now discussing occurred yesterday I was on my way back from Tennessee, so I did not hear it, which may have no advantage except it gives me a touching point of view, and from that point of view I must say that the performance of my two colleagues today, the distinguished Senator from New York and the equally distinguished Senator from Wyoming, has been in the best tradition of the Senate.

While I know nothing about the matter in controversy, I do know that both of them have acted with honor and dignity today and they are to be commended for it, and I do now commend them for it.

Mr. MOYNIHAN. I thank the distinguished Senator from Tennessee and I especially thank my good friend, the Senator from Wyoming.

Thank you, Mr. President.

(Mr. MOYNIHAN assumed the chair.)

Mr. ROBERT C. BYRD. Mr. President, I would like to inquire if there are any amendments at the desk or unwritten amendments any Senator would like to call up at this time in connection with the treaty.

Mr. ALLEN. I have an amendment at the desk if no other Senator would have one.

Mr. ROBERT C. BYRD. I thank the distinguished Senator from Alabama.

Mr. ALLEN. I would inquire of the distinguished majority leader if it is his plan to continue the discusson in consideration of the treaty to the point of requiring additional rollcall votes tonight?

Mr. ROBERT C. BYRD. No, I do not necessarily have that in mind. May I say to the distinguished Senator from Alabama that I have alerted Senators on this side of the aisle that we will probably be in until 6:30 or 7 o'clock and that there could be another rollcall vote.

I am not insisting on a vote, may I say to my distinguished friend. I will be pleased to have an amendment called up and debated briefly and voted on, but perhaps the Senator will want more time on his amendment.

In any event, if we could get the amendment up and hopefully reach an agreement as to a time limit on it so that we could look forward to tomorrow and have a vote on the amendment or in relation to the amendment at a particular time, I think that will serve the interests of the Senate.

Mr. ALLEN. I would not object to that, providing enough time was given, because I believe the amendment addresses one of the most important defects in the treaty, one of many I might say, but this is one of the most important defects in the treaty and I would hope that other Senators would be given the opportunity to discuss the amendment after they become familiar with it.

I would think that sometime possibly in the—I do not know when the majority leader has in mind bringing the Senate back in. I wonder if he would mind telling us that.

Mr. ROBERT C. BYRD. I had in mind the hour of 9:30, inasmuch as two Senators want special orders. This will enable the Senate to resume consideration of the treaty by 10 o'clock tomorrow morning.

Mr. ALLEN. Well, I might state to the distinguished majority leader that the amendment is capable of being divided and there are two questions, and I would ask for a division and I would feel that both phases of the amendment could be addressed so that both phases of the amendment could be acted on tomorrow.

That would be in the late afternoon of tomorrow, and both phases might have been disposed of.

I would agree if that sort of order could be entered I would certainly have no objection.

Mr. BAKER. Will the distinguished majority leader yield?

Mr. ROBERT C. BYRD. I will be happy to yield to the distinguished minority leader.

Mr. BAKER. Mr. President, I would hope that we could arrange some sort of schedule for tomorrow, particularly in view of the request I have now from one Senator who has accommodated us rather extraordinarily on voting times today. I am speaking of the distinguished Senator from Kansas (Mr. DOLE). He has commitments that will keep him from the floor until around noon, so if we can arrive at some sort of an arrangement to have an amendment pending. I wonder if the majority leader would consider also a request that no rollcall vote occur, say, before 12 o'clock.

Mr. ROBERT C. BYRD. Mr. President, the Senator from Maryland is here, and he and Senator CHURCH have the heavy burden of managing the treaty on this side of the aisle. If he would have no objection, I certainly would think that would be a reasonable request.

Mr. SARBANES. Mr. President, will the distinguished majority leader yield?

Mr. ROBERT C. BYRD. I yield.

Mr. SARBANES. I think that not having any vote before noon is a reasonable request. But I wonder if we could then go on to vote perhaps on the first part of the amendment. I understand the distinguished Senator from Alabama is going to divide his amendment and have two votes. Is that correct?

Mr. ALLEN. That is correct.

Mr. SARBANES. I think we might have a vote on the first part shortly after that hour, when I take it Senator DOLE would be back.

Would another hour or two be adequate for considering the second part?

Mr. ALLEN. One phase at 1 o'clock and another phase at 3:30, say.

Mr. ROBERT C. BYRD. Mr. President, may we have order in the Senate? I ask that the Sergeant at Arms help us to secure order.

The PRESIDING OFFICER. The Sergeant at Arms will do so.

Mr. HANSEN. Mr. President, if the Senator will yield, I apologize. The Sergeant at Arms did not tell me precisely what he wanted, and I misunderstood his gesture. I assure the Senator that I shall not do it again.

Mr. ROBERT C. BYRD. The Sergeant at Arms is pretty capable of taking care of himself.

[Laughter.]

Mr. BAKER. Mr. President, I might also note for the record that the Sergeant at Arms is blushing. [Laughter.]

Mr. ROBERT C. BYRD. May I also say for the record that he is an outstanding Sergeant at Arms, and I have had the occasion many times to speak in approbation of him.

Will the distinguished Senator indicate what his amendment does? Perhaps the Senator from Maryland is aware of it.

Mr. ALLEN. The amendment I have at the desk is amendment No. 86. It addresses the question of whether or not the United States should agree in the treaty that we shall not have the authority to negotiate with another nation for the construction, operation, and maintenance of a new canal. It also discusses and addresses the question of whether or not another nation would be allowed to build another canal in Panama.

Those twin questions are addressed by the amendment.

Mr. ROBERT C. BYRD. The distinguished Senator had suggested a vote at 1 o'clock and another at 3:30.

Mr. ALLEN. That is correct.

Mr. SARBANES. If we had one at 12:30 and one at 3, that would give us from 10 to 12:30 on the first part—that is 2½ hours—and that would give us another 2½ hours on the second part of the amendment. That would make it possible to go on to another amendment after the vote at 3 o'clock. Does that sound reasonable to the Senator from Alabama?

Mr. ALLEN. I have a particular requirement that is going to cause the time of 12:30 not to be appropriate. I wonder if we could set it at 1 o'clock and 3:30?

Mr. SARBANES. If the Senator has some other requirement, I certainly think we should accede. I think the times he originally suggested, of 1 o'clock and 3:30, would be all right.

AMENDMENT NO. 86

Mr. ROBERT C. BYRD. Mr. President, if the Senator will allow me, I will put that in the form of a request.

Mr. ALLEN. Yes. I will call up the amendment.

Mr. President, I call up amendment No. 86, and I ask that it be stated in full.

The PRESIDING OFFICER. The amendment will be stated.

The legislative clerk read as follows:

The Senator from Alabama (Mr. ALLEN) proposes an amendment numbered 86:

Amend Article I by adding at the end of Section 1(d) the following new Subsection:

(e) It is expressly provided, however, that (A) nothing contained in this treaty shall deprive the United States of the right it has under the 1903 and 1955 treaties to prevent the construction of a second canal in Panama by any nation other than the United

States; and that (B) nothing contained in the treaty shall prevent the United States from negotiating with any other nation for the construction, maintenance, and operation of a transoceanic canal anywhere in the Western Hemisphere, or from constructing, maintaining, and operating any such canal.

Mr. ROBERT C. BYRD. Mr. President, will the Senator yield?

Mr. ALLEN. I am delighted to yield.

Mr. ROBERT C. BYRD. I ask unanimous consent that the vote occur in relation to the first division at 1 p.m. tomorrow and that a vote occur in relation to the second and final part at 3:30 p.m. tomorrow.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. ROBERT C. BYRD. Mr. President, there will be no more rollcall votes today.

I thank the distinguished Senator for calling up his amendment.

Mr. ALLEN. I thank the distinguished majority leader and the distinguished Senator from Maryland (Mr. SARBANES).

Mr. ROBERT C. BYRD. Before the Senator begins, may I ask this question: Does the Senator intend to speak on the amendment this evening? If so, can he indicate the length of time?

Mr. ALLEN. I would rather have a larger audience of Senators. I will not state the number on the floor, but every seat is not filled, I say to the distinguished majority leader. [Laughter.]

I would rather have a larger audience; and if it is all right with the distinguished majority leader, we might go out at this time and let me start discussing the amendment the first thing in the morning.

Mr. ROBERT C. BYRD. That will be fine. I thank the distinguished Senator.

Mr. President, I ask unanimous consent that when the Senate resumes its consideration of the treaty tomorrow, Mr. ALLEN be recognized at that time.

The PRESIDING OFFICER. Without objection, it is so ordered.

ROUTINE MORNING BUSINESS

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that there be a brief period for the transaction of routine morning business at this time, with statements therein limited to 5 minutes each, and the period not to extend beyond 30 minutes.

The PRESIDING OFFICER. Without objection, it is so ordered.

MESSAGES FROM THE HOUSE

At 2:19 p.m., a message from the House of Representatives delivered by Mr. Hackney, one of its reading clerks, announced that the House has passed the following bills, in which it requests the concurrence of the Senate:

H.R. 11318. An act to amend the Small Business Act and the Small Business Investment Act of 1958; and

H.R. 11518. An act to extend the existing temporary debt limit.

The message also announced that the House has agreed to the following concurrent resolution, in which it requests the concurrence of the Senate:

H. Con. Res. 494. A concurrent resolution expressing the sense of Congress regarding the operation of certain rail passenger service by the National Railroad Passenger Corporation.

At 4:55 p.m., a message from the House of Representatives delivered by Mr. Hackney, announced that the House has passed the following bills, without amendment:

S. 833. An act for the relief of Ah Young Cho Kwak; and

S. 1135. An act for the relief of Youngsoon Choi.

The message also announced that the House agrees to the report of the committee of conference on the disagreeing votes of the two Houses on the amendment of the Senate to the bill (H.R. 5383) to amend the Age Discrimination in Employment Act of 1967 to extend the age group of employees who are protected by the provisions of such act, and for other purposes.

The message further announced that the House insists upon its amendment to the bill (S. 9) to establish a policy for the management of oil and natural gas in the Outer Continental Shelf; to protect the marine and coastal environment; to amend the Outer Continental Shelf Lands Act; and for other purposes, disagreed to by the Senate, and agrees to the conference requested by the Senate on the disagreeing votes of the two Houses thereon; that Mr. MURPHY of New York, Mr. UDALL, Mr. EILBERG, Mr. BREAUX, Mr. STUDDS, Mr. HUGHES, Mr. MILLER of California, Mr. DODD, Mr. SEIBERLING, Mr. FISH, Mr. FORSYTHE, Mr. YOUNG of Alaska, and Mr. TREEN were appointed managers of the conference on the part of the House; and that the Speaker has appointed Mr. DINGELL as an additional manager on the part of the House solely for consideration of the provisions contained on page 8, lines 1–8; page 20, lines 12–14; page 30, lines 5–11; page 156, line 24 through page 158, line 18; and on page 167, lines 10–17 of the House engrossed amendment to the bill (S. 9) and modifications thereof committed to conference.

HOUSE BILL REFERRED

The following bill was read twice by its title and referred as indicated:

H.R. 11318. An act to amend the Small Business Act and the Small Business Investment Act of 1958; to the Select Committee on Small Business.

ORDER TO HOLD H.R. 11518 AT THE DESK

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that H.R. 11518, to extend the existing temporary debt limit, be held at the desk pending further disposition.

The PRESIDING OFFICER. Without objection, it is so ordered.

REPORTS OF COMMITTEES

The following reports of committees were submitted:

By Mr. ABOUREZK, from the Select Committee on Indian Affairs, with amendments and with a preamble:

S.J. Res. 102. A joint resolution entitled "American Indian Religious Freedom" (Rept. No. 95–709).

By Mr. SASSER, from the Committee on Governmental Affairs, with an amendment:

S. 1265. A bill to amend chapter 21 of title 44, United States Code, to include new provisions relating to the acceptance and use of records transferred to the custody of the Administrator of General Services (Rept. No. 95–710).

By Mr. SASSER, from the Committee on Governmental Affairs, with amendments:

S. 1267. A bill to amend sections 3303a and 1503 of title 44, United States Code, to require mandatory application of the General Records Schedules to all Federal agencies and to resolve conflicts between authorizations for disposal and to provide for the disposal of Federal Register documents (Rept. No. 95–711).

EXECUTIVE REPORTS OF COMMITTEES

The following executive reports of committees were submitted:

By Mr. CANNON, from the Committee on Commerce, Science, and Transportation:

Louis Polk, of Ohio, to be Chairman of the U.S. Metric Board.

The following-named persons to be members of the U.S. Metric Board:

Carl A. Beck, of Fennsylvania;
Francis R. Dugan, of Ohio;
Henry Kroeze, of Wisconsin;
Thomas A. Hannigan, of Maryland:
Frank Hartman, of Michigan;
Sandra R. Kennedy, of Maryland;
Roger Ellis Travis, of Massachusetts;
Sydne D. Andrews, of Florida;
Joyce D. Miller, of New York;
Glenn Nishimura, of Arkansas.
Satenig S. St. Marie, of Connecticut; and
Adrian G. Weaver, of Connecticut.

(The nominations from the Committee on Commerce, Science, and Transportation were reported with the recommendation that they be confirmed, subject to the nominees' commitment to respond to requests to appear and testify before any duly constituted committee of the Senate.)

By Mr. PROXMIRE, from the Committee on Banking, Housing, and Urban Affairs:

H. K. Allen, of Texas, to be First Vice President of the Export-Import Bank of the United States.

(The nominations from the Committee on Banking, Housing, and Urban Affairs was reported with the recommendation that it be confirmed, subject to the nominee's commitment to respond to requests to appear and testify before any duly constituted committee of the Senate.)

INTRODUCTION OF BILLS AND JOINT RESOLUTIONS

The following bills and joint resolutions were introduced, read the first time and, by unanimous consent, the second time, and referred as indicated:

By Mr. HATHAWAY:

S. 2771. A bill to exempt veterans' organizations from the unrelated business tax; to the Committee on Finance.

By Mr. SASSER:

S. 2772. A bill to amend title 5, United States Code, to revise the pay structure for Federal air traffic controllers; to the Committee on Governmental Affairs.

By Mr. ABOUREZK:

S. 2773. A bill to prohibit the release of information held, obtained, or prepared by the Federal Government, its departments and

agencies as a consequence of the Federal trust relationship with Indian people; to the Select Committee on Indian Affairs.

By Mr. LAXALT:

S. 2774. A bill to extend the boundaries of the Toiyabe National Forest in Nevada, and for other purposes; to the Committee on Energy and Natural Resources.

By Mr. HART (by request):

S. 2775. A bill to amend the Atomic Energy Act of 1954, as amended, to improve the nuclear siting and licensing process, and for other purposes; to the Committee on Environment and Public Works.

By Mr. DOLE:

S. 2776. A bill to amend the Internal Revenue Code of 1954 to provide that the use of the zero bracket amount will not reduce the benefits of income averaging; to the Committee on Finance.

STATEMENTS ON INTRODUCED BILLS AND JOINT RESOLUTIONS

By Mr. HATHAWAY:

S. 2771. A bill to exempt veterans' organizations from the unrelated business tax; to the Committee on Finance.

● Mr. HATHAWAY. Mr. President, I am pleased to introduce legislation to provide that the proceeds from the operation of certain games by nonprofit organizations would not be subject to the unrelated business income tax. Under the present law, organizations such as the Veterans of Foreign Wars and the American Legion, which are otherwise tax exempt, must pay Federal income taxes on the proceeds from beano and other regularly conducted games, if the organization pays workers to operate the games. The proceeds from the games are used for worthwhile charitable purposes. The present tax liability assessed to these groups, if not amended as provided in my bill, could cause them to significantly reduce their sponsorship of many worthwhile activities.

Originally the tax on income from unrelated business conducted by such organizations was imposed because taxpaying businesses complained of unfair competition. Since the operation of games by otherwise tax-exempt organizations does not compete with commercial activities, taxing their proceeds is not necessary, in my judgement, under the general purpose of the law.

The legislation I am introducing would only apply to games which are not prohibited by State or local law. In addition, the operation of the games could not be in competition with profitmaking businesses. The exempted proceeds would also have to come from games which usually have the wagers placed, the winners determined and the prizes or other property distributed in the presence of all persons placing wagers in the game.

The taxation of the proceeds of those games is an unnecessary obstacle for organizations performing important civic activities. It is a burden for their members and an injustice to the people they are trying to serve.

Mr. President, I ask unanimous consent that the text of my bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 2771

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That (a) section 513 of the Internal Revenue Code of 1954 (defining unrelated trade or business) is amended by adding at the end thereof the following new subsection:

"(f) CERTAIN GAMES.—

"(1) IN GENERAL.—The term 'unrelated trade or business' does not include any trade or business which consists of conducting qualified games.

"(2) QUALIFIED GAME.—For purposes of paragraph (1), the term 'qualified game' means any game—

"(A) of a type in which usually—

"(i) the wagers are placed,

"(ii) the winners are determined, and

"(iii) the distribution of prizes or other property is made, in the presence of all persons placing wagers in such game,

"(B) the conducting of which is not an activity ordinarily carried on on a commercial basis, and

"(C) the conducting of which does not violate any State or local law."

(b) The amendment made by subsection (a) shall apply to taxable years beginning after December 31, 1969.●

By Mr. SASSER:

S. 2772. A bill to amend title 5, United States Code, to revise the pay structure for Federal air traffic controllers; to the Committee on Governmental Affairs.

AIR TRAFFIC CONTROLLERS PAY REFORM ACT OF 1978

● Mr. SASSER. Mr. President, I am today introducing a bill which is designed to correct deficiencies in the classification system and pay structure which applies to the Nation's air traffic controllers. This bill recognizes that there are no other occupations in either the Federal or private sectors comparable to air traffic controllers and that therefore the general schedule and current Civil Service Commission classification methodology cannot be appropriately utilized for controllers.

The Controller Pay Reform Act establishes a unique classification and pay system specifically geared to controllers' duties and functions. The job of air traffic control is one of the most stressful in the entire Federal system and the proposed classification acknowledges the various difficulties associated with the job.

Principally this bill separates controllers from the constraints of the general schedule. The bill also proposes improvements in controller hours of work, reassignment options at the busiest, most difficult facilities, and recognition for the difficulty connected with giving on-the-job training to controller trainees using live traffic.

In short the Air Traffic Controller Pay Reform Act is designed to correct deficiencies and provide a sound, workable, and equitable classification system and pay structure which recognizes the unique, stressful, and highly complex nature of the job performed by this Nation's professional air traffic controllers.●

By Mr. LAXALT:

S. 2774. A bill to extend the boundaries of the Toiyabe National Forest in Nevada, and for other purposes; to the Committee on Energy and Natural Resources.

● Mr. LAXALT. Mr. President, I am pleased to introduce today legislation amending Public Law 91-372, known as the Bible Act, to remove the funding limitation and to expand the existing Toiyabe National Forest boundaries in the State of Nevada.

Mr. President, Lake Tahoe is one of the world's largest alpine lakes and is internationally known for its unique scenic and recreational resources. However, in spite of development controls and public acquisitions, continued development is still threatening the Lake Tahoe Basin environment. To preserve the ecology of the Lake Tahoe Basin, it has been a Federal policy to seek an optimum public land ownership pattern to provide increased public access and use of lands for outdoor recreation, to protect scenic and open space values, and to protect critical watersheds and fish and wildlife habitat. However, at this time, special legislation is needed for the Nevada portion of the Tahoe Basin to extend the Toiyabe National Forest boundaries and to amend the dollar limitation in the act of August 5, 1970, Public Law 91-372.

This law, as amended, extended the boundaries of the Toiyabe National Forest to include approximately 12,920 acres along the Nevada side of Lake Tahoe in order to aid in the protection and management of the resources of the area under principles of multiple use and sustained yield. In addition, there was a ceiling of $12,500,000 placed upon acquisition costs within the boundary extension. A total of $9,389,817 has been expended by the Forest Service within the Bible boundary, but there is an estimated $9,200,000 worth of property that remains to be purchased within the boundaries. Thus, the remaining available limitation of $3,110,183 from Public Law 91-372 will be inadequate to cover the acquisition of the remaining private lands within the Bible boundaries that have been identified as providing significant public benefits.

Additionally, Mr. President, there are other private lands outside the Bible boundaries that are highly desirable for recreation use by the public. These key private parcels include properties where sale for development purposes is likely, as well as properties not threatened by development but highly desirable for recreation purposes. Mr. President, if these lands were ultimately to be developed, it would create additional adverse environmental impacts on the Tahoe Basin and would unquestionably reduce the use and enjoyment of the existing public lands.

But, because these lands lay outside the current national forest boundaries, there is the question as to the Forest Service authority for acquisition. The bill I am now introducing would expand the Toiyabe National Forest boundaries, which, in my view, is the ideal solution.

Mr. President, since the limitations of Public Law 91-372 (Bible Act) will severely restrict the ability of the Forest Service from acquiring private lands that will provide significant public benefits,

I encourage my colleagues to support this legislation to enlarge the Toiyabe National Forest boundary and remove the existing funding limitation of $12.5 million. In my view, this action will greatly increase the recreation opportunities in the Lake Tahoe Basin as well as significantly reduce the risk of environmental degradation due to development.

Mr. President, I ask unanimous consent that the bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 2774

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That to aid in the protection and management of the various resources of the lands, including the protection, improvement, and maintenance of the watershed, wildlife, recreation, and natural environment values thereof, situated in the Lake Tahoe Basin, and to promote the management and protection of such lands under principles of multiple use and sustained yield, the boundaries of the Toiyabe National Forest are hereby extended to include the area described in section 2 hereof. Subject to any valid claims now existing and hereafter maintained, any lands of the United States within such area are hereby added to such National Forest and shall be subject to laws and regulations applicable to the National Forests.

SEC. 2. This Act shall be applicable to the following described lands:

MOUNT DIABLO MERIDIAN, NEVADA

Township 13 North, Range 18 East: Section 3, lots 3 and 4, SE¼NW¼;

Section 9, lots 1 and 2; Section 10, lots 2 and 3, NE¼SW¼, S½SW¼;

Section 14, SE¼SE¼; Section 15, lots 1, 2, and 3, SW¼SW¼, E½W½, E½;

Section 16, lots 1 and 2; Section 22, lots 2, 3, and 4, E½NW¼, E½;

Section 23, E½NE¼, NW¼NW¼, S½NW¼; S½; Section 24, S½NE¼, NE¼SW¼, S½SW¼, Sections 26, 27, and 35, all that portion lying within the State of Nevada.

Township 13 North, Range 19 East: Section 19, all.

Township 14 North, Range 18 East: Section 3, lots 3, 4, and 5, NE¼SW¼, NW¼SE¼, SE¼SE¼; Section 4, lot 3; Section 10, lots 1, 2, 3, 4, and 5, NE¼NE¼, SE¼SE¼; Section 11, SW¼NW¼, W½SW¼; Section 15, lots 1, 2, 3, and 4, W½NE¼, SE¼SE¼; Section 22, lot 1, E½NE¼; Section 27, lots 1, 2, 3, and 4, NE¼NE¼, S½NE¼, SE¼; Section 34, lots 1, 2, 3, and 4, S½NW¼SW¼-NE¼, SW¼SW¼NE¼; Section 35, NW¼NW¼.

The area described aggregates 5,649.38 acres, more or less.

SEC. 3. Funds appropriated and available for acquisition of lands, waters and interests therein, in the National Forest System pursuant to section 6 of the Act of September 3, 1964 (78 Stat. 903), shall be available for the acquisition of any lands, waters, and interests therein, within the area described in section 2 of this Act. In addition, the Act of August 5, 1970 (P.L. 91-372) is hereby amended to remove the limitation on expenditures of $12,500,000 as it applies to the area described in the Act of August 5, 1970 (84 Stat. 694).●

By Mr. HART (by request):

S. 2775. A bill to amend the Atomic Energy Act of 1954, as amended, to improve the nuclear siting and licensing process, and for other purposes; to the Committee on Environment and Public Works.

NUCLEAR SITING AND LICENSING ACT OF 1978

● Mr. HART. Mr. President, at the request of the administration I am pleased to introduce the Nuclear Siting and Licensing Act of 1978. This is a complex and comprehensive bill designed to streamline the licensing process for light water nuclear reactors.

I have not had the opportunity to review personally all of the provisions of the bill. Thus, I am not prepared to endorse the measure. However, I do believe that nuclear licensing reform is an important issue which can and should be addressed by both the Congress and the Nuclear Regulatory Commission, and I commend the administration for moving on this matter.

Light water reactors provide a proven technology to meet part of our expanding electrical power needs. However, the extent to which this technology can and will be used depends on our ability to efficiently assure protection of the environment, and public health and safety. Over the past two decades, the Federal Government has developed a complex procedure aimed at providing assurance. However, in recent years, it has become increasingly apparent that the licensing process is unsatisfactory to all concerned—industry, intervenors, consumers, as well as State and Federal governments.

Dissatisfaction with the existing nuclear regulatory system, together with other questions, have challenged nuclear power as a viable energy resource. In the 1970's, generating electricity with nuclear power appeared to be the wave of the future. Between 1972 and 1974, there were orders for over 100 new plants. Two years later, however, the number of orders began to decrease drastically. There were only three in 1976, and four in 1977. Furthermore, in the past 3 years at least 25 nuclear plants have been canceled and 125 have been delayed—some indefinitely.

Such a significant decline in the nuclear energy industry can be traced only in part to the licensing process. Other factors, such as utility financing difficulties and reduced forecasts of electric power demand, have contributed to the nuclear dilemma. However, to the extent that inefficiencies within the nuclear regulatory process can be eliminated, this country's future nuclear energy prospects will be properly determined more by substance than by procedural considerations.

Mr. President, the Subcommittee on Nuclear Regulation of the Senate Committee on Environment and Public Works will consider this legislation carefully in the months ahead.

Mr. President, I ask unanimous consent that the text of the bill and the section-by-section analysis be printed in the RECORD.

There being no objection, the bill and analysis were ordered to be printed in the RECORD, as follows:

S. 2775

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, that this Act may be cited as the "Nuclear Siting and Licensing Act of 1978."

TABLE OF CONTENTS

Sec. 2. Findings and Purposes

TITLE I—PLANNING, SITING AND LICENSING

Sec. 101. Advance Planning and Early Notice
Sec. 102. Construction Permits and Operating Licenses
Sec. 103. Hearings
Sec. 104. Interim Operating Authority
Sec. 105. Early Site Approval
Sec. 106. Approval of Standardized Facility Designs

TITLE II—FEDERAL AND STATE REVIEWS

Sec. 201. License Applications
Sec. 202. State Environmental Reviews
Sec. 203. Federal and State Coordination
Sec. 204. Bulk Electric Power

TITLE III—INTERVENORS

Sec. 301. Funding for Intervenors

TITLE IV—CONFORMING AMENDMENTS

Sec. 401. Advisory Committee on Reactor Safety
Sec. 402. Antitrust Provisions
Sec. 403. General Provisions
Sec. 404. Revocation
Sec. 405. Modification of License or Site Permit
Sec. 406. Judicial Review
Sec. 407. Atomic Safety and Licensing Board

TITLE V—EFFECTIVE DATES

Sec. 501. Effective Dates

FINDINGS AND PURPOSES

SEC. 2. (a) The Congress, recognizing that a clear and coordinated energy policy consistent with sound safety and environmental controls must include an effective and efficient licensing process for siting, construction, and operation of nuclear power reactors which meet applicable safety and environmental criteria, finds and declares that:

(1) the national interest requires improved planning for future energy supply and demand;

(2) interstate commerce is substantially affected by the siting, construction, and operation of nuclear power reactors;

(3) the national interest requires full and open public participation in planning, siting, and licensing of nuclear power reactors;

(4) determinations respecting the need for new electric generating facilities, including power reactors, and the environmental impacts of such facilities, should be made in a timely manner by competent State or regional authorities and such determinations should not be duplicated by the Federal Government;

(5) where States do not elect to make site-specific environmental or general facility need determinations respecting nuclear power reactors, the national interest in the timely completion of such reviews and determinations warrants Federal exercise of the authority to make these determinations;

(6) it is in the national interest that planning for energy facility siting and need for power determinations be made consistently with national energy priorities, including the minimization of the use of oil and natural gas and the reduction of oil imports;

(7) decisions on the need for energy facilities necessarily entail a balanced consideration of alternative sources of energy including but not limited to conservation, solar energy, coal-fired and nuclear powered generating plants and other economically feasible technologies;

(8) siting and construction of nuclear power reactors may be facilitated by use of standardized nuclear power reactor designs which reduce the need for individual reactor licensing reviews; and

(9) the Nuclear Regulatory Commission should continue to exercise its independent statutory responsibilities to protect the pub-

lic health and safety and the common defense and security, taking into account that absolute safety is an unattainable goal for any energy source, that the cost of additional safety requirements should be given consideration, and that adequate protection of the health and safety of the public, in accordance with high standards established by the Commission, is the paramount consideration.

(b) The purposes of this Act are:

(1) to improve the effectiveness and efficiency of the nuclear power reactor licensing process, consistent with sound environmental, safety and security principles;

(2) to provide for early site reviews and open advance planning that will ensure needed electric generating facility siting;

(3) to protect the public interest and insure early and open public participation in the nuclear power reactor licensing process;

(4) to recognize the interests of the regions, States, and subdivisions thereof in nuclear power reactor siting;

(5) to facilitate the use of standardized facility designs for nuclear power reactors; and

(6) to provide for a more coherent allocation of nuclear power reactor review responsibilities and for cooperation and coordination between the Federal Government and the States.

TITLE I—PLANNING, SITING AND LICENSING

ADVANCE PLANNING AND EARLY NOTICE

SEC. 101. The Atomic Energy Act of 1954, as amended, is amended by adding a new section 112 to read as follows:

"SEC. 112. ADVANCE PLANNING AND EARLY NOTICE.—

"a. The Commission shall take such action as it may deem necessary or desirable, including establishment of Commission priorities in reviewing license or permit applications, to encourage or require persons proposing to construct and/or operate nuclear power reactors and persons proposing to obtain site permits for such facilities as provided by section 193 to engage in open and advance planning for the addition of such generating capacity and the selection of such sites, with opportunity for the Commission and interested persons to participate in such open and advance planning. Such planning shall consider projections of future energy supply and demand developed by a State, authorized interstate or regional organization or the Secretary of Energy. Open and advance planning under this subsection is intended to promote the early identification and resolution of issues which may exist with respect to a potential site or facility. The Commission by rule or regulation shall establish guidelines for participation in open and advance planning and shall establish its priorities for reviewing licenses and permits. Proposed guidelines and priorities shall be published in the Federal Register a minimum of ninety days before they are to take effect. Within sixty days after publication, the Commission shall hold an informal public hearing conducted without regard to section 554, 556 or 557 of Title 5 of the United States Code to consider comments prior to putting final guidelines and priorities into effect.

"b. The Commission shall require by rule or regulation that a person proposing to obtain approval of a standardized facility design, to construct and/or operate a production or utilization facility for industrial or commercial purposes, or to obtain a site permit for such a facility, provide notice of intent to file the application not less than six months prior thereto to the Commission and, except with respect to an application for approval of a standardized facility design, to the State in which the facility is proposed to be located or the site is located. Within ten days of receipt of the notice of intent, the Commission shall publish or cause to be published the notice once in the Federal Register, and twice in such major newspapers serving the affected areas as may be reasonably calculated to notify concerned or affected persons, except that with respect to an application for approval of a standardized facility design, newspaper publication shall be in such major newspapers as may be reasonably calculated to assure a broad national circulation.

"c. The Commission shall participate in the adequacy and reliability programs of the Department of Energy under section 202(a) of the Federal Power Act."

CONSTRUCTION PERMITS AND OPERATING LICENSES

SEC. 102. Section 185 of the Atomic Energy Act of 1954, as amended, is amended to read as follows:

"SEC. 185. CONSTRUCTION PERMITS AND OPERATING LICENSES

"a. All applicants for licenses to construct or modify production or utilization facilities shall, if the application is otherwise acceptable to the Commission, be initially granted a construction permit. The Commission shall not issue a construction permit for a thermal neutron power generation facility unless the State or a political subdivision within the State which has direct authority over electric generating facilities within its jurisdiction or other authorized public authority, after holding a hearing under procedures comparable to those that would be employed by the Commission for determinations under the National Environmental Policy Act of 1969, as amended, certifies to the Commission the specific need for the facility, except that if no public authority is authorized to issue such certification, the requirement for certification shall be waived. Any entity holding a certification hearing under this subsection shall hereinafter be referred to as the State. No less than 60 days prior to the commencement of a State certification hearing under this subsection, the applicant shall present to the State, and shall make available to the public, a detailed statement of the reasons for the need for power and all reasonable conservation alternatives. Such certification shall constitute a definitive determination of need for the power to be provided by the facility for the purposes of any other provision of Federal law. The State shall defend any determination of a certification hearing under this subsection in Federal Court in any action authorized under the National Environmental Policy Act of 1969, as amended. The Commission shall provide for on-site inspection of the construction of a production or utilization facility to insure conformity with the application and the construction permit, as amended, and with the rules and regulations of the Commission. Upon the filing of any additional information needed to bring the original application up to date, and upon finding that the facility authorized has been constructed and will operate in conformity with the application as amended and in conformity with the provisions of this Act and of the rules and regulations of the Commission, and in the absence of any good cause being shown to the Commission why the granting of an operating license would not be in accordance with the provisions of this Act, the Commission shall thereupon issue an operating license to the applicant. For all other purposes of this Act, a construction permit is deemed to be a 'license'.

"b. Notwithstanding any other provision of this section, the Commission may issue to the applicant a combined construction permit and operating license for a thermal neutron power generation facility, if the application contains sufficient information to support the issuance of both a construction permit and operating license in accordance with the rules and regulations of the Commission and to enable the Commission to make the determinations relating to the common defense and security and the public health and safety required by sections 103 and 182. The Commission shall not issue a combined construction permit and operating license unless the State or a political subdivision within the State which has direct authority over electric generating facilities within its jurisdiction or other authorized public authority, after holding a hearing under procedures comparable to those that would be employed by the Commission for determinations under the National Environmental Policy Act of 1969, as amended, certifies to the Commission the specific need for the facility, except that if no public authority is authorized to issue such certification, the requirement for certification shall be waived. Any entity holding a certification hearing under this subsection shall hereinafter be referred to as the State. No less than 60 days prior to the commencement of a State certification hearing under this subsection, the applicant shall present to the State, and shall make available to the public, a detailed statement of the reasons for the need for power and all reasonable conservation alternatives. Such certification shall constitute a definitive determination of need for the power to be provided by the facility for the purposes of any other provision of Federal law. The State shall defend any determination of a certification hearing under this subsection in Federal Court in any action authorized under the National Environmental Policy Act of 1969, as amended. The Commission shall provide for on-site inspection of the construction of the facility to ensure conformity with the application and the combined construction permit and operating license, as amended, and with the rules and regulations of the Commission. Prior to the commencement of operation, the Commission shall find that the facility has been constructed and will operate in conformity with the combined construction permit and operating license, the provisions of this Act, and the rules and regulations of the Commission. Prior to commencement of operation the Commission shall publish a notice of intended operation as required by section 189 a. (2).

"c. In addition to any other authority the Commission may have, the Commission may permit an applicant for a construction permit for a production or utilization facility or combined construction permit and operating license for a thermal neutron power generation facility to prepare the proposed facility site for construction and perform such limited construction activities thereat as the Commission shall by rule, regulation or order determine to be permissible, upon determining (1) that all findings required to be made by the Commission, a State, or an authorized regional organization under the National Environmental Policy Act of 1969, as amended, or under section 195, prior to issuance of a construction permit or a combined construction permit and operating license, have been made, (2) on the basis of the available information and review to date, that there is reasonable assurance that the proposed site is a suitable location for a facility of the general size and type proposed from the standpoint of the protection of the health and safety of the public, and (3) if and to the extent that any safety-related construction activities are sought to be undertaken, that there are no significant unresolved public health and safety issues with respect to such activities. Such activities shall be conducted at the risk of the applicant and shall be subject to termination or modification by the Commission at any time. Safety-related construction activities undertaken pursuant to this subsection shall not proceed more than one year from the com-

mencement of such activities unless the Commission, upon good cause shown, extends such period.

"d. Nothing in this section shall affect the authority of any State or local governmental unit with respect to the issuance of any required permit or license for the siting, construction or operation of a production or utilization facility.

"e. Nothing in this section shall affect the requirement that antitrust review shall be completed prior to the issuance of a construction permit or a combined construction permit and operating license, including where necessary a hearing on antitrust issues as provided by sections 105 c. and 189 a."

HEARINGS

SEC. 103. Subsection 189 a. of the Atomic Energy Act of 1954, as amended, is amended to read as follows:

"a. HEARINGS.—

"(1)(A) Except as provided by section 126 and by paragraph (2) of this subsection, in any proceeding under this Act for the granting, suspending, revoking, renewing or amending of any license (other than a manufacturing license issued pursuant to section 194), construction permit, or application to transfer control, in any proceeding for the suspending, revoking, renewing or amending of a site permit, in any proceeding for the payment of compensation, an award or royalties under section 153, 157, 186 c., or 188, in any proceeding for authorization to prepare a facility site or perform limited construction activities under section 185 c., or in any proceeding for the suspending, revoking, amending or renewing of an approval of a standardized facility design or major subsystem thereof under section 194, the Commission shall grant a hearing upon the request of any person whose interest may be affected by the proceeding, and shall admit any such person as a party to such proceeding. In any proceeding under section 103 or section 104 b. for a combined construction permit and operating license, under section 193 for the granting of a site permit, or under section 194 for approval of a standardized facility design or major subsystem thereof, the Commission shall hold a hearing and shall admit any person whose interest may be affected as a party to such proceeding.

(B) Hearings and decisions on issues arising under this Act in proceedings under this paragraph shall be in accordance with sections 554, 556, and 557 of Title 5 of the United States Code.

(C) Hearings and decisions on issues arising under the National Environmental Policy Act of 1969, as amended, in proceedings under this paragraph shall be in accordance with section 553 of Title 5 of the United States Code except that, only where necessary to resolve particular factual or legal questions which are essential to the outcome of the proceeding, the hearing and decision shall be in accordance with sections 554, 556, and 557 of Title 5 of the United States Code.

(D) Any other proceeding for the issuance or modification of rules and regulations dealing with the activities of licensees or holders of site permits shall be conducted in accordance with section 553 of Title 5 of the United States Code.
